READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances where the agency may omit the proposal step; they still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania*

Bulletin before it can take effect. If the agency wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, they must re-propose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number and page number. Example: Volume 1, *Pennsylvania Bulletin*, page 801 (short form: 1 Pa.B. 801).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*.

The *Pennsylvania Code* contains, as Finding Aids, subject indexes for the complete *Code* and for each individual title, a list of Statutes Used As Authority for Adopting Rules and a list of annotated cases. Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

**SUBSCRIPTION INFORMATION: (717) 766-0211
GENERAL INFORMATION AND FINDING AIDS: (717) 783-1530**

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

TITLE 231. RULES OF CIVIL PROCEDURE

PART I. GENERAL

CHAPTER 1910. ACTIONS FOR SUPPORT

Rule 1910.16-2. Support Guidelines. Calculation of Net Income.

Generally, the amount of support to be awarded is based upon the parties' monthly net income.

* * * * *

(b) *Treatment of Public Assistance, SSI Benefits and Social Security Payments to a Child Due to a Parent's Death, Disability or Retirement.*

(1) Neither public assistance nor Supplemental Security Income (SSI) benefits shall be counted as income for purposes of determining support.

(2) Social Security Derivative Benefits.

(A) This subdivision (A) shall only be applied if the child is receiving Social Security derivative

benefits as a result of the obligor's retirement or disability. It shall not apply if the benefits are the result of the obligee's retirement or disability. If a child for whom support is sought is receiving Social Security benefits as a result of **[a parent's] the obligor's retirement [, death]** or disability, the benefits the child receives shall be added to the combined monthly net incomes of the obligor and the obligee to calculate the income available for support on the vertical axis of the basic child support schedule set forth in Rule 1910.16-3. The presumptive amount of support as set forth on the schedule at the combined income of the obligee, obligor and child's benefits shall then be **[reduced by the amount of the child's benefits before apportioning the remaining support obligation]** apportioned between the parties pursuant to Rule 1910.16-4. **After such apportionment, the amount of the child's benefit then shall be deducted from the obligor's share of the basic support amount.**

(B) If a child for whom support is sought is receiving Social Security benefits as a result of the obligee's retirement or disability, the benefits shall be added to the obligee's net monthly income and the amount of support calculated without any additional adjustment. The amount of the child's benefit will be included in the obligee's net monthly income on line 4 of the formula at Rule 1910.16-4. It shall not be added on line 6 or subtracted on line 9 or line 12 of the formula.

(C) For purposes of determining the support obligation of a surviving parent when the child is receiving benefits as the result of the other parent's death, the benefits the child receives shall be added to the combined monthly net incomes of the obligor and the obligee to calculate the income available for support on the vertical axis of the basic child support schedule set forth in Rule 1910.16-3. The presumptive amount of support as set forth on the schedule at the combined incomes of the obligee and the obligor, plus the child's benefits, shall then be reduced by the amount of the child's benefits before apportioning the remaining support obligation between the parties. The income of a non-parent obligee who is caring for a child but has no support obligation to that child shall include only those funds the obligee is receiving on behalf of the child.

Example 1. If the obligor has net income of \$1,200 per month; the obligee has net monthly income of \$800; and the child receives Social Security derivative benefits of \$300 per month as a result of **[either]** the obligor's **[or obligee's]** retirement or disability, then the total combined monthly net income is \$2,300. Using the schedule at Rule 1910.16-3 for one child, the amount of support is \$568 per month. **[From that amount, subtract the amount the child is receiving in Social Security derivative benefits (\$568 minus \$300 equals \$268). Then, apply]** Apply the formula at Rule 1910.16-4 to apportion the **[remaining]** basic child support amount of **[\$268] \$568** between the obligor and the obligee in proportion to their respective incomes. The obligor's \$1,200 net income per month is 60% of the total of the obligor's and the obligee's combined net monthly income. Thus, **under the formula,** the obligor's support obligation would be 60% of **[\$268] \$568,** or **[\$161] \$341,** per

month. From that amount, subtract the amount the child is receiving in Social Security derivative benefits (\$341 – \$300 = \$41). The obligor's basic support obligation is \$41.

* * * * *

Rule 1910.16-4. Support Guidelines. Calculation of Support Obligation. Formula.

THE CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT APPLICATIONS FOR NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS

This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a general permit. The applications concern, but are not limited to, discharges related to industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFOs). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92 and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act.

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or amendment
Section III	WQM	Industrial, sewage or animal waste; discharge into groundwater
Section IV	NPDES	MS4 individual permit
Section V	NPDES	MS4 permit waiver
Section VI	NPDES	Individual permit stormwater construction
Section VII	NPDES	NOI for coverage under NPDES general permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 individual permits and individual stormwater construction permits in Sections IV and VI, the Department, based upon preliminary reviews, has made a tentative determination of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the EPA Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on an NPDES application are invited to submit a statement to the regional office noted before an application within 30 days from the date of this public notice. Persons wishing to comment on a WQM permit application are invited to submit a statement to the regional office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. Comments should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for a public hearing on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may

request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (act) and regulations adopted under the act.

PA-32-00059B. Reliant Energy Northeast Management Co. (121 Champion Way, Suite 200, Canonsburg, PA 15317-7625) for construction of a coal preparation plant at their Conemaugh Power Plant in West Wheatfield Township, **Indiana County**.

Under 25 Pa. Code § 127.44(a), the Department of Environmental Protection (Department) intends to issue a Plan Approval to the Reliant Energy Northeast Management Company (121 Champion Way, Suite 200, Canonsburg, PA 15317-7625) to allow the construction of a Coal Preparation Plant at their Conemaugh Power Plant in West Wheatfield Township, Indiana County.

PA 61-210A: Glenn O. Hawbaker, Inc.—Barkeyville Plant (711 East College Avenue, Bellefonte, PA) construction of an asphalt plant in the Borough of Barkeyville, Venango County.

Under 25 Pa. Code § 127.48, the Department of Environmental Protection (Department) is holding a combined public meeting and hearing to receive testimony from the public on draft Plan Approval 61-210A. The combined public meeting and hearing will be held on March 8, 2007, at 7 p.m. in the Barkeyville Borough Hall.

Plan Approval No. 61-210A is for construction of an asphalt plant, which would be at 1041 Stevenson Road, Harrisville, Borough of Barkeyville, Venango County. The asphalt plant would be owned and operated by Glenn O. Hawbaker, Inc., 711 East College Avenue, Bellefonte. The asphalt plant would be limited to producing 560,000 tons of asphalt per year and would combust natural gas, Nos. 2—6 fuel oils, reprocessed oils, biodiesel, coal or any combination of the fuels. Based on the information provided by the applicant and the Department's own analysis, the asphalt plant would emit 8.96 tons of VOCs per year, 28 tons of NOx per year and 37.80 tons of CO per year.

The Plan Approval will contain recordkeeping and operating restrictions designed to keep the facility operating within all applicable air quality requirements.

Since the technology involved in combusting the coal is new, this plan approval would allow coal to be combusted in the asphalt plant until the stack test is performed. The stack test will be performed within 180 days of start-up of the asphalt plant or before the end of the current operating season. The results of the stack test and a BAT analysis will be used to determine SOx emission limits for the combustion of coal and will be incorporated into a revised plan approval.

Copies of the application, Department's analysis and other documents used in the evaluation are available for public inspection between the hours of 8 a.m. and 4 p.m. weekdays at the Department's Northwest Regional Office at 230 Chestnut Street in Meadville. This plan approval does not authorize emissions increases that would subject the facility to the prevention of significant deterioration requirements in 25 Pa. Code Chapter 127, Subchapter D and/or the new source review requirements in Subchapter E.

Plan Approval authorizes the temporary operation of the sources covered by this Plan Approval provided the following conditions are met (25 Pa. Code § 127.12b):

The owner/operator shall submit written Notice of the Completion of Construction and the operator's intent to commence operation at least 5 days prior to the completion of construction. The Notice shall state the date when construction will be completed and the date when the operator expects to commence operation.

Operation of the sources covered by this Plan Approval is authorized only to facilitate the start-up and shake-down of sources and air cleaning devices, to permit operations pending the issuance of an Operating Permit, or to permit the evaluation of the source for compliance with all applicable regulations and requirements.

Upon receipt of the Notice of the Completion of Construction from the owner/operator the Department shall authorize a 180-day Period of Temporary Operation of the sources starting on the date of commencement of operation. This notice submitted by the owner/operator, prior to the expiration of this Plan Approval, shall modify the Plan Approval expiration date. The new Plan Approval expiration date shall be 180 days from the date of commencement of operation.

Upon determination by the owner/operator that the sources covered by this Plan Approval are in compliance with all conditions of the Plan Approval the owner/operator shall contact the Department's reviewing engineer and schedule the Initial Operating Permit Inspection.

Upon completion of Initial Operating Permit Inspection and determination by the Department that the sources covered by this Plan Approval are in compliance with all conditions of the Plan Approval the owner/operator shall submit a revision to the Conemaugh Power Plant Title V Operating Permit (TVOP), at least 60 days prior to the expiration date of the Plan Approval, to incorporate the sources covered by this Plan Approval into the TVOP.

The owner/operator may request an extension of the 180-day Period of Temporary Operation if compliance with all applicable regulations and Plan Approval requirements has not been established. The extension request shall be submitted in writing at least 15 days prior to the end of the Period of Temporary Operation and shall provide a description of the compliance status of the source. The extension request shall include a detailed schedule for establishing compliance and the reasons compliance has not been established. This Period of

Temporary Operation may be extended for additional limited periods, each not to exceed 120 days, by submitting an extension request as described above.

If, at any time, the Department has cause to believe that air contaminant emissions from the sources listed in this plan approval may be in excess of the limitations specified in, or established pursuant to this plan approval or the permittee's operating permit, the permittee may be required to conduct test methods and procedures deemed necessary by the Department to determine the actual emissions rate. The testing shall be conducted in accordance with 25 Pa. Code Chapter 139, when applicable, and in accordance with any restrictions or limitations established by the Department at such time as it notifies the company that testing is required.

Persons wishing to provide the Department with additional information that they believe should be considered prior to the issuance of the Plan Approval may submit the information to the Department at the address shown as follows. A 30-day comment period, from the date of this publication, will exist for the submission of comments. Each written comment must contain the following:

COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law (35 P. S. §§ 691.1—691.1001); the Coal Refuse Disposal Control Act (52 P. S. §§ 30.51—30.66); and The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.21). Mining activity permits issued in response to applications will also address the applicable permitting requirements of the following statutes: the Air

Pollution Control Act (35 P. S. §§ 4001—4015); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of an application is available for inspection at the district mining office indicated before an application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for certification.

Written comments, objections or requests for informal conferences on applications may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the district mining office indicated before an application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Where any of the mining activities listed will have discharges of wastewater to streams, the Department will incorporate NPDES permits into the mining activity permits issued in response to these applications. NPDES permits will contain, at a minimum, technology-based effluent limitations as identified in this notice for the respective coal and noncoal applications. In addition, more restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining which may occur will be incorporated into a mining activity permit, when necessary, for compliance with water quality standards (in accordance with 25 Pa. Code Chapters 93 and 95). Persons or agencies who have requested review of NPDES permit requirements for a particular mining activity within the previously mentioned public comment period will be provided with a 30-day period to review and submit comments on the requirements.

Written comments or objections should contain the name, address and telephone number of the person submitting comments or objections; the application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based. Requests for an informal conference must contain the name, address and telephone number of requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor wishes to have the conference conducted in the locality of the proposed mining activities.

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. Project Description: The Pennsylvania Infrastructure Investment Authority, which administers the Commonwealth's State Revolving Fund, is intended to be the funding source for this project. The Houtzdale Municipal Authority proposes construction of Well Th-14, surface water intake, raw water pumping station, transmission line, treatment plant modifications, Henderson booster pump station and storage tank. The Department's review of the project and the information received in the Environmental Report for the project has not identified any significant, adverse environmental impact resulting from this proposal. The Department hereby approves the Environmental Assessment.

**Bureau of Mine Safety
Approval of Request for Variance**

The Department of Environmental Protection, Bureau of Mine Safety (BMS) has approved AMFIRE Mining Company LLC's request for a variance from the requirements of section 242(c) of the Pennsylvania Bituminous Coal Mine Act at the Gillhouser Run Mine. This notification contains a summary of this request and the basis for the Department's approval. A complete copy of the variance request may be obtained from Cathy Dunn by calling (724) 439-7469 or from the BMS web site at www.depweb.state.pa.us/deepminesafety/site/default.asp.

Summary of the Request: AMFIRE Mining Company LLC requested a variance from Section 242(c) of the Pennsylvania Bituminous Coal Mine Act to allow for the common ventilation of belt conveyor entry with other entries at the **Gillhouser Run Mine**. The proposal accords protections to persons and property substantially

equal to or greater than the requirements set forth in the Pennsylvania Bituminous Coal Mine Act.

The basis for the Bureau's approval is summarized as follows:

1. The Pyott-Boone 9500 CO Monitoring System will provide advance warning of a developing mine fire originating in the conveyor belt entry. When maintained and operating correctly, this system provides warnings much earlier than the point type heat sensors.
2. Common entries would permit the larger section mantrip and scoops access to belt entry for transportation of personnel and supplies.
3. The operator will maintain a separate isolated intake escapeway that is at a higher air pressure than the belt and common entries.
4. The plan provides for the common entries to serve as an alternate intake escapeway. There will be a total of three separate, isolated escape routes.

This approval is limited to a variance from the requirements in section 242(c) requiring that the belt entry is isolated from other entries. All other terms and requirements of section 242(c) shall remain in effect. Continued authorization for operation under the approval is contingent upon compliance with the measures described in the plan and the following conditions:

1. All mine employees shall be task trained in the Pyott-Boone 9500 CO monitoring system alert and alarm response procedures. These procedures shall also be included in the 8-hour annual retraining.
2. As part of the requirements of section 228, all belt entries, common entries and unfenced roadways shall be preshifted in their entirety.
3. Designated areas (DA) shall be established a strategic locations along the belt entry and common entry to determine whether the air is traveling in the proper course and normal volume. This air reading shall be taken by a scientific means (anemometer, chemical smoke tube, velometer).

Improvements to the NPDES Postconstruction Stormwater Management Permitting Process

In 2000, amendments were implemented to the Federal Clean Water Act that have, as a result, increased the demand for stormwater permits issued by the Department of Environmental Protection (Department) over the last 6 years. These amendments, which include new permitting requirements for sites less than 5 acres but greater than 1 acre, have in 6 years nearly doubled the workload of Departmental staff responsible for reviewing processing NPDES Postconstruction Stormwater Permits. As a result, the time required for Department review of the permit application has increased.

To address these issues, including improving the quality of permit applications and reducing the Department's review time of NPDES Postconstruction Stormwater Management permit applications, the Department considered four initiatives for which it requested public comment at 36 Pa.B. 6738 (November 4, 2006). During the 30-day public comment period, the Department received comments from 28 commentators. While some commentators expressed support of the initiatives outlined by the Department, some requested additional detail on the initiatives and recommended the Department proceed cautiously with their strategy.

After consideration and careful deliberation of the public comments received to improve NPDES Postconstruction Stormwater Management Permitting, the Department has finalized the initiatives summarized in this notice and scheduled their implementation. The Department's written responses to the specific public comments submitted can be accessed on the Department's website at www.depweb.state.pa.us (DEP Keywords: Stormwater).

Initiative 1: Encourage the Use of a Simultaneous Review Process for Erosion and Sediment Control and Postconstruction Stormwater Plan Review

Implementation: The Department will continue to advance the use of a simultaneous review process for Erosion and Sediment Control and Postconstruction Stormwater Management (PCSM) Plan reviews. This process encourages the owner/applicant and their "project team" to meet with municipal officials and staff from the Department and County Conservation Districts to discuss the conceptual, or preliminary design plans of the project. This allows the exchange of information on the project and applicable requirements in the early development stages. Under this initiative, the Department will not issue a final permit decision during the preapplication process; however, a summary of the preapplication meeting will be maintained by the Department or Conservation District in the permit applicant's file.

Initiative 2: Expedited Permit Review where applicants have Municipal or County Conservation District Approval of the PCSM Plan and that the Plan has been sealed by a Professional Engineer (PE) who has attended Best Management Practices (BMP) Manual training and has demonstrated knowledge and experience in preparing PCSM Plans

Implementation: The Department will provide expedited permit reviews where applicants have municipal or County Conservation District approval of the PCSM Plan, which must be sealed by a qualified Licensed Professional (LP) who has attended BMP Manual training provided by the Department or other training recognized by the Department and demonstrates proficiency in the

stormwater management program through the submission of a complete and quality application. The Department will also provide expedited permit reviews to land developers whose PCSM plans are approved by a County Conservation District with PSCM delegation. The expedited review has the expectation of final permit action within 66 calendar days (this includes the public notification process and 30 day public comment period) of receipt of a final application meeting the previous requirements. In the event neither a municipality or County Conservation District is equipped to approve a plan but the plans are sealed by an LP who has attended BMP Manual training, the Department will conduct a review of the PCSM Plan concurrent with the County Conservation District's review of the Erosion and Sediment Control Plan. The Department will make a permit decision within 66-calendar days of receipt of an administratively complete application. Exceptions to this time frame include situations where applications are administratively or technically deficient and those where a public meeting has been requested.

The Department is working with the County Conservation Districts to develop a modified delegation agreement to include the District's review of PCSM plans. The State Conservation Commission must approve the modified delegation agreement prior to the Department's implementation of this initiative.

Instructions for utilizing an expedited permit review process for NPDES Postconstruction Stormwater Permits are available on the Department's website at www.depweb.state.pa.us (DEP Keywords: Stormwater).

Initiative 3: Development of New General Permits (GPs) and Clarification of Existing General Permits

Implementation: The Department has developed a fact sheet that explains the permit requirements for the development of small home lots entitled "Soil Erosion And Sediment Requirements For Single-Family Residence, Individual Lot Construction And Minor Construction Project Activities." The fact sheet identifies and explains the regulatory and permit requirements for development of single-family home lots and minor construction project activities. Depending on the size and scope of a project, the Fact Sheet identifies various requirements ranging from implementing and maintaining BMPs and Erosion and Sediment Control Plans to requiring an NPDES permit for stormwater discharges associated with construction activities. The Fact Sheet can be found on the Department's website at www.depweb.state.pa.us (DEP Keywords: Erosion Control).

Further, the Department continues to evaluate all possibilities to provide additional NPDES GPs for use in nonspecial protection waters.

Initiative 4: Third-Party Service Providers—Issuance of Request for Information (RFI)

Implementation: Under this initiative, the Department will solicit qualified consultants, including County Conservation Districts to assist applicants in preparing NPDES Stormwater permit applications or facilitating the application development process. Applications that reflect the full benefits of these services will qualify for expedited NPDES permit reviews by the Department.

To implement this initiative, the Department will issue a Request for Information (RFI) to solicit information from interested parties on their capabilities to assist applicants in preparing NPDES Stormwater permit applications. The Request for Information can be found at www.dgsweb.state.pa.us/comod/main.asp (Search by using

RFI 2006-1). Upon receipt and evaluation of this information, the Department will post a list of Qualified Providers on the Department's website at www.depweb.state.pa.us (DEP Keywords: Stormwater). Services provided to permit applicants would be subject to any fees charged by the Qualified Provider.

Additional information concerning NPDES Post-construction Stormwater Management Permitting may be obtained by contacting Ken Murin, Chief, Division of Waterways, Wetlands and Stormwater Management, P. O. Box 8775, Harrisburg, PA 17105-8775; (717) 772-5975, ep-stormwaterinitiative@state.pa.us.

Proposed Revision to the State Implementation Plan for the Pittsburgh-Beaver Valley 8-Hour Ozone Nonattainment Area; Public Hearing

Ground-level ozone concentrations above the Federal health-based standard are a serious human health threat and can also cause damage to crops, forests and wildlife. The Pittsburgh-Beaver Valley Area 8-hour Ozone Nonattainment Area has met the health-based National ambient air quality standard for ozone based on 2003-2005 concentrations. Therefore, the Department of Environmental Protection (Department) plans to submit a request to the United States Environmental Protection Agency (EPA) to redesignate this nonattainment area to attainment of the 8-hour ozone national ambient air quality standard (NAAQS). The Department is seeking public comment on the 8-hour ozone redesignation request, the 2002 base year inventory and a State Implementation Plan revision setting forth a Maintenance Plan, which demonstrates that the area can maintain the health-based ozone standard for the next 10 years as required under section 175A(a) of the Federal Clean Air Act (42 U.S.C.A. § 7505a). The Maintenance Plan, once approved by the EPA, will also establish new motor vehicle emission budgets for purposes of transportation conformity.

This proposal is available on the Department's website at www.depweb.state.pa.us (choose "Air Topics") or through the contact persons listed.

The Department will hold a public hearing to receive comments on the proposals on Tuesday, April 10, 2007, at 1 p.m. in Waterfront Room A at the Southwest Regional Office of the Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222. Persons wishing to present testimony at the hearing should contact Yvette House, P. O. Box 8468, Harrisburg, PA 17105, (717) 787-9495 or yhouse@state.pa.us to reserve a time. Persons who do not reserve a time will be able to testify as time allows. Witnesses should keep testimony to 10 minutes and should provide two written copies of their statement at the hearing.

Persons with a disability who wish to attend the hearing and require an auxiliary aid, service or other accommodation to participate in the proceeding should contact Yvette House at (717) 787-9495 or yhouse@state.pa.us. TDD users may contact the AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

The Department must receive comments no later than April 13, 2007. Written comments should be sent to the attention of J. Wick Havens, Chief, Division of Air Resource Management, Bureau of Air Quality, P. O. Box 8468, Harrisburg, PA 17105-8468, jhavens@state.pa.us. Use "Pittsburgh Ozone SIP" as the mail addressee or in the subject line.

FISH AND BOAT COMMISSION

Proposed Special Regulation Designation

The Fish and Boat Commission (Commission) has approved guidelines with regard to encouraging public participation on possible changes to the designation of streams, stream sections or lakes for special regulation programs. Under 58 Pa. Code Chapter 65 (relating to special fishing regulations), the Commission designates certain streams, stream sections and lakes as being subject to special fishing regulations. These designations

are effective after Commission approval when they are posted at the site and a notice is published in the *Pennsylvania Bulletin*. Under the Commission's guidelines, a notice concerning the proposed designation or redesignation of a stream, stream section or lake under special regulations ordinarily will be published in the *Pennsylvania Bulletin* before the matter is reviewed by the Commissioners.

At the next Commission meeting on April 16 and 17, 2007, the Commission will consider designating the following lake as water subject to proposed special fishing regulations under 58 Pa. Code Chapter 65, effective January 1, 2008:

58 Pa. Code § 65.9. Big Bass Special Regulations

The Commission will consider designating the following lake as a "Big Bass Regulation" water:

<i>County</i>	<i>Name of Water</i>
Allegheny	North Park Lake

At this time, the Commission is soliciting public input concerning the designation. Persons with comments or suggestions concerning the designation are invited to submit comments in writing to Executive Director, Fish and Boat Commission, P. O. Box 67000, Harrisburg, PA 17106-7000, within 30 days after publication of this notice in the *Pennsylvania Bulletin*. Comments submitted by facsimile will not be accepted. Comments also may be submitted electronically by completing the form at www.state.pa.us/Fish/regcomments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. Electronic comments submitted in any other manner will not be accepted.

2007 Changes to List of Class A Wild Trout Waters

The Fish and Boat Commission (Commission) is considering changes to its list of Class A Wild Trout Streams. Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource to conserve that resource and the angling it provides. Class A wild trout populations represent the best of Pennsylvania's naturally reproducing trout fisheries. The Commission manages these stream sections solely for the perpetuation of the wild trout fishery with no stocking.

The criteria developed for Class A Wild Trout fisheries are species specific. Wild Trout Abundance Class Criteria include provisions for:

- (i) Wild Brook Trout Fisheries.
 - (A) Total brook trout biomass of at least 30 kg/ha (26.7 lbs/acre).
 - (B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).
 - (C) Brook trout biomass must comprise at least 75% of the total trout biomass.

(ii) Wild Brown Trout Fisheries.

(A) Total brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brown trout biomass must comprise at least 75% of the total trout biomass.

(iii) Mixed Wild Brook and Brown Trout Fisheries.

(A) Combined brook and brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass must comprise less than 75% of the total trout biomass.

(E) Brown trout biomass must comprise less than 75% of the total trout biomass.

(iv) Wild Rainbow Trout Fisheries.

Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 2.0 kg/ha (1.78 lbs/acre).

In order for a water to be removed from the Class A Wild Trout Streams designation, total trout biomass must be documented below the set criteria for two consecutive stream examinations.

At its meeting on April 16 and 17, 2007, the Commission intends to consider adding Tannery Hollow Run, Section 01, in Cameron County to its list of Class A Wild Trout Streams. Tannery Hollow Run is a tributary to Sterling Run. Section 01 extends for a distance of 2.75 miles, from the headwaters downstream to the mouth. Based on a stream examination inventory conducted by Commission staff in August 2006, Section 01 supported an estimated wild brook trout biomass of 40.04 kg/ha and met the biomass criteria for designation as a Class A wild brook trout water. The Commission will not consider the removal of any streams from the list at the April 2007 meeting.

Persons with comments, objections or suggestions concerning the addition are invited to submit comments in writing to Executive Director, Fish and Boat Commission, P. O. Box 67000, Harrisburg, PA 17106-7000, within 30 days after publication of this notice in the *Pennsylvania Bulletin*. Comments also may be submitted electronically by completing the form at www.state.pa.us/Fish/regcomments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. Electronic comments submitted in any other manner will not be accepted.

2007 Classification of Wild Trout Streams; Additions, Deletions and Adjustment

Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Fish and Boat Commission (Commission) to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The Commission's Fisheries Management Division maintains the list of wild trout streams. The Executive Director, with the approval of the Commission, will from time-to-time publish the list of wild trout streams in the *Pennsylvania Bulletin*. The listing of a stream section as a wild trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate management of streams.

At the next Commission meeting on April 16 and 17, 2007, the Commission will consider changes to its list of wild trout streams. Specifically, the Commission will consider the removal of the following stream from the list:

<i>County of Mouth</i>	<i>Stream Name</i>	<i>Tributary To</i>	<i>Section Limits</i>

Schuylkill	Little Schuylkill River	Schuylkill River	Headwater downstream to Panther Creek	Wild trout were found further upstream in 2006 than in previous surveys

In addition, the Commission will consider the addition of the following streams or portions of streams to the list:
