General Quarantine Order; Swine Exhibition Requirements

Recitals

A. African Swine Fever is a highly contagious hemorrhagic viral disease affecting domestic and wild swine.

B. There is no vaccine to protect swine against African Swine Fever, nor is there a known cure or treatment for this dangerous transmissible disease.

C. African Swine Fever has a high environmental resistance and can be spread by domestic or wild swine, whether alive or dead, and through raw and processed pork products. African Swine Fever does not cause disease in humans and is not a public health threat.

D. African Swine Fever is known to be transmissible from infected to uninfected swine through contact and via contaminated feed and fomites (non-living objects) such as shoes, clothes, vehicles, equipment and any other goods, products, facilities, specific insect vectors (soft ticks), containers and other objects with which infected swine—alive or dead—may come into contact.

E. Section 2321 of the Domestic Animal Law (Law) establishes a list of “dangerous transmissible diseases” and provides for the designation of additional dangerous transmissible diseases through regulation or temporary order (3 Pa.C.S.A. § 2321).

F. African Swine Fever (ASF) is specifically designated as a dangerous transmissible disease at section 2321(a)(3) of the Law (3 Pa.C.S.A. § 2321(a)(3)).

G. The Domestic Animal Law (Law) (3 Pa.C.S.A. §§ 2301–2389) and section 1702 of the Administrative Code of 1929 (71 P.S. § 442), provides the Pennsylvania Department of Agriculture (PDA) broad authority to regulate the keeping and handling of domestic animals to exclude, contain or eliminate dangerous transmissible diseases, such as ASF.

H. This includes authority, set forth at section 2329 of the Law, to establish and enforce quarantine orders “Whenever a dangerous transmissible disease . . . exists anywhere within or outside of this Commonwealth. . . the department shall have the power to establish and enforce quarantines of any such infected, exposed, contaminated, suspected or susceptible domestic animal. In addition. . . a quarantine may apply to any goods, products, facilities, containers, vehicles or materials that may carry dangerous transmissible disease. . . and may be applied on or in or against any premises, area or locality. . .” (3 Pa.C.S.A. § 2329(a)).

I. Section 2329(d) of the Law provides specific authority to establish and enforce a general quarantine order against “. . . any area or locality within this Commonwealth for any of the reasons set forth in subsection (a) to prevent a dangerous transmissible disease. . . from being carried into, within, from or out of the area or locality that is subject to the quarantine. A general quarantine order may include any domestic animals, conveyances, containers, goods, products or materials that may carry dangerous transmissible disease. . . and may include any area or locality, including all buildings, structures, premises and equipment located therein.” (3 Pa.C.S.A. § 2329(d))

J. ASF is found in countries around the world, particularly in sub-Saharan Africa. To date, 11 Asian countries have reported outbreaks since August 2018, including Indonesia, Mongolia, North Korea, South Korea, China, the Philippines, Vietnam, Laos, Cambodia, Myanmar and Timor-Leste. China has confirmed more than 163 cases of ASF and has lost an estimated 200 million swine which amounts to thirty-three percent of all the pigs in the world. The disease is also spreading within the European Union (EU), and the virus has reached 10 member states of the EU.

K. Although ASF has not been detected in North America, Central America or South America, it is important to note ASF is rapidly spreading and has reached South Korea and the Philippines. Currently, there are only 6,000 miles separating the continental United States from this devastating disease.

L. Pennsylvania is ranked 12th nationally for pork production and 5th nationally for number of swine processed. ASF presents serious threats to animal health and the economic vitality of the Commonwealth’s swine production industry. Introduction of ASF into the commercial swine herds of this Commonwealth would result in severe economic losses to the infected herd owners as well as loss of valuable National and International trade opportunities for all Pennsylvania’s pork producers.

M. The PDA through this Quarantine Order establishes reasonable requirements to allow for movement of swine and products within this Commonwealth for exhibition purposes, while protecting against the introduction of ASF into this Commonwealth’s commercial production swine population.

Order of Quarantine:

With the foregoing recitals incorporated into this Order of Quarantine by reference, the Pennsylvania Department of Agriculture (PDA) under authority of the Domestic Animal Law, at 3 Pa.C.S.A. § 2329(d) and section 1702 of the Administrative Code of 1929 (71 P.S. § 442), hereby establishes a General Order of Quarantine related to the dangerous transmissible disease African Swine Fever (ASF) and the shipment and holding of swine, alive or dead, and any conveyances, containers, goods, products or materials capable of harboring ASF, within and through the Commonwealth of Pennsylvania. The following are the conditions, restrictions and requirements of this Order:

1. *Quarantine Area.* The area covered by this General Quarantine Order is the entire Commonwealth of Pennsylvania.

2. *Applicability and Time Period of Order.* The terms, provisions and requirements of this Order are applicable to all live and dead swine, swine manure, swine offal and swine germplasm, and any conveyances, containers, goods, products or materials capable of harboring ASF located within or to be shipped through or in the Commonwealth of Pennsylvania (Quarantine Area), from the effective date of this Order until the time this Order is rescinded in writing by the PDA.

3. *Definitions.* The following terms when used in this Order have the following meanings:

Accredited veterinarian. A licensed veterinarian jointly accredited by APHIS-USDA and the Department in the state the veterinarian is licensed to perform official duties

on behalf of APHIS-USDA or the Department in the state the veterinarian is licensed to practice veterinary medicine. See accreditation standards established by 9 CFR Parts 160 and 161 (relating to definition of terms; and requirements and standards for accredited veterinarians and suspension or revocation of such accreditation).

Animal Exhibition. Any temporary spectacle, display, event, exhibition or act featuring performing animals including, but not limited to, circuses, pony rides, animal exhibits, weight pull events, and petting zoos. This definition shall exclude zoologic exhibits and Pennsylvania Game Commission menagerie permit holders.

Breeding swine. A sexually intact swine 6 months of age or older or a sexually intact swine 5 months of age or younger selected for producing offspring.

Certificate of Veterinary Inspection (ICVI). An official document issued by a federal, state, tribal, or accredited veterinarian certifying that the animals identified on the document have been inspected and were found to satisfy the regulations pertaining to their intended movement—within the same state, between states, or internationally.

Direct movement to slaughter. Transported to a facility for slaughter, without stops or unloading except for feeding and watering, during which the animals are not commingled with any other animals unless all are destined for slaughter.

Market swine. A swine that is registered and entered in a PDA-sponsored market swine class, weighing at least 210 pounds and approximately 6 months old.

Pennsylvania health certificate. A legible official document, made on a form (AAI-13) provided by the Department, prepared by an accredited Pennsylvania veterinarian or a representative of the Department certifying the health of animals described therein according to the health requirements established by this chapter.

Recognized slaughter establishment. A slaughter establishment operated under the Federal Meat Inspection Act (21 U.S.C.A. §§ 601—623, 641—645, 661, 671—680 and 691) or a State inspected slaughter establishment.

Slaughter market. An animal market approved by the Department for the sale of slaughter animals in accordance with Chapter 5 (relating to animal markets) and the act of June 22, 1931 (P.L. 650, No. 225) (3 P.S. §§ 431—439), known as the Farm Animal Dealer or Broker License Law.

Swine Health Monitor. A Swine Health Monitor (SHM) is a person appointed by a fair board or livestock show committee who is familiar with swine and can recognize when swine are sick. This individual shall be trained by an accredited veterinarian to recognize animal health parameters or clinical signs suggestive of Foot and Mouth Disease (FMD), Classical Swine Fever (CSF), and African Swine Fever (ASF). This individual shall immediately report any clinical signs suggestive of FMD, CSF, and ASF to the veterinarian holding the veterinarian-client-patient relationship with the fair or show board. The veterinarian will then follow up by examining animal and notify the State Animal Health Official (SAHO) when appropriate.

Veterinarian-Client-Patient Relationship. A veterinarian-client-patient-relationship (VCPR) is defined by the American Veterinary Medical Association as the basis for interaction among veterinarians, their clients, and their patients and is critical to the health of an animal. A VCPR means that all of the following are required:

a. The veterinarian has assumed the responsibility for making clinical judgments regarding the health of the patient and the client has agreed to follow the veterinarians' instructions.

b. The veterinarian has sufficient knowledge of the patient to initiate at least a general or preliminary diagnosis of the medical condition of the patient. This means that the veterinarian is personally acquainted with the keeping and care of the patient by virtue of a timely examination of the patient by the veterinarian, or medically appropriate and timely visits by the veterinarian to the operation where the patient is managed.

c. The veterinarian is readily available for follow-up evaluation or has arranged for the following: veterinary emergency coverage, and continuing care and treatment.

d. The veterinarian provides oversight of treatment, compliance, and outcome.

e. Patient records are maintained.

4. Exhibition Requirements. Beginning January 1, 2020, fair boards and livestock show committees must establish a VCPR and appoint a SHM for all animal exhibitions. No swine species shall be exhibited in this Commonwealth unless each animal meets all of the following criteria:

a. Is accompanied by a Pennsylvania health certificate or ICVI that was issued by a licensed and accredited veterinarian not more than 14 days before the date of the animal exhibition.

b. Shall be permanently identified by an official 840 series radio frequency identification (RFID) ear tag and the ear tag number recorded on the Pennsylvania health certificate or ICVI.

i. If the swine does not have an 840 RFID tag at the time of purchase by an exhibitor, a tag may be acquired by one of the following methods:

a. Apply for premises ID through PDA and purchase RFID tags through a distributor.

b. Request an accredited veterinarian to apply an 840 RFID at the time of issuance of certificate of veterinary inspection.

c. Has been visually inspected for signs of disease prior to unloading at the exhibition by an accredited veterinarian or a Swine Health Monitor appointed by the fair board or livestock show committee.

d. The Swine Health Monitor shall immediately report any clinical signs of disease to the veterinarian holding the veterinarian-client-patient relationship with the fair board or livestock show committee. The veterinarian shall immediately follow up by examining the animal and notify the SAHO when appropriate.

e. Any swine showing signs of illness upon arrival shall not be permitted to unload and must be reported to the accredited veterinarian holding the veterinarian-client-patient-relationship with the show or fair board.

5. Exhibition Timing and Order. All breeding swine animal exhibitions are to occur prior to the arrival of any market swine. Breeding swine must be removed from the animal exhibition premises prior to any market swine arriving. Breeding swine animal exhibitions, excluding birthing or educational displays which are not competing, shall arrive, exhibit, and depart in a period no greater than 72 hours.

6. *Birthing Exhibitions.* Swine birthing exhibitions and educational displays which are not competing may occur concurrently with market swine animal exhibition as long as reasonable precaution is made to ensure the biosecurity of the swine birthing exhibition or educational display.

7. All market swine exhibited in PDA sponsored market shows shall move directly to a PDA or USDA licensed slaughter facility following the animal exhibition and may not be diverted to premises other than a recognized slaughter establishment or a slaughter market in which the sales are designated slaughter only sales.

8. Non-PDA Sponsored shows including jackpot shows and 4-H roundups not occurring during a PDA sponsored fair or show, where arrival, exhibition and departure of the swine occur within a 72 hour window and there is no public access to the animals other than observation during competitions, shall be exempt from the terminal slaughter requirement listed in paragraph 6.

9. All conveyances, containers, goods, products or materials in contact with swine being shipped within or through the Commonwealth of Pennsylvania for animal exhibition shall be cleaned and disinfected in accordance with the following:

a. A conveyance used for the transportation of swine to fairs and shows shall be cleaned and disinfected by an exhibitor prior to each use and shall be free of visible accumulations of manure.

b. At the conclusion of swine animal exhibitions, and after all swine have left premises, the fair board or livestock show committee shall ensure all holding pens and animal exhibition areas have had all organic material removed and gone through the fair board or livestock show committee's cleaning and disinfection process.

10. *Violations/Penalties.* Any person violating the requirements of this Order shall be subject to enforcement and penalties as are allowed under the provisions of the Domestic Animal Law (3 Pa.C.S.A. § 2301 et seq.), which include, revocation of license, criminal prosecution, civil penalties of up to \$10,000 per violation, injunctive relief or any combination of these penalties.

11. *No Restriction on Further Action by PDA.* This Order shall not be construed as limiting PDA's authority to establish additional quarantine or testing requirements or take any actions otherwise permitted under applicable statute or regulation.

12. *Contact information.* Questions regarding this General Quarantine Order is to the Commonwealth of Pennsylvania, Department of Agriculture, Bureau of Animal Health, 2301 North Cameron Street, Harrisburg, PA 17110 or by telephone at 717-772-2852, or email at RA-ahds@pa.gov.

African swine fever virus (ASFV) can be spread by live or dead pigs, domestic or wild, and raw and processed pork products. Transmission can also occur via contaminated feed, specific insect vectors (soft ticks), and fomites (non-living objects) such as shoes, clothes, vehicles, equipment etc., due to the high environmental resistance of ASFV.

B. Section 2321 of the Domestic Animal Law (Law) establishes a list of "dangerous transmissible diseases" and provides for the designation of additional dangerous transmissible diseases through regulation or temporary order (3 Pa.C.S.A. § 2321).

C. African swine fever (ASF) is specifically designated as a dangerous transmissible disease at section 2321(a)(3) of the Law (3 Pa.C.S.A. § 2321(a)(3)).

E. This includes authority, set forth at section 2329 of the Law, to establish and enforce quarantine orders "Whenever a dangerous transmissible disease...exists anywhere within or outside of this Commonwealth. . ." (3 Pa.C.S.A. § 2329(a)).

F. Section 2329(c) of the Law provides specific authority to establish and enforce an interstate and international quarantine order, stating, "An interstate or international quarantine may be established and enforced by order of the department against any place or places outside this Commonwealth for any of the reasons set forth in subsection (a) or where dangerous transmissible diseases. . .are reported to exist. An interstate or international quarantine may prohibit the bringing of any domestic animals, conveyances, containers, goods, products or materials into this Commonwealth except in accordance with the requirements set forth in the quarantine order. . ." LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302, 303, 304 and 305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, State-wide health standard, the site-specific standard, or who

intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation

to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

43-309C: Deist Industries, Inc., dba Bucks Fabricating (3550 Perry Highway, Hadley, PA 16130), the Department intends to issue an Air Quality Plan Approval for the proposed installation and operation of a third surface coating booth, a heated air make-up unit, a source modification, and an increase in the facility-wide potential to emit (PTE) for their facility located at in Sandy Creek Township, **Mercer County**.

Notice is hereby given, in accordance with 25 Pa. Code § 127.44(b), for actions taken on an application for plan approval for sources located within a Title V facility.

This facility currently operates two (2) surface coating operations under authority of Operating Permit NM-43-00309. The proposed new sources include: One (1) Colmet Spray Booth, XDS series, Model XDS-20-14-50-P-DT (Source 114) equipped with Binks Receptor Filter, or equivalent, panel/blanket type filter, and one (1) natural gas-fired Comet Spray Booth Heated Air Make-up Unit, Model CT-227 NG HRH H.O.T. (Source 115) rated at 5.5 MMBtu/hr.

Installation and operation of the proposed new equipment increases the facility-wide PTE for Volatile Organic Compounds (VOC), Hazardous Air Pollutants (HAP), combustion emissions identified as Nitrogen Oxides (NO_x), Sulfur Oxides (SO_x), Carbon Monoxide (CO), Particulate Matter (PM, PM₁₀, PM_{2.5}), VOC, HAP, and Greenhouse gases (GHG). The modification to Source 102, Assembly Cleaning Process (Hand Wipe), increases the potential VOC and HAP emissions. The combined emissions increase resulting from installation and operation of the new sources, Sources 114 and 115, and the modification to Source 102 are estimated to be 37 tons of VOC per consecutive 12-month period and 6.74 tons of HAP per consecutive 12-month period.

The surface coating operation is subject to the 25 Pa. Code § 129.52d Table 1, VOC content limits for Metal Parts and Products Surface Coating for Extreme Performance Coatings and is limited to:

(i) Air-dried—3.5 lbs/gal coating, less water & exempt compounds, as applied (0.42 kg VOC/liter coating, less water & exempt compounds, as applied)

(ii) Baked—3.0 lbs/gal coating, less water & exempt compounds, as applied (0.36 kg VOC/liter coating, less water & exempt compounds, as applied)

The following proposed emission increases for the new sources (Sources 114 and 115) and the modified source (Source 102) are summarized:

The facility-wide VOC emission limitation will increase to 67 tons in any consecutive twelve (12) month rolling period. As a result of this increase, the facility is now a major VOC emitting facility and meets the definition of a Title V facility. After the new equipment construction is complete and the temporary operation period commences, the owner/operator shall submit a complete Title V operating permit application, including all sources (new and existing) and controls, for authorization to continue operation at the facility.

This action is subject to State regulations including 25 Pa. Code Chapter 127—Construction, Modification, Reactivation, and Operation of Sources and Compliance Assurance Monitoring Plan. These modifications will result in facility-wide criteria pollutant emission increases to levels above the major source threshold for VOC but remain below the significance levels for Nonattainment New Source Review under 25 Pa. Code Subchapter E and Prevention of Significant Deterioration under 40 CFR 52.21.

The emissions from the new and modified sources have been evaluated and determined, through a five (5)-step, “top down” analysis approach, to meet the minimum attainable emissions through the use of best available technology as required 25 Pa. Code § 127.12(a)(5). The facility will demonstrate compliance with emission limitations through air pollution control devices, monitoring, testing, recordkeeping, reporting and work practice requirements, as applicable.

In accordance with 25 Pa. Code § 127.44, the public notice provisions, the Department of Environmental Protection, Northwest Regional Office, has made a preliminary determination to approve this Plan Approval.

In accordance with 25 Pa. Code § 127.44(c) & (e), the proposed plan approval will be submitted to the U.S. Environmental Protection Agency (EPA) and affected states for comment prior to issuance.

In accordance with 25 Pa. Code § 127.44(f)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP Office (Air Quality). Appointments for scheduling a review must be made by calling the DEP at (814) 332-6340.

In accordance with 25 Pa. Code § 127.44(f)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments.

In accordance with 25 Pa. Code § 127.45(b), any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Eric A. Gustafson, Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval [43-309C] and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient.

Written comments or requests for a public hearing or for additional information should be directed to Eric A. Gustafson, Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut St., Meadville, PA 16335; Phone (814) 332-6940.

In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department's Northwest Region Air Quality Program Manager. If a plan approval has not undergone the previously listed public notice process, the change to an operating permit must be treated as a significant modification. In these situations, the Department should follow the procedures described in §§ 127.421—127.431 for State Only Operating Permits or §§ 127.521—127.524 for Title V operating permits.

The Braskem plant is a major facility for volatile organic compounds (VOC) emissions. In 2018, emissions calculated in tons per year were: volatile organic compounds (VOC)—52.3; nitrogen oxides (NO_x)—11.7; sulfur oxides (SO_x)—0.056; carbon monoxide (CO)—49.2 and particulate matter less than 10 microns (PM₁₀)—12.7. Sources at the facility include (2) two polypropylene manufacturing plants each with (3) storage silos, a propylene splitter process and a propylene unloading rack. Minor sources include 2-256 hp fire pump engines and a maintenance parts washer. VOC emissions from the polypropylene plants are controlled by an on-site flare and VOC emissions from the propylene splitter process and unloading rack are controlled by an off-site flare.

Sources at the facility are subject to the following Federal regulations: two Subparts from 40 CFR Part 60, Subpart DDD—Standards of Performance for Volatile

Organic Compound Emissions from the Polymer Manufacturing Industry and Subpart VV—Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry for which Construction, Reconstruction or Modification Commenced after January 5, 1981 and on or before November 7, 2006 and 40 CFR Part 63, Subpart ZZZZ—National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines.

The Commonwealth regulations 25 Pa. Code §§ 129.91—129.95, Stationary Sources of NO_x and VOCs, and §§ 129.96—129.100, Additional RACT Requirements for Major Sources of NO_x and VOC, which mandate facilities install Reasonably Available Control Technology (RACT), applies to the Braskem plant. This renewal Operating Permit includes conditions for a case by case determination for RACT besides the renewal of the Operating Permit, pursuant to 25 Pa. Code § 127.446.

Upon final approval, the permit will be renewed for a period of five (5) years.

The renewal does not authorize any increase in air emissions of regulated pollutants above previously approved levels. The renewal contains all applicable requirements including monitoring, recordkeeping and reporting.

The facility has the potential to emit 310.20 tons of nitrogen oxides (NO_x) per year, 479.72 tons of carbon monoxide (CO) per year, 844.94 tons of volatile organic compounds (VOCs) per year, 57.87 tons of sulfur oxides (SO_x), 1,630.25 tons of particulate matter (PM, including PM₁₀) per year and 8.13 tons of hazardous air pollutants. No emission or equipment changes are being proposed by this action. The emission limits, throughput limitations and work practice standards along with testing, monitoring, record keeping and reporting requirements have been included in the operating permit to ensure the facility complies with all applicable Federal and State air quality regulations. These operating permit conditions have been derived from the applicable requirements of Subpart Dc of 40 CFR Part 60, Subparts DDDD, QQQQ, ZZZZ, DDDDD and HHHHH of 40 CFR Part 63 and 25 Pa. Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. For individuals who wish to challenge an action, the appeal must reach the Board within 30-days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to

publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office.
