DEPARTMENT OF AGRICULTURE

Addendum to the Order of Quarantine; Thousand Cankers Disease of Walnut

Recitals

A. Thousand Cankers Disease (TCD), a disease complex that kills walnut trees, *Juglans spp.*, has been detected in the Commonwealth. There is no cure for a tree once it is infected. The fungus *Geosmithia morbida* is vectored by the walnut twig beetle, *Pityophthorus juglandis*, causing small cankers under the bark of the tree. The beetle introduces the fungus while it tunnels beneath the bark. As more beetles attack the tree, the number of cankers increases until they coalesce to girdle twigs and branches, restricting movement of nutrients and eventually killing the tree. Thousand Cankers Disease has been detected in the Commonwealth and has the potential to spread to uninfested areas by natural means or through the movement of infested articles.

B. The Plant Pest Act (Act) (3 P. S. §§ 258.1—258.27) empowers The Department of Agriculture (Department) to take various measures to detect, contain and eradicate plant pests. These powers include the authority to establish quarantines to prevent the spread of plant pests within this Commonwealth.

C. Under the authority of section 258.20 of the Act (3 P. S. § 258.20) the Department may declare a pest to be a public nuisance when the Department determines a plant pest to be dangerous or destructive to the agriculture, horticulture or forests of this Commonwealth. For the reasons set forth in Paragraph A above, the Department declares TCD, the fungus *Geosmithia morbida* and the walnut twig beetle, *Pityophthorus juglandis*, to be plant pests.

D. Consistent with the Order of Quarantine published at 44 Pa.B. 5216 issued Saturday, August 2, 2014, where the Department detects or confirms any of the plant pests established in this Order of Quarantine—Thousand Cankers Disease, *Geosmithia morbida* or *Pityophthorus juglandis*—the place or area in which any of these plant pests are detected or confirmed shall be subject to the provisions of that Order of Quarantine published at 44 Pa.B. 5216 issued Saturday, August 2, 2014.

E. The place or area in which the plant pest is detected or confirmed shall be added to the Order of Quarantine, published at 44 Pa.B. 5216 issued Saturday, August 2, 2014, through an addendum delineating the specific location and geographic parameters of the area or place. Such Addendum shall be published in the *Pennsylvania Bulletin* and enforcement of the Addendum to the Order of Quarantine, published at 44 Pa.B. 5216 issued Saturday, August 2, 2014, with regard to that place or area shall become effective immediately.

Order

Under authority of section 21 of the act (3 P. S. § 258.21), and with the Recitals previously listed incorporated into this Addendum to the Order of Quarantine published at 44 Pa.B. 5216 issued Saturday, August 2, 2014 by reference, the Department orders the following:

1. Establishment of Quarantine.

A quarantine is hereby established with respect to Lancaster county. This is in addition to counties and areas already subject to the Thousand Cankers Disease Quarantine Order published at 44 Pa.B. 5216 issued Saturday, August 2, 2014.

2. All Provisions Apply.

All of the provisions established in the Thousand Cankers Disease Quarantine Order published at 44 Pa.B. 5216 issued Saturday, August 2, 2014, are hereby incorporated herein and made a part hereof this Addendum as if fully set forth herein and shall hereby be made applicable to Lancaster county.

Order of Quarantine; Spotted Lanternfly

Recitals

A. Spotted lanternfly, *Lycorma delicatula*, is a new pest to the United States and has been detected in the Commonwealth. This is a dangerous insect to forests, ornamental trees, orchards and grapes and not widely prevalent or distributed within or throughout the Commonwealth or the United States.

B. The Plant Pest Act (Act) (act of December 16, 1992, P. L. 1228, No. 162) (3 P. S. §§ 258.1—258.27) empowers The Department of Agriculture (Department) to take various measures to detect, contain and eradicate plant pests. These powers include the authority, under section 258.21 of the Act, to establish quarantines to prevent the spread of plant pests within this Commonwealth (act of December 16, 1992, P. L. 1228, No. 162, § 21) (3 P. S. § 258.21).

C. Under the authority of section 258.20 of the Act (related to pests declared public nuisance) (act of December 16, 1992, P. L. 1228, No. 162, § 20) (3 P. S. § 258.20) the Department may declare a plant pest to be a public nuisance when the Department determines a plant pest to be dangerous or destructive to the agriculture, horticulture or forests of this Commonwealth. For the reasons set forth in Paragraph A above, the Department declares *Lycorma delicatula* to be a public nuisance.

D. Once a plant pest is declared a nuisance, “It shall be unlawful for any person knowingly to permit any plant pest so declared to exist on his premises or to sell, offer for sale, give away or move any plants, plant products or other material capable of harboring the pest.” (act of December 16, 1992, P. L. 1228, No. 162, § 20) (3 P. S. § 258.20).

E. Where the Department detects or confirms any plant pest established in this Order of Quarantine—Spotted lanternfly, *Lycorma delicatula*—the place or area in which any of these plant pests are detected or confirmed shall be subject to this Order of Quarantine.

F. The place or area in which the plant pest is detected or confirmed shall be added to this Order of Quarantine through an addendum delineating the specific location and geographic parameters of the area or place. Such addendum shall be published in the *Pennsylvania Bulletin*.

tin and enforcement of this Order of Quarantine with regard to that place or area shall become effective immediately upon such publication in the *Pennsylvania Bulletin*.

1. *Establishment of Quarantine.*

A quarantine is hereby established with respect to District Township and Pike Township in Berks County and any other area or place delineated in an addendum to this Order of Quarantine as set forth in Paragraphs E. and F. of the "Recitals" to this Order of Quarantine.

2. *Regulated Articles and Limitations Imposed.* The plant pest established by this Order of Quarantine—Spotted lanternfly, *Lycorma delicatula*—along with any material or object that may carry or spread the plant pest (the plant pest and its eggs and nymphs can exist on and be spread through conveyance of any object with a flat surface) such as the following objects or materials, are considered regulated articles under this Order of Quarantine and may not be moved out of the quarantined area, unless done in accordance with Paragraph 3 of this Order of Quarantine:

- Any living life stage of the Spotted lanternfly, *Lycorma delicatula*.
- Brush, debris, bark, or yard waste.
- Landscaping, remodeling or construction waste

- Logs, stumps or any tree parts
- Firewood of any species.
- Packing materials, such as wood crates or boxes.
- All plants and plant parts. This shall include, but is not limited to, all live, dead, infected or non-infected trees, nursery stock, budwood, scionwood, green lumber, firewood, perennial plants, garden plants and produce and other material living, dead, cut, fallen including stumps, roots, branches, mulch, and composted and uncomposted chips.
- Outdoor household articles including recreational vehicles, lawn tractors and mowers, mower decks, grills, grill and furniture covers, tarps, mobile homes, tile, stone, deck boards, mobile fire pits, any associated equipment and trucks or vehicles not stored indoors.
- Grapevines for decorative purposes or as nursery stock.
- Any other article or means of conveyance when it is determined by an inspector to present a risk of spread of Spotted lanternfly, *Lycorma delicatula* in any life stage and is in proximity to such articles and the articles presenting a high risk of artificial spread and the person in possession thereof has been notified.

3. *Movement of regulated articles from quarantined areas.* A regulated article, delineated in Paragraph 2 of this Order of Quarantine, may be moved from a quarantined area only under the following circumstances:

a. With a valid certificate or limited permit attached and issued in accordance with the provisions of Paragraph 4 or Paragraph 6 of this Order of Quarantine. The valid certificate or limited permit shall be attached to the regulated article(s) as set forth in Paragraph 5 of this Order of Quarantine.

b. Without a certificate or limited permit attached and issued in accordance with the provisions of Paragraph 4 of this Order of Quarantine if the regulated article originates outside the quarantined area and is moved intrastate through the quarantined area under the following conditions:

i. The points of origin and destination are indicated on a waybill accompanying the regulated article; and

ii. The regulated article, if moved into the quarantined area during the period of April through December and is moved in an enclosed vehicle or is completely covered, such as by a tarp or full shrink wrapping, to prevent exposure to Spotted lanternfly, *Lycorma delicatula* or access to the regulated article by any of the plant pest established in this Order of Quarantine and the tarp or shrink wrapping is destroyed by burning prior to leaving the quarantined area or is left behind in the quarantined area; and

iii. The regulated article is moved directly through the quarantined area without stopping (except for refueling or for traffic conditions, such as traffic lights or stop signs), or has been stored, packed or handled at locations approved by the Department inspector as not posing a risk of infestation by or exposure to Spotted lanternfly, *Lycorma delicatula*; and

iv. No common carrier or other person may move intrastate from any generally infested area any regulated article or outdoor household articles as defined; and

v. The article has not been combined or commingled with other articles so as to lose its individual identity.

4. *Obtaining a Certificate or Limited Permit from the Department for Movement of Articles.* The Department or

a person operating under a compliance agreement, as set forth in Paragraph 6 of this Order of Quarantine, may issue a certificate or stamp authorizing the movement of a regulated article, delineated in Paragraph 2 of this Order of Quarantine, if it is satisfied that all of the following criteria are accurate and will be met:

a. The regulated article is to be moved in compliance with the provisions of this Order of Quarantine and any additional emergency conditions that the Department may impose under the Plant Pest Act in order to prevent the artificial spread of Spotted lanternfly, *Lycorma delicatula*; and

b. The regulated article is either of the following:

i. The regulated article is determined to be free of Spotted lanternfly, *Lycorma delicatula*, based on inspection; or the regulated article has been grown, produced, manufactured, stored or safeguarded during the months of April–December in a manner that, in the judgment of the Department, prevents the regulated article from presenting a risk of spreading Spotted lanternfly, *Lycorma delicatula*; or

ii. The regulated article is to be moved to a specified destination for specific processing, handling or utilization (the destination and other conditions to be listed on the advance written permission), and the Department has determined this movement will not result in the spread of Spotted lanternfly, *Lycorma delicatula* because the plant pests will have been destroyed by the specific processing, handling or utilization process undertaken and completed prior to movement of the regulated article.

5. *Documentation to Accompany Regulated Articles in Movement from a Quarantined Area.* If a regulated article(s), delineated in Paragraph 2 of this Order of Quarantine, is to be moved from a quarantined area, the regulated article(s) shall be plainly marked with the name and address of the consignor and any person utilized in processing the regulated article for movement and the name and address of the consignee and must have a copy of the applicable Department-issued or Department-authorized (by compliance agreement as described in Paragraph 6 of this Order of Quarantine) certificate or limited permit securely attached to each regulated article itself or the container carrying each regulated article and such certificate or limited permit shall be attached to the consignee's copy of the accompanying waybill at all times during movement. The description of the regulated article(s) on the certificate or limited permit, and on the waybill, shall be sufficient to identify each regulated article. The consignor shall be responsible for compliance with such documentation standards and shall assure the carrier furnishes the certificate or limited permit authorizing the movement of the regulated article to the consignee at the destination of the shipment. The consignor, carrier and the consignee shall keep a copy of the certificate or limited permit. All such records shall be maintained by the consignee, consignor and carrier for a period of 2 years. Such records shall be made available to the Department for inspection upon request.

6. *Compliance Agreements.* The Department will consider entering into a compliance agreement with any person that demonstrates an understanding of the requirements of this Order of Quarantine and satisfies the Department that said person is capable of issuing certificates or limited permits in accordance with the requirements of this Order of Quarantine. The Department shall either provide blank certificates and limited permits to a person operating under a compliance agreement or authorize reproduction of the certificates or limited permits

on shipping containers, or both, as determined by the Department at its sole discretion. These certificates and limited permits may then be completed and used, as needed, for the movement of regulated articles that have met all of the requirements of Paragraph 4 of this Order of Quarantine. Originals of each certificate or limited permit issued by a person operating under a compliance agreement shall be kept by said person for a period of 2 years and shall be made available to the Department upon request.

7. *Cancellation of a Certificate, Limited Permit or Compliance Agreement.* Any certificate, stamp or limited permit or any Compliance Agreement may be canceled orally or in writing by the Department whenever the Department determines that the holder of the certificate or limited permit or the Compliance Agreement has not complied with a provision of the Act, regulations or this Order of Quarantine. If the cancellation is oral, the cancellation will become effective immediately, and the cancellation and the reasons for the cancellation will be confirmed in writing as soon as circumstances permit.

8. *Federal Requirements for Interstate Movement of Articles.* This Order of Quarantine is distinct from, and in addition to, any Federal statute, regulation or quarantine order addressing the movement of articles from the quarantined area or this Commonwealth.

9. *Contacting the Department.* A person seeking information about the requirements of this Order of Quarantine, or a limited permit or certificate for movement of a regulated article(s), or a compliance agreement for intrastate movement of a regulated article(s), shall contact the Department at: Pennsylvania Department of Agriculture, Bureau of Plant Industry, Attention: Dana Rhodes, 2301 North Cameron Street, Harrisburg, PA 17110-9408, (717) 772-5205, danrhodes@pa.gov.

11. *Criminal and Civil Penalties.* In accordance with the provisions of the Act, at sections 258.23 and 258.24 (act of December 16, 1992, P. L. 1228, No. 162, §§ 258.23 and 258.24) (3 P. S. §§ 258.23 and 258.24), a person who violates this Order of Quarantine may face summary criminal prosecution carrying up to 90 days imprisonment and a fine of up to \$300 with respect to each violation. In addition, a person who violates this Order of Quarantine may be assessed a civil penalty of up to \$20,000 with respect to each violation.

12. *Cooperation with other agencies.* As authorized by section 258.26 of the Act (act of December 16, 1992, P. L. 1228, No. 162, § 258.26) (3 P. S. § 258.26), the Department will consult with other State agencies, Federal agencies, Pennsylvania State University and the Pennsylvania State University Cooperative Extension with respect to the most efficacious measures to survey for and detect Spotted lanternfly, *Lycorma delicatula* to slow the spread or eradicate these plant pests.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment

noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit

number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P. S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

36-05106B: Premier Custom Built, Inc. (110 Short Street, New Holland, PA 17557) for the installation of three (3) spray booths at their cabinet manufacturing facility in East Earl Township, **Lancaster County**. Plan Approval No. 36-05106B is for installation of three (3) spray booths. Two (2) booths will be Global Finishing Solutions model IDBG-1275-S open-face spray booths. Each booth will have an airflow of 10,500 scfm and will be controlled by dry panel filters. The pressure drop across each booth will be measured through the use of a manometer weekly. Additionally, each booth will be equipped with a 1.021 mmBtu/hr direct fired gas heated make-up air unit. The make-up units will be fired on natural gas. The third booth will be a 7,950 scfm Stiles Maker Q-One Reciprocating Spraying Machine. The enclosed machine will be equipped with 4 automatic spray guns and have an operating speed of 8-16 feet per minute. Coatings will be applied using HVLP guns that will ensure high transfer efficiency. Projected actual emissions from this project are estimated to be 8.98 tpy VOC, 1.69 tpy of a single HAP (toluene), 2.94 tpy combined HAPs. Potential emissions from the facility will not change since the facility is currently limited to 50 tpy VOC, 10 tpy of a single hazardous air pollutant (HAP) and 25 tpy of combined HAPs. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contami-

nants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1, 127.12, 129.52 and 129.101—129.107. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an operating permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

42-158Q: Georgia Pacific—Mt Jewett Facility (149 Temple Drive, Kane, PA 16735), for the renewal of the NO_x Plantwide Applicability Limit (PAL) in Sergeant Township, **McKean County**. This is a Title V facility. The public notice is required for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44. This plan approval will, in accordance with 25 Pa. Code § 127.450 or § 127.505, be incorporated into the facility operating permit at a later date.

Plan approval No 42-158Q is for the proposed renewal of the NO_x Plantwide Applicability Limit (PAL). This project will result in the renewal of the NO_x PAL of 171.14 tpy. This Plan Approval will contain emission restriction, testing, recordkeeping, work practice standard and additional requirement conditions, which will satisfy the requirements of 25 Pa. Code § 127.12b (pertaining to plan approval terms and conditions) and will demonstrate Best Available Technology (BAT) for the source including, but are not limited to, the following:

- The PAL as established for NO_x emissions from all affected sources at the facility is 171.14 TPY calculated as a 12-month rolling total.
- The owner or operator of the facility shall perform NO_x emissions tests within 6 months of issuance of the revised PAL permit and every three years thereafter for the MDF Fiber Dryer RTO exhaust and the MDF Press / Unloader TCO exhaust to determine a site-specific emission factor.
- The facility shall convert the monitoring system data to monthly emissions and annual emissions based on a 12-month rolling total for each month.
- The owner or operator shall monitor all emissions units in accordance with the provisions under 25 Pa. Code § 127.218(m) and 40 CFR 52.21(aa)(12).
- The PAL monitoring system must employ one or more of the four general monitoring approaches meeting the minimum requirements set forth in 25 Pa. Code § 127.218(m)(5) and 40 CFR 52.21(aa)(12)(ii)(a) through (d) and must be approved.
 - Mass balance calculations for activities using coatings or solvents
 - CEMS
 - CPMS or PEMS
 - Emission factors
- The monitoring approach selected by the company and approved by the Department is emission factors. When using the emission factors for monitoring the

following will be the order of which emission factors will be used, if one of these factors is not available the next factors will be used:

- Current emission testing emission factors;
- Existing emission factors used in Plan Approval 42-158H issued by the Department on June 9, 2003;
- NCASI emission factors;
- AP-42
- Emission factors. An owner or operator using emission factors to monitor PAL pollutant emissions shall meet the following requirements:
 - All emission factors shall be adjusted, if appropriate, to account for the degree of uncertainty or limitations in the factors' development;
 - The emissions unit shall operate within the designated range of use for the emission factor, if applicable; and
 - If technically practicable, the owner or operator of a significant emissions unit that relies on an emission factor to calculate PAL pollutant emissions shall conduct validation testing to determine a site-specific emission factor within 6 months of PAL permit issuance, unless the Administrator determines that testing is not required.
 - Re-validation. All data used to establish the PAL pollutant must be re-validated through performance testing or other scientifically valid means approved in writing by the Administrator. Such testing must occur at least once every 5 years after issuance of the PAL permit.
 - The owner or operator shall retain the records required under 25 Pa. Code § 127.218(n) and 40 CFR 52.21(aa)(13). Such records may be retained in an electronic format and be retrievable onsite.
 - The owner or operator of the facility shall retain a copy of the records necessary to determine compliance with any requirement of 25 Pa. Code § 127.218 and 40 CFR 52.21(aa), including a determination of the 12-month rolling total emissions for each emission unit, for 5 years from the date of such record.
 - The company shall maintain an emission tracking system to document compliance with the NO_x PAL for the facility. The tracking system shall record on a monthly basis from all the sources at the facility:
 - Fuel usage
 - Production rates
 - NO_x Emission rates
 - Total NO_x monthly emissions
 - The owner or operator shall submit the reports required under 25 Pa. Code § 127.218(o) and 40 CFR 52.21(aa)(14) by the required deadlines.
 - The owner or operator shall submit semi-annual monitoring reports and prompt deviation reports in accordance with the Title V operating permit requirements of Subchapters F and G (relating to operating permit requirements; and Title V operating permits).
 - The company shall submit semi-annual reports to the Department within 30 days of the end of each reporting period. The semi-annual report shall contain the following information:
 - The identification of owner and operator and the permit number.

- Total annual emissions (expressed on a mass-basis in tons/year) based on a 12-month rolling total for each month in the reporting period recorded pursuant to 25 Pa. Code § 127.218(n)(1) and 40 CFR 52.21(aa)(13)(i).

- All data relied upon, including, but not limited to, any Quality Assurance or Quality Control data in calculating the monthly and annual PAL pollutant emissions.

- A list of any emissions units modified or added to the major stationary source during the preceding 6-month period.

- The number, duration and cause of any deviations or monitoring malfunctions (other than the time associated with zero and span calibration checks) and the corrective action taken.

- A notification of a shutdown of any monitoring system, whether the shutdown was permanent or temporary, the reason for the shutdown, the anticipated date that the monitoring system will be fully operational or replaced with another monitoring system, and whether the emissions unit monitored by the monitoring system continued to operate, and the calculation of the emissions of the pollutant or the number determined by the method included in the permit under 25 Pa. Code § 127.218(m)(10) and 40 CFR 52.21(aa)(12)(vii).

- A signed statement by the responsible official (as defined by the applicable Title V operating permit) certifying the truth, accuracy and completeness of the information provided in the report.

- The owner or operator shall promptly submit reports of deviations or exceedance of the PAL requirements, including periods where no monitoring is available. A report submitted under Subchapter G and 40 CFR 70.6(a)(3)(iii)(B) satisfies this reporting requirement. The report shall contain the following information:

- The identification of owner or operator and the permit number.

- The PAL requirement that experienced the deviation or that was exceeded.

- Emissions resulting from the deviation or the exceedance.

- A signed statement by the responsible official (as defined by the applicable Title V operating permit) certifying the truth, accuracy and completeness of the information provided in the report.

- The owner or operator shall submit the results of any revalidation test or method within 3 months after completion of the test or method.

- The company shall perform an annual adjustment and/or tune-up on the combustion sources as per manufacturer specifications.

- All conditions from the facility operating permit revised on October 24, 2013, remain in effect unless modified in this plan approval.

- The PAL is effective from the date of issuance of this plan approval and expires after 10 years from the date of issuance of this approval.

- The owner or operator shall submit a timely application to request renewal of a PAL permit. A timely application is one that is submitted at least 6 month prior to, but not earlier than 18 months prior to the date of permit expiration. If the owner or operator submits a complete application to renew the PAL permit within this time period, the PAL continues to be effective until the revised permit with the renewed PAL is issued. The

renewal application shall be submitted in accordance with the requirement of 25 Pa. Code § 127.218(k) and 40 CFR 52.21(aa)(10).

- The company shall show that the sum of the monthly emissions from each source including emissions from start-ups, shutdowns, and malfunctions under the PAL for the previous 12 consecutive months is less than or equal to the PAL (a 12-month total, rolled monthly). To determine the compliance with the PAL, the calculated pollutants emissions for the month shall be added to the previous 11 months calculated pollutant emissions for the total facility.

- A PAL permit that is not renewed in accordance with the requirements in 25 Pa. Code § 127.218(k) & 40 CFR 52.21(aa)(10) shall expire at the end of the PAL effective period and is subject to 25 Pa. Code § 127.218(j) and 40 CFR 52.21(aa)(9).

- The emissions from a new source that requires a plan approval shall be the minimum attainable through the use of BAT. A physical change or change in method of operation at an existing emissions unit will not be subject to BAT requirements unless the emissions unit is modified so that the fixed capital cost of new components exceeds 50% of the fixed capital cost that would be required to construct a comparable entirely new emissions unit.

- At no time (during or after the PAL effective period) are emissions reductions of a PAL pollutant, which occur during the PAL effective period, creditable as decreases for purposes of offsets under Subchapter E and 40 CFR 51.165(a)(3)(ii) unless the level of the PAL is reduced by the amount of emissions reductions and the reductions would be creditable in the absence of the PAL.

- The following requirements apply to reopening of the PAL permit:

- During the effective period, the Department will reopen the PAL permit to:

- Correct typographical/calculation errors made in setting the PAL or reflect a more accurate determination of emissions used to establish the PAL.

- Reduce the PAL if the owner or operator of the major stationary source creates creditable emissions reductions for use as offsets.

- Revise the PAL to reflect an increase in the PAL as provided in 25 Pa. Code § 127.218(l) and 40 CFR 52.21(aa)(11).

- The Department may reopen the permit to:

- Reduce the PAL to reflect newly applicable Federal requirements with compliance dates after the PAL effective date.

- Reduce the PAL consistent with any other requirement that is enforceable as a practical matter and that the Department may impose on the major stationary source.

- Reduce the PAL if the Department determines that a reduction is necessary to avoid causing or contributing to a NAAQS or PSD increment violation, or to an adverse impact on an air quality related value that has been identified for a Federal Class I area by a Federal Land Manager and for which information is available to the general public.

- Except for the permit reopening for the correction of typographical/calculation errors that do not increase the PAL level, other reopening shall be carried out in

accordance with the public participation requirements [25 Pa. Code § 127.218(e) & 40 CFR 52.21(aa)(5)].

- To increase the PAL during the effective period, the owner or operator shall submit a complete application to request an increase in the PAL limit for a PAL major modification.

- The NSR requirements in 25 Pa. Code Chapter 127, Subchapter E do not apply to an owner or operator at which a physical change or change in the method of operation still maintains its total facility-wide emissions below the PAL, meets the requirements in 25 Pa. Code § 127.218 (relating to PALs) and complies with the PAL permit. Any increase in NO_x emissions above this PAL will subject the facility to the major NSR requirements.

- The PSD requirements in 25 Pa. Code Chapter 127, Subchapter D do not apply to any major stationary source for a PAL for a regulated NSR pollutant, as long as the major stationary source complies with the requirements under 40 CFR 52.21(aa). Any increase in NO_x emissions above this PAL will subject the facility to the PSD requirements.

(855 Pennsylvania Blvd., Feasterville, PA 19053) located in Lower Southampton Township, **Bucks County**, for a renewal of State Only (Synthetic Minor) Operating Permit No. 09-00165. The main source of air contaminant emissions at the facility is a batch vapor degreaser. The degreaser uses trichloroethylene (TCE), a hazardous air pollutant (HAP), as the cleaning solvent. While TCE emissions from the degreaser are restricted to 9.5 tons/yr, the average annual TCE emissions from the degreaser over the previous five calendar years (i.e., 2009-2013) have been 0.86 ton/yr.

Since the State Only Operating Permit (SOOP) was renewed in 2009, no physical changes have occurred at the facility. The degreaser continues to be subject to the Maximum Achievable Control Technology (MACT) standard for halogenated solvent cleaning [40 C.F.R. Part 63, Subpart T].

The renewal SOOP will continue to include monitoring, recordkeeping, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapter 77 are as follows:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	35 mg/l	70 mg/l	90 mg/l
Alkalinity exceeding acidity*			
pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

SR 1033 Section 002 Bridge Replacement in Fishing Creek Township, **Columbia County**, ACOE Baltimore District (Stillwater, PA Quad-range; Latitude: 41°08'57"; Longitude -76°17'37").

PA DOT Engineering District 3-0 proposes to replace a single span masonry arch culvert with a single cell precast concrete box culvert. The existing bridge has a

span of 18.6 Ft., a skew of 86 degrees, an underclearance of 8.3 Ft., a low chord of 729.17 Ft. and a hydraulic opening of 153.7 Ft². The proposed box culvert has a span of 22 Ft., a skew of 79 degrees, an underclearance of 7.5 Ft., a low chord of 726.17 Ft. and a hydraulic opening of 165 Ft². The proposed box culvert will be widened approximately 15 Ft on one side, which dis-qualifies the project for a general permit. R-8 Rip Rap will be used to correct a scour hole, which is located within the proposed culvert footprint. The project will not impact any jurisdictional wetlands. The Little Pine Creek is classified as a Cold Water Fishery by Title 25, Chapter 93 Water Quality Standards. This project will not require mitigation.

Enhancement activities include invasive plant species control and vegetative plantings. The project may provide compensatory mitigation credits within the PA State Water Plan Sub-basin 16 through existing permit MB9915-0001.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P. S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the

appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

EA 49-002. Nottingham Village Retirement Center Associates, LP, 58 Neitz Road, Northumberland, PA 17857-9608. Stream Restoration in Point Township; ACOE Baltimore District.

The project proposes to restore approximately 200 linear feet of first order stream channel. The project will consist of the reestablishment of a natural meander pattern and profile of the Unnamed Tributary to the Susquehanna River, which is designated as a cold water fishery. This work shall remove the existing channel from the previously constructed storm water pond and reestablish the aquatic habitat and flow regime of the natural channel. Associated with this work will be several new meanders, toe protection and a reestablished off stream storm water containment pond. Water quality improvements shall be noted by eliminating stream disturbances associated with future storm water basin maintenance, increases water quality during facility expansions since an "off-stream" storm water basin can be utilized as a sediment basin during construction to control sediment laden water from entering the stream, maintaining hydraulic and hydrologic conditions upslope of the existing seep to ensure there are no secondary impacts to existing wetlands and streams and reduced erosion (head-cutting) in the existing stream channel by diverting existing facility storm water flows into new water quality management facilities. Increased stream channel stabilization by construction of a longer and meandering stream channel will reduce channel slope and be resilient to scour. Bio-retention facilities proposed along the upslope side of the proposed retention basin will promote overall water quality and recharge for the development. The tiered orientation will also help to sustain a permanent pool within the new retention basin. This project is located 1800 feet East on Leeds Drive from the intersection with Strawbridge Road.

The Clean Streams Law; Public Notice of Proposed Consent Order and Agreement

Steele Shaft Treatment Facility; Treatment of Abandoned Mine Drainage to Dunkard Creek Dunkard Township, Greene County

The Department of Environmental Protection (“Depart-
 ment”), under the authority of the Clean Streams Law, 35
 P. S. §§ 691.1—691.1001, (“CSL”) and other environmen-
 tal statutes, has entered into a proposed Consent Order
 and Agreement (“CO&A”) with Dana Mining Company of
 Pennsylvania, LLC (“Dana”) and AMD Reclamation, Inc.
 (“AMDRI”) to collect and treat acid mine drainage
 (“AMD”) discharges from abandoned underground coal
 mines in the Dunkard Creek watershed. In the CO&A,
 Dana and AMDRI propose to mitigate AMD discharging
 to Dunkard Creek not caused by Dana or AMDRI.

Dunkard Creek is a 36 mile stream that runs through parts of Pennsylvania and West Virginia. The lower 6.2 miles of Dunkard Creek located above the confluence with the Monongahela River have been degraded by mine drainage from abandoned coal mines. These abandoned mines include the Shannopin Mine and the Maiden Mine. Pursuant to a Consent Order and Agreement that DEP entered in 2003 ("2003 COA") with AMDRI and Dana's predecessor, the Steele Shaft treatment facility was constructed to prevent an uncontrolled and imminent discharge of AMD from the Shannopin Mine pool into Dunkard Creek at a location near Bobtown, Pennsylvania and to enable Dana to continue to mine. Under the proposed CO&A, AMDRI and Dana will continue to collect and treat the Shannopin Mine pool at the Steele Shaft treatment facility. In addition, AMDRI and Dana will also capture and collect four (4) additional discharges from the Maiden Mine pool pursuant to the Dunkard Creek Watershed Management Plan ("DCWMP"). Treatment of the AMD under the DCWMP is expected to reduce the iron load into Dunkard Creek by more than 99% (a reduction of 6,618,503 lbs./year), the manganese load by approximately 78% (a reduction of 77,591 lbs./year), and the aluminum load by more than 90% (65,647 lbs./year). Neither Dana nor AMDRI at any time owned or operated the Shannopin Mine, the Maiden Mine or any other abandoned mine in this area. There is no existing person or entity responsible for treating the discharges from the Shannopin Mine Pool or the Maiden Mine Pool, which the Department considers abandoned discharges of AMD.

Dana is a Delaware limited liability company with a business address of 308 Dents Run Road, Morgantown, West Virginia. AMDRI is a Pennsylvania non-profit corporation with a business address of 308 Dents Run Road, Morgantown, West Virginia. Dana is in the business of mining coal in Pennsylvania by surface and underground mining methods. Since 2005, Dana has operated an underground mine in Dunkard and Greene Townships, Greene County, Pennsylvania known as the 4 West Mine. Dana mines the Sewickley coal seam at the 4 West Mine which overlies the abandoned Shannopin Mine. In order to safely operate the 4 West Mine, Dana must dewater the Shannopin mine pool. Pursuant to the 2003 COA, Dana and AMDRI constructed the Steele Shaft treatment facility pursuant to an NPDES permit that contained Best Available Technology ("BAT") limits for pH, iron, manganese and aluminum, but did not contain effluent limits for osmotic pressure, sulfates or total dissolved solids. Subsequent to 2003, watershed changes occurred that prompted the Department to re-evaluate the effluent limits for the Steele Shaft treatment facility and propose water quality based effluent limits ("WQBELs"). Achieving compliance with the proposed WQBELs was not contemplated under the 2003 COA, and Dana has told the Department that treatment of AMD from the abandoned mines in compliance with the WQBELs would require advanced treatment technology with capital and operation costs magnitudes higher than conventional AMD treatment. As an alternative to immediate compliance with the proposed WQBELs, Dana and AMDRI proposed the DCWMP which focuses on treating known abandoned discharges of AMD having a significant impact on aquatic life of Dunkard Creek.

The DCWMP will be implemented in three (3) phases of construction. The first phase will involve reclamation of a mine opening and sinkhole into the Maiden Mine and restoration of an unnamed tributary to Dunkard Creek. The second phase will involve the construction of a

collection system, pipeline and borehole to collect and substantially reduce or eliminate two (2) discharges from the Maiden Mine known as Discharges 2A and 2B. The third phase will involve the construction of a pumping system to collect and substantially reduce or eliminate two (2) additional discharges from the Maiden Mine known as Discharges 7A and 7B. The Department has reviewed the DCWMP and has concluded that the elimination of Discharges 2A, 2B, 7A and 7B to BAT limits would provide sufficient water quality benefits to justify the delay in immediate compliance with the WQBELs for 108 months.

Under the terms of the proposed CO&A, Dana and AMDRI have also agreed to establish a trust fund for the long term operation and maintenance of the Steele Shaft treatment facility by paying \$300,000 annually for 20 years. In addition, in the event that Dana and AMDRI decide to discontinue operation of the Steele Shaft treatment facility, Dana and AMDRI have agreed to transfer the facility to the Commonwealth of Pennsylvania or its designee for one dollar (\$1.00). AMDRI and Dana have calculated the current value of the Steele Shaft treatment facility, along with property rights necessary to operate and maintain it, as \$19,395,461.

The Department is publishing notice of the proposed CO&A and will provide a 30-day period for public comment on the CO&A beginning with the date of this publication. Notice will be published at the same time that the Department provides public notice of the issuance of the proposed NPDES permit for the Steele Shaft treatment facility. Copies of the CO&A can be reviewed or obtained by contacting Joel Koricich, District Mining Manager, California District Office, 25 Technology Drive, Coal Center, PA 15423. Phone: 724.769.1100, Fax: 724.769.1102; jkoricich@pa.gov Persons may submit comments on the proposed CO&A during the 30-day public comment period only. Comments can be sent to Mr. Koricich at the address noted or may be delivered to him in person at the Department's California District Mining Office.

The Department has reserved the right to withdraw its consent to the CO&A if comments submitted during the 30-day public comment period disclose facts or considerations which indicate, in the Department's judgment, that the CO&A is impracticable or not in the public interest. Dana and AMDRI have also reserved the right to withdraw their consent to this CO&A in response to public comments.

Proposed Request for Delegation of Authority to Implement the Federal Hospital/Medical/Infectious Waste Incinerators Plan; Public Comment Period and Public Hearing

The Department of Environmental Protection (Department) is requesting delegation of authority to implement the Federal Hospital/Medical/Infectious Waste Incinerators (HMIWI) Plan. Section 129 of the Clean Air Act (CAA) (42 U.S.C.A. § 7429) required the United States Environmental Protection Agency (EPA) to establish performance standards for HMIWI under section 111 of the CAA (42 U.S.C.A. § 7411). On September 15, 1997, the EPA promulgated New Source Performance Standards (NSPS) for “new” HMIWI units and Emission Guidelines (EG) for “existing” HMIWI units and updated the standards on October 6, 2009, and April 4, 2011. Under section 129 of the CAA, states must submit to the EPA a plan to implement and enforce the requirements of the EGs. EGs, promulgated under section 111(d) of the CAA, establish criteria for state and local agencies to develop control strategies for “existing” HMIWI units.

Subpart HHH of 40 CFR Part 62 (relating to Federal plan requirements for hospital/medical/infectious waste incinerators constructed on or before December 1, 2008) was promulgated at 78 FR 28066 (May 13, 2013). The Department is proposing to request delegation of authority to implement the HMIWI Federal Plan.

Copies of the Delegation Request may be examined on the Department web site at www.dep.state.pa.us (click “Air”).

The Department is seeking comments on the request for delegation of the Federal HMIWI Plan and will hold a public hearing on Wednesday, November 12, 2014, at 10 a.m. in the Rachel Carson State Office Building, 12th Floor Conference Room, 400 Market Street, Harrisburg, PA 17105-2301.

Persons wishing to present testimony should contact Maisha Webb at P. O. Box 8468, Harrisburg, PA 17105, (717) 787-9702, maiwwebb@pa.gov no less than 24 hours in

advance of the public hearing to reserve a time. Speakers will be limited to 10 minutes and should bring a written copy of their comments.

Written comments may be submitted to the Department no later than December 15, 2014, and should be sent to the attention of Craig Evans, Department of Environmental Protection, P. O. Box 8468, Harrisburg, PA 17105-8468, craevans@pa.gov.

Persons with a disability who wish to attend the hearing and require an auxiliary aid, service or other accommodation to participate in the proceeding should contact Maisha Webb at (717) 787-9702, maiwwebb@pa.gov. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

OFFICE OF THE BUDGET

Uniform Method for Determining Net Losses and Gains from Divestitures Required by the Act of July 2, 2010 (P. L. 266, No. 44) for the Period July 1, 2013, through June 30, 2014

Section 9(2) of the Protecting Pennsylvania's Investment Act of July 2, 2010 (P. L. 266, No. 44) (Act 44 of 2010), 72 P.S. § 3837.9(2), requires the Secretary of the Budget to annually establish, in consultation with each of the public funds that are subject to Act 44 of 2010 (State Employees' Retirement Fund; Public School Employees' Retirement Fund; Pennsylvania Municipal Retirement Fund; any fund of which the State Treasurer is the custodian), a uniform method for determining each fund's net gains, net losses, costs and expenses when the funds sell, redeem, divest or withdraw from the funds' direct holdings in the securities of companies that are on the Scrutinized Companies with Activities in Iran List, or on the Scrutinized Companies with Activities in Sudan List.

Each fund subject to Act 44 of 2010 shall calculate its itemized budget request for reimbursement for the period July 1, 2013, through June 30, 2014, as follows:

- Each fund's actual realized net gain or net loss during the reporting period from any sale, redemption, divestiture or withdrawal of each of the fund's direct holdings in the securities of companies that are on the Scrutinized Companies with Activities in Iran List or are on the Scrutinized Companies with Activities in Sudan List, or both, during the 26-month divestiture period mandated by Section 4(c) of Act 44 of 2010 shall be calculated for each trade of such a company's securities by subtracting the fund's actual cost basis in the security from the price at which the fund sold, redeemed, divested or withdrew from the security. The net gain or net loss of each trade shall be reported in chronological order from oldest to most recent trade on the form marked Attachment 1, "Actual Amount Realized on the Sale of Securities." The funds shall report the trades of each company

in United States dollars, and shall group together each company's trades in alphabetical order.

In the event that a trade was not conducted in United States dollars and that the fund has not previously converted that trade into United States dollars, the fund must convert the amount of the trade from the currency in which the trade took place into United States dollars on the date of the trade. The fund shall first convert its actual costs basis in the security on the date(s) of purchase into United States dollars, shall next convert the price received on the date of sale into United States dollars and shall then compute in United States dollars the net gain or net loss on the sale in the manner set out previously.

If the securities of a company sold on a given date were acquired or purchased by the fund on different dates with different acquisition or purchase prices, the fund may average the original acquisition or purchase prices of that company's security sold on that given date, and then use that average as the fund's actual cost basis in the security to determine its net gain or net loss resulting from the trade of that security.

- Each fund shall report on a form marked Attachment 2, "Actual Expenses Incurred Related to the Administration of Act 44," the personnel costs the fund directly incurred by each employee that performed duties and responsibilities connected to Act 44 of 2010 for the fund. The fund may report each employee's personnel cost (including paid benefits) either as a percentage of the gross salary paid to the employee, or by multiplying the number of hours or parts of hours that the employee worked to further the fund's duties and responsibilities under Act 44 of 2010 by the employee's hourly rate of pay.

- Each fund may report on a form marked Attachment 2, "Actual Expenses Incurred Related to the Administration of Act 44," the cost of postage, office supplies and other similar office administration costs incurred by the fund to carry out its duties and responsibilities under Act 44 of 2010.

- Each fund shall report on a form marked Attachment 2, "Actual Expenses Incurred Related to the Administration of Act 44," the amounts paid by the fund for software and software licenses, and to consultants and other third parties retained by the fund, to assist the fund in complying with Act 44 of 2010, including costs paid to: identify companies that must be placed on the Scrutinized Companies with Activities in Iran List or on the Scrutinized Companies with Activities in Sudan List; monitor the business activities of companies on the Scrutinized Companies with Activities in Iran List or on the Scrutinized Companies with Activities in Sudan List; and determine when a company must be removed from the Scrutinized Companies with Activities in Iran List or the Scrutinized Companies with Activities in Sudan List. The fund shall report the name of the software company or licensor, or consultant or other third party, and shall report the amount paid to the company, licensor or third party during the reporting period per invoice issued by the company, licensor or third party to the fund. In the event that payments were not made to a consultant, licensor or third party in United States dollars and that the fund has not previously converted those payments into United States dollars, the fund must convert the amount of each payment from the currency in which the trade took place into United States dollars on the date of each payment.

Each fund shall submit its itemized budget request (including completed Attachments 1 and 2) for reimburse-
