## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 1

---

#### **Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907)**

---

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop

and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

The Department has received the following Notices of Intent to Remediate:

*Northeast Region: Eric Supey, Environmental Cleanup and Brownfields Program Manager, 2 Public Square, Wilkes-Barre, PA 18701-1915.*

**Marston Property**, 104 Bone Ridge Road, Paupack Township, **Wayne County**, Thomas Hippensteal, Envirosearch Consultants, Inc., has submitted a Notice of Intent to Remediate on behalf of his client, Mr. Charles Marston, 301 Green Road, Berwyn, PA 19312, concerning the remediation of soil found to have been impacted by #2 fuel oil, released from an aboveground storage tank due to vandalism. The applicant proposes to remediate the site to meet the Residential Statewide Health Standards for soil. The intended future use of the site is residential.

A summary of the Notice of Intent to Remediate was published in *The Wayne Independent* on September 7, 2013.

## AIR QUALITY

### PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS NEW SOURCES AND MODIFICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of these applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office listed before the applications. Persons interested in reviewing the application files should contact the appropriate regional office to schedule appointments.

Persons wishing to receive a copy of a proposed Plan Approval or Operating Permit shall indicate interests to the Department regional office within 30 days of the date of this notice and shall file protests or comments on a proposed Plan Approval or Operating Permit within 30 days of the Department providing a copy of the proposed documents to persons or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that hearings be held concerning a proposed Plan Approval or Operating Permit. A comment or protest filed with the Department regional office shall include a concise statement of the objections to the issuance of the Plan Approval or Operating Permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

**41-00019A: VT Hackney, Inc.** (914 Saegers Station Road, Montgomery, PA 17752-8501) for construction and operation of a spray booth equipped with an 11 million Btu per hour, natural gas-fired drying area (Source P321) at their Montgomery facility in Clinton Township, **Lycoming County**. The air contaminant emissions from Source P211 will be controlled by a set of panel filters (Control Device C321). This is a State Only (Synthetic Minor) facility for which an operating permit has been issued.

The Department's review of the information contained in the application submitted by VT Hackney, Inc., indicates that the source will comply with all applicable air quality requirements pertaining to air contamination sources and the emission of air contaminants, including the fugitive air contaminant emission requirement of 25 Pa. Code § 123.1, the particulate matter emission limitation of 25 Pa. Code § 123.13, the sulfur oxide emission limitation of 25 Pa. Code § 123.21 and the visible emission limitation of 25 Pa. Code § 123.41. Additionally, the Department has determined that the proposed facility satisfies best available technology (BAT) requirements pursuant to 25 Pa. Code §§ 127.1 and 127.12 as well as the requirements of 25 Pa. Code § 129.52—Surface Coating Process. Pursuant to the requirements of BAT, the volatile organic compounds (VOC) emissions from Source P321 shall not exceed 6.92 tons in any 12 consecutive month period. The plan approval, if issued, will subsequently be incorporated into State Only (Synthetic Minor) operating permit SMOP 41-00019 via an administrative amendment in accordance with 25 Pa. Code § 127.450 at a later date.

Based on the findings above, the Department proposes to issue a plan approval with annual emission restrictions for the spray booth as well as monitoring, recordkeeping and work practice requirements to verify compliance with the annual emission restrictions.

In addition to the emission limitations above, the following is a summary of the types of conditions the Department intends to place in Plan Approval 41-00019A to ensure compliance with applicable Federal and State regulatory requirements including the best available technology requirements of 25 Pa. Code §§ 127.1 and 127.12.

Recordkeeping requirement of the comprehensive daily records of all volatile organic compound-containing, volatile hazardous air pollutant-containing and acetone-containing materials used in, or associated with the use of Source P321.

Work practice requirements to operate in accordance with the manufacturer's recommendations and good air pollution control practices to limit the emission of VOCs and particulate matter.

The potential air contaminate emissions from the spray booth will be 2.45 tons per year (tpy) for NO<sub>x</sub>, 3.29 tpy for CO, 6.92 tpy for VOC, 0.02 tpy for sulfur oxide, 0.26 tpy for particulate matter (PM) including PM<sub>-10</sub> and PM<sub>-2.5</sub> and 3,160 tpy for carbon dioxide equivalent (CO<sub>2</sub>e).

A person may oppose the proposed plan approval, or may provide the Department with additional information to consider in its review, or may request a public hearing, by filing a written protest with the Department at the address listed above. Each written comment must contain

the name, address and telephone number of the person submitting the comments, identification of the proposed permit by the permit number listed above and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A 30-day comment period from the date of publication of this notice in the *Pennsylvania Bulletin* will exist for the submission of comments or protests.

**04-00738A: Aliquippa Metal Recovery, LLC** (100 Bet Tech Drive, Aliquippa, PA 15001) Notice is hereby given in accordance with 25 Pa. Code §§ 127.44—127.46 that the Department of Environmental Protection (DEP) intends to issue Air Quality Plan Approval: PA-04-00738A to allow the construction and temporary operation of a slag processing and metals recovery facility primarily consisting of two crushing/screening lines and one jig plant located in Hopewell Township, **Beaver County**.

Potential to emit from this proposed facility is calculated to be 17.70 tons of particulate matter (PM), 6.50 tons of particulate matter less than 10 or 2.5 microns in diameter (PM<sub>10</sub>/PM<sub>2.5</sub>), 0.48 ton of manganese (Mn), and 0.50 ton of total metallic hazardous air pollutants (HAP). Air emissions from this proposed slag processing and metal recovery facility have been aggregated with the nearby Beaver Valley Slag, Inc. and Beaver Valley Asphalt Corporation facilities' emissions for regulatory applicability purposes. Potential to emit from all three facilities combined is calculated to be 71.62 tons of nitrogen oxides (NO<sub>x</sub>), 63.47 tons of carbon monoxide (CO), 68.71 tons of PM, 27.3 tons of PM<sub>10</sub>/PM<sub>2.5</sub>, 16.52 tons of sulfur dioxide (SO<sub>2</sub>), less than 13.97 tons of volatile organic compounds (VOC), 1.53 tons of Mn, and less than 15.56 tons of total HAP. **26-00057: Matt Canestrone Contracting, Inc.—Labelle Site** (1035 Labelle Rd, La Belle, PA 15450) for operation of a barge unloading and transferring operation to support the reclamation area on top of the hill adjacent to the unloading/loading area located in Luzerne Township, **Fayette County**. Coal ash and FGD sludge are being used as a capping material on the coal refuse pile to reduce infiltration and to provide a buttress for long-term stability. In accordance with 25 Pa. Code §§ 127.424 and 127.425 the Department of Environmental Protection (DEP) has received an application and is providing public notice that it intends to issue a renewal Air Quality Operating Permit for the above mentioned facility.

The subject facility consists of two docks for barge unloading, two excavators each with a clamshell and an area for truck/rail transshipping with front loaders. One dock/ excavator is considered primary, but both docks can be used at the same time. The rate of unloading the barges is limited by the number of trucks available. Barges are unloaded and material is transported to the reclamation area on the hill behind the barge unloading area. The trucks transporting the material cross one public road from the barge unloading area to reclamation area. The facility provided potential emission calculations based on 416,000 tons of material handled per 12 month period and AP-42 Emission Factors. Operating approximately ten hours a day and five days a week, the potential emissions are calculated to be 23.9 tons per year PM<sub>10</sub>. This includes the potential emissions from transferring material from barge to truck, haul roads, truck unloading, wind erosion and bulldozing.

The proposed authorization is subject to State and Federal Regulations. The permit includes operational requirements, monitoring requirements, and recordkeeping requirements as follows:

1. The Owner/Operator shall test the moisture content of each material received on barge at least once per week.

Records of the sample tests shall be maintained in a log on-site. The Owner/Operator may request a reduction in the frequency of the moisture content sample testing, in writing, provided there are no observations by the Department of any inconsistent test samples from the previous six month period.

2. The Owner/Operator shall conduct a daily survey of the facility during daylight hours while the facility is operating to ensure compliance with the fugitive emission and malodor restrictions in 25 Pa. Code §§ 123.1, 123.2 and 123.31. If any fugitive emissions or malodors in violation of § 123.1, § 123.2 or § 123.31 are apparent, the permittee shall take immediate corrective action to eliminate them.

3. The Owner/Operator shall maintain a daily record of all fugitive emission and odor surveys performed. The records shall include the date, time, name and title of the observer, whether fugitive emissions or malodors were observed and any corrective action. Records shall be kept on-site for a minimum of five years and made available to the Department.

4. The Owner/Operator shall maintain a daily log of material delivered to the facility, inventory on hand, and material shipped from the facility.

5. The Owner/Operator shall operate and maintain all sources at this facility in accordance with 25 Pa. Code § 127.444.

6. All trucks carrying material with a moisture content of less than 5 percent by weight are required to be tarped.

7. The Owner/Operator shall notify the Department at least 5 days in advance of handling materials at the facility that have not been previously handled or approved by the Department. The Owner/Operator shall await the Department's written approval prior to accepting any new material.

8. The drop height from the front-end loaders and clamshell buckets being used to transfer and load material into trucks shall be kept as short as possible to minimize fugitive emissions.

9. The facility shall not handle materials with a moisture content of less than 5 percent by weight under excessively windy conditions, where the force of the wind contributed to the generation of fugitive dust.

10. All unpaved in-plant roads shall be watered on a preventative basis. Other methods of dust control must be used when the weather conditions make the watering of unpaved roads hazardous.

11. All in-plant roads shall be maintained to prevent particulate matter from becoming airborne in accordance with 25 Pa. Code §§ 123.1 and 123.2

12. A set vehicle pattern shall be established and maintained for vehicles entering and exiting the facility.

13. In accordance with 25 Pa. Code § 123.1(c), the Owner/Operator shall promptly remove earth or other material from paved roads.

14. An operable water truck must be maintained on-site at all times.

15. The Department may require additional controls (water sprayers, paving, conveyor covers, etc.) based on evaluation of the operation after inspection and determination that existing controls are not adequate for controlling fugitive emissions.

Copies of the application, DEP's analysis and other documents used in the evaluation of the application are available for public review during normal business hours at the Department's Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. Appointments for scheduling a review must be made by calling 412-442-4000.

Any person may submit comments, a request for the Department to hold a public hearing, or a protest to the operating permit or a proposed condition thereof, by filing such submissions in writing with the Department at the Southwest Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments.

All requests for a public hearing, and all protests to a proposed action, shall be filed with the Department within 30 days of the date that notice of the proposed action was published under 25 Pa. Code § 127.424 (relating to public notice). A protest must include the name, address and telephone number of the person filing the protest, identification of the proposed permit issuance being opposed (Operating Permit 26-00057) and a concise statement of the objections to the permit issuance and the relevant facts upon which the objections are based.

A public hearing may be held in accordance with 25 Pa. Code § 127.429, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. If a public hearing is held, all persons who have properly filed a protest under 25 Pa. Code § 127.426 may appear and give testimony. The applicant, the protestant and other participants will be notified of the decision to hold a hearing (and the time, place and purpose of such hearing) by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification by telephone is sufficient.

Written comments, protests and requests for a public hearing should be directed to Sheila Shaffer, Air Quality Engineering Specialist, Department of Environmental Protection, Southwest Region, 400 Waterfront Drive, Pittsburgh, PA 15222. For additional information concerning the permit or the issuance procedure, contact Sheila Shaffer at (412) 442-5227.

*Noncoal Applications Received*

*Effluent Limits*—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

Parameter	Table 2		
	30-day Average	Daily Maximum	Instantaneous Maximum
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l

\* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

**MINING ACTIVITY NPDES DRAFT PERMITS**

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

*Effluent Limits for Coal Mining Activities*

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

\* The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

#### *Effluent Limits for Noncoal Mining Activities*

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapter 77 are as follows:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	35 mg/l	70 mg/l	90 mg/l
Alkalinity exceeding acidity*		greater than 6.0; less than 9.0	
pH*		greater than 6.0; less than 9.0	

\* The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

**E32-501. GenOn Northeast Management Company**, 121 Champion Way, Suite 300, Canonsburg, PA 15317-5817, West Wheatfield Township, **Indiana County**; ACOE Pittsburgh District

Applicant proposes:

1. To relocate approximately 4,565 linear feet (lf) of an unnamed tributary (UNT) (a.k.a. East Valley Stream) to the Conemaugh River (CWF), by reconstructing this watercourse as an approximately 5,302 lf channel; and
2. To relocate approximately 540 lf of a UNT (a.k.a. Stream DD) to the East Valley Stream (CWF), by reconstructing this watercourse as an approximately 985 lf channel.
3. The relocation of the East Valley stream will result in the loss of approximately 260 lf of another UNT (a.k.a. Stream C-C), and will reduce hydrology to approximately 705 lf of the upper portion of another UNT (a.k.a. the East-West Stream).
4. This project will also permanently impact nineteen (19) identified wetland areas, resulting in total impacts to approximately 2.80 acres of wetland areas (primarily PEM, with some PFO);
5. will permanently impact several, additional watercourses within the watershed, resulting in an additional 3,283 lf of impact to watercourses;
6. and will temporarily impact an additional 2,198 lf of various watercourses.
7. This project will include the replacement of three (3) existing culverts and the construction of eight (8) new culverts.

The aforementioned activities will result from the construction of Stage III, of the Residual Waste Landfill, at

the Conemaugh Generating Station in West Wheatfield Township, Indiana County (New Florence, PA Quadrangle N: 4.04 inches; W: 9.24 inches; Latitude: 40° 23' 50"; Longitude: 79° 03' 59").

The reconstructed stream segments, along with approximately 1,798 lf of enhancements to existing watercourses and the construction of approximately 3.20 acres of replacement wetlands, are intended to compensate for the cumulative and permanent impacts to approximately 9,353 lf of watercourse and 2.8 acres of wetland.

**E5829-051 Amend. Williams Field Services Company, LLC**; Park Place Corporate Center 2, 2000 Commerce Drive, Pittsburgh, PA 15275; Lenox Township, **Susquehanna County**, ACOE Baltimore District.

To construct, operate, and maintain:

- 1) a 12-inch natural gas pipeline crossing impacting 3 lineal feet of unnamed tributary to Millard Creek (CWF-MF, NRT) (Lenoxville, PA Quadrangle; N 41° 41' 01" Lat., W - 75° 43' 14" Long.),
- 2) a 12-inch natural gas pipeline conventional bore crossing impacting 34 square feet (< 0.01 acre) of PFO wetlands (EV, >10 acres) (Lenoxville, PA Quadrangle; N 41° 40' 16" Lat., W - 75° 44' 11" Long).

The project amendment consists of an additional stream and wetland crossing, in Lenox Township, Susquehanna County. The crossings are to be completed by conventional bore methods with no surface impacts. The project will result in an additional 3 lineal feet of stream impacts, and 0.01 acre of wetland impact, all for the purpose of conveying Marcellus Shale natural gas to market.

Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. ## PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P. S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropri-

ate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

**LAND RECYCLING AND  
 ENVIRONMENTAL REMEDIATION  
 UNDER ACT 2, 1995  
 PREAMBLE 2**

**The following plans and reports were submitted  
 under the Land Recycling and Environmental  
 Remediation Standards Act (35 P. S. §§ 6026.101—  
 6026.907).**

Provisions of Sections 301—308 of the Land Recycling  
 and Environmental Remediation Standards Act (act) (35  
 P. S. §§ 6026.301—6026.308) require the Department to  
 publish in the *Pennsylvania Bulletin* a notice of submis-  
 sion of plans and reports. A final report is submitted to  
 document cleanup of a release of a regulated substance at  
 a site to one of the act's remediation standards. A final  
 report provides a description of the site investigation to  
 characterize the nature and extent of contaminants in  
 environmental media, the basis for selecting the environ-  
 mental media of concern, documentation supporting the  
 selection of residential or nonresidential exposure factors,  
 a description of the remediation performed and summa-  
 ries of sampling analytical results which demonstrate  
 that remediation has attained the cleanup standard se-  
 lected. Submission of plans and reports, other than the  
 final report, will also be published in the *Pennsylvania  
 Bulletin*. These include the remedial investigation report,  
 risk assessment report and cleanup plan for a site-specific  
 standard remediation. A remedial investigation report

includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. ## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 3

**The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).**

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup

plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The modification revises the testing frequency for volatile organic compounds (VOC) in the landfill gas. The modification permits the enclosed flare (Source ID C0<sub>7</sub>) to operate up to its full capacity as a primary control device as well as a backup control device to two existing landfill gas fired engines (Source IDs C0<sub>5</sub> and C0<sub>8</sub>). Emissions allowed on a 12-month rolling basis for the flare itself are increased for VOC, nitrogen oxides (NO<sub>x</sub>), carbon monoxide (CO), sulfur oxides (SO<sub>x</sub>) and particulate matter (PM/PM<sub>10</sub>/PM<sub>2.5</sub>). However emissions of these pollutants allowed for the combination of the engines and the flare remain unchanged. Several clarifications and corrections of typographical errors are made.

#### FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

### **Proposed Revision to the State Implementation Plan for the Reading Fine Particulate Matter Nonattainment Area; Public Hearing**

Particulate matter (PM) includes both solid and liquid particles suspended in the air. Fine particle pollution describes particulate matter that is less than or equal to 2.5 micrometers in diameter (PM<sub>2.5</sub>). PM<sub>2.5</sub> concentrations above the Federal health-based standard pose a serious human health threat. Air quality in the Reading PM<sub>2.5</sub> Nonattainment Area, consisting of Berks County, has improved and now meets the 1997 PM<sub>2.5</sub> health-based standards. Therefore, the Department of Environmental Protection (Department) plans to submit a request to the United States Environmental Protection Agency (EPA) to redesignate this area to attainment.

The Department published notice at 43 Pa.B. 5661 (September 21, 2013) of a public comment period and public hearing on the request and on a proposed State Implementation Plan revision containing the 2007 comprehensive inventory and a maintenance plan demonstrating that the area can maintain the standard for the next 10 years as required under section 175A(a) of the Federal Clean Air Act (42 U.S.C.A. § 7505a(a)). The notice explained that the maintenance plan will also establish new motor vehicle emission budgets for purposes of transportation conformity, upon EPA approval.

The Department is postponing the public hearing by 1 week and extending the public comment period. Public notice of the new public hearing date and extension of the public comment period has been provided by local newspaper advertisement in the affected area.

The Department will hold a public hearing to receive comments on the proposal on Wednesday, October 30, 2013, at 11 a.m. at the Department's Reading District Office, 1005 Crossroads Boulevard, Reading, PA 19605. Persons wishing to present testimony at the hearing should contact Alex Haas, P. O. Box 8468, Harrisburg, PA 17105, (717) 787-9495, [alehaas@pa.gov](mailto:alehaas@pa.gov) to reserve a time. Witnesses should keep testimony to 10 minutes and should provide two written copies of their statement at the hearing.

If by October 28, 2013, no person has expressed an interest in testifying at the hearing, the hearing will be cancelled. The Department will notify the public if the hearing is cancelled on the Bureau of Air Quality web page at <http://www.dep.state.pa.us/dep/deputate/airwaste/aq/default.htm>.

Persons may also contact the Department to find out if the hearing is cancelled by contacting Alex Haas at (717) 787-9495 or [alehaas@pa.gov](mailto:alehaas@pa.gov).

The request to redesignate the area to attainment and the proposed State Implementation Plan revision are available on the Department's web site at [www.depweb.state.pa.us](http://www.depweb.state.pa.us) (choose "Air," choose "Bureau of Air Quality," choose "Regs/Plans," choose "Clean Air Plans") or through the contact persons listed as follows.

Persons with a disability who wish to attend the hearing and require an auxiliary aid, service or other accommodation to participate in the proceeding should contact Alex Haas at (717) 787-9495 or [alehaas@pa.gov](mailto:alehaas@pa.gov). TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

The Department must receive comments no later than November 1, 2013. Written comments should be sent to the attention of Nancy Herb, Bureau of Air Quality, P. O. Box 8468, Harrisburg, PA 17105-8468, [nherb@pa.gov](mailto:nherb@pa.gov). Use "Reading PM<sub>2.5</sub> Redesignation" as the subject line in written communication.

*Prevention and Control of Meningococcal Disease: Recommendations of the Advisory Committee on Immunization Practices (ACIP)*

This report compiles and summarizes all recommendations from the Center for Disease Control’s Advisory Committee on Immunization Practices (ACIP) regarding prevention and control of meningococcal disease in the United States, specifically the changes in the recommendations published since 2005 and describes the process undertaken and the rationale used in support of these recommendations. This report is a comprehensive summary of previously published recommendations and does not contain any new recommendations; it is intended for use by clinicians as a resource. Guidelines for antimicrobial chemoprophylaxis and evaluation and management of suspected outbreaks of meningococcal disease also are provided.

Meningococcal disease describes the spectrum of infections caused by *Neisseria meningitidis*, including meningitis, bacteremia and bacteremic pneumonia. Meningococcal disease develops rapidly, typically among previously healthy children and adolescents, and results in high morbidity and mortality. For unknown reasons, incidence has declined since the peak of disease in the late 1990s and approximately 800—1,200 cases are reported annually in the United States. This decline began before implementation of routine use of meningococcal vaccines in adolescents and has occurred in all serogroups. Four vaccines are licensed in the United States and provide protection against four (A, C, W and Y) and two (C and Y) serogroups. Vaccines that protect against serogroup B meningococcal disease are not available in the United States.

Meningococcal vaccination is recommended for groups at increased risk for disease. These groups include adolescents, persons with certain medical conditions and persons with increased risk for exposure. Among these risk groups, the number of vaccine doses (that is, 2- or 4-dose primary series or a single dose with or without a booster

dose) and vaccine product are determined by the indication for vaccination and age. In certain situations such as special dosing regimens (that is, booster doses or serial vaccination and 2-dose primary series for persons aged  $\geq 2$  years), off-label use of meningococcal vaccine has been recommended. Special dosing regimens have been recommended on the basis of data from studies of immunologic response to vaccination, post licensure observational data, and the need for long-term protection in certain risk groups.

ACIP recommendations for meningococcal vaccination have been summarized. Details regarding dosing (2- or 4-dose primary series or a single dose with or without a booster dose), contraindications, precautions, and special circumstances (e.g., adolescents infected with human immunodeficiency virus (HIV) and asplenic children) are described elsewhere in the report.

*Use of 13-Valent Pneumococcal Conjugate Vaccine and 23-Valent Pneumococcal Polysaccharide Vaccine Among Children Aged 6—18 Years with Immunocompromising Conditions: Recommendations of the Advisory Committee on Immunization Practices (ACIP)*

On February 20, 2013, the Advisory Committee on Immunization Practices (ACIP) recommended routine use of 13-valent pneumococcal conjugate vaccine (PCV13; Prevnar 13, Wyeth Pharmaceuticals, Inc., a subsidiary of Pfizer, Inc.) for children aged 6—18 years with immunocompromising conditions, functional or anatomic asplenia, cerebrospinal fluid (CSF) leaks or cochlear implants who have not previously received PCV13. PCV13 should be administered to these children regardless of whether they received the 7-valent pneumococcal conjugate vaccine (PCV7) or the 23-valent pneumococcal polysaccharide vaccine (PPSV23). Recommendations for PPSV23 use for children in this age group remain unchanged. The evidence for the benefits and risks associated with PCV13 vaccination of children with immunocompromising conditions was evaluated using the Grading of Recommendations, Assessment, Development, and Evaluation (GRADE) framework (1). This recommendation reflects a policy change from permissive and

off-label recommendation of PCV13 in the pediatric immunocompromised population to a category A recommendation. This report summarizes the evidence considered by ACIP to make this recommendation and reviews the recommendations for use of PCV13 and PPSV23 for children aged 6—18 years.

Persons with disability who require an alternative format of this notice (for example, large print, audiotape, Braille) should contact Wayne Fleming, Department of Health, Division of Immunizations, Room 1026, Health and Welfare Building, 625 Forster Street, Harrisburg, PA 17120-0701, (717) 787-5681, or for speech and/or hearing impaired persons V/TT the Pennsylvania AT&T Relay Service (800) 654-5984 (TT).

Appeal of James Dill; file no. 13-114-146726; Erie Insurance Exchange; Doc. No. P13-09-013; November 1, 2013, 10 a.m.

Parties may appear with or without counsel and offer relevant testimony or other relevant evidence. Each party

must bring documents, photographs, drawings, claims files, witnesses, and the like, necessary to support the party's case. A party intending to offer documents or photographs into evidence shall bring enough copies for the record and for each opposing party.

In some cases, the Insurance Commissioner (Commissioner) may order that the company reimburse an insured for the higher cost of replacement insurance coverage obtained while the appeal is pending. Reimbursement is available only when the insured is successful on appeal, and may not be ordered in all instances. If an insured wishes to seek reimbursement for the higher cost of replacement insurance, the insured must produce documentation at the hearing which will allow comparison of coverages and costs between the original policy and the replacement policy.

Following the hearing and receipt of the stenographic transcript, the Commissioner will issue a written order resolving the factual issues presented at the hearing and stating what remedial action, if any, is required. The Commissioner's Order will be sent to those persons participating in the hearing or their designated representatives. The Order of the Commissioner may be subject to judicial review by the Commonwealth Court.
