LAND RECYCLING AND ENVIRONMENTAL REMEDIATION**UNDER ACT 2, 1995
PREAMBLE 1****Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area,

the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the mediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the mediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public re-

view during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

36-05008J: Tyson Foods, Inc. (403 S. Custer Avenue, New Holland, PA 17557) for the construction of a new poultry fryer and oven, and installation of three (3) wet scrubbers for the Line 2 operations in Earl Township, **Lancaster County**. Along with the installation of the new equipment, the facility is also requesting production increases of its poultry products on the facility's Line 1 & Line 9 operations. The expected net increase in facility emissions as a result of the proposed changes are: 3.69 tpy of VOCs, and 0.64 tpy of PM. The facility is a State Only facility. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

17-00066B: Forum US, Inc. (PO Box 897, Gainesville, TX 76241-0897) for the construction of a paint spray booth equipped with overspray panel filters, a direct-fired gas heated air make-up unit, and nine (9) additional welding station installations as part of recent changes to increase their facility's production capacity at the Clearfield Plant located in Lawrence Township, **Clearfield County**.

The Department of Environmental Protection's (Department) review of the information submitted by Forum US, Inc. indicates that the air contamination sources to be constructed will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the applicable standards in Subpart XXXXXX of 40 CFR Part 63, the applicable miscellaneous metal part coating emission limitations of 25 Pa. Code § 129.52d, and the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. The emission increases because of the increased production capacity will not result in change to the Forum US, Inc./Clearfield Plant facility with respect to Title V permitting, and this facility is required to stay below the thresholds for a Title V facility or major stationary source as it is subject to synthetic minor limitations on coating volume used, and VOC and HAP content limitations under the applicable BAT and miscellaneous metal part coating regulations, as identified previously. Based on these findings, the Department proposes to issue a plan approval for the proposed construction.

The emission from each proposed source will not exceed the following limits: paint spray booth (Source ID P101B)/overspray panel filters (ID C101B)—0.01 grain/dscf of particulate matter; all coatings used in Source ID P101B—15.75 tons in any 12 CMP for volatile organic compounds (VOCs) and 6.30 tons in any 12 CMP for any combination of hazardous air pollutants (HAPs); facility wide VOC and Xylene emissions from organic clean-up solvents will be limited with throughput restrictions that effectively limits VOCs and HAPs emitted from cleaning solvents to 1.36 and 0.6 ton in any 12 CMP, respectively; facility wide Xylene emissions from "as applied" coating, thinner and organic clean-up solvents—9.9 tons in any 12 CMP. The gas heated air make-up unit (Source ID P102B) is subject to a work practice requirement to operate and maintain in accordance with manufacturer recommended specifications and with good operating practices. The potential to emit for the new and existing welding stations (Source ID P400) is equal to 1.8 tpy of PM₁₀ and 1 tpy of HAPs, based on the restriction to use consumable electrodes with the same or less potential emissions as the FCAW process E71T electrode type.

In addition to the emission limitations, the following is a brief description of the types of conditions the Department intends to place in the plan approval in order to ensure compliance with all applicable air quality regulatory requirements.

Volume used limitations on coatings, as applied, and on organic clean-up solvents used for cleaning of paint application, storage, mixing and conveying equipment for Source IDs P101, P101B and P103, as well as testing, monitoring, recordkeeping, work practice requirements, and reporting conditions to verify compliance with the emission limitations and all applicable regulatory requirements.

As discussed previously, the facility is a State Only facility. If the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for Plan Approval 17-00066B, the requirements established in the plan approval will be incorporated into State Only Operating Permit 17-00066 pursuant to the administrative amendment provisions of 25 Pa. Code section 127.450.

All pertinent documents used in the evaluation of the application are available for public review during normal business hours at the Department's Northcentral Regional office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review must be made by calling 570-327-3693.

14-00003J: The Pennsylvania State University (208 Office of Physical Plant Building, University Park, PA 16802-1119) for the construction of an anaerobic digester, a combined heat and power generating process with a reciprocating internal combustion engine served by a biogas fuel conditioning system and a flare as part of the Agricultural Digester and Dairy Barn Replacement Project at the PA State Univ/Univ Park Campus facility. The site location for the proposed sources and project is in College Township, **Centre County**.

The Department of Environmental Protection's (Department) review of the information submitted by the applicant indicates that the air contamination sources to be constructed will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the applicable Federal

standards in Subpart JJJJ of 40 CFR Part 60, the applicable State regulations of 25 Pa. Code Chapters 121—145 including the best available technology (BAT) requirements of 25 Pa. Code §§ 127.1 and 127.12. The emissions increases as result of the proposed project are not significant, so the proposed project is not subject to major New Source Review as codified in 25 Pa. Code Chapter 127, Subchapters D and E. Based on these

If the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for Plan Approval No: 14-00003J, the requirements established in the plan approval will be incorporated into the facility's Title V operating permit via an administrative amendment pursuant to 25 Pa. Code § 127.450.

The plan approval conditions include boilerplate General and Site Level Plan Approval Requirements in Sections B and C of 14-00003J. The following is a brief description of the conditions for Source ID P201, which the Department intends to place in the plan approval in order to ensure that the proposed project is constructed and operated in compliance with all of the applicable regulatory requirements.

Under BAT, and good air pollution control practice (25 Pa. Code § 127.12b), the applicant shall develop an operation and maintenance plan for Source ID P201 within 180 days following start-up of Source ID P201. The purpose of the O&M plan is to ensure that all sources and elements of Source ID P201 are operated and maintained in continuous compliance with the plan approval conditions and emission limits.

Under BAT, and good air pollution control practice, the applicant shall generate and keep records of the following information, date, time and result of each site-boundary walk-around inspection, all routine maintenance and inspection procedures performed on Source ID P201, biogas total sulfur content and quality (CH_4 and CO_2 composition) monitoring data, the total quantity of biogas consumed in the engine and the open flare, any alarms triggered during operation of Source ID P201 and the corrective actions which were taken to mitigate and/or prevent future occurrence.

Notice is hereby given pursuant to 25 Pa. Code §§ 127.44(b) and 127.424(b), that the Pennsylvania Department of Environmental Protection (DEP) intends to issue Plan Approval 10-028K to Armstrong Cement & Supply Corp. for the installation of a selective non-catalytic reduction system (SNCR) at the company's facility located at 100 Clearfield Road, Winfield Township, Butler County. The facility currently has a Title V permit No. 10-00028. The Plan Approval will subsequently be incorporated into the Title V Operating Permit through an administrative amendment in accordance with 25 Pa. Code § 127.450.

Plan Approval No. 10-028K is for the installation of a selective non-catalytic reduction system (SNCR) as NO_x control measures for the existing Kilns 1 and 2 (Source IDs 101 & 121). The subject controls are being installed in order to comply with the presumptive RACT II emission limits of 3.88 lbs NO_x per ton of clinker produced, with compliance to be verified via existing continuous emission monitoring systems (CEMS). Based on the information provided by the applicant and DEP's own analysis, emissions from the subject source(s) will not exceed 582 tons of nitrogen oxides per year, which represents a decrease from previously permitted levels.

The permittee will be required to monitor and maintain records of SNCR operating parameters. The Plan Approval will contain additional monitoring, recordkeeping and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

Copies of the application, DEP's analysis, and other documents used in the evaluation are available for public inspection between the hours of 8 a.m. and 4 p.m. weekdays at the following address. To make an appointment, contact Records Management at 814-332-6340.

The Department intends to issue a renewal Title V Operating Permit for the electric generation facility located in West Mahanoy Township, **Schuylkill County**. As a major source, the facility is subject to the Title V permitting requirements of the Clean Air Act Amendments as adopted by the Commonwealth under 25 Pa. Code Chapter 127, Subchapter G.

The main sources at this facility consist of two fluidized bed boilers, an auxiliary boiler, ash handling systems, bottom ash classifier, and a diesel fire pump. The sources are controlled by baghouses and bin vent filters. These sources have the potential to emit major quantities of regulated pollutants above Title V emission thresholds.

On April 23, 2016, the Pennsylvania Department of Environmental Protection (PADEP) published 25 Pa. Code §§ 129.96—129.100, Additional RACT Requirements for Major Sources of NO_x and VOC, also known as Reasonably Available Control Technology (RACT) 2. Gilberton Power Co./John B. Rich Memorial Power Station qualifies as a major source of NO_x emissions because facility-wide potential NO_x emissions are above the RACT 2 major source threshold (i.e., 100 tons per year). As a result, the NO_x-emitting operations at the facility will be subject to the provisions of the RACT 2 rule. The NO_x emitting sources at the facility are Source ID # 031 and # 032, the Circulating Fluidized Bed (CFB) Boilers, and Source ID # 033, Auxiliary Boiler. The Presumptive RACT 2 requirements are included in the TV operating permit.

The proposed Title V Operating Permit shall include emission restrictions, work practice standards and testing, monitoring, recordkeeping, and reporting requirements to ensure compliance with all applicable Federal and State air quality regulations.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301–303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311–1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501–508 and 701–704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Actions on applications for the following activities filed under the Dam Safety and Encroachments Act (32 P.S. §§ 693.1–693.27), section 302 of the Flood Plain Management Act (32 P.S. § 679.302) and The Clean Streams Law and Notice of Final Action for Certification under section 401 of the FWPCA.

The permanent impacts to the wetlands are due to the placement of fill of 0.42 acre of the wetland to allow for a circular culvert installation and stone aprons at the inlet and outlet of the culvert.

The permanent impacts to the stream are due to the enclosure of 82 lineal feet of the channel within a box culvert. The permanent temporal impacts to the stream, 48 lineal feet, are associated with the provision of scour beds at the upstream and downstream ends of the culvert. The scour beds will be embedded one foot below the existing grades and covered with retained native material.

Stream and wetland impacts incurred at this site will be mitigated through credits acquired from First Pennsylvania Resources—Upper Susquehanna River Mitigation Banks Phases I & II. Bradford County Airport Authority has committed credits for 0.42 acre of wetlands from the USRMBII and 106 lineal feet of stream credits from USRMBI.

Request for Comments on the Total Maximum Daily Load (TMDL) Developed for Montour Creek, Perry County

The Department of Environmental Protection (Department) will accept comments as of July 14, 2018, for the proposed Total Maximum Daily Load (TMDL) developed to address aquatic life use impairments in Montour Creek as noted in 2016 Pennsylvania Integrated Water Quality Monitoring and Assessment Report, as initially listed in 1999. Montour Creek is a tributary of Shermans Creek and the greater Susquehanna River basin. The watershed lies near the town of Loysville (and Northwest of Landisville), in Tyrone and Spring Townships, Perry County. Biological impairments were originally noted during bioassessments in the watershed (SCRO, 1999). The source of degradation is related to agricultural activities, including grazing, which effect the Coldwater Fishery (CWF) attributes of Montour Creek. This Commonwealth does not currently have water quality criteria for sediment; therefore, a sediment TMDL endpoint was identified using a reference watershed approach. Based on a comparison to a similar watershed in land use, yet biologically nonimpaired, the maximum sediment loading should still allow water quality objectives to be met. Bixler Run, another CWF, was chosen for comparison and is also a tributary of Shermans Creek, Southwest and Northwest Madison Townships, Perry County.

This proposed TMDL sets allowable sediment loadings within the specifically impaired stream segments of the Montour Creek watershed. The loading was allocated among the land uses of cropland, hay/pasture land and associated stream banks present in the watershed. Data used in these TMDLs was generated using a watershed analysis model (MAPSHED) designed by the Penn State University. The following table shows the estimated current loadings for the watershed and the proposed overall load reductions that are necessary to reach an attaining CWF.

<i>Table 1. Summary of TMDL based load reductions in Montour Creek (lbs./yr. and lbs./d.)</i>						
<i>Source</i>	<i>TMDL</i>	<i>WLA</i>	<i>MOS</i>	<i>LA</i>	<i>LNR</i>	<i>ALA</i>
Sediment	2,624,411.9	31,732.7	262,441.2	2,330,238.0	12,800.0	2,317,438.0

TMDL—Total Maximum Daily Load, WLA—Waste Load Allocation, MOS—Margin of Safety

LA—Load Allocation, LNR—Loads Not Reduced, ALA—Adjusted Load Allocation

Load allocations were distributed to nonpoint sources, specifically all land use sources other than National Pollutant Discharge Elimination System permitted point source discharges with 10% of the TMDL reserved explicitly as a MOS. A search of the Department's online, GIS database, EMAP, identified two, point source discharges within the Montour Creek watershed. 1% of the TMDL was incorporated into the WLA as a bulk reserve to take in account future permit activity. The LNR are the portion of the LA associated with nonpoint sources other than agricultural (croplands, hay/pasture), and associated stream banks. It is equal to the sum of modeled loading on forested land use, wetlands, open space, and development. The ALA represents the remaining portion of the LA distributed among agricultural land and associated stream banks. The TMDL developed for the impaired stream segments within the Montour Creek watershed to establish a reduction in the overall, sediment loading to 25.5%. (or the equal percent reduction, that is, the ALA divided by the summation of the baselines). Data and all supporting documentation used to develop the proposed TMDLs are available by contacting Bill Brown, Environmental Group Manager, Bureau of Clean Water, Central Office, Department of Environmental Protection, Rachel Carson State Office Building, Harrisburg, PA 17105, (717) 783-2951, willbrown@pa.gov. A copy of the proposed TMDLs can be obtained at http://www.dep.state.pa.us/dep/deputate/watermgt/wqp/wqstandards/tmdl/Montour_Run_Sediment_TMDL.pdf.

The Department will consider all comments in developing the final TMDLs, which will be submitted to EPA for final approval. Written comments will be accepted 30 days after publication in the *Pennsylvania Bulletin*, as of July 14, 2018.

Draft Technical Guidance—Substantive Revision

DEP ID: 012-0501-002. **Title:** Environmental Justice Public Participation Policy. **Description:** Historically, minority and low-income residents of this Commonwealth have not had equitable opportunities to participate in decisions that may adversely impact their environment.

This policy outlines opportunities for community involvement and public participation in the individual permit application process in Environmental Justice Areas. The revisions to this policy clarify how individuals living in Environmental Justice Areas may have additional opportunities to engage with the Department and permit applicants through public meetings, public comment periods, public access to permit documents and other measures in the effort to increase participation throughout decision making processes. To accurately capture the number of residents of this Commonwealth living in Environmental Justice Areas, the Department updated its definition of Environmental Justice Area to be "Any census block group with a 30 percent or greater minority population or 20 percent or greater at or below the poverty level as defined by the U.S. Census Bureau."

Written Comments: Interested persons may submit written comments on this draft policy through Tuesday, August 28, 2018. All comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment tool at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. Written comments may be mailed to the Technical Guidance Coordinator, Department of Environmental Protection, Policy Office, Rachel Carson State Office Building, P.O. PATIENT SAFETY AUTHORITY DEPARTMENT OF HEALTH

Draft Recommendations to Ensure Accurate Patient Weights

This document outlines draft recommendations to acute care facilities in this Commonwealth regarding patient weights and provides for a 30-day public comment period. The Patient Safety Authority (Authority) is responsible for submitting recommendations to the Department of Health (Department) for changes in health care practices and procedures which may be instituted for the purpose of reducing the number and severity of serious events and incidents. Once approved by the Department, the Authority is responsible for issuing guidelines to acute care facilities in this Commonwealth. These draft guidelines were approved by both the Authority's Board of Directors and the Secretary of Health.

See the instructions for submitting comments at the end of this document.

Background

Having accurate patient information (for example, age, allergies, laboratory results) helps practitioners select medications, doses and routes of administration.¹ One vital piece of information, the patient's weight, is especially important, because it is used to calculate the appropriate dose of a medication (for example, mg/kg, mcg/kg, mg/m²). A prescribed or dispensed medication dose can differ significantly from the appropriate dose because of missing or inaccurate patient weights.

Patients in oncology treatment, patients with renal insufficiency, or who are elderly, pediatric or neonatal are at greater risk for adverse drug events, because they are more vulnerable to the effects of an error, and their weight may change frequently over short periods of time.² Formulas such as the Cockcroft-Gault equation, which is used to calculate creatinine clearance to aid in the dosing of medications, and the Harris-Benedict formula, which is used to calculate basal metabolic rate, rely on knowledge of an accurate patient weight. Also, both height and weight are needed to use nomograms to determine body surface area and body mass index, for example, when calculating doses for chemotherapy.

In the United States, most patients are weighed in pounds, both in their homes and in health care organizations. But weighing and documenting patients' weights in pounds introduces the need to convert the weight into kilograms—an error-prone process²—to conduct weight-based and other dosing. Another risk when measuring the patient's weight in pounds is failing to convert the weight into kilograms but recording that weight in kilograms (that is, documenting a weight of 200 lbs. as 200 kg instead of 90.9 kg), resulting in more than two-fold dosing errors.

A missing or inaccurate patient weight can cause a prescribed medication dose to be significantly different from the appropriate dose and negatively impact patient outcomes.³ This problem often originates at the beginning of the patient encounter. There are times when patients arriving at hospitals may not be weighed; for example, a patient who is admitted for an emergency or is not ambulatory.² Care units may also not be provided with appropriate scales to weigh patients, such as bed or wheelchair scales. These barriers may lead clinicians to forgo weighing a patient and decide to use a previously

documented weight or estimate a patient's weight.^{4–7} Abundant literature exists highlighting inaccuracies of clinicians and patients or caregivers estimating patient weights and the association of these inaccuracies with medication errors, adverse events and clinical ineffectiveness.^{2,4,7,8}

Analysis of medication reports submitted to the Authority revealed ample evidence that health care organizations in this Commonwealth experience many of these same barriers to obtaining current, accurate patient weights. In 2010, analysis of medication errors associated with patient weights showed that more than 40% of medication reports were categorized as wrong dose/overdosage events, and 27% of all medication reports specifically mentioned mix-ups between pounds and kilograms.⁸ Although few events specifically mentioned that organizations were estimating weights, 27% of medication reports mentioned cases in which patients' documented weights were either higher or lower than their actual weight.

Similar analysis was performed in 2016 to determine whether there was improvement in this area since the publication of the first Advisory. Similar to the results from 2010, the most common type of medication error was wrong dose/overdosage, representing 42% of all medication reports, and 23% of medication reports cited mix-ups between pounds and kilograms.¹ Almost 40% of reports in analysis stated that patients' documented weights were inaccurate compared with their actual weights.

Recommendations^{8,9}

Based on this information, the Authority recommends that licensed acute care facilities in this Commonwealth perform the following procedures regarding patient weights:

1. Organizations must have processes in place to weigh each patient as soon as possible on admission, when a patient experiences a change in condition that may lead to significant changes in his weight, and during each appropriate* outpatient or emergency department encounter, with the exception of emergency situations. The use of estimated, historical or stated weight should be avoided.

*Appropriate encounters include all encounters in which the patient is being seen by a licensed independent practitioner, excluding life-threatening situations where the delay in weighing the patient could lead to serious harm (for example, major trauma). It excludes laboratory and other services that do not prescribe or administer medications.

2. Organizations must have a process in place to measure and document a patient's weight in metric units (for example, grams or kilograms) only. This would include computer information systems, infusion pumps and other medication devices, printouts and preprinted order forms that prompt users to record patient weight.

Considerations

- *Expectation of improved quality care:*
 - o Accurate dosing of weight-based medications by avoiding over-doses or under-doses and subsequent harm due to toxicities or delayed response for patients not being weighed.
 - o Improve patient outcomes and prevent over/under doses by standardizing the unit of measure (for example, g, kg) that is used to dose weight-based drugs and eliminating the need to convert from pounds to kilograms.

- *Implementation feasibility and other relevant implementation practices:*
 - Change in the culture, attitudes and practices regarding the need to actually weigh patients and that the weight should be in metric units only.
 - Locations where a patient's weight is documented may need to be modified, including:
 - Paper-based documents, such as policies, guidelines and protocols and orders sets.
 - Computer-based documentation, including electronic health records.
 - Resources required to assess the number and types of scales within the facility.
 - Need to set current scales to measure in metric units only or purchase scales that weigh only in metric units.
 - Need to purchase metric scales for those locations that do not have scales available to accommodate various patient populations (for example, stretchers with scales, floor scales that can weigh the patient and stretcher).
 - Have charts that provide conversions from kilograms (or grams for pediatric patients) to pounds available near all scales so patients and caregivers can be told the patient's weight in pounds, if requested.
- *Cost of impact to patients, payors and medical facilities:*
 - Purchase of scales where needed.
 - Resources:
 - Make software modifications.
 - Update policies and medication-related forms that include areas to document patient weights.
 - Provide staff education.
 1. Importance of measuring in metric units.
 2. Updates to policies, procedures, protocols, forms and software.
