The Department of Community and Economic Development (Department) is preparing the Commonwealth's Five Year Consolidated Plan 2009-2013 Action Plan for Federal Fiscal Year (FFY) 2010. The Program Year begins January 1, 2010. This document must be submitted to, and approved by, the United States Department of Housing and Urban Development (HUD) for the Commonwealth and organizations within the State to receive funding under most HUD housing and community development programs. The Consolidated Plan creates a unified strategy for housing and community development programs, as well as the necessary linkages for building successful neighborhoods and communities.

The Commonwealth's 2009-2013 Consolidated Plan Action Plan 2010 will address how the Commonwealth intends to allocate funds under the following programs: Community Development Block Grant, HOME Investment Partnerships, Emergency Shelter Grant, Housing Opportunities for People with AIDS, Homelessness Prevention and Rapid Re-housing Program, Neighborhood Stabilization Program, and Community Development Block Grant—Recovery.

Public Meeting

One public hearing is scheduled, which will be conducted electronically by means of the Internet. The format will be more accessible in that persons wishing to make a comment or discuss policy may participate on December 1, 2009, directly from their personal computer or from any computer location that has Internet access,

such as their public library. Access to the discussion by means of the Internet will occur between 9 a.m. and 11 a.m. This more widely available personal computer access will replace the usual public meeting.

Individuals or organizations may give testimony or comments by means of the Internet. Comments will be accepted about topics related to community development, housing, the content of the Commonwealth's Plan, and the process by which the public input is gathered. The Commonwealth encourages public participation in this process.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remedi-

ate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (act) and regulations adopted under the act.

The issuance of this plan approval does not prevent the future adoption by the Department of any rules, regulations or standards, or the issuance of orders necessary to comply with the requirements of the Federal Clean Air Act (CAA) or the APCA, or to achieve or maintain ambient air quality standards. The issuance of this plan approval shall not be construed to limit the Department's enforcement authority.

3. This plan approval authorizes temporary operation of the sources covered by this plan approval provided the following conditions are met:

a. When construction, installation, modification or reactivation is being conducted, the permittee should provide written notice to the Department of the completion of the activity approved by this plan approval and the permittee's intent to commence operation at least 5 working days prior to the completion of said activity. The notice shall state when the activity will be completed and when the permittee expects to commence operation. When the activity involves multiple sources on different time schedules, notice is required for the commencement of operation of each source.

b. Under 25 Pa. Code § 127.12b(d), temporary operation of the sources to facilitate the shakedown of sources and air cleaning devices, to permit operations pending the issuance of a permit under 25 Pa. Code Chapter 127, Subchapter F or G (relating to operating permits; and Title V operating permits) or to permit the evaluation of the air contaminant aspects of the source.

c. This plan approval authorizes a temporary operation period not to exceed 180 days from the date of commencement of operation, provided the Department receives notice from the permittee under paragraph (a), previously.

d. The permittee may request an extension of the 180-day shakedown period if further evaluation of the air contamination aspects of the sources is necessary. The request for an extension should be submitted, in writing, to the Department at least 15 days prior to the end of the initial 180-day shakedown period and shall provide a description of the compliance status of the source, a detailed schedule for establishing compliance, and the reasons compliance has not been established. This temporary operation period will be valid for a limited time and may be extended for additional limited periods, each not to exceed 180 days.

e. The notice submitted by the permittee under subpart a. previously listed, prior to the expiration date of the plan approval, shall modify the plan approval expiration date on page 1 of this plan approval. The new plan

approval expiration date shall be 180 days from the date of commencement of operation.

4. The permittee shall maintain and operate the sources and associated air cleaning devices in accordance with good engineering practice as described in the plan approval application submitted to the Department.

5. The records, reports or information obtained by the Department or referred to at public hearings shall be available to the public, except as provided in paragraph a. of this condition.

a. Upon cause shown by the permittee that the records, reports or information or a particular portion thereof, but not emission data, to which the Department has access under the act, if made public, would divulge production or sales figures or methods, processes or production unique to that person or would otherwise tend to affect adversely the competitive position of that person by revealing trade secrets, including intellectual property rights, the Department will consider the record, report or information, or particular portion thereof confidential in the administration of the act. The Department will implement this section consistent with sections 112(d) and 114(c) of the CAA (42 U.S.C.A. §§ 7412(d) and 7414(c)). Nothing in this section prevents disclosure of the report, record or information to Federal, State or local representatives as necessary for purposes of administration of Federal, State or local air pollution control laws, or when relevant in a proceeding under the act.

6. This plan approval will be valid for a limited time, as specified by the expiration date contained on page 1 of this plan approval. Except as provided in §§ 127.11a and 127.215 (relating to reactivation of sources; and reactivation), at the end of the time, if the construction, modification, reactivation or installation has not been completed, a new plan approval application or an extension of the previous approval will be required.

a. If construction has commenced, but cannot be completed before the expiration of this plan approval, an extension of the plan approval must be obtained to continue construction. To allow adequate time for departmental action, a request for the extension should be postmarked at least 30 days prior to the expiration date. The Department will not issue an extension after the plan approval expires. The request for an extension should include the following:

- i. A justification for the extension,
- ii. A schedule for the completion of the construction.

b. If construction has not commenced before the expiration of this plan approval, then a new plan approval application must be submitted and approval obtained before construction can commence.

c. If the construction, modification or installation is not commenced within 18-months of the issuance of this plan approval or if there is more than an 18-month lapse in construction, modification or installation, a new plan approval application that meets the requirements of 25 Pa. Code Chapter 127, Subchapters B, D and E (relating to plan approval requirements; prevention of significant deterioration of air quality; and new source review) shall be submitted.

7. This plan approval may not be transferred from one person to another except when a change of ownership is demonstrated to the satisfaction of the Department and the Department approves the transfer of the plan approval in writing.

a. Section 127.12a (relating to compliance review) applies to a request for transfer of a plan approval. A compliance review form shall accompany the request.

b. This plan approval is valid only for the specific source and the specific location of the source as described in the application.

8. Under 35 P.S. § 4008, no person shall hinder, obstruct, prevent or interfere with the Department or its personnel in the performance of any duty authorized under the APCA.

a. The permittee shall also allow the Department to have access at reasonable times to say sources and associated air cleaning devices with such measuring and recording equipment, including equipment recording visual observations, as the Department deems necessary and proper for performing its duties and for the effective enforcement of the APCA and regulations adopted under the act.

b. Nothing in this plan approval condition shall limit the ability of the EPA to inspect or enter the premises of the permittee in accordance with section 114 or other applicable provisions of the CAA.

9. This plan approval may be terminated, modified, suspended or revoked and reissued if one or more of the following applies:

a. The permittee constructs or operates the source subject to the plan approval in violation of the act, the CAA, the regulations promulgated under the act or the CAA, a plan approval or permit or in a manner that causes air pollution.

b. The permittee fails to properly or adequately maintain or repair an air pollution control device or equipment attached to or otherwise made a part of the source.

c. The permittee fails to submit a report required by this plan approval.

d. The EPA determines that this plan approval is not in compliance with the CAA or the regulations there under.

10. The permittee, or any other person, may not circumvent the new source review requirements of 25 Pa. Code Chapter 127, Subchapter E by causing or allowing a pattern of ownership or development, including the phasing, staging, delaying or engaging in incremental construction, over a geographic area of a facility which, except for the pattern of ownership or development, would otherwise require a permit or submission of a plan approval application.

11. No person may permit the use of a device, stack height which exceeds good engineering practice stack height, dispersion technique or other technique which, without resulting in reduction of the total amount of air contaminants emitted, conceals or dilutes an emission of air contaminants which would otherwise be in violation of this plan approval, the APCA or the regulations promulgated hereunder, except that with prior approval of the Department, the device or technique may be used for control of malodors.

12. Reports, test data, monitoring data, notifications shall be submitted to the:

Regional Air Program Manager
Department of Environmental Protection
400 Waterfront Drive
Pittsburgh, PA 15222

13. If required by section 112(r) of the CAA, the permittee shall develop and implement an accidental release program consistent with requirements of the CAA, 40 CFR Part 68 (relating to chemical accident prevention provisions) and the Federal Chemical Safety Information, Site Security and Fuels Regulatory Relief Act.

Those who wish to provide the Department with additional written information that they believe should be considered prior to the issuance of the Plan Approval may submit the information to Noor Nahar, Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA, 15222. Each written comment must contain the following:

10. Coal shall be stockpiled in such a manner that it may be adequately wetted by the onsite pressurized water truck as necessary to control fugitive emissions. All coal shall be adequately wetted prior to, during, and after transfer, as necessary, to control fugitive emissions (25 Pa. Code § 127.12b).

11. Inplant roads and areas of vehicle traffic shall be watered and swept, as needed on a preventative basis, such that visible fugitive emissions do not cross the property line in accordance with 25 Pa. Code §§ 123.1 and 123.2. Other methods of dust control shall be used when weather conditions make inplant road watering hazardous, as necessary, to prevent visible fugitive emissions from crossing the property line in accordance with 25 Pa. Code §§ 123.1 and 123.2.

12. Earth or other material transported from the site shall be removed promptly, as needed, on the paved public road (SR 4002) to prevent visible fugitive emissions in accordance with 25 Pa. Code § 123.1(c).

13. All conveying equipment, clamshells, front-end loaders, or any other equipment used to stockpile, transfer, or load coal shall maintain a minimal amount of drop height at all times so as to prevent fugitive emissions (25 Pa. Code § 127.12b).

14. The Owner/Operator shall post the following (25 Pa. Code § 127.12b):

- a. A requirement stating, "All loaded trucks shall be properly tarpaulin covered."
- b. A requirement stating, "Speed Limit 15."

15. The Owner/Operator shall conduct a daily inspection of the facility during daylight hours while the facility is operating for the presence of fugitive emissions and malodors (25 Pa. Code § 127.12b).

16. The throughput of the coal unloading/loading operation shall be limited to 500,000 tons in any 12-month consecutive period. The owner/operator shall maintain a monthly log of coal shipped to and from the facility (25 Pa. Code § 127.12b).

17. All conveyors at this facility shall be partially covered and have water spray at each transfer point (25 Pa. Code § 127.12b).

18. All records shall be kept onsite for a minimum of 5 years and be made available to the Department upon request (25 Pa. Code § 127.12b).

19. The permittee shall report each malfunction that may result in an emissions increase to the Department.

For purposes of this condition a malfunction is defined as any sudden, infrequent, and not reasonably preventable failure of air pollution control or process equipment; or, operating in a nonpermitted manner.

a. When the malfunction poses an imminent and substantial danger to the public's health and safety or potential harm to the environment, the permittee shall report the incident to the Department within 1 hour.

b. The report shall describe the:

- i. name and location of the facility;
- ii. nature and cause of the malfunction;
- iii. time when the malfunction or breakdown was first observed;
- iv. expected duration of excess emissions; and
- v. estimated rate of emissions.

c. The owner or operator shall notify the Department immediately when corrective measures have been accomplished.

d. Unless otherwise required by specific reporting requirements, any malfunction that is not subject to the notice requirements of paragraph (b) of this permit condition, shall be reported to the Department within 24 hours (or the next business day) by telephone, and within 5 days by mail of discovery. The report shall contain the same information required by subsection (b)(1).

20. Plan Approval authorizes the temporary operation of the sources covered by this Plan Approval provided the following conditions are met (25 Pa. Code § 127.12b):

a. The Owner/Operator shall submit written Notice of the Completion of Construction and the Operator's intent to commence operation at least 5 days prior to the completion of construction. The Notice shall state the date when construction will be completed and the date when the Operator expects to commence operation.

b. Operation of the sources covered by this Plan Approval is authorized only to facilitate the start-up and shakedown of sources and air cleaning devices, to permit operations pending the issuance of an Operating Permit, or to permit the evaluation of the source for compliance with all applicable regulations and requirements.

c. Upon receipt of the Notice of the Completion of Construction from the Owner/Operator the Department shall authorize a 180-day Period of Temporary Operation of the sources starting on the date of commencement of operation. This Notice submitted by the Owner/Operator, prior to the expiration of this Plan Approval, shall modify the Plan Approval expiration date. The new Plan Approval expiration date shall be 180 days from the date of commencement of operation.

d. Upon determination by the Owner/Operator that the sources covered by this Plan Approval are in compliance with all conditions of the Plan Approval the Owner/

Operator shall contact the Department's reviewing engineer and schedule the Initial Operating Permit Inspection.

e. Upon completion of Initial Operating Permit Inspection and determination by the Department that the sources covered by this Plan Approval are in compliance with all conditions of the Plan Approval the Owner/Operator shall submit a State-only Operating Permit application, at least 60 days prior to the expiration date of the Plan Approval.

f. The Owner/Operator may request an extension of the 180-day Period of Temporary Operation if compliance with all applicable regulations and Plan Approval requirements has not been established. The extension request shall be submitted in writing at least 15 days prior to the end of the Period of Temporary Operation and shall provide a description of the compliance status of the source. The extension request shall include a detailed schedule for establishing compliance and the reasons compliance has not been established. This Period of Temporary Operation may be extended for additional limited periods, each not to exceed 180-days, by submitting an extension request as described previously.

g. If, at any time, the Department has cause to believe that air contaminant emissions from the sources listed in this plan approval may be in excess of the limitations specified in, or established under this plan approval or the permittee's operating permit, the permittee may be required to conduct test methods and procedures deemed necessary by the Department to determine the actual emissions rate. Such testing shall be conducted in accordance with 25 Pa. Code Chapter 139, where applicable, and in accordance with any restrictions or limitations established by the Department at such time as it notifies the company that testing is required.

21. This approval to construct shall become invalid if:

a. the construction, modification or installation is not commenced (as defined in 40 CFR 52.21(b)(8)) within 18 months of the issuance of the plan approval, or

b. if there is more than an 18-month lapse in construction, modification, or installation. The Department may extend the 18-month period upon a satisfactory showing that an extension is justified. (25 Pa. Code § 127.13(c))

22. Notify the Department when the installation is completed so that the facility can be inspected for issuance of an operating permit. Submit an Operating Permit application within 180 days of commencement of construction.

General Conditions

1. Words and terms that are not otherwise defined in this plan approval shall have the meanings set forth in section 3 of the APCA (35 P. S. § 4003) and 25 Pa. Code § 121.1. (25 Pa. Code § 121.1)

2. The issuance of this plan approval does not prevent the future adoption by the Department of any rules, regulations or standards, or the issuance of orders necessary to comply with the requirements of the Federal CAA or the APCA, or to achieve or maintain ambient air quality standards. The issuance of this plan approval shall not be construed to limit the Department's enforcement authority. (25 Pa. Code § 127.12b (a) (b))

3. This plan approval authorizes temporary operation of the sources covered by this plan approval provided the following conditions are met.

a. When construction, installation, modification or reactivation is being conducted, the permittee should provide written notice to the Department of the completion of the activity approved by this plan approval and the permittee's intent to commence operation at least 5 working days prior to the completion of said activity. The notice shall state when the activity will be completed and when the permittee expects to commence operation. When the activity involves multiple sources on different time schedules, notice is required for the commencement of operation of each source.

b. Under 25 Pa. Code § 127.12b(d), temporary operation of the sources to facilitate the shakedown of sources and air cleaning devices, to permit operations pending the issuance of a permit under 25 Pa. Code Chapter 127, Subchapter F or G (relating to operating permits; and Title V operating permits) or to permit the evaluation of the air contaminant aspects of the source.

c. This plan approval authorizes a temporary operation period not to exceed 180 days from the date of commencement of operation, provided the Department receives notice from the permittee under paragraph (a), previously.

d. The permittee may request an extension of the 180-day shakedown period if further evaluation of the air contamination aspects of the sources is necessary. The request for an extension should be submitted, in writing, to the Department at least 15 days prior to the end of the initial 180-day shakedown period and shall provide a description of the compliance status of the source, a detailed schedule for establishing compliance, and the reasons compliance has not been established. This temporary operation period will be valid for a limited time and may be extended for additional limited periods, each not to exceed 180 days.

e. The notice submitted by the permittee under subpart (a) previously listed, prior to the expiration of the plan approval, shall modify the plan approval expiration date on page 1 of this plan approval. The new plan approval expiration date shall be 180 days from the date of commencement of operation.

4. If, at any time, the Department has cause to believe that air contaminant emissions from the sources listed in this plan approval may be in excess of the limitations specified in, or established under this plan approval or the permittee's operating permit, the permittee may be required to conduct test methods and procedures deemed necessary by the Department to determine the actual emissions rate. The testing shall be conducted in accordance with 25 Pa. Code Chapter 139, where applicable, and in accordance with any restrictions or limitations established by the Department at the time as it notifies the company that testing is required. (25 Pa. Code § 127.12b)

5. The permittee shall maintain and operate the sources and associated air cleaning devices in accordance with good engineering practice as described in the plan approval application submitted to the Department. (25 Pa. Code § 127.12(a)(10))

6. The records, reports or information obtained by the Department or referred to at public hearings shall be available to the public, except as provided in paragraph (a) of this condition.

a. Upon cause shown by the permittee that the records, reports or information or a particular portion thereof, but not emission data, to which the Department has access under the act, if made public, would divulge production or sales figures or methods, processes or production unique

to that person or would otherwise tend to affect adversely the competitive position of that person by revealing trade secrets, including intellectual property rights, the Department will consider the record, report or information, or particular portion thereof confidential in the administration of the act. The Department will implement this section consistent with sections 112(d) and 114(c) of the CAA (42 U.S.C.A. §§ 7412(d) and 7414(c)). Nothing in this section prevents disclosure of the report, record or information to Federal, State or local representatives as necessary for purposes of administration of Federal, State or local air pollution control laws, or when relevant in a proceeding under the act. (25 Pa. Code §§ 127.12(c) and (d) and 35 P. S. § 4013.2)

7. This plan approval will be valid for a limited time, as specified by the expiration date contained on page 1 of this plan approval.

a. Except as provided in §§ 127.11a and 127.215 (relating to reactivation of sources; and reactivation), at the end of the time, if the construction, modification, reactivation or installation has not been completed, a new plan approval application or an extension of the previous approval will be required.

b. If construction has commenced, but cannot be completed before the expiration of this plan approval, an extension of the plan approval must be obtained to continue construction. To allow adequate time for departmental action, a request for the extension should be postmarked at least 30 days prior to the expiration date. The Department will not issue an extension after the plan approval expires. The request for an extension should include the following:

- i. A justification for the extension,
- ii. A schedule for the completion of the construction.

c. If construction has not commenced before the expiration of this plan approval, then a new plan approval application must be submitted and approval obtained before construction can commence.

d. If the construction, modification or installation is not commenced within 18-months of the issuance of this plan approval or if there is more than an 18-month lapse in construction, modification or installation, a new plan approval application that meets the requirements of 25 Pa. Code Chapter 127, Subchapters B, D and E (relating to plan approval requirements; prevention of significant deterioration of air quality; and new source review) shall be submitted. (25 Pa. Code § 127.13)

8. This plan approval may not be transferred from one person to another except when a change of ownership is demonstrated to the satisfaction of the Department and the Department approves the transfer of the plan approval in writing.

a. Section 127.12a (relating to compliance review) applies to a request for transfer of a plan approval. A compliance review form shall accompany the request.

b. This plan approval is valid only for the specific source and the specific location of the source as described in the application. (25 Pa. Code § 127.32)

9. Under 35 P. S. § 4008, no person shall hinder, obstruct, prevent or interfere with the Department or its personnel in the performance of any duty authorized under the APCA.

a. The permittee shall also allow the Department to have access at reasonable times to said sources and associated air cleaning devices with such measuring and

recording equipment, including equipment recording visual observations, as the Department deems necessary and proper for performing its duties and for the effective enforcement of the APCA and regulations adopted under the act.

b. Nothing in this plan approval condition shall limit the ability of the EPA to inspect or enter the premises of the permittee in accordance with section 114 or other applicable provisions of the CAA. (25 Pa. Code § 127.12(4) and 35 P.S. § 4008 and § 114 of the CAA)

10. This plan approval may be terminated, modified, suspended or revoked and reissued if one or more of the following applies:

a. The permittee constructs or operates the source subject to the plan approval in violation of the act, the CAA, the regulations promulgated under the act or the CAA, a plan approval or permit or in a manner that causes air pollution.

b. The permittee fails to properly or adequately maintain or repair an air pollution control device or equipment attached to or otherwise made a part of the source.

c. The permittee fails to submit a report required by this plan approval.

d. The EPA determines that this plan approval is not in compliance with the CAA or the regulations thereunder. (25 Pa. Code 127.13a)

11. The permittee, or any other person, may not circumvent the new source review requirements of 25 Pa. Code Chapter 127, Subchapter E by causing or allowing a pattern of ownership or development, including the phasing, staging, delaying or engaging in incremental construction, over a geographic area of a facility which, except for the pattern of ownership or development, would otherwise require a permit or submission of a plan approval application.

12. Reports, test data, monitoring data, notifications shall be submitted to the following:

Regional Air Program Manager
Department of Environmental Protection
400 Waterfront Drive
Pittsburgh, PA 153222

13. If required by section 112(r) of the CAA, the permittee shall develop and implement an accidental release program consistent with requirements of the CAA, 40 CFR Part 68 (relating to chemical accident prevention provisions) and the Federal Chemical Safety Information, Site Security and Fuels Regulatory Relief Act (P.L. 106-40).

14. The permittee shall prepare and implement a Risk Management Plan (RMP) which meets the requirements of section 112(r) of the CAA, 40 CFR Part 68 and the Federal Chemical Safety Information, Site Security and Fuels Regulatory Relief Act when a regulated substance listed in 40 CFR 68.130 is present in a process in more than the listed threshold quantity at the facility. The permittee shall submit the RMP to the EPA according to the following schedule and requirements:

a. The permittee shall submit the first RMP to a central point specified by the EPA no later than the latest of the following:

i. Three years after the date on which a regulated substance is first listed under 40 CFR 68.130; or,

ii. The date on which a regulated substance is first present above a threshold quantity in a process.

b. The permittee shall submit any additional relevant information requested by the Department or the EPA concerning the RMP and shall make subsequent submissions of RMPs in accordance with 40 CFR 68.190.

c. The permittee shall certify that the RMP is accurate and complete in accordance with the requirements of 40 CFR Part 68, including a checklist addressing the required elements of a complete RMP.

d. As used in this plan approval condition, the term "process" shall be as defined in 40 CFR 68.3. The term "process" means any activity involving a regulated substance including any use, storage, manufacturing, handling or onsite movement of the substances or any combination of these activities. For purposes of this definition, any group of vessels that are interconnected or separate vessels that are located such that a regulated substance could be involved in a potential release, shall be considered a single process. (25 Pa. Code § 127.12(9) and 40 CFR Part 68)

Those who wish to provide the Department with additional written information that they believe should be considered prior to the issuance of the Plan Approval may submit the information to Jacob Chemsak, Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA, 15222. Each written comment must contain the following:

- Name, address and telephone number of the person submitting the comments.

- Identification of the proposed Plan Approval (specify the Plan Approval number).

- Concise statements regarding the relevancy of the information or objections to issuance of the Plan Approval.

All comments must be received prior to the close of business 30 days after the date of this publication.

COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law (35 P. S. §§ 691.1—691.1001); the Coal Refuse Disposal Act (52 P. S. §§ 30.51—30.66); The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.21). Mining activity permits issued in response to such applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4015); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of the application is available for inspection at the District Mining Office indicated above each application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for the certification.

Written comments or objections, or requests for an informal conference, or a public hearing, as applicable, on a mining permit application may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the address of the district mining office indicated above each application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Written comments or objections related to a mining permit application should contain the name, address and telephone number of persons submitting comments or objections; application number; and a statement of suffi-

cient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code §§ 77.123 or 86.34, must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

When a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. The Department has made a tentative determination to issue the NPDES permit in conjunction with the mining activity permit, but the issuance of the NPDES permit is contingent upon the approval of the associated mining activity permit.

For coal mining activities, NPDES permits, when issued, will contain effluent limits that do not exceed the technology-based effluent limitations. The proposed limits are listed in Table 1.

For noncoal mining activities, the proposed limits are found in Table 2. Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description below specifies the parameters. The limits will be in the ranges specified in Table 1.

More restrictive effluent limitations, restrictions on discharge volume, or restrictions on the extent of mining that may occur, will be incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91–96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding Concerning Water Quality Management, NPDES Program Implementation and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Loads (TMDLs).

Persons wishing to comment on an NPDES permit application should submit a statement to the Department at the address of the district mining office indicated previously each application within 30 days of this public notice. Comments received within the comment period

will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92.61. The request or petition for a public hearing shall be filed within 30 days of this public notice and shall contain the name, address, telephone number and the interest of the party filing the request, and shall state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. In the case where a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

A 4-inch PVC discharge pipe from the ultraviolet disinfection unit will discharge the proposed 500 gpd of treated effluent to a UNT to the Lehigh River, which has a designated water use of CWF in Chapter 93 of 25 Pa. Code. A private well provides water to the residence. The proposed development is located at 4279 Chestnut Drive, Lehigh Township, Northampton County. Any required NPDES Permits or WQM Permits must be obtained by Roger and Denise Radcliff.

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Foster Township	P. O. Box 465 Freeland, PA 18224	Luzerne

Plan Description: Foster Township had previously revised its Official Sewage Facilities Plan for the East End portion of the Township and received approval of the Plan from the Department of Environmental Protection (Department) on August 20, 2004. The current submission was submitted to the Department to permit the Township to modify the proposed facilities to be constructed at the Powerhouse Road Pumping Station (Pumping Station) from those previously described in the Department’s August 20, 2004, Plan approval. The Plan also proposes the abandonment of the existing force main that currently conveys wastewater from the existing Pumping Station to the existing wastewater collection system located in White Haven Borough. In lieu of using the existing force main, the Plan proposes to construct a new 8-inch diameter force main with an alignment across

Linesville Creek, under Interstate 80, along Trimmer Avenue with a tie-in point at the existing manhole 116 located at the intersection of Church and Erie Streets in White Haven Borough. Wastewater would then be conveyed to the Suburban Wastewater Company's existing Wastewater Treatment Facility by means of the line route shown on Exhibit 7 found in the Plan. The proposed line route through White Haven Borough will not require any additional modifications to the wastewater collection system segments used to convey wastewater from the force main tie-in at Manhole 116 to the wastewater treatment facility. Treated wastewater will continue to be discharged to the Lehigh River.

Financing of the wastewater collection and conveyance systems is to be provided by the United States Department of Agriculture's Rural Development Program.

Implementation of the proposed project will require a Water Management Part II Permit for the construction and operation of the proposed sewage facilities. Issuance of a Part II Permit will be based upon a technical evaluation of the permit application and supporting documentation. Starting construction prior to obtaining a Part II Permit is a violation of The Clean Streams Law. The permit shall be obtained by the appropriate owners of the wastewater disposal facilities.

Other Departmental permits may be required for construction if encroachment to streams or wetlands will result. The Department's review has also not identified any significant environmental impacts resulting from this proposal.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a Site-Specific Standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated

substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a Site-Specific Standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to

establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in Section 5.2 of the Regulatory Review Act (71 P.S. § 645.5b).

The Commission has issued comments on the following proposed regulation. The agency must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

Pennsylvania Gaming Control Board Regulation #125-103 (IRRC #2781)

Employees; Slot Machines; Accounting and Internal Controls; and Compulsive and Problem Gambling

October 21, 2009

We submit for your consideration the following comments on the proposed rulemaking published in the August 22, 2009 *Pennsylvania Bulletin*. Our comments are based on criteria in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Pennsylvania Gaming Control Board (Board) to respond to all comments received from us or any other source.

1. Section 461a.7. Slot machine minimum design standards.—Clarity.

Subsection (y) adds the phrase “or other sizes approved by the Bureau of Gaming Operations.” It is unclear how this approval is obtained. Would a licensee be required to go through the waiver process under Section 461a.24?

This should be clarified in the final-form regulation. Similar concerns apply to Sections 461a.10(b) and 461a.22(b).

2. Section 465a.2. Internal control systems and audit protocols.—Need; Reasonableness.

Under Subsection (c)(9), the Board proposes to require a licensee to amend its internal controls to ensure that its employees are in compliance with Chapter 435a (relating to Employees). In the preamble, the Board states that it is adding this requirement because licensees “are expected to be proactive about having their employees comply with the various reporting requirements.”

Downs Racing, LP asserts that it is unreasonable to shift this oversight responsibility from the Board to the licensee and would be burdensome and unnecessary. The Board should further explain the need for and reasonableness of this new provision.

3. Section 465a.8. Licensed facility.—Clarity.

Proposed language that is added to Subsection (c) states “. . . and any other doors designated by the Bureau of Gaming Operations. . . .” It is unclear how this designa-

tion would be made. The Board should clarify this provision in the final-form regulation.

4. Section 465a.9. Surveillance system; surveillance department control; surveillance department restrictions.—Clarity.

Subsection (c)(5)(iv) adds language that would require a licensee to maintain photographs of individuals who are on the Board's self-exclusion list in the licensee's photo library. It is unclear if these photographs could be placed in the same photo library as all current employees or if a licensee would be required to create a separate photo library just for those people on the self-exclusion list. The final-form regulation should clarify this provision.

Regulation #125-105 (IRRC #2782)

Jackpot and Credit Meter Payouts

October 21, 2009

We submit for your consideration the following comments on the proposed rulemaking published in the August 22, 2009 *Pennsylvania Bulletin*. Our comments are based on criteria in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Pennsylvania Gaming Control Board (Board) to respond to all comments received from us or any other source.

Section 465a.26. Jackpot and credit meter payouts.—Implementation procedures; Clarity.

According to the Board, Subsections (b)(2), (3) and (4) have been amended to give slot machine licensees greater flexibility as to whom they may designate to act as a witness for jackpot or credit meter payouts of various amounts. We have two concerns.

First, each paragraph, depending on the payout amount, requires certain licensee personnel to be present when jackpot or credit meter payout slips are created. Paragraphs (3) and (4) include the phrase "or other employee holding the same or greater level of authority." Would this provision allow any employee with a greater level of authority to act as a witness with the required personnel? The final-form regulation should be amended to clarify these paragraphs.

Second, Paragraph (2) pertains to payouts *between* \$1,200.00 and \$9,999.99. Paragraph (3) pertains to payouts *between* \$10,000.00 and \$24,999.99. A commentator has noted that this language does not address payouts of exactly \$1,200.00, \$9,999.99, \$10,000.00 and \$24,999.99. We recommend that the final-form regulation be amended to include these specific amounts.
