Applications, Actions and Special Notices**APPLICATIONS**

THE CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT APPLICATIONS FOR NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS

This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a General Permit. The applications concern, but are not limited to, discharges related to industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFOs). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92 and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act.

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or amendment
Section III	WQM	Industrial, sewage or animal waste; discharge into groundwater
Section IV	NPDES	MS4 individual permit
Section V	NPDES	MS4 permit waiver
Section VI	NPDES	Individual permit stormwater construction
Section VII	NPDES	NOI for coverage under NPDES general permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 individual permits and individual stormwater construction permits in Sections IV and VI, the Department, based upon preliminary reviews, has made a tentative determination of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the EPA Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on an NPDES application are invited to submit a statement to the contact office noted before the application within 30 days from the date of this public notice. Persons wishing to comment on a WQM permit application are invited to submit a statement to the office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. Comments should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for a public hearing on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after any public hearings are held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of

the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office after which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121-143, the Federal Clean Air Act (act) and regulations adopted under the act.

Eastern Snyder County Regional Authority	P. O. Box 330 Selinsgrove, PA 17870	Snyder

Plan Description: The approved plan for Selinsgrove and Shamokin Dam Boroughs and Monroe and Penn Townships and their Regional Authority calls for a major upgrade of the existing regional wastewater treatment facility; \$9.3 million worth of work to upgrade aging components of the treatment facility will be done. In addition, the existing treatment process will be converted to a vertical loop reactor process to enable the facility to reduce nitrogen in its effluent to around 4 mg/l, thus helping meet the Commonwealth's goal of reducing nutrient contributions to the Chesapeake Bay. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required NPDES permits or WQM permits must be obtained in the name of the municipality or authority as appropriate.

HAZARDOUS SITES CLEAN-UP UNDER THE ACT OF OCTOBER 18, 1988

Prompt Interim Response

Apple Road Site, Bear Creek Area Chemical Site, Concord, Fairview and Parker Townships, Butler County and Perry Township, Armstrong County

The Department of Environmental Protection (Department), under the authority of the Hazardous Sites Cleanup Act (HSCA) (35 P. S. §§ 6020.101—6020.1305), has initiated a prompt interim response at the Apple Road Site, one of the disposal areas that make up the Bear Creek Area Chemical Site. The Bear Creek Area Chemical Site includes, among other things, at least 24 areas where the Department knows or has evidence to suggest that industrial wastes were historically disposed and the surface water, groundwater, soils and sediments that have been contaminated from hazardous substances and contaminants that have migrated from the disposal areas. The individual disposal areas are in Concord, Fairview and Parker Townships, Butler County and Perry Township, Armstrong County. In the site area, the Department is providing approximately 900 homes and businesses with bottled water until a permanent water system is constructed as part of the Groundwater Operable Unit for the Bear Creek Area Chemical Site. A more detailed description of the location for each of the 24 individual disposal areas is in the administrative record compiled for this response. This response has been initiated under sections 501(a) and 505(b) of the HSCA (35 P. S. §§ 6020.501(a) and 6020.505(b)).

The Apple Road Site is in a sparsely populated residential area with undeveloped woodlands that has been subject to surface and deep mining for coal. Active and inactive oil and gas wells are common in the area. The disposal area consists of two separate deposits within an abandoned Upper Freeport Coal seam strip mine (referred to as the "Eastern Deposit Area" and "Western Deposit Area," respectively). The deposits have a combined surface area of approximately 1.0 acre in size. The depth of the waste in the deposits ranges to 19 feet. Any potential surface water runoff and transport off the disposal area would drain into unnamed tributaries of the South Branch of Bear Creek.

The following hazardous substances have been found in waste and environmental media at one or more of the disposal areas and are likely to be present at the Apple Road Site: resorcinol, xylene, benzene, acetone, phenols,

formaldehyde, chloromethane, bromomethane, methyl ethyl ketone, carbon disulfide, trichloroethane, ethyl benzene, nickel, lead, chromium, copper, aluminum sulfate and arsenic.

Additionally, the following contaminants have been detected in waste and environmental media at most of the disposal areas, including the Apple Road Site: metabenzene disulfonic acid, benzene sulfonic acid, parphenol sulfonic acid, sulfonate, total petroleum hydrocarbons and calcium petronate/KSS. Resorcinol and certain contaminants have been detected in the groundwater, surface water and springs at the site.

To date, no peer-reviewed, health or environmental agency-approved health-based advisory levels or maximum contaminant levels exist for resorcinol and the previously mentioned site-related contaminants for water or soils. The 5 parts per billion threshold medium specific concentration for resorcinol contained in 25 Pa. Code Chapter 250, Appendix A, Table 6 is a default value and was not derived from actual toxicological data used in the development of Statewide Health Standards under the Land Recycling Act. Accordingly, the risks associated with the presence of these compounds in drinking water, wastes and contaminated soils are not known. Further, the Department can not conclude that the presence of these substances does not threaten human health and the environment. As a result, the Department has decided that a response action is appropriate to protect public health and safety. For this prompt interim response, the Department considered three alternatives for the site.

Alternative 1—No Action

This alternative would involve no further action to be eliminated or reduce threats posed by the site.

Alternative 2—Multilayer Capping

- Placement of low permeability cap consisting of primary liner, geomembrane layer and 2-foot soil cover consisting of grading layer and topsoil layer.

- Vegetation of soil cover.
- Construction of perimeter stormwater channels.
- Mine spoil embankment stability improvements to minimize erosion and prevent slope failure.

Alternative 3—Removal of Wastes

- Excavation of contaminated wastes and soils.
- Solidification of liquid wastes.
- Offsite disposal in an approved facility.
- Regrading and revegetation of excavated areas.

Each alternative was evaluated with respect to four comparison criteria (1) the extent to which each alternative protects the public health and the environment; (2) the extent to which each alternative complies with or otherwise addresses applicable or relevant and appropriate requirements; (3) the extent to which each alternative is feasible, effective, implementable and permanent; and (4) the relative cost of each alternative. The comparative analysis identified advantages and disadvantages of each alternative, so that tradeoffs between the alternatives could be determined.

Based on the comparative analysis, the Department chose to implement Alternative 2—Multilayer Capping of wastes present on the Apple Road Site. With the anticipated provision of safe drinking water to the public in the area of the Apple Road Site (as well as all over the Bear Creek Area Chemical Site), the release of contaminants to

the groundwater is less of a concern from the human health perspective (that is, exposure through drinking groundwater), eliminating the need to remove waste from that perspective. The only other significant routes of potential exposure to Apple Road waste constituents are via direct contact, surface water run-off into streams and the groundwater to surface water pathway. The capping alternative will effectively eliminate the direct contact and surface water run-off routes. The cost of Alternative 2 is estimated at \$452,4534. The Department is in the process of evaluating (for the site as a whole) what, if any, levels of site contaminants of concern would be acceptable in surface water (that is, from the groundwater to surface water perspective). Once those levels are determined, potential surface water migration pathways at the Apple Road Site (and at other disposal areas) will be evaluated. If those surface water discharge concentrations exceed those that would be protective of ecological receptors in the streams, then they would be mitigated using the best available remedial technologies. This alternative was selected because it protects, in the most cost-effective manner, the public and ecological receptors from direct contact with wastes or surface water runoff contaminated with site-related hazardous substances.

This notice is being provided under section 506(b) of the HSCA (35 P. S. § 6020.506(b)). The administrative record, which contains the information that forms the basis and documents the selection of this response, is available for public review and comment is at the Department's Northwest Regional Office, 230 Chestnut Street, Meadville, PA 16335, Monday through Friday from 8 a.m. to 4 p.m. Telephone the Northwest Regional Office for an appointment, (814) 332-6648.

The administrative record will be open for comment from January 3, 2004, until April 5, 2004. Persons may submit written comments into the record during this time only by sending them to Chuck Tordella, Project Manager, Northwest Regional Office, 230 Chestnut Street, Meadville, PA 16335 or by delivering them to the office in person. In addition, persons may present oral comments, for inclusion in the administrative record, at a public hearing and informational meeting on Tuesday, February 10, 2004, from 1 p.m. to 5 p.m. at the Petrolia Fire Department Social Hall, 200 Argyle Street, Petrolia, PA 16050. Persons wishing to present comments can either register with Freda Tarbell, Northwest Regional Office, (814) 332-6945, in writing or sign in at the meeting to offer formal comments. Persons with a disability who wish to attend the meeting and require auxiliary aid, service or other accommodations to participate in the proceedings should call Freda Tarbell or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD) to discuss how the Department may accommodate their needs.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of

submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

SPECIAL NOTICES

Imposition of a Ban on Connections under 25 Pa. Code § 94.31

Northwest Region: Water Management Program Manager, 230 Chestnut Street, Meadville, PA 16335-3481.

On December 16, 2003, the Department of Environmental Protection (Department) issued an Order to the Borough of Edinboro and to the Municipal Authority of the Borough of Edinboro imposing a ban on all connections to Edinboro's sewerage conveyance system. Under 25 Pa. Code § 94.33, no building permit which may result in a connection to the overloaded sewerage facilities or increase the load to those facilities through an existing connection shall be issued while the ban is in effect.

On May 9, 2000, the Department issued an Administrative Order to the Borough of Edinboro and the Municipal Authority of the Borough of Edinboro finding that Edinboro's sewerage conveyance system is hydraulically overloaded. That order required, among other things, that Edinboro prohibit connections to its overloaded sewerage facilities and develop and submit to the Department a Corrective Action Plan in accordance with 25 Pa. Code § 94.21. On November 14, 2003, the Environmental Hearing Board upheld the Order and specifically held that Edinboro's sewerage conveyance system is hydraulically overloaded; 25 Pa. Code § 94.31 provides that the

Department will impose a ban on connections whenever the Department determines that the sewerage facilities or any portion thereof are hydraulically overloaded and the permittee has failed to implement an approved Corrective Action Plan. Edinboro has failed to comply. Therefore on December 16, 2003, the Department issued the Ban Order.

Request for Comment and Notice of Public Meeting for the Proposed Total Maximum Daily Load (TMDL) for the Surveyor Run Watershed in Clearfield County

The Department of Environmental Protection (Department) will hold a public meeting to discuss and accept comments on a proposed TMDL for the Surveyor Run Watershed in Clearfield County. The meeting will be held on February 19, 2004, at 6:30 p.m. at the Clearfield County Multiservice Center, Daisy Street, Clearfield. Individuals who plan to make a presentation at the public meeting should contact John Mital, Moshannon District Mining Office, (814) 342-8200 by 4 p.m. on Thursday, February 12, 2004. The Department will consider all comments in developing the final TMDL for the Surveyor Run Watershed, which will be submitted to the EPA for approval.

The proposed TMDL for the Surveyor Run Watershed was established in accordance with the requirements of the Clean Water Act, section 303(d). Three stream segments in the Surveyor Run Watershed have been identified as impaired on the 1996, 1998 and 2002 Pennsylvania Section 303(d) list due to depressed pH and/or high concentrations of metals. The listed segments and miles degraded are as follows:

<i>Stream Code</i>	<i>Stream Name</i>	<i>Miles Degraded</i>
26030 (Segment 7164)	Surveyor Run	2.3
26030 (Segment 990819-1345-LMS)	Surveyor Run, Little Surveyor Run	4.0
26031 (Segment 990819-1345-LMS)	Little Surveyor Run, Surveyor Run	4.0

The proposed plan provides calculations of the stream's total capacity to accept metals (aluminum, iron, manganese and acidity), pH and maintain levels below water quality criteria. The applicable water quality criteria are as follows:

<i>Parameter</i>	<i>Criterion value (mg/l)</i>	<i>Total Recoverable/Dissolved</i>
Aluminum	0.75	Total Recoverable
Iron	1.5	Total Recoverable
Manganese	1.00	Total Recoverable
pH	6.0—9.0	N/A

The primary pollutant source for the watershed is abandoned mine workings. This watershed was heavily mined for coal in the late 19th through 20th centuries. The effects of this are still present.

The proposed TMDL was developed using Monte Carlo Simulation to determine long-term average concentrations that each stream segment could accept and still meet water quality criteria 99% of the time. Monte Carlo Simulation allows for the expansion of a data set based on its statistical makeup. Since there was no critical flow condition where criteria were exceeded, the Department used the average flow to express the loading values in the proposed TMDL. The proposed TMDL for the Surveyor

Run Watershed sets allowable loading rates for metals and acidity at specified points in the watershed. Field data collected over the past 2 years was used to establish the proposed TMDL for the Cats Run Watershed. The data and all supporting information used to develop the proposed TMDL are available from the Department.

The Department will accept written comments on the proposed TMDL for the Surveyor Run Watershed. Written comments must be postmarked by March 3, 2004, and sent to John Mital, Geologic Specialist, Department of Environmental Protection, Moshannon District Mining Office, 186 Enterprise Road, Philipsburg, PA 16866, (814) 342-8200, jmital@state.pa.us.

To request a copy of the proposed TMDL and associated information sheet or to obtain directions to the Clearfield County Multiservice Center, contact John Mital at the previous phone number or e-mail address.

The proposed TMDL for the Surveyor Run Watershed can be accessed through the Department's website: www.dep.state.pa.us (DEP Keyword: TMDL). Persons with a disability who require accommodations to attend this meeting should contact the Department at (814) 472-1900 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users) to discuss how the Department may accommodate their needs.

Bond Rate Guidelines for the Calculation of Land Reclamation Bonds on Coal Mining Operations

The Department of Environmental Protection (Department) announces the bond rate guidelines for 2004 for anthracite and bituminous coal mining operations. The authority for bonding coal mining operations is found under The Clean Streams Law (35 P.S. §§ 691.1—691.1001), the Surface Mining Conservation and Reclamation Act (52 P.S. §§ 1396.1—1396.19a), the Coal Refuse Disposal Control Act (52 P.S. §§ 30.51—30.66) and the regulations promulgated thereunder, 25 Pa. Code Chapter 86, Subchapter F (relating to bonding and insurance requirements). The unit costs listed in these guidelines will be used in calculating the land reclamation bonds for surface coal mining operations including surface mines, coal refuse disposal sites, coal refuse reprocessing sites, coal processing facilities and the surface facilities of underground mining operations. The procedures for calculating land reclamation bonds are described in Technical Guidance 563-2504-001, "Conventional Bonding for Land Reclamation—Coal," which is available on the Department's website (www.dep.state.pa.us) on the Public Participation Center page.

The Department may review the adequacy of bonds on existing permits based on the bond rate guidelines at any

time. The Department will conduct these reviews before issuing permit renewals. The Department may conduct similar reviews at the midterm of a permit and before approving a permit revision.

The bond rate guidelines do not apply to bonds assuring replacement of water supplies under section 3.1(c) of the Surface Mining Conservation and Reclamation Act or to bonds ensuring compliance with the requirements of the Bituminous Mine Subsidence and Land Conservation Act (52 P.S. §§ 1406.1—1406.21).

General Methodology

The Department developed the bond rate guidelines for 2004 from a spreadsheet of unit costs provided by the Bureau of Abandoned Mine Reclamation (BAMR). The BAMR spreadsheet lists contract bid amounts for the various unit operations needed to complete reclamation of a mine site for years 1998-2002. A 3-year (2000-2002) average was used to calculate the guidelines.

In general, the bond rate for a given unit operation is the weighted average of the three lowest bids for that unit operation. Not all unit operations included in the BAMR spreadsheet are included in Table 1. Some unit operations listed in the spreadsheet were combined to streamline the guidelines.

In the event that a unit operation necessary to calculate a reclamation bond is not listed in Table 1, then additional cost information available from the BAMR will be used. If enough data is still not available, the rate will be calculated by using costs listed in the construction industry's latest annual cost estimation publications, such as the *Means Estimating Handbook* or *Walker's Building Estimator's Reference Book*.

The bond rate guidelines are available electronically at www.dep.state.pa.us/dep/deputate/minres/BMR/BMRhome.htm. For background information and supporting documentation regarding bonding rate guidelines, contact the Bureau of Mining and Reclamation, Division of Monitoring and Compliance, P. O. Box 8461, Harrisburg, PA 17105-8461, (717) 787-5103.

Effective Date

The bond rate guidelines in this notice become effective January 3, 2004.

Laboratories Approved to Determine Analyses of Blood and/or Serum for Controlled Substances

The following laboratories are licensed by the Department of Health (Department) under the Clinical Laboratory Act (35 P.S. §§ 2151—2165) and/or the Federal Clinical Laboratory Improvement Act of 1967 (42 U.S.C.A. § 263a) and are currently approved by the Department under 28 Pa. Code § 5.50 (relating to approval to provide special analytical services) to perform analyses of blood and/or serum for the determination of controlled substances. This approval is based on demonstrated proficiency in tests conducted by the Department's Bureau of Laboratories. These laboratories are also approved and designated for purposes of the Vehicle Code, 75 Pa.C.S. §§ 1547 and 3755 (relating to chemical testing to determine amount of alcohol or controlled substance; and reports by emergency room personnel), the Fish and Boat Code, 30 Pa.C.S. § 5125 (relating to chemical testing to determine amount of alcohol or controlled substance) and the Game and Wildlife Code, 34 Pa.C.S. § 2502 (relating to chemical test to determine amount of alcohol), as qualified to perform the types of services which will reflect the presence of controlled substances or their biotransformation products in blood and/or serum.

Depending upon their capability and performance in proficiency surveys, laboratories are approved to perform screening and/or confirmatory analyses on blood and/or serum. Laboratories approved to perform screening analyses are designated on the approval list by an "S" followed by the letters "B" for blood and/or "Se" for serum. Laboratories approved to screen both blood and serum would therefore have "SBSe" listed after their laboratory name. Laboratories approved to offer confirmatory analyses will be designated on the approval list by a "C" followed by the letters "B" for blood and/or "Se" for serum. Laboratories approved to perform confirmatory analyses on both serum and blood would therefore have "CBSe" listed after the name of their laboratory.

Screening analyses provide a presumptive indication that a controlled substance is present. Confirmatory testing is used to substantiate screening results.

Persons seeking forensic blood and/or serum analysis services from any of the listed laboratories should determine that the laboratory employs techniques and procedures acceptable for the medicolegal purposes. They should also determine that the director of the facility is agreeable to performing analyses for forensic purposes. Persons seeking the analyses are responsible for specifying the extent to which the presence of a controlled

substance is to be verified. That specification should be predicated upon the purpose for which the analysis is being sought.

The name of a laboratory is sometimes changed but the location, personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test if the name of the facility changed, the clinical laboratory permit numbers of the facilities are included in the lists of approved laboratories before the name of the laboratory at the time the list was prepared.

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsylvania Bulletin*. Questions regarding this list should be directed to M. Jeffery Shoemaker, Ph.D., Director, Division of Chemistry and Toxicology, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape or Braille) should contact Dr. Shoemaker at V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

Laboratories Approved to Determine Blood Alcohol Content

The following laboratories are licensed by the Department of Health (Department) under the Clinical Laboratory Act (35 P. S. §§ 2151—2165) and are currently approved by the Department under 28 Pa. Code §§ 5.50 and 5.103 (relating to approval to provide special analytical services; and blood tests for blood alcohol content) to perform alcohol analyses of blood and/or serum and plasma. This approval is based on demonstrated proficiency in periodic tests conducted by the Department's Bureau of Laboratories.

Since procedures for determining the alcohol content of serum and plasma are identical and results obtained from serum or plasma derived from a blood sample are the same, laboratories that demonstrate reliability in the analysis of serum proficiency testing specimens are approved to analyze both serum and plasma. These laboratories are also approved and designated under the provisions of the Vehicle Code, 75 Pa.C.S. §§ 1547 and 3755 (relating to chemical testing to determine amount of alcohol or controlled substance; and reports by emergency room personnel), the Fish and Boat Code, 30 Pa.C.S. § 5125 (relating to chemical testing to determine amount of alcohol or controlled substance) and the Game and Wildlife Code, 34 Pa.C.S. § 2502 (relating to chemical test to determine amount of alcohol) as qualified to perform the types of specialized services which will reflect the presence of alcohol in blood and/or serum and plasma. Laboratories located outside this Commonwealth may not provide blood and/or serum and plasma alcohol testing services in this Commonwealth unless they are specifically licensed by the Department under the Clinical Laboratory Act.

Persons seeking forensic blood and/or serum and plasma analysis services from the following designated laboratories should determine that the laboratory employs techniques and procedures acceptable for forensic purposes, and that the director of the facility is agreeable to performing determinations for this purpose. The list of approved laboratories will be revised approximately semi-annually and published in the *Pennsylvania Bulletin*.

The name of a laboratory is sometimes changed but the location, personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test if the name of the facility changed, the clinical laboratory permit numbers of the facilities are included in the lists of approved laboratories before the name of the laboratory at the time the list was prepared.

The Department's blood alcohol and serum/plasma alcohol proficiency testing programs are approved by the United States Department of Health and Human Services in accordance with the requirements contained in the Clinical Laboratory Improvement Amendments of 1988 (42 CFR 493.901 and 493.937) which are administered by the Centers for Medicare and Medicaid Services. Participation in these programs may therefore be used to demonstrate acceptable performance for approval purposes under both Federal and Commonwealth statutes.

Questions regarding this list should be directed to Dr. M. Jeffery Shoemaker, Division of Chemistry and Toxicology, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape or Braille) should contact Dr. Shoemaker at the previous address or phone number. Persons who are speech or hearing impaired may use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

The symbols S and B indicate the following:

[Pa.B. Doc. No. 04-29. Filed for public inspection January 2, 2004, 9:00 a.m.]

Laboratories Approved to Determine Urine Controlled Substance Content

The following laboratories are licensed by the Department of Health (Department) under the Clinical Laboratory Act (35 P.S. §§ 2151—2165) and/or the Federal Clinical Laboratory Improvement Act of 1967 (42 U.S.C.A. § 263a) and are currently approved by the Department under 28 Pa. Code § 5.50 (relating to approval to provide special analytical services) to perform analyses of urine for the determination of controlled substances or their biotransformation products. This approval is based on demonstrated proficiency in tests conducted by the Department's Bureau of Laboratories. These laboratories are also approved and designated for purposes of the Vehicle Code, 75 Pa.C.S. §§ 1547 and 3755 (relating to chemical testing to determine amount of alcohol or controlled substance; and reports by emergency room personnel), the Fish and Boat Code, 30 Pa.C.S. § 5125 (relating to chemical testing to determine amount of alcohol or controlled substance) and the Game and Wildlife Code, 34 Pa.C.S. § 2502 (relating to chemical test to determine amount of alcohol), as qualified to perform the types of services which will reflect the presence of controlled substances or their biotransformation products in urine.

Depending upon their capability and performance in proficiency surveys, laboratories are approved to perform screening and/or confirmatory urine drug analyses. Laboratories approved to perform screening tests only are designated on the approval list by an "S" after the laboratory's name. Laboratories approved to perform confirmatory testing only are designated by a "C" following the laboratory's name. Those approved to perform both screening and confirmatory analyses are designated by the letters "SC." Screening analyses provide a presumptive indication that a controlled substance is present. Confirmatory testing is used to substantiate screening results.

Persons seeking forensic urine drug analysis services from any of the listed laboratories should determine that the laboratory employs techniques and procedures acceptable for the purpose. They should also determine that the director of the facility is agreeable to performing analyses for that purpose. Persons seeking the analyses are responsible for specifying the extent to which the presence of a controlled substance is to be verified. That specification should be predicated upon the purpose for which the analysis is being sought.

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsyl-*

vania Bulletin. The name of a laboratory is sometimes changed but the location, personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test if the name of the facility changed, the clinical laboratory permit numbers of the facilities are included in the lists of approved laboratories before the name of the laboratory at the time the list was prepared.

Questions regarding this list should be directed to M. Jeffery Shoemaker, Ph.D., Director, Division of Chemistry and Toxicology, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape or Braille) should contact M. Jeffery Shoemaker at V/TT: (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

Laboratories Approved to Perform Blood Lead and/or Erythrocyte Protoporphyrin Determinations

The following laboratories are licensed in accordance with the Clinical Laboratory Act (35 P. S. §§ 2151—2165) and/or the Federal Clinical Laboratory Improvement Act of 1967 (42 U.S.C.A. § 263a) and are currently approved under 28 Pa. Code § 5.50 (relating to approval to provide special analytical services) to perform analyses of blood for lead or erythrocyte protoporphyrin content. This approval is based on demonstrated proficiency in periodic evaluations conducted by the Bureau of Laboratories of the Department of Health (Department).

Lead poisoning is a reportable noncommunicable disease. Approved laboratories which offer blood lead testing services are required to inform the Department of actual or possible incidents of this condition in accordance with 28 Pa. Code § 27.34 (relating to reporting cases of lead poisoning). These regulations specify the following requirements for reporting by clinical laboratories.

(1) A clinical laboratory shall report all blood lead test results on both venous and capillary specimens for persons under 16 years of age to the Department's Childhood Lead Poisoning Prevention Program, Division of Maternal and Child Health, Bureau of Family Health.

(2) A clinical laboratory shall report an elevated blood lead level in a person 16 years of age or older to the Department's Division of Environmental Health Epidemiology, Bureau of Epidemiology or to other locations as designated by the Department. An elevated blood lead level is defined by the National Institute for Occupational Safety and Health (NIOSH). As of January 26, 2002, the NIOSH defines an elevated blood lead level as a venous blood lead level of 25 micrograms per deciliter ($\mu\text{g}/\text{dL}$) or higher. The Department will publish in the *Pennsylvania Bulletin* any NIOSH update of the definition within 30 days of NIOSH's notification to the Department.

(3) A clinical laboratory which conducts blood lead tests on 100 or more specimens per month shall submit results electronically in a format specified by the Department.

(4) A clinical laboratory which conducts blood lead tests on less than 100 blood lead specimens per month shall submit results either electronically or by hard copy in the format specified by the Department.

(5) A laboratory which performs blood lead tests on blood specimens collected in this Commonwealth shall be licensed as a clinical laboratory and shall be specifically approved by the Department to conduct those tests.

(6) Blood lead analyses requested for occupational health purposes on blood specimens collected in this Commonwealth shall be performed only by laboratories which are licensed and approved as specified in paragraph (5), and which are also approved by the Occupational Safety and Health Administration of the United States Department of Labor under 29 CFR 1910.1025(j)(2)(iii) (relating to lead).

(7) A clinical laboratory shall complete a blood lead test within 5 work days of the receipt of the blood specimen and shall submit the case report to the Department by the close of business of the next work day after the day on which the test was performed. The clinical laboratory shall submit a report of lead poisoning using either the hard copy form or electronic transmission format specified by the Department.

(8) When a clinical laboratory receives a blood specimen without all of the information required for reporting purposes, the clinical laboratory shall test the specimen and shall submit the incomplete report to the Department.

Erythrocyte protoporphyrin determinations may be performed as an adjunct determination to substantiate blood lead levels of 25 $\mu\text{g}/\text{dL}$ or higher. Since erythrocyte protoporphyrin concentrations may not increase as a result of low-level exposures to lead, direct blood lead analysis is the only reliable method for identifying individuals with blood lead concentrations below 25 $\mu\text{g}/\text{dL}$.

Persons seeking blood lead or erythrocyte protoporphyrin analyses should determine that the laboratory employs techniques and procedures acceptable for the purpose for which the analyses are sought. Laboratories offering blood lead analysis only are designated with the letter "L" following the name of the laboratory. Those offering erythrocyte protoporphyrin analysis only are designated with the letter "P." Laboratories offering both services are designated with the letters "LP."

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsylvania Bulletin*. The name of a laboratory is sometimes changed but the location, personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test if the name of the facility changed, the clinical laboratory permit numbers of the facilities are included in the lists of approved laboratories before the name of the laboratory at the time the list was prepared.

The Department's blood lead proficiency testing program is approved by the United States Department of Health and Human Services in accordance with the requirements contained in the Clinical Laboratory Improvement Amendments of 1988 (42 CFR 493.901 and 493.937) which are administered by the Centers for Medicare and Medicaid Services. Participation in these programs may therefore be used to demonstrate acceptable performance for approval purposes under both Federal and Commonwealth statutes.

Questions regarding this list should be directed to Dr. M. Jeffery Shoemaker, Director, Division of Chemistry and Toxicology, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape or Braille) should contact Dr. Shoemaker at V/TT: (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

DEPARTMENT OF TRANSPORTATION

Printing of Internet-Posted Construction Plans and Bid Proposals

Beginning January 5, 2004, the Department of Transportation (Department), Bureau of Design intends to provide access to electronic bid construction plans and bid proposals on the Department's website (www.dot2.state.pa.us) as part of its Engineering and Construction Management System (ECMS). The Department will list the names and addresses of registered business partner printing companies capable of downloading the plans and proposals and selling copies (hardcopy, CDs, and the like) to interested bidders or contractors. The list will be available on the Department's website in the "Business Partner" area.

By this notice, printing companies that intend to reproduce and sell hard copies of construction plans, bid proposal and attachments to prospective contractors, sub-

contractors, material suppliers, disadvantaged business enterprise companies and others are invited to submit business partner registration information to be included on the list of registered ECMS business partners. The instructions for business partner registration are available on the Department's website under "How to Register as a Business Partner." After completing the on-line registration information, the Business Partner Registration Agreement may be printed, signed and returned by mail to ECMS Registration, Department of Transportation, Engineering and Computing Management Division, Bureau of Design, P. O. Box 3662, Harrisburg, PA 17105-3662.

The size of the hard copy plans requested will ordinarily be 11" x 18" (half size) or 22" x 36" (full size) and the bid proposals will be formatted for printing on 8 1/2" x 11" paper. The construction plans will be in TIF format and the bid proposals and attachments will be in PDF format. The printing companies should have the capability to download from the Internet and reproduce documents at the customer's request. A high speed direct connection to the Internet service provider at a transfer speed of 128 KBps to 1.54 MBps to reduce the download time of a large bid package is recommended.

The printing company should be capable of printing from a customer provided CD, electronic requests to the printing company by e-mail or e-mail attachments of selected plan sheets to reproduce in hard copy form. The printing company may be required to ship these hard copy documents to the customer or provide a local address for customer pick up.

The listing of printing companies on ECMS under business partners is provided strictly for informational purposes. Inclusion of any company or any company's services will not constitute an endorsement or advertisement of the company by the Department.

Additional help on business partner registration may be obtained by calling the ECMS Help Desk, (717) 783-7711 between 8 a.m. and 4 p.m., Monday through Friday. The Department will accept business partner registration information beginning January 5, 2004.
