Maximum Lawful Rate of Interest for Residential Mortgages for the Month of May 2011

The Department of Banking (Department), under the authority contained in section 301 of the act of January 30, 1974 (P. L. 13, No. 6) (41 P. S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of May, 2011, is 6 1/4%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. No. 96-221). Further preemption was instituted with the signing of Pub. L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 3.84 to which was added 2.50 percentage points for a total of 6.34 that by law is rounded off to the nearest quarter at 6 1/4%.

DEPARTMENT OF EDUCATION

Bureau of Adult Basic and Literacy Education; Availability of Funds

The Department of Education (Department) announces the availability of approximately \$14 million in grant funds to be awarded under section 231 of the Workforce Investment Act of 1998 (WIA) (20 U.S.C.A. § 9241) as well as approximately \$12 million in grant funds to be

awarded under the Pennsylvania Adult and Family Literacy Education Act (PAFLE) (24 P. S. §§ 6401—6409) for adult basic education and family programs in this Commonwealth. This announcement also serves as notice of availability of approximately \$1.5 million for integrated English literacy and civics education programs (EL/Civics) as authorized by the Consolidated Appropriations Act of 2010.

Activities to be conducted under these grants are to create partnerships among the Federal government, the Commonwealth, and local entities to provide, on a voluntary basis, adult education and family literacy services. The intent of adult education and family literacy services is to assist adults to become literate; to obtain the knowledge and skills necessary for employment and self-sufficiency; to become full partners in the education and development of their children; and to complete their secondary school education.

Priorities for WIA Section 231 funds include:

- Adult education programs as previously described
- A Statewide distance learning program

Priorities for PAFLE funds include:

- Adult education and family literacy programs as previously described
- A Statewide family literacy technical assistance program
- A Statewide technical assistance program for training volunteer adult literacy education instructors

Eligible applicants for funds authorized under these sources are:

- Local education agencies
- Community-based organizations of demonstrated effectiveness
- Volunteer literacy organizations of demonstrated effectiveness
- Institutions of higher education
- Public or private nonprofit agencies
- Libraries
- Public housing authorities

- Nonprofit institutions not previously described that have the ability to provide literacy services to adults and families
- Consortia of the agencies, organizations, institutions, libraries or authorities previously described

The closing date for receipt of applications under this announcement is May 22, 2011. Applications must be submitted through the Department's e-grants system no later than 4 p.m. E-grants records the time of submission. This recorded time will be used to determine submission time. Any applications received after the deadline will not be scored and will be ineligible for a grant.

Applications must be completed online and submitted by means of the e-grants web site at <http://egrants.ed.state.pa.us> to the Bureau of Adult Basic and Literacy Education (ABLE). Instructions for the use of the e-grants system and the Adult Education and Family Literacy Guidelines for PY 2011-12 are available at www.education.state.pa.us and through the e-grant web site. Eligible providers should submit Federal WIA Section 231 and State PAFLE applications in coordination as part of a full-service adult education/family literacy program. Eligible providers are also encouraged to submit an EL/Civics application if they propose to provide service in a local community that has a demonstrated need for additional English literacy programs.

The grant period will be for a term of 3 years—July 1, 2011, through June 30, 2014, except that the grant might be terminated earlier upon either implementation of a new WIA State Plan or reauthorization of the WIA. Funding for years 2 and 3 of the 3-year grant period will be provided through annual contract renewals. Renewal will occur provided that sufficient progress is made toward meeting performance measures set forth by ABLE. At the end of the grant period, grantees will be authorized to reapply and compete with other applicants for another multiyear term. These grants will be funded by riders to a Master Agreement executed between the Department and the funded agency. Agencies not currently funded will be given instructions on execution of the Master Agreement once grant applications are approved by ABLE.

In awarding grants and contracts under WIA Section 231, PAFLE and EL/Civics, the Department will consider:

- The degree to which the eligible provider will establish measurable goals for participant outcomes.
- The past effectiveness of an eligible provider in improving the literacy skills of adults and families and after the first year of the grant period, the success of an eligible provider receiving funding in meeting or exceeding performance measures set by ABLE, especially with respect to those adults with the lowest levels of literacy.
- The commitment of the eligible provider to serve individuals in the community who are most in need of literacy services, including individuals who are low-income or have minimal literacy skills.
- Whether or not the program:
 - Is of sufficient intensity and duration for participants to achieve substantial learning gains.
 - Uses instructional practices such as phonemic awareness, systematic phonics, fluency and reading

comprehension that research has proven to be effective in teaching individuals to read.

- Whether the activities are built on a strong foundation of research and effective educational practice.
- Whether the activities effectively employ advances in technology, as appropriate, including the use of computers.
- Whether the activities are provided in real life contexts to ensure that an individual has the skills needed to compete in the workplace and exercise the rights and responsibilities of citizenship.
- Whether the activities are staffed by well-trained instructors, counselors and administrators.
- Whether the activities coordinate with other available resources in the community, such as by establishing strong links with elementary and secondary schools, postsecondary education institutions, PA CareerLink® offices, job training programs and social service agencies.
- Whether the activities offer flexible schedules and support services (such as child care and transportation) that are necessary to enable individuals, including individuals with disabilities or other special needs, to attend and complete programs.
- Whether the activities maintain a high-quality information management system that has the capacity to report participant outcomes and to monitor program performance against ABLE performance measures.
- Whether the local communities have a demonstrated need for additional English literacy programs.

Further, in awarding grants and contracts under the PAFLE, the Department shall also consider:

- The percentage of adults expected to be enrolled for instruction who are receiving either State or Federal public assistance.
- The percentage of adults in any local area who do not have a certificate of graduation from a secondary school and who are not enrolled in adult or family literacy education programs.
- The percentage of eligible adults expected to be enrolled who are members of minority groups.
- The percentage of adults with less than a fifth grade reading level to be served.

Applicants for WIA Section 231 must fund 25% of total grant project costs through local match. Other Federal funds may not be used for the local match unless specifically identified as eligible for use as matching funds. In addition, funds awarded to eligible providers through the PAFLE may not be used for the 25% local match.

Applicants should note that both the WIA and EL/Civics grants include a cap on the amount of the grant that may be used toward administrative costs. Specifically, not more than 5% of a local applicant's grant may be used for administrative costs, unless a higher percent is approved in advance by ABLE.

In addition, applicants for PAFLE may not use grant funds for programs, activities or services related to sectarian instruction or religious worship.

All potential applicants are urged to attend the bidders' webinar to receive information on program guidelines and requirements for submitting e-grants applications for adult education and family literacy programs. This webinar will be conducted at <http://vclass.cciu.org> on April 22, 2011, from 9 a.m. to 11 a.m. A recording of the webinar will remain at the previously mentioned site for

a period of 60 days. To ensure timely administration and processing of e-grant applications, both the grant writer and the fiscal officer should attend the bidders' conference.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appro-

priate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS NEW SOURCES AND MODIFICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of these applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office listed before the applications. Persons interested in reviewing the application files should contact the appropriate regional office to schedule appointments.

Persons wishing to receive a copy of a proposed Plan Approval or Operating Permit shall indicate interests to the Department regional office within 30 days of the date of this notice and shall file protests or comments on a proposed Plan Approval or Operating Permit within 30 days of the Department providing a copy of the proposed documents to persons or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that hearings be held concerning a proposed Plan Approval or Operating Permit. A comment or protest filed with the Department

regional office shall include a concise statement of the objections to the issuance of the Plan Approval or Operating Permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Greenridge Reclamation Landfill, in Huntingdon Township, **Westmoreland County**.

In accordance with 25 Pa. Code §§ 127.44—127.46 the Department of Environmental Protection (DEP) intends to issue Air Quality Plan Approval: PA-65-01006A to allow the construction of a landfill gas to energy plant at the Waste Management of Pennsylvania, Inc. (WMPI) Greenridge Reclamation Landfill, located in Huntingdon Township, Westmoreland County. The sources at this facility will be either four Caterpillar Model G3520C engines each rated at 2,258 bhp or three Janbacher Model GS-E-199 engines each rated at 3,011bhp. A small John Zink purge gas flare will be used to control purge gas from the landfill gas treatment system.

Potential emissions from the facility are estimated to be 83.3 tons of nitrogen oxides (NOx), 242.23 tons of carbon monoxide (CO), 49.6 tons of volatile organic compounds (VOC), and 4.79 tons of hazardous air pollutants (HAP) per year. Best available technology (BAT) for the proposed sources is combusting only treated landfill gas, good combustion practices and proper maintenance and operation. The authorization is subject to State regulations and Federal New Source Performance Standards (NSPS) including 40 CFR Part 60 Subpart JJJJ. Plan Approval has been conditioned to ensure compliance with all applicable rules. These include work practice, monitoring, recordkeeping, and reporting conditions. Once compliance with the Plan Approval is demonstrated, the applicant will subsequently apply for a State Only Operating Permit in accordance with Pa. Code Title 25 Subchapter F.

COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law; the Coal Refuse Disposal Control Act (52 P. S. §§ 30.51—30.66); and The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.20a). Mining activity permits issued in response to applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4014); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1002).

The following permit applications to conduct mining activities have been received by the Department. A copy of an application is available for inspection at the district mining office indicated before each application. Notices of requests for 401 Water Quality Certifications are included in individual application notices, as noted.

Written comments or objections, or requests for an informal conference or a public hearing, as applicable, on a mining permit application may be submitted by a

person or an officer or head of Federal, state or local government agency or authority to the Department at the address of the district mining office indicated before each application within 30 days of this publication or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Written comments or objections regarding a mining permit application should contain the name, address and telephone number of the person submitting comments or objections, the application number and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

A request for an informal conference or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code § 77.123 or § 86.34, must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

When an NPDES number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. The Department has made a tentative determination to issue the NPDES permit in conjunction with the mining activity permit, but the issuance of the NPDES permit is contingent upon the approval of the associated mining activity permit.

For coal mining activities, NPDES permits, when issued, will contain effluent limits that do not exceed the technology-based effluent limitations. The proposed limits are listed in Table 1.

For noncoal mining activities, the proposed limits are in Table 2. Discharges from noncoal mines located in some geologic settings (for example, in coal fields) may require additional effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters. The limits will be in the ranges specified in Table 1.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining

that may occur will be incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are in Technical Guidance Document 362-0600-001, NPDES Program Implementation-Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Loads.

Persons wishing to comment on NPDES permit applications should submit statements to the Department at the address of the district mining office indicated before each application within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. A comment must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications as provided in 25 Pa. Code § 92.61. The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Coal Applications Received

Effluent Limits—The following range of effluent limits will apply to NPDES permits issued in conjunction with the associated coal mining activity permit and, in some cases, noncoal mining permits:

Parameter	30-Day Average	Daily Maximum	Instantaneous Maximum
Iron (total)	1.5 to 3.0 mg/l	3.0 to 6.0 mg/l	3.5 to 7.0 mg/l
Manganese (total)	1.0 to 2.0 mg/l	2.0 to 4.0 mg/l	2.5 to 5.0 mg/l
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l
Aluminum (Total)	0.75 to 2.0 mg/l	1.5 to 4.0 mg/l	2.0 to 5.0 mg/l
pH ¹		greater than 6.0; less than 9.0

WATER OBSTRUCTIONS AND ENCROACHMENTS

Southeast Region: Watershed Management Program Manager, 2 East Main Street, Norristown, PA 19401

E09-952. PA Turnpike Commission, PO Box 67676, Harrisburg, PA 17106-7676, Bensalem Bristol and Middletown Townships, **Bucks County**, ACOE Philadelphia District.

Project Description for Water Obstruction and Encroachment Permit Applications—Pennsylvania Turnpike (I-276)/Interstate 95 (I-95) Interchange Project—Bucks County, PA & Burlington County, NJ. This application is part of an overall project for associated impacts; to construct the proposed I-276/I-95 interchange between the Pennsylvania Turnpike (I-276) and Interstate 95 (I-95). The project also includes relocation of the Pennsylvania Turnpike barrier toll plaza (Interchange 359), widening of I-276 from four to six lanes between Interchange 351 and the Delaware River, and construction of an additional parallel bridge across the Delaware River. In addition, I-95 would be widened to accommodate ramps and merge lanes resulting from the construction of the interchange.

The roadway construction and widening along I-276 extend approximately 9.2 miles along I-276 from just west of Interchange 351, Bensalem Township, Bucks County (Langhorne, PA USGS Quadrangle N: 1.6 inches; W: 14.8 inches), across the Delaware River Turnpike Bridge. The study limits along I-95 extend 3.2 miles from just south of Trenton Road in Middletown Township, Bucks County (Langhorne, PA USGS Quadrangle N: 3.4 inches; W: 2.9 inches), to the east bank of the Neshaminy Creek in Bristol Township, Bucks County (Beverly, PA USGS Quadrangle N: 18.8 inches; W: 3.8 inches).

The overall project proposes to permanently impact a total of 2.27 acres of wetlands (PEM/PSS/PFO) and 2,097 linear feet of perennial stream. Compensatory wetland mitigation for the entire project will occur on land owned by the Pennsylvania Turnpike Commission (PTC) located at the corner of Zimmerman Lane and Newportville Road in Middletown Township, Bucks County; and stream mitigation will occur along Mill Creek in the Plumbridge Community in Bristol Township, Bucks County.

The project is divided into three stages of construction. Stage 1 of the project includes the completion of the Interstate 95 connections and toll system conversion. Stage 2 of the project includes completion of the remaining interchange movements and associated highway widening, while Stage 3 would include the construction of the new Delaware River Bridge and rehabilitation of the existing bridge.

The construction work for Stage 1 (Richlieu Road Bridge and Northwest Quadrant Mitigation Site) includes the following water obstruction and encroachment activities:

1. To excavate for the removal of a gravel road sub-base at the proposed mitigation site and then re-grade and restore the forested wetland that drains to an unnamed tributary to the Neshaminy Creek at station 25+89 (Langhorne, PA Quadrangle N: 1.4 inches, W: 3.1 inches). Temporary impact of 0.105 acres of forested wetland (W3A).

To excavate for the removal of a culvert conveying an unnamed tributary to the Neshaminy Creek and then re-grade and restore the forested wetland that drains to an unnamed tributary to the Neshaminy Creek at station 25+89 (Langhorne, PA Quadrangle N: 1.4 inches, W: 3.1 inches). Temporary impact of 0.006 acres of forested wetland (W3).

3. To excavate for the removal of a culvert conveying an unnamed tributary to the Neshaminy Creek and then re-grade and restore the forested wetland that drains to an unnamed tributary to the Neshaminy Creek at station 23+05 (Langhorne, PA Quadrangle N: 1.6 inches, W: 3.1 inches). Temporary impact of 0.012 acres of forested wetland (W6).

Temporary impact of 0.038 acres of forested wetland (W4).

5. To excavate for the removal of a culvert and reconstruction of the open channel conveying an unnamed tributary to the Neshaminy Creek at station 1+00 (Langhorne, PA Quadrangle N: 1.5 inches, W: 3.1 inches). Temporary impact of 128 linear feet of intermittent channel (S2).

6. To excavate for the removal of a culvert and reconstruction of the open channel conveying an unnamed tributary to the Neshaminy Creek at station 10+28 (Langhorne, PA Quadrangle N: 1.5 inches, W: 3.1 inches). Temporary impact of 239 linear feet of perennial channel (S3).

7. To remove trash and debris from the open channel conveying an unnamed tributary to the Neshaminy Creek at station 12+73 (Langhorne, PA Quadrangle N: 1.6 inches, W: 3.2 inches). Temporary impact of 164 linear feet of perennial channel (S3).

Permanent impact of 0.058 acres and temporary impact of 0.012 acres of forested wetland (W6).

11. To place fill for the construction of the roadway approaches for the Richlieu Road Bridge and relocate the

intermittent stream (W6A) that drains to an unnamed tributary to the Neshaminy Creek at station 20+00 (Langhorne, PA Quadrangle N: 0.4 inches, W: 11.1 inches). Temporary impact of 167 linear feet of intermittent stream (W6A).

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapters 77 are as follows:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	35 mg/l	70 mg/l	90 mg/l
Alkalinity exceeding acidity*		greater than 6.0; less than 9.0	
pH*			

*The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or QWBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

PUBLIC WATER SUPPLY (PWS) PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P. S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

HAZARDOUS SITES CLEAN-UP UNDER THE ACT OF OCTOBER 18, 1988

Notice of Proposed Interim Response

Nockamixon TCE Nockamixon Township, Bucks County

The Department of Environmental Protection (Department) under the authority of the Hazardous Sites Cleanup Act (HSCA) (35 P. S. §§ 6020.102—6020.1303) is proposing an interim response at Nockamixon TCE, Nockamixon Township, Bucks County, Pennsylvania.

The Nockamixon TCE HSCA Site is located in Nockamixon Township, Bucks County. The Site is located

along Easton, Tower, Durham Road, Tower Road, Brennan Road, Mountainview Drive, and Park Drive. The site includes approximately 11 private wells impacted with Volatile Organic Compounds above Maximum Contaminant Levels (MCLs). The area of the site consists mostly of rural residential properties with a few small businesses.

The Department was notified by the Bucks County Health Department in spring 2009 that contamination had been found in the groundwater of the site area. Preliminary sampling by the Bucks County Health Department showed levels that peaked at 26.8 parts per billion trichloroethylene (TCE), which is the contaminant of concern. The Department initiated an investigation in 2009 to both confirm the Health Department's results and expanding the sampling efforts in the area. This investigation is still ongoing. The Department has conducted sampling events in October 2009, April, 2010, and November 2010. A total of approximately 30 locations have been sampled by the Department. Princeton Hydro, LLC conducted a study for Lower Delaware River Wild and Scenic Management Committee and the Delaware River Greenway Partnership regarding natural gas exploration and recovery with a report dated December 2009 that also expanded the Department's sampling efforts to Park Drive.

Volatile Organic Compounds have been released in the area with an unknown source. The MCL for TCE is 5 Parts per billion (ppb). Most of the levels in residential wells for this contaminant are between 5 and 25 ppb. The highest concentration was detected at 93.4 ppb. The health threats include ingestion and inhalation. Bottled water is currently being provided to affected residents as a temporary measure.

To address the release and threat of release of hazardous substances at the Site, and corresponding threats to human health and the environment, the Department proposes a response action at the Site under Sections 501(a) of HSCA, 35 P. S. § 6020.501(a). The Department hereby proposes the installation of whole house carbon filtration units on affected private residential water supplies. This proposed alternative complies with Applicable, Relevant and Appropriate Requirements (ARARs) and is feasible and cost-effective. Other possible alternatives include taking no action, the installation of a public waterline and continuing to provide bottled water.

An Administrative Record, which contains more detailed information concerning this interim response action, is available for public inspection. The Administrative Record may be examined from 8:00 am until 4:00 pm at the Department's office at 2 East Main Street, Norristown PA 19401. Those interested in examining the Administrative Record should contact the Megan Harkins at (484) 250-5721 or William Blasberg at (484) 250-5865 to arrange for an appointment. An additional copy of the Administrative Record is available for review at the Nockamixon Township Municipal Building located at 589 Lake Warren Road, Upper Black Eddy. 18972.

Pursuant to Sections 505(b) and 506(d) of HSCA, 35 P. S. §§ 6020.505(b) and 6020.506(d), the Department will conduct a public hearing on May 25, 2011 at 7:00 pm at the Nockamixon Township Municipal Building located at 589 Lake Warren Road, Upper Black Eddy. 18972. Anyone who would like to present formal oral comments regarding this proposed response may do so by registering with the Department before the meeting. Individuals may register by calling the Department's Community Relations Coordinator, Lynda Rebarchak (484) 250-5820.

Any person with a disability who wishes to attend the public hearing and will require an auxiliary aid, service or other accommodation to participate in the proceedings should contact Lynda Rebarchak at the telephone number listed above or through the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD) to discuss how the Department may accommodate their needs. The public may also submit written comments regarding the Department's Interim Response action during the period of public comment. In accordance with Section 506(c) of HSCA, 35 P. S. § 6020.506(c), the Department has established a period for public comment that is now open until close of business July 14, 2011. Written comments should be addressed to Megan Harkins, Project Officer, Pennsylvania Department of Environmental Protection, 2 East Main Street, Norristown, PA 19401. Anyone with questions regarding this notice should contact Megan Harkins at (484) 250-5721.

**Notice of Interim Response
Five Locks Access Area Site
Perry Township, Berks County**

The Department of Environmental Protection (Department), under the authority of the Hazardous Sites Cleanup Act (HSCA), (35 P. S. §§ 6020.101—6020.1305) is proposing an interim response at the Five Locks Access Area Site (Site).

The Site is located approximately midway between Hamburg and Shoemakersville, along Five Locks Road and Water Street, at the intersection with Fisher Dam Road. The proposed response for the Five Locks Access Area Site (Site) will consist of an interim response to protect public health, safety or welfare or the environment from the release of lead contaminated battery casings, soil and sediments. Lead-contaminated waste, soil and sediment will be removed and properly disposed off site. The response will minimally alter existing land elevations and thus should not increase the likelihood of flooding. The Department is providing this notice under sections 505(b) and 506(b) of HSCA (35 P. S. §§ 6020.505(b) and 6020.506(b)), and the publication of this notice in the *Pennsylvania Bulletin* starts the administrative record period under HSCA. The Administrative Record which contains information about this site and which supports the Department's decision to perform this action at the site is available for public review and comment. The Administrative Record can be examined Monday through Friday from 8 a.m. to 3:30 p.m. at the Department's Southcentral Regional Office located at 909 Elmerton Avenue, Harrisburg, PA 17110, by contacting David Hrobuchak at 717-705-4843. The Administrative Record can also be reviewed at the Perry Township Municipal Building, 680 Moselem Springs Road, Shoemakersville PA 19555-9415, telephone 610-562-2133 from 8 a.m. to 4 p.m., Monday through Friday.

The Administrative Record will be open for comment from the date of publication of this notice in the *Pennsylvania Bulletin* on April 16, 2011, and will remain open for 90 days. register before 3 p.m., May 20, 2011, by calling Mr. Hrobuchak at the previously listed number. There will be an informational presentation of the Department's planned activities at this site prior to the public hearing.

Persons with a disability, who wish to attend the hearing and require an auxiliary aid, service or other accommodation to participate in the proceedings, should call Mr. Hrobuchak at the previously listed number or through the Pennsylvania AT&T Relay Service at 1-800-654-5984 (TDD) to discuss how the Department may accommodate their needs.

**LAND RECYCLING AND
ENVIRONMENTAL REMEDIATION**

UNDER ACT 2, 1995

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the

appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

The following Erosion and Sediment Control permits have been issued.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Request for Comments on the Proposed Total Maximum Daily Loads (TMDLs) Developed for the Boles Run Watershed in Erie and Crawford Counties Pennsylvania

The Department of Environmental Protection will accept comments on the proposed TMDLs developed for the Boles Run Watershed in Erie and Crawford Counties, PA. These TMDLs were established in accordance with the requirements of Section 303(d) of the Clean Water Act. The Pennsylvania Integrated Water Quality Monitoring and Assessment Report included impaired stream segments in this watershed. The listings of these waterbodies were due to use impairments caused by excessive siltation from agriculture and road run off.

There currently are no state or federal instream numerical water quality criteria for siltation. Therefore, the Department utilized a reference watershed approach to implement the applicable narrative criteria. These proposed TMDLs set allowable loadings of sediment in the Boles Run Watershed. The sediment loadings were allocated among cropland, hay/pasture land, unpaved roads and stream bank categories present in the watershed. Data used in establishing these TMDLs was generated using a water quality analysis model (AVGWLF) designed by the Pennsylvania State University.

The following table shows the estimated current sediment loadings for the watershed. Overall load reductions necessary in order to meet the TMDLs are also identified.

Summary of TMDL Based Load Reductions in the Boles Run Watershed

Pollutant	Existing Load (lbs./yr.)	Existing Load (lbs./day)	TMDL (lbs./yr.)	TMDL (lbs./day)	Percent Reduction
Sediment	1,247,780	3,419	546,385	1,497	56%

The data and all supporting documentation used to develop the proposed TMDLs are available from the Department. The proposed TMDLs and information on the TMDL program can be viewed on the Department's website (www.dep.state.pa.us/watermanagement_apps/tmdl/). To request a copy of any of the proposed TMDLs contact:

Gary M. Gocek, Water Program Specialist
 Watershed Protection Division, Central Office
 Pennsylvania Department of Environmental Protection
 Rachel Carson State Office Building
 Harrisburg, PA 17105
 Phone: 717-772-1674, e-mail: ggocek@state.pa.us

The Department will consider all comments in developing the final TMDLs, which will be submitted to EPA for approval. Written comments will be accepted at the above address and must be postmarked by 45 days after publication in the *PA Bulletin*. A public meeting to discuss the technical merits of the TMDLs will be held upon request.

Therefore, the Department utilized a reference watershed approach to implement the applicable narrative criteria. These proposed TMDLs set allowable loadings of sediment in the UNTs French Creek Run Watershed. The sediment loadings were allocated among cropland, hay/pasture land and streambank categories present in the watershed. Data used in establishing these TMDLs was generated using a water quality analysis model (AVGWLF) designed by the Pennsylvania State University.

The following table shows the estimated current sediment loadings for the watershed. Overall load reductions necessary in order to meet the TMDLs are also identified.

The data and all supporting documentation used to develop the proposed TMDLs are available from the Department. The proposed TMDLs and information on the TMDL program can be viewed on the Department's website (www.dep.state.pa.us/watermanagement_apps/tmdl/). To request a copy of any of the proposed TMDLs contact:

Gary M. Gocek, Water Program Specialist
Watershed Protection Division, Central Office
Pennsylvania Department of Environmental Protection
Rachel Carson State Office Building
Harrisburg, PA 17105
Phone: 717-772-1674, e-mail: ggocek@state.pa.us

The Department will consider all comments in developing the final TMDLs, which will be submitted to EPA for approval. Written comments will be accepted at the above address and must be postmarked by 45 days after publication in the PA Bulletin. A public meeting to discuss the technical merits of the TMDLs will be held upon request.

Chesapeake Bay Watershed Implementation Plans Meeting

The Department of Environmental Protection (Department) provides notice of the upcoming meeting of the Chesapeake Bay Watershed Implementation Plan (WIP) Management Team. This meeting will be related to the development of the Commonwealth's Phase 2 WIP.

The Commonwealth's Phase 1 WIP outlined the Commonwealth's plan to address nutrient and sediment loadings that drain to the Chesapeake Bay, and was prepared following the United States Environmental Protection Agency's (EPA) November 4, 2009, guidance that outlined their expectations for WIPs and was revised based on public comments, workgroup input and comments received from the EPA. This Commonwealth's Phase 1 WIP was prepared to address the EPA's expectations for the Chesapeake Bay Total Maximum Daily Load, published on December 29, 2010.

The meeting is on April 21, 2011, starting at 12:30 p.m. in the Susquehanna Room, Southcentral Regional Office, 909 Elmerton Avenue, Harrisburg, PA 17110.

For further information, contact Karen Price, Water Planning Office, P. O. Box 2063, Harrisburg, PA 17105-2063, (717) 772-4785, kprice@state.pa.us or visit the Department's web site at www.depweb.state.pa.us (DEP Keywords: "Chesapeake Bay").

Clean Air Interstate Rule; Final 2015 Annual and Ozone Season CAIR Nitrogen Oxides Allowance Allocations and Redistribution of 2010-2014 Allowances for Certain Facilities

In accordance with 25 Pa. Code §§ 145.211(d) and 145.221(d) (relating to timing requirements for CAIR NOx allowance allocations; and timing requirements for CAIR NOx Ozone Season allowance allocations), the Department of Environmental Protection (Department) is providing notice of the finalization of the 2015 annual and ozone season Clean Air Interstate Rule (CAIR) nitrogen oxides (NOx) allowance allocations. A 15-day public comment period on the proposed allocations was published at 41 Pa.B. 1389 (March 12, 2011). No comments were received. However, there were some changes made to the allocations.

The Department discovered one facility report of gross megawatts was not input correctly. Therefore, an adjustment was made to their gross loading which resulted in their two units receiving more CAIR NOx allowances and CAIR NOx Ozone Season allowances. Consequently, some other facilities experienced a slight drop in allowances from the number published as proposed.

The Commonwealth's NOx budget for the annual CAIR program contains 82,514 NOx allowances; 81,441 NOx allowances are allocated. The remaining 1,073 (1.3% of the annual CAIR program budget) NOx allowances are set aside for future allocation in accordance with 25 Pa. Code § 145.212(f)(2) (relating to CAIR NOx allowance allocations). The Commonwealth's NOx budget for the ozone season CAIR program contains 35,143 NOx allowances, all of which are allocated.

The Department is also finalizing the redistribution of 473 allowances as follows: 268 annual NOx allowances and 205 ozone season NOx allocations. These allowances were originally allocated to FPL Energy for 2010 through 2014, for FPL's MH50 unit, but the United States Environmental Protection Agency (EPA) has since determined that MH50 is not subject to CAIR. The Department is finalizing the NOx allowances returned to the Department to the existing CAIR units for 2010 through 2014.

The EPA returned 486 allowances to the Department for the FPL MH50 unit. The Department reduced this amount by 13 to remedy an over-allocation of the State budget of 4 CAIR NOx ozone season allowances for 2012 and 9 CAIR NOx ozone season allowances for 2013.

For each CAIR unit and qualifying resource receiving an NOx allocation, Tables 1 and 2 list the following: the Facility Name, ORIS Code, the Unit ID for each CAIR unit, either the gross load, steam load, useful thermal energy or total heat energy of steam depending on type of unit, county, converted heat input from the base year and 2015 allowance allocation.

Table 3 lists each CAIR unit and qualifying resource that is being allocated NOx allowances from those returned to the Department due to the change in the FPL MH50 unit's CAIR status.

Action at the Federal or State level could affect these allocations. Annual and Ozone Season CAIR NOx allowances do not constitute property rights.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704

(relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Questions concerning this notice should be directed to Randy Bordner at (717) 772-3921. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

[Pa.B. Doc. No. 11-661. Filed for public inspection April 9, 2011, 9:00 a.m.]

Interstate Pollution Transport Reduction; Final 2011 Ozone Season Nitrogen Oxide Emission Limits for Nonelectric Generating Units

The Department of Environmental Protection (Department) is providing notice of the final Nonelectric Generating Unit (non-EGU) 2011 Ozone Season Nitrogen Oxide (NOx) emission limitations established in accordance with 25 Pa. Code § 145.8(d) (relating to transition to CAIR NOx trading programs).

Notice of a 15-day public comment period on the proposed limits was published at 41 Pa.B. 1409 (March 12, 2011). The public comment period offered the public an opportunity to review the information and data as a

way to ensure the information was correct. No comments were received.

In this notice, the NOx emissions cap provides 181 tons of NOx emissions for non-EGUs and the other units that need to address their emissions through accounting adjustments, including units that previously participated in the NOx Budget Trading Program; emissions from these units were below the 25-ton exemption threshold. Adjustments were also made for the permanent retirement of NOx allowances due to generation of emission reduction credits. The Department will also use a portion of the 181 tons of the budgeted NOx emissions, if necessary, to address mistakes or miscalculations. This year, the Department is proposing to use 121 tons of the 181 tons of NOx for account adjustments, leaving 60 tons available

for any additional adjustments at the end of the control period.

The Department made accounting adjustments for the following facilities:

Retired Units: Naval Surface Warfare Division Unit 98; Shenango Units: Nos. 6 and 9 (the generation of emission offsets for small non-NOx Budget Trading Program units resulted in a permanent NOx accounting adjustment of 45 tons).

Exempt Units: Each of the following units has a 25-ton NOx permit limit: Armagh Compressor Station (Unit 31301); Entriaken Compressor Station (Unit 31601); and the Naval Surface Warfare Division (Unit 100). The Naval Surface Warfare Division (Unit 99) has a 1-ton NOx permit limit. All of these 25-ton exempt status units account for a total adjustment of 76 tons of NOx emissions.

Units subject to the requirements in 25 Pa. Code § 145.8 are required to meet the monitoring and reporting requirements of the United States Environmental Protection Agency's Clean Air Interstate Rule, found in 40 CFR Part 96, Subpart HHHH (relating to monitoring and reporting) and maintain general accounts and account representatives under 40 CFR Part 96, Subparts BBBB and FFFF (relating to CAIR designated representative for CAIR NOx ozone season sources; and CAIR NOx ozone season allowance tracking system). The "Non-EGU 2011 Ozone Season NOx Limits" table lists the following: the Facility Name, ORIS Code, the Unit ID for each non-EGU unit, the operating year, the NOx rate, NOx mass in tons, the heat input for the 2010 Ozone Season, the calculated 2011 rate and the 2011 Ozone Season Limit.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35

P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service at (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Questions concerning this notice should be directed to Randy Bordner at (717) 772-3921. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

MICHAEL L. KRANCER,
Acting Secretary

DEPARTMENT OF HEALTH

[Correction]

Prehospital Practitioner Scope of Practice

An error occurred in the notice which appeared at 41 Pa.B. 1976 (April 9, 2011). In the explanatory text preceding the chart, the full text of item 1 was not published. The correct version of the notice is as follows:

Under 28 Pa. Code §§ 1003.21(c)(13), 1003.22(e)(3), 1003.23(f), 1003.24(e) and 1003.25(b) and (c), the Department of Health (Department) is publishing the scope of practice for ambulance attendants, first responders, emergency medical technicians (EMTs), EMT—paramedics (EMT-Ps) and prehospital registered nurses (PHRN) under 35 Pa.C.S. §§ 8101—8157 (relating to Emergency Medical Services System Act).

Skills identified may be performed by a prehospital practitioner at the practitioner's level of certification/recognition only if the practitioner has successfully completed training (cognitive, affective and psychomotor) on the specified skill, which includes training to perform the skill on adults, children and infants, as appropriate.

A PHRN with medical command authorization may perform, in addition to those services within an EMT-Ps scope of practice, other services authorized by The Professional Nursing Law (63 P. S. §§ 211—225.5), when authorized by a medical command physician through either online medical command or standing medical treatment protocols. To administer drugs in addition to those permitted by applicable medical treatment protocols, a PHRN must also have received approval to do so by the advanced life support service medical director of the advanced life support ambulance service under which the PHRN is functioning.

This list supercedes the list of skills in the scope of practice of prehospital personnel published at 38 Pa.B. 6565 (November 29, 2008). Two changes have been made. The changes are as follows:

Removing MAST as an approved treatment.

Adding Transport Ventilators for use by ALS providers and Carbon Monoxide Co-oximetry monitoring.

The Department of Public Welfare (Department) announces the implementation in this Commonwealth of the 2011 Federal Poverty Income Guidelines (FPIGs) which

were issued by the Department of Health and Human Services and published at 76 FR 3637 (January 20, 2011).

The FPIGs are the basis for the income eligibility limits for several categories of Medicaid whose regulations are published in 55 Pa. Code (relating to public welfare) and administered by the Department. These categories include Healthy Beginnings for Pregnant Women and Qualified Children (55 Pa. Code Chapter 140, Subchapter A (relating to the categorically needy healthy beginnings program for pregnant women and qualified children)),

Healthy Horizons for the Elderly and Disabled (55 Pa. Code Chapter 140, Subchapter B (relating to eligibility provisions for the healthy horizons program for the elderly/disabled)) and Extended Medical Coverage under the Categorically Needy TANF-Related Categories (55 Pa. Code Chapter 140, Subchapter C (relating to eligibility provisions for EMC under the categorically needy program for TANF-related categories)).

The percentages for the Medicaid categories of Healthy Beginnings and Healthy Horizons are set forth as follows:

These percentages apply as follows:

- b. 133% for children 1 through 5 years of age.
- c. 100% for children 6 years of age and older.

Healthy Horizons:

- a. 100% for persons eligible for the categorically needy, Medicare Buy-In and Medicare cost-sharing benefits.
- b. 120% for persons eligible for the Specified Low-Income Medicare Beneficiaries.
