READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

The applications concern, but are not limited to, discharges regarding industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFO). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or Amendment
Section III	WQM	Industrial, Sewage or Animal Waste; Discharge into Groundwater
Section IV	NPDES	MS4 Individual Permit
Section V	NPDES	MS4 Permit Waiver
Section VI	NPDES	Individual Permit Stormwater Construction
Section VII	NPDES	NOI for Coverage under NPDES General Permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 Individual Permits and Individual Stormwater Construction Permits in Sections IV and VI, the Department, based upon preliminary reviews, has made tentative determinations of proposed effluent limitations and other terms and conditions for the permit applications. In accordance with 25 Pa. Code § 92a.32(d), the proposed discharge of stormwater associated with construction activities will be managed in accordance with the requirements of 25 Pa. Code Chapter 102. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the United States Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on NPDES applications are invited to submit statements to the contact office noted before the application within 30 days from the date of this public notice. Persons wishing to comment on WQM permit applications are invited to submit statements to the office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for public hearings on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of these applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office listed before the applications. Persons interested in reviewing the application files should contact the appropriate regional office to schedule appointments.

Persons wishing to receive a copy of a proposed Plan Approval or Operating Permit shall indicate interests to

the Department regional office within 30 days of the date of this notice and shall file protests or comments on a proposed Plan Approval or Operating Permit within 30 days of the Department providing a copy of the proposed documents to persons or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that hearings be held concerning a proposed Plan Approval or Operating Permit. A comment or protest filed with the Department regional office shall include a concise statement of the objections to the issuance of the Plan Approval or Operating Permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P. S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

46-0282: Titan International, Inc. (700 Queen Street, Pottstown, PA 19464) for installation of two (2) batch reactor tanks, two (2) natural gas cooking kettles, and related metal recovery equipment, including fume scrubbers, at a new facility located in Pottstown Borough, **Montgomery County.** The Hydrochloric (HCl) Fume Scrubber reduces Hazardous Air Pollutant (HAP) emissions to less than 0.034 ton of HCl per year. The Ammonia Fume Scrubber reduces ammonia emissions to less than 0.075 ton per year. Facility-wide potential to emit for all criteria pollutants is below major facility thresholds for the Philadelphia Consolidated Metropolitan Statistical Area. The plant is therefore a Natural Minor Facility. The plan approval will include monitoring, testing, recordkeeping and reporting requirements designed to keep the facility operating within all applicable air quality requirements.

09-0174E: Liberty Coating Co., LLC (21 South Steel Road, Morrisville, PA 19067) for installation of an interior abrasive blasting operation with a baghouse as a control device in **Montgomery County.** The company coats steel pipes used by utility companies. The pipes are blasted with grit. The pollutant of concern is Particulate Matter (PM). This is a synthetic minor facility and the emissions allowed in the proposed Plan Approval keeps the facility a synthetic minor. The Plan Approval and Operating permit will include monitoring, record keeping & reporting requirements designed to address all applicable air quality requirements.

Plan Approval No. 36-5001JD5 incorporates the relevant provisions from 40 CFR 63, Subpart DDDDD (National Emission Standards for Hazardous Air Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters). The Plan Approval will contain testing, monitoring, recordkeeping and work practice standards designed to keep the facility operating within all applicable air quality requirements. No emission increases are expected as a result of this plan approval. The implementation of Subpart DDDDD is intended to decrease emissions.

Copies of the application, DEP's analysis and other documents used in the evaluation of the application are available for public review during normal business hours at Air Quality Program, 909 Elmerton Avenue, Harrisburg, PA 17110.

A person may oppose the proposed plan approval, or may provide the Department with additional information to consider in its review, by filing a written protest with the Department at the address listed above. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed permit by the permit number listed above and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A 30-day comment period, from the date of publication of this notice in the *Pennsylvania Bulletin*, will exist for the submission of comments or protests, or for requests for a public hearing. 08-00002M: DuPont de Nemours and Co. (192 Patterson Blvd, Towanda, PA 18848) for a plan approval to establish performance or emission standards for the boilers and process heater at their facility in North Towanda Township, **Bradford County**.

The Department has incorporated the major source boiler MACT requirements as codified in 40 CFR Part 63 Subpart DDDDD applicable to the boilers and process heater at their facility located in North Towanda Township, Bradford County in the proposed plan approval. All other air quality regulatory requirements remain in effect for the boilers under the facility's operating permit. There will be no increase in emissions of air contaminants associated with this plan approval.

Based on the above, the Department intends to issue a plan approval for the incorporation of boiler MACT requirements for the facility's boilers and process heater listed in the application. The facility will continue to be a major (Title V) facility. Additionally, if the Department determines that the proposed sources are operating in compliance with all of the plan approval conditions, the conditions established in the plan approval will be incorporated into a Title V Operating Permit by means of an administrative amendment pursuant to 25 Pa. Code § 127.450 and pursuant to the operating permit requirements of 25 Pa. Code Subchapter F. The following is a summary of the conditions that the Department included in the proposed plan approval to ensure compliance with the applicable air quality regulatory requirements:

1. The permittee shall not fire #6 fuel oil in Source IDs 031 through 034 more than 48 hours in each boiler for periodic testing, maintenance, operator training, during periods of gas curtailment or gas supply interruptions of any duration in each calendar year.

2. No later than 180 days after the compliance date of January 31, 2016, the permittee shall demonstrate compliance for Sources 031 through 035 by completing an initial tune-up by following the procedures described in 40 CFR Section 63.7540 and a one-time energy assessment as specified in Table 3 to 40 CFR Part 63 Subpart DDDDD. Subsequent tune-ups shall be performed every five (5) years, no more than 61 months after the previous tune-up.

3. At all times, the permittee shall operate and maintain Sources 031 through 035 and any associated air pollution control and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions.

4. By the compliance date of January 31, 2016, the permittee shall demonstrate compliance with the emission limitations, fuel specifications, and work practice standards established for Sources 031 through 035 in 40 CFR Part 63 Subpart DDDDD as specified in 40 CFR Section 63.7530. After the compliance date, the permittee shall demonstrate continuous compliance via the methods specified in 40 CFR Section 63.7540.

5. The permittee shall submit a complete plan no later than 12 months prior to the compliance date of 40 CFR Part 63 Subpart DDDDD in order to satisfy the Department of their intent to comply with the provisions of Subpart DDDDD.

6. The permittee shall keep records of the number of hours that Source IDs 031 through 034 are fired on #6 fuel oil on a monthly basis. All records generated pursuant to this condition shall be retained for a minimum of five (5) years and shall be made to the Department upon request.

7. The permittee shall submit the required notifications specified in 40 CFR Section 63.7545 pertaining to Sources 031 through 035.

8. The permittee shall submit all required reports specified in 40 CFR Section 63.7550 pertaining to Sources 031 through 035.

Any person(s) wishing to provide the Department with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Muhammad Zaman, Environmental Program Manager, Pennsylvania Department of Environmental Protection, Air Quality Program, 208 West Third St., Suite 101, Williamsport, Pa. 17701. A 30-day comment period from the date of this publication will exist for the submission of comments. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed permit (specify Permit No. 08-00002M) and concise statements regarding the relevancy of the information or objections to issuance of the permit.

All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department of Environmental Protection determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Muhammad Q. Zaman, Environmental Program Manager, Department of Environmental Protection, Air Quality Program, Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701, 570 327 3648.

60-00017A: New Enterprise Stone & Lime Co., Inc.—d/b/a Eastern Industries, Inc. (4401 Camp Meeting Road, Center Valley, PA 18034) submitted an application for a plan approval to modify a drum mix asphalt concrete plant to fire on natural gas and to construct a 2.1 million Btu per hour, natural gas/#2 fuel oil-fired hot oil heater at their facility in Buffalo Township, **Union County**. The respective facility is a synthetic minor facility for which a state only operating permit has been issued.

The Department's review of the information submitted by New Enterprise Stone & Lime Co., Inc. indicates that modification of the drum mix asphalt concrete plant and construction of the hot oil heater will meet all applicable air quality regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirements of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department intends to approve the application and issue plan approval for modification of

the drum mix asphalt concrete plant and construction of the hot oil heater. Additionally, if the Department determines the crematorium is operating in compliance with all plan approval conditions, the conditions established in the plan approval will be incorporated into a state only operating permit.

The emission of air contaminants from the drum mix asphalt concrete plant will not exceed the following limits in any 12 consecutive month period: NO_x-32.5 tons; CO-79.5 tons; VOCs-25.5 tons; SO_x-74.1 tons; PM₁₀-5.03 tons.

In addition to the emission limitations, the following is a summary of the types of conditions the Department intends place in the plan approval to ensure compliance with all applicable regulatory requirements:

1. The hot oil heater shall be fired only on natural gas or #2 fuel oil, to which no recycled or reprocessed oil, waste oil or other waste materials have been added. In addition, the sulfur content of the #2 fuel oil shall not exceed 0.3% by weight.

2. The nitrogen oxides (NO_x, expressed as NO₂) emissions from the drum mix asphalt concrete plant shall not exceed 12.0 pounds per hour when natural gas is being fired.

3. The carbon monoxide emissions from the drum mix asphalt concrete plant shall not exceed 41.0 pounds per hour when natural gas is being fired.

4. The volatile organic compound emissions (expressed as methane) from the drum mix asphalt concrete plant shall not exceed 16.3 pounds per hour when natural gas is being fired.

5. The volatile hazardous air pollutant and formaldehyde emissions from the drum mix asphalt concrete plant shall not exceed 2.65 pounds and 1.55 pounds per hour, respectively, when natural gas is being fired.

6. All conditions contained in State Only Operating Permit 60-00017 remain in effect unless superseded or amended by conditions contained in this plan approval. If there is a conflict between a condition or requirement contained in this plan approval and a condition or requirement contained in State Only Operating Permit 60-00017, the permittee shall comply with the condition or requirement contained in this plan approval rather than the conflicting condition or requirement contained in State Only Operating Permit 60-00017.

All pertinent documents used in the evaluation of the application are available for public review during normal business hours at the Department's Northcentral Regional office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review must be made by calling 570-327-0550.

Any person(s) wishing to provide the Department of Environmental Protection with additional information, which they believe should be considered prior to the issuance of this plan approval, may submit the information to the Department of Environmental Protection at the address shown in the preceding paragraph. A 30-day comment period from the date of this publication will exist for the submission of comments. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval (specify Plan Approval No. 60-00017A) and concise statements regarding the relevancy of the information or objections to issuance of the plan approval.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the information received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department of Environmental Protection determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Muhammad Q. Zaman, Environmental Program Manager, Department of Environmental Protection, Air Quality Program, Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701, 570-327-3648.

10-360A: Thompson-Miller Funeral Home, Inc. (300 East Jefferson Street, Butler, PA 16001) to issue a plan approval for authorization to continue operation of two (2) existing crematories (one human and one animal) at their existing facility in the City of Butler, **Butler County**. Public notice is required for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

The facility consists of one human and one pet crematory each authorized May 29th, 2009 under GP14-10-360. This plan approval application was submitted per the Department's instruction that crematories which open or plan to open their primary chamber's door during the cremation cycle could no longer use or obtain the GP-14 for authorization. Those crematories must be authorized by a plan approval or elect to no longer open the door during the cremation cycle in order to continue operating under GP-14 authorization. The applicant has elected to apply for a plan approval rather than prohibit the opening of their door which they feel is necessary for efficient and complete cremation cycles. The crematories are detailed below

- One (1) Natural Gas Fired Animal Crematory, Matthews Cremation Division, IE43-PPJr Power Pack Jr, rated 75 lb/hr
 - 0.7 mmBtu/hr Primary Chamber Burner, 1.22 mmBtu/hr Secondary Chamber Burner
 - gas residence duration greater than 1 second @ 1800 degrees Fahrenheit
- One (1) Natural Gas Fired Human Crematory, Matthews Cremation Division, IE43-PPII Power Pack II, rated 150 lb/hr
 - 0.7 mmBtu/hr Primary Chamber Burner, 1.22 mmBtu/hr Secondary Chamber Burner
 - gas residence duration greater than 1 second @ 1800 degrees Fahrenheit

The crematory has been reviewed to evaluate its incorporation of BAT. The BAT contained in the GP-14 is still considered to be current BAT. This unit meets or exceeds each of the technologies or specifications identified in the GP-14; therefore, the use of this unit is considered to be meeting BAT for the construction of a crematory.

Emissions from both crematories combined are estimated to be less than: 1.5 tons per year (tpy) of CO, 1.0 tpy of SO_x, 1.0 tpy of NO_x, 1.0 tpy of particulate matter, 1.0 tpy of VOC, and 1.0 tpy of HAP.

The Plan Approval will contain recordkeeping, emission restriction, reporting, and work practice requirements

designed to keep the facility operating within all applicable air quality requirements.

In accordance with 25 Pa. Code § 127.44(e)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP office (Air Quality). Appointments for scheduling a review must be made by calling the DEP (814) 332-6340.

In accordance with 25 Pa. Code § 127.44(e)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments. Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval [10-360A] and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. Written comments or requests for a public hearing should be directed to John Guth, 230 Chestnut St., Meadville, PA 16335; Phone (814) 332-6940.

In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department's Northwest Region.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P. S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

HAZARDOUS SITES CLEAN-UP UNDER THE ACT OF OCTOBER 18, 1988

Notice of Proposed Interim Response

Kwiatkowski Landfill Site Hickory Township, Lawrence County

The Pennsylvania Department of Environmental Protection ("Department"), under the authority of the Hazardous Sites Cleanup Act, 35 P.S. Section 6020.101 *et. seq.* ("HSCA"), has determined that an interim response is necessary at the Kwiatkowski Landfill Site ("site"). The site is located approximately one mile east of the city of New Castle in Hickory Township, Lawrence County, Pennsylvania, on the north side of County Line Road.

The site consists of an approximately 85-acre abandoned mixed waste landfill, currently owned by the estates of brothers, Rudolph and Chester Kwiatkowski. The site lies to the north of County Line Road. An industrial area is located at the main entrance to the site. The main disposal area is located 100 feet west of the industrial area. Part of the site has three waste disposal impoundments, located in the southwest corner of the site, immediately adjacent to County Line Road. The impoundments are accessed from County Line Road *via* an access road. Two of these areas ("sludge lagoon 1 & 2") contain industrial sludge wastes. Each lagoon measures approximately 40 feet by 15 feet by 5 feet deep. A third area ("pottery waste impoundment") previously contained pottery waste which has degraded over time. The pottery waste impoundment measures approximately 90 feet by 40 feet by 1 foot. Collectively, sludge lagoons 1 & 2 and the pottery waste impoundment are identified as Operable Unit 1. Operable Unit 1 is the subject of this response.

In, 1985, 1987 and 1993 the United States Environmental Protection Agency ("USEPA") conducted environmental investigations at the Site that included sampling the wastes and sediments in Operable Unit 1. In 1995, 1996 and 2004, the Department also investigated and sampled surface wastes and surface water at Operable Unit 1 the site.

These investigations revealed elevated levels of chlorinated solvents, and aromatic compounds. Specifically, soils and sediments in Operable Unit 1 contained high concentrations trichloroethylene, xylene, 1,1,2,2-tetrachloroethane, 1,1,2-trichloroethane, 1,2-dichloroethene, 1,2-dichloropropane, benzene, bromodichloromethane, carbon tetrachloride, chloroform, methyl chloride, tetrachloroethene, toluene, vinyl chloride, 2,4-dinitrophenol, bis(2-chloroethyl)ether, hexachlorobenzene, m-nitroaniline, N-nitrosodi-N-propylamine, and pentachlorophenol. Several heavy metals, including lead, arsenic were also detected over the Statewide Health Standards for Residential Direct Contact pursuant to the Pennsylvania Land Recycling and Environmental Remediation Standards Act ("Act 2").

These elements and chemical compounds are "hazardous substances" pursuant to Section 103 of the HSCA, 35 P.S. § 6020.103. The presence of these hazardous substances in Site surface water, sediment, and waste and soil constituted a "release" and "threatened release" of hazardous substances at the Site pursuant to Section 103 of the HSCA, 35 P.S. § 6020.103.

The Department's two main objectives of the interim response action proposed for the site were: 1) to protect the public and environmental receptors from direct contact and inhalation risks with site-related hazardous substances, and 2) to eliminate the ongoing release and threat of release of hazardous substances into the environment from contaminated soil.

The Department considered three alternatives for the interim response: 1) no action, 2) fencing Operable Unit 1, and 3) excavation and removal of wastes contained in Operable Unit 1 and associated contaminated soils for proper off-site disposal.

In light of the above objectives, the Department evaluated each alternative to determine: (1) the extent to which each alternative protects the public health and the environment; (2) the extent to which each alternative is feasible, effective, implementable and permanent; (3) the relative cost of each alternative; and (4) the extent to which each alternative complies with or otherwise addresses the cleanup standards of Act 2, Pennsylvania Solid Waste Management Act, the Pennsylvania Clean Streams Law, and other Applicable or Relevant and Appropriate Requirements ("ARARs"); the extent to which each alternative was feasible, effective, implementable and permanent; and the relative cost effectiveness of each alternative.

Pursuant to Section 505(b) of HSCA, 35 P.S. § 6020.505(b), the Department proposes Alternative 3 as the interim response at the site. Alternative 3 is proposed because it would, in the most cost effective manner, protect the public and environmental receptors from direct contact with site-related hazardous substances and eliminate the ongoing release and threat of release of hazardous substances into the environment.

The response protects the public health and environment; complied with or otherwise addressed all ARARs relating contaminated soil removal and disposal, was feasible, implementable, permanent and effective to the maximum extent practicable; and was cost effective. The proposed action addressed the identified immediate threats to human health and the environment.

The proposed interim response is not a final remedial response pursuant to Section 504 of HSCA, and, therefore, is not required to meet the cleanup standards that apply to final remedial responses. However, the proposed alternative is consistent with any potential future remedial actions and future investigation activities.

This notice is being provided pursuant to Section 506(b) of HSCA. The administrative record, which contains the information that forms the basis and documents the selection of this response, is available for public review and comment. The administrative record is located at the Department's Northwest Regional Office, 230 Chestnut Street, Meadville, PA 16335, and is available for review Monday through Friday from 8:00 a.m. to 4:00 p.m. Please telephone for an appointment at: 814-332-6648.

The administrative record will be open for comment from July 6, 2013 until October 4, 2013. Persons may submit written comments into the record during this time only. MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

Parameter	30-Day Average	Daily Maximum	Instantaneous Maximum
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapter 77 are as follows:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	35 mg/l	70 mg/l	90 mg/l
Alkalinity exceeding acidity* pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based. The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

The following additional requirement applies to this draft permit:

Compliance Schedule

(1) The Department has determined that the water quality based effluent limitations (WQBEL) identified above for outfalls 005, 007, 008, 009, 023, 025, 026, and 027 are necessary to fulfill the present requirements of the Casselman River TMDL.

(2) Whereas the final WQBEL set out above for outfalls 005, 007, 008, 009, 023, 025, 026, and 027 are significantly more stringent than past effluent limits for those outfalls, and whereas the final effluent limits cannot be met without modifications to the existing treatment facilities, the permittee shall comply with the interim effluent limits set forth above during the compliance period and shall comply with the following paragraphs. If a new or revised Casselman River TMDL, when completed and approved by EPA, results in final WQBEL limits that are different than the final limits set forth above, the Department will modify this permit and compliance schedule accordingly. The permittee shall:

a. Within the first year following permit issuance, conduct an evaluation of the existing treatment facilities for Outfalls 005, 007, 008, 009, 023, 025, 026, and 027 and determine what modifications are required for each facility to meet the final effluent limitations set out above. By the end of the first year following permit reissuance, the permittee shall submit a report to the Department evaluating the treatment options and identifying the facility modifications required to meet the final WQBEL set out above.

b. As part of the report described in paragraph (a), the permittee shall also submit a Treatment Plan to the Department for approval including specifications of the facility modifications, proposed schedule for construction, and demonstration that construction will be performed as soon as possible. In addition, the permittee shall submit complete applications for all permits or permit amendments necessary to install and operate the modifications to the Department for review. Following approval of the Treatment Plan and issuance of all necessary permits for the facility modifications, construction of the revised treatment systems shall commence no later than fifteen months after reissuance of this NPDES permit. Construction and start-up of the facility modifications shall be completed, and attainment of the final WQBEL set forth above for Outfalls 005, 007, 008, 009, 023, 025, 026, and 027 shall be achieved, by no later than eighteen months after reissuance (renewal) of this NPDES permit.

(3) The permittee shall implement the treatment facility modifications necessary to achieve the final WQBEL set out above according to the following compliance schedule:

- | | | |
|----|---|---|
| a. | Submit a report describing its evaluation of treatment facility modification which will assure compliance with the final effluent limitations. | As soon as possible, but no later than within 1 year of permit reissuance. |
| b. | Submit a treatment plan and complete applications for all permits necessary for the treatment equipment to the Department for approval. | As soon as possible, but no later than within 1 year of permit reissuance |
| c. | Commence construction of system modifications required to meet the final WQBELS. | As soon as possible, but no later than within 15 months of permit reissuance. |
| d. | Complete treatment plant modifications /additions. Compliance with final limits. | As soon as possible, but no later than within 18 months of permit reissuance. |
| e. | Submit progress reports. Reports shall include updates, attainment, or any progress made toward milestones, summary of results of any supplemental sampling and a discussion of compliance or non-compliance with interim and final requirements. | Every 6 months after permit reissuance until completion of the compliance period. |

(4) a. Pursuant to 40 CFR 122.62, the permittee may make request to the Department for approval of a modification of the time period for completing step (d) of the compliance schedule in the table above (completion of construction and start-up of the treatment facility modifications within eighteen months of NPDES permit reissuance). The permittee's request for approval of a modification must demonstrate that the respective compliance schedule step cannot be completed within the prescribed time period. The permittee shall also provide an alternative time frame for completion of construction and start-up of the treatment technology; the alternative must be based on completing construction as soon as possible. The permittee's economic inability to comply with any of the obligations of this Compliance Schedule shall not be grounds for any extension of time.

b. The permittee shall submit a request for modification of the compliance schedule pursuant to this paragraph in writing to the Department within 10 working days of the date the permittee becomes aware or reasonably should have become aware of the event impeding performance. The written submission shall include all necessary documentation specifying the reasons for the delay, the expected duration of the delay, and the efforts which have been made and are being made by the permittee to mitigate the effects of the event and to minimize the length of the delay. The initial written submission may be supplemented within ten working days of its submission.

c. The Department will decide whether to grant all or part of the extension requested on the basis of all documentation submitted by the permittee and any other information available to the Department and will notify the permittee in writing of its decision. In any subsequent litigation, Rosebud Mining Company shall have the burden of proving that the Department's refusal to grant the requested extension was an abuse of discretion based upon the information then available.

FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also

available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Actions on applications for the following activities filed under the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27), section 302 of the Flood Plain Management Act (32 P. S. § 679.302) and The Clean Streams Law and Notice of Final Action for Certification under section 401 of the FWPCA.

Modification to Chapter 105 Water Obstruction and Encroachment General Permits and 401 Water Quality Certification for Consistency with Revised Chapter 105 Regulations

The Department of Environmental Protection (Department), under the authority of section 7 of the Dam Safety and Encroachments Act (32 P.S. § 693.7) and 25 Pa. Code Chapter 105, Subchapter L (relating to general permits), is modifying all Chapter 105 Water Obstruction and Encroachment General Permits (GP), including:

GP-1 Fish Habitat Enhancement Structures (3150-PM-BWEW0501)

GP-2 Small Docks and Boat Launching Ramps (3150-PM-BWEW0502)

GP-3 Bank Rehabilitation, Bank Protection and Gravel Bar Removal (3150-PM-BWEW0503)

GP-4 Intake and Outfall Structures (3105-PM-BWEW0504)

GP-5 Utility Line Stream Crossings (3150-PM-BWEW0505)

GP-6 Agricultural Crossings and Ramps (3150-PM-BWEW0506)

GP-7 Minor Road Crossings (3150-PM-BWEW0507)

GP-8 Temporary Road Crossings (3150-PM-BWEW0508)

GP-9 Agricultural Activities (3150-PM-BWEW0509)

GP-10 Abandoned Mine Reclamation (3150-PM-BWEW0510)

GP-11 Maintenance, Testing, Repair, Rehabilitation or Replacement of Water Obstructions and Encroachments (3150-PM-BWEW0511)

GP-15 Private Residential Construction in Wetlands (3150-PM-BWEW0515)

The modifications are minor and are meant to provide consistency with recently revised regulations and fees in 25 Pa. Code Chapter 105 (relating to dam safety and waterway management). Formerly these GPs contain language indicating that no fee is required. The modifications are limited to the fee requirement section of each GP and replace references to "no fee" with references to the fee section in 25 Pa. Code Chapter 105.

The Department published the draft GP language for public comment at 43 Pa.B. 1049 (February 16, 2013). No comments were submitted to the Department during the 60-day public comment period, which concluded on April 18, 2013; therefore, the Department made no additional

changes and provides public notice that the modified GPs previously listed are effective upon the date of this publication.

401 Water Quality Certification

The projects covered by the modified GPs may also require a Federal license or permit. Section 401(a) of the Clean Water Act (33 U.S.C.A. § 1341(a)) requires that any applicant for a Federal license or permit to conduct any activity which may result in any discharge into the waters of the United States to provide the Federal licensing or permitting agency a certificate from the state in which the discharge will originate that the discharge will comply with applicable provisions of The Clean Water Act as well as applicable state law related to water quality protection.

The Department, by this notice, certifies that the activities authorized by these GPs comply with the applicable provisions of sections 301—303, 306 and 307 of the Clean Water Act (33 U.S.C.A. §§ 1311—1313, 1316 and 1317). The Department further certifies that these activities comply with applicable State laws related to water quality protection and standards provided that the construction, operation and maintenance comply with the criteria and conditions of the permit.

This certification is further subject to the following conditions:

1. Prior to beginning any activity covered by the GP, the applicant must obtain all other necessary permits or approvals from the Department, including, but not limited to, those required under The Clean Streams Law (35 P. S. §§ 691.1—691.1001), the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27) and the regulation promulgated thereunder including 25 Pa. Code Chapters 91, 92a, 93, 95, 102 and 105.

2. Fill material cannot contain wastes as defined in the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The Department is also providing notice that it is deleting Appendices A—J and O in 25 Pa. Code Chapter 105 contained on pages 105-125 to 105-268. Appendices A—J and O are older versions of General Permits 1-10 and 15. The text of General Permits will remain available on the Department's web site.

Copies of the modified GPs may be obtained by contacting the Department of Environmental Protection, Bureau of Waterways Engineering and Wetlands, Division of Wetlands, Encroachments and Training, P. O. Box 8460, Harrisburg, PA 17105-8460. Persons with a disability may obtain these documents by contacting the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users). Copies of the modified GPs are also available on the Department's web site at www.dep.state.pa.us, Select: Permits, Licensing & Certifications, Select: Program-Specific Permit/Authorization Packages, Select: Water Management, Select: Water Obstruction and Encroachment and Wetlands, Select: General Permits, then navigate to the folder for the GP.

DEPARTMENT OF HEALTH

Approved Prearrest and Evidential Breath Testing Devices

The Department of Health (Department) has statutory authority to approve both prearrest and evidential breath testing devices for use by law enforcement officials to determine the alcohol content of blood by analysis of a person's breath. This notice contains the combined approved lists of prearrest breath testing devices and evidential breath testing devices.

Prearrest breath testing devices

The Department approves prearrest breath testing devices as required under 28 Pa. Code §§ 5.101—5.104 (relating to equipment to determine blood alcohol content under the Vehicle Code and the Fish and Boat Code). Authority to promulgate these regulations is contained in the Vehicle Code, 75 Pa.C.S. § 1547(k) (relating to chemical testing to determine amount of alcohol or controlled substance), the Fish and Boat Code, 30 Pa.C.S. § 5125(k) (relating to chemical testing to determine amount of alcohol or controlled substance), the Game and Wildlife Code, 34 Pa.C.S. § 2502(j) (relating to chemical test to determine amount of alcohol) and section 2102(g) of The Administrative Code of 1929 (71 P. S. § 532(g)).

Prearrest breath testing devices approved under this authority may be used by police officers, waterways patrolmen and officers enforcing the Vehicle Code, the Fish and Boat Code and the Game and Wildlife Code in conducting preliminary determinations of the alcohol content of blood of persons suspected of driving, boating, hunting or furtaking, while under the influence of alcohol. Officers and patrolmen use these devices to assist them in determining whether or not a person should be placed under arrest for violation of 75 Pa.C.S. § 3802 (relating to driving under influence of alcohol or controlled substance), for violation of 30 Pa.C.S. § 5502 (relating to operating watercraft under influence of alcohol or controlled substance), for violation of 34 Pa.C.S. § 2501 (relating to hunting or furtaking prohibited while under influence of alcohol or controlled substance) or for any other criminal offense under the Vehicle Code, the Fish and Boat Code or the Game and Wildlife Code which involves operating a vehicle or boat, hunting or furtaking while under the influence of alcohol.

The National Highway Traffic Safety Administration (NHTSA) of the United States Department of Transportation published model specifications for Screening Devices to Measure Alcohol in Bodily Fluids at 59 FR 39382 (August 2, 1994). These specifications established performance criteria and methods for testing alcohol screening devices to measure alcohol content. The NHTSA established these specifications to support state laws and the United States Department of Transportation's workplace alcohol testing program. The Department has elected to use the NHTSA criteria for approving devices for the

prearrest testing of a person's breath to determine the alcohol content of the person's blood.

The NHTSA published its first Conforming Products List (CPL) for screening devices at 59 FR 61923 (December 2, 1994), with corrections at 59 FR 65128 (December 16, 1994), identifying the devices that meet the NHTSA's Model Specifications for Screening Devices to Measure Alcohol in Bodily Fluids. Thereafter, the NHTSA updated the CPL at 60 FR 42214 (August 15, 1995), 66 FR 22639 (May 4, 2001), 70 FR 54972 (September 19, 2005), with corrections at 70 FR 72502 (December 5, 2005) and 72 FR 4559 (January 31, 2007).

The NHTSA published revised Model Specifications for Screening Devices to Measure Alcohol in Bodily Fluids at 73 FR 16956 (March 31, 2008). These specifications removed from use interpretive screening devices (ISDs) because ISDs did not provide an unambiguous test result. These specifications also removed from use the Breath Alcohol Sample Simulator as it is not necessary for testing breath alcohol screening devices. All other performance criteria and test methods were maintained. The NHTSA published an additional update to the CPL at 74 FR 66398 (December 15, 2009). The current list was published at 77 FR 35745 (June 14, 2012).

The list at 77 FR 35745 added the following nine alcohol screening devices that have been evaluated and found to conform to the Model Specifications for Screening Devices to Measure Alcohol in Bodily Fluids.

(1) AK Solutions USA, LLC, submitted the AlcoMate SafeGuard (Model AL-2500, aka: AlcoScan AL-2500) alcohol screening device. This is a handheld, battery powered device with a semiconductor sensor.

(2) Alcohol Countermeasure Systems Corp., submitted the DRIVESAFE alcohol screening device. This is a handheld, battery powered device with a fuel cell sensor.

(3) KHN Solutions, LLC, submitted two screening devices for testing. Their trade names are: BACTRACK Element and the BACTRACK S75 Pro. Both devices are handheld, battery powered with fuel cell sensors.

(4) PAS Systems International, Inc. submitted the Alcovisor MARS screening device. This is a handheld, battery powered device with a fuel cell sensor.

(5) Q3 Innovations, Inc. submitted the CA2010 screening device. This is a handheld, battery powered device with a semiconductor sensor.

(6) Skyfine, Inc. Ltd. submitted three devices (AT577, AT578 and AT579). All three devices are hand-held, battery-powered, and use fuel cell sensors. The AT578 is also distributed by Express Diagnostics, Int'l, Blue Earth, Minnesota under the trade name of AlcoCheck FC90, so it has been listed twice on the CPL, once under each of its distributors/manufacturers.

All of the previously listed devices meet the NHTSA Model Specifications for Screening Devices to Measure Alcohol in Bodily Fluids.

Evidential breath testing devices

The Department approves evidential breath testing devices under the authority of the Motor Vehicle Code (75 Pa.C.S. § 1547(c)(1)), the Fish and Boat Code (30 Pa.C.S. § 5125(c)(1)) and the Game and Wildlife Code (34 Pa.C.S. § 2502(c)).

Evidential breath testing devices approved under this notice may be used by law enforcement officials to obtain test results which will be admissible in evidence in any summary or criminal proceeding in which the defendant

is charged with a violation of 75 Pa.C.S. § 3802 or any other violation of the Vehicle Code arising out of the same action or 30 Pa.C.S. § 5502 or any other violation of the Fish and Boat Code arising out of the same action or 34 Pa.C.S. § 2501 or any other violation of the Game and Wildlife Code arising out of the same action.

The NHTSA published the Standards for Devices to Measure Breath Alcohol at 38 FR 30459 (November 5, 1973). A Qualified Products List of Evidential Breath Measurement Devices comprised of instruments that met this standard was first issued at 39 FR 41399 (November 21, 1974).

The NHTSA converted this standard to Model Specifications for Evidential Breath Testing Devices (Model Specifications) and published a CPL of instruments that were found to conform to the Model Specifications as Appendix D to that notice at 49 FR 48854 (December 14, 1984). Those instruments are identified in this notice with an asterisk.

The NHTSA published a notice to amend the Model Specifications at 58 FR 48705 (September 17, 1993) and to update the CPL. That notice changed the alcohol concentration levels at which instruments are evaluated for precision and accuracy, from 0.000, 0.050, 0.101 and 0.151 BAC, to 0.000, 0.020, 0.040, 0.080 and 0.160 BAC, respectively. It also included a test for the presence of acetone and an expanded definition of alcohol to include other low molecular weight alcohols, for example methyl or isopropyl. Since that time, the CPL has been annotated to indicate which instruments have been determined to meet the Model Specifications published in 1984 and which have been determined to meet the Model Specifications, as revised and published in 1993. Thereafter, NHTSA has periodically updated the CPL with those breath instruments found to conform to the Model Specifications.

The list of evidential breath testing devices contains updates to the CPL published at 77 FR 35747 (June 14, 2012) for instruments that conform to the Model Specifications for Evidential Breath Alcohol Measurement Devices at 58 FR 48705 (September 17, 1993). The June 14, 2012 Federal Register added nine new instruments that have been evaluated and found to conform to the Model Specifications, as amended on September 17, 1993, for mobile and non-mobile use. In alphabetical order by company, they are:

1) The "SAF^{IR} Evolution" manufactured by Alcohol Countermeasure Systems, Corp. Toronto, Ontario, Canada. This is a hand-held instrument intended for use in stationary or mobile operations. It uses an infrared sensor and powered by internal batteries.

2) The "Intoxilyzer 600" manufactured by CMI, Inc., Owensboro, KY. This is a hand-held instrument intended for use in stationary or mobile operations. It uses a fuel cell sensor and powered by an internal battery. The Intoxilyzer 600 is also distributed as the Alcolmeter 600 by Lion Laboratories outside the United States, so it has been listed twice on the CPL, once under each of its distributors/manufacturers.

3) The "Guth 38" manufactured by Guth Laboratories, Inc., Harrisburg, PA. This is a hand-held instrument intended for use in stationary or mobile operations. It uses a fuel cell sensor and is powered by internal batteries.

4) The "Alco-Sensor V XL" manufactured by Intoximeters, Inc., St. Louis, MO. This is a hand-held

instrument intended for use in stationary or mobile operations. It uses a fuel cell sensor and is powered by internal batteries.

5) The "LifeGuard Pro" manufactured by Lifeloc Technologies, Inc., Wheat Ridge, CO. This is a hand-held instrument intended for use in stationary or mobile operations. It uses a fuel cell sensor and is powered by internal batteries.

6) The "DataMaster DMT with fuel cell option series number (SN) 555555" and the "DataMaster DMT with fuel cell option series number (SN) 100630" manufactured by National Patent Analytical Systems, Inc., Mansfield, OH. These instruments can be used in stationary and mobile operations. These instruments use both infrared and fuel cell sensors. These instruments can be powered by either 110 volts alternate current or 12 volts direct current.

7) The "Alcovisor Jupiter" and the "Alcovisor Mercury" manufactured by PAS International, Fredericksburg, VA. These are hand-held instruments intended for use in stationary or mobile operations. Both instruments use a fuel cell sensor and are powered by internal batteries.

The June 14, 2012 CPL update also removes four instruments no longer supported by the manufacturer and makes one minor change. The following instruments, manufactured by Lifeloc Technologies, Inc., Wheat Ridge, CO, are being removed from the CPL because these instruments were determined to be obsolete:

- 1) PBA 3000B.
- 2) PBA 3000-P.
- 3) PBA 3000 C.
- 4) Alcohol Data Sensor.

These instruments are no longer manufactured, in use or being maintained by the manufacturer.

The CPL update also includes a change of address for Alcohol Countermeasure Systems Corp., from Mississauga, Ontario, Canada to Toronto, Ontario, Canada.

The NHTSA also evaluates equipment to determine if it must be operated at fixed locations (that is, nonmobile equipment) or can be transported to nonfixed operational sites in the field (mobile equipment). Most equipment on the following list is approved for mobile and nonmobile operation. The instruments on the list not marked with an asterisk meet the specifications for use as prearrest or evidentiary breath testing devices. The instruments on the list marked with an asterisk may be used as evidentiary devices for blood alcohol concentrations at or above 0.050%. These instruments may also be used as prearrest breath testing devices if they are approved for mobile operations. However, these instruments may not be used for making arrests under the Vehicle Code, the Fish and Boat Code or the Game and Wildlife Code where blood alcohol concentrations below 0.050% must be determined. Nonmobile devices can only be used as evidentiary testing instruments since they are not portable. Before purchasing breath testing devices, law enforcement officials should consult with the manufacturer of the equipment they intend to purchase to verify that the devices can be used for their intended purposes.

Law enforcement agencies should determine that an approved training program in the use of the equipment is available in accordance with the previously referenced statutes before purchasing any of the devices contained on this list. Law enforcement agencies that plan to utilize a device that does not appear on the following list should

contact the manufacturer of the equipment to verify that it has been evaluated by the NHTSA and found to meet the NHTSA’s performance requirements. If a device is approved by the NHTSA after the date of this publication, the manufacturer of the device will need to forward documentation of the NHTSA acceptability to Dr. James R. Lute at the following address so that the Department has information sufficient to enable it to include the device in the next revision of this notice in the *Pennsylvania Bulletin*.

Some of the devices included in this notice are listed under the name of more than one manufacturer due to the fact that the name of the manufacturer has changed or the right to produce a device has been transferred to a different company. In these instances, the device is listed under the name of every company that was ever associated with the device to allow law enforcement agencies to continue using devices bearing the name of a previous manufacturer.

To facilitate accessibility to information concerning

breath alcohol testing devices which are approved for law enforcement purposes in this Commonwealth, the Department will publish revisions of this list of equipment semiannually as notices in the *Pennsylvania Bulletin*. This practice was implemented in 2009 and will proceed even if an updated conforming products list has not appeared in the *Federal Register* since the Department’s last annual publication of approved breath testing devices.

Questions regarding this list should be directed to Dr. James R. Lute, Assistant Bureau Director, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape, Braille) may contact Dr. Lute at the previously referenced address or phone number. Persons who are speech or hearing impaired may use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

⁴ Manufactured by Sentech Korea Corp.

⁵ These devices utilize replaceable semiconductor detectors. Instead of re-calibrating the device, a new calibrated detector can be installed. The device comes with 4 detectors including the one that was already installed.

⁶ These devices utilize replaceable semiconductor detectors. Instead of re-calibrating the device, a new calibrated detector can be installed. This device comes with 5 detectors including the one that was already installed.

⁷ While these devices are still being sold, they are no longer manufactured or supported.

⁸ The Breath Alcohol \checkmark .02 Detection System consists of a single-use disposable breath tube used in conjunction with an electronic analyzer that determines the test result. The electronic analyzer and the disposable breath tubes are lot specific and manufactured to remain calibrated throughout the shelf-life of the device. This screening device cannot be used after the expiration date.

⁹ While the ALCO-SCREEN 02™ saliva-alcohol screening device manufactured by Chematics, Inc. passed the requirements of the Model Specifications when tested at 40°C (104°F), the manufacturer has indicated that the device cannot exceed storage temperatures of 27°C (80°F). Instructions to this effect are stated on all packaging accompanying the device. Accordingly, the device should not be stored at temperatures above 27°C (80°F). If the device is stored at or below 27°C (80°F) and used at higher temperatures (that is, within a minute), the device meets the Model Specifications and the results persist for 10-15 minutes. If the device is stored at or below 27°C (80°F) and equilibrated at 40°C (104°F) for an hour prior to sample application, the device fails to meet the Model Specifications. Storage at temperatures above 27°C (80°F), for even brief periods of time, may result in false negative readings.

¹⁰ While this device passed all of the requirements of the Model Specifications, readings should be taken only after the time specified by the manufacturer. For valid readings, the user should follow the manufacturer's instructions. Readings should be taken 1 minute after a sample is introduced at or above 30°C (86°F); readings should be taken after 2 minutes at 18°C—29°C (64.4°F—84.2°F); and readings should be taken after 5 minutes when testing at temperatures at or below 17°C (62.6°F). If the reading is taken before 5 minutes has elapsed under the cold conditions, the user is likely to obtain a reading that underestimates the actual saliva-alcohol level.

[Pa.B. Doc. No. 13-1204. Filed for public inspection July 5, 2013, 9:00 a.m.]

Laboratories Approved to Determine Analyses of Blood or Serum or Both for Controlled Substances under The Clinical Laboratory Act, the Vehicle Code, the Fish and Boat Code and the Game and Wildlife Code

The following laboratories are licensed by the Department of Health (Department) under The Clinical Laboratory Act (35 P. S. §§ 2151—2165) or section 353 of the Federal Clinical Laboratories Improvement Amendments of 1988 (42 U.S.C.A. § 263a), or both, and are currently approved by the Department under 28 Pa. Code § 5.50 (relating to approval to provide special analytical services) to perform analyses of blood and/or serum for the determination of controlled substances. This approval is based on demonstrated proficiency in periodic tests conducted by the Department's Bureau of Laboratories. These laboratories are also approved and designated for purposes of the Vehicle Code, 75 Pa.C.S. §§ 1547 and 3755 (relating to chemical testing to determine amount of alcohol or controlled substance; and reports by emergency room personnel), the Fish and Boat Code, 30 Pa.C.S. § 5125 (relating to chemical testing to determine amount of alcohol or controlled substance) and the Game and Wildlife Code, 34 Pa.C.S. § 2502 (relating to chemical test to determine amount of alcohol), as qualified to perform the types of services which will reflect the presence of controlled substances or their biotransformation products in blood and/or serum.

Depending upon their capability and performance in proficiency surveys, laboratories are approved to perform screening and/or confirmatory analyses on blood and/or serum. Laboratories approved to perform screening analyses are designated on the approval list by an "S" followed by the letters "B" for blood and/or "Se" for serum. Laboratories approved to screen both blood and serum would therefore have "SBSe" listed after their laboratory name. Laboratories approved to offer confirmatory analyses are designated on the approval list by a "C" followed by the letters "B" for blood and/or "Se" for serum. Laboratories approved to perform confirmatory analyses on both serum and blood would therefore have "CBSe" listed after their laboratory name. Screening analyses provide a presumptive indication that a controlled substance is present. Confirmatory testing is used to substantiate screening results.

Persons seeking forensic blood and/or serum analysis services from any of the listed laboratories should determine that the laboratory employs techniques and procedures acceptable for medicolegal purposes. They should also determine that the director of the facility is agreeable to performing analyses for forensic purposes. Persons seeking the analyses are responsible for specifying the extent to which the presence of a controlled substance is to be verified. That specification should be predicated upon the purpose for which the analysis is being sought.

The Vehicle Code contains a provision in 75 Pa.C.S. § 1547(c)(3)(ii) that permits test results on blood or urine for alcohol or controlled substances to be introduced into evidence at legal proceedings in this Commonwealth if the laboratory is located in another state and is not licensed and approved by the Department to provide these services. This section states that the test results may be admissible into evidence at summary or criminal proceedings in which the defendant is charged with a violation of 75 Pa.C.S. § 3802 (relating to driving under influence of alcohol or controlled substance) if the laboratory that performed the test is licensed by the state in

which the facility is located and licensed under the Clinical Laboratory Improvement Amendments of 1988 (Pub. L. No. 100-578, 102 Stat. 2903). A similar provision appears in the Fish and Boat Code at 30 Pa.C.S. § 5125(c)(3)(ii).

The name or location of a laboratory is sometimes changed but the personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name or location change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test, the clinical laboratory permit number of the facility at the time the list was prepared is included in the list of approved laboratories above the name of the laboratory.

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsylvania Bulletin*. Questions regarding this list should be directed to Dr. James R. Lute, Assistant Bureau Director, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape, Braille) should contact Dr. Lute at the previously referenced address or phone number. Persons who are speech or hearing impaired may use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

[Pa.B. Doc. No. 13-1205. Filed for public inspection July 5, 2013, 9:00 a.m.]

Laboratories Approved to Determine Blood Alcohol Content under The Clinical Laboratory Act, the Vehicle Code, the Fish and Boat Code and the Game and Wildlife Code

The following laboratories are licensed by the Department of Health (Department) under The Clinical Laboratory Act (Act) (35 P. S. §§ 2151—2165) and are currently approved by the Department under 28 Pa. Code §§ 5.50 and 5.103 (relating to approval to provide special analytical services; and blood tests for blood alcohol content) to perform alcohol analyses of blood and/or serum and plasma. This approval is based on demonstrated proficiency in periodic tests conducted by the Department's Bureau of Laboratories. These laboratories are also approved and designated under the provisions of the Vehicle Code, 75 Pa.C.S. §§ 1547 and 3755 (relating to chemical testing to determine amount of alcohol or controlled substance; and reports by emergency room personnel), the Fish and Boat Code, 30 Pa.C.S. § 5125 (relating to chemical testing to determine amount of alcohol or controlled substance) and the Game and Wildlife Code, 34 Pa.C.S. § 2501 (relating to hunting or furtaking while under influence of alcohol or controlled substance) as qualified to perform the types of specialized services which will reflect the presence of alcohol in blood and/or serum and plasma.

The Commonwealth's Vehicle Code at 75 Pa.C.S. § 1547(c)(3)(ii) also permits test results on blood or urine for alcohol or controlled substances to be introduced into evidence in certain legal proceedings in this Commonwealth if the laboratory is located in another state and is not licensed and approved by the Department to provide forensic blood and/or serum and plasma analysis services. This section states that the test results will be admissible into evidence at summary or criminal proceedings in which the defendant is charged with a violation of 75 Pa.C.S. § 3802 (relating to driving under influence of alcohol or controlled substance) or any other violation of the Vehicle Code arising out of the same action if the laboratory that performed the test is licensed to conduct the test by the state in which the facility is located and licensed under the Clinical Laboratory Improvement Amendments of 1988 (Pub.L. No. 100-578, 102 Stat.

2903). A similar provision appears in the Fish and Boat Code at 30 Pa.C.S. § 5125(c)(3)(ii).

Since procedures for determining the alcohol content of serum and plasma are identical and results obtained from serum or plasma derived from a blood sample are the same, laboratories that demonstrate reliability in the determination of alcohol in serum are approved to analyze both serum and plasma for alcohol content.

Persons seeking forensic blood or serum and plasma analysis services, or both, from the following designated laboratories should determine that the laboratory employs techniques and procedures acceptable for forensic purposes and that the director of the facility is agreeable to performing determinations for this purpose.

The name or location of a laboratory is sometimes changed but the personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name or location change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test, the clinical laboratory permit number of the facility at the time the list was prepared is included in the list of approved laboratories above the name of the laboratory.

The Department's blood alcohol and serum/plasma alcohol proficiency testing programs are approved by the United States Department of Health and Human Services in accordance with the requirements in section 353 the Clinical Laboratory Improvement Amendments of 1988 (42 U.S.C.A. § 263a), and implementing regulations 42 CFR 493.901 and 493.937 (relating to approval of proficiency testing programs; and toxicology), which are administered by the Centers for Medicare and Medicaid Services. Participation in these programs may therefore be used to demonstrate acceptable performance for approval purposes under both Federal and Commonwealth statutes.

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsylvania Bulletin*. Questions regarding this list should be directed to Dr. James R. Lute, Assistant Bureau Director, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotope, Braille) should contact Dr. Lute at the previously referenced address or phone number. Persons who are speech or hearing impaired may use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

[Pa.B. Doc. No. 13-1206. Filed for public inspection July 5, 2013, 9:00 a.m.]

Laboratories Approved to Determine Controlled Substance Content of Urine under The Clinical Laboratory Act, the Vehicle Code, the Fish and Boat Code and the Game and Wildlife Code

The following laboratories are licensed by the Department of Health (Department) under The Clinical Laboratory Act (35 P.S. §§ 2151—2165) and are currently approved by the Department under 28 Pa. Code § 5.50 (relating to approval to provide special analytical services) to perform analyses of urine for the determination of controlled substances or their biotransformation products.

This approval is based on demonstrated proficiency in periodic tests conducted by the Department's Bureau of Laboratories. These laboratories are also approved and designated for purposes of the Vehicle Code, 75 Pa.C.S. §§ 1547 and 3755 (relating to chemical testing to determine amount of alcohol or controlled substance; and reports by emergency room personnel), the Fish and Boat Code, 30 Pa.C.S. § 5125 (relating to chemical testing to determine amount of alcohol or controlled substance) and the Game and Wildlife Code, 34 Pa.C.S. § 2502 (relating to chemical test to determine amount of alcohol), as qualified to perform the types of services which will reflect the presence of controlled substances or their biotransformation products in urine.

Depending upon their capability and performance in proficiency surveys, laboratories are approved to perform screening and/or confirmatory urine drug analyses. Laboratories approved to perform screening tests only are designated on the approval list by an "S" after the laboratory's name. Laboratories approved to perform confirmatory testing only are designated by a "C" following the laboratory's name. Those approved to perform both screening and confirmatory analyses are designated by the letters "SC." Screening analyses provide a presumptive indication that a controlled substance is present. Confirmatory testing is used to substantiate screening results.

Persons seeking forensic urine drug analysis services from any of the listed laboratories should determine that the laboratory employs techniques and procedures accept-

able for the purpose. They should also determine that the director of the facility is agreeable to performing analyses for that purpose. Persons seeking the analyses are responsible for specifying the extent to which the presence of a controlled substance is to be verified. That specification should be predicated upon the purpose for which the analysis is being sought.

The Commonwealth's Vehicle Code contains a provision in 75 Pa.C.S. § 1547(c)(3)(ii) that permits test results on blood or urine for alcohol or controlled substances to be introduced into evidence at legal proceedings in this Commonwealth if the laboratory is located in another state and is not licensed and approved by the Department to provide these services. This section states that the test results may be admissible into evidence at summary or criminal proceedings in which the defendant is charged with a violation of 75 Pa.C.S. § 3802 (relating to driving under influence of alcohol or controlled substance) or any other violation of the Vehicle Code arising out of the same action if the laboratory that performed the test is licensed by the state in which the facility is located and licensed under the Clinical Laboratory Improvement Amendments of 1988 (Pub. L. No. 100-578, 102 Stat. 2903). A similar provision appears in the Fish and Boat Code at 30 Pa.C.S. § 5125(c)(3)(ii).

The name or location of a laboratory is sometimes changed but the personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name or location change, the clinical laboratory permit number should be used as the primary identifier. To assist in identifying a laboratory that performed a test, the clinical laboratory permit number of the facility at the time the list was prepared is included in the list of approved laboratories above the name of the laboratory.

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsylvania Bulletin*. Questions regarding this list should be directed to Dr. James R. Lute, Assistant Bureau Director, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape, Braille) may contact Dr. Lute at the previously referenced address or phone number. Persons who are speech or hearing impaired may use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

[Pa.B. Doc. No. 13-1207. Filed for public inspection July 5, 2013, 9:00 a.m.]

Laboratories Approved to Perform Blood Lead and/or Erythrocyte Protoporphyrin Determinations under The Clinical Laboratory Act

The following laboratories are licensed in accordance with The Clinical Laboratory Act (35 P. S. §§ 2151—2165) and are currently approved under 28 Pa. Code § 5.50 (relating to approval to provide special analytical services) to perform analyses of blood for lead or erythrocyte protoporphyrin content. This approval is based on demonstrated proficiency in periodic evaluations conducted by the Bureau of Laboratories of the Department of Health (Department).

Lead poisoning is a reportable noncommunicable disease. Approved laboratories that offer blood lead testing services are required to inform the Department of actual or possible incidents of this condition in accordance with 28 Pa. Code § 27.34 (relating to reporting cases of lead poisoning). These regulations specify the following requirements for reporting by clinical laboratories:

(1) A clinical laboratory shall report all blood lead test results on both venous and capillary specimens for persons under 16 years of age to the Department's Childhood Lead Poisoning Prevention Program, Division of Maternal and Child Health, Bureau of Family Health.

(2) A clinical laboratory shall report an elevated blood lead level in a person 16 years of age or older to the Department's Division of Environmental Health Epidemiology, Bureau of Epidemiology or to other locations as designated by the Department. An elevated blood lead level is defined by the National Institute for Occupational Safety and Health (NIOSH). As of January 26, 2002, NIOSH defines an elevated blood lead level as a venous blood lead level of 25 micrograms per deciliter ($\mu\text{g}/\text{dL}$) or

higher. The Department will publish in the *Pennsylvania Bulletin* any NIOSH update of the definition within 30 days of NIOSH's notification to the Department.

(3) A clinical laboratory which conducts blood lead tests of 100 or more specimens per month shall submit results electronically in a format specified by the Department.

(4) A clinical laboratory which conducts blood lead tests of less than 100 blood lead specimens per month shall submit results either electronically or by hard copy in the format specified by the Department.

(5) A laboratory which performs blood lead tests on blood specimens collected in this Commonwealth shall be licensed as a clinical laboratory and shall be specifically approved by the Department to conduct those tests.

(6) Blood lead analyses requested for occupational health purposes on blood specimens collected in this Commonwealth shall be performed only by laboratories which are licensed and approved as specified in paragraph (5), and which are also approved by the Occupational Safety and Health Administration of the United States Department of Labor under 29 CFR 1910.1025(j)(2)(iii) (relating to lead).

(7) A clinical laboratory shall complete a blood lead test within 5 work days of the receipt of the blood specimen and shall submit the case report to the Department by the close of business of the next work day after the day on which the test was performed. The clinical laboratory shall submit a report of lead poisoning using either the hard copy form or electronic transmission format specified by the Department.

(8) When a clinical laboratory receives a blood specimen without all of the information required for reporting purposes, the clinical laboratory shall test the specimen and shall submit the incomplete report to the Department.

Erythrocyte protoporphyrin determinations may be performed as an adjunct determination to substantiate blood lead levels of 25 micrograms per deciliter or higher. Since erythrocyte protoporphyrin concentrations may not increase as a result of low-level exposures to lead, direct blood lead analysis is the only reliable method for identifying individuals with blood lead concentrations below 25 micrograms per deciliter.

Persons seeking blood lead or erythrocyte protoporphyrin analyses should determine that the laboratory employs techniques and procedures acceptable for the purpose for which the analyses are sought. Laboratories offering blood lead analysis only are designated with the letter "L" following the name of the laboratory. Those offering erythrocyte protoporphyrin analysis only are designated with the letter "P." Laboratories offering both services are designated with the letters "LP."

The list of approved laboratories will be revised approximately semiannually and published in the *Pennsylvania Bulletin*.

The name or location of a laboratory is sometimes changed but the personnel and testing procedures of the facility remain unchanged. When changes of this type occur, the clinical laboratory permit number does not change. If questions arise about the identity of a laboratory due to a name or location change, the clinical laboratory permit number should be used as the primary

identifier. To assist in identifying a laboratory that performed a test, the clinical laboratory permit number of the facility at the time the list was prepared is included in the list of approved laboratories above the name of the laboratory.

The Department's blood lead proficiency testing program is approved by the United States Department of Health and Human Services in accordance with 42 CFR 493.901 and 493.937 (relating to approval of proficiency testing programs; and toxicology) which are administered by the Centers for Medicare and Medicaid Services. Participation in these programs may therefore be used to demonstrate acceptable performance for approval purposes under both Federal and Commonwealth statutes.

Questions regarding this list should be directed to Dr. James R. Lute, Assistant Bureau Director, Department of Health, Bureau of Laboratories, P. O. Box 500, Exton, PA 19341-0500, (610) 280-3464.

Persons with a disability who require an alternative format of this notice (for example, large print, audiotape, Braille) should contact Dr. Lute at the previously referenced address or phone number. Persons who are speech or hearing impaired may use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

DEPARTMENT OF PUBLIC WELFARE

Designated Exceptional Durable Medical Equipment

In accordance with the Department of Public Welfare's (Department) currently approved State Plan, the Department is required to publish an annual list of exceptional durable medical equipment (DME) by notice in the *Pennsylvania Bulletin* in July of each year. Interested persons may petition the Department to consider additions to the exceptional DME list by submitting a written request to the Department. Requests received on or before December 31 will be considered in developing the list for the following July.

During calendar year 2012, the Department received no written requests to add or remove items of DME from the list of exceptional DME. Therefore, this notice makes no changes in either the minimum acquisition cost or the list of qualifying DME.

"Exceptional DME" is defined as DME that has an acquisition cost of \$5,000 or more and is either Specially Adapted DME or other DME that is designated as Exceptional DME by the Department annually by notice in the *Pennsylvania Bulletin*.

"Specially Adapted DME" is DME that is uniquely constructed or substantially adapted or modified in accordance with the written orders of a physician for the particular use of one resident, making its contemporaneous use by another resident unsuitable.

The list of Exceptional DME that has been designated by the Department is as follows:

(1) *Air fluidized beds.* The pressure relief provided by this therapy uses a high rate of airflow to fluidize fine particulate material (for example, beads or sand) to produce a support medium that has characteristics similar to liquid. May have a Gortex cover.

(2) *Powered air flotation bed (low air loss therapy).* A semi-electric or total electric bed with a fully integrated powered pressure-reducing mattress which is characterized by all of the following:

(a) An air pump or blower with a series of interconnected woven fabric air pillows which provides sequential inflation and deflation of the air cells or a low interface pressure throughout the mattress allowing some air to escape through the support surface to the resident. May have a Gortex cover.

(b) Inflated cell height of the air cells through which air is being circulated is 5 inches or greater.

(c) Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure mattresses) and air pressure provide adequate patient lift, reducing pressure and prevent bottoming out.

(d) A surface designed to reduce friction and shear.

(e) May be placed directly on a hospital bed frame.

(f) Automatically readjusts inflation pressures with change in position of bed (for example, head elevation, and the like).

(3) *Augmentative communication devices.* Used by residents who are unable to use natural oral speech as a primary means of communication. The specific device requested must be appropriate for use by the resident and the resident must demonstrate the abilities or potential abilities to use the device selected. Portable devices need to supplement, aid or serve as an alternative to natural speech for residents with severe expressive communication disorders. Nonportable devices may be covered only if required for visual enhancement or physical access needs that cannot be accommodated by a portable device.

(4) *Ventilators (and related supplies).*

(a) Used by residents 21 years of age and older who require full ventilator support for a minimum of 8 hours per day to sustain life.

(b) Used by residents 20 years of age and younger who require ventilator support to sustain life (no minimum time requirement).

Effective Date

This notice is effective upon publication in the *Pennsylvania Bulletin*.

Public Comment

Interested persons are invited to submit petitions for the Department to consider additions to the Exceptional DME list or written comments regarding this notice to the Department of Public Welfare, Office of Long-Term Living, Bureau of Policy and Regulatory Management, Attention: Marilyn Yocum, P. O. Box 8025, Harrisburg, PA 17106-8025. Comments received within 30 days will be reviewed and considered for any subsequent revision of the notice.

Persons with a disability who require an auxiliary aid or service may submit comments using the Pennsylvania AT&T Relay Service by calling (800) 654-5984 (TDD users) or (800) 654-5988 (voice users).
