READER'S GUIDE TO THE *PENNSYLVANIA BULLETIN* AND THE *PENNSYLVANIA CODE*

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give the history of regulations. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised. A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

RULES AND REGULATIONS

Title 49—PROFESSIONAL AND VOCATIONAL STANDARDS

STATE BOARD OF NURSING

[49 PA. CODE CH. 21]

Continuing Education; Reporting of Crimes and Discipline

The State Board of Nursing (Board) amends §§ 21.29, 21.131—21.134, 21.156, 21.332 and 21.723 and adds §§ 21.29a, 21.156b and 21.723a (relating to reporting of crimes and disciplinary action) to read as set forth in Annex A.

Effective Date

The final-form rulemaking will be effective upon publication in the *Pennsylvania Bulletin*.

Statutory Authority

The amendments regarding registered nurses and licensed dietitian-nutritionists are authorized under sections 2.1(k) and 12.1(a) of The Professional Nursing Law (RN Act) (63 P.S. §§ 212.1(k) and 222(a)) which provide the general authority to the Board to establish rules and regulations for the practice of professional nursing, the practice of dietetics-nutrition, the administration of the RN Act and requirements of continuing nursing education for registered nurses. The amendments regarding practical nurses are authorized under section 17.6 of the Practical Nurse Law (PN Law) (63 P.S. § 667.6) which authorizes the Board to establish rules and regulations for the practice of practical nursing and the administration of the PN Law.

Background and Purpose

This final-form rulemaking accomplishes two goals: (1) amends current continuing education regulations for registered nurses; and (2) requires licensees to report criminal and disciplinary actions sooner than currently required. The Board published continuing education regulations implementing section 12.1 of the RN Act at 38 Pa.B. 3796 (July 12, 2008). To ease implementation, the Board provided registered nurses with a grace period of 6 months to cure deficiencies. Now that licensees have had an opportunity to obtain the continuing education and seek renewal, this grace period is no longer warranted and, in its place, the Board is implementing a procedure for continuing education compliance identical to that applied by the other licensing boards within the Bureau of Professional and Occupational Affairs. Additionally, the final-form rulemaking provides the Board with the flexibility to require licensees to complete continuing education on a specific topic as the necessity arises. This is particularly important when there are advances or changes in practice that affect the entire profession or significant modifications to the Board's regulations.

Regarding the reporting of criminal and disciplinary actions, § 21.29(c)(4) (relating to expiration and renewal of license) requires registered nurses to report these actions on their biennial renewal. Similarly, § 21.723 (relating to license renewal) requires licensed dietitian-nutritionists to report criminal and disciplinary actions at

biennial renewal. Conversely, § 21.156 (relating to renewal of license), which applies to practical nurses, formerly did not require reporting of criminal and disciplinary actions at all. In many circumstances, especially in cases when licensees enter into an Accelerated Rehabilitation Disposition (ARD) Program, licensees avoid notifying the Board of the criminal action because the matter has been expunged by the time of renewal. The Board is authorized to discipline licensees who receive ARD, disposition instead of trial or probation without verdict in the disposition of felony charges. In addition, licensees who receive ARD or other pretrial disposition of DUIs and other drug offenses may suffer from mental or physical illnesses or conditions or physiological or psychological dependence on alcohol, hallucinogenic or narcotic drugs, or other drugs which tend to impair judgment or coordination, authorizing the Board to require mental and physical examinations under section 14(a)(2) and (2.1) of the RN Act (63 P.S. § 224(a)(2) and (2.1)) or section 16(a)(6) of the PN Law (63 P.S. § 666(a)(6)). It is therefore imperative that the Board receive these reports in a timely manner.

Similarly, in spite of the statutory requirements in section 11.1 of the RN Act (63 P.S. § 221.1) and section 13.2 of the PN Law (63 P.S. § 663.2), at times the Board does not learn that disciplinary actions, including the immediate and temporary suspension of a license, were taken against a licensee in another state until the licensee reports it upon biennial renewal. To ensure that the Board receives information about these criminal and disciplinary actions in a timelier manner, the Board is updating the regulations to clarify the requirements and to expedite the reporting of crimes and disciplinary actions.

Summary and Responses to Comments

Notice of proposed rulemaking was published at 44 Pa.B. 648 (February 1, 2014). Publication was followed by a 30-day public comment period during which the Board received comments from Paula A. Bussard, Senior Vice President, Policy and Regulatory Services, The Hospital & Healthsystem Association of Pennsylvania (HAP); Margaret Cybularz, MSN, RN, Prism Career Institute; Natalie O. DeLeonardis, RN, MSN, Coordinator, North Campus Outreach Practical Nurse Program, Pennsylvania College of Technology; Dawn Johnson, MSN, RN, Ed, Practical Nurse Administrator, Erie Business Center; and Meg Rowe, Pennsylvania Academy of Nutrition and Dietetics. The Independent Regulatory Review Commission (IRRC) also submitted comments. Neither the House Professional Licensure Committee (HPLC) nor the Senate Consumer Protection and Professional Licensure Committee (SCP/PLC) commented on the proposed rulemaking.

Generally

Natalie DeLeonardis and Dawn Johnson commented in favor of the proposed rulemaking. Meg Rowe commented that the Pennsylvania Academy of Nutrition and Dietetics did not have issues with the proposed rulemaking.

§§ 21.29a, 21.156b, 21.723a. Reporting of crimes and disciplinary action

Section 21.29a(a), 21.156b(a) and 21.723a(a) require registered nurses, practical nurses and licensed dietitian-nutritionists, respectively, to report crimes and disciplinary actions to the Board within specified time frames. Margaret Cybularz expressed agreement with these re-

porting requirements in that they send a message of accountability for practice and protection of citizens in this Commonwealth. Paula Bussard noted HAP's appreciation for the standardization of reporting requirements for registered and practical nurses.

IRRC noted that §§ 21.29(c) and 21.723(b)(4) require the disclosure of pending criminal charges on the biennial renewal application and recommended that the Board amend §§ 21.29a, 21.156b and 21.723a to also require disclosure of pending criminal charges and disciplinary actions. The Board agrees with IRRC's suggestion as to pending criminal charges and amended §§ 21.29a(a), 21.156b(a) and 21.723a(b) accordingly. However, section 11.1 of the RN Act and section 13.2 of the PN Act specifically authorize the Board to require the reporting of disciplinary actions taken in other states within 90 days of final disposition and do not extend to pending disciplinary actions. For that reason, the Board did not add a requirement to report pending disciplinary actions to the final-form rulemaking.

§ 21.131. Continuing education

Subsection (b) formerly exempted applicants for licensure by examination and endorsement from completing the continuation education requirements for the first renewal immediately following licensure. IRRC questioned the Board's rationale and statutory basis for the amendment which deleted the phrase "by examination." IRRC asked whether this amendment was intended to allow applicants for initial licensure by reciprocity to be exempt from the continuing education requirements for the first renewal immediately following licensure. In addition, IRRC asked for the statutory authority for an exemption, and an explanation of why the Board believes this is reasonable.

In revising its continuing education regulations, the Board wished to make its procedures identical to the other licensing boards within the Bureau of Professional and Occupational Affairs that require continuing education. Each of those boards exempt applicants for both licensure by examination and endorsement/reciprocity. The Board's statutory authority is in section 12.1(c) of the RN Law which exempts all individuals "applying for the first time for licensure in this Commonwealth" from the continuing education requirement for the first renewal immediately following licensure. This provision is not limited to those applying for licensure by examination. Therefore, the Board believes the exemption must be applied to all applicants applying for the first time for licensure in this Commonwealth, whether by examination or by endorsement. Had the statutory provision not included the modifier "in this Commonwealth," the Board would have retained the limitation to those applying for licensure for the first time by examination.

Paula Bussard noted HAP's appreciation for the Board's implementation of a continuing education procedure identical to that applied by other boards.

IRRC also recommended that the Board add the *Purdon's* citation to the cross-reference to section 14(a)(4)(i) of the RN Law in subsection (h)(4). The Board made this amendment to the final-form rulemaking. However, as section 14 of the RN Law is cited in subsection (h)(1), an additional *Purdon's* citation is not necessary.

§ 21.132. Continuing education hours

Margaret Cybularz expressed agreement with the Board's replacement of "course" for "units" in subsection (b).

Description of Amendments to the Final-Form Rulemaking

The Board amended the final-form rulemaking to include the duty to report pending criminal charges in §§ 21.29a, 21.156b and 21.723a as requested by IRRC. In § 21.131(d) (relating to continuing education) the Board deleted "renewal" which was inadvertently added to the proposed rulemaking. The inclusion of "renewal" in the phrase "biennial renewal period" changes the intended meaning of the provision. The Board intends that nurses who are seeking reinstatement of a lapsed license or reactivation of an inactive license complete 30 hours of continuing education within the biennial (2-year) period immediately preceding application for reinstatement or reactivation.

Fiscal Impact and Paperwork Requirements

The Board and registered nurses should have a reduced fiscal and paperwork impact by the amendment regarding continuing education because registered nurses will only be able to renew after completing continuing education, thereby eliminating licensees' submission and the Board's dual review of renewal applications and documentation evidencing completion. Should an audit reveal deficiencies, the final-form rulemaking retains the requirement that deficiencies be made up within 6 months.

There is not additional fiscal or paperwork impact associated with the audit requirement or mandatory designated continuing education course as audits are currently occurring and the designated course can be completed as part of the 30 hours of continuing education that registered nurses shall complete each biennium.

The requirement that registered nurses, practical nurses and licensed dietitian-nutritionists report criminal actions and disciplinary sanctions to the Board within 30 and 90 days, respectively, should have a slight fiscal and paperwork impact on the Board and licensees. Under this final-form rulemaking, licensees shall report this information sooner, triggering additional paperwork responsibilities for licensees. The Board anticipates that it will see an increase in reports as licensees comply with the regulatory requirement thereby incurring additional enforcement costs.

Sunset Date

The Board continuously monitors the effectiveness of its regulations. Therefore, a sunset date has not been assigned.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P. S. § 745.5(a)), on January 17, 2014, the Board submitted a copy of the notice of proposed rulemaking, published at 44 Pa.B. 648, to IRRC and the Chairpersons of the HPLC and the SCP/PLC for review and comment.

Under section 5(c) of the Regulatory Review Act, IRRC, the HPLC and the SCP/PLC were provided with copies of the comments received during the public comment period, as well as other documents when requested. In preparing the final-form rulemaking, the Board has considered all comments from IRRC, the HPLC, the SCP/PLC and the public.

Under section 5.1(j.2) of the Regulatory Review Act (71 P. S. § 745.5a(j.2)), on May 27, 2015, the final-form rulemaking was deemed approved by the HPLC and the SCP/PLC. Under section 5.1(e) of the Regulatory Review Act, IRRC met on May 28, 2015, and approved the final-form rulemaking.

PROPOSED RULEMAKING

SUSQUEHANNA RIVER BASIN COMMISSION

[25 PA. CODE CH. 806]

Review and Approval of Projects

Summary: This document contains proposed rules that would amend the regulations of the Susquehanna River Basin Commission (Commission) to simplify and clarify the process for transferring approvals and to add sections dealing with general permits and modifications to approvals. These rules are designed to improve the Commission's administrative processes and add regulatory clarity.

Dates: Comments on the proposed rulemaking may be submitted to the Commission on or before November 9, 2015. The Commission has scheduled a public hearing on the proposed rulemaking, to be held October 29, 2015, in Grantville, Pennsylvania. The location of the public hearing is listed in the Addresses section of this document.

Addresses: Comments may be mailed to: Jason E. Oyler, Esq., General Counsel, Susquehanna River Basin Commission, 4423 N. Front Street, Harrisburg, PA 17110-1788, or by e-mail to regcomments@srbc.net.

The public hearing will be held on October 29, 2015, at 7:00 p.m., at the East Hanover Township Municipal Building, Main Hall, 8848 Jonestown Road, Grantville, PA. Those wishing to testify are asked to notify the Commission in advance, if possible, at the regular or electronic addresses given below.

For Further Information Contact: Jason E. Oyler, Esq., General Counsel, telephone: 717-238-0423, ext. 1312; fax: 717-238-2436; e-mail: joyler@srbc.net. Also, for further information on the proposed rulemaking, visit the Commission's website at www.srbc.net.

Supplementary Information: The Commission is proposing to make regulatory changes to improve its administrative processes and add regulatory clarity. The major focus of these changes is to revise and simplify the Commission's transfer regulation, explicitly add provisions for the modification of a Commission approved project, and establish a process for the Commission to develop general permits.

1. *18 CFR 806.6. Transfer of approvals.* The Commission proposes to delete the current section and replace it with simplified and easier to understand regulatory language. This revision still allows the Executive Director to approve transfers of approvals. For approvals greater than 10 years old, the current regulation requires the project sponsor to submit entirely new applications in order to transfer the project. The Commission has received complaints that this requirement is onerous and has the effect of cutting short the term of the approval solely because ownership is changing, despite no changes to the project itself or the use of the water. The revised language will allow the transfer to occur conditioned on the submission of an updated metering and monitoring plan consistent with 18 CFR 806.30. For projects undergoing a change of ownership that have an unapproved withdrawal, consumptive use and/or diversion associated with them, usually referred to as grandfathered aspects of the project, the current requirement to submit applications for these grandfathered aspects contained in 18 CFR 806.6(c) and 18 CFR 806.4(a)(1)(iv), (a)(2)(v) and

(a)(3)(iv) is retained. However, the revised language removes the requirement that these applications must be made within 90 days of the date of a change in ownership. The Commission found that it was difficult for project sponsors to meet this deadline. The revised language will allow the Executive Director to approve the transfer with a condition requiring these applications to be made. This will allow the Commission to consider the complexity and number of grandfathered sources that will be subject to the application requirements and establish an appropriate and realistic timeframe in the condition for these applications to be submitted. Due to the revision of the language in 18 CFR 806.6, a corresponding revision was required to 18 CFR 806.4(c).

2. *18 CFR 806.15. Notice of Application.* In paragraph (a), the Commission proposes to amend the time for notices to be published from 10 days to 20 days. The Commission has received feedback that the 10 days is not always sufficient, especially when newspaper notices are required. Extending this time frame allows project sponsors more time to complete the notices without compromising the public's opportunity to provide comment. New paragraphs (h) and (i) were added to provide specific requirements for the newly proposed 18 CFR 806.17 (regarding general permits) and 18 CFR 806.18 (regarding minor modifications), respectively.

3. *New 18 CFR 806.17. General Permits.* Currently, the Commission does not have a process to establish general permits. The Commission is proposing a new section that would provide the Commission the ability to develop, issue and administer general permits. The new regulation provides procedures for issuance and administration of permits, as well as standards for denial of coverage and when an individual approval would be required. In crafting this regulation, the Commission looked to similar regulations of its member jurisdictions for guidance. In addition, changes to 18 CFR 806.4 and 806.14 were necessary to accommodate the addition of this new section.

4. *New 18 CFR 806.18. Approval modifications.* The Commission is proposing to add a section specific to modifications of approvals. The Commission currently accepts applications for modification, but does not have a clear process set forth in the regulations. The proposed section also establishes the concept of minor and major modifications. The process for minor modifications provides a process for minor changes to approval conditions that are more likely to be administrative in nature and have a low degree of controversy, and therefore can appropriately be authorized by the Executive Director. In addition, a change to 18 CFR 806.14 is necessary to provide specific application requirements for minor modifications. Minor modifications are specifically listed. All modifications that are not specifically listed as a minor modification are major modifications. As a part of the rulemaking, the Commission has included a non-exhaustive list of common major modifications to provide guidance to the public and the regulated community.

List of Subjects in 18 CFR Part 806

Administrative practice and procedure, Water resources.

Accordingly, for the reasons set forth in the preamble, the Susquehanna River Basin Commission proposes to amend 18 CFR Part 806 as follows:

PART 806—REVIEW AND APPROVAL OF PROJECTS

1. The authority citation for Part 806 continues to read as follows:

Authority: Secs. 3.4, 3.5(5), 3.8, 3.10 and 15.2, Pub. L. 91-575, 84 Stat. 1509 et seq.

2. Amend § 806.4 by adding paragraph (a)(9) and revising paragraph (c) to read as follows:

§ 806.4 Projects requiring review and approval.

(a) * * *

(9) Any project subject to coverage under a general permit issued under § 806.17.

* * * * *

(c) Any project that did not require Commission approval prior to January 1, 2007, and not otherwise exempt from the requirements of paragraph (a)(1)(iv), (a)(2)(v), or (a)(3)(iv) pursuant to paragraph (b) of this section, may be undertaken by a new project sponsor upon a change of ownership pending action on a transfer application under § 806.6.

3. Revise § 806.6 to read as follows:

§ 806.6 Transfer of approvals.

(a) An existing Commission approval may be transferred to a new project sponsor by the Executive Director provided:

(1) The application for transfer is submitted within 90 days of a transfer or change in ownership of a project.

(2) The new project sponsor operates the project subject to the same terms and conditions of the existing approval pending approval of the transfer application.

(3) Any noncompliance by the existing project sponsor associated with the project or by the new project sponsor associated with other projects is resolved to the Commission's satisfaction.

(4) If the existing approval is greater than 10 years old, the transfer shall be conditioned to require the submission of an updated metering and monitoring plan consistent with the requirements of § 806.30.

(5) If the existing project has an unapproved withdrawal, consumptive use and/or diversion listed in paragraph (b), the transfer shall be conditioned to require the submission of a new application for review and approval of the unapproved withdrawal, consumptive use and/or diversion consistent with §§ 806.4 and 806.14.

(6) Any modifications proposed by the new project sponsor shall be subject to a separate application and review process under §§ 806.14. and 806.18.

(3) The project has an associated groundwater withdrawal that was initiated prior to July 13, 1978 and that has not been approved by the Commission.

(4) The project has an associated surface water withdrawal that was initiated prior to November 11, 1995 and that has not been approved by the Commission.

(5) The project has a consumptive water use approval and has an associated withdrawal that has not been approved by the Commission.

(c) Upon undergoing a change of name that does not affect ownership or control of the project, the project sponsor must request a reissuance of the project's approval by the Executive Director within 90 days from the date of the change.

4. Amend § 806.14 by revising paragraph (a) introductory text and adding paragraph (d) to read as follows:

§ 806.14 Contents of applications.

(a) Except with respect to applications to renew an existing Commission approval and Notices of Intent for approvals by rule and general permits, applications shall include, but not be limited to, the following information and, where applicable, shall be submitted on forms and in the manner prescribed by the Commission. Renewal applications shall include such information that the Commission determines to be necessary for the review of same, shall be subject to the standards set forth in Subpart C—Standards for Review and Approval of this part, and shall likewise be submitted on forms and in the manner prescribed by the Commission.

* * * * *

(d) Applications for minor modifications must be complete and will be on a form and in a manner prescribed by the Commission. Applications for minor modifications must contain the following:

(4) Statement of the need for the requested modification;

(5) Demonstration that the anticipated impact of the requested modification will not adversely impact the water resources of the basin; and

(6) Any other information that the Commission or Executive Director deems necessary.

5. Amend § 806.15 by revising paragraph (a) and adding paragraphs (h) and (i) to read as follows:

§ 806.15 Notice of application.

(a) Any project sponsor submitting an application to the Commission shall provide notice thereof to the appropriate agency of the member State, each municipality in which the project is located, and the county planning agency of each county in which the project is located. The project sponsor shall also publish notice of submission of the application at least once in a newspaper of general circulation serving the area in which the project is located. The project sponsor shall also meet any of the notice requirements set forth in paragraphs (b) through (f) of this section, if applicable. All notices required under this section shall be provided or published no later than 20 days after submission of the application to the Commission and shall contain a description of the project, its purpose, the requested quantity of water to be withdrawn obtained from for sources other than withdrawals or consumptively used, and the address, electronic mail address, and phone number of the project sponsor and the Commission. All such notices shall be in a form and manner as prescribed by the Commission.

* * * * *

(h) For Notices of Intent (NOI) seeking coverage under a general permit, the project sponsor shall provide the NOI to the appropriate agency of the member State and each municipality and county planning agency in which the project is located and any additional notice identified in the general permit.

(i) For applications for minor modifications, the project sponsor shall provide notice of the application to the appropriate agency of the member State and each municipality and county planning agency in which the project is located.

6. Add § 806.17 to read as follows:

§ 806.17 General permits.

(a) *Coverage and purpose.* The Commission may issue a general permit, in lieu of issuing individual approvals, for a specifically described category of diversions, water withdrawals and consumptive uses that:

(1) Involve the same or substantially similar types of operations or activities,

(2) Require the same limitations or operating conditions, or both,

(3) Require the same or similar monitoring and reporting, and

(4) Will result in minimal adverse impacts.

(b) *Procedure for issuance.* (1) At least 30 days prior to the issuance of a general permit, the Commission shall publish notice in the *Federal Register* and the member jurisdiction administrative bulletins of the intent to issue a general permit.

(2) At least 30 days shall be provided for interested members of the public and Federal, State and local agencies to provide written comments on a proposed general permit.

(3) The Commission or Executive Director may, in its discretion, hold a public hearing on a proposed general permit.

(4) The issuance of a general permit adopted by the Commission will be published in the *Federal Register* and the member jurisdiction administrative bulletins. This notice shall set forth the effective date of the general permit.

(c) *Administration of general permits.* General permits may be issued, amended, suspended, revoked, reissued or terminated under this section.

(1) Any general permit issued under this section shall set forth the applicability of the permit and the conditions that apply to any diversion, withdrawal or consumptive use authorized by such general permit.

(2) The Commission may fix a term to any general permit issued.

(3) A project sponsor shall obtain permission to divert, withdraw or consumptively use water in accordance with a general permit by filing a Notice of Intent (NOI) with the Commission, in a form and manner determined by the Commission.

(4) Approval of coverage under a general permit shall be determined by the Executive Director or by any other manner that the Commission shall establish for any general permit.

(5) The Commission may set a fee for NOIs to any general permit.

(6) A project sponsor shall provide notice for NOIs in accordance with § 806.15(h) and any additional notice requirements that the Commission may adopt for any general permit.

(7) The requirements of § 806.16 apply to the review of NOIs to any general permit.

(8) Upon reissuance or amendment of a general permit, all project sponsors permitted to divert, withdraw or consumptively use water in accordance with the previous general permit shall be permitted to continue to operate with the renewed or modified general permit unless otherwise notified by the Commission.

(d) *Denial of coverage.* The Executive Director will deny or revoke coverage under a general permit when one or more of the following conditions exist:

(1) The project or project sponsor does not or can no longer meet the criteria for coverage under a general permit.

(2) The diversion, withdrawal or consumptive use, individually or in combination with other similar Commission regulated activities, is causing or has the potential to cause adverse impacts to water resources or competing water users.

(3) The project does not meet the requirements of § 806.21(a) or (b).

(4) The project includes other diversions, withdrawals or consumptive uses that require an individual approval and the issuance of both an individual approval and a general permit for the project would constitute an undue administrative burden on the Commission.

(5) The Executive Director determines that a project cannot be effectively regulated under a general permit and is more effectively regulated under an individual approval.

(e) *Requiring an individual approval.* If coverage is denied or revoked under paragraph (d) of this section, the project sponsor shall be notified in writing. The notice will include a brief statement for the reasons for the decision. If coverage under a general permit was previously granted, the notice will also include a deadline for submission of an application for an individual approval. Timely submission of a complete application will result in continuation of coverage of the applicable withdrawal, consumptive use or diversion under the general permit, until the Commission takes final action on the pending individual approval application.

(f) *Action of the commission.* Action by the Executive Director denying or revoking coverage under a general permit under paragraph (d) of this section, or requiring an individual approval under paragraph (e) of this section, is not a final action of the Commission until the project sponsor submits and the Commission takes final action on an individual approval application.

7. Add § 806.18 to read as follows:

§ 806.18 Approval modifications.

(a) *General.* A project sponsor shall submit an application for modification of a current approval prior to making a change in the design, operational plans, or use as presented in the application upon which the approval was originally issued, and that will affect the terms and conditions of the current approval.

(b) *Applications for modification.* (1) A project sponsor may apply for a modification of a current approval by submitting an application for modification to the Commission.

(c) *Minor modifications.* The following are considered minor modifications:

- (1) Correction of typographical errors;
- (2) Changes to monitoring or metering conditions;
- (3) Addition of sources of water for consumptive use;
- (4) Changes to the authorized water uses;
- (5) Changes to conditions setting a schedule for developing, implementing, and/or reporting on monitoring, data collection and analyses;
- (6) Changes to the design of intakes;
- (7) Increases to total system limits that were established based on the projected demand of the project; and
- (8) Modify approval to allow the modification of extraction well network used for groundwater remediation systems.

(d) *Major modifications.* Major modifications are changes not considered to be minor modifications. Major modifications may include, but are not limited to:

- (1) Increases in the quantity of water withdrawals, consumptive uses or diversions;
- (2) Increases to peak day consumptive water use;
- (3) Increases to the instantaneous withdrawal rate or changes from a single withdrawal rate to a varied withdrawal rate;
- (4) Changes affecting passby flows requirements; and

(5) Changes that have the potential for adverse impacts to water resources or competing water users.

(e) *Notice and approval.* (1) Applications for modifications are subject to the notice requirements of § 806.15.

(2) The Commission or Executive Director may approve, approve with conditions or deny an application for minor modification, or direct that an application for major modification be made.

(3) The Commission may approve, approve with conditions or deny an application for major modification.

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of November 2015

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P. L. 13, No. 6) (41 P. S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of November, 2015, is 5%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. 96-221). Further preemption was instituted with the signing of Pub. L. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which such individual owns and which such individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 2.58 to which was added 2.50 percentage points for a total of 5.08 that by law is rounded off to the nearest quarter at 5%.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P. S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

OPERATING PERMITS

Intent to Issue Title V Operating Permits under the Air Pollution Control Act and 25 Pa. Code Chapter 127, Subchapter G.

Southwest Region: Air Quality Program, 400 Waterfront Drive, Pittsburgh, PA 15222-4745

Contact: Barbara Hatch, Facilities Permitting Chief—Telephone: 412-442-4174

11-00332 Cambria Cogen Company (243 Rubisch Road, Ebensburg, PA 15931), In accordance with 25 Pa. Code §§ 127.441, 127.425, and 127.521, the Department is providing notice of intent to issue a Title V Operating Permit for the continued operation of a waste coal-fired power plant, known as the Cambria Generation Facility, located in Cambria Township, **Cambria County**.

The facility is a waste coal-fired electrical power plant. The main sources at this facility are two (2) circulating fluidized bed (CFB) waste coal-fired boilers (Source IDs 031 and 032), with maximum fuel heat inputs of 630 MMBtus/hour, each, which power a single electrical generator. Net electrical output from the twin boiler system is 87-MW. Emissions from the CFB boilers are controlled by limestone fed into the fluidized bed to control sulfur dioxide (SO₂) emissions, low combustion temperatures and selective non-catalytic reduction systems (SNCR) to control NO_x emissions, coarse particulate cyclone separation with reinjection into the bed, followed by fabric filters to control PM emissions and further control SO₂ emissions. Collection of SO₂ and acid gases, including hydrochloric acid and hydrofluoric acid, by calcium in the limestone, takes place in the boiler and downstream system. Supporting equipment at this site includes one, 98.38 MMBtus/hour, auxiliary NG-fired boiler, one, 210-bhp, emergency diesel firepump engine, coal and lime-

stone processing, handling, and conveying equipment, an ash handling system, and plant roads.

This facility has the potential to emit the following type and quantity of pollutants: 4,871 tons of SO₂, 1,475 tons of NO_x, 736 tons of CO, 178 tons of PM₁₀, 127 tons of PM_{2.5}, 9 tons of VOC, 147.2 tons of the sum of all HAPs, including 143.8 tons of hydrochloric acid and 1.2 tons of hydrofluoric acid and 13.3 pounds of mercury per year and 1,100,921 tons of CO₂e. Sources at the facility are subject to 40 CFR Part 60, Subpart Db—Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units, Subpart Dc—Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units, Subpart Y, Standards of Performance for Coal Preparation and Processing Plants, and Subpart OOO—Standards of Performance for Nonmetallic Mineral Processing Plants and 40 CFR, Part 63—Subpart ZZZZ—National Emission Standards for Hazardous Pollutants for Stationary Reciprocating Internal Combustion Engines, Subpart DDDDD—National Emission Standards for Hazardous Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters, and Subpart UUUUU—National Emission Standards for Hazardous Pollutants for Coal- and Oil-fired Electric Steam Utility Steam Generating Units, as well as 40 CFR 64, Part 64—Compliance Assurance Monitoring, Trading Rule Provisions of 40 CFR 72—77 and 25 Pa. Code § 127.531, Acid Rain Provisions of 40 CFR 72—77, CSAPR of 40 CFR Part 97 and 25 Pa. Code § 127.531, and 25 Pa. Code Chapters 121—145. No equipment or emission changes are being approved by this action. The permit includes emission limitations and operational, monitoring, testing, recordkeeping, workpractice, and reporting requirements for the facility.

DEP also intends to issue an Acid Rain Permit for this site. The CFB Boilers were previously exempt from the Acid Rain Program. The Title IV Permit is included by reference in the Title V Operating Permit renewal. Because the CFB Boilers were constructed after the time period for operation used to establish the SO₂ allocation baseline, Cambria Cogen receives no SO₂ credits by allocation. For these ARP Opt-in units, the owners of the facility must purchase SO₂ credits to offset emissions.

Cambria Cogen Company's Title V Operating Permit renewal application, the Department's Air Quality Review Memorandum, and the proposed Air Quality Title V Operating Permit for this project are available for review by any interested party at the Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. To request a review of the Title V Operating Permit renewal application, to receive an electronic copy of the Department's Air Quality Review Memorandum, or to receive an electronic copy of the Department's proposed Air Quality Title V Operating Permit for this project, a person may contact Phil Bouse at pbouse@pa.gov or 412.442.4000.

Any person may submit comments, requests for the Department to hold a public hearing, or protests to the operating permit or a proposed condition thereof, by filing such submissions in writing to the Department at the Southwest Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments.

All comments, requests for a public hearing, and protests to a proposed action, shall be filed with the Department within 30 days of the date that notice of the proposed action was published under 25 Pa. Code § 127.424 (relating to public notice). Comments, requests

for a public hearing, and protests must include the name, address and telephone number of the person filing the protest, identification of the proposed permit issuance being opposed (Title V Operating Permit 11-00332) and a concise statement of the objections to the permit issuance and the relevant facts upon which the objections are based.

A public hearing may be held in accordance with 25 Pa. Code § 127.429, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. If a public hearing is held, all persons who have properly filed a protest under 25 Pa. Code § 127.426 may appear and give testimony. The applicant, the protestant and other participants will be notified of the decision to hold a hearing (and the time, place and purpose of such hearing) by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification by telephone is sufficient.

Comments, protests and requests for a public hearing should be directed to Martin L. Hochhauser, P.E., Air Quality Engineering Specialist, Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. (mhochhause@pa.gov, fax 412-442-4194)

Noncoal Applications Received

Effluent Limits—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

Parameter	Table 2		
	30-day Average	Daily Maximum	Instantaneous Maximum
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l
Alkalinity exceeding acidity* pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup

standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

**St. Michael Abandoned Mine Drainage
Treatment Facility,
Adams Township, Cambria County**

*California District Office: 25 Technology Drive, Coal
Center, PA 15423, 724-769-1100*

The Department of Environmental Protection, Rosebud Mining Company ("Rosebud") and St. Michael Land Company, Inc., ("SMLC") have entered into a First Amendment to the December 5, 2012 Consent Order and Agreement between those parties.

On December 5, 2012, the Department, Rosebud, and SMLC entered into a Consent Order and Agreement ("2012 COA") in which Rosebud agreed to finance, construct, and operate a treatment facility ("St. Michael Treatment Facility") to treat, inter alia, previously untreated abandoned mine discharges from a large underground mine pool known as the Berwind Mine Pool for which neither Rosebud nor SMLC had any legal obligation to treat but which allowed Rosebud to mine additional coal reserves at Rosebud's Mine 78 in Paint Township, Cambria County.

Since that time, Rosebud has constructed and tested the St. Michael Treatment Facility and is now operating it; commenced Active Mining Operations consistent with the provisions of the 2012 COA and Rosebud's Coal Mining Activity Permit ("CMAP") No. 56841328; and signed the Participation Agreement and made the initial One Million Dollar (\$1,000,000) payment into the Trust.

There are additional coal reserves in the Upper Freeport coal seam at Mine 78 that could potentially be mined in the future if Rosebud applies for and the Department approves a modification, renewal or revision to CMAP No. 56841328 to authorize such mining.

Rosebud has asked, and the Department has agreed, to modify the 2012 COA to include the Upper Freeport coal seam to ensure that the liability limitations in the 2012

COA apply to Rosebud's mining of the Upper Freeport coal seam at Mine 78.

Copies of the full amendment are in the hands of California District Mining Office, 25 Technology Drive, California Technology Park, Coal Center, PA 15423, Phone 724-769-1100. The amendment may be reviewed by any interested party on request during normal business hours.

Public Notice of Draft NPDES General Permit for Stormwater Discharges Associated with Industrial Activity (PAG-03)

The Department of Environmental Protection (Department) is announcing the availability of a draft National Pollutant Discharge Elimination System (NPDES) General Permit for Stormwater Discharges Associated with Industrial Activity (PAG-03). The draft General Permit and related documents are available on the Department's eLibrary at www.elibrary.dep.state.pa.us (select "Permit and Authorization Packages," then "Point and Non-Point Source Management," then "National Pollutant Discharge Elimination System—NPDES," then "General Permits," then "PAG-03 (Draft)").

The PAG-03 General Permit is intended to provide NPDES permit coverage to persons discharging stormwater associated with industrial activity to waters of the Commonwealth that are not considered High

Quality or Exceptional Value. The existing PAG-03 General Permit in effect at this time will expire on December 5, 2015. The Department is planning to publish notice of an extension to the PAG-03 General Permit in the *Pennsylvania Bulletin* on or before that date.

The draft PAG-03 General Permit includes the following proposed significant changes in comparison to the existing PAG-03 General Permit:

- In general, the Department has attempted to make the PAG-03 General Permit more consistent with the United States Environmental Protection Agency's (EPA) National multisector general permit for stormwater associated with industrial activity, which was reissued in 2015.

- The Department is proposing the addition of nine appendices to PAG-03. The current version of PAG-03 consolidates numerous sectors into Appendix A and Appendix J, while the draft PAG-03 creates new appendices for many of those sectors. An appendix prescribes the sector-specific monitoring and best management practice requirements for permittees.

- The Department is proposing to reorganize appendices and eliminate one appendix, for coal storage pile runoff, because the Department's regulation in 25 Pa. Code § 92a.54(e)(5) (relating to general permits) does not allow the Department to issue general permit coverage to facilities with categorical effluent limitations published by the EPA. In addition, Appendix A, specific to facilities subject to SARA Title III, Section 313 requirements, has been eliminated and the industrial sectors assigned to other appendices because the Department has determined there is no greater risk for stormwater pollution for SARA Title III, Section 313 facilities.

- The Department is proposing new eligibility criteria in the draft PAG-03. For instance, the Department may deny coverage under the draft PAG-03 General Permit for stormwater discharges to impaired waters where the discharges contain or are expected to contain parameters that have the potential to cause or contribute to the impairment, regardless of whether a Total Maximum Daily Load has been developed and approved for those impaired waters.

- Benchmark concentrations for certain pollutants are proposed in the draft PAG-03. The benchmarks are not effluent limitations. However, two consecutive benchmark exceedances would trigger the need to develop and submit a corrective action plan to the Department and implement corrective measures to ensure no additional benchmark exceedances.

- All permittees would need to conduct quarterly visual inspections of areas and activities exposed or potentially exposed to precipitation, and submit a summary of inspection findings in an annual report due by May 1 each year.

- Monitoring frequency has been standardized for all permittees to once every 6 months.

- All permittees would be required to submit an annual report due on May 1 that would serve as the ongoing notice of intent to continue operating under PAG-03.

- Persons seeking new or reissued No Exposure Certification approvals from the Department would need to complete and submit the PAG-03 Notice of Intent (NOI).

The proposed NOI fee for coverage under this General Permit is \$500 per year the permittee operates under the General Permit. The NOI fee will be paid in installments due at the time the annual report is due, with the initial fee of \$500 submitted with the NOI for permit coverage and an installment of \$500 to be submitted with the

annual report, if the permittee does not wish to terminate permit coverage. The Department anticipates that after coverage under the General Permit is authorized, coverage will continue without the need to submit an NOI for renewal of coverage as long as the PAG-03 General Permit is renewed, unless the Department specifically requires the submission of an NOI in writing. The proposed fee for new or reissued No Exposure Certification approvals is \$500 (no installments).

Written Comments

The Department is seeking comments on the draft PAG-03 General Permit (3850-PM-BPNPSM0083) and accompanying documents for 30 days. Interested persons may submit written comments by Monday, November 16, 2015. Comments submitted by facsimile will not be accepted. Commentators are encouraged to submit comments using the Department's online eComment system at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. Written comments can also be submitted to the Department of Environmental Protection, Bureau of Point and Non-Point Source Management, Rachel Carson State Office Building, P. O. Box 8774, Harrisburg, PA 17105-8774.

Written comments submitted during the 30-day comment period will be retained by the Department and considered in finalizing the General Permit. The Department will provide an opportunity for any interested person or group of persons, any affected state, any affected interstate agency, the EPA or any interested agency to request or petition for a public hearing with respect to the proposed General Permit. The request or petition for public hearing, which must be filed within the 30-day period allowed for filing of written comments, must indicate the interest of the party filing the request and the reasons why a hearing is warranted. A hearing will be held if there is significant public interest.

Contact

Questions regarding the draft PAG-03 General Permit for Stormwater Discharges Associated with Industrial Activity should be directed to Andrew Gaul, PE, (717) 787-0129, agaul@pa.gov.

Reporting Requirements under the Sexual Assault Testing and Evidence Collection Act

On July 10, 2015, Governor Tom Wolf signed Act 27 (P.L. 142, No. 27) which amended the Sexual Assault Testing and Evidence Collection Act (35 P.S. §§ 10172.1—10172.5) (act). Under section 3(c)(1) and (3) of the act, local law enforcement agencies have responsibility to take possession of the sexual assault evidence collected by health care facilities for sexual assaults reported to have occurred in the agency's jurisdiction and, upon receipt of consent from the victim, to submit the evidence awaiting testing to a laboratory approved by the Department of Health (Department) for testing or analysis.

The act requires local law enforcement agencies and testing laboratories to submit certain reports to the Department, in a form and manner prescribed by the Department, regarding the status of laboratory testing of sexual assault evidence. The act requires initial reporting by local law enforcement agencies of sexual assault evidence awaiting testing and by laboratories of sexual assault evidence submitted for testing but not yet analyzed by the laboratory, collectively referred to as "inventory." See section 3(d) of the act. Section 3(e) of the act requires annual reporting by both entities of sexual

assault evidence that is awaiting testing for 12 months or more, or "backlogged evidence."

This notice provides the form and manner for local law enforcement agencies and testing laboratories to submit the required reports regarding inventory and backlogged evidence to the Department, and the applicable time frames for reporting.

Availability of Forms for the Submission of Reports

Standardized forms for both the initial reporting of inventory awaiting testing or not yet analyzed and annual reporting of backlogged evidence will be available on the Bureau of Laboratories' web site at www.health.pa.gov/labs. Local law enforcement agencies and testing laboratories also may contact the Bureau of Laboratories for a hard copy of either form.

Applicable Dates for Preparation and Submission of Initial Reports

Initial reports by local law enforcement agencies and approved laboratories must include inventory awaiting testing or analysis as of September 7, 2015. Initial reports must be submitted to the Department by Monday, March 7, 2016. If no inventory exists, local law enforcement agencies and laboratories are required to report that information to the Department by March 7, 2016.

Applicable Dates for Preparation and Submission of Annual Reports

Reports of backlogged evidence must be submitted to the Department annually by January 31. If no backlogged evidence exists, local law enforcement agencies and laboratories are required to annually report that information to the Department by January 31.

Department Contact Person

Local law enforcement agencies and laboratories shall submit the required information to the Department's Bureau of Laboratories by mail or e-mail (scanned PDF copies) to James R.
