DEPARTMENT OF COMMUNITY AND ECONOMIC DEVELOPMENT

2017 Annual Action Plan Public Hearing

The Department of Community and Economic Development (Department) is preparing the Commonwealth's 2017 Action Plan of the Consolidated Plan for 2014—2018. The Consolidated Plan (Plan) is a document submitted to the United States Department of Housing and Urban Development (HUD) every 5 years analyzing the needs of the nonentitlement areas of this Commonwealth in the areas of housing including special needs, community development, homelessness prevention and economic development. From this analysis a unified strategy for housing, homelessness and community development programs, including the necessary linkages for building successful neighborhoods and communities, is created. The Action Plan is the annual application to HUD for Federal funds administered by the Commonwealth for the nonentitlement communities of this Commonwealth. The HUD funding programs covered by the Plan and administered by the Department are the Community Development Block Grant (CDBG), the HOME Investment Partnerships, the Emergency Solutions Grant, the CDBG Disaster Recovery and the Neighborhood Stabilization (1 and 3) programs. The Department of Health administers the Housing Opportunities for Persons with AIDS programs. The Pennsylvania Housing Finance Agency administers the National Housing Trust Fund.

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of December 2016

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P.L. 13, No. 6) (41 P.S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of December, 2016, is 4 3/4%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub.L. No. 96-221). Further preemption was instituted with the signing of Pub.L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which such individual owns and which such individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield

Public Hearing

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Envi- ronmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environ-
 mental Remediation Standards Act (act) (35 P.S.
 §§ 6026.302—6026.305) require the Department to pub-
 lish in the *Pennsylvania Bulletin* an acknowledgment
 noting receipt of Notices of Intent to Remediate. An
 acknowledgment of the receipt of a Notice of Intent to
 Remediate is used to identify a site where a person
 proposes to, or has been required to, respond to a release
 of a regulated substance at a site. A person intending to
 use the background standard, Statewide health standard,
 the site-specific standard or intend to remediate a site as
 a special industrial area shall file a Notice of Intent to
 Remediate with the Department. A Notice of Intent to
 Remediate filed with the Department provides a brief
 description of the location of the site, a list of known or
 suspected contaminants at the site, the proposed remedia-
 tion measures for the site and a description of the
 intended future use of the site. A person who demon-
 strates attainment of one or a combination of cleanup
 standards or receives approval of a special industrial area
 remediation identified under the act will be relieved of
 further liability for the remediation of the site for con-
 tamination identified in reports submitted to and ap-
 proved by the Department. Furthermore, the person shall
 not be subject to citizen suits or other contribution
 actions brought by responsible persons not participating
 in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act,
 there is a 30-day public and municipal comment period
 for sites proposed for remediation using a site-specific
 standard, in whole or in part, and for sites remediated as
 a special industrial area. This period begins when a
 summary of the Notice of Intent to Remediate is pub-
 lished in a newspaper of general circulation in the area of
 the site. For the following site, proposed for remediation
 to a site-specific standard or as a special industrial area,
 the municipality, within which the site is located, may
 request to be involved in the development of the remedia-
 tion and reuse plans for the site if the request is made
 within 30 days of the date specified as follows. During
 this comment period, the municipality may request that
 the person identified as the remediator of the site develop
 and implement a public involvement plan. Requests to be
 involved and comments should be directed to the
 remediator of the site.

For further information concerning the content of a
 Notice of Intent to Remediate, contact the environmental
 cleanup program manager in the Department regional
 office listed before the notice. If information concerning
 this acknowledgment is required in an alternative form,
 contact the community relations coordinator at the appro-
 priate regional office. TDD users may telephone the
 Department through the Pennsylvania AT&T Relay Ser-
 vice at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution

Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

The facility has the following potential air emissions: 1.68 ton of CO, 2.04 tons of NO_x, 1.61 ton of PM, 0.73 ton of SO_x, and 0.14 ton of VOC. The facility is a State Only facility. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. The plan approval and subsequent State-Only operating permit will include emission restrictions, work practice standards, and testing, monitoring, record keeping, and reporting requirements to ensure the facility complies with the applicable air quality regulations. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

Northwest Region: Air Quality Program, 230 Chestnut Street, Meadville, PA 16335-3481.

Contact: David Balog, New Source Review Chief—Telephone: 814-332-6328.

10-401A: Commercial Asphalt Supply (161 Plain Grove Road, Slippery Rock, PA 16057), The Department intends to issue a plan approval to Commercial Asphalt Supply, the plan approval provides authorization to construct and initially operate a hot mix asphalt plant. This natural minor facility (non-Title V) is to be constructed in Clearfield Township, **Butler County**. This facility will be newly constructed at a site which had previously been used for agriculture. Compliance will be demonstrated through stack testing. The facility's asphalt production rate will be limited to 110% the rate at which the facility was operating during its last successful stack test. Stack testing is to be conducted at the maximum achievable production rate.

This application was reviewed to evaluate the project's incorporation of Best Available Technology. Emissions from the facility will be controlled through combustion technology and a bag house fabric filter.

It is estimated that the potential to emit emission rates from the facility will total: 5.4 tpy of VOC, 13.23 tpy of CO, 5.4 tpy of NO_x, and 4.75 tpy of PM.

Public notice is required for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

The Plan Approval will contain testing, recordkeeping, emission restriction, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

In accordance with 25 Pa. Code § 127.44(e)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP office (Air Quality). Appointments for scheduling a review must be made by calling the DEP (814) 332-6340.

Effluent Limits—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

Parameter	Table 2		
	30-day Average	Daily Maximum	Instantaneous Maximum
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

1. To construct and maintain a 30" PS115 PVC diameter sewer pipe from Pipe Station 0+00 to 82+00, with a 15" diameter sewer connected to the pipe segment at the Chester Creek (TSF, WWF, MF) crossing within the Chester Creek floodway.

2. To construct and maintain a 27" PS115 PVC diameter sewer pipe from Pipe Station 82+00 to 127+95.

3. The combined pipe lengths impact with 7 stream crossings at various points along the Chester Creek floodway and cross the Chester Creek twice.

4. To construct and maintain approximately 51 Man-holes within the floodway of the stream to facilitate the connections of the pipes within the project.

5. To conduct digging and excavation and restoration work within the right of way of the project located within the floodway of the stream to facilitate the project objectives.

The proposed project will permanently impact 0.029 acre of stream channel and temporarily impact 0.061 of stream channel. The project will also permanently impact 1.283 acre of the floodway and temporarily impact 0.061 of floodway. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Plan Description: The approved plan calls for the Tiadaghton Valley Municipal Authority to permit, renovate, own and operate an upgraded Railroad Street Pump Station. The pump station upgrade will consist of the installation of a backup power supply generator that will be situated on a platform above the one hundred year floodplain, replacing/upgrading the pump station electrical service, the installation of a new flow meter that will be integrated in the Tiadaghton Valley Municipal Authority Supervisory Control and Data Acquisition (SCADA) system, replacing a section of force main coming out of the pump station, as well as painting the interior and exterior of the pump station. The total project cost for the pump station upgrade is estimated at \$453,000.00. The Tiadaghton Valley Municipal Authority is attempting to obtain a grant to fund all or a portion of the project cost, but is also able to pay for the project by using monies from their capital reserve fund without any impact to the rate payers (users). Please note that the Federal planning elements required to qualify this project for PENNVEST funding were not satisfied. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from the proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of the authority.

PREAMBLE 2**

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk

assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative

form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

06-05040D: East Penn Manufacturing Co., Inc. (PO Box 147, Deka Road, Lyon Station, PA 19536-0147) on October 24, 2016 submitted to the Department a plan approval application including a RACT alternative compliance schedule petition with regard to the secondary lead smelting facility located in Richmond Township, **Berks County**: East Penn is proposing to implement burner system modifications to the Source 101/108 smelter furnace system within 3 years of DEP's issuance of the plan approval for these changes. Between the initial compliance date of 1/1/17 and the completion of burner system modifications noted above, the facility would comply with the existing Title V NO_x permit limits for Source 101/108 of 0.7 lb/MMBtu and 83.4 tpy.

06-05036C: Novipax, LLC (4275 Reading Crest Avenue, Reading, PA 19605) on October 24, 2016 submitted to the Department a plan approval application including an alternative compliance schedule petition, requesting the following with regard to the polystyrene foam product manufacturing facility located in Muhlenberg Township, **Berks County**: Novipax is proposing the use of a non-VOC blowing agent to limit pentane content of foam products in all seven extruders at their Reading facility. This will involve the installation of additional equipment (e.g. piping, pumps, controls) on Extruder 250, as well as extensive product testing for all extruders, in order to implement the proposed RACT plan. In order to implement this project Novipax has requested the following alternative compliance schedule:

1.) 1/1/18 for Extruders 260, 230, 222, 217, 270 and 290 for the increased use of non-VOC blowing agent, to include product testing.

2.) 57 weeks after Final Plan Approval and completion of the appropriate public notice and comment period, for the Extruder 250, to include obtaining plan approval, equipment installation and product testing.

3.) Upon issuance of the Final Plan Approval for a proposed reduction in annual VOC limit from 711 tpy to 650 tpy.

Between the initial compliance date of 1/1/17 and the completion of modifications and product testing noted above, the facility would comply 1.) with an interim facility VOC limit of 650 tpy, inclusive of all seven extruders, and 2.) with a 4.1% pentane content limit on all foam products produced from Extruders 260, 230, 222, and 217 with a basis weight of 8.0 g/60 sq. in. or greater.

Final Technical Guidance Document: Substantive Revision

DEP ID: 261-0300-101. *Title:* Land Recycling Program Technical Guidance Manual for Vapor Intrusion into Buildings from Groundwater and Soil under Act 2. *Description:* The Land Recycling Program Vapor Intrusion (VI) Guidance has been substantially revised to update scientific deficiencies of the current guidance. Screening values and the way they are calculated have been updated and there are multiple clarifications that have

been made to language, definitions and procedures. Revising the VI guidance helps avoid confusion for remediators and regional office staff about how to address the VI pathway under the Statewide health standard and the site-specific standard. The Department solicited comments on the draft VI guidance for 30 days, beginning on July 25, 2015. During the comment period, 97 comments were received from 8 different organizations. The comment and response document accompanies the final VI guidance document and is available for public viewing on the Department's web site as previously mentioned.

Contact: Questions regarding this technical guidance document should be directed to Carolyn Fair, Land Recycling Program, (717) 425-7514 or cfair@pa.gov.

Federal Consistency under the Coastal Zone Management Act; Delaware River Pipeline Relocation Project

This notice is published under section 306(d)(14) of the Federal Coastal Zone Management Act of 1972 (16 U.S.C.A. § 1455(d)(14)), regarding public participation during consistency determinations. The Department of Environmental Protection (Department), Coastal Resources Management Program has received notice that the Paulsboro Natural Gas Pipeline Company, LLC (PNGPC) is proposing the Delaware River Pipeline Relocation Project.

The PNGPC is seeking authorization from the Federal Energy Regulatory Commission and the United States Army Corps of Engineers (USACE) to relocate, replace, remove, in part, and abandon, in part, an existing approximately 2.6-mile 6-inch and 8-inch diameter natural gas pipeline extending across the Delaware River between Delaware County, PA and Gloucester County, NJ. Approximately 425 feet of pipeline will be removed from the Delaware River with additional sections removed

from the property of the Philadelphia International Airport. All remaining portions of pipeline will be abandoned in place, sealed and grouted as required. Approximately 2.6 miles of new 12-inch and 24-inch pipeline will be constructed, including approximately 8,550 feet of pipeline crossing beneath the Delaware River by means of horizontal directional drilling. This project is being undertaken as directed by the USACE to accommodate the USACE's Delaware River Main Channel Deepening Project.

This project is subject to Department review for Federal consistency because it is a Federal license and permit activity and will have reasonably foreseeable effects on the Commonwealth's coastal resources or uses.

In accordance with National Oceanic and Atmospheric Administration (NOAA) regulations in 15 CFR Part 930, Subpart D (relating to consistency for activities requiring a Federal license or permit), the PNGPC has determined that the proposed activity will be conducted in a manner consistent with the applicable enforceable policies of the Commonwealth's NOAA-approved Coastal Resources Management Program. Interested parties may request a copy of the Federal Consistency Certification from the Department contact listed as follows.

Questions regarding this review should be directed to Matthew Walderon, Federal Consistency Coordinator, at (717) 772-2196 or RA-Fed_Consistency@pa.gov.

The Department will consider all comments received on or before December 5, 2016, before issuing a final Federal consistency concurrence or objection. Comments submitted by facsimile will not be accepted. Comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment system at www.ahs.dep.pa.gov/eComment. Written comments should be submitted by e-mail to ecomment@pa.gov or by mail to the Department of Environmental Protection, Compacts and Commissions Office, 400 Market Street, P.O. Box 8465, Harrisburg, PA 17101-8465.

Nutrient Credit Trading Program; Actions

The Department of Environmental Protection (Department) has approved the following requests for certification of pollutant reduction activities to generate nitrogen (N) and phosphorus (P) credits under 25 Pa. Code § 96.8 (relating to use of offsets and tradable credits from pollution reduction activities in the Chesapeake Bay Watershed). Proposed pollutant reduction activities include the following agriculture best management practices: continuous no-till planting methods (CNT); planting cover crops (CC); and the export of poultry litter (EPL). These certification request approvals authorize the generation of N or P credits, or both, for use by facilities with National Pollutant Discharge Elimination System permits in the compliance year in which the credits are generated. These approvals are valid until September 30, 2017, provided the pollution reduction activities are implemented, maintained and verified in accordance with the plans contained in the approved certification requests. The approvals are sorted on Certification Date.

Pennsylvania's 2016 Annual Ambient Air Monitoring Network Plan; Revision to Appendix E; Available for Public Comment

On October 17, 2006, the United States Environmental Protection Agency (EPA) promulgated final amendments to the National ambient air monitoring requirements for criteria pollutants in 40 CFR Parts 53 and 58 (relating to ambient air monitoring reference and equivalent methods; and ambient air quality surveillance). See 71 FR 61236 (October 17, 2006). The EPA's final rule requires state and local agencies to enhance air monitoring to "improve public health protection and better inform the public about air quality in their communities." Under 40 CFR 58.10 (relating to annual monitoring network plan and periodic network assessment), air quality state and local monitoring agencies must adopt an annual air

monitoring network plan and make the plan available for public inspection for at least 30 days prior to final submission to the EPA Regional Administrator.

The Department published notice of the availability of the 2016 Annual Ambient Air Monitoring Network Plan (Plan) for a 30-day public comment period at 46 Pa.B. 3140 (June 18, 2016). The Plan included a statement of purpose for each monitor and evidence that siting and operation of each monitor meets Federal requirements. The EPA may also provide an opportunity for review and comment prior to approving or disapproving a state's monitoring network plan.

On November 19, 2016, a revised version of Appendix E of the Plan will be made available for public comment on the Department's web site at www.dep.pa.gov/Business/Air/BAQ/Pages/default.aspx. The Plan has been revised to

address changes that have been made to the plans of the seven facilities that were proposing to undergo the monitoring pathway to meet the air quality characterization requirement outlined in the EPA's SO₂ Data Requirements Rule.

The public is invited to submit comments on this revised version of Appendix E. Comments must be received by the Department on or before December 19, 2016. Written comments should be sent to the attention of Nicholas Lazor, Chief, Division of Air Quality Monitoring,

Bureau of Air Quality, P.O. Box 8468, Harrisburg, PA 17105-8468 or RA-epair@pa.gov. Use "Annual Monitoring Network Plan—Revision to Appendix E" as the subject line.

FISH AND BOAT COMMISSION

Classification of Wild Trout Streams Proposed Additions, Revisions and Removals; January 2017

Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Fish and Boat Commission (Commission) to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The Commission's Fisheries Management Division maintains the list of wild trout streams. The Executive Director, with the approval of the Commission, will from time-to-time publish the list of wild trout streams in the *Pennsylvania Bulletin*. The listing of a stream section as a wild trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate management of streams.

At the next Commission meeting on January 23 and 24, 2017, the Commission will consider changes to its list of wild trout streams. Specifically, the Commission will consider the addition of the following streams or portions of streams to the list:

Proposed Changes to List of Class A Wild Trout Waters; January 2017

The Fish and Boat Commission (Commission) is considering changes to its list of Class A Wild Trout Streams. Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource to conserve that resource and the angling it provides. Class A wild trout populations represent the best of this Commonwealth's naturally reproducing trout fisheries. With rare exceptions, the Commission manages these stream sections solely for the perpetuation of the wild trout fishery with no stocking.

Criteria developed for Class A Wild Trout fisheries are species specific. Wild Trout Biomass Class Criteria include provisions for:

(i) *Wild Brook Trout Fisheries*

(A) Total brook trout biomass of at least 30 kg/ha (26.7 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(C) Brook trout biomass must comprise at least 75% of the total trout biomass.

(ii) *Wild Brown Trout Fisheries*

(A) Total brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(C) Brown trout biomass must comprise at least 75% of the total trout biomass.

(iii) *Mixed Wild Brook and Brown Trout Fisheries*

(A) Combined brook and brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(C) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(D) Brook trout biomass must comprise less than 75% of the total trout biomass.

(E) Brown trout biomass must comprise less than 75% of the total trout biomass.

(iv) *Wild Rainbow Trout Fisheries*

Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 2.0 kg/ha (1.78 lbs/acre).

(v) *Mixed Wild Brook and Rainbow Trout Fisheries*

(A) Combined brook and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(D) Brook trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

(vi) *Mixed Wild Brown and Rainbow Trout Fisheries*

(A) Combined brown and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lb/acre).

(D) Brown trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

During recent surveys, Commission staff documented the following stream sections to have Class A wild trout populations. The Commission intends to consider adding these waters to its list of Class A Wild Trout Streams at its meeting on January 23 and 24, 2017.
