DEPARTMENT OF AGRICULTURE

Interstate/International Quarantine Order; Rabbit Hemorrhagic Disease

Recitals

A. Rabbit Hemorrhagic Disease (RHD) is a fatal disease of domestic and wild rabbits of the family Leporidae, which includes hares, jackrabbits and cottontails. RHD is caused by a calicivirus and there are several strains of RHD virus which cause disease.

B. Isolated cases of RHD have appeared intermittently in the United States since 2000. In 2020, outbreaks of RHD have been reported in domestic rabbits, cottontail rabbits, and hares in the United States. Rabbit Hemorrhagic Disease Virus Serotype 2 (RHDV-2) has been reported from several states.

C. RHDV-2 is highly contagious and affects both domestic and wild rabbits. An isolated case of RHDV-1 was identified in two domestic rabbits in a northwestern county in Pennsylvania in November 2018. RHDV-1 is not known to affect wild rabbits but is also highly contagious.

D. There is no licensed vaccine to protect rabbits against RHD in the United States, nor is there a known cure or treatment for this disease.

E. The virus causing RHD can be transmitted by direct contact with infected rabbits or indirectly through carcasses, food, water, and any contaminated materials, and it is very resistant to extreme temperatures. RHD has not been shown to affect people or other mammals.

F. Infected rabbits often show few clinical signs and die within six to 24 hours after the onset of fever and may have blood visible around the nose due to internal hemorrhaging. Morbidity rate is often 100%, and the mortality rate is often 60%—90%.

G. Under the Domestic Animal Law at, 3 Pa.C.S. § 2321(d) (relating to dangerous transmissible diseases), the Department has authority to declare a disease that has not been specifically identified in that statute as a "dangerous transmissible disease" to be a dangerous

transmissible disease through issuance of a Temporary Order making that designation.

H. The Department issued a Temporary Order, through publication in the *Pennsylvania Bulletin* [50 Pa.B., No. 25, 3013], on June 20, 2020, designating RHD as a dangerous transmissible disease.

I. RHD is also currently considered a foreign animal disease in the United States.

J. The Pennsylvania Department of Agriculture (Department) has broad authority under the Domestic Animal Law (3 Pa.C.S. §§ 2301—2389) to regulate the keeping and handling of domestic animals to exclude, contain or eliminate dangerous transmissible diseases such as RHD.

K. The Department also has broad authority under the Domestic Animal Law to establish and enforce an Interstate and International quarantine against any place or places outside the Commonwealth of Pennsylvania (Commonwealth) to exclude, contain or eliminate dangerous transmissible diseases such as RHD. (3 Pa.C.S.A. § 2329(c)).

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

**UNDER ACT 2, 1995
 PREAMBLE 1**

Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is

made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation

to participate should contact the Regional Office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

07-03058B: NPC, Inc. (P13710 Dunning's Highway, Claysburg, PA 16625-7802), for three digital presses at the Claysburg printing facility in Greenfield Township, **Blair County**. Potential VOC emissions from these units is estimated at 5.8 tpy. The plan approval will include emission limits and work practice standards along with monitoring, recordkeeping, and reporting requirements to ensure the facility complies with the applicable air quality regulations. Review by the Department indicates that the air contamination sources as constructed will comply with all regulatory requirements including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into a State Only Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

Code §§ 127.1 and 127.12. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval may be incorporated into an initial Operating Permit pursuant to the provisions of 25 Pa. Code Chapter 127.

The emissions from the proposed source included in this project will not exceed the following limits: 7.99 tons of nitrogen oxides (NO_x, expressed as NO₂) per year, 16.28 tons of carbon monoxide per year, 1.19 ton of volatile organic compounds per year, 1.64 ton of particulate matter less than 10 microns and less than 2.5 microns, 0.41 ton of hazardous air pollutants, 0.13 ton of sulfur oxides, and 25,707 tpy of carbon dioxide equivalent. The facility is a State Only (Synthetic Minor) facility. If the Department determines that the source is modified and operated in compliance with the plan approval conditions and the specifications of the application for Plan Approval 19-00001C, the requirements established in the plan approval will be incorporated into a State Only (Synthetic Minor) Operating Permit pursuant to 25 Pa. Code § 127.421. All pertinent documents used in the evaluation of the application are available for public review during normal business hours at the Department's Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701. 37-331E: RWE Holding Company (P.O. Box 311, Portersville, PA 16051). The Department intends to issue a plan approval to RWE Holding Company for authorization to construct and initially operate a replacement control device for Source 107 (Graphite Drying Operations). Their existing Rundle Road Facility is located in Taylor Township, **Lawrence County** at 535 Rundle Road, New Castle, PA 16101.

As part of this project, RWE also requests that the source is renamed "Carbon Drying Process" to better reflect the material to be dried in process. The allowable operation duration will be increased to 3,000 hours in any 12 consecutive month period. The allowable amount of material throughput will be increased to 20,000 tons in any 12 consecutive month period. Additional emission collection points to be added for the new bag house.

This application concerns emissions which will be generated from a source considered new as defined by 25 Pa. Code § 121.1 (installed post 1972). Emissions from the source must be the minimum attainable through the use of the best available technology as required by § 127.12(5). The original BAT analysis for this source concluded that bag house control technology is considered BAT. The replacement baghouse will continue to meet BAT. The sources' emission rates of PM will be limited to the minimum achievable through BAT.

The replacement control device will have a greater volumetric capacity of 36,000 acfm vs the existing control devices' 30,000 acfm. PM emissions will be restricted to a maximum rate 0.005 gr/dscf. This is less than the existing limitation. Actual PM emissions are expected to be reduced as a result of this project. Potential PM emission are estimated to be 1.96 tpy.

Public notice is required for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

The Plan Approval will contain testing, recordkeeping, emission restriction, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

In accordance with 25 Pa. Code § 127.44(e)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP Office (Air Quality). Appointments for scheduling a review must be made by calling the DEP at (814) 332-6340.

In accordance with 25 Pa. Code § 127.44(e)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments. Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval 37-331E: RWE Holding Company and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. Written comments or requests for a public hearing should be directed to the New Source Review Section Chief, 230 Chestnut St., Meadville, PA 16335; phone number (814) 332-6328.

In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department's Northwest Region.

Notices of requests for 401 Water Quality Certifications are included in individual application notices, as noted.

Written comments or objections, or requests for an informal conference, or a public hearing, as applicable, on a mining permit application may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the address of the District Mining Office indicated above each application within 30-days of this publication, or within 30-days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34 (relating to public notices of filing of permit applications, opportunity for comment, and informal conferences).

Written comments or objections related to a mining permit application should contain the name, address and telephone number of persons submitting comments or objections; application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code § 77.123 (relating to public hearing-informal conferences) or § 86.34 (relating to informal conferences), must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

Where a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. A separate notice will be provided after the draft NPDES permit is prepared.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30-days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

E1904220-021. Town of Bloomsburg, 301 E Second St., Bloomsburg, PA 17815. Town of Bloomsburg Town Park Restoration Improvements, in Town of Bloomsburg, **Columbia County**, ACOE Baltimore District (Bloomsburg, PA Quadrangle; Latitude: 40° 59' 24.71"; Latitude -76° 27' 4.78").

The Town of Bloomsburg is proposing the full design and construction of town park improvements including two relocated baseball fields, parking, and pedestrian facilities. The Town of Bloomsburg's Flood Mitigation Expansion project (designed and permitted by others)

consists of a levee to be constructed through two of the existing baseball fields. Due to construction of the Town's Flood Mitigation Expansion Project these two fields have been abandoned. The Town is proposing to construct new athletic fields south of the proposed levee system. This project also proposes to construct a pervious pavement parking lot with access from West Fort McClure Boulevard and Colonial Street. Colonial Street is proposed to be reconstructed south of the levee to provide ADA compliant pedestrian access in lieu of vehicular access. The pavement width will be reduced to twelve feet with a paved area to allow a single food/concession trailer parking. Also proposed are pedestrian walkways to connect Market Street to Railroad Street and the proposed fields. Following are activities that are associated with the civil construction of the proposed site improvements for the Town Park Restoration Project.

Named streams in the project study area include the floodplain of the Susquehanna River. The Susquehanna River has a Designated Use of Warm Water Fishes, Migratory Fishes (CWF MF) and no Existing Use designation per 25 Pa. Code Chapter 93.

No wetlands are present within the project area. The project would result in a total disturbance area of approximately 8.68 acs. The project only impacts the floodplain of the Susquehanna River. This permit is submitted under the Chapter 106 Floodplain Management Regulations.

E1904220-022. Benton Township, 236 Shickshinny Road, Benton, PA 17814. Karns Road Flood Repairs, in Benton Township, **Columbia County**, ACOE Baltimore District (Stillwater, PA Quadrangle; Latitude: 41° 10' 26.92"; Latitude -76° 20' 42.87").

The proposed project includes stabilization of eroded stream bank of a UNT to Raven Creek located in Benton Township, Columbia County, PA. The location was severely damaged during a flooding event that occurred in August of 2018 and was declared a disaster by the Federal Emergency Management Agency, FEMA. Staff from the Pennsylvania Department of Environmental Protection and the U.S. Army Corps of Engineers evaluated the site and determined that the PADEP/USACE Joint Permit Small Project Application was required for this project because of the varying height of the placement exceeds the maximum height for a General Permit number 3. There are four reaches of stream bank with varying lengths that need to be repaired and the total length of stream bank to be stabilized is 484 Ln. Ft. that is spread out along 1,665 Ln. Ft. of the waterway. The sections of stream will be stabilized with R-7 riprap armoring and the height of the armoring varies throughout the rehabilitation locations ranging from 6' to 15'.

Site 4: 38 Ln. Ft. of R-7 riprap, 14' height with 42" placement depth.

Site 8: 35 Ln. Ft. of R-7 riprap, 8' height with 42" placement depth.

Site 11: 100 Ln. Ft. of R-7 riprap, 6' height with 42" placement depth.

Site 15: 311 Ln. Ft. R-7 riprap, 15' height with 42" placement depth.

E5504220-022. Middleburg Borough, 13 North Main Street, Middleburg, PA 17842. Stumps Run Channel Maintenance, in Middleburg Borough, **Snyder County**, ACOE Baltimore District (Middleburg, PA Quadrangle; Latitude: 40° 47' 32.48"; Latitude -77° 2' 39.69").

The permit proposes a stream maintenance/rehabilitation project on Stumps Run within the borough limits. The stream banks are currently defined by retaining walls that are failing due to overturning and are near the point of falling into the stream. This project will remove the existing cast in place walls and replace them with new walls. Other improvements include permanent removal of an existing box culvert and roadway over Stumps Run, as well as removal of sediment throughout the stream for the length of the project. The project will encompass approximately 400 Linear Feet of stream and approximately 0.50 ac. of total earth disturbance. There are no wetlands within the project area.

E5504220-023. Eastern Snyder Regional Authority, P.O. Box 330, Selinsgrove, PA 17870. Eastern Snyder Regional Authority Wastewater Treatment Plant, in Penn Township, **Snyder County**, ACOE Baltimore District (Sunbury, PA Quadrangle; Latitude: 40° 46' 57.22"; Latitude -76° 57' 43.98").

The Eastern Snyder County Regional Authority (ESCRA) has proposed to improve the reliability of its wastewater treatment system through the replacement of equipment that has exceeded its useful life due to age and normal wear. A secondary purpose of the project is to harden the treatment system against floods. Each of these system facilities are located within a designated 100-year floodplain. Updated modeling of the Susquehanna River Basin was completed by the Federal Emergency Management Agency (FEMA) that resulted in higher 100-year flood elevations. Areas that were outside of the floodplain when the WWTP was originally constructed in the late 1970s will now be inundated with flood waters. Resiliency improvements are also planned for both pump stations to address flooding concerns. For the new improvements, ESCRA is applying for permit authorization from the Pennsylvania Department of the Environment (PADEP) through a Chapter 106 Floodplain Permit.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department

to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION UNDER ACT 2, 1995

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-

specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

 (35 P.S. §§ 6021.101—6021.2104).**

Provisions of 25 Pa. Code Chapter 245, Subchapter D, Administration of the Storage Tank and Spill Prevention Program, require the Department of Environmental Protection (DEP) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. The remedial action plan also provides results of studies performed and data collected to support the remedial action and a description of postremediation care requirements. A remedial action completion report is submitted to document cleanup of a release of a regulated substance at a site to the selected remediation standard. A remedial action completion report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or non-residential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected.

For further information concerning plans or reports, please contact the Environmental Cleanup Program Manager in the DEP Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. The Department of Human Services (Department) is providing final notice of its funding allocation for Fiscal Year (FY) 2019-2020 disproportionate share hospital payments to qualifying acute care general hospitals that provide enhanced access to multiple types of medical care in economically distressed areas. The Department is not changing the qualifying criteria or payment methodology for these payments.

The Department published notice of its intent to allocate funding for these payments at 50 Pa.B. 2141 (April 18, 2020). The Department received no comments during the 30-day comment period and will implement the change as described in the notice of intent.

Fiscal Impact

The FY 2019-2020 impact, as a result of the funding allocation for these payments, is \$149.135 million (\$61.965 million in State general funds and \$87.170 million in Federal funds).

Disproportionate Share and Supplemental Hospital Payments

The Department of Human Services (Department) is announcing its intent to allocate funds for Fiscal Year (FY) 2020-2021 inpatient disproportionate share hospital (DSH) payments to qualifying inpatient acute care general, psychiatric and rehabilitation hospitals and qualifying psychiatric and rehabilitation units of acute care general hospitals, outpatient supplemental payments to qualifying inpatient acute care general hospitals, direct medical education payments to qualifying inpatient acute care general hospitals and certain DSH and supplemental payments to new hospitals.

The Department is not otherwise changing the State Plan provisions addressing the qualifying criteria or payment methodology for these payments. All payment limitations are applicable, including those limitations that the Commonwealth may not exceed its aggregate annual DSH allotment, and that no hospital may receive DSH payments in excess of its hospital-specific limit.

Fiscal Impact

The amount of funding available for this program is dependent upon the funds appropriated by the General

Assembly for the entire FY 2020-2021 and is expected to be \$258.729 million (\$110.730 million in State funds and \$147.999 million in Federal funds). Therefore, the fiscal impact stated in this notice is reflective of funding for the full 12 months.

C. Additional Class of Disproportionate Share Payments

Effective March 1, 1998, the Department established a new class of disproportionate share payments to hospitals which render uncompensated care and which the Department has determined are experiencing significant revenue loss as a result of MA Program revisions under the act of May 16, 1996 (P.L. 175, No. 35).

Effective January 15, 1999, the Department established a new class of disproportionate share payments to include a Charity Care component of the Community Access Fund. A disproportionate share payment will be made to qualifying hospitals based on each hospital's percentage of charity care cost to the total charity care costs of all qualifying hospitals. The Department also established a disproportionate share payment for those hospitals which the Department has determined advanced its goal of enhanced access to multiple types of medical care in economically distressed areas of this Commonwealth.

The following hospitals qualify for this payment:

ABINGTON MEMORIAL HOSPITAL
 ALBERT EINSTEIN MEDICAL CENTER
 ALFRED I. DUPONT HOSPITAL FOR CHILDREN
 ARIA HEALTH HOSPITAL
 BARNES KASSON HOSPITAL
 CHILDREN'S HOSPITAL OF PHILADELPHIA
 CLARION HOSPITAL
 CROZER CHESTER MEDICAL CENTER
 DOYLESTOWN HOSPITAL

Statewide Quality Care Assessment Program for Fiscal Year 2020-2021

The Department of Human Services (Department) is providing final notice of its adjustment to the assessment percentage rate under the Statewide Quality Care Assessment Program (Program) for Fiscal Year (FY) 2020-2021. The Department is not making any other changes to the Program.

The Department published notice of its intent to adjust the assessment percentage rate under the Program at 50 Pa.B. 3182 (June 27, 2020). During the 30-day comment period, the Department received a comment regarding the impact of the proposed rate reduction. While the assessment rate adjustment will reduce the collection of assessment revenue, the Department is making this adjustment because it anticipates a balance in the restricted account for FY 2020-2021, which would be subject to 62 P.S. § 805-G(b)(7). The Department will implement the change as described in the notice of intent.

FYs 2021—2023 Assessment Rate and Estimated Impact on Hospitals

For FY 2021-2022 and FY 2022-2023, the assessment percentage rate under the Program will return to 3.32% of the net inpatient revenue and 1.73% of the net outpatient revenue of the covered hospitals as established under the Human Services Code. The Department estimates the annual aggregate assessment fees for the nonexempt hospitals for FY 2021-2022 and FY 2022-2023 to total \$1,005.766 million.

TERESA D. MILLER,
Secretary
