Weatherization Assistance Program's Proposed State Plan

The Department of Community and Economic Development (Department) publishes notice of a public hearing to be held Monday, May 24, 2010, at 1 p.m. in PUC Hearing Room 2, Plaza Level, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA. The purpose of this hearing is to receive comments on the proposed changes in this Commonwealth's 2010-2011 annually-appropriated United States Department of Energy Weatherization Assistance Program Plan (regular plan) and the 2010-2011 American Recovery and Reinvestment Act State Weatherization Plan (ARRA).

The regular and ARRA plans are to be amended to transfer the contract rights and obligations of the City of New Castle as a sub-grantee of the Commonwealth under both plans to Lawrence County Social Services, Inc.

The 2010-2011 ARRA plan provisions for "first priority households" will be modified to meet current conditions and maximize the effective use of ARRA weatherization funds.

The 2010-2011 regular plan will authorize modification of the current formula-based distribution of funds. The Department, in cooperation with DOE will transition the implementation of the modified formula during the 2010 plan year. The changes may result in the redistribution of funds among sub-grantees based upon specific performance metrics including but not limited to production, quality of the work product, prompt, accurate and complete reporting, and energy reduction achieved. The State-issued certification process currently employed in the ARRA Weatherization Program will also be implemented for the "regular" plan.

Copies of the "regular" and ARRA Weatherization Program Plans may be obtained beginning on May 12, 2010, by contacting the Department of Community and Economic Development, Office of Energy Conservation and Weatherization, 4th Floor, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120, (717) 720-1354 or it can be downloaded from the Department's web site at www.newpa.com.

Written comments may be submitted to E. Craig Heim, Executive Director, Office of Energy Conservation and

Weatherization, 4th Floor, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120 until 5 p.m. on May 21, 2010.

Persons with a disability who wish to attend this hearing and require auxiliary aid, services or other accommodations to participate in the proceedings, contact Jacquelyn Allen at (717) 720-1354 to discuss how the Department may accommodate their needs.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified

before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121–143, the Federal Clean Air Act (act) and regulations adopted under the act.

In accordance with 25 Pa. Code §§ 127.44(b) and 127.45, the Department of Environmental Protection (Department) intends to issue a Plan Approval to allow the construction and operation of the Sims natural gas compression and processing facility located off Lone Pine Road in Amwell Township, Washington County.

Annual emissions from the facility are limited to 44 tons of NO_x, 36 tons of CO, 7.5 tons of VOC and 5.75 tons of formaldehyde.

BAT for this operation consists of low emission model engines equipped with air/fuel ration controllers, continuous engine monitoring equipment with automatic poor combustion engine shutdown, a compressor loop bypass, a vent-free automatic emergency plant inlet shutoff, and best operating practices.

The proposed facility is subject to the applicable requirements of 25 Pa. Code Chapters 121–145, 40 CFR 60 Subpart JJJJ—Standards of Performance for Stationary Spark Ignition Internal Combustion Engines, 40 CFR 60 Subpart KKK—Standards of Performance for Equipment Leaks of VOC From Onshore Natural Gas Processing Plants, Subpart IIII—Standards of Performance for Stationary Compression Ignition Internal Combustion Engines, and Subpart ZZZZ—National Emissions

Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines. The Department believes that the facility will meet these requirements by complying with Plan Approval conditions relating to restrictions, monitoring, recordkeeping, reporting and work practice standards:

COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law (35 P. S. §§ 691.1—691.1001); the Coal Refuse Disposal Act (52 P. S. §§ 30.51—30.66); The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.21). Mining activity permits issued in response to such applications will also address the applicable permit-

ting requirements of the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4015); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of the application is available for inspection at the District Mining Office indicated above each application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for the certification.

Written comments or objections, or requests for an informal conference, or a public hearing, as applicable, on a mining permit application may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the address of the district mining office indicated above each application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Written comments or objections related to a mining permit application should contain the name, address and telephone number of persons submitting comments or objections; application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code §§ 77.123 or 86.34, must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

When a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. The Department has made a tentative determination to issue the NPDES permit in conjunction with the mining activity permit, but the issuance of the NPDES permit is contingent upon the approval of the associated mining activity permit.

For coal mining activities, NPDES permits, when issued, will contain effluent limits that do not exceed the technology-based effluent limitations. The proposed limits are listed in Table 1.

For noncoal mining activities, the proposed limits are found in Table 2. Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description below specifies the parameters. The limits will be in the ranges specified in Table 1.

More restrictive effluent limitations, restrictions on discharge volume, or restrictions on the extent of mining that may occur, will be incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding Concerning Water Quality Management, NPDES Program Implementation and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Loads (TMDLs).

Persons wishing to comment on an NPDES permit application should submit a statement to the Department at the address of the district mining office indicated previously each application within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92.61. The request or petition for a public hearing shall be filed within 30 days of this public notice and shall contain the name, address, telephone number and the interest of the party filing the request, and shall state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. In the case where a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. Board (Board) through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a Site-Specific Standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a Site-Specific Standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the Environmental Cleanup Program manager in the Department regional office before which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. Nutrient and Sediment Reduction Credit Trading Program; Notice of Proposals

The Department of Environmental Protection (Department) provides notice of the following proposals that have been submitted under the Nutrient and Sediment Reduction Credit Trading Program (Trading Program). These

proposals were submitted under The Clean Streams Law (35 P. S. §§ 691.1—691.1001), and the Final Trading of Nutrient and Sediment Reduction Credits—Policy and Guidelines (Policy) (DEP ID# 392-0900-001) (see 36 Pa.B. 7999 (December 30, 2006)). The Policy calls for a transparent system of credit reviews and approvals.

Trading is a market-based program that provides incentives for entities to create nutrient reduction credits by going beyond statutory, regulatory or voluntary obligations and goals by removing nutrients from a watershed. The credits can be traded to help others more cost-effectively meet their obligations or goals. The primary purpose of the Trading Program is to provide for more efficient ways for National Pollutant Discharge Elimination System (NPDES) permittees to meet their effluent limits for nutrients and sediment. Currently, the focus of the program is on the Chesapeake Bay Watershed.

The proposals described in this notice relates to the submitted proposals through April 23, 2010.

Background

Before a credit can be used by an NPDES permittee, a three-step process is followed: (1) the credit or offset proposal must be approved; (2) it must be verified; and (3) it must be registered.

Approval is also known as certification, which is a written approval by the Department for the use of proposed or implemented activities to generate credits (in some cases the person generating the credits is not permitted to transfer them to another person, in which case they are called "offsets"). Certifications are based on at least: (1) a credit or offset proposal describing the qualifying activities that will reduce the nutrient loadings

delivered to the applicable watershed; (2) the calculation to quantify the pounds of reductions expected; and (3) a verification plan that, when implemented, ensures that the qualifying nutrient reduction activities have taken place. The proposals described in this Notice apply to the Chesapeake Bay Watershed.

Once the credits or offsets are certified, they must be verified. Verification means implementation of the verification plan contained in a certification, as required by the Department. Verification plans require annual submittal of documentation to the Department that demonstrates that the qualifying nutrient reduction activities have taken place for the applicable compliance year.

The credits or offsets also need to be registered by the Department before they can be used to meet effluent limits in an NPDES permit. Registration occurs only after credits or offsets have been certified and verified and a trading contract for credits has been submitted to the Department. For the Chesapeake Bay Watershed, the Department will register credits on an annual basis for use during the compliance year in which the qualifying nutrient reduction activities have taken place and will provide such credits with an annual registry number for reporting and tracking purposes.

The Department has received 88 proposals that have been submitted for review to generate nutrient reduction credits in the Chesapeake Bay Watershed. Of those, 58 have been approved, one has been withdrawn and the remaining need additional clarification prior to qualifying for certification.

New Proposals Under Review

The following new proposals are being reviewed by the Department. The Department will accept written comments on these proposed projects for 30 days.

Pennsylvania's 2011 Ambient Air Monitoring Network Plan Available for Public Inspection

On October 17, 2006, the United States Environmental Protection Agency (EPA) promulgated final amendments to the National ambient air monitoring requirements for criteria pollutants at 40 CFR Parts 53 and 58 (relating to ambient air monitoring reference and equivalent methods; and ambient air quality surveillance). See 71 FR 61236 (October 17, 2006). The EPA's final rule requires state and local agencies to enhance air monitoring to

"improve public health protection and better inform the public about air quality in their communities." Under 40 CFR 58.10 (relating to annual monitoring network plan and periodic network assessment), air quality state and local monitoring agencies must adopt an annual air-monitoring network plan and make the plan available for public inspection for at least 30 days prior to final submission to the EPA Regional Administrator. The plan, which is due July 1, 2010, must include a statement of purpose for each monitor and evidence that siting and operation of each monitor meets Federal requirements. The EPA may also provide an opportunity for review and comment prior to approving or disapproving a State's Monitoring Network Plan.

On May 8, 2009, the 2010 Annual Air Monitoring Network Plan was made available for public comment on the Department of Environmental Protection's (Department) web site at www.dep.state.pa.us/dep/deputate/airwaste/aq/default.htm. The plan has been updated to address changes that have been made in this Commonwealth's ambient air monitoring network and to identify changes that are anticipated to occur in 2011.

The Bethlehem Hydrogen Sulfide monitoring site in Bethlehem (Northampton County) will be discontinued. This source-specific monitoring site is no longer needed since the source was permanently shut-down in 2006. The Department is also continuing its strategy to replace more manual PM2.5 samplers with continuous automated samplers that meet EPA's requirement of a Federal Equivalent Method (FEM). Use of the FEM samplers will improve the ability of the Department to provide real-time data on air quality as it relates to PM2.5 particulate matter, provide operational cost savings, and will still be used in determination of compliance with the National Ambient Air Quality Standards. In 2011, the Department will also determine whether the Biglerville ozone monitor installed to support Penn State University's research on the biological effects of ground-level ozone on agricultural crops, particularly grapes, will be discontinued.

The public is invited to submit comments on this network plan. Comments must be received by the Department on or before June 8, 2010. Written comments should be sent to the attention of Nicholas Lazor, Acting Chief, Division of Air Quality Monitoring, Bureau of Air Quality, P. O. Box 8468, Harrisburg, PA 17105-8468 or nlazor@state.pa.us. Use "Annual Monitoring Network Plan" as the subject line.

FISH AND BOAT COMMISSION

2010 Classification of Wild Trout Streams; Additions and Adjustments to List

The Fish and Boat Commission (Commission) has approved additions and adjustments to its list of wild trout streams as published at 40 Pa.B. 1468 (March 13, 2010) with the exception of McIntire Run, Fayette County.

Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Commission to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The listing of a stream section as a wild trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate management of streams. The Commission's Fisheries Management Division maintains the complete list of wild trout streams, and it is available on the Commission's web site at http://www.fish.state.pa.us/trout_repro.htm.

Additions to List of Class A Wild Trout Waters

The Fish and Boat Commission (Commission) has approved the additions to its list of Class A Wild Trout Streams as set forth at 40 Pa.B. 1466 (March 13, 2010). It is noted that the correct spelling for Burchards Creek in Pike County is "Burchards," not "Buchards" as stated in the notice.

Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource and to conserve that resource and the angling that it provides. Class A wild trout popula-

tions represent the best of this Commonwealth's naturally reproducing trout fisheries. The Commission manages these stream sections for wild trout with no stocking.

*State Board of Psychology—
Qualifications; Regulation No. 16A-6315 (#2763)*

On April 22, 2009, the Independent Regulatory Review Commission (Commission) received this proposed regula-

tion from the State Board of Psychology (Board). This rulemaking amends 49 Pa. Code Chapter 41. The proposed regulation was published in the May 2, 2009 *Pennsylvania Bulletin* with a 30-day public comment period. The final-form regulation was submitted to the Commission on March 11, 2010.

This regulation amends and reformats the education, experience and examination requirements in the existing rules for applicants for licensure as psychologists. It will increase the number of hours of supervised experience required for applicants in one year from 1,500 to 1,750 hours.

We have determined this regulation is consistent with the statutory authority of the Board (63 P. S. §§ 1203.2(1), 1206(a)(2), 1208(a)(6)) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

By Order of the Commission:

This regulation is approved.

*Department of Public Welfare—
Family Violence and TANF and GA; and Support
From Relatives Not Living With the Client;
Regulation No. 14-513 (#2713)*

On August 5, 2008, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Department of Public Welfare (Department). This rulemaking adds Chapter 108 to 55 Pa. Code and amends Chapter 187. The proposed regulation was published in the August 16, 2008 *Pennsylvania Bulletin* with a 30-day public comment period. The final-form regulation was submitted to the Commission on March 11, 2010.

This regulation officially codifies the Family Violence Option (FVO), which the Department adopted from the federal program in its 1997 state plan. FVO allows additional funding to be provided to families or individuals that can demonstrate they are dealing with domestic violence. FVO also would allow the Department to waive various TANF and General Assistance requirements if the individual or family can show that complying with any of these requirements would put the recipient at further risk of domestic violence.

We have determined this regulation is consistent with the statutory authority of the Department (62 P. S. §§ 201(2) and 403(b)) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

By Order of the Commission:

This regulation is approved.

*Department of Health—
School Immunizations; Communicable
and Noncommunicable Diseases;
Regulation No. 10-181 (#2672)*

On January 24, 2008, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Department of Health (Department). This rulemaking amends 28 Pa. Code Chapter 23, Subchapter C and Section 27.77. The proposed regulation was published in the February 9, 2008 *Pennsylvania Bulletin* with a 30-day public comment period. The final-form regulation was submitted to the Commission on March 22, 2010.

This regulation updates immunization requirements for school attendance and child care group settings.

We have determined this regulation is consistent with the statutory authority of the Department (35 P. S. § 521.16(a) and 24 P. S. § 13-1303a) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

By Order of the Commission:

This regulation is approved.

*State Board of Veterinary Medicine—
Biennial Renewal Fees; Regulation No. 16A-5723 (#2788)*

On September 2, 2009, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the State Board of Veterinary Medicine (Board). This rulemaking amends 49 Pa. Code § 31.41. The proposed regulation was published in the September 19, 2009 *Pennsylvania Bulletin* with a 30-day public comment period. The final-form regulation was submitted to the Commission on March 11, 2010.

This rulemaking would provide for incremental biennial license renewal fee increases for veterinarians and veterinary technicians for the next six biennial renewal cycles. The current renewal fee for veterinarians is \$300 and the current renewal fee for veterinary technicians is \$75. The renewal fees at the end of the 2020-2022 biennial period will be \$590 for veterinarians and \$140 veterinary technicians.

Subsections 13(a), (b) and (c) of the Veterinary Medicine Practice Act (Act) (63 P.S. § 485.13(a), (b) and (c)) establish the Board's authority for setting and raising fees. Those sections state the following:

(a) The board shall, by regulation, fix the fees required for examination, licensure, certification, registration, renewal of licenses and registrations, renewal of certificates and temporary permits.

(b) If the revenues raised by fees, fines and civil penalties imposed pursuant to this act are not sufficient to meet expenditures **over a two-year period**, the board shall increase those fees by regulation so that the projected revenues will meet or exceed projected expenditures. (Emphasis added.)

(c) If the Bureau of Professional and Occupational Affairs determines that the fees established by the board pursuant to subsections (a) and (b) are inadequate to meet the minimum enforcement efforts required by this act, then the bureau, after consultation with the board, shall increase the fees by regulation so that adequate revenues are raised to meet the required enforcement effort.

In our comments on the proposed rulemaking, we asked the Board to explain how the increases conform to the intent of the General Assembly and Section 13 of the Act. We also questioned the Board's statutory authority for automatic fee increases that may or may not be needed to meet expenditures ten years in the future. The Board responded, "Section 13 (b) does not limit the Board to looking only 2 years into the future when projecting a budget surplus." In addition, we asked the Board if its financial condition improves, will the fees be decreased accordingly? The Board responded, "The Board will carefully monitor its expenditures and will stabilize or decrease the fees by regulation if they are needed."

Based on this response and the Board's explanation at our public meeting, we have concluded that this regulation is not consistent with the intention of the General Assembly. We do not believe the Board's proposal for incremental biennial renewal fees over six renewal cycles is consistent with the intent of the Act. By imposing a two-year time period in statute, we believe the General Assembly's intent was to require the Board to evaluate its revenues and expenditures, and adjust those revenues and expenditures, more frequently than once every ten years. In addition, we believe that the two-year statutory time period reflects the General Assembly's intent that Board fee adjustments be reviewed by this Commission and by the General Assembly more frequently than once every ten years. Accordingly, we believe that a regulatory scheme of incremental fee increases over any period beyond two years is a decision that should be made by the General Assembly.

In addition, we find promulgation of this regulation is not in the public interest because of the potential fiscal impact it could have on the regulated community. Based on numerous factors, the projections that formed the basis for this proposed rulemaking could be understated or overstated. If they are overstated, the fees collected could lead to a large surplus and the Board has no statutory obligation to readjust the fees in favor of the regulated community. While we commend the Board for committing to monitoring its expenditures and adjusting the fees accordingly, we believe any potential surplus should be in the hands of the veterinarians and veterinary technicians instead of the Board.

By Order of the Commission:

This regulation #16A-5723 (IRRC #2788) from the State Board of Veterinary Medicine; Biennial Renewal Fees is disapproved on April 22, 2010.
