Manufactured Home Community Rights Act; Maximum Relocation Fees Payable in the Event of Community Closure

Section 11.2(c) of the Manufactured Home Community Rights Act (act) (68 P.S. § 398.11.2(c)) requires that the Department of Community and Economic Development annually adjust relocation fees that may be owed to manufactured home owners in the event that the community closes. The fees are adjusted based on an increase on the Consumer Price Index.

The base amount of this fee in effect for calendar year 2013 was \$4,000 for single section manufactured homes and \$6,000 for multisection manufactured homes. The Consumer Price Index Inflation Calculator as provided by the United States Department of Labor adjusts the fees for calendar year 2017 as follows:

- \$4,144.16 for single section manufactured homes
- \$6,216.25 for multisection manufactured homes

Inquiries regarding the act should be directed to the Office of the Attorney General.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to

Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVALS

Plan Approval Applications Received under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B that may have special public interest. These applications are in review and no decision on disposition has been reached.

36-03034B: Purina Animal Nutrition, LLC (3029 Hempland Road, Lancaster, PA 17601) for the installation of a new pellet cooler and cyclone on System # 2 at the

Hempfield facility located in East Hempfield Township, **Lancaster County**. The expected potential emissions as a result of the changes proposed are: 7.9 tpy of PM and 3.9 tpy of PM₁₀. The facility is a State Only facility. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12, and 40 CFR Part 63 Subpart DDDDDDD—National Emission Standards for Hazardous Air Pollutants for Area Sources: Prepared Feeds Manufacturing. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

30-00077D: Texas Eastern Transmission, L.P. (PO Box 1642, Houston, TX 77251) Notice is hereby given in accordance with 25 Pa. Code §§ 127.44—127.46 that the Pennsylvania Department of Environmental Protection (Department) intends to issue Air Quality Plan Approval: PA-30-00077D to allow the physical change and change in method of operation of all compressor engines and one turbine to allow for bidirectional gas flow at Holbrook Compressor Station located in Richhill Township, **Greene County**. The Plan Approval also includes operational hour restrictions on each compressor engine, and memorializes the gas release event volatile organic compound (VOC) potential to emit (PTE) from TV-30-00077.

PTE changes from the physical changes and operational hour restrictions on previously authorized sources are calculated to be decreases of 1,048 tons of nitrogen oxides (NO_x), 310.3 tons of carbon monoxide (CO), 191.6 tons of VOC, 23.58 tons of particulate matter less than 10 microns in diameter (PM₁₀), 23.58 tons of particulate matter less than 2.5 microns in diameter (PM_{2.5}), 9.67 tons of sulfur oxides (SO_x), 86.95 tons of formaldehyde, 122.95 tons of total hazardous air pollutants (HAP), and 136,364 tons of carbon dioxide equivalents (CO₂e) per year. Air contamination sources included in this authorization are subject to State regulations including 25 Pa. Code §§ 123.1, 123.2, 123.31, 129.97 and 129.100; and Federal New Source Performance Standards (NSPS) including 40 CFR Part 60 Subpart GG for stationary gas turbines and 40 CFR Part 60 Subpart KKKK for stationary combustion turbines; and National Emission Standards for Hazardous Air Pollutants (NESHAP) including 40 CFR Part 63 Subpart ZZZZ for stationary reciprocating internal combustion engines. Most of these requirements are already included in TV-30-00077. Plan Approval has been conditioned to ensure compliance with all applicable requirements not already included in TV-30-00077. This includes presumptive Reasonably Available Control Technology (RACT) standards; operational hour restrictions; and testing, work practice, monitoring, recordkeeping, and reporting conditions where applicable. Once compliance with the Plan Approval is demonstrated,

the applicant will subsequently submit a Title V Operating Permit administrative amendment application or renewal application as appropriate in accordance with 25 Pa. Code Subchapters F and G. Holbrook Compressor Station remains a Title V facility based upon its PTE for NO_x, CO, VOC, and CO₂e. PTE from the facility will be 175.56 tons of NO_x, 133.22 tons of CO, 104.40 tons of VOC, 12.66 tons of PM₁₀, 12.66 tons of PM_{2.5}, 24.31 tons of sulfur oxides SO_x, 7.77 tons of formaldehyde, 17.51 tons of HAP, and 286,130 tons of CO₂e per year.

Texas Eastern Transmission's Plan Approval application, the Department's Air Quality Review Memorandum, and the Proposed Air Quality Plan Approval for this project are available for review by any interested party at the Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. To request a review of the Plan Approval Application, to receive an electronic copy of the Department's Air Quality Review Memorandum, or to receive an electronic copy of the Department's proposed air Quality Plan Approval for this project, a person may contact the Department at 412-442-4000.

A person may oppose the proposed plan approval by filing a written protest with the Department through Alan Binder, Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222. Additional written comments may also be submitted. Each protest or set of written comments must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval (PA-30-00077D) and a concise statement of the objections to the plan approval modification and the relevant facts upon which the objections are based.

All comments must be received prior to the close of business 30 days after the date of this publication.

A public hearing may be held, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing in writing or by publication in the newspaper and the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification by telephone is sufficient.

For additional information you may contact Alan Binder at 412-442-4168.

63-00999A: Rice Poseidon Midstream, LLC (400 Woodcliff Drive, Canonsburg, PA 15317) Notice is hereby given in accordance with 25 Pa. Code §§ 127.44—127.46 that the Pennsylvania Department of Environmental Protection (Department) intends to issue Air Quality Plan Approval: PA-63-00999A to allow the installation and initial temporary operation of one Caterpillar G3612 lean-burn natural gas-fired compressor engine rated at 3,550 bhp, controlled by an oxidation catalyst, and equipped with an ADEM3 controller; four Caterpillar G3616 lean-burn natural gas-fired compressor engines rated at 5,000 bhp, controlled by oxidation catalysts, and equipped with ADEM4 controllers; two tri ethylene glycol dehydrators controlled by flash tanks with emissions capture and routing to the reboilers and enclosed flare, 200 MMscf/day each; four produced water storage tanks, 400 barrel capacity each; three low pressure pig receivers; one high pressure pig launcher; miscellaneous storage tanks containing new and used lubrication oil; and piping components in natural gas service at the Blue Moon Compressor Station located in West Pike Run Township, **Washington County**.

Additional sources currently operating under GP5-63-00999A include five Caterpillar G3612 lean-burn natural gas-fired compressor engines rated at 3,550 bhp, controlled by oxidation catalysts, and equipped with ADEM3 controllers; two tri ethylene glycol dehydrators controlled by flash tanks with emissions capture and routing to the reboilers and enclosed flare, 200 MMscf/day each; four produced water storage tanks, 400 barrel capacity each; miscellaneous storage tanks containing new and used lubrication oil; and piping components in natural gas service. However, upon issuance of PA-63-00999A, Blue Moon Compressor Station would become a Title V facility and no longer eligible to use the Department's GP5. Therefore, GP5-63-00999A sources, controls, and requirements will be incorporated into PA-00999A for temporary operation.

Potential to emit (PTE) from the facility after installation of the new sources and controls is 176.65 tons of nitrogen oxides (NO_x), 92.91 tons of carbon monoxide (CO), 50.80 tons of volatile organic compounds (VOC), 13.09 tons of particulate matter less than 10 microns in diameter (PM₁₀), 13.09 tons of particulate matter less than 2.5 microns in diameter (PM_{2.5}), 12.10 tons of formaldehyde, 2.30 tons of acetaldehyde, 1.40 ton of acrolein, 0.69 ton of methanol, 16.87 tons of total hazardous air pollutants (HAP), and 229,334 tons of carbon dioxide equivalents (CO₂e) per year. Best available technology (BAT) for the proposed lean-burn engines includes good combustion practices including combustion with the proper air/fuel ratio, installation and operation of oxidation catalysts, and proper maintenance and operation. BAT for the proposed dehydrators includes the capture and routing of flash tank and still vent emissions to the reboiler as fuel or an enclosed flare. Other proposed air contamination sources meet criteria for exemption from plan approval requirements. The authorization is subject to State regulations including 25 Pa. Code §§ 123.1, 123.2 and 123.31; New Source Performance Standards (NSPS) including 40 CFR Part 60 Subpart JJJJ for stationary spark ignition internal combustion engines and 40 CFR Part 60 Subpart OOOOa for crude oil and natural gas facilities; and National Emission Standards for Hazardous Air Pollutants (NESHAP) including 40 CFR Part 63 Subpart HH for oil and natural gas production facilities and 40 CFR Part 63 Subpart ZZZZ for stationary reciprocating internal combustion engines. The reporting of greenhouse gas (GHG) emissions in the form of CO₂e and on a mass basis has also been included in this Plan Approval. Plan Approval has been conditioned to ensure compliance with all applicable rules. This includes NO_x, CO, VOC, SO₂, particulate matter, formaldehyde, and visible emission limits; and testing, work practice, monitoring, recordkeeping, and reporting conditions. Once compliance with the Plan Approval is demonstrated, the applicant will subsequently submit a Title V Operating Permit application in accordance with 25 Pa. Code Subchapters F and G.

Rice Poseidon Midstream's Plan Approval application, the Department's Air Quality Review Memorandum, and the Proposed Air Quality Plan Approval for this project are available for review by any interested party at the Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. To request a review of the Plan Approval Application, to receive an electronic copy of the Department's Air Quality Review Memorandum, or to receive an electronic copy of the Department's proposed air Quality Plan Approval for this project, a person may contact the Department at 412.442.4000.

A person may oppose the proposed plan approval by filing a written protest with the Department through Alan Binder, Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222. Additional written comments may also be submitted. Each protest or set of written comments must contain the name, address and telephone number of the person submitting the comments, identification of the proposed modified Plan Approval (PA-63-00999A) and a concise statement of the objections to the plan approval modification and the relevant facts upon which the objections are based.

All comments must be received prior to the close of business 30 days after the date of this publication.

A public hearing may be held, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing in writing or by publication in the newspaper and the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification by telephone is sufficient.

Noncoal Applications Received

Effluent Limits—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l
Alkalinity exceeding acidity* pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If addi-

tional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and

Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

SEWAGE FACILITIES ACT PLAN APPROVAL

Plan Approvals Granted Under the Pennsylvania Sewage Facilities Act (35 P.S. § 750.5)

Northeast Region: Clean Water Program Manager, 2 Public Square, Wilkes-Barre, PA 18701-1915.

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Lower Towamensing Township	595 Hans Dairy Road Palmerton, PA 18071	Carbon

Plan Description: The Plan provides for the construction of a wastewater collection and conveyance system to initially serve approximately 1,227 Equivalent Dwelling Units (EDU) (306,750 GPD) located in the Aquashicola, Walkton, Little Gap and Blue Mountain Ski Area portions of the Township. Wastewater from these areas will be conveyed to the existing wastewater treatment facility currently owned and operated by the Tuthill Corporation located near the Blue Mountain Ski Area (BMSA).

The existing BMSA wastewater treatment facility will be initially expanded and upgraded by its current owner, Tuthill Corporation, from a permitted capacity of 0.060 MGD to 0.390 MGD to provide adequate capacity for the proposed service area's existing sewage disposal needs. This approval also permits the future expansion of the BMSA wastewater treatment facility to a capacity of 0.500 MGD to accommodate future development at the BMSA previously approved in the Department's December 8, 2006 Sewage Facilities Planning Module approval correspondence to the Township (copy attached) and now described in this Plan. This planning approval supersedes the Department's December 8, 2006 sewage planning approval, but does not effectively change the intent of the December 8, 2006 approval. The remaining wastewater planning flows available to the BMSA property, not previously constructed at the BMSA wastewater treatment facility, under the December 8, 2006 planning approval are 0.240 MGD out of the newly-approved total BMSA wastewater treatment facility capacity of 0.500 MGD. The facility's treated wastewater will continue to be discharged to Aquashicola Creek.

The Plan also provides for the construction of a wastewater collection and conveyance system to initially serve approximately 59 Equivalent Dwelling Units (EDU) (14,750 GPD) located in Weiner Mobile Estates and 5 EDU's (1,250 GPD) located in the Red Hill Road areas of the Township. The proposed collection system's service areas are delineated on Drawing 37 found in the Plan. Wastewater from these areas will be conveyed to the existing Palmerton Borough Wastewater Treatment Facility for treatment with ultimate discharge to Aquashicola Creek.

The Plan also addresses the future ownership and operation of the existing, unplanned and unpermitted private pumping station and tributary collection system located in the vicinity of the intersection of Forest Inn Road and Little Gap Road. The Department will require that ownership of this station be transferred to the Township. The Township will provide for the adequate operation and maintenance of this station. This pumping station will continue to discharge its wastewater to the Borough of Palmerton's wastewater collection system as discussed on page V-1 in the Plan.

The Plan also proposes the establishment of an on-lot sewage disposal management program in the remaining areas of the Township that will not be serviced by the proposed wastewater collection and conveyance systems.

Financing of the proposed wastewater collection and conveyance system is to be provided by the United States Department of Agriculture's Rural Development Program.

The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal.

On December 20, 2016, the Southeast Regional Office approved a revision to the West Bradford Township Official Sewage Facilities Plan for the Mayfair Subdivision. The project is located off of Boulder Road, on Tax Map Parcel 50-1-31.36, in West Bradford Township, Chester County. The revision provides for adequate sewage facilities planning to permit the construction of 112 townhouse units.

This project will be served by a new sewage pumping station on the property, which will be owned by Utilities, Inc. of Pennsylvania (UIP). The pumping station will convey flows to the existing UIP sewerage system. The project will generate 29,400 gallons of sewage per day to be treated at the UIP Broad Run Wastewater Treatment Facility. UIP must secure a DEP permit for the construction and operation of the proposed sewage pumping station.

Capacity for this project is provided, in part, by a reduction in the number of units at the Bright Glade Subdivision, as described below, and a transfer of sewage capacity from the Bright Glade Subdivision to the Mayfair Subdivision.

The Bright Glade Subdivision was approved by DEP under DEP Code No. 1-15959-350-3J on February 21, 2012. The project proposed a 64-lot residential subdivision (63 new dwelling units and 1 existing dwelling unit). The number of units in this subdivision has been reduced. The Bright Glade Subdivision will now consist of 38 single-family dwellings. This project will be connected to the UIP collection system and will generate 9,975 gallons of sewage per day to be treated at the UIP Broad Run Wastewater Treatment Facility.

Planning approval was also granted through this revision for an expansion of UIP Chestnut Lane Pumping Station. The expanded pumping station will have average design flows of 168,900 gallons per day. UIP must secure a DEP permit for the construction and operation of the proposed sewage pumping station.

Complete copies of this Plan are available for review, upon request, at the Department of Environmental Protection, Southeast Regional Office, 2 East Main Street, Norristown, PA 19401.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35

P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. Increase in the Accident Surcharge Dollar Threshold (Cap) to \$1,700; Notice 2017-01

Insurers writing private passenger automobile insurance in this Commonwealth may not, by law, penalize their policyholders (for example, apply rate surcharges or otherwise increase premiums) whose aggregate claim cost over a 3-year period does not exceed a certain threshold (cap). This threshold (cap) applies to any person injured or property damaged, and is measured in excess of any deductible or self-insured retention. Effective July 1, 2017, the Insurance Department (Department) has increased the threshold (cap) to \$1,700.

Section 1799.3(a) of 75 Pa.C.S. (relating to limit on cancellations, refusals to renew, refusals to write, sur-

charges, rate penalties and point assignments) does not allow an insurer to “cancel or refuse to renew a policy or apply any surcharge, rate penalty or driver record point assignment” when the threshold (cap) is not exceeded.

By law, the Department is required to adjust the amount of the threshold (cap) at least once every 3 years. Section 1799.3(e) of 75 Pa.C.S. stipulates the adjustment be made relative to changes in the Consumer Price Index for medical care and automobile maintenance and repair costs, and may be rounded to the nearest \$50. The previous adjustment to the threshold (cap) was effective July 1, 2014, when the threshold (cap) increased to \$1,550.

Each individual insurer and rating organization should file the previously-discussed change for prior approval by April 1, 2017, and specify an effective date of no later than July 1, 2017.

To expedite the review process, companies are advised to limit their rate/rule filings to the required threshold revision only. Any unrelated changes, revisions and manual pages should not be included in the filing. Additionally, “surcharge disclosure plan(s)” required under 75 Pa.C.S. § 1793(b) (relating to special provisions relating to premiums) do not require the Department's review and prior approval and should not be submitted in response to this notice.

Questions regarding this notice may be directed to James Di Santo, Actuarial Review Division, Insurance Department, 1311 Strawberry Square, Harrisburg, PA 17120, (717) 783-2118, jadisanto@pa.gov.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Electric Generation Supplier License Cancellations of Companies with an Expired Financial Security

Public Meeting held
December 22, 2016

Commissioners Present: Gladys M. Brown, Chairperson;
Andrew G. Place, Vice Chairperson; John F. Coleman,
Jr.; Robert F. Powelson; David W. Sweet

*Electric Generation Supplier License Cancellations of
Companies with an Expired Financial Security;
M-2015-2490383*

Tentative Order

By the Commission:

The Commission's regulations at 52 Pa. Code § 54.40(a) state that an Electric Generation Supplier (EGS) license will not be issued or remain in force until the licensee furnishes a bond or other security approved by the Commission. In addition, 52 Pa. Code § 54.40(d) states that the maintenance of an EGS license is contingent on the licensee providing proof to the Commission that a bond or other approved security in the amount directed by the Commission has been obtained.

Each EGS must file an original bond, letter of credit, continuation certificate, amendment, or other approved financial instrument with Rosemary Chiavetta, Secretary, Pennsylvania Public Utility Commission, 400 North Street, Harrisburg, PA 17120 prior to the EGS's current security expiration date. Each financial instrument must be an original document that displays a "wet" signature or digital signature, preferable in blue ink, and displays a "raised seal" or original notary stamp. The name of the principal on the original financial instrument must match exactly with the name that appears on the EGS's license issued by the Commission.

Failure to file before the financial security's expiration date may cause Commission staff to initiate a formal proceeding that may lead to the following: cancellation of each company's electric supplier license, removal of each company's information from the Commission's website and notification to all electric distribution companies, in which each company is licensed to do business, of the cancellation of the license.

As of December 13, 2016, each EGS listed in the Supplier Table below has not provided proof to the Commission that it has a bond or other approved security in the amount directed by the Commission, to replace its expired bond as noted in the table below.

*Taking title to electricity

As part of its EGS license validation procedures, the Commission's Bureau of Technical Utility Services sent a 60-day Security Renewal Notice Letter to each entity in the Supplier Table above stating that original documentation of a bond, or other approved security, must be filed within 30 days prior to each entity's security expiration date. None of the companies listed in the Supplier Table provided the required documentation.

Based on the above facts, we tentatively conclude that the EGSs listed in the Supplier Table are not in compliance with 52 Pa. Code § 54.40(a) and (d) and therefore it is appropriate to initiate the cancellation process for each EGS license of each company listed in the Supplier Table, without the necessity of a formal complaint, as being in the public interest; *Therefore,*

It Is Ordered That:

1. Cancellation of the Electric Generation Supplier Licenses of each company listed in the Supplier Table is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, the Bureau of Investigation & Enforcement, Department of Revenue—Bureau of Corporation Taxes, all electric distribution companies, all of the Electric Generation Suppliers in the Supplier Table and also cause a copy of this Tentative Order to be published in the *Pennsylvania Bulletin* with a 30-day comment period.

3. Absent the filing of adverse public comment or the filing of approved security within 30 days after publication in the *Pennsylvania Bulletin*, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary.

4. Upon entry of the Final Order described in Ordering Paragraph No. 3 above, each company listed in the Supplier Table will be stricken from all active utility lists maintained by the Commission's Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, removed from the Commission's website, and notifications be sent to all electric distribution companies in which the Electric Generation Suppliers are licensed to do business.

5. Upon entry of the Final Order described in Ordering Paragraph No. 3, each electric distribution company in which the Electric Generation Suppliers are licensed to do business, shall return the customers of the Electric Generation Suppliers to default service.
