**DEPARTMENT OF
BANKING AND SECURITIES**

**Maximum Lawful Rate of Interest for Residential
Mortgages for the Month of April 2018**

The Department of Banking and Securities (Department), under the authority in section 301 of the act of January 30, 1974 (P.L. 13, No. 6) (41 P.S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of April 2018, is 5 1/2%.

The interest rate limitations under the Commonwealth's usury statute were pre-empted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub.L. No. 96-221). Further pre-emption was instituted with the signing of Pub.L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board or the United States Treasury, or both. The latest yield rate on long-term government securities is 3.00 to which was added 2.50 percentage points for a total of 5.50 that by law is rounded off to the nearest quarter at 5 1/2%.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall

not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approval or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

36-03211A: Iogen D3 Biofuel Partners III, LLC (310 Hunt Club Road East, Ottawa, Ontario K1V 1C1, Canada) for the installation of two (2) 17.6 MMBtu/hr John Zink ZBRID enclosed flares in East Earl Township, **Lancaster County**. The flares will allow the landfill gas (LFG) processing plant to maximize the production of pipeline quality gas during normal operations. The flares will also allow the plant to continue the production of pipeline quality gas during periods when existing third-party LFG users are shut down for maintenance or other causes. The installation of the processing plant was exempted from PA requirements by the Department on 9/12/17 via a Request for Determination. Expected emissions from the project are estimated to be 37.2 tpy CO, 15.6 tpy NO_x, 22.8 tpy PM₁₀/PM_{2.5}, 87.2 tpy SO_x, 16.2 tpy VOC, 5.0 tpy of a single HAP (HCl), and 5.8 of combined HAPs. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an operating permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

Code §§ 127.44—127.46, the Department of Environmental Protection (DEP) is providing notice that it intends to issue an Air Quality Plan Approval (PA-65-00080A) for the construction and operation of a Thermal Sand Reclamation unit including a baghouse at their Scottdale Facility in Scottdale Borough, **Westmoreland County**.

The proposed sources and controls include—One (1) Natural gas-fired Foundry Sand Reclamation unit equipped with three burners; two low NO_x burners each rated at 1.0 MMBtu/hr; and one burner rated at 0.75 MMBtu/hr. The emissions from the process shall be controlled by a baghouse rated at 10,300 ACFM at 250° F.

The potential to emit from the new sources with control will be: 1.5 tpy PM₁₀, 0.4 tpy NO_x, 1.0 tpy CO, and 0.1 tpy VOC. This project is subject to applicable requirements of 25 Pa. Code Chapters 121—145. The Department has determined that the proposed facility satisfies Best Available Technology (“BAT”) requirements. Once compliance with the Plan Approval is demonstrated, the applicant will be required to submit a State Only Operating Permit (“SOOP”) application in accordance with 25 Pa. Code Subchapter F. The proposed Plan Approval includes a limitation on potential emissions, as well as monitoring, record keeping, reporting, work practice, and stack testing requirements.

Scottdale Facility’s Plan Approval application, the Department’s Air Quality Review Memorandum, and the Proposed Air Quality Plan Approval for this project are available for review by any interested party at the Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. 46-00169: Constantia Colmar, Inc. (92 County Line Road, Colmar, PA 18915) located in Hatfield Township, **Montgomery County**, for a renewal of State Only (Synthetic Minor) Operating Permit No. 46-00169. The facility's main sources of air contaminant emissions are a rotogravure press, a flexographic press, automatic parts washing system, three aboveground solvent storage tanks, and a cold parts cleaner. The potential to emit volatile organic compounds (VOCs) from the facility exceeds 25 tons per year, the major facility threshold for the Philadelphia Consolidated Metropolitan Statistical Area. However, Constantia Colmar, Inc., has elected to restrict the VOC emissions from the facility to 24.7 tons/yr, calculated monthly as a 12-month rolling sum. To achieve this, VOC emissions from the presses and automatic parts washing system are controlled by a regenerative thermal oxidizer (RTO).

The only change that has occurred at the facility since the SOOP was last amended in September 2014 is that a (separate) flexographic press at the facility has been decommissioned and is not intended to be operated in the future. The renewal SOOP will continue to include monitoring, recordkeeping, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

Parameter	30-Day Average	Daily Maximum	Instantaneous Maximum
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*			greater than 6.0; less than 9.0

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the

Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

The proposed project includes the construction of a levee system approximately 4,700 feet in length around the Bloomsburg Middle/High School, lands owned by the Town of Bloomsburg, and many residential properties in the floodplain of the Susquehanna River, Warm Water Fishery. The proposed flood risk management system will be comprised of three types:

(1) an earthen embankment levee—located around the Bloomsburg Middle/High School, north side of the Town Park, and where the levee ends at East 12th Street,

(2) a single sided mechanically stabilized earth (MSE) wall—located on the east side of the Bloomsburg Middle/High School and extending 400 feet to the west from Market Street closure on the north side of the Town Park, and

(3) a double-sided mechanically stabilized earth (MSE) wall—located and extending 450 feet to the east from Market Street closure on the north side of the Town Park.

An overflow pipe system will be constructed on 11th Street from Market St/11th Street intersection flowing west to the proposed storm water pump station on the Bloomsburg Middle/High School property. A sanitary sewage pumping station is also proposed adjacent to the storm water pump station to provide continuous sewer service for the affected area during a flood. Where the levee system crosses roadways, vehicular closure structures (i.e. stop-log closure structures) are proposed to provide vehicular access during normal conditions, and closures during flood events. Parking areas impacted by the proposed levee will be relocated as part of this project. Additional flood risk management improvements will be constructed on Catherine Street, and are proposed to consist of a portable levee system to manage only the upper few feet of extreme event flood levels (i.e. Tropical Storm Lee included of magnitude events). Approximately 42 acres is included in the limit of disturbance for this project.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35

P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Public Notice of Final State Water Quality Certification for FERC Pipeline Project

Water Quality Certification Required by Section 401 of the Clean Water Act for the Birdsboro Pipeline Project; DTE Midstream Appalachia, LLC; FERC Docket No. CP17-409; PADEP File No. WQ03-003

Southcentral Region: Waterways & Wetlands Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110.

WQ03-003: Certification Request initiated by **DTE Midstream Appalachia, LLC** (DTE), 333 Technology Drive, Suite 255, Canonsburg, PA 15317, Birdsboro Pipeline Project (Project) in Union, Oley, Rockland, Amity Townships, Birdsboro Borough, **Berks County** (Birdsboro and Fleetwood, PA Quadrangles, From Lat: 40° 16' 10.94"; Long: -75° 47' 59.9" to Lat: 40° 24' 39.14"; Long: -75° 45' 37.94"), U.S. Army Corps of Engineers Philadelphia District.

On May 1, 2017, DTE filed an application with the Federal Energy Regulatory Commission (FERC) under Section 7 of the Natural Gas Act (15 U.S.C.A. § 717f) seeking a certificate of public convenience and necessity to construct and operate its Project (FERC Docket No. CP17-409).

On June 23, 2017, DTE requested a State water quality certification from the Department of Environmental Protection (Department), as required by Section 401 of the Clean Water Act (33 U.S.C.A. § 1341), to ensure that the construction, operation and maintenance of the Project will protect water quality in this Commonwealth consistent with requirements of State law and the Federal Clean Water Act.

The Project consists of the installation of approximately 13.2 miles of new 12-inch diameter natural gas pipeline which will run from the receipt point on Texas Eastern Transmission Company's (TETCO) pipeline in Rockland Township, Berks County, PA to the Birdsboro Power Facility in the Borough of Birdsboro, Berks County, PA. The Project also includes one new pig receiver at the Birdsboro Power Facility and one new meter site at the TETCO interconnect with two new taps on the TETCO pipelines, three mainline valves and a pig launcher, and temporary access roads and staging areas. The Project will transport natural gas to fuel the proposed Birdsboro Power Facility. The Project will impact 29 streams and 21 wetlands.

The Project will require approximately 128 acres of earth disturbance, and permanent impacts to 493 linear feet and temporary impacts to 649 linear feet of streams including the Schuylkill River (WWF) and two Unnamed Tributaries (UNT) to the Schuylkill River (WWF); Monocacy Creek (WWF) and nineteen UNT's to Monocacy Creek (WWF); four UNT's to Manatawny Creek (CWF); Little Manatawny Creek (CWF) and one UNT to Little Manatawny Creek (CWF), 0.2 acre of permanent impacts to floodway, 2.0 acres of temporary impacts floodway, 1.09 acre of temporary wetland impacts, and 1.22 acre of permanent wetland impacts that are associated with permanent right-of-way maintenance.

The Department published notice of its proposed State water quality certification for the Project in the *Pennsylvania Bulletin* on August 12, 2017, (Vol 47 Pa.B. 32). The Department conducted a public hearing on November 2, 2017 to collect public comments on the request for State water quality certification. The Department has reviewed and considered the comments received on this application. The Department created a comment response document for the overall Birdsboro Power Project which is contained in the file and currently available on the Department's web site.

The Department hereby issues Section 401 Water Quality Certification to DTE for the Project and certifies that DTE's construction, operation and maintenance of the Project complies with the applicable provisions of sections 301—303, 306 and 307 of the Federal Clean Water Act (33 U.S.C.A. §§ 1311—1313, 1316 and 1317). DEPARTMENT OF ENVIRONMENTAL PROTECTION

Interstate Pollution Transport Reduction; Proposed 2018 Ozone Season Nitrogen Oxide Emission Limits for Nonelectric Generating Units

The Department of Environmental Protection (Department) is seeking public comment on the proposed Non-electric Generating Unit (non-EGU) 2018 Ozone Season Nitrogen Oxide (NO_x) emission limitations established in accordance with 25 Pa. Code § 145.8(d) (relating to transition to CAIR NO_x trading programs).

Specifically, 25 Pa. Code § 145.8(d) establishes a non-EGU NO_x Trading Program budget of 3,619 tons of NO_x, less a specified adjustment amount, to serve as a Statewide Ozone Season NO_x emissions cap for new and existing non-EGUs. This NO_x emissions cap also applies to the Clean Air Interstate Rule exempt EGUs that are subject to the NO_x Budget Trading Program. If total emissions from all the units exceed the Statewide NO_x emissions cap of 3,438 tons, the owners and operators of non-EGUs must comply with the NO_x emission limitations established under 25 Pa. Code § 145.8(d). The proposed NO_x emissions limitations for individual units ensure that non-EGUs in this Commonwealth continue to meet the emission limits of the NO_x Budget Trading Program.

The Statewide cap for 2017 was not exceeded. Therefore, non-EGUs do not need to purchase allowances to meet their 2017 Ozone Season NO_x emission limitations

established under 25 Pa. Code § 145.8(d). The preliminary NO_x emissions for the 2017 Ozone Season (May through September) reported to the United States Environmental Protection Agency by the owners and operators of the affected non-EGUs are 833 tons. The Department's permanent retirement of 3,438 allowances under 25 Pa. Code § 145.8(b) covers all the NO_x emissions from the affected non-EGUs in 2017.

The NO_x emissions cap provides 181 tons of NO_x emissions for non-EGUs and the other units that need to address their emissions through accounting adjustments, including units that previously participated in the NO_x Budget Trading Program; emissions from these units were below the 25-ton exemption threshold. Adjustments were also made for the permanent retirement of NO_x allowances due to generation of emission reduction credits. The Department will also use a portion of the 181 tons of the budgeted NO_x emissions, if necessary, to address mistakes or miscalculations. This year, the Department is proposing to use 19 tons of the 181 tons of NO_x for account adjustments, leaving 162 tons available for any additional adjustments at the end of the control period.

The Department made accounting adjustments for the following facilities:

Retired Units: Shenango Units Nos. 6 and 9 (the generation of emission offsets for small non-NO_x Budget Trading Program units resulted in a permanent NO_x accounting adjustment of 19 tons).

Exempt Units Removed from Facility: The Naval Surface Warfare Division (Unit 100) had a 25-ton NO_x permit limit. The Naval Surface Warfare Division (Unit 99) had a 1-ton NO_x permit limit. These two 25-ton exempt status units in previous years accounted for a total adjustment of 26 tons of NO_x emissions. The Naval Surface Warfare Division Units 100 and 99 have been permanently removed from the facility and no longer require a 25-ton exemption. The 26 tons of NO_x emissions provided to these two units for their exemption are now available for additional accounting adjustments.

The following "Proposed Non-EGU 2018 Ozone Season NO_x Emission Limits" table lists the following: the facility name, ORIS code, the unit ID for each non-EGU unit, the 2017 NO_x mass or the 2017 Ozone Season emissions, the 2017 heat input for the 2017 Ozone Season, the county location of the facility, the calculated 2018 rate and the 2018 Ozone Season limit.

The Department must receive comments no later than April 2, 2018. Commentators are encouraged to submit comments using the Department's eComment system at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. Written comments may be mailed to the Policy Office, Department of Environmental Protection, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Use "Proposed Non-EGU 2018 Ozone Season NO_x emission limits" as the subject line in written communication.

Questions concerning this notice should be directed to Randy Bordner at (717) 772-3921 or ranbordner@pa.gov. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

Proposed State Implementation Plan Revision; Regional Haze Five-Year Progress Report; Public Hearings

The Department of Environmental Protection (Department) is seeking public comment on a proposed State Implementation Plan (SIP) revision consisting of a Regional Haze Five-Year Progress Report. The proposed SIP revision evaluates progress made in implementing the measures included in the Commonwealth's Regional Haze SIP revision, which was submitted to the United States Environmental Protection Agency (EPA) on December 20, 2010, and which received a limited approval by the EPA (see 77 FR 41279 (July 13, 2012) and 77 FR 48061 (August 13, 2012)) and a limited disapproval by the EPA (see 77 FR 33642 (June 7, 2012)). This proposed SIP revision is submitted in accordance with the visibility and regional haze provisions of sections 169A and 169B of the Federal Clean Air Act (CAA) (42 U.S.C.A. §§ 7491 and 7492) and the Federal Regional Haze Rule in 40 CFR 51.308 (relating to regional haze program requirements).

This proposed SIP revision is intended to address the requirements for periodic reports evaluating progress towards the Reasonable Progress Goals established for mandatory Class I areas where visibility may be impacted by sources in this Commonwealth (40 CFR 51.308(g)). In accordance with 40 CFR 51.308(h)(1), the proposed SIP revision includes a negative declaration that further revision of the 2010 Regional Haze SIP is not needed at

this time to achieve established goals for visibility improvement and emissions reductions.

The Regional Haze Rule in 40 CFR 51.308(i) requires states to consult with the Federal Land Managers (FLM) at least 60 days prior to the scheduled public hearing on the proposed Regional Haze SIP revision. Section 169A(d) of the CAA requires states to include a summary of the conclusions and recommendations of the FLMs in the notice to the public. The FLMs were provided an opportunity for consultation with the United States National Park Service and the United States Department of Agriculture's Forest Service providing comments to the Department; the United States Department of the Interior's Fish and Wildlife Service did not comment. A copy of all comments submitted by the FLMs to the Department, and the Department's responses, is available in Appendix N of the proposed SIP revision.

The proposed SIP revision is available on the Department's web site at www.ahs.dep.pa.gov/eComment. The Department is seeking public comment on this proposed SIP revision.

The Department will hold three public hearings to receive comments on the proposed SIP revision:

- April 19, 2018, at 10 a.m. at the Department's Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA.
- April 19, 2018, at 10 a.m. at the Department's Southeast Regional Office, 2 East Main Street, Norristown, PA.
- April 20, 2018, at 10 a.m. at the Department's Southcentral Regional Office, 909 Elmerton Avenue, Harrisburg, PA.

Persons wishing to present testimony at a hearing should contact Kaylene Wance, P.O. Box 8468, Harrisburg, PA 17105, (717) 787-9257 or kwance@pa.gov to reserve a time. Speakers will be limited to 10 minutes and should provide two written copies of their comments. Persons who do not reserve a time will be able to testify as time allows.

If by 12 p.m. on Monday, April 16, 2018, no person has expressed an interest in testifying at the hearing, the hearing will be cancelled. The Department will provide public notice on the Bureau of Air Quality webpage at <http://www.dep.pa.gov/Business/Air/BAQ/Pages/default.aspx> if the hearing is cancelled. Persons may also contact Kaylene Wance at (717) 787-9257 or kwance@pa.gov to find out if the hearing is cancelled.

Newborn Hearing Screening Program; Change in Reporting Requirements

The Infant Hearing Education, Assessment, Reporting and Referral (IHEARR) Act (11 P.S. §§ 876-1—876-9) requires facilities to report, in a manner prescribed by the Department of Health (Department), the number of newborns and infants screened for hearing and the results of the screening to the Newborn Hearing Screening Program, overseen by the Department's Division of Newborn Screening and Genetics. As previously announced, effective January 1, 2018, submitters (hospitals, birth centers and midwives) are required to report individual level hearing screening results for all hearing screenings completed (inpatient or outpatient screens) for all newborns birthed by the submitter. This report requires information on nonscreened babies including parent refusals, missed screens, babies that were transferred to another hospital and expired babies.

The purpose of this notice is to announce a change in the method of reporting hearing screening results. As of June 1, 2018, all individual level hearing screening reporting must be completed by the newborn screening data system, iCMS. If a submitter was not able to participate in one of the iCMS trainings offered between

November 2017 and February 2018, they must participate in the last training scheduled for April 12, 2018, by teleconference. Submitters must register for this training with iCMS vendor representative Lisa Hudson, (631) 873-4193, Lisa.Hudson@natus.com. The only exception for individual level hearing screening reporting through iCMS will be for midwives who provide a written notification to the Division of Newborn Screening and Genetics that they do not have Internet access. In this case, midwives will be allowed to continue reporting by the Newborn Hearing Screening Program Hearing Screening Reporting Form. The monthly hearing screening aggregate report is still required. For additional information contact Stacey Gustin, Program Manager, Division of Newborn Screening and Genetics, (717) 783-8143, or for speech and/or hearing-impaired persons, call the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users).

Temporary Scheduling of Substance: Fentanyl-Related Substances as Schedule I Controlled Substances

The Acting Secretary of Health ("Secretary") of the Pennsylvania Department of Health ("Department") is issuing this final order temporarily scheduling fentanyl-related substances that are not currently listed in any schedule of The Controlled Substance, Drug, Device and Cosmetic Act ("Act") (35 P.S. §§ 780-101—780-144). This final order will place these substances in schedule I under the Act. The Secretary is taking this action because the scheduling of fentanyl-related substances in this Commonwealth on a temporary basis is necessary to avoid an imminent hazard to public safety.

On February 21, 2018, pursuant to section 3(d)(4) of the Act (35 P.S. § 780-103(d)(4)), the Secretary transmitted to the Attorney General for his review a copy of her notice of intent to issue a final order. On February 24, 2018, the Secretary's notice of intent was published in the *Pennsylvania Bulletin*. On February 26, 2018, the Attorney General agreed in writing that the temporary scheduling of fentanyl-related substances as schedule I controlled substances under the Act was both necessary and appropriate. The Attorney General had, by law, 30 days from receipt of the proposed notice to provide written comments to the Department, if any.

Any formal order may not be issued before the expiration of 14 days after both:

(i) The date of publication in the *Pennsylvania Bulletin* of this proposed notice of the intention to issue a final notice and the grounds upon which the order is to be issued.

(ii) The date the Secretary transmitted the notice to the Attorney General.

This final order temporarily scheduling fentanyl-related substances as schedule I controlled substances is effective for one year from the date of publication of the final order in the *Pennsylvania Bulletin*. The Secretary may, during proceedings to permanently control those substances under the Act, extend the temporary scheduling for up to one additional year. 35 P.S. § 780-103(d)(2).

Background

The United States Drug Enforcement Administration ("DEA") published its intent to classify fentanyl-related substances as schedule I synthetic opioids under the Federal Controlled Substance Act ("CSA") (21 U.S.C.A. §§ 801—971) on December 29, 2017. The DEA's temporary scheduling order was issued upon its publication in the *Federal Register* at 83 FR 5188 (February 6, 2018) and is effective February 6, 2018 until February 6, 2020. If the order is extended or made permanent, the DEA will publish a document in the *Federal Register*.

Section 201 of the CSA, 21 U.S.C.A. § 811, provides the U.S. Attorney General with the authority to temporarily place a substance in schedule I of the CSA for two years if he finds that such action is necessary to avoid an imminent hazard to the public safety. The Attorney General has delegated his scheduling authority under 21 U.S.C.A. § 811 to the Administrator of the DEA. To find that placing a substance temporarily into schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator is required to consider: (1) the substances' history and current pattern of abuse; (2) the scope, duration and significance of abuse; and (3) what, if any, risk there is to the public health. 21 U.S.C.A. § 811(h)(3).

The Administrator for the DEA determined that because fentanyl-related substances have: (1) a high potential for abuse; (2) no currently accepted medical use in treatment in the United States; and (3) a lack of accepted safety for use under medical supervision, it was necessary to temporarily schedule I of the CSA to avoid an imminent hazard to the public safety. 83 FR 5190 (February 6, 2018). A substance may be temporarily scheduled if it is not listed in any other schedule under section 202 of the CSA, 21 U.S.C.A. § 812, or if there is no exemption or approval in effect for the substance under section 505 of the Federal Food, Drug, and Cosmetic Act ("FD&C Act"), 21 U.S.C.A. § 355. If such an exemption or approval is in effect under section 505 of the FD&C Act with respect to a substance that falls within the definition of a fentanyl-related substance set forth in this notice and final notice, such substance will be excluded from the temporary scheduling order.

The DEA has further determined that its current temporary scheduling notice would define fentanyl-related substances to include any substance that is structurally related to fentanyl by one or more of the following modifications:

1. Replacement of the phenyl portion of the phenethyl groups by any monocycle, whether further substituted in or on the monocycle;

2. Substitution in or on the phenethyl group with alkyl, alkenyl, alkoxy, halo, haloalkyl, amino or nitro groups;

3. Substitution in or on the piperidine ring with alkyl, alkenyl, alkoxy, ester, ether, hydroxyl, haloalkyl, amino or nitro groups;

4. Replacement of the aniline ring with an aromatic monocycle whether further substituted in or on the aromatic monocycle; and/or

5. Replacement of the N-propionyl group by another acyl group.

83 FR 5191-5192 (February 6, 2018). The DEA's temporary scheduling order includes all substances that fall within the above definition—even if such substances have not yet emerged on the illicit market in the United States or the Commonwealth. The DEA further noted in its temporary scheduling order that none of the substances being temporarily controlled has a currently accepted medical use in treatment in the United States.

In this Commonwealth, fentanyl-related substances are not currently scheduled. The Commonwealth has recently seen an increase in use of the drug to mix with heroin and other substances (such as cocaine and methamphetamine) or used in counterfeit pharmaceutical prescription drugs. Consequently, users who buy these substances on the illicit market are often unaware of the specific substance they are actually consuming and the associated risk with that substance. Fentanyl-related substances have a high potential for abuse and are approximately 100 times stronger than morphine. Typically, these substances are manufactured outside the United States by clandestine manufacturers and then smuggled into the United States. They are also widely available over the internet as a “research chemical,” allowing for potential widespread use within the Commonwealth.

These factors, in addition to fentanyl-related substances not currently listed in any schedule and having no currently acceptable medical use in the United States, show that fentanyl-related substances pose a substantial risk to the public. This has prompted the Secretary to schedule fentanyl-related substances as schedule I controlled substances on a temporary basis. In doing so, the Secretary is acting to protect the citizens of this Commonwealth and bring the Commonwealth into conformity with Federal Law.

Legal Authority and Action

Under section 3 of the Act, the Secretary shall control all substances listed in schedules I through V of the act. Under section 3(d) of the Act, the Secretary is authorized to schedule any substance on a temporary basis to avoid an imminent hazard to public safety. When determining whether a substance poses an imminent hazard to public safety, the Secretary is required to consider: (1) the substance's history and current pattern of abuse; (2) the substance's scope, duration and significance of its abuse; (3) the risk to the public health; and (4) whether the substance is controlled under Federal law. 35 P.S. §§ 780-103(a)(4), (a)(5), (a)(6), and (a)(8) When a substance is already controlled under Federal law, the Secretary is not required to take into consideration the remaining factors in section 780-103(a) of the Act.

In addition, the Secretary is authorized under section 3(d) of the Act, to schedule on a temporary basis a substance under one of the schedules in section 4 of the act (35 P.S. § 780-104), regarding schedules of controlled substances, if the substance is not listed in any other schedule in section 4 of the Act or 28 Pa. Code §§ 25.72 and 25.75 (relating to schedules of controlled substances; and paregoric) and if no exception or approval is in effect for the substance under section 505 of the Federal Food, Drug and Cosmetic Act (21 U.S.C.A. § 355). As previously noted, the FDA has not approved fentanyl-related substances not currently listed in any schedule under the CSA for any type of medical use.

Because fentanyl-related substances are not currently listed in any schedule of the CSA, the Secretary has the

authority to temporarily schedule fentanyl-related substances under the Act. Although not required to do so in taking this action, the Secretary has considered: (1) the increased current use of fentanyl-related substances in combination with other substances; (2) fentanyl-related substances' addictive nature; (3) the fact that fentanyl-related substances are approximately 100 times more potent than morphine; (4) the availability of fentanyl-related substances through on-line distributors; and (5) the lack of a valid, medical use. Accordingly, the Secretary determined that fentanyl-related substances are a dangerous hazard to public safety.

To revise 28 Pa. Code § 25.72 to conform to this final order issued by the Secretary under section 3(d) of the Act to temporarily schedule as schedule I controlled substances fentanyl-related substances that are not currently listed in any schedule under the Act, the Department plans to promulgate a conforming amendment to 28 Pa. Code § 25.72 through final rulemaking with proposed rulemaking omitted.

The identifying information from a Qualifying Ticket may be submitted only once in the Game. (3) The entry periods for each Game drawing will be posted to the Pennsylvania Lottery's publicly accessible website.

(4) Each entrant will have the opportunity to play an optional, virtual non-prize-determinative interactive game that may reveal a predetermined instant cash prize or a predetermined prize that multiplies the number of entries the entrant receives by entering a Qualifying Ticket (the "Entry-multiplier Prize"). Each Qualifying Ticket will have a predetermined ticket file assigned at the time the ticket is printed that will determine the outcome of the non-prize-determinative game play.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Corporate Federal Income Tax Rate Changes and the Effects on Pennsylvania Telecommunications Carriers and Ratepayers; Request for Public Comments; M-2018-2641242

On March 2, 2018, the Pennsylvania Public Utility Commission (Commission) issued a Secretarial Letter to alert telecommunications carriers that their existing price cap rates, rates for interconnection service, and rates for other retail and wholesale services are under review as they may not be just and reasonable, as required by 66 Pa.C.S. § 3015(g) (relating to alternative forms of regulation), following the reduction in their Federal income tax rate through the Tax Cuts and Jobs Act (TCJA) (Pub.L. No. 115-97). The Commission seeks to determine the effects of the TCJA on the tax liabilities of Commission-regulated telecommunications public utilities for 2018 and future years and the feasibility of reflecting the impacts in the rates charged to Pennsylvania utility ratepayers.

Under the TCJA, effective January 1, 2018, various provisions of the Tax Reform Act of 1986 have been repealed or amended and one of these modifications is a reduction in the corporate Federal Income Tax (FIT) rate from 35% to 21%. Commission-regulated public utilities are corporations subject to the FIT. Therefore, the Commission has directed that specified telecommunications carriers provide responses to data requests designed to calculate, among other things, the net effect on income tax expense, price cap rates, rates for interconnections service, and rates for other retail and wholesale services as a result of implementation of the TCJA.

The Commission has further requested that interested parties submit comments addressing: (1) all provisions, under either 66 Pa.C.S. Chapter 30 (relating to alternative form of regulation of telecommunications services), the telecommunications carriers' alternative regulation plans, or any other provision of 66 Pa.C.S. (relating to Public Utility Code) and Commission regulations affecting the carriers' or the Commission's ability to adjust customer rates to account for the tax changes, including the rate reductions in the TCJA; and (2) whether the Commission should adjust current retail and wholesale rates to reflect the effect of the tax rate reductions. If the answer to the second question is yes, the Commission seeks comment on the appropriate negative surcharge or other methodology to permit immediate modifications to consumer rates and whether such surcharge or other methodology should provide that any refunds to customers due to these tax rate reductions be effective as of January 1, 2018. Responses to the data requests and comments are due on, or before, March 27, 2018.

The Secretarial Letter and data requests regarding telecommunications public utilities can be found on the Commission's web site under docket number M-2018-2641242.

STATE HORSE RACING COMMISSION

Administrative Hearing Bond

The State Horse Racing Commission (Commission) provides notice that on February 27, 2018, at its regularly scheduled public meeting, it issued an Order adopting procedures for the submission of an administrative hearing bond (appeal bond) in the amount of \$750 along with a timely written request for a hearing before the Commission. The appeals to the full Commission are typically from determinations by the Commission's Board of Judges and Stewards after an initial hearing. This Order was adopted under the authority of 3 Pa.C.S. § 9311(h) (relating to State Horse Racing Commission), under Administrative Docket No. 2018-2.

The general purpose of the Order is: (1) to bring consistency and uniformity between standardbred regulations which presently require the submission of a \$250 bond and thoroughbred regulations which do not contain a bond requirement; (2) to, at least in part, ensure that appellants engage in a thoughtful and accurate assessment of the merits of their matter prior to seeking an appeal hearing before the Commission; and (3) to attempt to reduce instances of snap appeals which are thereafter withdrawn, but in which the Commission has incurred administrative costs associated with scheduling those hearings.

In summary, the Order requires licensees to submit a \$750 bond in conjunction with a written and timely request for an administrative hearing before the Commission. This Order will become effective on May 1, 2018.
