DEPARTMENT OF COMMUNITY AND ECONOMIC DEVELOPMENT

Manufactured Housing Installation Program; Installer Training and Certification

Under 12 Pa. Code § 149.4(a)(4) (relating to installer training and certification), the Department of Community and Economic Development (Department) has modified the installation program regarding the training and certification of manufactured home installers.

Beginning October 1, 2019, the Department will no longer be providing training and certification of manufac-

tured home installers and will begin to transition to the United States Department of Housing and Urban Development (HUD) Manufactured Home Installer License (as provided under 24 CFR Part 3286 (relating to Manufactured Home Installation Program)) as a requirement for persons wishing to install manufactured housing in this Commonwealth.

Currently issued Pennsylvania Manufactured Home Installers Certifications will remain in effect until the expiration date indicated on the certificate.

To be eligible to apply for the HUD installers license, installers must complete a HUD approved 12-hour training course. Visit the SEBA Professional Services web site for the approved curricula and other informa-

tion regarding the HUD installers license at <https://manufacturedhousinginstallation.com/>.

In addition to the available courses online, traditional classroom style courses are being scheduled in the following counties in this Commonwealth: Clarion, Cumberland or Dauphin, Lehigh and Lycoming. Once these courses have been scheduled, the Department will publish these courses on their web site at <https://dced.pa.gov/housing-and-development/manufactured-housing/>.

The Pennsylvania Certificate of Compliance (DCED-HS-003 Form) will continue to be required for the installation of all manufactured homes until October 1, 2020. Effective October 1, 2020, the Pennsylvania Certificate of Compliance will be limited to signify the proper installation of relocated manufactured homes. Likewise, effective October 1, 2020, manufactured home installers will be required to complete the HUD Form 309 for the installation of new manufactured homes.

Manufactured home retailers selling new homes for installation in this Commonwealth must comply with the HUD manufactured home reporting requirements on October 1, 2020.

Retailers and installers should refer to the HUD Installation Program Regulations, 24 CFR Part 3286, at <https://www.ecfr.gov/cgi-bin/text-idx?SID=a2c5655a37054c584f7dd6a0ed240fb8&node=pt24.5.3286&rgn=div5>.

Effective October 1, 2019, code officials in this Commonwealth who inspect manufactured home installations may accept Pennsylvania Certificates of Compliance submitted by persons holding either a current HUD issued installers license or a Pennsylvania installers certification. The Department will continue to provide training to local code officials. New manufactured homes will continue to be installed in accordance with the approved manufacturer's installation designs and the Department guidelines remain in effect for relocated manufactured homes.

Program inquiries should be directed to Michael Moglia, Housing Standards Division, Office of Community Enhancement, Department of Community and Economic Development, Commonwealth Keystone Building, 4th Floor, 400 North Street, Harrisburg, PA 17120, (717) 720-7416, mmoglia@pa.gov.

**LAND RECYCLING AND
ENVIRONMENTAL REMEDIATION**

**UNDER ACT 2, 1995
PREAMBLE 1**

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation

to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

This notice of final action is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or Amendment
Section III	WQM	Industrial, Sewage or Animal Wastes; Discharges to Groundwater
Section IV	NPDES	MS4 Individual Permit
Section V	NPDES	MS4 Permit Waiver
Section VI	NPDES	Individual Permit Stormwater Construction
Section VII	NPDES	NOI for Coverage under NPDES General Permits

Sections I—VI contain actions regarding industrial, animal or sewage wastes discharges, discharges to groundwater, and discharges associated with MS4, stormwater associated with construction activities and CAFOs. Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. The permits and related documents, effluent limitations, permitting requirements and other information are on file and may be inspected and arrangements made for copying at the contact office noted before the action.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law). Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Plan Description: The planning module for new land development for the Randall B. Inskip Subdivision, DEP Code No. A3-01928-291-2, consisting of the subdivision of a 25-acre tract into 2 building lots using individual on lot sewage disposal system, is denied. The project is located on the north side of East Berlin Road, east of the Lake Meade Road in Reading Township, Adams County. A small portion of the property lies in Tyrone Township. The plan is denied because the applicant failed to submit information necessary to address the technical deficiencies identified in DEP's June 19, 2019 letter. Those deficiencies are: The preliminary hydrogeologic study uses an off-site nitrate-nitrogen sample result exceeding the drinking water maximum contaminant level (MCL) of 10 mg/L to characterize the background groundwater levels under the project site. The Department cannot issue sewage planning approval where groundwater pollution already exists. To better characterize on-site conditions, the Department recommends sampling the site by drilling a test well in accordance with the Instruction for Completing Component 2, page 11, Section L.2.b. Additionally, the studge uses off-site and upgradient groundwater in its dilution calculations, when in fact each proposed lot must be able to support dilution calculations, when in fact, each proposed lot must be able to support dilution within its own boundaries.

HAZARDOUS SITES CLEAN-UP UNDER THE ACT OF OCTOBER 18, 1988

Notice of Proposed Settlement Under HSCA/CERCLA

Alderfer Landfill HSCA Site Franconia Township, Montgomery County

The Department of Environmental Protection ("Department"), under the authority of the Hazardous Sites Cleanup Act ("HSCA"), 35 P.S. §§ 6020.101 et seq., and the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C.A. §§ 9601 et seq., has entered into a proposed Consent Order and Agreement with the **Estate of James Fosbenner** related to the Alderfer Landfill HSCA Site ("Site") in Franconia Township, **Montgomery County**, Pennsylvania.

The Alderfer Landfill Site consists of a 5.54-acre property identified in Montgomery County property tax records as Tax Parcel No. 34-00-04957-00-4. The Site was

initially used for a quarrying operation. After quarrying ceased, the resulting sixty-foot deep quarry was used as a disposal area for municipal, residual, hazardous, and demolition wastes, as well as sewage sludge from septic tank pumping. Radioactive slag was also deposited on three areas of the Site. A 1988 investigation by the United States Environmental Protection Agency ("USEPA") found elevated levels of polychlorinated biphenyls ("PCBs"), pesticides, and heavy metals that all met the definition of hazardous substances and contaminants as defined by Section 103 of HSCA, 35 P.S. § 6020.103. The radioactive slag material contained thorium at concentrations of 0.1 to 1.0%.

In 1989, USEPA performed a Removal Action under the authority of Section 104 of CERCLA, 42 U.S.C.A. § 9604 and 40 CFR 300.415, which consisted of capping the areas where hazardous substances and contaminants were found with 3 feet of fill material, top soil, and vegetative cover. In 1993 and 1994, the Department performed an interim response action under the authority of Section 501(a) of HSCA, 35 P.S. § 6020.501(a), which consisted of (1) the installation of a gabion wall between the Site and the adjacent unnamed tributary of Skippack Creek, (2) the excavation of approximately 322 cubic yards of radioactive slag, which were placed into two vaults constructed on the Site, and (3) the installation of a two-foot thick soil cap over the surface of the Site. The gabion wall was designed to be a barrier between the local stream and on-site soils and to prevent the stream from eroding the Site and exacerbating the contamination. The cap is designed to prohibit direct exposure by persons to hazardous substances and contaminants remaining at the Site. In 1995, the Department installed monitoring wells on the Site and found elevated levels of Trichloroethene ("TCE"), cis-1,2-Dichloroethene ("DCE"), and Chloroethene, which are all hazardous substances and contaminants as defined by Section 103 of HSCA, 35 P.S. § 6020.103, in groundwater at the Site in excess of the Medium Specific Concentrations ("MSCs").

The Department is proposing to enter into a Consent Order and Agreement ("CO&A") with the current property owner, the Estate of James Fosbenner ("Owner"), under the authority of Sections 512 and 1102 of HSCA, 35 P.S. §§ 6020.512 and 6020.1102. The CO&A requires the Owner to enter into an Environmental Covenant and a Mortgage Lien. The Environmental Covenant contains provisions for the Owner to maintain the property as well as prevent disturbances to the Department's interim response. The Mortgage Lien represents the most recent tally of the response costs incurred by the Department, \$116,294.70 (One Hundred and Sixteen Thousand, Two Hundred and Ninety-Four Dollars and Seventy Cents). The mortgage shall remain in place until the Department has been reimbursed in full for its response costs.

This notice is provided pursuant to Section 1113 of HSCA, 35 P.S. § 6020.1113. The proposed Consent Order and Agreement may be examined from 8 AM to 4 PM at the Department's offices at 2 East Main Street, Norristown, PA by contacting either Tim Cherry at (484) 250-5728 or Hannah Leone, Esquire at (484) 250-5858. Mr. Cherry and Ms. Leone may also be contacted electronically at tcherry@pa.gov and haleone@pa.gov, respectively. A public comment period on the proposed Consent Order and Agreement will extend for a period of 60 days from the date of this notice. Interested persons may submit written comments regarding these agreements to the Department by submitting them to Tim Cherry in the Environmental Cleanup and Brownfields Program at the above address.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

The Department has received the following plans and reports:

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area

remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Line 1711 Cathodic Protection 2019 Project (Project), North Huntington, Hempfield, Penn, Salem, Loyalhanna Townships, **Westmoreland County**, in the Army Corps of Engineers (ACOE) Pittsburgh District. The proposed project starts to the east of the Pennsylvania Turnpike 76 between Arona Road in Irwin, PA Quadrangle at N: 40° 18' 12.54"; W: 79° 45' 10.30" and ends west of Moween Road before the Conemaugh River in Saltsburg, PA Quadrangle at N: 40° 28' 38.54"; W: 79° 25' 40.08".

The Applicant will report the project to Federal Energy Regulatory Commission (FERC) in its annual blanket activities report, as authorized under blanket construction certificate (FERC Docket No. CP83-76-000) dated November 9, 1982.

On May 26, 2019, Applicant requested a State water quality certification from the Pennsylvania Department of Environmental Protection (PADEP), as required by Section 401 of the Clean Water Act (33 U.S.C.A. § 1341), to

ensure that the construction, operation and maintenance of the Project will protect water quality in Pennsylvania through compliance with State water quality standards and associated State law requirements, which are consistent with the requirements of the Clean Water Act.

In addition, the Applicant submitted a General Permit Registration Package, seeking acknowledgement from DEP, of the Applicant's use of General Permits No. 5 and 8 [GP056500219-039 and GP086500219-010], to construct and maintain several utility line stream crossings, temporary road crossings, and to replace a utility line, respectively, in accordance with the Department's Chapter 105 rules and regulations.

On May 21, 2019 the Department received an application for an ESCGP-3 [File no. ESG-00-129-19-003] after it was deemed complete by the Westmoreland County Conservation District.

The Project, as proposed, involves adding a cathodic protection system which includes the installation of 120 individual anodes, recoating a total of 914 feet of the existing pipeline in five sections, and the installation of 2,246 feet of linear anode via horizontal direction drilling (HDD) along a total of approximately 21 miles of the existing 16-inch natural gas Line 1711 pipeline. The Project, as proposed, will require approximately 21.2 acres of earth disturbance, and temporary impacts of 44 linear feet to UNTs to Getty Run (WWF), 0.58 acre of floodway impacts, 0.13 acre of temporary palustrine emergent (PEM) wetland impacts, and no permanent wetland or stream impacts.

PADEP is proposing to issue a State water quality certification to Applicant for the Project that will require compliance with the following State water quality permitting programs, criteria and conditions established pursuant to State law to ensure the Project does not violate applicable State water quality standards set forth in 25 Pa. Code Chapter 93:

1. *Discharge Permit*—Applicant shall obtain and comply with a PADEP National Pollutant Discharge Elimination System (NPDES) permit for the discharge of water from the hydrostatic testing of the pipeline pursuant to Pennsylvania's Clean Streams Law (35 P.S. §§ 691.1—691.1001), and all applicable implementing regulations (25 Pa. Code Chapter 92a).

2. *Erosion and Sediment Control Permit*—Applicant shall obtain and comply with PADEP's Chapter 102 Erosion and Sediment Control General Permit for Earth Disturbance Associated with Oil and Gas Exploration, Production, Processing or Treatment issued pursuant to Pennsylvania's Clean Streams Law and Storm Water Management Act (32 P.S. §§ 680.1—680.17), and all applicable implementing regulations (25 Pa. Code Chapter 102).

3. *Water Obstruction and Encroachment Permits*—Applicant shall obtain and comply with a PADEP Chapter 105 Water Obstruction and Encroachment Permits for the construction, operation and maintenance of all water obstructions and encroachments associated with the project pursuant to Pennsylvania's Clean Streams Law, Dam Safety and Encroachments Act (32 P.S. §§ 673.1—693.27), and Flood Plain Management Act (32 P.S. §§ 679.101—679.601.), and all applicable implementing regulations (25 Pa. Code Chapter 105).

4. *Water Quality Monitoring*—PADEP retains the right to specify additional studies or monitoring to ensure that the receiving water quality is not adversely impacted by any operational and construction process that may be employed by Applicant.

5. *Operation*—Applicant shall at all times properly operate and maintain all Project facilities and systems of treatment and control (and related appurtenances) which are installed to achieve compliance with the terms and conditions of this State Water Quality Certification and all required permits, authorizations and approvals. Proper operation and maintenance includes adequate laboratory controls, appropriate quality assurance procedures, and the operation of backup or auxiliary facilities or similar systems installed by Applicant.

6. *Inspection*—The Project, including all relevant records, are subject to inspection at reasonable hours and intervals by an authorized representative of PADEP to determine compliance with this State Water Quality Certification, including all required State water quality permits and State water quality standards. A copy of this certification shall be available for inspection by the PADEP during such inspections of the Project.

7. *Transfer of Projects*—If Applicant intends to transfer any legal or equitable interest in the Project which is affected by this State Water Quality Certification, Applicant shall serve a copy of this certification upon the prospective transferee of the legal and equitable interest at least thirty (30) days prior to the contemplated transfer and shall simultaneously inform the PADEP Regional Office of such intent. Notice to PADEP shall include a transfer agreement signed by the existing and new owner containing a specific date for transfer of certification responsibility, coverage, and liability between them.

8. *Correspondence*—All correspondence with and submittals to PADEP concerning this State Water Quality Certification shall be addressed to the Department of Environmental Protection, Dana Drake, P.E., Program Manager, Waterways and Wetlands Program, 400 Waterfront Drive, Pittsburgh, PA 15222.

PADEP may require additional measures to achieve compliance with applicable law, subject to Applicant's applicable procedural and substantive rights.

10. *Other Laws*—Nothing in this State Water Quality Certification shall be construed to preclude the institution of any legal action or relieve Applicant from any responsibilities, liabilities, or penalties established pursuant to any applicable Federal or State law or regulation.

11. *Severability*—The provisions of this State Water Quality Certification are severable and should any provision of this certification be declared invalid or unenforceable, the remainder of the certification shall not be affected thereby.

Prior to issuance of the final State water quality certification, PADEP will consider all relevant and timely comments, suggestions or objections submitted to PADEP within 30 days of this notice. Comments should be directed to Dana Drake, P.E., Waterways and Wetlands Program Manager at the above address or through the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD). Comments must be submitted in writing and contain the name, address and telephone number of the person commenting and a concise statement of comments, objections or suggestions on this proposal. DEPARTMENT OF ENVIRONMENTAL PROTECTION

Nutrient Credit Trading Program; Actions; Administrative Extension

The Department of Environmental Protection (Department) has approved a 1-year administrative extension from October 1, 2019, to September 30, 2020, of the following previously approved certifications of pollutant reduction activities to generate nitrogen (N) and phosphorus (P) credits under 25 Pa. Code § 96.8 (relating to use of offsets and tradable credits from pollution reduction activities in the Chesapeake Bay Watershed) that were set to expire on September 30, 2019. Proposed pollutant reduction activities include manure gasification or conversion technology, poultry litter export, and the following agricultural best management practices (BMP): continuous no-till (CNT) planting methods, planting cover crops and grass buffers. These certification administrative extension approvals authorize the generation of N or P credits, or both, for use by facilities with National Pollutant Discharge Elimination System permits in the compliance year in which the credits are generated. This approval is valid until September 30, 2020, provided the pollution reduction activities are implemented, maintained and verified in accordance with the plans contained in the original approved certification requests.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Nutrient Credit Trading Program; Mass Certification

The Department of Environmental Protection (Department) provides notice of its intention under the Nutrient Credit Trading Program to approve a mass certification of pollutant reduction activities to generate credits by significant sewage point source discharges located in the Commonwealth portion of the Chesapeake Bay Watershed that have annual mass load effluent limitations (cap loads) in their National Pollutant Discharge Elimination System (NPDES) permits.

For a list of significant sewage point sources located in the Commonwealth portion of the Chesapeake Bay Watershed, see Table 7-1 of the Commonwealth's Phase 2 Chesapeake Bay Watershed Implementation Plan (WIP) Wastewater Supplement, available at www.dep.pa.gov/npdes-bay or on the Department's Nutrient Trading web site at www.dep.pa.gov/nutrient_trading (in the Delivery Ratio section of this webpage, Table 7-1 is linked as the Point Source Credit Generators Table). Also see 25 Pa. Code § 96.8 (relating to use of offsets and tradable credits from pollution reduction activities in the Chesapeake Bay Watershed).

Credit Certification

Effective October 1, 2019, to be eligible to generate credits for sale, all significant sewage point source discharges with an assigned cap load (see Table 7-1 of the Phase 2 WIP Wastewater Supplement) must demonstrate treated yearly effluent concentrations (baseline concentrations) below 6.0 mg/L total nitrogen (TN) and below 0.8 mg/L total phosphorous (TP) in accordance with the procedures described in the Phase 2 WIP Nutrient Trading Supplement, available in the Trading Program Overview section on the Department's Nutrient Trading web site at www.dep.pa.gov/nutrient_trading. When stringent effluent limitations for TN or TP or both are established in Part A of a significant sewage point source discharges NPDES permit for reasons other than the cap load assigned for protection of the Chesapeake Bay, the permittee is eligible to generate credits when the permittee demonstrates that these effluent limitations have been achieved in accord with the Phase 2 WIP Nutrient Trading Supplement. In addition:

- to generate credits, facilities must demonstrate they are in compliance with their NPDES permit;
- the total amount of credits a facility is certified to generate cannot exceed the facility's permitted cap load;
- the calculation of credits will be made using formulas described in the Phase 2 WIP Nutrient Trading Supplement; and
- this point source certification will expire on September 30, 2020.

To ensure that verification is complete in time for credit availability to be posted on the Department's web site, facilities are encouraged to provide the Department with their verification requests by October 28 each year. Verification requests must include a complete Annual Chesapeake Bay Spreadsheet for the compliance year in which the credits were generated (that is, October 1 through September 30). The Annual Chesapeake Bay Spreadsheet is available on the Department's Nutrient

Trading web site at www.dep.pa.gov/nutrient_trading. Verification forms and instructions are found on the Credit Trading Process page of the Department's Nutrient Trading web site.

Written Comments

The Department will accept written comments on these proposed pollutant reduction activities for 30 days.
