Retention of Professional Civil/Structural Engineering Firms; Project Reference No. FDC-500-807

The Department of Conservation and Natural Resources (Department) is seeking proposals from interested and qualified professional design firms (Consultant) for open-end contract or contracts for various civil/structural and related engineering and design services. The contract or contracts will be for a 12-month period with four 12-month extensions possible. Projects will be assigned on an as-needed basis. The contract or contracts will be managed by the Department's Bureau of Facility Design and Construction (Bureau).

The number of open-end contracts and the dollar amount of each contract shall be at the discretion of the Department for the first year. The extent of the work for the subsequent 4 years of the contract will be dependent on the availability of additional funds and additional projects for those years, also at the discretion of the Department.

Letters of Interest for this project will only be accepted from individuals, firms or corporations duly authorized to engage in the practice of professional design. If an individual, firm or corporation not authorized to engage in the practice of architecture or engineering, or both, wishes to submit a Letter of Interest, the individual, firm or corporation may do so as part of a joint venture with an individual, firm or corporation which is permitted under State law to engage in the practice of engineering in this Commonwealth.

Background

Established on July 1, 1995, the Department is charged with: maintaining and preserving the 120 State Parks; managing the 2.1 million acres of State Forest land; providing information on the State's ecological and geologic resources; and establishing community conservation partnerships with grants and technical assistance to benefit rivers, trails, greenways, local parks and recreation, regional heritage parks, open space and natural areas.

The Bureau provides multidisciplinary facility and infrastructure technical support to the other bureaus in the Department in the areas of project design, project inspections, construction management, contract administration, surveying and other technical advice and consultation. This Bureau is comprised of three divisions: Dams, Bridges and Roadways Engineering; Environmental Engineering and Architecture; and Field Engineering and Contract Management.

The Bureau's Central Office (located in Harrisburg) is responsible for the development of architectural, landscape architectural, water and sanitary, bridge and roadway and civil and environmental projects required to support the Department's facility construction and maintenance program. The Central Office is comprised of five sections: Architectural Design; Landscape Design; Sanitary and Water Management; Bridges and Road Management; and Civil Design. In addition to project design, staff also provides technical architectural and engineering support and advice to assist field operation in State Parks and State Forests.

The Bureau also has four field offices: Northcentral Office in Emporium; Western Office in Moraine State Park; Southcentral Office in Shawnee State Park; and Eastern Office in Nockamixon State Park. Each office is responsible for providing direct engineering and technical

support to the State Parks and Forests field operation staff in their area. Staff is responsible for project inspection and construction management to ensure contractor compliance with the construction contract documents as well as some project design.

PART I

GENERAL REQUIREMENTS

I-1. *Specific Requirements.* The services may encompass a wide range of civil and structural design efforts with the possibility of several different types of projects being designed under short completion schedules. The anticipated types of projects may include, but are not limited to, bridge replacement and rehabilitation (single and multispan), roadway reconstruction/rehabilitation, structural evaluation or design of various building types and other civil engineering related work as assigned by the Department.

Construction budgets for typical projects have ranged from as low as \$25,000 to as high as \$7 million. The average construction budget is likely to be less than \$2 million. Consultants should give strong consideration to the typical project size when considering submitting for this Request for Proposal (RFP).

The services anticipated under the contract may include project planning, scoping and programming, budget estimating, site visits, existing facility review, assessment and documenting, life cycle cost analysis, environmental studies, conceptual design, design development, construction documentation including preparation of drawings and specifications, cost estimating, permit preparation and submission, construction administration including construction submission review and construction inspection and existing building code and facility condition reviews. Permitting services may include Department of Environmental Protection (DEP) Chapter 105 permits, National Pollutant Discharge Elimination System permits, erosion and sedimentation control plans, storm water management plans and land development plans.

Areas of related environmental study associated with these design projects may include, but are not limited to, wetlands, soil, geology, DEP Chapter 105, Corps of Engineers 404 permits, Act 537 planning and DEP water quality management requirements. The environmental studies shall be conducted in accordance with accepted analysis techniques and methodologies and may include any or all of the following to ensure a complete environmental investigation has been performed: provide all necessary environmental services, material and equipment necessary to collect, analyze and organize data; assess impacts; prepare reports; and design mitigation plans. The reports and other graphic material to be prepared may include, but are not limited to, plans of study, meeting minutes, preparation of permit application documents, mitigation plans and reports and wetland and floodplain findings.

Work will be performed with a focus on environmentally sustainable design and construction principles and practices. Projects designed under this contract must achieve a high level of environmental performance, durability, through integrated design and sustainable practices, features and technologies. Designs should implement financially feasible and technologically sound

strategies to conserve energy and to surpass current norms for water conservation, waste management and recycling. Sustainability should be incorporated into the earliest design decisions.

The consultant may be required to perform any and all of the following duties: attend site visits; prepare minutes; perform necessary field surveys; plot topography and cross sections; develop erosion control plans; prepare type, size and location reports; prepare construction drawings, specification and estimates; procure core borings; provide soil and foundation engineering reports; investigate utility involvement; evaluate alternatives using benefit/cost analysis; develop other details and narratives; inspect simple, major and unusual structures; develop rehabilitation strategies; and review shop drawings, catalog cuts and occasional attendance at construction job conferences may be required.

Projects will be located throughout this Commonwealth. Travel to the project sites will be required. Project assignment will be through individual project Work Orders. The scope of the Work Order may range from full responsibility for all aspects of the design to a collaborative design effort with Department in-house staff where only one or more specific design disciplines are required. Work Orders may be for a single phase or portion of a project such as conceptual design or for all phases of the entire project. The work shall be identified in the Work Order by a series of tasks that encompass the full scope of the project. The number and description of the tasks will vary based on a project's scope and complexity. A typical Work Order will require formal submissions at the end of the Sketch (10%), Preliminary (50%), Prefinal (95%) and Final (100%) design stages. Complexity may require more or less submissions for certain projects. The Consultant will be required to develop and maintain a detailed project schedule showing all related project tasks including design phases, submissions, review periods and timelines for required permits. The project schedule shall identify the critical path for completion for the project. A Bureau Project Coordinator will be assigned to each Work Order. The Coordinator may change from project to project. A Performance Review may be performed by the Project Coordinator at the completion of the Work Order and used in assigning additional projects to the Consultant.

The Department's standard contract method is multiple prime, design-bid-build, although other nonbid construction methods, including construction by Department staff and volunteer organizations, may be used. The Consultant will be required to prepare construction documents appropriate to the construction method selected by the Department.

The Consultant will be required to submit project data and documents in both written and electronic form. Drawings will be required to comply with the Department's Computer-Aided Drafting Standard. Three dimensional drawings will be expected throughout the design process; presentation renderings may be required at the completion of design.

I-2. Qualifications. The Consultant shall have staff available to provide rapid services associated with assigned projects. The Consultant may be called upon to provide services on multiple projects at the same time. The Consultant shall have demonstrated knowledge of the building design and construction method.

The following minimum qualification will be expected of all Consultants:

- Possess current professional registrations required to perform required services.
- Be licensed to conduct business in this Commonwealth.
- Have sufficient staff or subconsultants experienced in the various required services.
- Have an established quality control and assurance program for checking documents for accuracy, consistency, coordination, quality and compliance with all necessary codes and regulations.
- Have specialized experience in the field of sustainable design and a demonstrated ability to comprehensively integrate the concept of sustainability into the project.
- Have Leadership and Energy and Environmental Design (LEED) certified designers as current members of staff and available for assigned projects.
- Have design capabilities in digital format (AutoCAD and Revit).
- Have the ability to produce 3-dimensional drawings in to further illustrate design intent.

I-3. Addenda to the RFP. If the Department deems it necessary to revise any part of this RFP before the proposal response date, the Issuing Office will post an addendum to the Department web site at <http://www.dcnr.state.pa.us>. It is the Offeror's responsibility to periodically check the web site for any new information or addenda to the RFP. Answers to the questions asked during the questions and answers period also will be posted, as necessary, to the web site as an addendum to the RFP.

I-4. Small Diverse Business (SDB) Information. The Department encourages participation by SDBs as prime contractors and encourages all prime contractors to make a significant commitment to use SDBs as subcontractors and suppliers.

An SDB is a Department of General Services (DGS) verified minority-owned business, woman-owned business, veteran-owned business or service-disabled veteran-owned business.

A small business is a business in the United States which is independently owned, not dominant in its field of operation, employs no more than 100 full-time or full-time equivalent employees, and earns less than \$7 million in gross annual revenues for building design, \$20 million in gross annual revenues for sales and services and \$25 million in gross annual revenues for those businesses in the information technology sales or service business.

Questions regarding this program can be directed to Department of General Services, Bureau of Small Business Opportunities, Room 611, North Office Building, Harrisburg, PA 17125, (717) 783-3119, fax (717) 787-7052, gs-bsbo@pa.gov.

I-6. *Type of Contract.* The type of contract as a result of this RFP shall be an open-end, requirements contract. Work shall be assigned on an as needed basis as determined by the Department. The initial term of the agreement shall be 1 year and renewable for up to 4 subsequent years. Reimbursement for services shall be by fixed fee percentage based upon project allocation or hours of service and qualifying expenses and may vary from project to project. The reimbursement type shall be at the Department's discretion. Direct costs for travel and subsistence will be based on current State rates. Miscellaneous expenses such as copies, prints or postage will be reimbursed at cost. The work shall be reviewed by the staff of the Bureau and when applicable, approved by same staff.

However, the Department reserves the right to reject all Letters of Interest submitted, cancel the solicitation requested under this notice or readvertise solicitation for this service.

II-3. *SDB Participation Submittal.*

A. To receive credit for being an SDB or for subcontracting with an SDB, an Offeror must include proof of SDB qualification in the SDB participation submittal of the proposal, as indicated as follows:

An SDB verified by the BSBO as a Small Business must provide a photocopy of their verification letter.

B. In addition to the previous verification letter, the Offeror must include in the SDB participation submittal of the proposal the following information:

1. Offerors must include a numerical percentage which represents the total percentage of work.

2. Offerors must include a numerical percentage which represents the total percentage of work that the Offeror commits to the SDB as subconsultants. To support its total SDB Commitment, Offeror must also include:

a. Percentage of each subcontract commitment to an SDB.

b. The name of each SDB. The Offeror will not receive credit for stating that after the contract is awarded it will find an SDB.

c. The services each SDB will provide.

d. The location where each SDB will perform services.

e. The timeframe for each SDB to provide or deliver the goods or services.

f. A subcontract or Letter of Intent signed by the Offeror and the SDB for each SDB identified in the SDB submittal. The subcontract or Letter of Intent must identify the specific work or services the SDB will perform, how the work or services relates to the project and the specific time frame during the term of the contract and any option/renewal periods when the work, good or service will be performed or provided.

g. The name, address and telephone number of the primary contact person for each SDB.

3. Each SDB subconsultant commitment will become contractual obligations once the contract is fully executed.

4. The name and telephone number of the Offeror's project (contact) person for the SDB information.

C. The Offeror is required to submit two copies of its SDB participation submittal. The submittal shall be clearly identified as SDB information and sealed in its own envelope, separate from the remainder of the proposal.

D. An SDB can be included as a subconsultant with as many prime consultants as it choose.

E. An Offeror that qualifies as an SDB and submits a proposal as a prime contractor is not prohibited from being included a subconsultant in separate proposals submitted by other Offerors.

F. Refer to Appendix A for sample SDB Letter of Intent.

II-4. *Contract Requirements—SDB Participation*

Contracts containing SDB participation must also include a provision requiring the selected contractor to meet and maintain those commitments made to SDB at the time of proposal submittal or contract negotiation, unless a change in the commitment is approved by the BSBO. Contracts containing SDB participation must include a provision requiring SDB subcontractors to perform at least 50% of the subcontracted work.

The selected contractor's commitments to SDBs made at the time of proposal submittal or contract negotiation shall, to the extent so provided in the commitment, be maintained throughout the term of the contract and through any renewal or extension of the contract. Any proposed change must be submitted to the BSBO, which will make a recommendation to the contracting officer regarding a course of action.

If a contract is assigned to another contractor, the new contractor must maintain the SDB participation of the original contract.

The selected contractor shall complete the Prime Contractor's Quarterly Utilization Report (or similar type document containing the same information) and submit it to the contracting officer of the Issuing Office within 10 workdays at the end of each quarter the contract is in force. This information will be used to determine the actual dollar amount paid to SDB subcontractors and suppliers. Also, this information will serve as a record of fulfillment of the commitment the selected contractor made and for which is received SDB participation points. If there was no activity during the quarter then the form must be completed by stating "No activity in this quarter."

Note: Equal employment opportunity and contract compliance statements referring to company equal employment opportunity policies or past contract compliance practices do not constitute proof of SDB status or entitle an Offeror to receive credit for SDB utilization.

II-5. *Debriefing.* The Department will not offer a debriefing session to the unsuccessful firms. The Department disclaims any liability whatsoever to its review of the proposal submitted and in formulating a recommendation for selections. Recommendations made by the Department shall be final.

PART III

CRITERIA FOR SELECTION

III-1. *Selection Criteria.* The engineering consulting firm will be evaluated upon, but not limited to, the following criteria:

A. Consultant's experience on past projects of similar scope, type and size.

B. Consultant's staff qualifications, experience and ability to perform the required services, including available manpower to perform the required services. This includes the qualifications, experience and abilities of subconsultant's staff.

C. Consultant's understanding of the problem and the services required.

D. Consultant's project approach and methodology.

E. Knowledge and experience with environmentally sustainable design and LEED accreditation.

F. Quality control and assurance program and procedures.

G. Equitable distribution of contracts.

H. SDB Participation (evaluated by the BSBO), the BSBO has established the weight for the SDB participation criterion for the RFP as 20% of the total points. Each SDB participation submittal will be rated for its approach to enhancing the utilization of SDB in accordance with the following-listed priority ranking and subject to the following requirements:

1. A business submitting a proposal as a prime contractor must perform 60% of the total contract value to receive points for this criterion under any priority ranking.

2. To receive credit for an SDB subcontracting commitment, the SDB subcontractor must perform at least 50% of the work subcontracted to it.

3. A significant subcontracting commitment is a minimum of 5% of the estimated total contract value.

4. A subcontracting commitment less than 5% of the total estimated contract value is considered nominal and will receive reduced or no additional SDB points depending on the priority ranking.

Priority Rank 1: Proposals submitted by SDB as prime Offerors will receive 150 points. In addition, SDB prime Offerors that have significant subcontracting commitments to additional SDBs may receive up to an additional 50 points (200 points total available).

Subcontracting commitments to additional SDBs are evaluated based on the proposal offering the highest total percentage SDB subcontracting commitment. Other Offerors will be scored in proportion to the highest total percentage SDB subcontracting commitment within this ranking. See the following formula.

Priority Rank 2: Proposals submitted by SDBs as prime contractors, with no or nominal subcontracting commitments to additional SDBs, will receive 150 points.

Priority Rank 3: Proposals submitted by non-SDBs as prime contractors, with significant subcontracting com-

mitments to SDBs, will receive up to 100 points. Proposals submitted with nominal subcontracting commitments to SDBs will receive points equal to the percentage level of their total SDB subcontracting commitment.

SDB subcontracting commitments are evaluated based on the proposal offering the highest total percentage SDB subcontracting commitment. Other Offerors will be scored in proportion to the highest total percentage SDB subcontracting commitment within this ranking. See the following formula.

Priority Rank 4: Proposals by non-SDBs as prime contractors with no SDB subcontracting commitments shall receive no points under this criterion.

To the extent that there are multiple SDB participation submittals in Priority Rank 1 or Priority Rank 3, or both, that offer significant subcontracting commitments to SDBs, the proposal offering the highest total percentage SDB subcontracting commitment shall receive the highest score (or additional points) available in that Priority Rank category and the other proposals in that category shall be scored in proportion to the highest total percentage SDB subcontracting commitment. Proportional scoring is determined by applying the following formula:

<u>SDB % Being Scored</u>	x	Points/Additional = Awarded/Additional
Highest % SDB Commitment		Points Available * SDB Points
Priority Rank 1 = 50 Additional Points Available		
Priority Rank 3 = 150 Total Points Available		

Refer to http://www.portal.state.pa.us/portal/server.pt/community/rfp_scoring_formulas_overview/20124 for an illustrative chart which shows SDB scoring based on a hypothetical situation in which the Commonwealth receives proposals for each priority rank:

III-2. *Number of Contracts.* It is the intent of the Department to select more than one firm for projects to be assigned on a regional basis.

PART IV

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

**MODIFICATIONS AND CONSOLIDATION OF
RESIDUAL WASTE GENERAL PERMITS
WMGM028, WMGM033 AND WMGR034**

Permit Modification Proposed Under the Solid Waste Management Act (35 P.S. §§ 6018.101—6018.1003); the Municipal Waste Planning, Recycling and Waste Reduction Act (53 P.S. §§ 4000.101—4000.1904); and Municipal Waste Regulations for a General Permit to Operate Municipal Waste Processing Facilities and the Beneficial Use of Municipal Waste.

Central Office: Division of Municipal and Residual Waste, Rachel Carson State Office Building, 14th Floor, 400 Market Street, Harrisburg, PA 17106-9170.

General Permit Numbers WMGM028, WMGR033 and WMGR034. These general permits authorize the processing and beneficial use of landfill gas (LFG) for use as: (1) a substitute for high or medium Btu-LFG for natural gas or other fuel; (2) a substitute for natural gas or other fuel to be interconnected with another pipeline for consumer use; and (3) an alternative fuel for the electric generators to produce electricity.

The proposed modifications would consolidate the three general permits into a single general permit, WMGR055, and authorize the processing and beneficial use of landfill gas (LFG) for use as: (1) a substitute for high or medium Btu-LFG for natural gas or other fuel; (2) a substitute for natural gas or other fuel to be interconnected with another pipeline for consumer use; and (3) an alternative fuel for the electric generators to produce electricity.

The Department of Environmental Protection (Department) is soliciting public comment on proposed modifications to the consolidated WMGR055 in order to provide clarity for the regulated community, general public and the Department.

Written comments concerning the general permit should be directed to Scott E. Walters, Chief, Permits Section, Division of Municipal and Residual Waste, Bureau of Waste Management, P. O. Box 69170, Harrisburg, PA 17106-9170. TDD users may contact the Department through the Pennsylvania AT&T Relay Service, (800) 654-5984. Comments may also be submitted via e-mail at ra-epbenuseall@pa.gov. When submitting comment via e-mail, place "Comments on General Permit Number WMGM055" in the subject line. Faxed comments will not be accepted. Public comments must be submitted within 60 days of this notice and may recommend revisions to, and approval or denial of the application. For more information, contact the Division of Municipal and Residual Waste at 717-787-7381.

MODIFICATIONS OF RESIDUAL WASTE GENERAL PERMITS WMGR082

Permit Modification Received under the Solid Waste Management Act, the Municipal Waste Planning, Recycling and Waste Reduction Act and Residual Waste Regulations for a General Permit to Operate Residual Waste Processing Facilities and the Beneficial Use of Residual Waste other than Coal Ash.

Central Office: Division of Municipal and Residual Waste, Rachel Carson State Office Building, 14th Floor, 400 Market Street, Harrisburg, PA 17106-9170.

General Permit Number WMGR082 is for the processing and beneficial use of steel slag, iron slag, and

refractory bricks that were co-disposed with slag ("slag") as a construction material. The authorized processing is limited to magnetic separation of metallics and mechanical sizing and separation. Uses of slag as a construction material under this permit are limited to the following: as an ingredient in bituminous concrete; as aggregate; as base course; as subbase; and as antiskid material.

The proposed modifications would add the beneficial use of steel slag as an alkaline amendment at coal mining activity sites, abandoned mine lands as defined in 25 Pa. Code § 86.252, and in industrial site remediation or reclamation. The proposed modifications would also remove the limitation granted to only approve beneficial use of slag as a construction material to meet applicable Pennsylvania Department of Transportation (PennDOT) standards when a written statement is obtained from municipality or property owner is obtained indicating that the PennDOT standards are not applicable for the proposed project.

Written comments concerning the general permit should be directed to Scott E. Walters, Chief, Permits Section, Division of Municipal and Residual Waste, Bureau of Waste Management, P. O. Box 69170, Harrisburg, PA 17106-9170. TDD users may contact the Department through the Pennsylvania AT&T Relay Service, (800) 654-5984. Comments may also be submitted via e-mail at ra-epbenuseall@pa.gov. When submitting comment via e-mail, place "Comments on General Permit Number WMGR082" the subject line. Faxed comments will not be accepted. Public comments must be submitted within 60 days of this notice and may recommend revisions to, and approval or denial of the application. For more information, contact the Division of Municipal and Residual Waste at 717-787-7381.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain

the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P. S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. AFIG will accept applications at any time during the year and evaluate the applications received after each 4-month submission period and determine awards. Applications received during a submission period which do not receive an award will be able to resubmit the project application immediately for consideration during the next submission period in accordance with AFIG rules.

AFIG guidelines and application instructions are available on the Department web site at <http://www.dep.pa.gov> (select "Citizens," then "Grants, Loans and Rebates," then "Alternative Fuels Incentive Grant"). DEPARTMENT OF HUMAN SERVICES

Supplemental Payment Program Changes

The Department of Human Services (Department) is announcing its intent to modify eligibility criteria and payment methodologies for the Medical Assistance (MA) Dependency, MA Rehabilitation Adjustment and New Hospital Payment programs as well as increase the funding allocations for the MA Dependency and MA Rehabilitation Adjustment Payments and allocate funding for the New Hospital Payment program.

Background

During State Fiscal Year (SFY) 2010-2011, the Department established several new disproportionate share hospital (DSH) and supplemental payments for hospitals using revenues from the Quality Care Assessment Account. Among other things, the Department implemented new classes of supplemental payments including MA Dependency payments and MA Rehabilitation Adjustment payments.

Beginning in SFY 2013-2014, the Department amended its State Plan and instituted a process to collect data from new hospitals using forms designated by the Department. Beginning with a new hospital's first full State fiscal year of MA enrollment, the Department uses this data instead of the SFY 2007-2008 MA hospital cost report data to determine the hospital's eligibility for certain DSH and supplemental payments and, if eligible, the payment amounts. The payments for which a new hospital may qualify through this process include the MA Stability Payments, MA Dependency Payments, Enhanced Payments to Certain Disproportionate Share Hospitals and MA Rehabilitation Adjustment Payments.

MA Dependency Payments

The Department established MA Dependency Payments as supplemental payments for acute care general hospitals that are highly dependent upon MA Program payment and have a reduced ability to offset the costs with revenue from private insurers and other sources. The Department intends to modify the qualifying criteria used to determine a hospital's eligibility for this payment. Specifically, the Department intends to use inpatient days rather than acute care days in determining a hospital's eligibility. Under this proposed criterion, an acute care general hospital must provide at least 50,000 Fee-for-Service (FFS) and managed care days of inpatient care to Commonwealth MA beneficiaries. Further, the Department intends to use a more recent State fiscal year to determine eligibility. Specifically, the Department intends to use the MA FFS and managed care inpatient days for Commonwealth MA beneficiaries as identified in the hospital's SFY 2012-2013 MA cost report data available to the Department as of December 2015.

The Department also intends to determine a qualifying hospital's annual payment amount by multiplying the

number of the hospital's Commonwealth MA FFS acute care inpatient days as identified in the State fiscal year 2012-2013 MA hospital cost report available to the Department as of December 2015 by either of the following:

- \$600 for qualifying hospitals with greater than 19,000 Commonwealth MA FFS acute care inpatient days.
- \$260 for other qualifying hospitals.

The Department also intends to increase the funding allocated for MA Dependency payments to \$25.377 million in total funds as may be adjusted to reflect the State Plan reconciliation factor.

The Department does not intend to otherwise change its approved State Plan provisions addressing the qualifying criteria or payment methodology for these payments.

MA Rehabilitation Adjustment Payments

The Department makes MA Rehabilitation Adjustment Payments as supplemental payments to freestanding rehabilitation hospitals enrolled in the MA Program as an inpatient rehabilitation hospital as of July 1, 2010.

The Department intends to change the percentage used in its payment methodology for these payments. Specifically, the Department intends to calculate an annual payment amount for qualifying freestanding rehabilitation hospitals equal to 147% of the total inpatient FFS MA revenue as reported in the hospital's SFY 2007-2008 MA hospital cost report available to the Department as of July 2010. The Department will continue to distribute payments to qualifying hospitals, adjusted to reflect the total amount allocated per fiscal year for this payment.

The Department also intends to increase the funding allocated for MA Rehabilitation Adjustment payments to \$23.6 million in total funds as may be adjusted to reflect the State Plan reconciliation factor.

The Department does not intend to otherwise change its approved State Plan provisions addressing the qualifying criteria or payment methodology for these payments.

New Hospitals

To account for the proposed change to the eligibility criteria for the MA Dependency Payment, the Department intends to modify the eligibility of new hospitals for this payment. Specifically, the Department intends to eliminate a hospital's eligibility for the MA Dependency Payment as a new hospital for those hospitals for which the Department has a SFY 2012-2013 MA hospital cost report as of December 2015. The Department intends to use the eligibility criteria provisions for MA Dependency Payment for these hospitals.

For new hospitals, the Department also intends to revise the per diem amount for a qualifying new hospital's MA Dependency payment to \$600 for new hospitals with more than 19,000 Commonwealth MA FFS inpatient acute care days and to \$260 for other qualifying new hospitals. In addition, the Department intends to revise the percentage applied to the deflated revenue amount for a qualifying new hospital's MA Rehabilitation Adjustment payment to 147%.

The Department intends to allocate \$2.729 million for new hospital payments for SFY 2015-2016.

The Department does not intend to otherwise change its approved State Plan provisions addressing the qualifying criteria or payment methodology for these payments.

Fiscal Impact

For SFY 2015-2016, the Department will allocate \$25.377 million (\$12.178 million in State funds) for the

MA Dependency supplemental payments as may be adjusted to reflect the reconciliation factor described in the State Plan.

For SFY 2015-2016, the Department will allocate \$23.619 million (\$11.335 million in State funds) for the MA Rehabilitation Adjustment supplemental payments as may be adjusted to reflect the reconciliation factor described in the State Plan.

For SFY 2015-2016, the Department will allocate \$2.729 million (\$1.310 million in State funds) for new hospitals for the MA Stability Payments, MA Dependency Payments, Enhanced Payments to Certain Disproportionate Share Hospitals and MA Rehabilitation Adjustment Payments.

Public Comment

Interested persons are invited to submit written comments regarding this notice to the Department of Human Services, Office of Medical Assistance Programs, c/o Regulations Coordinator, Room 515, Health and Welfare Building, Harrisburg, PA 17120. Comments received within 30 days will be reviewed and considered in establishing the final qualifying criteria and payment methodology for this new class of DSH payments.

Persons with a disability who require an auxiliary aid or service may submit comments using the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users).
