This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a General Permit. The applications concern, but are not limited to, discharges regarding industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFO). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or Amendment

Section IV	NPDES	MS4 Individual Permit
Section V	NPDES	MS4 Permit Waiver
Section VI	NPDES	Individual Permit Stormwater Construction
Section VII	NPDES	NOI for Coverage under NPDES General Permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 Individual Permits and Individual Stormwater Construction Permits in Sections IV and VI, the Department, based upon preliminary reviews, has made tentative determinations of proposed effluent limitations and other terms and conditions for the permit applications. In accordance with 25 Pa. Code § 92a.32(d), the proposed discharge of stormwater associated with construction activities will be managed in accordance with the requirements of 25 Pa. Code Chapter 102. These determinations are published as proposed actions for comments prior to taking final actions.

A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for public hearings on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

**LAND RECYCLING AND  
ENVIRONMENTAL REMEDIATION**

**UNDER ACT 2, 1995  
PREAMBLE 1**

**Acknowledgment of Notices of Intent to Remediate  
Submitted under the Land Recycling and Envi-  
ronmental Remediation Standards Act (35 P.S.  
§§ 6026.101—6026.907).**

Sections 302—305 of the Land Recycling and Environ-  
mental Remediation Standards Act (act) (35 P.S.  
§§ 6026.302—6026.305) require the Department to pub-  
lish in the *Pennsylvania Bulletin* an acknowledgment  
noting receipt of Notices of Intent to Remediate. An  
acknowledgment of the receipt of a Notice of Intent to  
Remediate is used to identify a site where a person  
proposes to, or has been required to, respond to a release  
of a regulated substance at a site. A person intending to  
use the background standard, Statewide Health Stan-  
dard, the site-specific standard or intend to remediate a  
site as a special industrial area shall file a Notice of  
Intent to Remediate with the Department. A Notice of  
Intent to Remediate filed with the Department provides a  
brief description of the location of the site, a list of known  
or suspected contaminants at the site, the proposed

remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

### PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure

that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

**TV-32-00065: Specialty Tires of America, Inc.** (1600 Washington Street, Indiana, PA 15701-2893), In accordance with 25 Pa. Code §§ 127.424, 127.425 and 127.521, the Department of Environmental Protection (DEP) is providing notice that it intends to issue a modification to an existing Title V Operating Permit (TV-32-00065) to Specialty Tires of America Inc. (“STA”) to incorporate Reasonably Available Control Technology (RACT II) requirements for their existing specialty rubber tires manufacturing at their Indiana Plant facility located in the Borough of Indiana, **Indiana County**.

The previously installed sources include: Steam boiler rated at 70 MMBtu/hr; under-tread cement rated at 40 lbs/hr; tread end cement rated at 25 lbs/hr; green tire spraying operation rated at 40 lbs/hr; other solvent usage rated at 10 lbs/hr; jetzone pellet dryer rated at 3.0 tph; banbury mixers rated at 3.0 tph; four (4) tire buffers rated at 123 tires/hr; carbon black transfer station rated at 123 tires/hr; and eight (8) parts washers. PM emissions are controlled by multiple dust collectors.

After incorporating RACT II requirements, facility-wide potential VOC emissions from all sources will not exceed 117.0 tpy which includes 44.0 tons VOC from under-tread cement, 7.0 tons VOC from tread end cement, 17.0 tons VOC from green tire building, and 49.0 tons VOC from

other solvent usage. This action will reduce allowable VOC emissions from the facility by approximately 60.0 tons annually and will not change the existing expiration date of this operating permit. This facility is subject to applicable requirements of RACT II in accordance with 25 Pa. Code Chapter 129 requirements for major sources of NO<sub>x</sub> and VOC. The facility is not major for NO<sub>x</sub>. STA has limitation on potential emissions, monitoring, record keeping, reporting, and work practice, and performance testing requirements.

STA Title V Operating Permit (“TVOP”) RACT II modification application, the Department’s Air Quality Review Memorandum, and the proposed Air Quality TVOP for this project are available for review by any interested party at the Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. To request a review of the TVOP RACT modification application, to receive an electronic copy of the Department’s Air Quality Review Memorandum, or to receive an electronic copy of the Department’s proposed Air Quality Title V Operating Permit for this project, a person may contact Thomas Kaminski at thkaminski@pa.gov or 412.442.4097.

Any person may submit comments, requests for the Department to hold a public hearing, or protests to the operating permit or a proposed condition thereof, by filing such submissions in writing to the Department at the Southwest Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments.

All comments, requests for a public hearing, and protests to a proposed action, shall be filed with the Department within 30 days of the date that notice of the proposed action was published under 25 Pa. Code § 127.424 (relating to public notice). Comments, requests for a public hearing, and protests must include the name, address and telephone number of the person filing the protest; identification of the proposed permit issuance being opposed (TV-32-00065); and a concise statement of the objections to the permit issuance and the relevant facts upon which the objections are based.

If a public hearing is held, all persons who have properly filed a protest under 25 Pa. Code § 127.426 may appear and give testimony. The applicant, the protestant and other participants will be notified of the decision to hold a hearing (and the time, place and purpose of such hearing) by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification by telephone is sufficient.

Comments, protests and requests for a public hearing should be directed to Jesse S. Parihar, Air Quality Engineering Specialist, Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. (jparihar@pa.gov, Phone 412.442.4030).

### MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

#### *Effluent Limits for Coal Mining Activities*

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

\* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

#### *Effluent Limits for Noncoal Mining Activities*

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

#### FINAL ACTIONS TAKEN FOR NPDES PERMITS AND WQM PERMITS

The Department has taken the following actions on previously received applications for new, amended and renewed NPDES and WQM permits, applications for permit waivers and NOIs for coverage under General Permits. This notice of final action is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or Amendment
Section III	WQM	Industrial, Sewage or Animal Wastes; Discharges to Groundwater
Section IV	NPDES	MS4 Individual Permit
Section V	NPDES	MS4 Permit Waiver
Section VI	NPDES	Individual Permit Stormwater Construction
Section VII	NPDES	NOI for Coverage under NPDES General Permits

Sections I—VI contain actions regarding industrial, animal or sewage wastes discharges, discharges to groundwater, and discharges associated with MS4, stormwater associated with construction activities and CAFOs. Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. The permits and related documents, effluent limitations, permitting requirements and other information are on file and may be inspected and arrangements made for copying at the contact office noted before the action.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law). The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

*Project Location:*

<i>Applicant</i>	<i>Applicant Address</i>	<i>County</i>
Clymer Borough Municipal Authority	470 Adams Street Clymer, PA 15728-1156	Indiana

*Project Description:* The Pennsylvania Infrastructure Investment Authority, which administers the Commonwealth's State Revolving Fund, is intended to be the funding source for this project.

*Problems:* The residents of Clymer Borough are experiencing unpleasant taste and odor issues caused by the presence of hydrogen sulfide and old pipes. The existing pipes are old, asbestos concrete and are leaking in several areas. This proposed project will correct the leakage and antiquated pipes. The new aerator scrubber will remove hydrogen sulfide at the existing water treatment plant. The existing clearwell's roof experienced holes and partial collapse exposing the finished water to contaminants. An emergency permit was issued to Clymer to repair holes and have an interconnection with ICMSA to provide finished water. The clearwell was out of operation for approximately 1 month.

*Description:* The Authority is proposing to install a forced draft aerator for the removal of hydrogen sulfide prior to filtration. In addition, due to the age and condition of the 200,000-gallon tank, it will be replaced along with the plant's above ground clearwell. Also, 7,750 feet of leaking transite waterline will be replaced with 8" C-900 PVC pipe. Installation of 7,750 linear feet of PVC waterline includes 150 3/4" services, 39 gate valves, 11 interconnections, replace 7 existing fire hydrants with new ones, all waterline and appurtenances shall be in Clymer Borough. A new 250,000-gallon water storage tank will be constructed on Clymer Road in Cherryhill Township.

Stockertown Borough	209 Main Street Stockertown, PA 18083	Northampton
Tatamy Borough	423 Broad Street Tatamy, PA 18085	Northampton

*Plan Description:* The purpose of the Plan is to address the wastewater treatment and disposal needs of Stockertown Borough resulting from the inability of the Borough's existing wastewater lagoon treatment facility to consistently achieve compliance with certain stream discharge limits. The chosen solution alternative (identified in the Plan as Alternative 1) provides for abandonment of the existing wastewater treatment lagoons and construction of a 4,000 ft. gravity interceptor sewer line to connect Stockertown's wastewater collection system to Forks Township's existing conveyance system, resulting in the wastewater being transported to and ultimately treated at the Easton Area Joint Sewer Authority's (EAJSA) wastewater treatment facility. The proposed gravity interceptor will be owned, operated, and maintained by Stockertown Borough. The interceptor will also pass through Borough of Tatamy.

To facilitate the chosen alternative, the Borough will purchase 86,500 gpd of Forks Township's current allocation capacity at EAJSA's plant. This will provide for future growth in the Borough relative to its current existing average sewage flows. The chosen alternative will eliminate the need for the Borough's existing lagoon WWTP, which will be decommissioned and demolished following the construction and initiation of operation of the interceptor sewer. The Plan does not provide for any increase in Stockertown Borough's sewer service area.

The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of the municipality or Authority as appropriate.

*Plan Location:*

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
North Londonderry Township	655 East Ridge Road Palmyra, PA 17078	Lebanon

*Plan Description:* Approval of a revision to the official plan of North Londonderry Township, Lebanon County. The project is known as Pinnacle at Winding Creek/Summer Layne. The plan provides for 355 retirement residential units, 184 single family residential lots, and a community center, with total flows of 81,000 gallons per day using sewer service provided by the North Londonderry Township Authority. The proposed development is located on Killinger Road and Hoffer Road. The Department's review of the plan revision has not identified any significant impacts resulting from this proposal.

The DEP Code Number for this planning module is A3-38918-145-3 and the APS Id is 975314. Any required NPDES Permits or WQM permits must be obtained in the name of the North Londonderry Township Authority.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 2

**The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. ## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 3

---

**The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

---

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of

sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

Clymer Borough Municipal Authority	470 Adams Street Clymer, PA 15728-1156	Indiana

*Project Description:* The Pennsylvania Infrastructure Investment Authority, which administers the Commonwealth's State Revolving Fund, is intended to be the funding source for this project.

*Problems:* The residents of Clymer Borough are experiencing unpleasant taste and odor issues caused by the presence of hydrogen sulfide and old pipes. The existing pipes are old, asbestos concrete and are leaking in several areas. This proposed project will correct the leakage and antiquated pipes. The new aerator scrubber will remove hydrogen sulfide at the existing water treatment plant. The existing clearwell's roof experienced holes and partial collapse exposing the finished water to contaminants. An emergency permit was issued to Clymer to repair holes and have an interconnection with ICMSA to provide finished water. The clearwell was out of operation for approximately 1 month.

*Description:* The Authority is proposing to install a forced draft aerator for the removal of hydrogen sulfide prior to filtration. In addition, due to the age and condition of the 200,000-gallon tank, it will be replaced along with the plant's above ground clearwell. Also, 7,750 feet of leaking transite waterline will be replaced with 8" C-900 PVC pipe. Installation of 7,750 linear feet of PVC waterline includes 150 3/4" services, 39 gate valves, 11 interconnections, replace 7 existing fire hydrants with new ones, all waterline and appurtenances shall be in Clymer Borough. A new 250,000-gallon water storage tank will be constructed on Clymer Road in Cherryhill Township.

#### *Draft Technical Guidance—Substantive Revision*

**DEP ID:** 258-2182-773. **Title:** Management of Fill Policy. **Description:** A person placing solid waste onto the ground is generally required to obtain a permit under the Solid Waste Management Act (SWMA). A person is not required to obtain a permit under SWMA if the person can demonstrate that the material qualifies as clean fill in accordance with the municipal and residual waste regulations, 25 Pa. Code §§ 271.101(b)(3) and 287.101(b)(6) (relating to permit requirement; and general requirements for permit). The Management of Fill Policy defines the universe of materials that qualify as "fill" and provides the Department's procedures for determining whether fill is "clean fill," as defined in the municipal and residual waste regulations in 25 Pa. Code §§ 271.1 and 287.1 (relating to definitions) or "regulated fill," as defined in the policy.

The Department's proposed amendments to the Management of Fill Policy include the following:

- The proposed policy has been revised for clarity and reorganized for ease of use, providing expanded or revised

definitions of existing terms and adding definitions for terms frequently used in the implementation of the existing policy but have not been previously defined.

- The proposed amendments include a stepwise procedure for making a fill determination that clearly identifies the steps necessary to perform environmental due diligence; clarifies the procedures for performing analytical testing, if required, in a manner that is acceptable to the Department; and clarifies the requirements for filing forms or obtaining required approvals prior to transporting fill from one site to another.

- The chemical concentration limits contained in the Management of Fill Policy that are used to determine whether materials are uncontaminated, as that term is defined in the policy, are derived from numerical limits for residential use specified in 25 Pa. Code Chapter 250 (relating to administration of Land Recycling Program). The existing chemical concentration limits were last modified in 2007 and are not consistent with the revisions made in 2011 and 2016 to Chapter 250. The Department is proposing amendments to the Management of Fill Policy to directly reference the applicable limits from 25 Pa. Code Chapter 250, and eliminate Tables FP-1a (organic constituents) and FP-1b (metals and inorganic constituents) from the policy so that future revisions to the numeric limits in Chapter 250 are automatically updated and included in the Management of Fill Policy.

- The Department is proposing amendments to Appendix A of the existing policy relating to sample collection and analytical testing requirements for performing environmental due diligence. The proposed amendments include guidance on developing a sampling plan that meets the data quality objectives required by the Department; expansion of existing sampling instructions to include a sampling protocol for fill contained in piles and fill that is sampled in-situ.

- The Department is proposing the addition of a new section in Appendix A that provides a mechanism for demonstrating that an observed exceedance of a numeric limit is due to background at the donor site. The proposed amendments include the use of an equivalent site evaluation that is performed once a successful background demonstration is made. The proposed equivalent site evaluation is intended to ensure that no new regulated substances are placed on the receiving site other than those that are already determined to be present and that the concentrations of regulated substances in the donor fill have been compared to the concentration of the same regulated substances at the receiving site.

*Written Comments:* Interested persons may submit written comments on this draft TGD by January 8, 2019. All comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment tool at [www.ahs.dep.pa.gov/eComment](http://www.ahs.dep.pa.gov/eComment) or by e-mail to [ecomment@pa.gov](mailto:ecomment@pa.gov). ### Federal Consistency under the Coastal Zone Management Act; Maintenance Dredging at Fort Mifflin Terminal

This notice is published under section 306(d)(14) of the Federal Coastal Zone Management Act of 1972 (16 U.S.C.A. § 1455(d)(14)), regarding public participation during consistency determinations. The Department of Environmental Protection (Department), Coastal Resources Management Program has received notice that Sunoco Partners Marketing and Terminals (applicant) is proposing to conduct maintenance dredging activities at the Fort Mifflin Terminal in Tinicum Township.

The applicant is proposing to conduct maintenance dredging at the Fort Mifflin Terminal under the authorization of a United States Army Corps of Engineers (USACE) 10-Year Maintenance Dredging Permit (CENAP-OP-R-2017-00207-75). The berthing areas of Docks A and B will be mechanically dredged with a closed clamshell bucket to a depth of no greater than 42 feet (40 feet plus 2 feet of allowable overdredge) below mean low water. Approximately 47,000 cubic yards of material will be removed per dredge event and a total of up to 235,000 cubic yards will be removed over the duration of the 10-year USACE permit. Dredged material will be placed at either White's Basin or Biles Islands disposal facilities.

This project is subject to Department review for Federal consistency because it is a Federal license and permit activity and will have reasonably foreseeable effects on the Commonwealth's coastal resources or uses.

In accordance with National Oceanic and Atmospheric Administration (NOAA) regulations in 15 CFR Part 930, Subpart D (relating to consistency for activities requiring a Federal license or permit), the applicant has certified that the proposed activity will be conducted in a manner consistent with the applicable enforceable policies of the Commonwealth's NOAA-approved Coastal Resources Management Program. Interested parties may request a copy of the Federal Consistency Certification from the Department contact listed as follows.

Questions regarding this review should be directed to Matthew Walderon, Federal Consistency Coordinator, at [RA-Fed\\_Consistency@pa.gov](mailto:RA-Fed_Consistency@pa.gov) or (717) 772-2196.

The Department will consider all comments received on or before November 26, 2018, before issuing a final Federal consistency concurrence or objection. Comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's eComment system at [www.ahs.dep.pa.gov/eComment](http://www.ahs.dep.pa.gov/eComment) or by e-mail to [ecomment@pa.gov](mailto:ecomment@pa.gov). Written comments may be

submitted by mail to the Policy Office, Department of Environmental Protection, 400 Market Street, Harrisburg, PA 17101.

## DEPARTMENT OF ENVIRONMENTAL PROTECTION

### Proposed State Implementation Plan Revision; Redesignation Request and Maintenance Plan for the Delaware County Nonattainment Area for the 2012 Annual Fine Particulate Matter National Ambient Air Quality Standard; Public Hearing

The Department of Environmental Protection (Department) is seeking public comment on a redesignation request and a proposed revision to the State Implementation Plan (SIP) concerning a maintenance plan demonstrating that the Delaware County Area can maintain the 2012 annual fine particulate matter National Ambient Air Quality Standard (NAAQS) for the next 10 years as required under section 175A(a) of the Clean Air Act (42 U.S.C.A. § 7505a(a)). This maintenance plan SIP revision will also establish new motor vehicle emission budgets for transportation conformity purposes in the Delaware County Area.

Particulate matter includes both solid and liquid particles suspended in the air. Fine particle pollution describes particulate matter that is less than or equal to 2.5 micrometers in diameter ( $PM_{2.5}$ ).  $PM_{2.5}$  concentrations above the Federal health-based standard pose a serious human health threat. On January 15, 2015, the United States Environmental Protection Agency (EPA) designated Delaware County as a moderate nonattainment area for the 2012 annual  $PM_{2.5}$  NAAQS (80 FR 2205, 2264-2265). The Delaware County Area has since come into attainment based on 2013–2015 air quality monitoring data, which the Department submitted to the EPA on April 1, 2016. The EPA determined that Delaware County has attained the 2012 annual  $PM_{2.5}$  NAAQS based on 2013–2015 complete, quality assured, and certified ambient air monitoring data that shows that the area is monitoring attainment (81 FR 89868).

With significant improvements in air quality in Delaware County, this nonattainment area now meets the 2012 annual  $PM_{2.5}$  NAAQS. Therefore, the Department intends to submit this proposed maintenance plan SIP revision and redesignation request for the Delaware County Area to the EPA for approval.

This proposed SIP revision and redesignation request are available on the Department's web site at <http://www.ahs.dep.pa.gov/eComment> or by contacting Amanda Rodriguez at [amarodrigu@pa.gov](mailto:amarodrigu@pa.gov) or (717) 787-9702.

The Department will provide the opportunity for a public hearing to receive comments on the proposed SIP revision on December 12, 2018, at 10 a.m. at the Department's Southeast Regional Office, 2 East Main Street, Norristown, PA. Persons wishing to present testimony

should contact Amanda Rodriguez, P.O. Box 8468, Harrisburg, PA 17105, (717) 787-9702 or [amarodrigu@pa.gov](mailto:amarodrigu@pa.gov) to reserve a time. Speakers will be limited to 5 minutes and should provide two written copies of their comments.

The hearing will be cancelled if no person has requested to testify at the hearing by 12 p.m. on Monday, December 10, 2018. The Department will provide public notice on the Bureau of Air Quality webpage at <http://www.dep.pa.gov/Business/Air/BAQ/Pages/default.aspx> if the hearing is cancelled. Persons may also contact Amanda Rodriguez at [amarodrigu@pa.gov](mailto:amarodrigu@pa.gov) or (717) 787-9702.

Persons with a disability who wish to attend a hearing and require an auxiliary aid, service or other accommodation to participate in the proceeding should contact Amanda Rodriguez at [amarodrigu@pa.gov](mailto:amarodrigu@pa.gov) or (717) 787-9702. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

The Department must receive comments no later than December 13, 2018. Commentators are encouraged to submit comments using the Department's eComment system at [www.ahs.dep.pa.gov/eComment](http://www.ahs.dep.pa.gov/eComment) or by e-mail at [ecomment@pa.gov](mailto:ecomment@pa.gov). Written comments may be submitted to the Policy Office, Department of Environmental Protection, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Use "Delaware County  $PM_{2.5}$ " as the subject line in written communication.

## DEPARTMENT OF HUMAN SERVICES

### Nursing Facility Assessment Program for Fiscal Year 2018-2019

This notice announces the amount of the assessment that the Department of Human Services (Department) is implementing for Fiscal Year (FY) 2018-2019, provides an explanation of the assessment methodology that the Department is using in FY 2018-2019 and identifies the estimated aggregate impact on nursing facilities which will be subject to the assessment.

#### *Background*

Article VIII-A of the Human Services Code (code) (62 P.S. §§ 801-A—815-A) authorizes the Department to impose an annual monetary assessment on nursing facilities and county nursing facilities in this Commonwealth each fiscal year through FY 2018-2019. Under Article VIII-A of the code, the Department may impose the assessment only to the extent that the assessment revenues qualify as the State share of Medical Assistance (MA) Program expenditures eligible for Federal financial participation (FFP). See 62 P.S. § 803-A. To ensure receipt of FFP, Article VIII-A of the code requires the Department to seek a waiver from the Centers for Medicare & Medicaid Services if necessary to implement the Assessment Program. See 62 P.S. § 812-A.

For each fiscal year that the Assessment Program is implemented, the code authorizes the Secretary of the Department (Secretary) to determine the aggregate amount of the assessment and the annual assessment rate in consultation with the Secretary of the Budget. See 62 P.S. § 804-A. The code specifies that annual assessment rates must be sufficient to generate at least \$50 million in additional revenue, but not more than the maximum aggregate assessment amount that qualifies for Federal matching funds. See 62 P.S. § 804-A.

The Secretary must publish a notice in the *Pennsylvania Bulletin* before imposing an annual assessment for a fiscal year. The notice must specify the amount of the assessment being proposed, explain the proposed assessment methodology, identify the estimated assessment amount and aggregate impact on nursing facilities subject to the assessment and provide interested persons a 30-day period to comment. See 62 P.S. § 805-A.

After consideration of any comments received during the 30-day comment period, the Secretary must publish a second notice announcing the rate of assessment for the fiscal year. See 62 P.S. § 805-A. The annual aggregate assessment amount and assessment rate for the fiscal year must be approved by the Governor. See 62 P.S. § 804-A.

The Secretary published a notice at 48 Pa.B. 3378 (June 2, 2018) announcing the proposed assessment rates, the aggregate amount and the impact for FY 2018-2019. No comments were received by the Department in response to the proposed rates notice.

#### *Assessment Methodology and Rates for FY 2018-2019*

The following nursing facilities will continue to be exempt from the Assessment Program in FY 2018-2019:

- (1) State owned and operated nursing facilities.

- (2) Veteran's Administration nursing facilities.

- (3) Nursing facilities that have not been licensed and operated by the current or previous owner for the full calendar quarter prior to the calendar quarter in which an assessment is collected.

- (4) Nursing facilities that provide nursing facility services free of charge to all residents.

The Department will continue to assess nonexempt nursing facilities at two rates. One rate will apply to four categories of nursing facilities: county nursing facilities; nursing facilities that have 44 or fewer licensed beds; qualified nursing facilities affiliated with continuing care retirement communities (CCRC) (see 40 Pa.B. 7297 (December 18, 2010)); and nursing facilities with an MA occupancy rate of at least 94% based on the four consecutive assessment quarters beginning April 1, 2016, and ending March 31, 2017, for each nursing facility as of November 13, 2017. The other rate will apply to all other nonexempt facilities, including nursing facilities that began participation in a CCRC on or after July 1, 2010. Using the applicable rate, the Department will calculate an annual assessment amount for each nonexempt facility by multiplying its assessment rate by the facility's historical non-Medicare resident day for the four consecutive assessment quarters beginning April 1, 2016, and ending March 31, 2017. The Department will collect the annual assessment amount in four equal quarterly installments.

The Department will maintain the same rate structure for FY 2018-2019 as in FY 2017-2018, but the assessment rates represent a uniform decrease of \$0.61 from last year's rates. For FY 2018-2019, the assessment rates for nonexempt nursing facilities will be as follows:

- (1) For county nursing facilities, for nursing facilities that have 44 or fewer licensed beds, for qualified CCRC nursing facilities, and nursing facilities with an MA occupancy rate of at least 94% based on the four consecutive assessment quarters beginning April 1, 2016, and ending March 31, 2017, for each nursing facility as of November 13, 2017, the assessment rate will be \$7.40 per historical non-Medicare resident day.

- (2) For all other nonexempt nursing facilities, the assessment rate will be \$31.49 per historical non-Medicare resident day.

The Assessment Program due dates are established in accordance with 72 P.S. § 1729-E(2)(ii) (relating to Department of Human Services) and will be available on the Department's web site at <http://www.dhs.pa.gov/provider/longtermcarecasemixinformation/index.htm>.

#### *Aggregate Assessment Amounts and Fiscal Impact*

The Department estimates that the annual aggregate assessment fees for nonexempt nursing facilities will total \$498.352 million. The Department will use the State revenue derived from the assessment fees and any associated FFP to support payments to qualified MA nursing facility providers in accordance with applicable laws and regulations.

### Additions to List of Class A Wild Trout Waters

The Fish and Boat Commission (Commission) approved the addition of ten stream sections to its list of Class A

Wild Trout Streams as set forth at 48 Pa.B. 4937 (August 11, 2018). Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource and to conserve that resource and the angling that it provides. ## FISH AND BOAT COMMISSION

### Classification of Wild Trout Streams; Additions, Revisions and Removal

The Fish and Boat Commission (Commission) approved the addition of 99 new waters to its list of wild trout streams and the revision to the section limit of 4 waters on the list published at 48 Pa.B. 4932 (August 11, 2018). ## FISH AND BOAT COMMISSION

### Fees for Use Permits for Unpowered Boats

#### A. Summary and Background

On December 20, 2000, Governor Ridge signed Senate Bill 1117 into law as Act 115 of 2000. Act 115 of 2000 amended 30 Pa.C.S. (relating to Fish and Boat Code) (code) by adding section 742(e). The amendment provides that the Fish and Boat Commission (Commission) shall, by regulations adopted within 1 year after the effective date of the section, provide for issuance of use permits, valid for 1 or 2 years, for unpowered boats that are not registered in accordance with law, to use Commission property. The amendment further provides that the Commission shall establish fees for use permits and that these fees may not exceed the fees charged by the Department of Conservation and Natural Resources (DCNR) for boat launch permits for State parks lakes.

On June 16, 2001, the Commission adopted 58 Pa. Code § 53.27 (relating to use permits for unpowered boats). Section 53.27(f) of 58 Pa. Code set the initial fees for the use permits at \$10 for a 1-year permit and \$18 for a 2-year permit and further provides that the Executive Director may, by notice published in the *Pennsylvania Bulletin*, adjust these fees so that they remain the same as the resident price for 1-year and 2-year boat launching permits as established in the schedule of fees published, and from time-to-time revised, by the DCNR for State parks and forests.

On December 12, 2009 (39 Pa.B. 7015), the DCNR revised its fees for a use permit to \$12 for a 1-year permit and \$22 for a 2-year permit. The Commission now amends its fees so that they remain the same as prices for launching permits established by the DCNR.

#### B. Contact Person

Any questions may be submitted to the Executive Director, Fish and Boat Commission, P.O. Box 67000, Harrisburg, PA 17106-7000.

#### C. Effective Date

The effective date of the new price schedule is January 1, 2019.

#### D. Fee Schedule

## FISH AND BOAT COMMISSION

### Proposed Changes to List of Class A Wild Trout Waters; January 2019

The Fish and Boat Commission (Commission) is considering changes to its list of Class A Wild Trout Streams. Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource to conserve that resource and the angling it provides. Class A wild trout populations represent

the best of this Commonwealth's naturally reproducing trout fisheries. With rare exceptions, the Commission manages these stream sections solely for the perpetuation of the wild trout fishery with no stocking.

Criteria developed for Class A Wild Trout fisheries are species specific. Wild Trout Biomass Class Criteria include provisions for:

#### (i) Wild Brook Trout Fisheries

(A) Total brook trout biomass of at least 30 kg/ha (26.7 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brook trout biomass must comprise at least 75% of the total trout biomass.

#### (ii) Wild Brown Trout Fisheries

(A) Total brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brown trout biomass must comprise at least 75% of the total trout biomass.

#### (iii) Mixed Wild Brook and Brown Trout Fisheries

(A) Combined brook and brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass must comprise less than 75% of the total trout biomass.

(E) Brown trout biomass must comprise less than 75% of the total trout biomass.

#### (iv) Wild Rainbow Trout Fisheries

Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 2.0 kg/ha (1.78 lbs/acre).

#### (v) Mixed Wild Brook and Rainbow Trout Fisheries

(A) Combined brook and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

#### (vi) Mixed Wild Brown and Rainbow Trout Fisheries

(A) Combined brown and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brown trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

During recent surveys, Commission staff documented the following stream sections to have Class A wild trout populations. The Commission intends to consider adding these waters to its list of Class A Wild Trout Streams at its meeting on January 14 and 15, 2019.

**PENNSYLVANIA PUBLIC  
UTILITY COMMISSION**

**Electric Generation Supplier License Cancellations  
of Companies with an Expired Financial Security  
or Insufficient Financial Security Amount**

Public Meeting held  
October 25, 2018

*Commissioners Present:* Gladys M. Brown, Chairperson;  
Andrew G. Place, Vice Chairperson; Norman J. Ken-  
nard; David W. Sweet; John F. Coleman, Jr.

*Electric Generation Supplier License Cancellations of  
Companies with an Expired Financial Security or  
Insufficient Financial Security Amount; M-2018-2640827*

**Tentative Order**

*By the Commission:*

The Commission’s regulations at 52 Pa. Code § 54.40(a) state that an Electric Generation Supplier (EGS) license will not be issued or remain in force until the licensee furnishes a bond or other security approved by the Commission. In addition, 52 Pa. Code § 54.40(d) states that the maintenance of an EGS license is contingent on the licensee providing proof to the Commission that a

bond or other approved security in the amount directed by the Commission has been obtained.

Each EGS must file an original bond, letter of credit, continuation certificate, amendment, or other approved financial instrument with Rosemary Chiavetta, Secretary, Pennsylvania Public Utility Commission, 400 North Street, Harrisburg, PA 17120 prior to the EGS’s current security expiration date. Each financial instrument must be an original document that displays a “wet” signature or digital signature, preferable in blue ink, and displays a “raised seal” or original notary stamp. The name of the principal on the original financial instrument must match exactly with the name that appears on the EGS’s license issued by the Commission.

Failure to file before the financial security’s expiration date may cause Commission staff to initiate a formal proceeding that may lead to the following: cancellation of each company’s electric supplier license, removal of each company’s information from the Commission’s website and notification to all electric distribution companies, in which each company is licensed to do business, of the cancellation of the license.

As of October 16, 2018, each EGS listed in the Supplier Table below has not provided proof to the Commission that it has a bond or other approved security in the amount directed by the Commission, to replace its expired bond.

\*Taking title to electricity

As part of its EGS license validation procedures, the Commission’s Bureau of Technical Utility Services sent a 90-day Security Renewal Notice Letter to each entity in the Supplier Table above stating that original documentation of a bond, or other approved security, must be filed within 30 days prior to each entity’s security expiration date. None of the companies listed in the Supplier Table provided the required documentation.

Based on the above facts, we tentatively conclude that the EGSs listed in the Supplier Table are not in compliance with 52 Pa. Code § 54.40(a) and (d) and therefore it is appropriate to initiate the cancellation process for each EGS license of each company listed in the Supplier Table, without the necessity of a formal complaint, as being in the public interest; *Therefore,*

*It Is Ordered That:*

1. Cancellation of the Electric Generation Supplier Licenses of each company listed in the Supplier Table is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small

Business Advocate, the Bureau of Investigation & Enforcement, the Department of Revenue—Bureau of Corporation Taxes, all electric distribution companies, all of the Electric Generation Suppliers in the Supplier Table and publish a copy of this Tentative Order in the *Pennsylvania Bulletin* with a 30-day comment period.

3. Absent the filing of adverse public comment or the filing of an approved security within 30 days after publication in the *Pennsylvania Bulletin*, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary.

4. Upon entry of the Final Order described in Ordering Paragraph No. 3 above, each company listed in the Supplier Table will be stricken from all active utility lists maintained by the Commission’s Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, removed from the Commission’s website, and notifications be sent to all electric distribution companies in which the Electric Generation Suppliers are licensed to do business.

5. Upon entry of the Final Order described in Ordering Paragraph No. 3, each electric distribution company in

which the Electric Generation Suppliers are licensed to do business, shall return the customers of the Electric Generation Suppliers to default service.
