# READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

## ***Pennsylvania Bulletin***

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

## **Adoption, Amendment or Repeal of Regulations**

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances where the agency may omit the proposal step; they still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania*

*Bulletin* before it can take effect. If the agency wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, they must re-propose.

## **Citation to the *Pennsylvania Bulletin***

Cite material in the *Pennsylvania Bulletin* by volume number and page number. Example: Volume 1, *Pennsylvania Bulletin*, page 801 (short form: 1 Pa.B. 801).

## ***Pennsylvania Code***

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

## **How to Find Documents**

Search for your area of interest in the *Pennsylvania Code*.

The *Pennsylvania Code* contains, as Finding Aids, subject indexes for the complete *Code* and for each individual title, a list of Statutes Used As Authority for Adopting Rules and a list of annotated cases. Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

### Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [ ] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

### Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

### Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

#### § 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

**Rule 239. Local Rules.**

\* \* \* \* \*

**Explanatory Comment—2003**

*I. Statewide Practice of Law*

The primary obstacle to the statewide practice of law has been the inability of lawyers to learn how each court of common pleas actually operates, particularly with respect to pre-trial applications. New Rules 239.1 through 239.8 [ **and the amendment to Rule 239 adding new subdivision (c)(7)** ] will eliminate this obstacle through three requirements: (1) the promulgation of local rules which describe the steps that litigants must take to have pre-trial matters decided, (2) the use of a standardized numbering system for the local rules, and (3) the publication of the local rules on the [ **web site of the Administrative Office of Pennsylvania Courts (AOPC) ] Pennsylvania Judiciary's Web Application Portal (http://ujportal.pacourts.us).**

The new rules enable a litigant to obtain the details of a local practice from the [ **AOPC web site** ] **Web Application Portal** by referring to the particular county and the number of the local rule for a specific procedure. For example, new Rule 239.3(c) provides that a court may require any motion relating to discovery to include a certification that counsel has conferred with all interested parties in order to resolve the matter without court action. A common pleas court, which requires such certification, must promulgate a local rule, numbered Local Rule 208.2(e), describing its requirement. Consequently, a litigant can learn from the [ **AOPC web site** ] **Web Application Portal** whether a particular court has promulgated Local Rule 208.2(e) and, if so, the requirements of that rule.

**Rule 239.8. Local Rules. Promulgation. Publication. Effective Date.**

(a) Local rules required by Rules 239.2, 239.3, 239.5, 239.6 and 239.7 shall be promulgated not later than nine months following the date of the Order of the Supreme Court promulgating this rule.

**Official Note:**

\* \* \* \* \*

Local requirements under Rules 239.1 through 239.7 are not effective and enforceable unless local rules are published on the [ **web site of the Administrative Office of Pennsylvania Courts** ] **Pennsylvania Judiciary's Web Application Portal (http://ujportal.pacourts.us).** See subdivision (c) of this rule.

(b) The court promulgating a local rule or an amendment to a local rule pursuant to Rules 239.1 through 239.7 shall transmit a copy to the Civil Procedural Rules Committee which shall then forward a copy to the Administrative Office of Pennsylvania Courts (AOPC) for publication on the [AOPC web site] Pennsylvania Judiciary's Web Application Portal.

Official Note:

\* \* \* \* \*

The Committee may, of necessity arising from judicial automation, direct the court promulgating a local rule or amendment to transmit it to the AOPC or take other action to effect publication on the [AOPC web site] Pennsylvania Judiciary's Web Application Portal (http://ujportal.pacourts.us).

(c) To be effective and enforceable, a local rule or an amendment to a local rule promulgated pursuant to Rules 239.1 through 239.7 shall be

\* \* \* \* \*

(2) published on the [web site of the Administrative Office of Pennsylvania Courts] Pennsylvania Judiciary's Web Application Portal, and

Official Note: The [Administrative Office of Pennsylvania Courts (AOPC)] Pennsylvania Judiciary maintains a web page at http://ujportal.pacourts.us/ containing the texts of local rules promulgated pursuant to Rules 239.1 through 239.7.

\* \* \* \* \*

(d) A local rule or amendment promulgated pursuant to Rules 239.1 through 239.7 shall become effective upon publication on the [web site of the Administrative Office Pennsylvania Courts] Pennsylvania Judiciary's Web Application Portal.

PART I. GENERAL

[231 PA. CODE CH. 3000]

Amendment of Rule 3135 Governing Sheriff's Deed to Real Property and Correction of Deed; No. 443 Civil Procedural Rules; Doc. No. 5

Order

Per Curiam:

And Now, this 2nd day of November, 2005, Rule of Civil Procedure 3135 is amended to read as follows.

This Order shall be processed in accordance with Pa.R.J.A. 103(b) and shall be effective January 1, 2006.

Annex A

TITLE 231. RULES OF CIVIL PROCEDURE

PART I. GENERAL

CHAPTER 3000. JUDGMENTS

Subchapter D. ENFORCEMENT OF MONEY JUDGMENTS FOR THE PAYMENT OF MONEY

Rule 3135. Sheriff's deed to real property. Correction of deed.

(a) When real property is sold in execution and no petition to set aside the sale has been filed, the sheriff, at the expiration of [ten] twenty days after either the filing of the schedule of distribution or the execution sale if no schedule of distribution need be filed, shall execute and acknowledge before the prothonotary a deed to the property sold. The sheriff shall forthwith deliver the deed to the appropriate officers for recording

and for registry if required. Confirmation of the sale by the court shall not be required.

**Official Note: See Rule 3136(a) governing the filing of the schedule of distribution.**

(b) If the sheriff has made a defective return of the execution proceeding or has executed a defective deed, including the erroneous description of the real estate, the court upon petition of the purchaser or the purchaser's successors in title may correct the return or deed or order that a new return or deed be executed.

#### Explanatory Comment

Prior to the present amendment, Rule 3135(a) governing execution sales provided in part that "the sheriff, at the expiration of ten days after the filing of the schedule of distribution, shall execute and acknowledge before the prothonotary a deed to the property sold." There was a gap in the rule because Rule 3136(a) provides that a schedule of distribution need not be filed where the real property is sold to the plaintiff for costs only. The amended rule eliminates this gap. Where a schedule of distribution is not required, the sheriff must execute and acknowledge the deed within twenty days of the date of the sale.

The rule has also been amended by increasing from ten to twenty days the time in which the sheriff must execute and acknowledge a deed in a sale as to which a schedule of distribution is required to be filed. The uniform twenty-day period is therefore applicable in all cases and eliminates potential confusion.

**Maximum Lawful Rate of Interest for Residential Mortgages for the Month of December 2005**

The Department of Banking (Department), under the authority contained in section 301 of the act of January 30, 1974 (P. L. 13, No. 6) (41 P. S. § 301), hereby determines that the maximum lawful rate of interest for residential mortgages for the month of December 2005 is 6 3/4%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. No. 96-221). Further preemption was instituted with the signing of Pub. L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 4.35 to which was added 2.50 percentage points for a total of 6.85 that by law is rounded off to the nearest quarter at 6 3/4%.

The Department will also accept requests for a public hearing on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

**NPDES Permit No. PAI023505002**. On September 6, 2005, the Department of Environmental Protection (Department) issued the permit to **Hemingway Development Limited Partnership** for the discharge of stormwater from construction activities at its proposed project site in Moosic Borough, **Lackawanna County**. A public hearing on the original permit application was held on August 11, 2005. Subsequent to the public hearing and prior to permit issuance, the applicant revised its permit application so that the project discharges stormwater to Stafford Meadow Brook and Spring Brook, rather than only Stafford Meadow Brook as originally noticed. On September 21, 2005, PRIZM Asset Management Company (PRIZM), Preit Services, LCC (PREIT) and Diann Van Louvender filed an appeal with the Environmental Hearing Board (EHB) challenging the Department's issuance of NPDES Permit No. PAI023505002. On September 27, 2005, PRIZM, PREIT and Van Louvender filed a Petition for Supersedeas asking the EHB to supersede NPDES Permit No. PAI023505002 until such time as the underlying appeal is finally decided. On October 24, 2005, after hearing, the EHB issued an Opinion and Order stating that the Petition for Supersedeas is granted in part and denied in part.

In accordance with the EHB's October 24, 2005, Order, the Department hereby renotices the following permit for public comment. The Department shall consider any comments submitted during the 30-day public comment period in deciding whether it wishes to suspend or revoke the permit, to require Hemingway to provide additional information or to take no action with respect to the permit.

The permit remains in effect during the time that the Department renotices the permit, accepts comments and considers them.

#### LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

##### UNDER ACT 2, 1995

##### PREAMBLE 1

**Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).**

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed

remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

**AIR QUALITY**

**PLAN APPROVAL AND OPERATING PERMIT  
APPLICATIONS**

**NEW SOURCES AND MODIFICATIONS**

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (act) and regulations adopted under the act.

The 39.5 mmBtu/hr boiler will have the chain grate stoker replaced and a new packaged Low-NOx burner with flue gas treatment installed. The Plan Approval will subsequently be incorporated into the company's Title V Operating Permit through an administrative amendment in accordance with 25 Pa. Code § 127.450.

Based on the information provided by the applicant and the Department's own analysis, the cofired boiler will emit 15.59 tons of NOx per year, 8.95 tons of PM, 135.87 tons of SOx and 12.5 tons of CO per year. Actual emissions will decrease for both pollutants with the retrofit. The boiler is limited to coal usage of 4,000 tons per 12-month rolling period.

Persons wishing to provide the Department with additional information they believe should be considered may submit the information to the following address. Comments must be received by the Department within 30 days of the last day of publication. Written comments should include the following:

S. §§ 3301—3326); The Clean Streams Law (35 P. S. §§ 691.1—691.1001); the Coal Refuse Disposal Control Act (52 P. S. §§ 30.51—30.66); and The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.21). Mining activity permits issued in response to applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P. The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of an application is available for inspection at the district mining office indicated before an application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for certification.

Written comments, objections or requests for informal conferences on applications may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the district mining office indicated before an application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Where any of the mining activities listed will have discharges of wastewater to streams, the Department will incorporate NPDES permits into the mining activity permits issued in response to these applications. NPDES permits will contain, at a minimum, technology-based effluent limitations as identified in this notice for the respective coal and noncoal applications. In addition, more restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining which may occur will be incorporated into a mining activity permit, when necessary, for compliance with water quality standards (in accordance with 25 Pa. Code Chapters 93 and 95). Persons or agencies who have requested review of NPDES permit requirements for a particular mining activity within the previously mentioned public comment period will be provided with a 30-day period to review and submit comments on the requirements.

Written comments or objections should contain the name, address and telephone number of the person submitting comments or objections; the application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based. Requests for an informal conference must contain the name, address and telephone number of requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor wishes to have the conference conducted in the locality of the proposed mining activities.

### PREAMBLE 3

**The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).**

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

#### **NPDES Permit No. PAI023505002 Public Hearing**

The Department of Environmental Protection (Department) will hold a public hearing to accept comment on individual National Pollutant Discharge Elimination System (NPDES) Permit No. PAI023505002 for discharge of stormwater from construction activities at the proposed Hemingway Development, LP Retail Shops in Moosic Borough, Lackawanna County.

On September 6, 2005, the Department issued NPDES Permit No. PAI023505002 to Hemingway Development Limited Partnership for the discharge of stormwater from construction activities at its proposed project site in Moosic Borough, Lackawanna County. A public hearing on the original permit application was held on August 11, 2005. Subsequent to the public hearing and prior to permit issuance, the applicant revised its permit application so that the project discharges stormwater to Stafford-Meadow Brook and Spring Brook rather than only Stafford-Meadow Brook as originally noticed. On September 21, 2005, PRIZM Asset Management Company (PRIZM), Preit Services, LCC (PREIT) and Diann Van Louvender filed an appeal with the Environmental Hearing Board (Board) challenging the Department's issuance of NPDES Permit No. PAI023505002. On September 27, 2005, PRIZM, PREIT and Diann Van Louvender filed a Petition for Supersedeas asking the Board to supersede

NPDES Permit No. PAI023505002 until a time as the underlying appeal is finally decided. On October 24, 2005, after hearing, the Board issued an Opinion and Order stating that the Petition for Supersedeas is granted in part and denied in part. The Board's order required the Department to renotice the permit application as revised.

The Department shall consider all comments submitted at the public hearing in deciding whether it wishes to suspend or revoke the Permit, to require Hemingway to provide additional information or to take no action with respect to the Permit. The permit remains in effect during the time that the Department renounces the revised application, accepts comments and considers them.

The public hearing will be conducted on Tuesday, December 20, 2005, at 7 p.m. in the Moosic Borough Municipal Building, 715 Main Street, Moosic, PA 18507 by the Department of Environmental Protection, Watershed Management Program, Permitting and Technical Services Section, 2 Public Square, Wilkes-Barre, PA 18711-0790, (570) 826-2511. The NPDES permit proposes the discharge of stormwater from construction activities to Stafford-Meadow Brook and Spring Brook.

The Department requests that individuals wishing to testify at the hearing submit a written notice of intent to Hemingway Development LP Retail Shops Public Hearing, Department of Environmental Protection, Watershed

Management Program, Permitting and Technical Services Section, 2 Public Square, Wilkes-Barre, PA 18711-0790. The Department will accept notices up to the day of the hearing. The Department requests that individuals limit their testimony to ten minutes so that all individuals have the opportunity to testify. The Department can only review comments made with regard to the NPDES permit application.

Written copies of oral testimony are requested. Relinquishing of time to others will not be allowed. Individuals attending the hearing will have the opportunity to testify if they so desire; however, individuals who preregister to testify will be given priority on the agenda.

Persons with a disability who wish to testify and require an auxiliary aid, service or other accommodation should contact Christine Domashinski of the Department at (570) 826-2511 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD) to discuss how the Department can meet their needs.

The NPDES permit is available for review at the Department's Northeast Regional Office in Wilkes-Barre. Contact the Records Management Section at (570) 826-2511 to schedule an appointment to review the application. The permit is also available for review at the Lackawanna County Conservation District offices at (570) 281-9495.

For further information, contact Mark Carmon of the Department's Northeast Regional Office at (570) 826-2511.

## Availability of List of Pennsylvania Industry-Wide Coproducts to Include Reclaimed Asphalt Pavement (RAP)

### Industry-Wide Coproduct No. 1

The Department of Environmental Protection (Department) is proposing the first industry-wide coproduct determination. The Department has determined that reclaimed asphalt pavement (RAP), including mixtures of RAP and clean fill from the milling of the edge of roadway shoulders, that is reused for roadway construction should be included on the list of industry-wide coproducts to be established by the Department under the regulatory authority of 25 Pa. Code § 287.9 (relating to industry-wide coproduct determinations) of the residual waste regulations and the statutory authority of the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

For the purpose of this industry-wide coproduct determination, RAP is defined as small particles (typically up to 1 inch in size) of bitumen and inorganic materials produced by the mechanical grinding of bituminous pavement surfaces that have not been subject to a spill or release of regulated substances. RAP is not the equivalent of used asphalt (typically in chunks greater than 1 inch in size) and thus is not considered to be clean fill under the Department's Management of Fill Policy.

The Department is authorized under the Solid Waste Management Act, The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and 25 Pa. Code § 91.27 (relating to general water quality management permit) and § 287.9 to establish a list of classes of materials as industry-wide coproducts for specific uses if the following conditions are met:

1. Chemical and physical characteristics of the material generated do not vary over time.

RAP is made up of asphalt emulsion and stone aggregate. The materials vary little in the production of asphalt pavement. RAP's chemical and physical composition does not vary over time.

2. Historical use of the material complies with industry standards and specifications.

RAP has been effectively reused for decades as an ingredient in new asphalt pavement and as a roadway aggregate. RAP complies with asphalt industry standards and specifications.

3. Historical use of the material over an extended time period has demonstrated that the material, when used as specified, performs as an effective substitute for an intentionally manufactured product or produced raw material.

RAP has been demonstrated to be an effective substitute for virgin asphalt pavement ingredients and is commonly reused by the asphalt paving industry. This is evident by RAP's conformance with asphalt industry standards and specifications for the production and use of asphalt pavement materials.

4. There is historical documentation that a market for the material and its use exists.

RAP has been historically and effectively reused in the asphalt paving industry. Due to the increasing cost of asphalt emulsions, its use is expected to increase even beyond the current reuse rate.

5. Historical use of the material does not violate the environmental protection acts or regulations thereunder and does not harm or present a threat of harm to public health, safety, welfare or the environment based on an evaluation under 25 Pa. Code § 287.8 (relating to coproduct determinations).

If RAP materials are reused in accordance with the industry-wide coproduct specifications as outlined in the industry-wide coproduct determination, no public health or environmental harm should occur.

The Department has determined on an industry-wide basis that RAP, including mixtures of RAP and clean fill from the milling of the edge of roadway shoulders, is a coproduct in accordance with 25 Pa. Code § 287.9 when used as follows:

1. As an aggregate, a subgrade or a subbase material for roadway construction, when used alone or blended with other materials in a manner that complies with Department of Transportation specifications as outlined in Publication No. 408 for roadway construction directly beneath and contained by a road surface paved with Portland cement concrete or bituminous pavement.

2. As a construction material for compacted roadway shoulder applications, including compacted shoulder backup or compacted shoulder pothole patching material in roadway or driveway apron applications covered with a thin bituminous coating (sealer) that complies with Department of Transportation specifications as outlined in Publication No. 408.

3. As a construction material to construct or repave needed roadway or vehicle use areas such as parking lots or driveways if the application is performed when the RAP contains enough asphalt or additional binder to keep the material in place after compaction by mechanized rolling;

4. In a manner that does not violate the Air Pollution Control Act (35 P. S. §§ 4001—4015) and The Clean Streams Law and the regulations promulgated thereunder.

5. In a manner that does not create a nuisance or is harmful or presents a threat of harm to the public health, safety or the environment.

The use of RAP, including mixtures of RAP and clean fill from the milling of the edge of roadway shoulders, as

a coproduct in accordance with this industry-wide coproduct determination includes its transportation and placement. This proposed industry-wide coproduct determination would allow the reuse of RAP without a permit.

This proposed RAP industry-wide coproduct determination document is available for public comment. Public comments must be submitted by December 19, 2005, and may recommend additional requirements or revisions to the proposed industry-wide coproduct determination. Comments concerning the industry-wide coproduct determination should be directed to Daniel Lapato, Division of Municipal and Residual Waste, Bureau of Waste Management, Rachel Carson State Office Building, P. O. Box 8472, Harrisburg, PA 17105-8472, (717) 787-7381.

Persons interested in obtaining more information or obtaining a paper copy of the proposed industry-wide coproduct determination should contact Peter Arnt, Division of Municipal and Residual Waste at (717) 787-7381. TDD users may contact the Department through the Pennsylvania Relay Service at (800) 654-5984. The proposed RAP industry-wide coproduct determination document is also accessible on the Department's website at [www.dep.state.pa.us](http://www.dep.state.pa.us) (DEP Keyword "Public Participation"; then "Proposals Open for Comment" or DEP Keyword "Residual Waste").

After the close of the 30-day comment period, the Department will publish the final Industry-Wide Coproduct Determination list in the *Pennsylvania Bulletin*.

### Bond Rate Guidelines for the Calculation of Land Reclamation Bonds on Coal Mining Operations

The Department of Environmental Protection (Department) announces the bond rate guidelines for 2006 for anthracite and bituminous coal mining operations. The authority for bonding coal mining operations is found under The Clean Streams Law (35 P. S. §§ 691.1—691.1001), the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a), the Coal Refuse Disposal Control Act (52 P. S. §§ 30.51—30.66) and the regulations promulgated thereunder at 25 Pa. Code Chapter 86, Subchapter F (relating to bonding and insurance requirements). The unit costs listed in these guidelines will be used in calculating the land reclamation bonds for surface coal mining operations including surface mines, coal refuse disposal sites, coal refuse reprocessing sites, coal processing facilities and the surface facilities of underground mining operations. The procedures for calculating land reclamation bonds are described in Technical Guidance 563-2504-001, "Conventional Bonding for Land Reclamation—Coal," which is available on the Department's website ([www.dep.state.pa.us](http://www.dep.state.pa.us)) on the Public Participation Center page.

The Department may review the adequacy of bonds on existing permits based on the bond rate guidelines at any

time. The Department will conduct these reviews before issuing permit renewals. The Department may conduct similar reviews at the midterm of a permit and before approving a permit revision.

The bond rate guidelines do not apply to bonds assuring replacement of water supplies under section 3.1(c) of the Surface Mining Conservation and Reclamation Act (52 P. S. § 1396.3a(c)) or to bonds ensuring compliance with the requirements of the Bituminous Mine Subsidence and Land Conservation Act.

#### *General Methodology*

The Department developed the bond rate guidelines for 2006 from the unit costs for competitively bid contracts for mine reclamation. Contract bid data is available for various unit operations needed to complete reclamation of a mine site for the years 1998-2004. For most categories, a 3-year (2002-2004) average was used to calculate the guidelines. Some categories required another approach due to limited data. For example, there were no contracts in 2004 that included R-3 rock used for channel lining. Therefore the previously calculated guideline was used.

In general, the bond rate for a given unit operation is the weighted average of the three lowest total bids for each contract. However, grading costs are calculated using a weighted frequency distribution in combination with the averages and trend analysis.

In the event that a unit operation necessary to calculate a reclamation bond is not listed in Table 1, any additional cost information available will be used. If

enough data is still not available, the rate will be set from a standard reference such as *Means Building Construction Cost Data* or *Walker's Building Estimator's Reference Book*.

Recent mine reclamation projects have included the removal and disposal of large equipment tires and electrical transformers. The tires were removed by "piggy-backing" with an existing contract with the Department's, Bureau of Waste Management. The cost under this contract is \$300 per tire. The removal of the electrical transformers was competitively bid. These bids were quite complicated based on the size and age of the transformer and the travel distance to an approved disposal location. Therefore a bond rate guideline for transformers has not been calculated. However, the calculated bond for a mine site with transformers will be determined by a site-specific calculation.

The fees associated with the Land Maintenance Bond Program are presented in Table 2. There has been no change in these rates for 2006.

The bond rate guidelines are available electronically at [www.dep.state.pa.us/dep/deputate/minres/BMR/BMR\\_home.htm](http://www.dep.state.pa.us/dep/deputate/minres/BMR/BMR_home.htm). For background information and supporting documentation regarding bonding rate guidelines, contact the Bureau of Mining and Reclamation, Division of Monitoring and Compliance, P. O. ## DEPARTMENT OF PUBLIC WELFARE

### Establishment of an Additional Class of Disproportionate Share Payments

This notice announces the Department of Public Welfare's (Department) intent to establish an additional class of disproportionate share payments for certain qualifying hospitals.

The Department intends to make this payment, in addition to the classes of disproportionate share payments already made under the Medical Assistance (MA) Program, to certain qualifying general acute care hospitals with excluded psychiatric units, which the Department has determined provide a high volume of services to the MA eligible population in this Commonwealth, including a high volume of psychiatric inpatient services, and incur significant uncompensated care costs. This payment is intended to assure the hospitals' continued participation in the MA Program.

The Department intends to consider a hospital eligible for this additional class of disproportionate share payments if the hospital meets all of the following criteria, based on the Fiscal Year (FY) 2002-2003 MA Cost Report, unless specified otherwise:

a) The hospital is enrolled in the MA Program as a general acute care hospital with an excluded psychiatric unit.

b) The hospital provides MA inpatient days of care in excess of the 85th percentile of MA inpatient days provided by all enrolled general acute care hospitals with an excluded psychiatric unit.

c) The hospital's number of MA admissions exceeds the 85th percentile of MA admissions of all enrolled general acute care hospitals with an excluded psychiatric unit.

d) The hospital provides inpatient psychiatric days of care to MA recipients in this Commonwealth in excess of the 90th percentile of these days provided by all enrolled acute care hospitals with an excluded psychiatric unit.

e) The hospital's percentage of uncompensated care to net patient revenue exceeds the 90th percentile of this percentage for all enrolled acute care hospitals with an excluded psychiatric unit based on the Pennsylvania Health Care Cost Containment Council (PHC4) *Financial Analysis 2004*.

f) The hospital's operating margin is less than the 15th percentile of the operating margins of all enrolled acute care hospitals with an excluded psychiatric unit based on PHC4 *Financial Analysis 2004*.

The Department intends to allocate funds from the State General Fund for this additional class of payments. The Department will divide payments proportionately between qualifying hospitals based on the percentage of each qualifying hospital's MA inpatient days to total MA inpatient days of all qualifying facilities. Payment limitations are still applicable, including those limitations that the Commonwealth may not exceed its aggregate annual disproportionate share allotment and that no hospital may receive disproportionate share payments in excess of its hospital-specific limit.

#### *Fiscal Impact*

The FY 2005-2006 fiscal impact, as a result of this disproportionate share payments, is estimated at \$2.225 million (\$1 million in State funds).

#### *Public Comment*

Interested persons are invited to submit written comments regarding this notice to the Department of Public Welfare, Office of Medical Assistance Programs, c/o Deputy Secretary's Office, Attention: Regulations Coordinator, Room 515, Health and Welfare Building, Harrisburg, PA 17120. ### Financial Statement Filing Requirements for 2006; No. 2005-11

Under section 320 of The Insurance Company Law ( 40 P. S. § 443) insurers licensed to transact business in this Commonwealth are required to file financial statements with the Insurance Department (Department) using the statement blanks, instructions and accounting practices and procedures prescribed by the National Association of Insurance Commissioners (NAIC). This notice is being issued to alert all domestic insurers of this Commonwealth to the following developments in financial statement filing requirements that will become effective beginning with statements reporting an insurer's financial condition as of December 31, 2005.

#### 1. *Property and Casualty Actuarial Opinions*

Changes to the NAIC Property/Casualty Annual Statement Instructions (Instructions) for reporting year 2005 include new requirements for actuarial opinions. In addition to Statements of Actuarial Opinion filed with annual financial statements on or before March 1 each year, the new Instructions require, among other things, the filing of an Actuarial Opinion Summary (AOS) by March 15 each year. The AOS must be prepared as prescribed by the Instructions, including, but not limited to:

- The actuary's range of reasonable estimates and/or point estimates for loss and loss adjustment expense reserves.
- The difference between the insurer's carried reserves and the point estimate and/or range of reasonable estimates.
- An explanation of any exceptional adverse development.

Further, the new Instructions require an insurer to notify the Department if its appointed actuary is replaced, including notice of disagreements with the former appointed actuary regarding the content of the actuarial opinion.

Property/casualty insurers will be required to file two copies of the AOS with the Department by March 15, 2006. Because the AOS will be filed separate from the Statement of Actuarial.

Opinion that is due by March 1, the NAIC has developed the following recommended format for the actuary's cover note to the AOS:

Date:  
 Subject: Actuarial Opinion Summary  
 Company: XYZ Insurance Company  
 NAIC#:   
 Appointed Actuary: Janet Actuary

I have attached a copy of the Statement of Actuarial Opinion that I signed on XXX to this Actuarial Opinion Summary. These two documents are closely linked; the Actuarial Opinion Summary is an extension of the Statement of Actuarial Opinion. Therefore, all limitations, caveats and reliances in the Statement of Actuarial Opinion should also be applied to the Actuarial Opinion Summary. Moreover, it is my understanding that, consistent with the Annual Statement Instructions, the Actuarial Opinion Summary will be held confidential by state regulators and is not intended for public inspection.

As with documents, materials or other information in the possession or control of the Department that are considered actuarial reports, workpapers or other materials provided in support of Statements of Actuarial Opinion, the AOS will be maintained as confidential by the Department under 40 P. S. § 443(d).

## 2. *Timely Filings of Annual Audited Financial Reports*

Chapter 147 of 31 Pa. Code (relating to annual audited insurers' financial report required), commonly referred to as the "CPA Audit Rule," requires insurers to have annual audits of their year-end statutory financial statements performed by independent certified public accountants. The annual audited financial reports are required to be filed with the Department by June 1 each year. In 2005, the Department received an unusually high number of requests for 30-day extensions of the filing date under 31 Pa. Code § 147.3(b) (relating to filing and extensions for filing of annual audited financial report). Therefore, beginning in 2006, if any extensions are warranted, the Department intends to limit the number of extensions granted to one 30-day request. Failure to file annual audited financial reports within the time provided will subject insurers to late filing penalties of up to \$200 each day under 40 P. S. § 443(e)(1). The Department encourages all chief executive officers or presidents of domestic insurers in this Commonwealth to meet with the insurer's independent certified public accountant early in the engagement and regularly thereafter to monitor the progress of the annual audit and take whatever steps may be necessary to assure the submission of a timely filing.

Questions concerning this notice may be directed to Stephen J. Johnson, CPA, Deputy Insurance Commissioner, Office of Corporate and Financial Regulation, 1345 Strawberry Square, Harrisburg, PA 17120, (717) 783-2142, fax (717) 787-8557, stjohanson@state.pa.us.

## PENNSYLVANIA PUBLIC UTILITY COMMISSION

### Implementation of 811 Abbreviated Dialing Access to the One Call Notification System; Doc. No. M-00051921

Public Meeting held  
October 27, 2005

*Commissioners Present:* Wendell F. Holland, Chairperson; James H. Cawley, Vice Chairperson; Bill Shane; Kim Pizzingrilli; Terrance J. Fitzpatrick

#### Interim Implementation Order

*By the Commission:*

On March 14, 2005, the Federal Communications Commission (FCC) issued its *In the Matter of the Use of N11 Codes and Other Abbreviated Dialing Arrangements Sixth Report and Order*, FCC 05-59, CC Docket No. 92-105 (*Sixth Report and Order*) that, inter alia, designated 811 as the national abbreviated dialing code to be used by state One Call notification systems for providing advanced notice of excavation activities to underground facility operators in compliance with the federal Pipeline Safety Improvement Act of 2002 (Pipeline Safety Act)<sup>1</sup>. By this Order, the Commission requests comments for developing an implementation plan for 811 abbreviated dialing access to the Pennsylvania One Call notification system. We will establish a 30-day Comment period and 10-day Reply Comment period on this matter.

In 1974, the Pennsylvania General Assembly established the One Call system as a way to provide for public safety by preventing damage to buried utilities. One Call provides a single telephone number for contractors, designers or any other person covered by the enacting legislation to call to notify owners of underground utility lines and pipes of the caller's intent to use powered equipment for excavating, tunneling, demolition or similar work. *Underground Utility Line Protection Act*, Act 287 of 1974, as amended by Act 199 of 2004, 73 P. S. §§ 176, et seq.

The Pennsylvania One Call system handles five different types of calls—design calls, emergency calls, routine location requests, demolition work calls and appointment calls. “Design calls” are calls regarding drawings that are prepared for excavations that require design notification; a design notice is meant to allow the designer to plan the new work around existing facilities in compliance with the law. “Emergency calls” address those sudden or unforeseen occurrences involving a clear and immediate danger to life or property, including but not limited to, serious breaks or defects in a facility owner's lines. (see 73 P. S. § 176); emergency calls include damage reporting calls and reports of an odor of natural gas, even if they are non-excavation related calls. Routine location request calls are calls of notification for excavation work at a

designated work location and where the request is limited to the area described in the notification call. Demolition work calls are calls regarding notification for demolition work. Appointment calls are calls by excavators for job site meetings with facility owners in order to show the limits and schedule of the work when there is difficulty in describing the proposed excavation area or when the excavator chooses to call a preconstruction meeting with facility owners.

The United States Department of Transportation (DOT), pursuant to the Transportation Equity Act for the 21st Century, *Transportation Equity Act for the 21st Century*, Pub. L. No. 105-178, § 6105, 112 Stat. 107 (1998),<sup>2</sup> established a national One Call notification program. On December 17, 2002, President Bush signed the Pipeline Safety Act into law. The Pipeline Safety Act, *inter alia*, is designed to strengthen the federal government's support for the One Call programs and requires the DOT, in consultation with the FCC, to "provide for the establishment of a 3-digit nationwide toll-free telephone number system to be used by State one-call notification systems."<sup>3</sup>

During January 2003, the North American Numbering Council (NANC) formed the abbreviated Dialing for One Call Notification Issue Management Group (DIG IMG) to identify and analyze the impact of employing the various abbreviated dialing options to implement the Pipeline Safety Act. The DIG IMG considered three possible alternatives for a 3-digit code to access One Call centers: N11 codes, codes using a leading star or number sign, and easily recognizable codes, and presented NANC with a report addressing these options. Upon reviewing the report, the NANC concluded that the best solution, within the framework of the existing statute, would be to assign an N11 code, specifically 811, to access One Call centers.<sup>4</sup>

On August 28, 2003, to initiate implementation of the Pipeline Safety Act, the DOT filed a Petition for Rulemaking at the FCC requesting the assignment of a 3-digit toll-free telephone number to access One Call centers throughout the country. On May 14, 2004, the FCC released a Notice of Proposed Rulemaking (NOPR) seeking comment on various abbreviated dialing arrangements, including those considered and recommended by the NANC, that could be used by state One Call notification systems in compliance with the Pipeline Safety Act. The FCC sought comments on the following: (1) whether an N11 code, a code using a leading star or number sign, or another 3-digit number should be assigned to comply with the Pipeline Safety Act, and (2) implementation issues such as the integration of existing One Call center numbers, an appropriate implementation timeframe for each proposed abbreviated dialing arrangement, and whether the FCC should delegate authority to state commissions to address implementation issues.

On March 14, 2005, the FCC released the Sixth Report and Order <http://hraunfoss.fcc.gov/edocs/public/attachmatch/FCC-05-59A1.doc> and <http://hraunfoss.fcc.gov/edocs/public/attachmatch/FCC-05-59A2.doc>. In the *Sixth Report and Order*, the FCC concluded that an N11 code was the best solution, within the framework of the federal statute, for access to the One Call centers. It

<sup>4</sup> NANC Recommendation at pp. 1-2; Letter to William Maher, Chief, Wireline Competition Bureau, from Robert C. Atkinson, Chair, North American Numbering Council, dated May 27, 2004. In that letter the NANC indicated, however, that its preferred solution would be for Congress to amend the statute to provide for the establishment of a toll-free number rather than an abbreviated dialing code to access One Call Centers.

designated 811 as the national abbreviated dialing code to be used by state One Call notification systems for providing advanced notice of excavation activities to underground facility operators in compliance with the Pipeline Safety Act. By selecting the N11 designation, the FCC rejected other options including codes using a leading star or number sign, and an easily recognizable code as these alternatives were impractical, costly to implement and could delay for years the availability of a national One Call number. In addition, the FCC rejected the option of sharing an existing N11 code, such as 911, for the purpose of One Call. The FCC noted that shared use could result in customer confusion and misrouting when dialing a shared N11 Code, and that the confusion could increase the potential of deterring excavators from using the notification system and resulting in reducing the effectiveness of the One Call centers. The FCC found that the use of a national abbreviated dialing code will enhance public safety and strengthen homeland security by streamlining the advance notification of excavation activities and emergency notification procedures. The FCC also held that an abbreviated dialing code for providing advanced notice of excavation activities to underground facility operators will eliminate the need for each state One Call notification system to utilize different numbers, and that a single nationwide abbreviated dialing code would increase public awareness and the use of One Call services.

The FCC also addressed implementation issues, which included integration of existing One Call center numbers, originating switch location, the implementation period, and the role of state commissions. On the issue of existing One Call center number integration, the FCC wanted to ensure that calls to One Call centers are toll-free. In order to ensure that the call would be toll free, the FCC concluded that One Call centers should provide carriers with a toll-free number, which can be an 8YY number or any number that is not an IntraLATA toll call, from the area to be served for use in implementing 811. Thus, when a caller dials 811, the carriers will translate 811 into the correct 7- or 10-digit number to reach the appropriate One Call center. The FCC concluded that by implementing this requirement it will both simplify call routing and ensure that callers do not incur toll charges as mandated by the statute.

Regarding the switch location, the FCC directed carriers to use either the NPA-NXX or the originating switch to determine the appropriate One Call center to which a call should be routed. The FCC addressed wireline and wireless originating calls. For the wireline-originated calls, the originating switch location or the NPA-NXX will determine the One Call center to which the call is sent. For the wireless-originated calls, the originating Mobile Switch Center will determine the One Call center to which the call is sent. The FCC reasoned that by adopting this approach it gave all carriers the flexibility to utilize the most efficient and cost-effective method for routing calls to appropriate state One Call centers and the approach was competitively neutral.

The FCC also determined that based on the record a reasonable implementation period would be two years from publication of the order in the *Federal Register*. In addition, the FCC deferred to the expertise of the carriers, in cooperation with the individual states, to develop and determine the most appropriate technological means of implementing 811 access to One Call services, as determined by the carriers' particular network architecture.

The FCC's *Sixth Report and Order* held that the 811 abbreviated dialing code shall be deployed ubiquitously by carriers throughout the United States for use by all telecommunications carriers, including wireline, wireless and payphone service providers that provide access to state One Call centers. The FCC also held state commissions to be in the best position to address issues associated with implementing the abbreviated dialing arrangement because many of the One Call centers were developed by, or under the auspices of, the state commissions. Thus, pursuant to section 251(e) of the Telecommunications Act of 1996, the FCC delegated authority to the state commissions to address technical and operational issues associated with the implementation of nationwide 811.<sup>5</sup>

Implementing 811 abbreviated dialing in Pennsylvania will enable individuals and entities to dial only three digits to access our One Call system. The proposed simplified dialing will make the public more inclined to use the One Call system. For these reasons as well as for those addressed in the FCC's analysis in the *Sixth Report and Order*, implementing the 811 abbreviated dialing is in the public interest.

To assist us with 811 implementation in Pennsylvania, we are hereby requesting comments on the following issues in addition to any others commenters may consider pertinent: (1) guidelines for processes required to implement of 811; (2) attributive methods for cost recovery, if necessary; (3) the best method(s) of notification of the abbreviated dialing code for applicable businesses, industry and utilities (e.g., trade/industry publications in the utility and construction sectors); (4) development of a public/consumer notification program (press releases, directory changes, bill inserts, etc.); (5) requirements regarding input to the Local Exchange Routing Guide (LERG); (6) the need for system testing and/or trial period; and (7) what can and should be done, if anything, about misdials.

Based on comments received the Commission will develop a tentative implementation plan. We request comments and suggestions from interested parties including business and industry, the general public and the statutory advocates;

Therefore,

*It Is Ordered That:*

1. An original and eight copies of comments regarding Pennsylvania's implementation of national 811 dialing for access to our existing underground facility location system (One Call) shall be filed within 30 days from the date of publication in the *Pennsylvania Bulletin*. # Title 58—RECREATION

## PENNSYLVANIA GAMING CONTROL BOARD

[58 PA. CODE CHS. 405, 441 AND 443]

### Final Temporary Regulations; Category 2 and 3 Slot Machine Licenses

The Pennsylvania Gaming Control Board (Board), under the authority of 4 Pa.C.S. § 1202(b)(14) (relating to general and specific powers), adopts temporary regulations to facilitate implementation of 4 Pa.C.S. Part II (relating to gaming), enacted by the act of July 5, 2004 (P. L. 572, No. 71) (Act 71). The Board's temporary regulations will be added to Part VII (relating to Gaming Control Board). Chapter 405, entitled Bureau of Investigations and Enforcement, is added to Subpart A, General Provisions. Sections 441.13 and 441.14, entitled notification of anticipated or actual changes in key employee qualifiers or key employees and notification of new financial sources, are added to Chapter 441, Slot Machine Licenses, of Subpart C, entitled Slot Machine Licensing. Sections 443.4 and 443.5, entitled Category 2 slot machine licenses and Category 3 slot machine licenses are added to Chapter 443, Categories of Licensure, of Subpart C, entitled Slot Machine Licensing.

#### *Purpose and Background*

Under 4 Pa.C.S. § 1203 (relating to temporary regulations), the Board is required to promulgate temporary regulations to facilitate the prompt implementation of Act 71. The regulations are necessary to enhance the credibility of the licensed operation of slot machines and associated equipment in this Commonwealth and to carry out the policy and purposes of the Board. In adopting these temporary regulations, the Board has considered the public comments submitted to the Board, including comments from various State agencies, legislators and other interested parties. The Board has also reviewed the regulatory practices of other Commonwealth agencies and other gaming jurisdictions.

To promulgate the temporary regulations in accordance with customary rulemaking procedure, the Board published draft regulations at 35 Pa.B. 4699 (August 13, 2005). A 30-day public comment period was provided.

Under 4 Pa.C.S. § 1203, the temporary regulations adopted by the Board will expire no later than 3 years following the effective date of Act 71 or upon promulgation of regulations as generally provided by the law. These temporary regulations are not subject to sections 201—205 of the act of July 31, 1968 (P. L. 769, No. 240) (45 P. S. §§ 1201—1205), known as the Commonwealth Documents Law (CDL), or to the Regulatory Review Act (71 P. S. §§ 745.1—745.15).

#### *Comment*

The Board received public comment from approximately 12 interested parties, including State and local government officials, industry representatives and citizens. The Board thoroughly reviewed and considered all comments submitted. All public comments received by the Board are available for review on the Board's website, [www.pgcb.state.pa.us](http://www.pgcb.state.pa.us). To respond to the comments in the most efficient manner, the Board has selected representative comments and formulated responses to these comments. These comments and responses are published on the Board's website.

#### *Paperwork*

The Board will be publishing Category 2 and Category 3 applications and other necessary forms for the administration of licensing Category 2 and Category 3 slot machine licensees. The Board is developing a docket process to monitor and track submitted applications.

The Board will publish notices in the *Pennsylvania Bulletin* identifying the filing period for applications, the completion date and those facilities who have been awarded licenses by the Board.

#### *Financial Impact*

Act 71 and the regulations will provide for the implementation and management of gaming within this Commonwealth and the collection of fees and taxes from entities and individuals authorized by the Board to be employed by, provide gaming related services to or operate gaming facilities.

The appropriations from the Commonwealth for the implementation of Act 71 and costs of administering 4 Pa.C.S. Part II will be reimbursed by the licensed gaming entities as specified within Act 71. Individuals and entities that wish to obtain licenses as gaming entities shall pay to the gaming fund significant licensing fees to obtain the authority to do business within this Commonwealth. Part of these fees will reimburse the Board and the Pennsylvania State Police for licensing processes and background investigations. The licensing and registration of individuals and other classes of licensees will be reimbursed by the individuals and or licensees through fees established by the Board.

It is anticipated that all expenses of the Board and all associated activities will be reimbursed by the applicants and gaming entities as previously specified. The Board will have no financial impact on the State budget.

#### *Statutory Authority*

Section 1203 of 4 Pa.C.S. provides the Board authority to adopt and publish temporary regulations to implement the policies and purposes of Act 71.

#### *Regulatory Review*

Under 4 Pa.C.S. § 1203, the Board may adopt temporary regulations that are exempted from the Regulatory Review Act and sections 201—205 of the CDL. Section 1203 of 4 Pa.C.S. provides that the Board's authority to adopt regulations will expire 2 years from the effective date of 4 Pa.C.S. Part II.

#### *Findings*

The Board finds that:

(1) Under 4 Pa.C.S. § 1203, the temporary regulations are exempt from the requirements of the Regulatory Review Act and sections 201—205 of the CDL.

(2) A 30-day public comment period was held prior to the adoption of the temporary regulations. All comments received by the Board were reviewed and considered.

(3) The adoption of the temporary regulations provided by this order is necessary and appropriate for the administration of the authorizing statute.

#### *Order*

The Board, acting under the authorizing statute, orders that:

(a) The Board acting under the authority of the Act 71, adopts as its final-form temporary regulations, the draft regulations adopted by resolution at the September 28,

2005, Board meeting. The temporary regulations pertain to general licensing standards for slot machine license applicants, specific licensing standards for Category 1 slot machine license applicants and compulsive and problem gambling requirements for slot machine licensees.

(b) The following temporary regulations of the Board, 58 Pa. Code, are added: §§ 405.1—405.5, 441.13—441.14 and 443.4—443.5 to read as set forth in Annex A.

(c) The temporary regulations are effective September 28, 2005.

(d) The temporary regulations will be posted in their entirety on the Board's website and in the *Pennsylvania Bulletin*.
