# READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

## *Pennsylvania Bulletin*

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

### **Adoption, Amendment or Repeal of Regulations**

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

### **Citation to the *Pennsylvania Bulletin***

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

### ***Pennsylvania Code***

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

### **How to Find Documents**

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at [www.pacode.com](http://www.pacode.com).

Source Notes give the history of regulations. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at [www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde\\_index.cfm](http://www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm).

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at [www.pabulletin.com](http://www.pabulletin.com).

### Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from a rule or regulation is enclosed in brackets [ ] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

### Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised. A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

### Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

#### § 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

The applications concern, but are not limited to, discharges regarding industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFO). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or Amendment
Section III	WQM	Industrial, Sewage or Animal Waste; Discharge into Groundwater
Section IV	NPDES	MS4 Individual Permit
Section V	NPDES	MS4 Permit Waiver
Section VI	NPDES	Individual Permit Stormwater Construction
Section VII	NPDES	NOI for Coverage under NPDES General Permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 Individual Permits and Individual Stormwater Construction Permits in Sections IV and VI, the Department, based upon preliminary reviews, has made tentative determinations of proposed effluent limitations and other terms and conditions for the permit applications. In accordance with 25 Pa. Code § 92a.32(d), the proposed discharge of stormwater associated with construction activities will be managed in accordance with the requirements of 25 Pa. Code Chapter 102. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the United States Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on NPDES applications are invited to submit statements to the contact office noted before the application within 30 days from the date of this public notice. Persons wishing to comment on WQM permit applications are invited to submit statements to the office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for public hearings on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. ### LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

#### UNDER ACT 2, 1995 PREAMBLE 1

#### Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

#### AIR QUALITY

#### PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments,

protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 400—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

\* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal

minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

#### MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

##### *Effluent Limits for Coal Mining Activities*

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

\* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

##### *Effluent Limits for Noncoal Mining Activities*

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Curwensville Municipal Authority is seeking Department approval to remove three abandon concrete encased sanitary sewer crossings of Anderson Creek that prohibit navigability and aquatic species passage. Anderson Creek is designated a Cold Water Fishery (CWF) and Migratory Fishery (MF) by Department Chapter 93 Rules and Regulations. Complete and successful removal of the three below listed abandon structures shall include, but not be limited to, (1) demolition and removal of the concrete encasements, (2) removal of the inoperable sanitary sewers (3) restoration of scoured downstream bed elevations with appropriately sized native rock choked with excavated streambed materials to transition with unaffected downstream bed elevations, and (4) stabilize disturbed streambanks with R-8 rock. As proposed, removal of the abandon concrete encased sanitary sewers pose cumulative temporary impacts of 390-feet with no wetland impacts being incurred.

<i>Activity</i>	<i>Latitude</i>	<i>Longitude</i>	<i>Resource</i>	<i>Temporary Impact</i>
Lezzer Sanitary Sewer Crossing	40° 58' 18.8" N	78° 31' 17.5" W	Anderson Creek	130-Feet

Sections I—VI contain actions regarding industrial, animal or sewage wastes discharges, discharges to groundwater, and discharges associated with MS4, stormwater associated with construction activities and CAFOs. Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. The permits and related documents, effluent limitations, permitting requirements and other information are on file and may be inspected and arrangements made for copying at the contact office noted before the action.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law). **LAND RECYCLING AND ENVIRONMENTAL REMEDIATION****UNDER ACT 2, 1995  
PREAMBLE 2**

**The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

Provisions of Sections 301\_308 of the Land Recycling and Environmental Remediation Standards Act (act) (35

P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

**The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

## FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

*Contact: Thomas Hanlon, Facilities Permitting Chief, 717-705-4862, Virendra Trivedi, New Source Review Chief, 717-705-4863, or William Weaver, Regional Air Quality Manager, 717-705-4702.*

**06-05040D: East Penn Manufacturing Co., Inc.** (PO Box 147, Deka Road, Lyon Station, PA 19536-0147). On December 29, 2016, DEP approved East Penn's October 24, 2016 petition for an alternative compliance schedule for case-by-case RACT 2 implementation for Sources 101/108 at the secondary lead smelting facility located in Richmond Township, **Berks County**. East Penn is proposing to implement burner system modifications to the Source 101/108 smelter furnace system within 3 years of DEP's issuance of a plan approval for these changes. Between the initial compliance date of 1/1/17 and the completion of burner system modifications noted above, the facility would comply with the existing Title V NO<sub>x</sub> permit limits for Source 101/108 of 0.7 lb/MMBtu and 83.4 tpy. DEP approved the petition for alternative compliance schedule with the following caveats: 1.) the final compliance date shall be no later than 3 years after December 29, 2016, and 2.) the petition approval is contingent upon future DEP approval of the case-by-case RACT proposal contained in Plan Approval Application No. 06-05040D, as proposed by East Penn.

### Final State Water Quality Certification Required by Section 401 of the Clean Water Act for the Leach Xpress Project

*Southwest Region: Waterways & Wetlands Program, 400 Waterfront Drive, Pittsburgh, PA 15222, Rita Coleman, 412-442-4149.*

The following description is a revision of the WQ05-012 that was published on December 17, 2016:

**WQ05-012, Columbia Gas Transmission, LLC** (Applicant), 5151 San Felipe Street, # 2400; Houston, TX 77056. Leach Xpress Project (Project), in Richhill Township, **Greene County**, ACOE Pittsburgh District. Within Pennsylvania, the proposed project starts approximately 0.4 mile south of Majorsville, WV (Majorsville, PA Quadrangle N: 39°, 57', 36"; W: -80°, 31', 09") and ends at 0.75 mile north west of the intersection of Fry Hill Road and Coal Rock Road (Majorsville, PA Quadrangle N: 39°, 56', 22"; W: -80°, 31', 09").

On June 8, 2015, Applicant filed an application with the Federal Energy Regulatory Commission (FERC) under Section 7 of the Natural Gas Act (15 U.S.C.A. § 717f) seeking a certificate of public convenience and necessity to construct and operate its Project (FERC Docket No. CP15-514-000). The FERC Environmental Impact Statement for the Project, which was issued on September 1, 2016, may be viewed on FERC's website at [www.ferc.gov](http://www.ferc.gov) (search eLibrary; Docket Search; CP15-514-000).

On March 25, 2016, Applicant requested a State water quality certification from the Pennsylvania Department of Environmental Protection (Department), as required by Section 401 of the Clean Water Act (33 U.S.C.A. § 1341), to ensure that the construction, operation and maintenance of the Project will protect water quality in Pennsylvania through compliance with State water quality standards and associated State law requirements, which are consistent with the requirements of the Clean Water Act.

The Project consists of four new natural gas pipelines, totaling 160.67 miles, through West Virginia, Pennsylvania and Ohio. Within Pennsylvania, the Project, includes approximately 1.74 mile of 36-inch pipeline, for the purpose of transporting natural gas from Majorsville, PA to the Pennsylvania-West Virginia state line. The Project, as proposed, will require approximately 29.83 acres of earth disturbance, and impacts to 1,892 linear feet of Unnamed Tributaries of Enlow Fork (WWF), Unnamed Tributaries of Dunkard Creek (WWF), and Dunkard Creek (WWF), 4.03 acres of floodway, 0.14 acre of temporary PEM wetland impacts.

The Department published notice of its proposed state water quality certification in the *Pennsylvania Bulletin* on October 8, 2016 (46 Pa.B. 6331) and received 0 comments from the public.

The Department certifies to Applicant that the construction, operation and maintenance of the Project will not violate applicable State water quality standards set forth in 25 Pa. Code Chapter 93, provided Applicant complies with the permitting programs, criteria and conditions established pursuant to State law:

#### Draft Technical Guidance Document—New Guidance

**DEP ID:** 390-3301-001. **Title:** Cryptosporidia, E.coli and Turbidity LT2ESWTR Laboratory Reporting Instructions for Public Water Systems Using Surface Water or Groundwater Under the Direct Influence of Surface Water (GUDI) Sources. **Description:** The guidance is necessary because: (1) The Long-term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR) introduces source water quality monitoring and additional treatment requirements for higher risk water systems, to enhance public health protection against pathogenic microbial contaminants, especially Cryptosporidia. For the LT2ESWTR, public water systems that use surface water or GUDI sources must monitor their sources to determine treatment requirements. Some aspects of the LT2ESWTR are of concern to laboratories. The new technical guidance manual Cryptosporidia, E.coli and Turbidity LT2ESWTR Laboratory Reporting Instructions for Public Water Systems Using Surface Water or GUDI Sources provides uniform and detailed instructions for the reporting of drinking water monitoring results to the Department; and (2) Laboratories and public water systems must now report data electronically, according to 25 Pa. Code § 109.810 (relating to reporting and notification requirements). The new technical guidance also provides instructions for submitting Cryptosporidia in source water re-

sults into the Drinking Water Electronic Lab Reporting application by a new CRYPTOSPORIDIUM OOCYSTS form for reporting. In addition, the technical guidance introduces source water reporting of E.coli by enumeration.

### Federal Consistency under the Coastal Zone Management Act; Issuance and Reissuance of Nationwide Permits

This notice is published under section 306(d)(14) of the Federal Coastal Zone Management Act of 1972 (16 U.S.C.A. § 1455(d)(14)), regarding public participation during consistency determinations. The Department of Environmental Protection (Department), Coastal Resources Management Program has received notice that the United States Army Corps of Engineers (USACE) is proposing the issuance and reissuance of Nationwide permits (NWP).

The USACE is reissuing 50 existing NWPs, general conditions and definitions, with some modifications. The USACE is also issuing two new NWPs and one new general condition. The effective date for the new and reissued NWPs is March 19, 2017. These NWPs will expire on March 18, 2022. The USACE has determined that the NWPs will protect the aquatic environment and the public interest while effectively authorizing activities that have no more than minimal individual and cumulative adverse environmental effects. The complete reauthorization of the 2017 NWPs was published at 82 FR 1860 (January 6, 2017).

This activity is subject to Department review for Federal consistency because it is a Federal agency activity and will have reasonably foreseeable effects on the Commonwealth's coastal resources or uses. In accordance with National Oceanic and Atmospheric Administration (NOAA) regulations in 15 CFR Part 930, Subpart C (relating to consistency for Federal agency activities), the

USACE has determined that the proposed activity will be conducted in a manner consistent with the applicable enforceable policies of the Commonwealth's NOAA-approved Coastal Resources Management Program. Interested parties may request a copy of the Federal Consistency Determination from the Department contact listed as follows.

Questions regarding this review should be directed to Matthew Walderon, Federal Consistency Coordinator, at (717) 772-2196 or [RA-Fed\\_Consistency@pa.gov](mailto:RA-Fed_Consistency@pa.gov).

The Department will consider all comments received on or before February 21, 2017, before issuing a final Federal consistency concurrence or objection. Comments submitted by facsimile will not be accepted. Comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment system at [www.ahs.dep.pa.gov/eComment](http://www.ahs.dep.pa.gov/eComment) or by e-mail to [ecomment@pa.gov](mailto:ecomment@pa.gov). Written comments should be submitted by mail to the Department of Environmental Protection, Compacts and Commissions Office, 400 Market Street, P.O. Box 8465, Harrisburg, PA 17101-8465.

### Federal Consistency under the Coastal Zone Management Act; Maintenance Dredging at the Philadelphia Shipyard

This notice is published under section 306(d)(14) of the Federal Coastal Zone Management Act of 1972 (16 U.S.C.A. § 1455(d)(14)), regarding public participation during consistency determinations. The Department of Environmental Protection (Department), Coastal Resources Management Program has received notice that the Philadelphia Shipyard (Shipyard) is proposing to conduct maintenance dredging.

The Shipyard is located along the Delaware River in Philadelphia, PA and consists of piers and dry docks that are utilized to construct vessels for operation in the Jones Act market. The Shipyard is proposing to conduct maintenance dredging of Dry Docks 4 and 5 to ensure continued successful operation of these docks. Sediment build-up in front of the gates of the dry docks has the potential to cause damage to the gate operating system. The Shipyard plans to dredge material from the two dry dock areas and dispose of the material in White's Basin, Logan Township, NJ. Dredging will be completed to a depth of -40 feet lower low water (mean lower low water) plus 2 feet mean of allowable overdredge. Approximately 50,000 cubic yards of material will be removed.

This project is subject to Department review for Federal consistency because it is a Federal license and permit activity and will have reasonably foreseeable effects on the Commonwealth's coastal resources or uses.

In accordance with National Oceanic and Atmospheric Administration (NOAA) regulations in 15 CFR Part 930, Subpart D (relating to consistency for activities requiring a Federal license or permit), the Shipyard has certified that the proposed activity will be conducted in a manner consistent with the applicable enforceable policies of the

Commonwealth's NOAA-approved Coastal Resources Management Program. Interested parties may request a copy of the Federal Consistency Certification from the Department contact listed as follows.

Questions regarding this review should be directed to Matthew Walderon, Federal Consistency Coordinator, at (717) 772-2196 or RA-Fed\_Consistency@pa.gov.

The Department will consider all comments received on or before February 21, 2017, before issuing a final Federal consistency concurrence or objection. Comments submitted by facsimile will not be accepted. Comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment system at [www.ahs.dep.pa.gov/eComment](http://www.ahs.dep.pa.gov/eComment) or by e-mail to [ecomment@pa.gov](mailto:ecomment@pa.gov). Written comments should be submitted by mail to the Department of Environmental Protection, Compacts and Commissions Office, 400 Market Street, P.O. Box 8465, Harrisburg, PA 17101-8465.

**Proposed General Plan Approval and/or General Operating Permit No. 5A for Unconventional Natural Gas Well Site Operations and Remote Pigging Stations; Proposed Modifications to General Plan Approval and/or General Operating Permit No. 5 for Natural Gas Compressor Stations, Processing Plants and Transmission Stations (BAQ-GPA/GP-5); Proposed Modifications to the Air Quality Permit Exemption List (275-2101-003)**

The Department of Environmental Protection (Department) proposes a new General Plan Approval and/or General Operating Permit for Unconventional Natural Gas Well Site Operations and Remote Pigging Stations (BAQ-GPA/GP-5A or GP-5A); revisions to the existing General Plan Approval and/or General Operating Permit for Natural Gas Compressor Stations, Processing Plants and Transmission Stations (BAQ-GPA/GP-5 or GP-5) issued in February 2013, and modified in January 2015; and revisions to the Air Quality Permit Exemptions document (275-2101-003) with this notice. The General Permits establish Best Available Technology (BAT) requirements and other applicable Federal and State requirements including air emission limits, source testing, leak detection and repair, recordkeeping, and reporting requirements for the applicable air contamination sources.

The proposed GP-5A was developed under the authority of section 6.1(f) of the Air Pollution Control Act (35 P.S. § 4006.1(f)) and 25 Pa. Code Chapter 127, Subchapter H (relating to general plan approvals and operating permits), and will be applicable to unconventional natural gas well site operations and remote pigging stations. Remote pigging stations are defined as a pigging station not located at an unconventional natural gas well site, natural gas compressor station, natural gas processing plant or natural gas transmission station and that emits more than 200 tons per year (tpy) of methane, 2.7 tpy of

volatile organic compounds (VOC), 0.5 tpy of any individual hazardous air pollutant (HAP) or 1.0 tpy of total HAP.

The revised GP-5 was developed under the authority of section 6.1(f) of the Air Pollution Control Act and 25 Pa. Code Chapter 127, Subchapter H, and will remain applicable to natural gas compressor stations and processing plants and add applicability to natural gas transmission stations.

*Proposed GP-5A and GP-5 Requirements*

Both the proposed GP-5A and proposed modifications to GP-5 include requirements for the following:

(1) *Fugitive Particulate Matter*—which includes requirements to maintain a written procedures document that describes the methods used to reduce emissions of fugitive particulate matter from the facility and records documenting their implementation.

(2) *Natural Gas-Fired Combustion Units*—which includes requirements for combustion units rated greater than or equal to 10 MMBtu/h to meet emission limits for oxides of nitrogen (NO<sub>x</sub>), carbon monoxide (CO) and particulate matter (PM) and for all combustion units to keep records of fuel usage and throughput to facilitate emissions calculations. Combustion units at unconventional natural gas well sites and remote pigging stations are limited to a rating less than 10 MMBtu/h.

(3) *Glycol Dehydration Units*—which includes a control threshold requirement of 200 tpy of methane, 2.7 tpy VOC, 0.5 tpy of a single HAP or 1.0 tpy of total HAP and a control efficiency requirement of 98% if any of the stated thresholds are exceeded.

(4) *Stationary Natural Gas-Fired Spark Ignition Internal Combustion Engines*—which includes a BAT requirement to meet emission limits for NO<sub>x</sub>, CO, nonmethane, nonethane, hydrocarbons (NMNEHC) and formaldehyde.

(5) *Reciprocating Compressors*—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa (relating to standards of performance for crude oil and natural gas facilities for which construction, modification, or reconstruction commenced after September 18, 2015). This includes the requirement to replace the rod-end packing every 26,000 hours of operation or every 3 years.

(6) *Storage Vessels*—which includes a control threshold requirement of 200 tpy of methane, 2.7 tpy VOC, 0.5 tpy of a single HAP or 1.0 tpy of total HAP and a control efficiency requirement of 98% if any of the stated thresholds are exceeded.

(7) *Tanker Truck Load-Out Operations*—which includes a requirement to use a vapor recovery system and that trucks that perform load-out operations are appropriately certified. The requirement is met by keeping records that detail the load-out operations, including the identification (ID) number of the truck performing the load-out and the volume of liquids loaded and keeping a list of trucks authorized to perform load-out operations with an ID number and the date of their most recent certification test.

(8) *Fugitive Emissions Components*—which includes requirements to perform monthly audio, visual and olfactory inspections and quarterly leak detection and repair (LDAR) inspections. LDAR inspections can be performed using an optical gas imaging camera, a Method 21 gas analyzer or other approved methods. For LDAR programs at unconventional natural gas well sites and remote

pigging stations, there is an option to track the number of leaking components and reduce the inspection frequency to the Federally required semiannual increment if less than 2% of components are found to be leaking in two consecutive inspections. If 2% or more of components are found to be leaking at the reduced frequency, the LDAR returns to the quarterly schedule.

(9) *Controllers*—which includes a requirement that electric controllers be installed where electricity is available onsite. For sites where electricity is not available onsite, the Federal requirements from 40 CFR Part 60, Subpart OOOOa must be met.

(10) *Pumps*—which includes a requirement that electric pumps be installed where electricity is available onsite. For sites where electricity is not available onsite, the Federal requirements from 40 CFR Part 60, Subpart OOOOa must be met. There are also recordkeeping requirements for pumps that are not subject to 40 CFR Part 60, Subpart OOOOa.

(11) *Control Devices*—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa. The only modification of these requirements is that if the option to monitor combustion zone temperature is chosen instead of stack testing an enclosed flare or other combustion device, the combustion zone temperature must be 1,600°F to ensure a 98% methane destruction efficiency.

(12) *Pigging Operations*—which includes the requirements to install a liquids drain in pig receiver chambers, to route emissions from a high-pressure pig launcher or receiver to a low-pressure vessel or line, a control threshold requirement of 200 tpy of methane, 2.7 tpy VOC, 0.5 tpy of a single HAP or 1.0 tpy of total HAP, and a control efficiency requirement of 98% if any of the stated thresholds are exceeded.

#### *Additional Proposed GP-5A Requirements*

The proposed GP-5A also includes requirements for the following:

(1) *Well Drilling and Hydraulic Fracturing Operations*—which includes requirements to notify the Department at least 24 hours prior to the beginning of either type of operation and ensuring that engines used during the operation meet the applicable nonroad engine standards. Records of engine usage are required to facilitate emissions calculations.

(2) *Well Completion Operations*—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa. This includes the requirement to perform a reduced emissions completion, also known as Green Completion, to notify the Department at least 24 hours prior to the beginning of flowback and to keep records of the duration of flowback and the disposition of gas during the flowback period.

(3) *Wellbore Liquids Unloading Operations*—which includes a requirement that an operator remain onsite for the duration of a manual unloading operation.

#### *Additional Proposed GP-5 Requirements*

The proposed GP-5 also includes requirements for the following:

(1) *Stationary Natural Gas-Fired Combustion Turbines*—which includes a BAT requirement for turbines rated above 1,000 hp to meet emission limits for NO<sub>x</sub>, CO, NMNEHC and PM.

(2) *Centrifugal Compressors*—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa, except that the required control efficiency is 98%. There

are also recordkeeping requirements for centrifugal compressors that are not subject to 40 CFR Part 60, Subpart OOOOa.

A Technical Support Document (TSD) will also be made available for review. The TSD provides background information and the details of the Department's BAT analyses that serve as the bases for the conditions found in both General Permits.

#### *Proposed Revisions to the Air Quality Exemptions Technical Guidance Document*

The proposed revisions to the Air Quality Exemptions document include:

(1) Dividing Category Number 38 into two separate categories, Category Number 38a and Category Number 38b.

(2) Category Number 38a will be applicable only to conventional and unconventional natural gas well sites that were constructed or modified between August 10, 2013, and the effective date of the proposed amendment.

(3) Category Number 38b will be applicable only to conventional natural gas well sites constructed after the effective date of the proposed amendment.

#### *Public Comment*

Interested persons may submit written comments on the Draft General Permits and Air Quality Permit Exemption List by Wednesday, March 22, 2017. Comments submitted by facsimile will not be accepted. Comments, including comments submitted by e-mail, must include the originator's name and address. ### **Proposed State Implementation Plan Revision; Base Year Inventory for the Delaware County Nonattainment Area for the 2012 Annual PM<sub>2.5</sub> Fine Particulate Matter National Ambient Air Quality Standard; Public Hearing**

On January 15, 2015, the United States Environmental Protection Agency (EPA) designated Delaware County as a moderate nonattainment area for the 2012 annual fine particulate matter (PM<sub>2.5</sub>) National Ambient Air Quality Standard (NAAQS), effective April 15, 2015, 80 FR 2206 (January 15, 2015). As required by section 189(a)(2)(B) of the Clean Air Act (42 U.S.C.A. § 7513a(a)(2)(B)), a revision to the State Implementation Plan (SIP) demonstrating attainment of the 2012 annual PM<sub>2.5</sub> NAAQS is due to the EPA no later than 18 months after the area's designation as nonattainment, which in this case was October 15, 2016. However, with significant improvements in air quality in the Delaware County Area, this nonattainment area now meets the 2012 annual PM<sub>2.5</sub>

NAAQS based on 2013—2015 quality assured, quality controlled and certified ambient monitoring data.

On December 13, 2016, the EPA finalized a direct final rule indicating that the Delaware County Area is monitoring attainment of the 2012 annual  $PM_{2.5}$  NAAQS, also known as a “Clean Data Determination.” See 81 FR 89868 (December 13, 2016). The issuance of a Clean Data Determination by the EPA suspends certain planning requirements as long as the area continues to attain the 2012 annual  $PM_{2.5}$  NAAQS, including the attainment demonstration, reasonably available control measures, a reasonable further progress plan and contingency measures. The Clean Data Determination does not suspend the base year inventory requirement in section 172(c)(3) of the Clean Air Act (42 U.S.C.A. § 7502(c)(3)). In anticipation of the effective date of the EPA’s rule, the Department is proposing the proposed base year inventory SIP revision for the Delaware County nonattainment area.

The Department is seeking public comment on a proposed SIP revision containing the 2011 comprehensive base year inventory, as required under section 172(c)(3) of the Clean Air Act, for a nonattainment area. The proposed SIP revision is available on the Department’s web site at <http://www.ahs.dep.pa.gov/eComment>.

The Department will provide the opportunity for a public hearing to receive comments on the proposal on March 8, 2017, at 1 p.m. at the Department’s Southeast Regional Office, 2 East Main Street, Norristown, PA.

Persons wishing to present testimony should contact Roma Monteiro, P.O. Box 8468, Harrisburg, PA 17105, at (717) 787-9495 or [rmonteiro@pa.gov](mailto:rmonteiro@pa.gov) to reserve a time. Witnesses will be limited to 10 minutes and should provide two written copies of their comments.

If by Friday, March 3, 2017, no person has expressed an interest in testifying at the hearing, the hearing will be cancelled. The Department will provide public notice on the Bureau of Air Quality webpage at <http://www.dep.pa.gov/Business/Air/BAQ/Pages/default.aspx> if the hearing is cancelled. Persons may also contact the Department to find out if the hearing is cancelled by contacting Roma Monteiro at (717) 787-9495 or [rmonteiro@pa.gov](mailto:rmonteiro@pa.gov).

Persons with a disability who wish to attend a hearing and require an auxiliary aid, service or other accommodation to participate in the proceeding should contact Roma Monteiro at (717) 787-9495 or [rmonteiro@pa.gov](mailto:rmonteiro@pa.gov). TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

The Department must receive comments no later than March 10, 2017. Commentators are encouraged to submit comments using the Department’s eComment system at [www.ahs.dep.pa.gov/eComment](http://www.ahs.dep.pa.gov/eComment) or by e-mail to [ecomment@pa.gov](mailto:ecomment@pa.gov). Written comments can be submitted to the Policy Office, Department of Environmental Protection, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Use “Delaware County PM<sub>2.5</sub>” as the subject line in written communication.

### Temporary Scheduling of Substance: U-47700 (aka PINK) as a Schedule I Controlled Substance

The Secretary of Health (Secretary) of the Department of Health (Department) is issuing this notice of intent to issue a final notice to temporarily schedule the synthetic opioid, 3,4-dichloro-N-[2-(dimethylamino)cyclohexyl]-N-methylbenzamide (also known as U-47700 or PINK) as a schedule I controlled substance under The Controlled Substance, Drug, Device and Cosmetic Act (act) (35 P.S. §§ 780-101—780-144). The Secretary is taking this action because the scheduling of this synthetic opioid in this Commonwealth on a temporary basis is necessary to avoid an imminent hazard to public safety.

At the time of publication in the *Pennsylvania Bulletin*, the Secretary will transmit a copy of the proposed notice to the Attorney General under section 3(d)(4) of the act (35 P.S. § 780-103(d)(4)) for his review. The Attorney General shall, by law, have 30 days from receipt of the proposed notice to provide written comments to the Department, if any.

Any formal order may not be issued before the expiration of 14 days after both:

(i) The date of publication in the *Pennsylvania Bulletin* of this proposed notice of the intention to issue a final notice and the grounds upon which the order is to be issued.

(ii) The date the Secretary transmitted the notice to the Attorney General.

#### Background

The United States Drug Enforcement Administration (DEA) temporarily scheduled this synthetic opioid as a schedule I narcotic under the Federal Controlled Substance Act (CSA) (21 U.S.C.A. §§ 801—971) effective November 14, 2016. Under the CSA, every controlled substance is classified into one of five schedules based upon its potential for abuse, its currently accepted medical use in treatment in the United States and the degree of dependence the drug or other substance may cause. 21 U.S.C.A. § 812. The initial schedules of controlled substances established by Congress are found at 21 U.S.C.A. § 812(c), and the current list of all scheduled substances, including U-47700, is published at 21 CFR Part 1308. See 21 CFR 1308.11(h)(18) (2017).

Section 201 of the CSA (21 U.S.C.A. § 811) provides the United States Attorney General with the authority to temporarily place a substance in schedule I of the CSA for 2 years if he finds that such action is necessary to avoid an imminent hazard to the public safety. The United States Attorney General has delegated his scheduling authority under 21 U.S.C.A. § 811 to the Administrator of the DEA. To find that placing a substance temporarily into schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator of the DEA is required to consider: (1) the substances' history and current pattern of abuse; (2) the scope, duration and significant of abuse; and (3) what, if any, risk there is to the public health. 21 U.S.C.A. § 811(h)(3).

Substances in schedule I are those that have a high potential for abuse, no currently accepted medical use in treatment in the United States and a lack of accepted safety for use under medical supervision. 21 U.S.C.A. § 812(b)(1). The Administrator for the DEA determined that, because U-47700: (1) has a high potential for abuse; (2) has no currently accepted medical use in treatment in the United States; and (3) lacks accepted safety for use under medical supervision, it was necessary to temporarily schedule the substance into Schedule I of the CSA to avoid an imminent hazard to the public safety. The final order temporarily scheduling U-47700 was effective on November 14, 2016, the date of publication in the *Federal Register*, and will be in effect for a period of 2 years, with a possible extension of 1 additional year, pending completion of the regular, permanent, scheduling process.

This synthetic opioid, however, is not currently a scheduled substance in the Commonwealth. The Commonwealth has recently seen an increase in use of U-47700 to mix with other narcotics such as heroin. The substance has a high potential for abuse and is 7.5 times stronger than morphine. It is also widely available over the internet as a "research chemical," allowing for potential widespread use and abuse within the Commonwealth. Because U-47700 poses a substantial risk to the citizens of the Commonwealth, the Secretary has determined to schedule it as a Schedule I controlled substance on a temporary basis. In doing so, the Secretary is acting to protect the citizens of this Commonwealth and bring the Commonwealth into conformity with Federal law.

#### Legal Authority and Action

Under section 3 of the Act, the Secretary shall control all substances listed in schedules I through V of the Act. Under section 3(d) of the act, the Secretary is authorized to schedule any substance on a temporary basis to avoid an imminent hazard to public safety. When determining

whether a substance poses an imminent hazard to public safety, the Secretary is required to consider: (1) the substance's history and current pattern of abuse; (2) the substance's scope, duration and significance of its abuse; (3) the risk to the public health; and (4) whether the substance is controlled under Federal law. When a substance is already controlled under Federal law, the Secretary is not required to take the remaining factors into consideration.

In addition, the Secretary is authorized under section 3(d) of the act to schedule on a temporary basis a substance under one of the schedules in section 4 of the act (35 P.S. § 780-104), regarding schedules of controlled substances, if the substance is not listed in any other schedule in section 4 of the act or 28 Pa. Code §§ 25.72 and 25.75 (relating to schedules of controlled substances; and paregoric) and if no exception or approval is in effect for the substance under section 505 of the Federal Food, Drug and Cosmetic Act (21 U.S.C.A. § 355). As previously noted, the United States Food and Drug Administration has not approved U-47700 for any type of medical use.

Because this substance is a schedule I narcotic under the CSA, the Secretary has the authority to temporarily schedule this substance under the act. Although not required to do so in taking this action, the Secretary has considered: (1) the increased current use of U-47700 in combination with other narcotics; (2) U-47700's addictive nature; (3) the availability of U-47700 through online distributors; and (5) the lack of a valid, medical use for U-47700. Accordingly, the Secretary determined that U-47700 is a danger to public safety.

To revise 28 Pa. Code § 25.72 to conform to any final notice issued by the Secretary under section 3(c) of the Act to temporarily schedule U-47700 as a schedule I controlled substance, the Department plans to promulgate a conforming amendment to 28 Pa. Code § 25.72 through final rulemaking with proposed rulemaking omitted.

Water Quality Standards— Class A Stream Redesignations 25 Pa. Code Chapter 93	Quarter 2, 2017, EQB Consideration, as Final	The regulatory changes included in this rulemaking are the result of stream evaluations conducted by DEP in response to a submittal of data from the Pennsylvania Fish and Boat Commission (PFBC). In this rulemaking, redesignations rely on § 93.4b(a)(2)(ii) to qualify streams for High Quality (HQ) designations based upon their classifications as Class A wild trout streams. DEP staff conducted an independent review of the trout biomass data in the PFBC's fisheries management reports for streams throughout the Commonwealth to ensure that the HQ criteria were met. Based on these data and appropriate regulatory criteria, DEP developed this package of stream redesignations including HQ stream redesignations in the Delaware, Susquehanna and Ohio River basins. Water Quality Management Fee Amendments and NPDES Program Fee Amendments 25 Pa. Code Chapters 91 and 92a	Quarter 3, 2017, EQB Consideration, as Proposed	This rulemaking proposes to amend fees related to water quality management permitting (Chapter 91) and proposes to amend the fee schedule for NPDES permit applications (Chapter 92a). Chapter 91 establishes, among other things, a water quality management (WQM) permitting program for the construction of sewage and industrial waste treatment facilities and for land application of sewage and industrial wastes. DEP began its Chapter 92a annual invoicing and fee collection program in December 2010. Chapter 92a updated the fee schedule for NPDES permit applications for persons to discharge pollutants from point sources into surface waters. In addition, Chapter 92a introduced an annual fee for certain facilities authorized to discharge pollutants by individual NPDES permits. A fee analysis that DEP presented to the EQB in 2014 highlighted that, despite the fee increase in 2010, revenue continues to fall short of expenses, impeding the work of Programs to carry out necessary tasks for protecting water resources in the Commonwealth. Administration of the Storage Tank and Spill Prevention Program 25 Pa. Code Chapter 245	Quarter 3, 2017, EQB Consideration, as Proposed	This rulemaking proposes to amend Chapter 245 to strengthen the underground storage tank (UST) requirements by increasing the emphasis on properly operating and maintaining equipment. Currently, UST owners and operators are required to have spill prevention, overfill prevention, and release detection equipment in place, but are not required to periodically verify the functionality of some of that equipment. The proposed changes are expected to result in improvements in the routine operation, maintenance and monitoring of underground storage tanks. This will help to further reduce the number of releases from underground storage tanks and, in turn, protect public health and the environment. The Radioactive Materials and Decommissioning Program and the Radon Program fee revenue for these program areas is insufficient to cover program costs. ### Petition for Approval of Numbering Plan Area Relief Planning for the 717 NPA

Public Meeting held  
January 19, 2017

*Commissioners Present:* Gladys M. Brown, Chairperson; Andrew G. Place, Vice Chairperson; John F. Coleman, Jr.; Robert F. Powelson; David W. Sweet

*Petition for Approval of Numbering Plan Area Relief Planning for the 717 NPA; P-2015-2510230*

### Order

*By the Commission:*

Before the Commission is a Petition for Reconsideration (Petition) that was filed on behalf of the Pennsylvania telecommunications industry on November 14, 2016, requesting reconsideration of certain parts of the Commis-

sion’s Order entered October 27, 2016, at the above-captioned docket, relating to the implementation of timely area code relief for the 717 Numbering Plan Area (or area code) (October 27th Order). No responses to the Petition were filed. We are now addressing the merits of the Petition. Accordingly, via this Order, the Commission will modify the implementation schedule for the all-services distributed overlay that is to be implemented over the 717 area code.

*Background*

The entirety of the history of area code relief for the 717 area code has been set forth in the October 27th Order. Thus, we will not provide an extensive history herein. In summary fashion, the April NRUF (Number Resource Utilization Forecast) and NPA Exhaust Analysis April 2015 Update (2015 NRUF Report) indicated that the 717 NPA was set to exhaust during the third quarter of 2018. Based upon this projected exhaust date, NANPA notified the Commission and the Industry on July 7, 2015, that NPA relief needed to be addressed. The Industry met via conference call on September 15, 2015, to discuss various relief alternatives. Pursuant to the NPA Relief Planning Guidelines, NANPA distributed an Initial Planning Document (IPD) to the Industry prior to the relief planning meeting. The IPD contained descriptions, maps, general facts and assumptions, and the projected lives of an all-services distributed overlay relief alternative, referred to in the IPD as Alternative # 1, and one two-way geographic split alternative, referred to as Alternative # 2.

During the relief planning meeting, the Industry members evaluated the two relief alternatives, described more fully below:

- Alternative # 1—All Services Distributed Overlay: A new NPA code would be assigned to the same geographic

area as the existing 717 NPA. Alternative # 1 has a projected life of sixty-seven (67) years.

- Alternative # 2—Two-Way Geographic Split: In a two-way geographic split, the exhausting NPA is split into two geographic areas and a new NPA is assigned to one of the areas formed by the split. For Alternative # 2, the proposed split boundary line runs along rate center boundaries in a west-to-east direction. The boundary line runs north of Dry Run, Chambersburg, Fayetteville, Biglerville, York Springs, Dillsburg, Dover, Manchester, Elizabethville, Manheim, Lititz, Ephrata and Denver. The northern portion, referred to in the IPD as Area A, would have a projected NPA life of seventy-one (71) years to exhaust and the southern portion, Area B, would have a projected NPA life of sixty-two (62) years to exhaust.

At the September 15th meeting, the participants discussed the attributes of the relief alternatives and reached consensus to recommend to the Commission Alternative # 1, the all services distributed overlay plan, as the preferred method of relief for the 717 NPA. All existing customers would retain the 717 area code and would not have to change their telephone numbers. Consistent with FCC regulations, the relief plan would require ten-digit dialing for all calls within and between the 717 NPA and the new NPA. The industry recommends that all local and toll calls between the 717 NPA and the new NPA be dialed as 10-digits, or permissively as 1+10 digits at each service provider’s discretion. All local and toll calls originating in the 717 NPA or the new NPA and terminating in other NPAs (NPAs other than the 717 or new NPA) must be dialed as 1+10 digits. Operator services calls would require customers to dial 0+10 digits. The following table illustrates the recommended dialing plan:

<i>Type of Call</i>	<i>Call Terminating in</i>	<i>Dialing Plan</i>
Local & Toll Calls	Overlay Home NPAs (HNPA)	10 digits (NPA-NXX-XXXX)*
Local & Toll Calls	Foreign NPA (FNPA) outside of overlay	1+10 digits (1+NPA-NXX-XXXX)
Operator Services (Credit card, collect, third party)	HNPA or FNPA	0+10 digits (0+NPA-NXX-XXXX)

\*1+10 digit dialing for all HNPA and FNPA calls permissible at each service provider’s discretion.

When the 717 NPA completely exhausts, all Central Office (CO) code assignments will be made from the new overlay area code. Industry participants also reached consensus to recommend to the Commission a thirteen-month schedule for implementation of the overlay. The recommended schedule was as follows:

*Recommended Implementation Schedule for All Services Distributed Overlay*

<i>Event</i>	<i>Timeframe</i>
Network Preparation Period	6 months
Permissive 10-Digit Dialing and Customer Education Period (Calls within 717 NPA can be dialed using 7 or 10 digits) Mandatory dialing begins at the end of the Permissive Dialing Period	6 months
First Code Activation after end of Permissive Dialing Period (Effective date for codes from the new NPA)	1 month (after Mandatory Dialing Date)
Total Implementation Interval	13 months

The Industry stated that adhering to the proposed timeframe would avoid the denial or delay of service to telecommunications providers' customers due to the unavailability of CO codes.

On October 23, 2015, Neustar, Inc., in its role as the neutral third party NPA relief Planner for Pennsylvania, and acting on behalf of the Pennsylvania industry, filed a petition with the Commission requesting approval of the industry's consensus recommendation to implement an all-services distributed overlay for the geographic area covered by the 717 NPA. However, by Order entered March 10, 2016, at Docket No. P-2015-2510230, the Commission suspended taking action on the industry's October 23, 2015 Petition pending its request for the submission of any written comments from interested parties residing in the geographic region covered by the 717 area code on the relief plan in the proceeding and the scheduling of a public input hearing so that oral testimony related to the form of relief for the 717 area code could be received. The Commission conducted a "smart" public input hearing on August 9, 2016.

By an Order entered October 27, 2016, the Commission adopted the industry's recommendation to implement an all-services distributed overlay for the 717 area code.<sup>1</sup> In that same Order, however, the Commission established a nine-month implementation schedule for the all-service distributed overlay instead of the proposed thirteen-month implementation schedule. Hence, the implementation schedule for the new overlay code for the 717 area code is as follows:

<i>Event</i>	<i>Time Frame</i>
Network Preparation Period	No later than March 1, 2017 at 12:01 AM EST

<sup>1</sup> By a press release dated November 8, 2016, Neustar, announced that "223," has been assigned as the overlay area code to the existing 717 area code that serves the South Central area of Pennsylvania, including the cities of Harrisburg, Lancaster, Lebanon, York and Gettysburg.

<i>Event</i>	<i>Time Frame</i>
Permissive 10-Digit Dialing and Customer Education Period (Calls within 717 NPA can be dialed using 7 or 10 digits) However mandatory ten-digit dialing period begins with first code activation	3 months prior to exhaust
First Code Activation after end of Permissive Dialing Period	1 month prior to exhaust
Total Implementation Interval	9 months

*Petition for Reconsideration*

On November 14, 2016, a Petition for Reconsideration was filed by Joint Industry Members.<sup>2</sup> In the Petition, the Joint Industry Members request specific alterations to the implementation so as to "avoid unintended anti-consumer consequences such as implementation errors and customer confusion." Petition at 1. The Joint Industry Members state that, instead of adopting uncertain trigger dates of "one month" or "three months" to exhaust, the Commission should set specific dates proposed by the industry for permissive ten-digit dialing and the first code assignment from the new overlay NPA—dates that provide sufficient time for proper customer education, customer preparation for the dialing changes, and orderly implementation. Id. They assert that it is critical that the Commission allow the industry establish firm implementation dates now, rather than waiting until the 717 area code is only three months to exhaust, so that carriers have adequate lead time to get the necessary notifications out to customers in enough time that customers can react and adapt. Petition at 2.

Additionally, the Joint Industry Members state that the Commission should ensure that there is sufficient time for customers to be educated and make the necessary changes to accommodate the new overlay area code. Id. They assert that compressed and uncertain time frames risk customer confusion or inaction, and implementation errors. Id. They request the since the 717 NPA is set to exhaust the third quarter of 2017, the Commission should set an exhaust date of September 30, 2017, which they assert is consistent with the exhaust range provided by NANPA to the Commission. Id. They state that this would allow for an 11-month implementation interval, as opposed to a nine-month implementation interval, and which is more aligned with the industry's recommendation of a 13-month implementation interval. Id.

Specifically, the Joint Industry Members propose the following implementation schedule for the 223 overlay code to the existing 717 area code:

<i>Event</i>	<i>Time Frame</i>
Completion of Network Preparation Period	March 4, 2017 (Sat)
Start of Permissive 10-Digit Dialing and Customer Education Period (Calls within 717 NPA can be dialed using 7 or 10 digits)	March 4, 2017 (Sat)

<sup>2</sup> Verizon Pennsylvania LLC, MCImetro Access Transmission Services LLC d/b/a Verizon Access Transmission Services and Celco Partnership d/b/a Verizon Wireless (collectively, "Verizon"); AT&T Corp. and Teleport Communications America, LLC (collectively, "AT&T"); T-Mobile Northeast LLC, T-Mobile Central LLC and Voicestream of Pittsburgh, L.P. (collectively, "T-Mobile"); Sprint Communications Company L.P. and Sprint Spectrum L.P. (collectively, "Sprint"); The United Telephone Company of Pennsylvania LLC d/b/a CenturyLink (CenturyLink); and Windstream D&E, Inc., Windstream D&E Systems, LLC and US LEC Pennsylvania, LLC (collectively, "Windstream") (collectively referred to hereinafter as "Joint Industry Members").

<i>Event</i>	<i>Time Frame</i>
End of the Permissive Dialing Period and start of Mandatory 10-digit dialing	August 26, 2017 (Tues)
First Code Activation after end of Permissive Dialing Period	September 26, 2017 (Tues)
Total Implementation Interval	11 months

By an Order entered December 8, 2016, at the above-captioned docket, the Commission granted reconsideration, within the meaning of Pa.R.A.P. Rule 1701(b)(3), pending review of, and consideration on, the merits of the Petition.<sup>3</sup> The Commission is now addressing the merits of the Petition via this Order.

*Discussion*

The Public Utility Code (Code) establishes a party's right to seek relief following the issuance of our final decisions pursuant to Subsections 703(f) and (g), 66 Pa.C.S. § 703(f) and (g), relating to rehearings, as well as the rescission and amendment of orders. Such requests for relief must also be consistent with Section 5.572 of our Regulations, 52 Pa. Code § 5.572, relating to petitions for relief following the issuance of a final decision. The standards for granting a Petition for Reconsideration were set forth in *Duick v. Pennsylvania Gas and Water Company*, 1982 Pa. PUC Lexis 4, \*12-13 (1982):

A petition for reconsideration, under the provisions of 66 Pa.C.S. § 703(g), may properly raise any matters designed to convince the Commission that it should exercise its discretion under this code section to rescind or amend a prior order in whole or in part. In this regard we agree with the Court in the Pennsylvania Railroad Company case, wherein it was said that: “[p]arties. . . , cannot be permitted by a second motion to review and reconsider, to raise the same questions which were specifically considered and decided against them . . .” What we expect to see raised in such petitions are new and novel arguments, not previously heard, or considerations which appear to have been overlooked or not addressed by the Commission. Furthermore, the Commission has held that a Petition for Clarification must meet the same standard as a Petition for Reconsideration. See Petition of PECE Energy Company for Approval of its Revised POR Program, Docket No. P-2009-2143607 (Opinion and Order issued August 10, 2010).

In considering this Petition, we are reminded that we are not required to consider expressly or at great length each and every contention raised by a party to our proceedings. *University of Pennsylvania v. Pa. Public Utility Commission*, 485 A.2d 1217 (Pa. Cmwlth. 1984). Any argument that is not specifically addressed herein shall be deemed to have been duly considered and denied without further discussion.

Since the industry has raised some legitimate concerns, these are new and novel arguments and, accordingly, we shall exercise our discretion to reconsider our prior determination on this issue.

<sup>3</sup> Pursuant to Rule 1701 of the Pennsylvania Rules of Appellate Procedure, Pa.R.A.P. Rule 1701, the Commission must act to grant a petition for reconsideration within thirty days of the date of entry of the order for which reconsideration is sought, or otherwise lose jurisdiction to do so if a petition for review is timely filed. The thirty-day period within which the Commission had to act upon the Petition for Reconsideration in order to preserve jurisdiction ended on December 14, 2016.

The FCC regulations at 47 CFR § 52.19(a) state that state commissions may resolve matters involving the introduction of new area codes within their states, which includes establishing the necessary dates for the implementation of relief plans. In the instant Petition, the Joint Industry Members assert that the Commission should modify the current implementation schedule in order to establish specific dates for permissive ten-digit dialing, mandatory ten-digit dialing and for the first code activation from the new overlay NPA rather than utilize “uncertain” trigger dates as currently set forth in the implementation schedule. Additionally, the Joint Industry Members also request that the Commission modify the current nine-month implementation schedule established in the October 27th Order for the 223 overlay area to an eleven-month implementation schedule for the new overlay NPA.

Specifically, the industry has requested the Commission to adopt the following modifications to the current implementation schedule for the 223 overlay code:

<i>Event</i>	<i>Time Frame</i>
Completion of Network Preparation Period	March 4, 2017 (Sat)
Start of Permissive 10-Digit Dialing and Customer Education Period (Calls within 717 NPA can be dialed using 7 or 10 digits)	March 4, 2017 (Sat)
End of the Permissive Dialing Period and start of Mandatory 10-digit dialing	August 26, 2017 (Tues)
First Code Activation after end of Permissive Dialing Period	September 26, 2017 (Tues)
Total Implementation Interval	11 months

Neustar has projected the exhaust date for the 717 NPA as the third quarter (3Q) of 2017. Thus, the 717 area code is projected to exhaust its remaining supply of NXX codes some period of time between July 1, 2017, and September 30, 2017, which encompasses the entire 3Q of 2017. Accordingly, out of an abundance of caution and so as to prevent customer confusion regarding the introduction and implementation of the 223 area code ensure adequate consumer education regarding the overlay code, the Commission determines that is in the public interest to revise the timeframe set forth in the October 27th Order so that consumers are not adversely impacted.

The Commission is revising the implementation schedule of the new overlay NPA in this fashion accordingly in the following manner. We direct that all network preparation for the implementation of the new overlay be completed no later than March 4, 2017, at 12:01 a.m. (EST).<sup>4</sup> We believe that this timeframe is sufficient for telecommunications carriers to prepare their individual networks for the new overlay area code.

Per FCC regulations, ten-digit dialing becomes mandatory to dial all numbers in the overlaid geographic area when the overlay code is implemented. Although local calling areas remain the same despite the dialing pattern utilized. Thus, with the implementation of the new 223 overlay area code, seven-digit dialing is no longer permissible or valid and the dialing plan will be as follows:

<sup>4</sup> Network preparation includes but is not limited to ensuring that the telecommunications company equipment allows for ten-digit dialing as FCC regulations direct that an overlay code requires ten-digit dialing for all calls within the 717 NPA and the new NPA and all calls between the 717 NPA and the new NPA.

<i>Dialing Plan for the All Services Distributed Overlay for the 717 NPA</i>		
<i>Type of Call</i>	<i>Call Terminating in</i>	<i>Dialing Plan</i>
Local & Toll Calls	Overlay Home NPAs (HNPA)	10 digits (NPA-NXX-XXXX)*
Local & Toll Calls	Foreign NPA (FNPA) outside of overlay	1+10 digits (1+NPA-NXX-XXXX)
Operator Services Credit card, collect, third party	HNPA or FNPA	0+10 digits (0+NPA-NXX-XXXX)

\*1+10 digit dialing for all HNPA and FNPA calls permissible at each service provider's discretion

However, there is an adjustment period commonly known as a permissive dialing period that precedes the mandatory ten-dialing pattern for the overlay code. The permissive dialing period allows customers to reach numbers in the area that is to be overlaid by either dialing the area code plus the number (ten-digit dialing) or the old way by dialing the seven-digit number.<sup>5</sup> The Commission agrees with the Joint Industry Members that a six-month permissive dialing/customer education interval is the minimum period of time necessary for customers who are accustomed to dialing seven digits for local calls to adapt to dialing ten digits for all calls. Moreover, the six-month permissive dialing interval will provide additional time for alarm companies make any required modifications to customer premises equipment (CPE); PBX customers to prepare for and make equipment and data base changes; and for consumers to reprogram other types of equipment such as life safety systems and medical monitoring devices. Accordingly, the Commission directs that the permissive dialing period commence on March 4, 2017, so that the telecommunications industry can start customer education programs for the 223 overlay NPA, including the fact that when the new overlay area code is finally activated mandatory ten-digit dialing is required in order to complete all calls, meaning dialing the area code and the seven-digit number for local calls and long-distance calls.

The Commission acknowledges that ten-digit dialing has become more prevalent nationwide and overlays, with mandatory ten-digit dialing, have been implemented in southeastern, central, and western Pennsylvania. Thus, we determine that the start of mandatory ten-digit dialing may occur prior to activation or the actual assignment of a NXX code from the 223 overlay NPA. Thus, the start of the mandatory ten-digit dialing will commence August 26, 2017.

Notwithstanding, we direct Neustar not to activate the new overlay NPA or assign any NXX or central office codes from the new overlay before September 26, 2017. The NANPA will comply with this directive and will continue to honor NXX code requests for NXXs in the existing NPA in accordance with the previously-adopted jeopardy procedures for as long as numbering resources are available and the carrier's numbering resources request does not exceed the remaining numbering resources in the 717 area code. Concomitantly, we continue to direct NANPA to provide the Commission with monthly updates on the projected exhaust date of the 717 NPA and on the number of remaining NXX codes in the 717 area code so

<sup>5</sup> During the permissive period, customers are encouraged to make calls using ten-digits. At the end of the permissive period, the mandatory dialing period commences and all calls must be made using the area code plus the seven-digit number (ten-digit dialing). If only the seven-digit number is dialed at this time, the customer will reach a recorded announcement stating they must hang up and redial the number using the area code plus the seven-digit number. This recording will be available permanently.

that the Commission can ensure that no NXX code holders in Pennsylvania, including nonpooling carriers, will have non-discriminatory access to numbers when needed to meet customer demand.

#### *Conclusion*

For the foregoing reasons, the Commission reconsiders its October 27, 2016 Order establishing the implementation schedule for the 223 overlay code to the existing 717 area code; *Therefore,*

#### *It Is Ordered That:*

1. The Joint Industry Petition for Reconsideration is hereby granted and the implementation schedule for the relief plan set forth the October 27, 2016 Order is rescinded and modified consistent with the body of this Order.

2. An all-services distributed overlay shall be implemented over the 717 area code.

3. All NXX code holders in Pennsylvania are directed to complete all network preparation to their systems that is necessary to implement the new overlay NPA over the existing 717 NPA no later than March 4, 2017.

4. From the entry date of this Order, the North American Numbering Plan Administrator shall continue to provide this Commission with monthly updates and provide information on its website on the projected exhaust date of the 717 NPA so that all NXX code holders in Pennsylvania, including nonpooling carriers, can determine how to request numbering resources to meet customer demand. Time to exhaust in months shall be calculated and based on actual carrier demand for numbers. The monthly updates to the Commission shall be addressed to Ms. Deborah Sagerer, Bureau of Technical Utility Services.

5. All NXX code holders in Pennsylvania shall commence their permissive dialing period and customer education program for the 223 overlay code on March 4, 2017.

6. The permissive dialing period shall for the 223 overlay code set forth in Ordering Paragraph No. 5 shall end and mandatory ten-digit dialing shall commence on August 26, 2017.

7. The NANPA shall not activate the 223 overlay NPA until September 26, 2017, and shall not assign any NXX or central office codes from the 223 overlay to be effective prior to September 26, 2017.

8. A copy of this order shall be published in the *Pennsylvania Bulletin* and also posted on the Commission's website at <http://www.puc.pa.gov/>.

9. A copy of this Order shall be served on the Office of Consumer Advocate, the Office of Small Business Advocate and Wayne Milby and Beth Sprague of the North American Numbering Plan Administrator.
