READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published weekly. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. It is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations, Statewide court rules, and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, rescission, repeal or emergency action, must be published in the *Pennsylvania Bulletin*.

The following documents are published in the *Pennsylvania Bulletin*: Governor's Executive Orders; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or rescind regulations must first publish in the *Pennsylvania Bulletin* a Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. A Final Rulemaking must be published in the *Pennsylvania Bulletin* before the changes can take effect. If the agency wishes to adopt changes to the Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies, Statewide court rules and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes when they are adopted. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code* § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government.

How to Find Rules and Regulations

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give the history of regulations. To see if there have been recent changes not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

A quarterly List of *Pennsylvania Code* Sections Affected lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires the Governor's Budget Office to prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions and authorities receiving money from the State Treasury. The fiscal note states whether the action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions. The fiscal note is required to be published in the *Pennsylvania Bulletin* at the same time as the change is advertised.

A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; and (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years. In item (8) the recommendation, if any, made by the Secretary of the Budget is published with the fiscal note. "No fiscal impact" means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended. See 4 Pa. Code Chapter 7, Subchapter R (relating to fiscal notes).

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish information except as provided by 1 Pa. Code § 3.44:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the [Legislative Reference] Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

DEPARTMENT OF COMMUNITY AND ECONOMIC DEVELOPMENT

Summary Notice of the Availability of the Draft 2019—2023 Consolidated Plan and 2019 Annual Action Plan; Public Hearing

The Department of Community and Economic Development (Department) announces the availability of the Commonwealth's draft Federal Fiscal Year (FFY) 2019—2023 and the FFY 2019 Annual Action Plan. The Consolidated Plan is a document submitted to the United States Department of Housing and Urban Development (HUD). The Consolidated Plan is a plan identifying the needs of the nonentitlement areas of the State for the next 5-year period. The Annual Action Plan is also submitted to HUD as the annual application for Federal funds administered by the Commonwealth. The HUD funding programs covered by the Plan and administered by the Department are the Community Development Block Grant (CDBG), the HOME Investment Partnership (HOME), the Emergency Solutions Grant (ESG) programs, Community Development Block Grant—Disaster Recovery (CDBG-DR) and Neighborhood Stabilization Program (NSP). Also covered by the Plan is the Housing Opportunities for Persons with AIDS (HOPWA) program which the Department of Health administers and the National Housing Trust Fund (HTF) which is administered by the Pennsylvania Housing Finance Agency.

This summary is designed to provide an opportunity for citizens, local governmental officials and interested organizations in this Commonwealth to comment about the Plans prior to its submission to HUD. Comments may be electronically submitted to the Department by e-mail to RA-DCEDcdbghomequestions@pa.gov. Written comments should be submitted to Megan L. Snyder, Center for Community and Housing Development, Department of Community and Economic Development, 400 North Street, 4th Floor, Commonwealth Keystone Building, Harrisburg, PA 17120-0225. Electronic and written comments must be received by 4 p.m. on Tuesday, June 11, 2019, to be included as testimony in the Plan.

Purpose of the Consolidated Plan

The Consolidated Plan contains a Needs Assessment and Market Analysis for the Commonwealth in the areas of housing, homelessness, community and economic development. From this information a Strategic Plan including goals and objectives has been developed and outlined in the Consolidated Plan determining the use of the Federal funding for fiscal years 2019—2023. The Consolidated Plan has a major impact on the type, location and number of affordable housing units generated and preserved in this Commonwealth. Also, the Consolidated Plan aides in planning for the use of funding for the homeless and those residents with AIDS to find permanent housing and stability. The Consolidated Plan identifies resources for improvement or creation of infrastructure, public facilities, services, and other economic and community development initiatives in communities in this Commonwealth that are essential for growth over the next 5 years.

The goals developed for the 2019—2023 programs are:

I. Affordable Housing

Improve access to the full spectrum of quality affordable housing for Pennsylvanians.

a. Increase the supply of affordable housing opportunities through development of new housing units for rental or homeownership opportunities and preserve the long-term affordability of homes through rehabilitation of existing vacant or owner-occupied units.

b. Provide direct housing assistance to assist potential buyers to purchase a home, rapidly house those who are homeless or prevent or divert homelessness.

c. Provide housing services and supports in the form of counseling—homebuyer or rental and case management services to ensure persons are and remain stably housed.

II. Community Stabilization

Prevent and arrest the decline of Pennsylvania neighborhoods and promote revitalization.

a. Support targeted code enforcement.

b. Demolish vacant, blighted buildings.

c. Cleanup of contaminated properties.

d. Support strategic acquisition and disposition activities.

III. Public Facility and Infrastructure

Acquisition, construction, installation, rehabilitation, or improvement of facilities to support safe, sustainable, resilient communities.

a. Water, sewer, or storm systems.

b. Park, recreation, youth, or senior facilities.

c. Streets and sidewalk improvements.

d. Health and safety facilities.

e. Increase access to broadband infrastructure.

IV. Public Services

Provide public services to ensure all Pennsylvanians have access to opportunities to improve their quality of life (non-homeless).

V. Economic Development

Develop opportunities to improve the economic environment by creating or retaining business and employment opportunities for low income and diverse Pennsylvanians.

a. Create and retain jobs.

b. Create and expand businesses.

VI. Community Planning and Capacity Building

Encourage local and regional planning activity to facilitate understanding of current housing, community development, and resiliency needs and develop a plan for their sustainable future.

a. Provide training and technical assistance to communities to build their capacity to address housing and community development needs.

b. Assist communities to identify achievable goals to further community needs.

c. Align community goals with funding opportunities to meet those goals.

Purpose of the Action Plan

The Annual Action Plan takes the strategy developed in the Consolidated Plan and applies it to the administration of the CDBG, HOME, ESG, CDBG-DR, NSP, HOPWA and HTF programs for 2019. HUD must approve the Plan for this Commonwealth to receive funding under the identified HUD programs.

HOME	\$18,661,120
ESG	\$5,769,743

A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appro-

priate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a

proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

46-0069G: Highway Materials, Inc., (5100 Joshua Road, Plymouth Meeting, PA 19462) for the replacement of the existing secondary crusher and secondary screen with new equipment. The Particulate Matter (PM) emissions from the new secondary crusher and new screen will be controlled by the existing Baghouse No. 2 and the existing wet suppression system. There will be no increase in PM emissions with the installation of the in-kind crusher and screener. The new equipment functions the same as the replaced units. The Plan Approval also contains work practice standards, monitoring and recordkeeping requirements, and operating restrictions designed to keep the sources and facility operating within all applicable air quality requirements.

43-386A: Sandy Creek Monument and Cremation Company (312 W. Park St, Franklin, PA 16323), The Department of Environmental Protection intends to issue a plan approval to Sandy Creek Monument and Cremation Company to provide authorization for the construction and initial operation of a human crematory at their existing "Black Funeral Home" facility located in Sandy Creek Borough, **Mercer County**.

This application proposes the installation of a new source at a non-Title V facility. Public notice is obligatory for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

The operator intends to open the crematory's door during operation in order to reposition remains and to reduce cremation cycle times. This crematory was not eligible for authorization under General Plan Approval 14 per the Department's instruction that those facilities which open their primary chamber's door during operation, could no longer use the general permit. Special conditions will be included in this plan approval which address door opening and its impact on emissions and operation. The crematory will be required to meet all emission and temperature requirements while the door is opened and will have additional recordkeeping and monitoring requirements.

The Plan Approval will contain testing, recordkeeping, emission restriction, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements. Potential emissions from the proposed source are estimated to be: less than 2.5 tons per year (tpy) of particulate matter, less than 1.0 tpy (each) of SO_x, NO_x, CO, VOC, and HAP.

In accordance with 25 Pa. Code § 127.44(e)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP Office (Air Quality). Appointments for scheduling a review must be made by calling the DEP at (814) 332-6940.

In accordance with 25 Pa. Code § 127.44(e)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments. Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this

permit, may submit the information to Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval [43-386A: Sandy Creek Monument and Cremation Company] and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department's Northwest Region. Written comments or requests for a public hearing should be directed to Eric A. Gustafson, 230 Chestnut St., Meadville, PA 16335; Phone (814) 332-6819.

Notice is hereby given under 25 Pa. Code § 127.44(b)(5), that the Department of Environmental Protection (Department) intends to issue Plan Approval # 48-00111A to Slate Belt Heat Recovery Center, LLC (the Permittee), 435 Williams Court, Baltimore, MD 21220-2888 to construct and operate a biosolids processing facility which will be sited on a parcel of land owned by Grand Central Sanitary Landfill (GCSL), in Plainfield Township, Northampton County, as described in the Permittee's May 18, 2018 Plan Approval Application and any other subsequent supplemental submissions.

Plan Approval No. 48-00111A is for the construction and operation of a biosolids processing facility consisting of the following equipment: Installation of a thermal oil heater, thermal drying equipment to facilitate processing biosolids into a Class A dried biosolids product, product conveyance and storage equipment, a two-stage odor control system and a baghouse.

The proposed thermal oil heater will be designed to utilize natural gas or excess/available landfill gas as a fuel. The total maximum heat demand of the supplemental thermal oil heater is currently estimated to be 50.0 MMBtu/hr to support the dryer system without the waste heat. Low NO_x burner technology will mitigate emissions of oxides of nitrogen (NO_x) from the thermal oil heater. Natural gas & landfill gas will be the only fuels for the thermal oil heater; emissions of sulfur dioxide (SO₂), particulate matter (PM₁₀), particulate matter (PM_{2.5}) and

greenhouse gases (GHG) are inherently low when compared to other commercial fuels.

The thermal dryer process will consist of two (2) fully enclosed indirectly heated belt dryers in parallel, each with a biosolids input capacity of approximately 200 wet tons per day, for a facility total throughput of 400 wet tons containing an average of approximately 21% solids per day. Sludge will be pressed to a granular shape by a roller or swivel press and dropped down onto the top belt of the drier in a uniform pile. Biosolids will be conveyed from a receiving/storage tank into an enclosed belt dryer system that circulates warm air to evaporate moisture from the biosolids.

The belt dryer system will be a potential odor source primarily of ammonia associated with the off-gassing from the heat treatment during the drying process. The belt dryers are fully enclosed and operate in a negative air pressure manner, such that all off-gassing during the thermal treatment of the biosolids is contained within the dryer system itself. The bulk of the airstream is recycled in the dryer system after moisture, containing ammonia, is condensed and transported to storage. There will be a small saturated airstream removed from each of the belt dryers, which will include the evaporated moisture and ammonia. This airstream is routed to a condenser that serves to knock out the majority of the moisture from the process, with the remaining air stream routed to the odor control system, which is designed to reduce ammonia.

The facility will include enclosed receiving units, covered aboveground process wastewater storage tank, covered product conveyance system, and covered product storage tanks. The biosolids receiving/storage process and waste water storage tank will be a potential odor source primarily of hydrogen sulfide (H₂S) and ammonia (NH₃) associated with biological activity during material storage. Potential odors from the receiving/storage process will be routed to the odor control system.

The product storage silo will have a dust collection system maintaining negative pressure on the headspace of the silo, which will be routed to the odor control system.

The wastewater storage tank has the potential to be a minor source of odor related to the ammonia (NH₃). Flow from the covered wastewater storage tank will routed to the odor control system.

The dust collector will remove dust from the enclosed product storage and conveyance operations. This control option is custom designed for this proposed dryer process and is expected to have a dust removal efficiency of at least 90%.

The company has proposed packed bed wet scrubbers to control odors associated with NH₃ and H₂S from the sludge drying operations. The system will be designed to remove 99% of H₂S & NH₃.

Based on 8,760 hours of operation, as worst-case scenario the following potential emissions are expected from the facility.

Source	Pollutant lb/hr										Total HAPS	
	PM	PM ₁₀	PM _{2.5}	NO _x	SO _x	CO	VOC	H ₂ S	NH ₃	CH ₂ O		CO _{2e}
Drying Operations	0.39	0.39	0.39	—	—	0.39	1.54	0.01	0.04	—	—	—
Thermal oil heater	0.82	0.82	0.82	3.30	7.14	2.67	0.55	—	—	0.02	11,712	0.78
Product Storage and Conveyance	1.16	1.16	1.16	—	—	—	—	—	—	—	—	—

The facility will be a minor source for criteria pollutant and hazardous air pollutant (HAP) emissions and will not be subject to PSD or NNSR review. New equipment will meet Pennsylvania Best Available Technology (BAT) emissions controls and NSPS requirements as applicable. The visible emission will be equal to or less than 10% at any time. The company shall be subject to and comply with 25 Pa. Code § 123.31 for malodorous emissions.

The Plan Approval and subsequent Operating Permit will include testing, monitoring, record keeping and reporting requirements designed to keep the sources operating within all applicable air quality requirements and regulations.

Copies of the applications, the Department's technical reviews and other supporting documents are available for public inspection between the hours of 8 a.m. and 4 p.m. at the Department's Wilkes-Barre Regional Office, 2 Public Square, Wilkes-Barre, PA 18701-1915. Appointments for scheduling a review may be made by calling (570) 826-2511.

Any person(s) wishing to provide DEP with additional information which they believe should be considered prior to the issuance of this permit may submit the information to the address shown in the preceding paragraph. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed permit No.: 48-00111A and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Mark J. Wejkszner, PE, Program Manager, Air Quality Program, 2 Public Square, Wilkes-Barre, PA 18701, Phone 570-826-2511 within 30 days after publication date.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

EROSION AND SEDIMENT CONTROL PERMITS

The following parties have applied for Erosion and Sediment Control Permits for earth disturbance activities associated with either road maintenance or timber harvesting operations.

Unless otherwise indicated, on the basis of preliminary review and application of lawful standards and regulations, the Department proposes to issue a permit to discharge, subject to certain limitations in the permit conditions. These proposed determinations are tentative. Limitations are provided as erosion and sediment control best management practices which restrict the rate and quantity of sediment discharged.

A person wishing to comment on a proposed permit are invited to submit a statement to the appropriate Department regional office listed before the application within 30 days of this public notice. Comments reviewed within this 30-day period will be considered in the formulation of the final determinations regarding this application. Responses should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and relevant facts upon which it is based. A public hearing may be held after consideration of comments received by the appropriate Department regional office during the 30-day public comment period.

Following the 30-day comment period, the appropriate regional office water management program manager will make a final determination regarding the proposed permit. Notice of this determination will be published in the *Pennsylvania Bulletin* at which time this determination may be appealed to the Environmental Hearing Board (Board).

The application and related documents, including the erosion and sediment control plan for the earth disturbance activity, are on file and may be inspected at the appropriate regional office.

Persons with a disability that require an auxiliary aid, service or other accommodation to participate during the 30-day public comment period should contact the specified regional office. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

Preregister through Aaron Pontzer, Mining Permit and Compliance Specialist, Moshannon District Office, Department of Environmental Protection, 186 Enterprise Drive, Philipsburg, PA 16866, no later than 3:30 p.m., May 20, 2019. Telephone inquiries shall be directed to Aaron Pontzer at (814) 342.8200.

Project Overview: Rehabilitation of the treatment plant will include but is not limited to the following tasks: preparations, recovery and transport of an existing 50 ton, 40-foot tall, 12-foot diameter lime silo from Summerville, PA to Antrim; site preparation at Antrim including excavation, preparation of new concrete footers or foundations, and drilling through existing foundations; extensive relocation and replumbing of multiple lines up to 12 inches in diameter; installation of new plumbing; setting of prestressed concrete tankage with chemical feed and air blower systems; setting of the lime silo; installation of electrical conduit; setting of multiple pumps; replumbing to existing clarifier tank; revegetation of all disturbed areas; implementation of erosion and sedimentation controls and removal of those controls when stabilization is achieved.

Draft Stream Evaluation Report for Tohickon Creek; Public Comment Period Extension

The Department of Environmental Protection (Department) gives notice, under 25 Pa. Code § 93.4d (relating to processing of petitions, evaluations and assessments to change a designated use), that the Draft Tohickon Creek Stream Evaluation Report is available for public comment. An initial notification was disseminated on April 13, 2019, with a 30-day comment period ending on May 13, 2019. Based on multiple requests, the Department is extending the comment period for an additional 60 days, through July 11, 2019.

Tohickon Creek is a freestone tributary to the Delaware River. The Tohickon Creek evaluation was conducted in response to a petition from Marion and Neil Kyde on behalf of the Tincum Conservancy that was accepted for study by the Environmental Quality Board on September 19, 1995. The petition requests the lower mainstem portion of Tohickon Creek be redesignated to Exceptional Value. With the exception of the Warm Water Fishes, Migratory Fishes designation of Deep Run, the lower Tohickon Creek basin is currently designated Cold Water Fishes, Migratory Fishes. The petitioned mainstem originates at Lake Nockamixon Dam in Nockamixon and Bedminster Townships, Bucks County and flows southeast through Tincum and Plumstead Townships until it empties into the Delaware River.

The draft report is available for review on the Department's eComment web site at www.ahs.dep.pa.gov/eComment.

The Department has asked local jurisdictions to make a copy of this notification available to any and all interested citizens, including those who own real property in the previously listed municipalities and to any other parties the municipalities believe may be interested in this evaluation and draft report.

Interested persons may submit comments on the draft report through Thursday, July 11, 2019. Comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment tool at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. Written comments can also be mailed to the Department of Environmental Protection, Policy Office, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Comments received on the draft report during the public comment period will be reviewed and considered in the Department's evaluation.

DEPARTMENT OF HEALTH

Newborn Screening and Follow-Up Program; Mandatory Newborn Screening System Training June 2019; New User Types Must Report all Diagnostic Information Beginning July 1, 2019

Since July 2016, the Department of Health’s (Department) Newborn Screening Program has been using the Pennsylvania Internet Case Management System (iCMS) as a repository and case management system for three types of newborn screenings: dried blood spot screening; hearing screening; and critical congenital heart defects screening.

Effective July 1, 2019, all referrals to providers will be sent electronically and all diagnostic results and follow-up activities for all three screening types must be submitted electronically in iCMS.

As a result, the Department is providing four separate mandatory online system training sessions on June 4, 2019, and June 5, 2019, to instruct each new user type:

- Pediatric endocrinology and immunology treatment centers—Tuesday, June 4, 2019, 10 a.m. to 11 a.m.
- Pediatric audiologists—Tuesday, June 4, 2019, 1 p.m. to 2 p.m.
- Pediatric cardiologists—Wednesday, June 5, 2019, 10 a.m. to 11 a.m.
- Primary care providers and pediatricians—Wednesday, June 5, 2019, 1 p.m. to 2 p.m.

If a provider is not able to participate in the scheduled mandatory online training session, the provider must contact the Department.

For additional information, contact Stacey Gustin, Program Manager, Division of Newborn Screening and Genetics, (717) 783-8143. Speech and/or hearing-impaired persons use V/TT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984 (TT).

FISH AND BOAT COMMISSION

Classification of Wild Trout Streams; Proposed Additions and Revisions; July 2019

Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Fish and Boat Commission (Commission) to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The Commission's Fisheries Management Division maintains the list of wild trout streams. The Executive Director, with the approval of the Commission, will from time-to-time publish the list of wild trout streams in the *Pennsylvania Bulletin*. The listing of a stream section as a wild trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate management of streams.

At the next Commission meeting on July 15 and 16, 2019, the Commission will consider changes to its list of wild trout streams. Specifically, the Commission will consider the addition of the following streams or portions of streams to the list:

FISH AND BOAT COMMISSION

Proposed Changes to List of Class A Wild Trout Waters; July 2019

The Fish and Boat Commission (Commission) is considering changes to its list of Class A Wild Trout Streams. Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource to conserve that resource and the angling it provides. Class A wild trout populations represent the best of this Commonwealth's naturally reproducing trout fisheries. With rare exceptions, the Commission manages these stream sections solely for the perpetuation of the wild trout fishery with no stocking.

Criteria developed for Class A Wild Trout fisheries are species specific. Wild Trout Biomass Class Criteria include provisions for:

(i) *Wild Brook Trout Fisheries*

(A) Total brook trout biomass of at least 30 kg/ha (26.7 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brook trout biomass must comprise at least 75% of the total trout biomass.

(ii) *Wild Brown Trout Fisheries*

(A) Total brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brown trout biomass must comprise at least 75% of the total trout biomass.

(iii) *Mixed Wild Brook and Brown Trout Fisheries*

(A) Combined brook and brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass must comprise less than 75% of the total trout biomass.

(E) Brown trout biomass must comprise less than 75% of the total trout biomass.

(iv) *Wild Rainbow Trout Fisheries*

Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 2.0 kg/ha (1.78 lbs/acre).

(v) *Mixed Wild Brook and Rainbow Trout Fisheries*

(A) Combined brook and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

(vi) *Mixed Wild Brown and Rainbow Trout Fisheries*

(A) Combined brown and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brown trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

During recent surveys, Commission staff documented the following stream sections to have Class A wild trout populations. The Commission intends to consider adding these waters to its list of Class A Wild Trout Streams at its meeting on July 15 and 16, 2019.

State Board of Optometry Regulation # 16A-5213 (IRRC # 3223)

General Revisions

May 1, 2019

We submit for your consideration the following comments on the proposed rulemaking published in the March 2, 2019 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the State Board of Optometry (Board) to respond to all comments received from us or any other source.

1. Section 23.82. Continuing education hour requirements; continuing education reporting; audit and enforcement.—Statutory authority; Whether the regulation is consistent with the intent of the General Assembly; Implementation procedures.

The proposed amendment to Subsection (b) and the new language of Subsections (c)—(f) address reporting, audits and making up deficiencies of continuing education requirements. Subsection (b) will require licensees to certify completion of the required continuing education on the biennial renewal application. False certifications will be grounds for discipline under the Optometric Practice and Licensure Act (Act), 63 P.S. §§ 244.1—244.12. Subsection (c) states that the Board will randomly audit licensees to ensure compliance with continuing education requirements. Subsection (d) provides that a licensee found to be deficient as a result of a continuing education audit will be subject to formal disciplinary action under the Act or will be subject to the issuance of a citation. Subsection (e) requires a licensee found to be deficient in continuing education hours to make up the hours within six months from the issuance of a citation or the imposition of formal discipline. Finally, Subsection (f) states that failure to make up all deficiencies set forth in Subsection

(e) will subject the licensee to further discipline. In the Preamble, the Board explains that the amendments will “. . . provide notice to licensees of the audit requirements and of the affirmative requirement, notwithstanding any disciplinary action that might be taken by the Board, to make up all deficiencies that are identified through the audit process.”

Section 5 of the Act, 63 P.S. § 244.5, relates to the renewal of a license of optometry. Section 5(b) states, in part, the following:

Beginning with the year 1998, a license shall not be renewed by the board unless the optometrist applying for renewal submits proof to the board that during the two calendar years immediately preceding his application he has satisfactorily completed a minimum of 30 hours of continuing professional optometric education approved by the board . . .

Based on the statutory provision cited above, we have several questions and concerns related to the Board's statutory authority and how it will implement the new continuing education requirements for optometrists. First, we are concerned that the regulatory language being added to this section is not consistent with the Board's statutory authority or with the intent of the General Assembly. Specifically, Section 5(b) of the Act does not allow the Board to renew a license when a licensee has not completed the required amount of continuing education. We acknowledge that discipline or citations may be imposed by the Board, but the regulatory language does not reflect the statutory mandate of nonrenewal of license. If the Board becomes aware of a continuing education deficiency, will it automatically suspend the license of the optometrist? Is there a provision in the Act that would allow the Board to renew a license or not suspend a license when it becomes aware that continuing education requirements have not been met? In the Preamble to the final-form regulation, we ask the Board to explain how the new language of this section of the

rulemaking is consistent Section 5(b) of the Act and with the intent of the General Assembly.

In addition, we have two concerns related to implementation procedures. First, if a biennial renewal application submitted by a licensee indicates that continuing education requirements have not been completed, what are the consequences? Specifically, will the license be renewed? Second, if the Board becomes aware of a continuing education deficiency as the result of an audit, will the Board automatically suspend the license of the optometrist and subject the licensee to discipline or a citation? We ask the Board to clarify how it will implement the new continuing education requirements.

2. Section 23.86. Sources of continuing education hours.—Clarity; Feasibility; Implementation procedures; Need.

Subsections (b) and (d) address the application processes for approval as continuing education providers and individual courses offered by non-approved providers, respectively. These subsections do not reference the course requirements in § 23.83 (relating to continuing education subject matter). Subsections (a) and (e) require continuing education to meet the course requirements in § 23.83. Are providers who apply under Subsections (b) and (d) also obligated to meet the requirements in § 23.83? If so, we suggest that the Board add cross-references to § 23.83 in Subsections (b) and (d) for clarity.

Subsection (e) allows a licensed optometrist to seek retroactive approval for attending an unapproved program. This subsection does not include the rate of awarded continuing education hours per minutes of a program, which is specifically stated in Subsections (f) and (g) as “1 continuing education hour for every 50 minutes.” To improve clarity, we ask the Board to add this rate in the final-form regulation.

Subsection (h) credits continuing education hours to a licensed optometrist for service as an instructor or author. We have three concerns. First, under the existing regulation, an optometrist should apply for approval “prior to the service to assure that approval will be given by the Board to the program.” This pre-approval provision is proposed to be deleted. What is the rationale for deleting this provision? Second, under the new language, a licensee will be required to provide documentation at the Board’s request, “[o]therwise, the licensee will be required to secure retroactive approval as set forth in subsection (e).” Under Subsection (e), an optometrist is required to apply for retroactive approval “within 60 days of attending the program.” Does this timeframe apply to Subsection (h) and, if so, when would the Board request documentation of instructor or author service? Third, is it feasible for an optometrist seeking credit under this subsection to meet the cross-referenced timeframe? How will the Board implement the proposed procedure for approval of credit hours for this type of service? We ask the Board to respond to these questions in the Preamble to the final-form regulation and clarify this subsection in the final-form regulation.

Existing Subsection (f) prescribes the allocation of continuing education hours among the course and program options in subsections (a)—(e). The Board proposes to delete existing subsection (f) and add varying allocation requirements in subsections (e)—(i). Although the percentages appear to maintain the existing standard, the statements in subsections (e)—(i) are unclear. We ask the Board to explain how the existing and proposed allocations differ and the need for the restructuring of the

percentages. A clear statement regarding the allotment of hours for proposed subsections (a) and (b) is not included in the proposed language. We ask the Board to explain in the Preamble to the final-form regulation why it proposed to delete the existing language. Further, we ask the Board to provide the allocation percentage for subsections (a) and (b) in the final-form regulation.

3. Section 23.87. Reporting of continuing education credit hours.—Implementation procedures.

Subsection (b) provides for an optional service so that an optometrist may “have the continuing education course entered into an electronic database for compliance purposes.” (Emphasis added.) The Board explains in the Preamble that these databases allow “licensing boards to review and audit the continuing education credits earned by their licensees electronically.” Does the Board currently have access to these databases and use the information contained therein for compliance purposes? We ask the Board to explain in the Preamble to the final-form regulation how this provision will be implemented.

In addition, we believe the use of a database to track continuing education credits would alleviate some of the concerns raised in our first comment. Has the Board considered the mandatory use of such a system for licensees?

4. Section 23.90. Standards for commercial support.—Clarity and lack of ambiguity; Implementation procedures.

This section addresses conflicts of interest and benefits optometrists may receive from continuing education providers. Under Subsection (a), “all continuing education must be free from the control of a commercial interest.” How will the Board determine that this standard is met in continuing education programs and courses? We ask the Board to explain its implementation procedure in the Preamble to the final-form regulation.

Subsection (c) allows continuing education providers to offer optometrists “food and refreshment of modest value according to local standards for attending” a program. (Emphasis added.) This is non-regulatory language that does not set a binding norm. A regulation has the full force and effect of law, and these terms do not establish a standard that could be predicted by the regulated community. The Department should revise this subsection in the final-form regulation to address the ambiguity of these terms and provide clarity for compliance.

By the Commission:

The Commission’s regulations at 52 Pa. Code § 54.40(a) state that an Electric Generation Supplier (EGS) license will not be issued or remain in force until the licensee furnishes a bond or other security approved by the Commission. In addition, 52 Pa. Code § 54.40(d) states that the maintenance of an EGS license is contingent on the licensee providing proof to the Commission that a bond or other approved security in the amount directed by the Commission has been obtained.

Each EGS must file an original bond, letter of credit, continuation certificate, amendment, or other approved financial instrument with Rosemary Chiavetta, Secretary, Pennsylvania Public Utility Commission, 400 North Street, Harrisburg, PA 17120 prior to the EGS’s current security expiration date. Each financial instrument must be an original document that displays a “wet” signature or digital signature, preferable in blue ink, and displays a “raised seal” or original notary stamp. The name of the principal on the original financial instrument must match exactly with the name that appears on the EGS’s license issued by the Commission.

Failure to file before the financial security’s expiration date may cause Commission staff to initiate a formal proceeding that may lead to the following: cancellation of each company’s electric supplier license, removal of each company’s information from the Commission’s website and notification to all electric distribution companies, in which each company is licensed to do business, of the cancellation of the license.

As of April 16, 2019, each EGS listed in the Supplier Table below has not provided proof to the Commission that it has a bond or other approved security in the amount directed by the Commission, to replace its expired bond.

As part of its EGS license validation procedures, the Commission's Bureau of Technical Utility Services sent a 90-day Security Renewal Notice Letter to each entity in the Supplier Table above stating that original documentation of a bond, or other approved security in the amount directed by the Commission, must be filed within 30 days prior to each entity's security expiration date. None of the companies listed in the Supplier Table provided the required documentation.

Based on the above facts, we tentatively conclude that the EGSs listed in the Supplier Table are not in compliance with 52 Pa. Code § 54.40(a) and (d) and therefore it is appropriate to initiate the cancellation process for the EGS license of each company listed in the Supplier Table, without the necessity of a formal complaint, as being in the public interest; *Therefore,*

It Is Ordered That:

1. Cancellation of the Electric Generation Supplier License of each company listed in the Supplier Table is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, the Bureau of Investigation & Enforcement, the Department of Revenue—Bureau of Corporation Taxes, all electric distribution companies, all of the Electric Generation Suppliers in the Supplier Table and publish a copy of this Tentative Order in the *Pennsylvania Bulletin* with a 30-day comment period.

3. Absent the filing of adverse public comment or the filing of an approved security within 30 days after publication in the *Pennsylvania Bulletin*, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary.

4. Upon entry of the Final Order described in Ordering Paragraph No. 3 above, each company listed in the Supplier Table will be stricken from all active utility lists maintained by the Commission's Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, removed from the Commission's website, and notifications be sent to all electric distribution companies in which the Electric Generation Suppliers are licensed to do business.

5. Upon entry of the Final Order described in Ordering Paragraph No. 3, each electric distribution company in which the Electric Generation Suppliers are licensed to do business, shall return the customers of the Electric Generation Suppliers to default service.

Secretary

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Implementation of Act 58 of 2018 Alternative Rule-making for Utilities

Public Meeting held
April 25, 2019

Commissioners Present: Gladys Brown Dutrieuille, Chairperson; David W. Sweet, Vice Chairperson; Norman J. Kennard; Andrew G. Place; John F. Coleman, Jr.

Implementation of Act 58 of 2018 Alternative Ratemaking for Utilities; M-2018-3003269

Implementation Order

By the Commission:

On June 28, 2018, Governor Wolf signed into law Act 58 of 2018, which amends Chapter 13 of the Pennsylvania Public Utility Code (Code), 66 Pa.C.S. §§ 1301 et seq. (relating to rates and distribution systems). Specifically, Act 58 adds Section 1330, 66 Pa.C.S. § 1330 (relating to alternative ratemaking for utilities), that permits the Pennsylvania Public Utility Commission (Commission) to approve an application by a utility to establish alternative rates and rate mechanisms. With this Implementation Order, the Commission establishes the procedures through which utilities may seek Commission approval of alternative rates and rate mechanisms.

Background

On August 23, 2018, the Commission issued a Tentative Implementation Order at this Docket seeking comment on proposals to implement Section 1330 of the Code. The Tentative Implementation Order was published in the *Pennsylvania Bulletin* on September 8, 2018. See 48 Pa.B. 5691.

Interested parties had 30 days from the publication of the Tentative Implementation Order in the *Pennsylvania Bulletin* to file comments. The following parties filed comments: Advanced Energy Economy Institute (AEEI); State Senator Lisa M. Boscola and State Senator John T. Yudichak; Columbia Gas of Pennsylvania, Inc. (Columbia); Duquesne Light Company (Duquesne); Citizens for Pennsylvania's Future, Clean Air Council, Keystone Energy Efficiency Alliance, Natural Resources Defense Council, PA Solar Energy Industries Association, Philadelphia Solar Energy Association, and Sierra Club (collectively, E-Advocates); Energy Association of Pennsylvania (EAP); Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company and West Penn Power Company (collectively, FirstEnergy); Industrial Energy Consumers of Pennsylvania (IEC); Pennsylvania Energy Consumers Alliance, Met-Ed Industrial Users Group, Penelec Industrial Customer Alliance, Philadelphia Area Industrial Energy Users Group, PP&L Industrial Customer Alliance, and West Penn Power

Industrial Intervenors (collectively, Industrials); International Brotherhood of Electrical Workers (IBEW); Laborers' District Council of Eastern Pennsylvania (LDC); Office of Consumer Advocate (OCA); Office of Small Business Advocate (OSBA); Pennsylvania-American Water Company (PAWC); PECO Energy Company (PECO); PPL Electric Utilities Corporation (PPL); and UGI Utilities, Inc. (UGI).

Interested parties had 70 days from the publication of the Tentative Implementation Order in the *Pennsylvania Bulletin* to file reply comments. The following parties filed reply Comments: AEEI; Duquesne; E-Advocates; EAP; FirstEnergy; IEC; Industrials; OCA; OSBA; PAWC; PECO; and PPL.

We note that on May 23, 2018, the Commission entered a Proposed Policy Statement Order at Docket No. M-2015-2518883 intended to provide guidelines each utility and stakeholder should consider in a Section 1308 rate proceeding to help determine if alternative ratemaking methodologies should be employed, the type of alternative ratemaking to be employed and to what extent it is to be employed.¹ The proposed policy statement was published in the *Pennsylvania Bulletin* on June 23, 2018 at 48 Pa.B. 3739. Comments were initially due within 60 days from the date of publication in the *Pennsylvania Bulletin*, with reply comments due within 90 days of publication. On August 14, 2018, the Commission issued a Secretarial Letter extending the comment period to October 22, 2018 and the reply comment period to November 20, 2018. Various stakeholders have filed comments and reply comments to the proposed policy statement.

The Commission recognizes that the proceeding at Docket No. M-2015-2518883 began prior to the passage of Act 58 and that both address policy considerations related to alternative ratemaking methodologies available to utilities. The Commission notes, however, that Act 58 and the proposed policy statement, while addressing utility alternative ratemaking, each have a different function in the process of establishing such rates for utilities. As will be discussed more fully below, Act 58 gave the Commission express statutory authority to approve alternative rate mechanisms for electric, natural gas, and water or wastewater utilities and what notices of such ratemaking requests are to be given to customers. While establishing the Commission's express statutory authority to approve alternative rate methodologies, Act 58 did not expressly determine which alternative rate methodology, if any, are to be used by which utility.

On the other hand, the proposed policy statement is intended only to give guidance to fixed utilities and interested stakeholders on what is to be considered when investigating alternative ratemaking methodologies in a Section 1308 rate proceeding. While intending to assist utilities and stakeholders, the policy statement does not establish a binding norm, nor does it establish a predicate for the adoption of an alternative rate mechanism by any fixed utility. The Commission is continuing to review the comments submitted under Docket No. M-2015-2518883, as well as the comments submitted under the above-referenced Docket relating to the proposed policy statement and will consider how to proceed, taking into consideration what, if any, impact Act 58 has on the policy statement and how that policy statement will interact with Act 58.

Discussion

A. Section 1330(a)—Declaration of Policy

This section sets forth the policy of the General Assembly as follows:

(a) Declaration of policy—The General Assembly finds and declares as follows:

(1) Innovations in utility operations and information technologies are creating new opportunities for all customers, and it is in the public interest for the commission to approve just and reasonable rates and rate mechanisms to facilitate customer access to these new opportunities while ensuring that utility infrastructure costs are reasonably allocated to and recovered from customers and market participants consistent with the use of the infrastructure.

(2) It is the policy of the Commonwealth that utility ratemaking should encourage and sustain investment through appropriate cost-recovery mechanisms to enhance the safety, security, reliability or availability of utility infrastructure and be consistent with the efficient consumption of utility service.

Section 1330(a) of the Code, 66 Pa.C.S. § 1330(a).

In the Tentative Order, the Commission noted that we had previously recognized and proposed similar policy goals in the Fixed Utility Distribution Rates Policy Statement proceeding at Docket No. M-2015-2518883.² While not requiring specific action by the Commission, the Commission will consider the policy goals contained in Section 1330(a) of the Code, as well as other applicable policy goals established by statute, regulation or case law, when reviewing requests to change base rates for natural gas distribution companies (NGDCs), electric distribution companies (EDCs), water or wastewater utilities or city natural gas distribution operations.

1. Comments

Commenters addressing the implementation of the declaration of policy stated that the policy goals in the Fixed Utility Distribution Rates Policy Statement proceeding at Docket No. M-2015-2518883 should be reconciled with the declaration of policy articulated in Act 58, while other commenters assert that the policy goals in each proceeding are consistent.³ Commenters also agreed with the Commission's position to consider all policy goals provided for in law and regulation.⁴ While agreeing with the Commission's position to consider all policy goals, some commenters requested that the Commission should be more explicit in articulating the policy goals.⁵ Yet other Commenters suggest the Commission should consider policies that promote strong labor protections, quality job creation and workplace safety.⁶ Finally, Commenters suggested that the Commission should promote performance based rates to improve safety, reliability, service and quality.⁷

2. Disposition

As stated in the TIO, the Commission will consider the policy goals contained in Section 1330(a) of the Code, as well as other applicable policy goals established by statute, regulation or case law, when reviewing requests to

change base rates for natural gas distribution companies (NGDCs), electric distribution companies (EDCs), water or wastewater utilities or city natural gas distribution operations. The Commission declines to state or establish in this proceeding more specific policy goals to be considered in future base rate proceedings. We note that Section 1330 of the Code applies to NGDCs, EDCs, water or wastewater utilities and city natural gas distribution operations, for which more specific policy goals may vary based on the needs of the utility and its customers at any given point in time. Regarding the policy goals articulated in the Fixed Utility Distribution Rates Policy Statement proceeding at Docket No. M-2015-2518883, the Commission will address those policy goals in that proceeding.

B. Section 1330(b)—Alternative Rate Mechanisms

This section identifies which utilities may seek Commission approval of an alternative rate mechanism, identifies some alternative rate mechanisms and what may be recovered through an alternative rate mechanism. Specifically, Section 1330(b) states the following:

(b) Alternative rate mechanisms.

(1) Notwithstanding any other provision of law, including, but not limited to, sections 2806.1(k)(2) (relating to energy efficiency and conservation program) and 2807(f)(4) (relating to duties of electric distribution companies), the commission may approve an application by a utility in a base rate proceeding to establish alternative rates and rate mechanisms, including, but not limited to, the following mechanisms:

- (i) decoupling mechanisms;
- (ii) performance-based rates;
- (iii) formula rates;
- (iv) multiyear rate plans; or
- (v) rates based on a combination of more than one of the mechanisms in subparagraphs (i), (ii), (iii) and (iv) or other ratemaking mechanisms as provided under this chapter.

(2) An alternative rate mechanism established under this section may include rates under section 1307 (relating to sliding scale of rates; adjustments) or 1308 (relating to voluntary changes in rates) and may provide for recovery of returns on and return of capital investments or, in the case of city natural gas distribution operations, recovery under the cash flow ratemaking method.

(3) Capital costs and expenses recovered through alternative rates and rate mechanisms shall be reasonable and prudently incurred and used and useful in providing service. Nothing in this paragraph shall be construed to prohibit or limit the recovery of revenue, as appropriate, under a commission-approved performance-based rate plan.

Section 1330(b) of the Code, 66 Pa.C.S. § 1330(b).

1. Base Rate Proceeding

In the TIO, the Commission proposed to interpret Section 1330(b)(1) as requiring utilities seeking to obtain Commission approval of an alternative rate or rate mechanism to do so initially through a Section 1308(d), 66 Pa.C.S. § 1308(d) (relating to voluntary changes in rates), general rate proceeding. In particular, the Commission interpreted the phrase, “a base rate proceeding” in subsection 1330(b)(1) as referring to a Section 1308(d) proceeding. A Section 1308(d) proceeding provides for an

extensive examination of a utility’s total revenues, expenses, taxes, capital costs and rate structure. Such proceedings, in which the statutory advocates, affected customers and others participate, represent an ideal vehicle for a careful and well-documented examination of any alternative ratemaking proposals. While subsection 1330(b)(2) states that “[a]n alternative rate mechanism established under this section may include rates under Section 1307. . . or 1308,” the Commission interpreted this as permitting rate adjustments in accordance with Section 1307 under parameters established through the initial Section 1308 proceeding approving the alternative rate mechanism.

Furthermore, the Commission interpreted the reference to Section 1308 as simply permitting subsequent changes or adjustments to a previously approved alternative rate mechanism through a subsequent Section 1308 proceeding. The Commission noted that this interpretation does not preclude or restrict in any way the ability of any party or the Commission from fully reviewing, in accordance with applicable statutory, regulatory and case law, a utility’s subsequent Section 1308 rate filing.

a. Comments

Commenters agree with the Commission’s interpretations of Section 1330(b).⁸ UGI, however, asserts that base rate filings under Section 1308 that do not affect more than 5% of the customers and that do not involve amounts in excess of 3% of the total gross annual interstate operating revenues of the public utility are still subject to full Commission review and provide interested parties with the same ability to be heard. UGI, asserts, therefore, that the Commission should not limit the approval of such mechanisms to the subset of base rate cases that constitute a general rate increase under Section 1308(d). UGI further asserts that requiring approval in a general rate case is not required to fulfil the Commission’s obligation to prescribe the specific procedures for the approval of an application to establish alternative rates as the Commission already has established procedures applicable to base rate cases which do not constitute a general rate increase.⁹

UGI states alternative rate mechanisms can include rates subject to automatic adjustment authorized under Section 1307 of the Code and that Act 58 clearly requires such alternative rate mechanisms to be the context of base rate cases. UGI states, however, that Section 1307 rate mechanisms, once established, should be able to operate and be reviewed in Section 1307 proceedings, and Section 1308 base rate proceedings. UGI posits that if an NGDC were to propose an alternative rate mechanism for the recovery of purchased gas costs, and the mechanism was approved in a Section 1308 base rate case, it is presumed that the NGDC would be permitted to operate the alternative purchased gas cost recovery mechanism subject to review in Section 1307 filings.¹⁰

PPL also asserts that the language of Section 1330(b)(1) referring to a base rate proceeding contemplates any Section 1308 base rate proceeding and should not be limited to Section 1308(d) proceedings. PPL further asserts that establishing a Section 1307 mechanism in the context of an initial Section 1308 proceeding is consistent with other established 1307 mechanisms. PPL states that it has specific experience with this interpretation with

respect to two of its existing automatic adjustment clauses—the Competitive Enhancement Rider (CER) and the Storm Damage Expense Rider (SDER), both of which operate under the construct set forth in Section 1307, after being approved in a Section 1308(d) proceeding. PPL notes that Act 58 provides that the Commission may approve an application to establish alternative rates and rate mechanisms including, but not limited to the types defined in Act 5, and that rates may be based on a combination or more than one mechanism.¹¹

OCA asserts that a Section 1308(d) general rate proceeding is the correct forum. OCA states that a 1308(d) proceeding will draw the largest and most diverse group of stakeholders and ordinarily provides the greatest opportunity for individual ratepayer participation, while rate filings under other Sections of 1308 generally draw little involvement from the rate-paying public and tend to draw fewer intervenors, making such proceedings not in the public interest. OCA asserts that a Section 1308(d) proceeding is the best and most reasonable forum for the evaluation of a utility's return of equity within the investigation of all the components of the utility's revenues and expenses.¹²

b. *Disposition*

The Commission adopts the interpretation of Section 1330(b)(1) as requiring utilities seeking to obtain Commission approval of an alternative rate or rate mechanism under Section 1330 of the code, to do so initially through a Section 1308(d), 66 Pa.C.S. § 1308(d) (relating to voluntary changes in rates), general rate proceeding. In particular, the Commission interprets the phrase, “a base rate proceeding” in subsection 1330(b)(1) as referring to a Section 1308(d) proceeding. A Section 1308(d) proceeding provides for an extensive examination of a utility's total revenues, expenses, taxes, capital costs and rate structure. Such proceedings, in which the statutory advocates, affected customers and others participate, represent an ideal vehicle for a careful and well-documented examination of any alternative ratemaking proposals. While subsection 1330(b)(2) states that “[a]n alternative rate mechanism established under this section may include rates under Section 1307... or 1308,” the Commission interprets this as permitting rate adjustments in accordance with Section 1307 under parameters established through the initial Section 1308 proceeding approving the alternative rate mechanism.

Furthermore, the Commission clarifies that the reference to Section 1307 in Section 1330(b) as simply permitting subsequent changes or adjustments to a previously approved alternative rate mechanism through a subsequent Section 1307 proceeding. The Commission noted that this interpretation does not preclude or restrict in any way the ability of any party or the Commission from fully reviewing, in accordance with applicable statutory, regulatory and case law, a utility's subsequent Section 1307 rate filing.

Regarding the comments of PPL and UGI that Section 1330(b) permits the Commission to approve an application by a utility to establish an alternative rate or rate mechanism through other Section 1308 proceedings, the Commission is not persuaded by their arguments. To begin with, we note that while PPL asserts that the Commission has approved alternative rates such as its CER and SDER riders, PPL acknowledges that these riders were introduced and approved in a Section 1308(d)

proceeding at Docket No. R-2012-2290597. This reinforces the Commission's interpretation of Section 1330(b). Furthermore, neither PPL nor UGI provide persuasive arguments that the Legislature's use of the phrase “base rate proceeding” as involving anything less than a comprehensive or extensive examination of a utility's total revenues, expenses, taxes, capital costs and rate structure. As the OCA points out, such proceedings, in which the statutory advocates, affected customers and others participate, represent an ideal vehicle for a careful and well-documented examination of any alternative ratemaking proposal.

We further find that the term “alternative rate” is not defined in the Code and is a rather amorphous term that could apply to many types of rates. Section 1330(f), does however, define several alternative rate mechanisms, such as decoupling mechanism, formula rates, multiyear rate plan and performance-based rates. These definitions make reference to distribution rates and revenue requirements in a manner that indicates that Section 1330 is intended to address comprehensive base rate proceedings.¹³ While these defined alternative rate mechanisms, by definition allow for adjustments in rates without another full base rate proceeding, they are predicated on the fact that the rates are initially determined in a base rate proceeding that initially establishes the utility's revenue requirements consistent with well established ratemaking principles.

Accordingly, the Commission declines to adopt the interpretation put forth by PPL and UGI. With that said, the Commission notes that Section 1330(e) specifically states that “[n]othing in this section shall be construed as limiting the existing ratemaking authority of the commission or be construed to invalidate or void any rate mechanisms approved by the commission prior to the effective date of this section.” 66 Pa.C.S. § 1330(e). As such, it is not the intent of the Commission to preclude utilities from proposing rates permitted under existing law.

2. *Other Provisions of Law*

Regarding the language in subsection 1330(b)(1) stating that “[n]otwithstanding any other provision of law, including, but not limited to, sections 2806.1(k)(2)... and 2807(f)(4),” the Commission noted that the word “notwithstanding” means “in spite of.”¹⁴ Accordingly, the Commission proposed to interpret this section as in spite of any other provision of law, including, but not limited to, Sections 2806.1(k)(2)... and 2807(f)(4)... , the Commission may approve an application by a utility in a base rate proceeding to establish alternative rates and rate mechanisms.

Section 2806.1(k)(2) of the Code relates to EDC cost recovery for the Act 129 energy efficiency and conservation plans. Section 2806.1(k)(2) states that “decreased revenues of an [EDC] due to reduced energy consumption or changes in energy demand shall not be a recoverable cost under a reconcilable automatic adjustment clause.” Section 2807(f)(4) of the Code relates to EDC cost recovery for their Act 129 smart meter technology deployment plans. Section 2807(f)(4) states in part that “[i]n no event

¹³ Decoupling mechanism is “[a] rate mechanism that reconciles authorized distribution rates or revenues for differences between projected rates used to set rates and actual sales. . . .” Formula rates are “[r]ates that are periodically adjusted based on a predetermined formula without the need for a full base rate proceeding.” Multiyear rate plan is “[a] rate mechanism under which the commission sets base rates and revenue requirements for a multiyear plan period and authorizes periodic changes in base rates. . . .” Performance-based rates are “[r]ates that are set or adjusted based on a public utility's financial or operating performance. Such mechanisms can be part of, or in addition to, existing rate base/rate of return ratemaking or cash flow ratemaking method and may include capital costs and return thereon.”

shall lost or decreased revenues by an [EDC] due to reduced electricity consumption or shifting energy demand be considered any of the following: (i) A cost of smart meter technology recoverable under a reconcilable automatic adjustment clause under section 1307(b). . .(ii) A recoverable cost.” These two sections apply only to EDCs. As such, the Commission proposed to interpret the “notwithstanding” language in Section 1330(b) as permitting the Commission to approve an application by any utility, including EDCs, to establish alternative rates and rate mechanisms, in spite of the prohibitions in Section 2806.1(k)(2) and 2807(f)(4) of the Code.

a. Comments

Commenters also agree with the Commission’s interpretations of Section 1330(b) regarding its effect on other provisions of law.¹⁵ Some Commenters request that the Commission should explicitly provide that the limitations of Section 2806.1(k) and 2807(f)(4) relating to the recovery of decreased revenues do not restrict recovery of such revenues through alternative rates or rate mechanisms considered and approved by the Commission under Section 1330(b), including reconcilable adjustment charges consistent with Section 1307 of the Code.¹⁶ FirstEnergy argues that the pre-existing restrictions on recovery of lost distribution revenues contained within Act 129 is explicitly acknowledged by Act 58, yet an exception is clearly established to allow that, in circumstances where an alternative ratemaking mechanism is proposed, in the context of a base rate proceeding, under Section 1308 of the Code. FirstEnergy goes on to argue that an EDC could not propose and be granted a mechanism for such recovery through its EE&C or other such proceeding filed under Act 129, this exception allows for establishment of a mechanism under certain discrete instances that will offer the Commission further scrutiny of the proposal—a concern the General Assembly was affirmatively intending to address by including this revision to the bill in the course of its passage.¹⁷

EAP also asserts that subsection 1330(b)(2) authorizes the Commission to allow the recovery of decreased revenues resulting from the reduction of energy consumption or reduction of demand under Act 129 via a reconcilable adjustment charge consistent with Section 1307 of the Code. EAP requests that the Commission clarify and expand its statement in the TIO to avoid any future argument that Section 1307 mechanisms or adjustment charges are not available to recover lost revenues attributable to Act 129 in the context of a request in a base rate proceeding.¹⁸

IEC asserts that the prohibitions in Sections 2806.1(k)(2) and 2807(f)(4) are express prohibitions against the consideration of particular utility accounting items, specifically, lost or decreased revenues, as recoverable costs. IEC also asserts that this prohibition of a category of costs is not the same as prohibition of an alternative rate mechanism. IEC states that a plain reading of Section 1330(b) appears to indicate the Legislature’s intent to address and supersede existing prohibitions of alternative ratemaking structures and not the inclusion of lost or decreased revenues as recoverable costs.¹⁹

OCA states that Sections 2806.1(k)(2) and 2807(f)(4) are the result of Act 129, which allows EDCs to establish automatic surcharges to recover the costs of energy efficiency, demand response and smart meter programs. OCA asserts that the General Assembly, however, declared that such cost recovery shall not include “decreased revenues of an electric distribution company due to reduced energy consumption or changes in energy demand,” 66 Pa.C.S. § 2806.1(k)(2). OCA recognizes that alternative ratemaking mechanisms, such as rate decoupling, may inherently provide EDCs with some recovery of revenues that are attributable to reduced energy consumption or changes in energy demand. OCA, however, argues that the prohibitions contained within Section 2806.1(k)(2) and 2807(f)(4) still operate to preclude an EDC from recovering decreased revenues that are solely attributable to reduced energy consumption or changes in energy demand through a separate automatic adjustment mechanism, such as lost revenue adjustment clauses, that would be specifically designed to recovery only such revenues.²⁰

b. Disposition

The Commission is not persuaded by either arguments proffered by OCA or the EDCs. Regarding the language in subsection 1330(b)(1) stating that “[n]otwithstanding any other provision of law, including, but not limited to, sections 2806.1(k)(2). . .and 2807(f)(4),” the Commission notes that the word “notwithstanding” means “in spite of.”²¹ Accordingly, the Commission interprets this section as in spite of any other provision of law, including, but not limited to, Sections 2806.1(k)(2). . .and 2807(f)(4). . ., the Commission may approve an application by a utility in a base rate proceeding to establish alternative rates and rate mechanisms.

Section 2806.1(k)(2) of the Code relates to EDC cost recovery for the Act 129 energy efficiency and conservation plans. Section 2806.1(k)(2) states that “decreased revenues of an [EDC] due to reduced energy consumption or changes in energy demand shall not be a recoverable cost under a reconcilable automatic adjustment clause.” Section 2807(f)(4) of the Code relates to EDC cost recovery for their Act 129 smart meter technology deployment plans. Section 2807(f)(4) states in part that “[i]n no event shall lost or decreased revenues by an [EDC] due to reduced electricity consumption or shifting energy demand be considered any of the following: (i) A cost of smart meter technology recoverable under a reconcilable automatic adjustment clause under section 1307(b). . .(ii) A recoverable cost.” These two sections apply only to EDCs. As such, the Commission interprets the “notwithstanding” language in Section 1330(b) as permitting the Commission to approve an application by any utility, including EDCs, to establish alternative rates and rate mechanisms, despite the prohibitions in Section 2806.1(k)(2) and 2807(f)(4) of the Code.

The Commission declines to provide further guidance on this issue as both the OCA and the EDCs appear to be addressing specific costs that may, or may not, be permitted to be included in determining an EDC’s revenue requirement. The Commission declines to make a binding ruling on this issue in this proceeding as such a determination is fact dependent and can only be addressing in a proceeding that affords all interested parties an opportunity to present and cross-examine evidence and fully brief the issues and the law.

3. Covered Costs and Expenses

Regarding subsections 1330(b)(2) and (3) the Commission proposed to interpret subsection 1330(b)(2) as providing self-explanatory direction as to what revenue may be recovered through alternative rates and rate mechanisms. The Commission proposed to interpret subsection 1330(b)(3) as also providing self-explanatory direction as to what capital costs and expenses may be recovered through alternative rates and rate mechanisms, so long as those costs and expenses are “reasonable and prudently incurred and used and useful in providing service.” This is, of course, a fundamental principle of public utility law in Pennsylvania.

a. Comments

Commenters also agree with the Commission’s interpretations of Section 1330(b)(2) and (3).²² LDC suggests that Project Labor Agreements, local hiring targets and Best Value Contracting should be utility practices supported by utility alternative ratemaking.²³ IBEW suggests that alternative rate mechanisms would allow utilities to increase reliability, perform maintenance and make investments in modern technology while increasing safety for workers and the public.²⁴ State Senators Lisa M. Boscola and John T. Yudichak state that alternative rates and rate mechanisms can better align utility rates with performance outcomes that improve safety, reliability, service and quality and that implementation of Act 58 must include strong training and protective standards.²⁵

The OCA, IEC and Industrials request that the Commission establish specific consumer protections that should apply to utility alternative rate mechanisms.²⁶ AEEI requests that the Commission develop specific guidance on what is to be included in utility alternative ratemaking proposals.²⁷ PECO, Duquesne, EAP, PPL and FirstEnergy state that the Commission should maintain the flexibility provided in Act 58 for utilities to propose rate mechanisms and rate designs that fit their individual financial and operational needs and not impose specific customer protections.²⁸

b. Disposition

The Commission interprets subsection 1330(b)(2) as providing self-explanatory direction as to what revenue may be recovered through alternative rates and rate mechanisms. The Commission interprets subsection 1330(b)(3) as also providing self-explanatory direction as to what capital costs and expenses may be recovered through alternative rates and rate mechanisms, so long as those costs and expenses are “reasonable and prudently incurred and used and useful in providing service.” This is, of course, a fundamental principle of public utility law in Pennsylvania.

The Commission declines to set additional requirements, parameters or customer protections in this proceeding as requested by various commenters. The Commission finds that Section 1330 has broad application to electric, natural gas, water and wastewater utilities, whereas, the commenters’ proposals were specific to EDCs. The Commission also finds that Section 1330 provides for a variety of alternative ratemaking mechanisms, whereas, the commenters’ proposals ad-

ressed specific forms of alternative ratemaking mechanisms. Establishing such additional requirements, parameters or customer protections in this proceeding is inappropriate. Such binding norms can only be established through legislation, rulemaking or adjudication.

In this proceeding, the Commission is simply providing guidance on how Act 58 will be implemented. Of note, Act 58, did not include the additional requirements, parameters or customer protections commenters’ requested. The Commission also declines to initiate a rulemaking through this proceeding. Again, the Commission notes that many of the suggested requirements, parameters and customer protections address specific utility functions or rate mechanisms that the utilities may or may not propose to implement. The Commission finds that at this time, it would not at this time be the best use of the interested stakeholders,’ utilities’ or the Commissions’ resources to establish through rulemaking requirements for functions or rate mechanisms that may never be implemented by any utility. Accordingly, the Commission finds that such requirements, parameters and customer protections are best addressed in an adjudicated base rate proceeding based on the rate mechanism proposed by the utility and the facts associated with that utility and its proposed rates.

C. Section 1330(c)—Customer Notice

This section establishes requirements for utilities to provide additional notice to customers regarding an application for an alternative rate or rate mechanism, and information regarding the Commission decision and the approved rates. Specifically, Section 1330(c) states the following:

(c) Customer Notice

(1) A utility shall notify a customer of all of the following:

(i) The filing of an application under subsection (b)(1).

(ii) The commission’s decision on the application.

(iii) A summary and, if applicable, a schedule of the rate adjustments that will occur as a result of the commission’s approval of a utility application under subsection (b) and the effective date of the adjustments.

(iv) Any other information required by the commission by regulation or order.

(2) Notice shall be provided through customer bill inserts and posted on the utility’s publicly accessible Internet website.

Section 1330(c) of the Code, 66 Pa.C.S. § 1330(c).

The Commission’s regulation at 52 Pa. Code § 53.45 (relating to notice of new tariffs and tariff changes) dictates the notice utilities are required to provide to customers upon the filing of a new tariff, tariff supplement or tariff revision that constitutes a general rate increase within the meaning of 66 Pa.C.S. § 1308(d). To meet the new requirement in subsection 1330(c)(1)(i) for a utility to notify customers of the filing of an application for an alternative rate or rate mechanism, the Commission proposed to require utilities to include the following revisions to the notice language contained in 52 Pa. Code § 53.45(b)(1)(i) (relating to notice of proposed rate changes):

NOTICE OF PROPOSED RATE CHANGES

To Our Customers:

(company) is filing a request with the Pennsylvania Public Utility Commission (PUC) to increase your (type of service) rates as of (date). This notice describes the company's rate request, the PUC's role, and what actions you can take.

(company) has requested an overall rate increase of \$ _____ per year. **This filing also includes a request for approval of the following alternative rate mechanism(s): (state the alternative rate mechanism(s) in accordance with 66 Pa.C.S. § 1330 (relating to alternative ratemaking for utilities). If the alternative rate mechanism(s) is approved as filed, the impact would be (provide a summary of the rate impacts by customer class).**

If the company's entire request is approved, the total bill for a residential customer using (state typical usage level) would increase from \$ _____ to \$ _____ per month or by ____ %.

* * * * *

To meet the new requirements in subsection 1330(c)(2) that the utility shall provide notice through customer bill inserts and a posting on the utility's publicly accessible website, the Commission proposed that a utility seeking an alternative rate or rate mechanism, must provide bill inserts as prescribed in 52 Pa. Code § 53.45(4) (relating to alternative method) in lieu of 52 Pa. Code § 53.45(2) (relating to by written or printed notice). In addition, the Commission proposed to require the utility to post this notice on its publicly accessible website. The Commission also proposed the requirement that the utility provide a link to this notice on the utility's customer home page and any page dedicated to a customer class and that this link be prominently displayed.

To meet the new requirements in subsections 1330(c)(1)(ii) and (iii) that the utility must notify customers of the Commission's decision and provide a summary of the approved alternative rate or rate mechanism, the Commission proposed that the utility include this information on the utility's tariff pages listing modifications of existing rules, regulations and rates as prescribed in 52 Pa. Code § 53.22 (relating to list of modifications). Specifically, the Commission proposed that these tariff pages identify the Commission's order approving the Section 1330 alternative rate or rate mechanism and include the caption, docket number and order entry date. In addition, the Commission proposed that these tariff pages include a summary of the Commission-approved Section 1330 alternative rate and rate mechanism, in plain language, and, if applicable, a schedule of the rate adjustments that will occur and the effective dates of any adjustments.

Regarding the requirements of subsection 1330(c)(2), the Commission proposed that the utility distribute the tariff pages containing the list of modifications to customers through a bill insert. In addition, the Commission proposed to require the utility to provide a link to this portion of the utility's tariff on the utility's customer home page and any page dedicated to a customer class and that this link be prominently displayed.

1. *Comments*

Duquesne suggests that any notice contain plain language explanations of the rate recovery method and that the Commission be flexible in its interpretation of the notification requirements. Duquesne and FirstEnergy dis-

agree with the proposal to distribute tariff pages to customers via a bill insert and suggests that the bill inserts contain explanations of adjustments consistent with the requirements of 52 Pa. Code § 53.45, as is currently done.²⁹

EAP, PECO, PPL and Columbia generally agree with the proposal to require utilities to include revisions to the notice language in 52 Pa. Code § 53.45(b)(1)(i), noting that the changes clearly state that the company's rate filing includes a request for approval of an alternative rate mechanism and provides a summary of the rate impacts by customer class. EAP, PECO also agree with the requirement that utilities provide a link to the notice sent via bill insert on its customer home page, which will ensure availability of the message to those customers who receive e-bills, pay their utility bill via automatic payment, or otherwise miss the insert. PPL does not object to including a link on its customer home page, however, it does have concerns with including links on any page dedicated to a customer class. EAP, PECO, PPL and UGI, however, do not believe it is good practice or necessary to include copies of the tariff pages as part of the bill insert, as it would increase costs and not currently mandated. EAP, PECO, PPL and Columbia suggest that utilities be allowed to include in the bill inserts the information required by Subsection 1330(c)(1) and an explanation of how to access the tariff pages via electronic means.³⁰

PAWC supports the proposed revision to the notice language provided for in 52 Pa. Code § 53.45(b)(1)(i) and the requirement to provide bill inserts provided for in 52 Pa. Code § 53.45(4). PAWC, however, requests that the Commission permit utilities to use direct mail in lieu of bill inserts. PAWC supports the requirement to post the notice on the public utility's website as well as providing a link to the notice on the customer and customer class designated home page.³¹

AEEI notes that there is a distinction between "rate design" and "ratemaking," with the former describing the electricity rates and tariffs that apply to specific customers, whereas the latter describes the general process for setting utility revenue requirements. AEEI also notes that an outcome of a utility application under Section 1330 may be new or modified retail customer tariffs, but this is not a necessary outcome. AEEI states that the use of multi-year rate plans or performance incentives will not necessarily require utilities to modify customer tariffs. AEEI suggests that while customers must be notified of tariff changes, the notice guidelines should avoid creating customer confusion. AEEI also suggests that the notice language should be flexible enough to describe the full range of possible rate designs that may be implemented and should include information about tools, services and other information available to help customers manage their energy usage and costs.³²

OCA supports early and effective notice to customers and agrees that the initial notice must include information on the alternative ratemaking proposal. OCA, however, is concerned that the requirements may provide insufficient notice. OCA suggests that the notice should describe in plain language how the alternative ratemaking mechanism operates and the goal of the mechanism. In addition, the OCA suggests that the bill inserts should include a plain language narrative of how the mechanism

will impact a customer's utility bill and how a customer may mitigate or offset any potential surcharges or rate hikes. OCA further suggests that the notices should be provided to the Commission's Bureau of Consumer Services and the OCA for review and comment before being sent to customers.³³

OCA also submits that instead of providing only a notice of a Commission decision by providing the relevant tariff pages, the utility should be required to include information on the final and approved alternative ratemaking mechanism in a conspicuous bill insert printed in plain language. OCA asserts that this notice should also be provided to the Commission's Bureau of Consumer Services and the OCA for review and comment before being sent to customers.³⁴

OSBA agrees that customer notice of proposed alternative ratemaking is critical, however, OSBA is concerned that requiring the inclusion of tariff pages in a bill insert would be costly, unduly burdensome and create customer confusion. OSBA asserts that including information with the bill inserts regarding how customers may electronically access tariff pages is an adequate and appropriate alternative. OSBA recommends that a working group of interested stakeholders be created to discuss notice requirements and report any consensus to the Commission.³⁵

PPL and Duquesne object to OCA's suggestion to include additional levels of detail in the initial notice as such information may cause confusion. In addition, PPL objects to providing the same level of detail upon approval of the rate mechanism. PPL asserts that this level of detail may cause customers to struggle to understand how the proposal changed and why, or they may assume that they have already been notified of the changes and disregard any messaging on the final approved mechanism. PPL and PAWC also oppose having OCA and the Commission's Bureau of Consumer Services review and comment on the notices, noting the strict timing limitations on the notices required by 52 Pa. Code § 53.45(a). PPL further notes that it currently and on a consistent basis provides customers with information on steps to mitigate or offset the impact of new rates on their bill.³⁶

2. Disposition

This section establishes requirements for utilities to provide additional notice to customers regarding an application for an alternative rate or rate mechanism, and information regarding the Commission decision and the approved rates. Specifically, Section 1330(c) states the following:

(c) Customer Notice

(1) A utility shall notify a customer of all of the following:

(i) The filing of an application under subsection (b)(1).

(ii) The commission's decision on the application.

(iii) A summary and, if applicable, a schedule of the rate adjustments that will occur as a result of the commission's approval of a utility application under subsection (b) and the effective date of the adjustments.

(iv) Any other information required by the commission by regulation or order.

(2) Notice shall be provided through customer bill inserts and posted on the utility's publicly accessible Internet website.

Section 1330(c) of the Code, 66 Pa.C.S. § 1330(c).

The Commission's regulation at 52 Pa. Code § 53.45 (relating to notice of new tariffs and tariff changes) dictates the notice utilities are required to provide to customers upon the filing of a new tariff, tariff supplement or tariff revision that constitutes a general rate increase within the meaning of 66 Pa.C.S. § 1308(d). To meet the new requirement in subsection 1330(c)(1)(i) for a utility to notify customers of the filing of an application for an alternative rate or rate mechanism, the Commission will require utilities to include the following revisions to the notice language contained in 52 Pa. Code § 53.45(b)(1)(i) (relating to notice of proposed rate changes):

NOTICE OF PROPOSED RATE CHANGES

To Our Customers:

(company) is filing a request with the Pennsylvania Public Utility Commission (PUC) to increase your (type of service) rates as of (date).

This notice describes the company's rate request, the PUC's role, and what actions you can take.

(company) has requested an overall rate increase of \$ _____ per year. **This filing also includes a request for approval of the following alternative rate mechanism(s): (state the alternative rate mechanism(s) in accordance with 66 Pa.C.S. § 1330 (relating to alternative ratemaking for utilities). If the alternative rate mechanism(s) is approved as filed, the impact would be (provide a summary and, if applicable, a schedule of the rate adjustments that will occur as a result of the Commission's approval of a utility application under 66 Pa.C.S. § 1330(b) and the effective date of the adjustments).**

If the company's entire request is approved, the total bill for a residential customer using (state typical usage level) would increase from \$ _____ to \$ _____ per month or by ____ %.

* * * * *

The Commission agrees with EAP, PECO, PPL and Columbia that the proposed changes to the notice language contained in 52 Pa. Code § 53.45(b)(1)(i) that more closely matches the language in Subsection 1330(c)(1). In addition, the Commission agrees with Duquesne, EAP, PECO, PPL and Columbia that the utilities be given some flexibility in how they describe the proposed alternative rate mechanism and its impacts, noting that the summary and impacts will vary depending on the proposed rate mechanism. Accordingly, we revised the changes to the notice language contained in 52 Pa. Code § 53.45(b)(1)(i) to mirror the language in 66 Pa.C.S. § 1330(c)(1)(iii).

The Commission will not require that the notice describe in plain language how the alternative ratemaking mechanism operates, the goal of the mechanism, a narrative of how the mechanism will impact a customer's utility bill or how a customer may mitigate or offset any potential surcharges or rate hikes as suggested by the OCA. We agree with PPL and Duquesne that this level of detail may confuse customers. In addition, we decline to adopt the OCA's suggestion that the notices be provided to the Commission's Bureau of Consumer Services and the OCA for review and comment before being sent to customers. The Commission agrees with PPL and Duquesne that the current regulations do not require

such a review, nor does the timing requirements of 52 Pa. Code § 53.45 permit an adequate review.

To meet the new requirements in subsection 1330(c)(2) that the utility shall provide notice through customer bill inserts and a posting on the utility's publicly accessible website, the Commission will require a utility seeking an alternative rate or rate mechanism, to provide bill inserts as prescribed in 52 Pa. Code § 53.45(b)(4) (relating to alternative method) in lieu of 52 Pa. Code § 53.45(b)(2) (relating to by written or printed notice). We agree with PAWC's request that the Commission permit utilities to use direct mail in lieu of bill inserts. In addition, the Commission will require the utility to post this notice on its publicly accessible website. The Commission will also require that the utility provide a link to this notice on the utility's customer home page. In recognition of the fact that each utility's websites are unique, as asserted by PPL, we will not dictate how a utility is to provide notice to individual customer classes on its website but simply require that the utility provide a link to the notice in a manner that allows any customer to see and access the link upon initial access to the utility's website, at a minimum.

To meet the new requirements in subsections 1330(c)(1) and (2) that the utility must notify customers of the Commission's decision, the Commission will require utilities to provide a plain language summary of the Commission's decision and the approved alternative rate or rate mechanism and, if applicable, a schedule of the rate adjustments that will occur as a result of the Commission's approval of the utility's application under 66 Pa.C.S. § 1330(b) and the effective dates of the adjustments. In addition, the Commission will require the utility to provide a link to this plain language summary of the Commission's decision and the approved alternative rate or rate mechanism and, if applicable, a schedule of the rate adjustments that will occur on the utility's customer home page. Again, we will not dictate how a utility is to provide notice to individual customer classes on its website but simply require that the utility provide a link to the notice in a manner that allows any customer to see and access the link upon initial access to the utility's website, at a minimum.

The Commission will not require the utility to provide tariff pages to customers as bill inserts. The Commission agrees with the commenters that noted that this requirement would be costly and unduly burdensome and confusing to customers.

D. Section 1330(d)—Commission

This section requires the Commission to prescribe, by regulation or order, specific procedures for the approval of an application to establish alternative rates. Specifically, Section 1330(d) of the Code states the following:

(d) Commission—No later than six months after the effective date of this subsection, the commission, by regulation or order, shall prescribe the specific procedures for the approval of an application to establish alternative rates.

Section 1330(d) of the Code, 66 Pa.C.S. § 1330(d).

To meet this requirement, the Commission proposed to require a utility seeking to use or employ an alternative rate or rate mechanism under Section 1330 to obtain Commission approval through a Section 1308(d), 66 Pa.C.S. § 1308(d), base rate proceeding which, as noted herein, includes an in-depth examination of the utility's financial status and operations.

It is well-established that in any Section 1308 proceeding, the utility has the burden of establishing the justness

and reasonableness of tariff proposals. See 66 Pa.C.S. §§ 315(a); 1301. The Pennsylvania Commonwealth Court has ruled that the evidence adduced to meet this standard must be substantial. See *Lower Frederick Twp. v. Pa. PUC*, 409 A.2d 505, 507 (Pa. Cmwlth. 1980). Substantial evidence is such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. *Dutchland Tours, Inc. v. Pa. PUC*, 337 A.2d 922 (Pa. Cmwlth. 1975). It is also well-established that the burden of proof does not shift to parties challenging a utility's proposal but remains with the utility throughout the course of the proceeding. See *Berner v. Pa. PUC*, 116 A.2d 738 (Pa. 1955). Section 1330 of the Code does not alter or change these well-established standards placed on a utility seeking to change its rates through a Section 1308 base rate proceeding.

Furthermore, the Commission's regulation at 52 Pa. Code § 53.53 (relating to information to be furnished with proposed Section 1308(d) general rate increase filings in excess of \$1 million) establishes what a utility is to provide when it files a tariff or tariff supplement seeking a general rate increase within the meaning of 66 Pa.C.S. § 1308(d). The information to be furnished in accordance with 52 Pa. Code § 53.53 is quite comprehensive and far-reaching such that the Commission presumes that it encompasses what is required for any base rate proposal, including any alternative rate or rate mechanism.

The Commission notes that utilities have always had the ability to propose,³⁷ and the Commission has had the ability to approve, alternative rates or rate mechanisms, including the rate mechanisms specifically listed in Section 1330. The General Assembly specifically recognized this in subsection 1330(e) of the Code, 66 Pa.C.S. § 1330(e), where it stated the following:

(e) Construction—Nothing in this section shall be construed as limiting the existing ratemaking authority of the commission or be construed to invalidate or void any rate mechanism approved by the commission prior to the effective date of this section.

Section 1330(e) of the Code, 66 Pa.C.S. § 1330(e). The Commission postulated that at the present time, the established law, rules and procedures for filing and seeking approval of a new rate, including alternative rates and rate mechanisms, under a Section 1308 general base rate proceeding appear to be adequate for the Section 1330 requirements. Accordingly, the Commission did not propose any additional specific procedures unless or until their need becomes apparent.³⁸

Finally, the Commission recognized that some of the alternative rate mechanisms involve annual reconciliation or adjustments. In particular, the definitions of decou-

³⁷ The Commission notes that 66 Pa.C.S. §§ 2806.1(k)(2); 2807(f)(4) could have been interpreted as limiting the ability of the large EDCs from employing certain alternative ratemaking mechanisms.

³⁸ As previously mentioned, at Docket No. M-2015-241883, the Commission has proposed a policy statement that is intended to provide guidance for fixed utilities and interested stakeholders on what the Commission will consider when investigating alternative ratemaking methodologies proposed in Section 1308, 66 Pa.C.S. § 1308, rate proceedings. In that proceeding the Commission stated the following:

A consistent theme expressed in the comments is that the Commission should not take a one-size-fits-all approach, with some parties suggesting that we establish guidelines. We agree with these parties that the type and extent of alternative ratemaking methodologies employed by each fixed utility should be developed in a transparent manner in accordance with each utility's unique circumstances. We also agree that establishment of the guidelines each utility and stakeholder should consider in a Section 1308 rate proceeding would be helpful in determining if, the types(s) of and to what extent, alternative ratemaking methodologies should be employed.

See Fixed Utility Distribution Rates Policy Statement, Proposed Policy Statement Order, Docket No. M-2015-2518883, entered May 23, 2018, at 26. The Commission intends to continue the investigation of the appropriateness of this proposed policy statement as such guidance appears, based on the comments submitted under that docket, to remain relevant to utilities and interested stakeholders in future Section 1308 base rate proceedings.

pling mechanism, multiyear rate plan and performance-based rates in subsection 1330(f), 66 Pa.C.S. § 1330(f), specifically allow for periodic adjustments or reconciliation of rates. The Commission postulated that the parameters for when and how such adjustments or reconciliations are to transpire, and whether interest is to be applied to any over- and under-collections, are to be established initially in the Section 1308(d) base rate proceeding and subsequently made in accordance with Section 1307 of the Code, 66 Pa.C.S. § 1307, (relating to sliding scale of rates; adjustments).

This was recognized by the General Assembly and codified in subsection 1330(b)(2), 66 Pa.C.S. § 1330(b)(2), which states that “[a]n alternative rate mechanism established under this section may include rates under section 1307 (relating to sliding scale of rates; adjustments). . . .” Accordingly, the Commission did not propose any additional specific procedures regarding such adjustments at this time.

1. Comments

Duquesne and FirstEnergy agree that this approach is logical and well-understood by utilities, statutory advocates and other interested stakeholders. Duquesne also agrees that Section 1330 of the Code does not alter and will not change the well-established burden of proof standards placed on a utility seeking to change its rates through a Section 1308 base rate proceeding. Duquesne further agrees that the information provided pursuant to 52 Pa. Code § 53.53 is quite comprehensive and far-reaching and, unless or until proven otherwise, will provide the requisite information that the Commission needs to fairly and fully evaluate any alternative mechanism proposal. Finally, Duquesne agrees that the parameters for any adjustments or reconciliations required by an alternative rate mechanism should be part of the final Commission action in the Section 1308(d) base rate proceeding and do not require any additional specific regulations at this time.³⁹

PAWC agrees that base rate proceedings include an in-depth review and examination of a public utility's financial status and operations. PAWC also states that the information a public utility is required to submit as part of a base rate proceeding is detailed and comprehensive, as such, no additional filing requirements are needed. PAWC also notes that it is cognizant of its customers and provides quality service at just and reasonable rates as approved by the Commission. PAWC also states that it has and continues to engage in customer education and asserts that utilities should not be required to submit an education plan as part of an alternative rate mechanism filing.⁴⁰

E-Advocates agree that Section 1330(d), whereby a utility seeking to use or employ an alternative rate or rate mechanism must do so through a Section 1308(d) base rate proceeding and is consistent with Pennsylvania jurisprudence that places the burden on utilities to show that tariff proposals are just and reasonable. E-Advocates also agree that base rate cases allow for interested stakeholders to participate in an in-depth examination of a utility's financial status, as well as proposed policies, ratemaking and rate-design structures that would impact ratepayers.⁴¹

IEC concurs with the Commission's interpretation of Section 1330(d). OCA also agrees with the Commission's

interpretation. OCA, OSBA, IEC and Industrials, however, submit that the Commission should use its authority under Subsection 1330(d) to create specific procedures concerning filing requirements, consumer protections, and consumer education plans when utilities apply for alternative ratemaking mechanisms.⁴²

PPL, PECO and EAP again note that it is its position that the reference to “a base rate proceeding” in Section 1330(b)(1) contemplates any Section 1308 base rate proceeding and should not be limited to Section 1308(d) proceedings. PPL believes the processes for base rate cases under Section 1308 and automatic adjustment clauses under Section 1307 are well established and familiar to stakeholders. PPL also supports the position that the information required by 52 Pa. Code § 53.53 is comprehensive and will meet the needs to support a proposal for any alternative rate or rate mechanism. PPL also agrees that the details of reconciliation for a given permissible mechanism be established in the context of the 1308 base rate proceeding as this is the most efficient and effective method.⁴³

2. Disposition

To meet requirements of Section 1330(d), 66 Pa.C.S. § 1330(d), the Commission will require a utility seeking to use or employ an alternative rate or rate mechanism under Section 1330 to obtain Commission approval through a Section 1308(d), 66 Pa.C.S. § 1308(d), base rate proceeding which, as noted herein, includes an in-depth examination of the utility's financial status and operations.

The Public Utility Code provides that in any Section 1308 proceeding, the utility has the burden of establishing the justness and reasonableness of tariff proposals. 66 Pa.C.S. §§ 315(a); 1301. The Pennsylvania Commonwealth Court has ruled that the evidence adduced to meet this standard must be substantial. See *Lower Frederick Twp. v. Pa. PUC*, 409 A.2d 505, 507 (Pa. Cmwlth. 1980). Substantial evidence is such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. *Dutchland Tours, Inc. v. Pa. PUC*, 337 A.2d 922 (Pa. Cmwlth. 1975). It is also well-established that the burden of proof does not shift to parties challenging a utility's proposal but remains with the utility throughout the course of the proceeding. See *Berner v. Pa. PUC*, 116 A.2d 738 (Pa. 1955).

Section 1330 of the Code does not alter or change these well-established standards placed on a utility seeking to change its rates through a Section 1308 base rate proceeding.

Furthermore, the Commission's regulation at 52 Pa. Code § 53.53 (relating to information to be furnished with proposed Section 1308(d) general rate increase filings in excess of \$1 million) establishes what a utility is to provide when it files a tariff or tariff supplement seeking a general rate increase within the meaning of 66 Pa.C.S. § 1308(d). The information to be furnished in accordance with 52 Pa. Code § 53.53 is quite comprehen-

sive and far-reaching such that the Commission presumes that it encompasses what is required for any base rate proposal, including any alternative rate or rate mechanism.

The Commission notes that utilities have always had the ability to propose,⁴⁴ and the Commission has had the ability to approve, alternative rates or rate mechanisms, including the rate mechanisms specifically listed in Section 1330. The General Assembly specifically recognized this in subsection 1330(e) of the Code, 66 Pa.C.S. § 1330(e), where it stated the following:

(e) Construction—Nothing in this section shall be construed as limiting the existing ratemaking authority of the commission or be construed to invalidate or void any rate mechanism approved by the commission prior to the effective date of this section.

Section 1330(e) of the Code, 66 Pa.C.S. § 1330(e). The Commission finds, that at the present time, the established law, rules and procedures for filing and seeking approval of a new rate, including alternative rates and rate mechanisms, under a Section 1308 general base rate proceedings are adequate to meet the Section 1330 requirements. Accordingly, the Commission will not propose any additional specific procedures unless or until their need becomes apparent.⁴⁵

Finally, the Commission recognizes that some of the alternative rate mechanisms involve annual reconciliation or adjustments. In particular, the definitions of decoupling mechanism, multiyear rate plan and performance-based rates in subsection 1330(f), 66 Pa.C.S. § 1330(f), specifically allow for periodic adjustments or reconciliation of rates. The Commission finds that the parameters for when and how such adjustments or reconciliations are to transpire, and whether interest is to be applied to any over- and under-collections, are to be established initially in the Section 1308(d) base rate proceeding and subsequently made in accordance with Section 1307 of the Code, 66 Pa.C.S. § 1307, (relating to sliding scale of rates; adjustments).

This was recognized by the General Assembly and codified in Subsection 1330(b)(2), 66 Pa.C.S. § 1330(b)(2), which states that “[a]n alternative rate mechanism established under this section may include rates under section 1307 (relating to sliding scale of rates; adjustments)” Accordingly, the Commission will not propose any additional specific procedures regarding such adjustments at this time.

Regarding the assertions by PPL, PECO and EAP that the reference to “a base rate proceeding” in Section 1330(b)(1) contemplates any Section 1308 base rate proceeding and should not be limited to Section 1308(d)

⁴⁴ The Commission notes that 66 Pa.C.S. §§ 2806.1(k)(2); 2807(f)(4) could have been interpreted as limiting the ability of the large EDCs from employing certain alternative ratemaking mechanisms.

⁴⁵ As previously mentioned, at Docket No. M-2015-241883, the Commission has proposed a policy statement that is intended to provide guidance for fixed utilities and interested stakeholders on what the Commission will consider when investigating alternative ratemaking methodologies proposed in Section 1308, 66 Pa.C.S. § 1308, rate proceedings. In that proceeding the Commission stated the following:

A consistent theme expressed in the comments is that the Commission should not take a one-size-fits-all approach, with some parties suggesting that we establish guidelines. We agree with these parties that the type and extent of alternative ratemaking methodologies employed by each fixed utility should be developed in a transparent manner in accordance with each utility’s unique circumstances. We also agree that establishment of the guidelines each utility and stakeholder should consider in a Section 1308 rate proceeding would be helpful in determining if, the types(s) of and to what extent, alternative ratemaking methodologies should be employed.

See Fixed Utility Distribution Rates Policy Statement, Proposed Policy Statement Order, Docket No. M-2015-2518883, entered May 23, 2018, at 26. The Commission intends to continue the investigation of the appropriateness of this proposed policy statement as such guidance appears, based on the comments submitted under that docket, to remain relevant to utilities and interested stakeholders in future Section 1308 base rate proceedings.

proceedings, as discussed in Section B.1.b. of this Order, the Commission is not persuaded by their arguments. We, however, again note that that Section 1330(e) specifically states that “[n]othing in this section shall be construed as limiting the existing ratemaking authority of the commission or be construed to invalidate or void any rate mechanisms approved by the commission prior to the effective date of this section.” 66 Pa.C.S. § 1330(e). As such, it is not the intent of the Commission to preclude utilities from proposing rates permitted under existing law.

Regarding the requests by OCA, OSBA, IEC and Industrials that the Commission should use its authority under Subsection 1330(d) to create specific procedures concerning filing requirements, consumer protections, and consumer education plans when utilities apply for alternative ratemaking mechanisms, as discussed in Section B.3.b. of this Order, the Commission is not persuaded by their arguments. The Commission finds that Section 1330 has broad application to electric, natural gas, water and wastewater utilities, whereas, the commenters’ proposals were specific to EDCs. The Commission also finds that Section 1330 provides for a variety of alternative ratemaking mechanisms, whereas, the commenters’ proposals addressed specific forms of alternative ratemaking mechanisms. Establishing such additional requirements, parameters or customer protections in this proceeding is inappropriate.

E. Section 1330(f)—Definitions

This section defines decoupling mechanism, multiyear rate plan, performance-based rates and utility. In particular, the term utility as used in Section 1330, is defined in Section 1351 of the Code, 66 Pa.C.S. § 1351. Section 1351 defines utility as “[a] natural gas distribution company, electric distribution company, water or wastewater utility or city natural gas distribution operation.” Accordingly, Section 1330 only applies to these utilities. The Commission received no comments in opposition to this interpretation and will adopt it.

Conclusion

This Implementation Order outlines the key portions of Act 58, 66 Pa.C.S. § 1330, that the Commission is required to administer and provides guidance to the public and utility industry regarding how these provisions are interpreted by the Commission and how they are to be implemented. The Commission thanks the stakeholders for their thorough and insightful comments on this important legislation; *Therefore*,

It Is Ordered That:

1. The Commission hereby adopts the interpretation and implementation of Section 1330 of the Public Utility Code, 66 Pa.C.S. § 1330, as set forth in this Order.

2. A copy of this order be served on all jurisdictional electric distribution companies, all jurisdictional natural gas distribution companies and city natural gas distribution operators, all jurisdictional water and wastewater utilities, the Bureau of Investigation and Enforcement, the Office of Consumer Advocate and the Office of Small Business Advocate and all parties that filed comments in this proceeding.
