READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances where the agency may omit the proposal step; they still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania*

Bulletin before it can take effect. If the agency wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, they must re-propose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number and page number. Example: Volume 1, *Pennsylvania Bulletin*, page 801 (short form: 1 Pa.B. 801).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*.

The *Pennsylvania Code* contains, as Finding Aids, subject indexes for the complete *Code* and for each individual title, a list of Statutes Used As Authority for Adopting Rules and a list of annotated cases. Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

(3) For vinyl chloride:

$$MSC = \frac{TR}{[(IUR \times ET \times EF \times ED \times TF \times CF) / (ATc \times 365 \text{ days/year} \times 24 \text{ hr/day})] + (IUR \times TF \times CF)}$$

Notes: Modified from USEPA Region III Risk-based Concentration Table, dated October 20, 1995.

N/A = Not Applicable

¹ Residential exposure to systemic toxicants is based on adult exposure, consistent with USEPA (1991).

² Residential exposure to carcinogens is based on combined child and adult exposure.

³ Default Transfer Factor is as presented in USEPA's RAGS, Part B.

⁴ The Combined Age-Dependent Adjustment Factor and Exposure Duration (AED) is calculated using the equation AED = ADAF_{<2} × ED_{<2} + ADAF₂₋₁₆ × ED₂₋₁₆ + ADAF_{>16} × ED_{>16}, where ADAF_{<2} = 10, ED_{<2} = 2 yr, ADAF₂₋₁₆ = 3, ED₂₋₁₆ = 14 yr, ADAF_{>16} = 1, ED_{>16} = 14 yr.

§ 250.605. Sources of toxicity information.

(a) For site-specific standards, the person shall use appropriate reference doses, reference concentrations, cancer slope factors and unit risk factors identified in Subchapter C (relating to Statewide health standards), unless the person can demonstrate that published data, available from one of the following sources, provides more current reference doses, reference concentrations, cancer slope factors or unit risk factors:

(1) Integrated Risk Information System (IRIS).

(2) United States Environmental Protection Agency, National Center for Environmental Assessment (NCEA) Provisional Peer-Reviewed Toxicity Values (PPRTV).

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of April 2011

The Department of Banking (Department), under the authority contained in section 301 of the act of January 30, 1974 (P. L. 13, No. 6) (41 P. S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of April, 2011, is 6 1/2%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. 96-221). Further preemption was instituted with the signing of Pub. L. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 4.00 to which was added 2.50 percentage points for a total of 6.50 that by law is rounded off to the nearest quarter at 6 1/2%.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Applications, Actions and Special Notices

APPLICATIONS

THE CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT APPLICATIONS FOR NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS

This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a General Permit. The applications concern, but are not limited to, discharges regarding industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFO). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or Amendment
Section III	WQM	Industrial, Sewage or Animal Waste; Discharge into Groundwater
Section IV	NPDES	MS4 Individual Permit
Section V	NPDES	MS4 Permit Waiver
Section VI	NPDES	Individual Permit Stormwater Construction
Section VII	NPDES	NOI for Coverage under NPDES General Permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 Individual Permits and Individual Stormwater Construction Permits in Sections IV and VI, the Department, based upon preliminary reviews, has made tentative determinations of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the United States Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on NPDES applications are invited to submit statements to the contact office noted before the application within 30 days from the date of this public notice. Description of Existing Activity: The Department is proposing to amend the Scranton Sewer Authority's NPDES Permit for the discharge of treated sewage to the Lackawanna River. The purpose of the amendment is to revise the final Total Residual Chlorine (TRC) effluent limitations contained in the permit based upon a Site Specific Chlorine Demand Study (Study) and in accordance with the stipulation of settlement entered into on March 2, 2011 in the matter of Scranton Sewer Authority v. DEP, EHB Docket No. 2010-043-M. Based upon the Study, the TRC effluent limitations will be revised to 0.37 mg/l monthly average and 1.35 mg/l instantaneous maximum effective upon issuance. The proposed permit amendment has been drafted using an updated permit template that reflects the Chapter 92a Regulations that became effective on October 9, 2010. The Discharge Monitoring Report and Supplemental forms have also been updated. There are no other substantive changes to the permit.

The receiving stream, Lackawanna River, is located in State Water Plan Basin 5A and is classified for Cold Water Fishes, aquatic life, water supply and recreation. The discharge is not expected to affect public water supplies.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS NEW SOURCES AND MODIFICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of these applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office listed before the applications. Persons interested in reviewing the application files should contact the appropriate regional office to schedule appointments.

Persons wishing to receive a copy of a proposed Plan Approval or Operating Permit shall indicate interests to the Department regional office within 30 days of the date of this notice and shall file protests or comments on a proposed Plan Approval or Operating Permit within 30 days of the Department providing a copy of the proposed documents to persons or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that hearings be held concerning a proposed Plan Approval or Operating Permit. A comment or protest filed with the Department regional office shall include a concise statement of the objections to the issuance of the Plan Approval or Operating Permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

In accordance with 25 Pa. Code §§ 127.424—127.425, the Pennsylvania Department of Environmental Protection (DEP) intends to issue a State Only Operating permit for the operation of an auto shredder at the Koppel plant located in Big Beaver Borough, Beaver County.

Sources at this facility include an auto shredder and a secondary metals recovery plant. Annual emissions from the facility are estimated to be less than 5 tons of total particulate matter. Emissions from these sources are controlled through the use of a water spray system and a cyclone. The facility is subject to the applicable requirements of Title 25 Pa. COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law; the Coal Refuse Disposal Control Act (52 P. S. §§ 30.51—30.66); and The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.20a). Mining activity permits issued in response to applications will also address the applicable permitting requirements of

the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4014); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1002).

The following permit applications to conduct mining activities have been received by the Department. A copy of an application is available for inspection at the district mining office indicated before each application. Notices of requests for 401 Water Quality Certifications are included in individual application notices, as noted.

Written comments or objections, or requests for an informal conference or a public hearing, as applicable, on a mining permit application may be submitted by a person or an officer or head of Federal, state or local government agency or authority to the Department at the address of the district mining office indicated before each application within 30 days of this publication or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Written comments or objections regarding a mining permit application should contain the name, address and telephone number of the person submitting comments or objections, the application number and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

A request for an informal conference or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code § 77.123 or § 86.34, must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

When an NPDES number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. The Department has made a tentative determination to issue the NPDES permit in conjunction with the mining activity permit, but the issuance of the NPDES permit is contingent upon the approval of the associated mining activity permit.

For coal mining activities, NPDES permits, when issued, will contain effluent limits that do not exceed the technology-based effluent limitations. The proposed limits are listed in Table 1.

For noncoal mining activities, the proposed limits are in Table 2. Discharges from noncoal mines located in some geologic settings (for example, in coal fields) may require

additional effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters. The limits will be in the ranges specified in Table 1.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur will be incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are in Technical Guidance Document 362-0600-001, NPDES Program Implementation-Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Loads.

Persons wishing to comment on NPDES permit applications should submit statements to the Department at the address of the district mining office indicated before each application within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. A comment must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications as provided in 25 Pa. Code § 92.61. The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

SEWAGE FACILITIES ACT PLAN APPROVAL

Plan Approvals Granted Under the Pennsylvania Sewage Facilities Act (35 P. S. § 750.5)

*Northeast Region: Water Management Program Man-
 ager, 2 Public Square, Wilkes-Barre, PA 18711-0790*

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
West Hazleton Borough	100 South Fourth Street West Hazleton, PA 18202	Luzerne

Plan Description: The Corrective Action Plan (CAP), submitted as a plan update revision to West Hazleton Borough's (Borough) Official Sewage Facilities Plan, proposes a systematic investigation that will identify and propose corrective measures for portions of the Borough's wastewater collection system that may be subject to excessive amounts of infiltration/inflow (I/I). The CAP is also intended to reduce hydraulic overloading at the Greater Hazleton Joint Sewer Authority's Wastewater Treatment Facility. The CAP also contains an implementation schedule for its investigative activities. The CAP is now to be considered an integral part of the Borough's Official Sewage Facilities Plan.

Should conditions be encountered during the implementation of the CAP, which require the alteration of the approved CAP, the Borough shall contact the Department, in writing, and discuss the need to alter the CAP at the earliest possible time. Any additional wastewater-related improvements, additions, deletions or changes outside of those explicitly described in the CAP must be in compliance with the Department's regulations and be submitted to and approved by the Department in writing.

Plan Location: Jacob Schray

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Bushkill Twp	1114 Bushkill Center Rd. Nazareth, PA 18064	Northampton

Plan Description: The approved plan provides for the subdivision plan submitted for the above referenced proposed Official Plan Revision consisting of a single family residence on a 2.82 acre tract.

This project proposes a small flow treatment facility to repair a malfunctioning on-lot sewage disposal system, which currently serves the residence. The proposed treatment facility will include a 1,500 gallon, dual compartment treatment tank, an Orenco Advantex(r) AX-20N treatment unit, followed by an ultraviolet radiation disinfection unit. The discharge will be to a tributary of the West Branch Sobers Run, a tributary to the Bushkill Creek, which is designated as High Quality-Cold Water Fishes (HQ-CWF) in 25 PA Code § 93.9c. An existing private springhouse is located on the property.

Since there is no environmentally sound and cost-effective nondischarge alternative available to correct the existing public health or pollution hazard at this site, the social or economic justification requirements in 25 PA Code § 93.4c(b)(1)(iii) for a discharge to high quality waters has been satisfied.

The proposed development is located at 189 East Mountain Road, Bushkill Township, Northampton County.

Any required NPDES Permits or WQM Permits must be obtained in the name of Jacob Schray.

Northwest Region: Water Management Program Manager, 230 Chestnut Street, Meadville, PA 16335-3481

Project Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Norwich Township	3853 W. Valley Road Smethport, PA 16749-3153	McKean

Project Description: The approved plan provides for construction of approximately 1400 linear feet of small diameter low-pressure sewers with individual grinder pumps, serving an estimated 23 Equivalent Dwelling

Units (EDU) or approximately 9200 gallons per day, from 35 connections of seasonal and full time residences.

The project area includes sections of Christian Hollow Road, from the end of the existing collection line, which is approximately 1.25 miles southeast of the intersection of Christian Hollow Road and White Hollow Road and continuing southeast for approximately 1.4 miles. In addition, sections of Robbins Brook Road, from the existing pump station on West Valley Road and continuing west for approximately 0.78 miles, and Kandare Camp Lane from the existing force main (FM1) on West Valley Road and continuing west for approximately 0.66 miles will be sewerred.

The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of Norwich Township.

Plan Description: The approved plan provides for a 44 room motel (Red Carpet Inn) and one single family home with total flows of 4800 gpd to be served by an on site sewage treatment plant to discharge to an unnamed tributary to Shearer's Creek. Credits for phosphorus will be needed to comply with the Chesapeake Bay tributary strategy and the sewage plant will need to meet non-degrading limits established for the discharge to the receiving stream. The proposed motel is located on the east side of Lebanon Rd at Engle Lane. The DEP Code number is A3-36948-456-3 and the APS number is 722591. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of the owner as appropriate.

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Hamilton Township	272 Mummert's Church Rd Abbottstown PA 17301	Adams

Plan Description: The approved plan provides for the replacement of a failing package treatment plant with a pump station at the Glabview Acres development. The 18 home development is currently served by 8000 gpd plant with an average flow of 1100 gpd and discharges to the Conewago Creek. The proposed pump station will convey the effluent to an existing manhole in 700 Rd. It will then flow by gravity to the Berwick Township Sewage Treatment Plant. The name of the project is Glabview Acres and the DEP code # is A3-01917-159-3m. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. This proposal also includes increasing the Antietam Creek Sewer trunk pipe size between Manhole 219 and Manhole 204 from 12 inches to 18 inches. The proposed development is located on Old Friedensburg Rd. in Exeter and Lower Alsace Townships, Berks County. The plan revision is entitled the Windy Willows Subdivision and the DEP numbers are A3-06809-024-3 and A3-06932-279-3. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of the owner.

SEWAGE FACILITIES ACT PLAN DISAPPROVAL

Plan Disapprovals Granted under the Pennsylvania Sewage Facilities Act (35 P. S. § 750.5)

Southcentral Region: Water Management Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110. Telephone: 717-705-4707.

Plan Location: The proposed development is located at 423 Fair Valley Road, T-344, in North Woodbury Township, Blair County.

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
North Woodbury Township	113 Cranberry Road. Martinsburg, PA 16662	Blair County

Plan Description: The plan was disapproved because a hydrogeologic study as required by Chapter 71, Section 71.62(c)(2)(iii) and 71.62(c)(2)(iv) was not included with the planning information received by the Department. Therefore, the planning module information does not adequately assess the impact of the proposed on-lot sewage disposal systems on the groundwater, as required

by the Department's regulations. Potential pollution of the Waters of the Commonwealth is considered a nuisance and is prohibited as per the Clean Streams Law

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. Request for Comments on the Proposed Total Maximum Daily Loads (TMDLs) Developed for the West Branch Antietam Creek Watershed in Franklin County Pennsylvania

The Department hereby categorically excludes this project from the State Environmental Review Process.

Request for Comments on the Proposed Total Maximum Daily Loads (TMDLs) Developed for the Susquehanna River, Unnamed Tributary 07251 Watershed in Lancaster County Pennsylvania

The Department of Environmental Protection will accept comments on the proposed TMDLs developed for the Susquehanna River, Unnamed Tributary 07251 Watershed in Lancaster County, PA. These TMDLs were established in accordance with the requirements of Section 303(d) of the Clean Water Act. The Pennsylvania Integrated Water Quality Monitoring and Assessment Report included impaired stream segments in this watershed. The listings of these waterbodies were due to use impairments caused by excessive siltation.

There currently are no state or federal instream numerical water quality criteria for siltation. Therefore, the Department utilized a reference watershed approach to implement the applicable narrative criteria. These proposed TMDLs set allowable loadings of sediment in the Susquehanna River, Unnamed Tributary 07251 Watershed. The sediment loadings were allocated among cropland, hay/pasture land, transitional land and streambank categories present in the watershed. Data used in establishing these TMDLs was generated using a water quality analysis model (AVGWLF) designed by the Pennsylvania State University.

The following table shows the estimated current sediment loadings for the watershed. Overall load reductions necessary in order to meet the TMDLs are also identified.

County, PA. These TMDLs were established in accordance with the requirements of Section 303(d) of the Clean Water Act. The Pennsylvania Integrated Water Quality Monitoring and Assessment Report included impaired stream segments in this watershed. The listings of these waterbodies were due to use impairments caused by excessive siltation and/or nutrients.

There currently are no state or federal instream numerical water quality criteria for siltation or nutrients. Therefore, the Department utilized a reference watershed approach to implement the applicable narrative criteria. These proposed TMDLs set allowable loadings of sediment and phosphorus in the West Branch Antietam Creek Watershed. Phosphorus was chosen as the TMDL endpoint for nutrient impairments due to it being the limiting nutrient in the watershed. The sediment and phosphorus loadings were allocated among cropland, hay/pasture land, transitional land and streambank categories present in the watershed. Data used in establishing these TMDLs was generated using a water quality analysis model (AVGWLF) designed by the Pennsylvania State University.

Clean Air Interstate Rule; 2011 Allocation of 2010 Vintage NOx Allowances Set Aside to Offset SO₂ Emissions

In accordance with 25 Pa. Code § 145.212(f)(2) (relating to CAIR NOx allowance allocations), the Department of Environmental Protection (Department) is providing notice of the issuance of 2010 vintage Clean Air Interstate Rule (CAIR) nitrogen oxides (NOx) allowances to owners

or operators of certain CAIR sulfur dioxide (SO₂) units for the purpose of offsetting SO₂ emissions. These units were exempted under the Federal Acid Rain Program provisions in section 405(g)(6)(A) of the Clean Air Act (42 U.S.C.A. § 7651d(g)(6)(A)) and therefore did not receive SO₂ allowances, yet are subject to the CAIR SO₂ Trading Program. The Department allocated the CAIR NOx allowances identified in this notice on a ratio of 1 CAIR NOx allowance to every 8 tons of SO₂ emitted in 2010 in response to written requests submitted to the Department by January 31, 2011. Up to 1.3% of this Commonwealth's CAIR NOx Annual Trading Program budget is available for allocation to these units, as described in 25 Pa. Code § 145.212(f)(2) and (4).

The Commonwealth's CAIR NOx Annual Trading Program budget contained 99,049 CAIR NOx allowances for 2010; 97,761 CAIR NOx allowances were allocated at 40 Pa.B. 297 (January 9, 2010). The remaining 1,288 CAIR NOx allowances, 1.3% of the CAIR NOx Annual Trading Program budget, were set aside for this allocation. The Department received two requests by January 31, 2011, for additional CAIR NOx allowances. Based on the calculations submitted, each of the following facilities received the requested 2010 CAIR NOx allowances:

Cambria Cogen	ORIS 10641	231 NOx allowances
IPAC Colver Power Project	ORIS 10143	324 NOx allowances

On February 15, 2011, the United States Environmental Protection Agency notified the owners and operators of the two facilities and the Department of the CAIR NOx allowance account transfers. There were 1,288 CAIR NOx allowances set aside and 555 CAIR NOx allowances requested and issued. In accordance with 25 Pa. Code § 145.212(f)(5), the Department may consider requests, in writing, for the remaining NOx allowances. The remaining NOx allowances would be allocated by the Department on a pro rata basis; the allocations would be subject to a 30-day public comment period after providing notice in the *Pennsylvania Bulletin*.

Action at the Federal or State level could affect the allocated NOx allowances. Annual and ozone season CAIR NOx allowances do not constitute property rights.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board

at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Questions concerning this notice should be directed to Randy Bordner, Chief, Stationary Source Section, Bureau of Air Quality at (717) 772-3921 or to ranbordner@state.pa.us. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in Section 5.2 of the Regulatory Review Act (71 P. S. § 745.5b).

The Commission has issued comments on the following proposed regulation. The agencies must consider these comments in preparing the final-form regulation. The final-form regulations must be submitted within two years of the close of the public comment period or it will be deemed withdrawn.

Pennsylvania Gaming Control Board Regulation #125-137 (IRRC #2884) Table Game Equipment March 9, 2011

We submit for your consideration the following comments on the proposed rulemaking published in the January 8, 2011 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P. S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P. S. § 745.5a(a)) directs the Pennsylvania Gaming Control Board (Board) to respond to all comments received from us or any other source.

1. Determining whether the regulation is in the public interest; Need.

This proposed rulemaking will rescind a temporary regulation relating to table game equipment and establish a permanent regulation on the same subject matter. Both the temporary regulation and this proposed regulation are very detailed documents that set forth the minimum design standards for gaming chips, plaques, dice, cards, shufflers, Pai Gow tiles and Sic Bo shakers and address the requirements on the receipt, storage, distribution, inventory and destruction of the equipment.

We understand that the Board is charged with ensuring the integrity of gaming. However, neither the temporary regulation nor the proposed regulation adequately explains why such a descriptive rule is needed. For each of the 18 sections contained in the proposed rulemaking, we ask the Board to provide a more detailed description of the rulemaking, how it was developed or what it is based on, and why it is needed. This background information will assist this Commission in determining if the regulation is in the public interest.

2. Implementation procedures.

This proposed rulemaking includes references to regulations that have not been promulgated. The sections of this rulemaking that include the references are: §§ 603a.10(g); 603a.16(d); 603a.17(c); and 603a.17(f). It is our understanding that the references are to other Board table game regulations that will be promulgated in the near future. We are concerned that this rulemaking will be finalized before the other regulations are finalized. If this occurs, it could lead to a confusing regulatory environment for those that must comply with the rulemaking. In the Preamble to the final version of this rulemaking, we ask the Board to explain its plan for promulgating all of these regulations in a manner that ensures all references are valid.

3. Clarity and lack of ambiguity.

Throughout this proposed rulemaking, licensed facilities that hold a table game operation certificate (certificate holder) or manufacturers and suppliers may be required to obtain certain approvals or authorizations from the Board's Bureau of Gaming Operations (Bureau). For example, under § 603a.2(b)(1), a certificate holder must obtain Bureau approval of design specifications for gaming chips. Under § 603a.3(a), a certificate holder may issue value chips in denominations other than those specifically enumerated if those other denominations are approved by the Bureau. While we understand and appreciate the need for regulatory flexibility, we are concerned that the proposed rulemaking, in many instances, does not include the procedures for obtaining the necessary Bureau approvals. To assist the regulated community in understanding how to submit requests for certain approvals, we suggest that the final form regulation include the procedures or an appropriate cross-

reference to where the procedures can be found. We have identified the following sections that are problematic:

- § 603a.2(b)(1)
- § 603a.3(a)
- § 603a.3(c)
- § 603a.3(d)(2)
- § 603a.3(e)

- § 603a.13(f)(3)(viii)
- § 603a.13(k)
- § 603a.13(l)
- § 603a.13(o)(3)
- § 603a.15(c)

- § 603a.17(f)
- § 603a.18(a)
- § 603a.18(e)(2)
- § 603a.18(n)

4. Section 603a.1. Definitions.—Clarity.

The Board's temporary regulations provide a definition for the term "nonvalue chip." (See 58 Pa. Code § 523.1, relating to definitions.) The proposed regulation does not define the term "nonvalue chip" but does define the term "Roulette chip" as "a nonvalue chip which does not contain a denomination on either face which is used for wagering at the game of Roulette." A commentator has noted that the term "nonvalue chip" provides more regulatory flexibility than the term "Roulette chip." We note that the term "nonvalue chip" is also used in § 603a.4(b)(4)(i) and suggest that a definition of this term would add clarity to the regulation.

5. Section 603a.3. Value chips; denominations and physical characteristics.—Clarity.

Subsection (k) requires value chips with a denomination of \$25 or more to contain at least three "anticounterfeiting measures." We suggest that the term "anticounterfeiting measure" be defined.

6. Section 603a.5. Roulette chips; permitted uses, inventory and impressment.—Clarity.

The term "impressment" is used throughout this section of the regulation. We recommend that it be defined.

7. Section 603a.8. Additional sets of gaming chips.—Clarity.

Subsections (c) through (f) of this section pertain to procedures that certificate holders must follow if counterfeit chips are discovered. To improve the clarity of the rulemaking, we suggest that these subsections be moved to a separate section pertaining to procedures that must be followed when counterfeit chips are discovered.

8. Section 603a.9. Plaques; issuance and use; denominations and physical characteristics.—Clarity.

The term "plaque" is used throughout this section and other sections of the regulation. We recommend that it be defined.

9. Section 603a.10. Exchange and redemption of gaming chips and plaques.—Need; Reasonableness; Implementation procedures.

Subsection (h) includes the following sentence: "A certificate holder shall have the right at any time to demand that a person in possession of a gaming chip or plaque surrender the gaming chip or plaque for redemption in accordance with subsection (i)." Why is this provision included in the regulation? Under what circumstances would a certificate holder demand that a patron redeem

gaming chips or plaques? How will this provision be implemented if a patron does not comply with the certificate holder's request?

10. Section 603a.11. Receipt of gaming chips or plaques from a manufacturer or supplier; inventory, security, storage and destruction of chips and plaques.—Need.

Subsection (d) prohibits gaming chips or plaques from being stored in the same storage area as dice, cards, Pai Gow tiles or any other gaming equipment. What is the reason and need for this prohibition?

11. Section 603a.13. Dice; receipt, storage, inspection and removal from use.—Reasonableness; Implementation procedures.

Subsection (o) requires the destruction or cancellation of dice to occur within 72 hours of being collected. A commentator has suggested that 72 hours may not be enough time for a certificate holder to conduct investigations if cheating is suspected. We ask the Board to explain why a 72-hour time period is appropriate and why it was selected. We have a similar concern with § 603a.18(p), relating to the destruction or cancellation of Pai Gow tiles.

12. Section 603.15. Cards; physical characteristics.—Need; clarity.

We have two concerns with this section. First, under Subsection (g)(2), why must the label on the packaging of multiple decks of cards include the game for which cards are to be used?

Second, Subsection (i) pertains to additional requirements for cards used to play "Poker." Does the term "Poker" refer to all of the various types of Poker listed in the statutory definition of "table games" in Section 1103 of Pennsylvania Race Horse Development and Gaming Act (4 Pa.C.S. § 1103)? This should be clarified in the final-form regulation.

13. Section 603a.17. Dealing shoes; automated card shuffling devices.—Reasonableness.

Subsection (h) states that an automated shuffling device may not collect information or track cards that have been played. A commentator has stated that it produces a device that tracks cards for investigative purposes. Would a certificate holder be allowed to use a device that tracks certain information for investigative purposes only? If so, the regulation should specify under what conditions such a device can be used.

14. Section 603a.18. Pai Gow tiles; receipt, storage, inspection and removal from use.—Economic or fiscal impact; Reasonableness.

Under Subsection (g), if a certificate holder discovers that a tile is damaged, the entire set of tiles must be replaced. A commentator has stated that replacing all of the tiles is expensive and not needed. We ask the Board to quantify the cost of replacing one tile compared to replacing all the tiles. Would the integrity of gaming be jeopardized if only the damaged tile was replaced?
