LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101–6026.908).

Sections 302–305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation mea-

asures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a

proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Concurrently, Plan Approval PA-04-00740C is being advertised for as-built changes in design and construction.

Air contamination sources and controls to be authorized include:

- SF₆-insulated high voltage equipment; controlled by leak detection and repair (LDAR).

Potential to emit from the project will not exceed 854 tons of Carbon Dioxide Equivalents (CO₂e).

This authorization is subject to Prevention of Significant Deterioration (PSD) requirements of 40 CFR 52.21; adopted in its entirety by the Department and incorporated by reference under 25 Pa. Code § 127.83; for CO₂e. Since there are no NAAQS or PSD increments for GHGs, the requirements in 40 CFR 52.21(k) and 51.166(k) of EPA's regulations to demonstrate that a source does not cause or contribute to a violation of the NAAQS is not applicable to GHGs; thus, PSD modeling for CO₂e or GHGs is not required.

This authorization is subject to State regulations including 25 Pa. Code Chapters 123—Standards for Contaminants; 127—Construction, Modification, Reactivation, and Operation of Sources; 129—Standards for Sources; 135—Reporting of Sources; and 139—Sampling and Testing. This authorization is also subject to Federal regulations including 40 CFR Parts 52—Approval and Promulgation of Implementation Plans (specifically 52.21—Prevention of Significant Deterioration of Air Quality) and Part 98—Mandatory Greenhouse Gas Reporting.

Plan approval conditions will include source specific emission limitations, monitoring requirements, and associated recordkeeping and reporting requirements. The Department has determined that the proposed project satisfies BACT and the Department's Best Available Technology (BAT) requirements. Once compliance with the Plan Approval is demonstrated, the applicant will be required to submit a Title V Operating Permit (TVOP) application in accordance with 25 Pa. Code Subchapters F and G.

A person may oppose the proposed plan approval by filing a written protest with the Department through Melissa Jativa via the U.S. Postal Service to Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222; email to mjativa@pa.gov; or fax to 412.442.4194. Additional written comments may also be submitted. Each protest or set of written comments must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval (PA-04-00740B) and a concise statement of the objections to the plan approval issuance and the relevant facts upon which the objections are based.

A public hearing may be held, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Mark R. Gorog, Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222 or by email to mgorog@pa.gov.

This authorization is subject to Prevention of Significant Deterioration (PSD) requirements of 40 CFR 52.21; adopted in its entirety by the Department and incorporated by reference under 25 Pa. Code § 127.83; for NO₂, CO, PM, PM₁₀, and CO₂e. In accordance with the PSD rules in 40 CFR 52.21 and 25 Pa. Code § 127.83, Shell has performed an air quality analysis which utilizes dispersion modeling. Shell's air quality analysis satisfies the requirements of the PSD rules and is consistent with the U.S. Environmental Protection Agency's (EPA) Guideline on Air Quality Models (40 CFR Part 51, Appendix W) and the EPA's air quality modeling policy and guidance.

Shell revised the air quality analyses that it previously conducted, using air dispersion modeling, to support the Department's issuance of Plan Approval 04-00740A. The revised air quality analyses satisfy the requirements of the Prevention of Significant Deterioration (PSD) regulations codified in 40 CFR 52.21 and 25 Pa. Code § 127.83.

In accordance with 40 CFR 52.21(k)–(n), Shell conducted air quality analyses of emissions of carbon monoxide (CO), nitrogen oxides (NO_x), and particulate matter less than or equal to 10 micrometers in diameter (PM₁₀) for its Shell Polymers Monaca Site. Shell's source impact analyses demonstrate that emissions from the Shell Polymers Monaca Site would not cause or contribute to air pollution in violation of the National Ambient Air Quality Standards for CO, nitrogen dioxide (NO₂), or PM₁₀. Additionally, Shell's source impact analyses demonstrate that emissions from the Shell Polymers Monaca Site would not cause or contribute to air pollution in violation of the Class II or Class I PSD increments for NO₂ or PM₁₀.

In accordance with 40 CFR 52.21(o), Shell provided additional impact analyses of the impairment to visibility, soils, and vegetation that would occur as a result of the Shell Polymers Monaca Site and general commercial, residential, industrial, and other growth associated with the Shell Polymers Monaca Site.

In accordance with 40 CFR 52.21(p), written notice of the Shell Polymers Monaca Site has been provided to the Federal Land Managers of nearby Federal Class I areas as well as initial screening calculations to demonstrate that emissions from the Shell Polymers Monaca Site would not adversely impact air quality related values and visibility in nearby Federal Class I areas.

In accordance with the public notice requirements in 25 Pa. Code § 127.45(b)(4), the degree of Class II and Class I PSD increment consumption expected to result from the operation of the Shell Polymers Monaca Site is provided in the following tables:

Table 3: Degree of Class II PSD Increment Consumption from Operation of Shell Facility

Pollutant	Averaging Period	Degree of Class II Increment Consumption		Class II Increment
		micrograms/meter ³	% of Class II PSD Increment	micrograms/meter ³
NO ₂	Annual	< 1.29211	< 5.17 %	25
PM ₁₀	24-Hour	< 9.60440	< 32.02 %	30
	Annual	< 2.80329	< 16.49 %	17

Table 4: Degree of Class I PSD Increment Consumption from Operation of Shell Facility

Shell has performed an inhalation risk assessment in order to evaluate potential cancer and noncancer inhalation risks from this facility’s potential air emissions. Emission rates of compounds of potential concern (COPC) have been modeled to derive exposure concentrations. The highest modeled exposure concentrations were then multiplied or divided by compound-specific unit risk factors or reference concentrations, respectively. Chronic risks for each COPC were then summed and compared against the Department’s benchmark excess lifetime cancer risk and health index (HI) values. Acute risks for each COPC were compared against the Department’s benchmark hazard quotient (HQ) value.

Table 5: Inhalation Risk Assessment Results Summary

Inhalation Risk	Department Benchmark	Modeled Risk	Less Than Benchmark?
Excess Lifetime Cancer Risk	1 in 100,000	0.94 in 100,000	Yes
Chronic Noncancer Risk	HI < 0.25	HI = 0.10	Yes
Acute Noncancer Risk	HQ < 1	HQ = 0.41	Yes

The Department’s technical review concludes that Shell’s inhalation risk assessment was conducted according to the Department-approved protocol and is acceptable. Furthermore, the Department’s independent inhalation risk assessment concludes that chronic cancer and noncancer risks as well as acute noncancer risks do not exceed the Department’s benchmarks.

This authorization is subject to New Source Review (NSR) requirements of 25 Pa. Code Chapter 127, Subchapter E for NO_x, VOC, and PM_{2.5}. These air contaminants are subject to Lowest Achievable Emission Rate (LAER) requirements. This location is designated as an area of nonattainment for the 2008 Lead NAAQS; however, lead emissions from this facility will be negligible because gaseous fuels, which contain little if any lead, will be combusted on site. NSR requirements have not been triggered for lead. Shell has secured 379 tons of NO_x, 612 tons of VOC, and 164 tons of PM_{2.5} emission reduction credits (ERCs) in order to offset emission increases from those air contaminants.

This authorization is subject to State regulations including 25 Pa. Code Chapters 123—Standards for Contaminants; 127—Construction, Modification, Reactivation, and Operation of Sources; 129—Standards for Sources; 135—Reporting of Sources; 139—Sampling and Testing; and 145—Interstate Pollution Transport Reduction. Specific source standards include 25 Pa. Code §§ 129.56 and 129.57 for storage tanks containing VOCs, 25 Pa. Code § 129.65 for ethylene production plants, and 25 Pa. Code § 129.71 for LDAR requirements for ethylene and polyethylene manufacturing fugitive sources. State standards for contaminants and sources are superseded in most cases by more stringent BACT and LAER requirements. This authorization is also subject to Federal New Source

Performance Standards (NSPS) including 40 CFR Part 60 Subparts Kb, VV, VVa, DDD, NNN, RRR, IIII, JJJJ, KKKK, and TTTT; National Emission Standards for Hazardous Air Pollutants (NESHAP) including 40 CFR Part 61 Subparts J, V, and FF; and NESHAP including 40 CFR Part 63 Subparts SS, UU, XX, YY, EEEE, FFFF, YYYY, and ZZZZ. Other applicable Federal regulations include 40 CFR Parts 52—Approval and Promulgation of Implementation Plans (specifically 52.21—Prevention of Significant Deterioration of Air Quality), 64—Compliance Assurance Monitoring; 68—Chemical Accident Prevention Provisions; 72, 73, and 75—Permits Regulation, Sulfur Dioxide Allowance System, and Continuous Emission Monitoring; Part 97—Federal NO_x Budget Trading Program, CAIR NO_x and SO₂ Trading Programs, and CSAPR NO_x and SO₂ Trading Programs, and Part 98—Mandatory Greenhouse Gas Reporting.

Plan approval conditions will include source specific and facility-wide emission limitations, operational restrictions, compliance testing and monitoring requirements, work practice standards, and associated recordkeeping and reporting requirements. The Department has determined that the proposed facility satisfies BACT, LAER, and the Department’s Best Available Technology (BAT) requirements. Once compliance with the Plan Approval is demonstrated, the applicant will be required to submit a Title V Operating Permit (TVOP) application in accordance with 25 Pa. Code Subchapters F and G.

A person may oppose the proposed plan approval by filing a written protest with the Department through Melissa Jativa via the U.S. Postal Service to Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222; email to mjativa@pa.gov; or fax to 412.442.4194. Additional written comments

may also be submitted. Each protest or set of written comments must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval (PA-04-00740C) and a concise statement of the objections to the plan approval issuance and the relevant facts upon which the objections are based.

A public hearing may be held, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Mark R. Gorog, Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA 15222 or by email to mgorog@pa.gov.

Emissions of PM are expected to be less than 0.08 grains per dry standard cubic feet, corrected to 7 percent O₂. Emissions of SO_x are expected to be less than 500 ppmv. The Plan Approval will contain

monitoring, recordkeeping, and operating conditions designed to keep the facility operating within the allowable emissions and all applicable air quality requirements.

36-05017G: Conestoga Wood Specialties Corp. (245 Reading Road, East Earl, PA 17519-0158) for the construction of a new Venjakob conveyorized spray coating line, and associated ovens, at the kitchen cabinet manufacturing facility located in East Earl Township, **Lancaster County**. This equipment will replace the existing CEFLA coating line (Source ID # 204). The emission increases from the construction of the new equipment, not counting the decreases of 27.62 tpy of VOCs, 0.29 tpy of PM₁₀, and 16.47 tpy of HAP emissions from removal of the existing CEFLA line, are expected to be: 28.51 tpy of VOCs, 1.21 tpy of PM₁₀, and 17.0 tpy of HAPs. DEP's review of the information submitted by the applicant indicates that the air contamination sources as installed will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12, as well as 25 Pa. Code § 129.52—Surface coating processes, 25 Pa. Code §§ 129.101—129.107—Wood Furniture Manufacturing Operations, and 40 CFR Part 63, Subpart JJ—National Emission Standards for Wood Furniture Manufacturing Operations. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into a Title V Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

16-148D: Robert V. Burns Crematorium, Inc. (638 Wood Street, Clarion, PA 16214). The Department of Environmental Protection intends to issue a plan approval to Robert V. Burns Crematorium for the installation of a second human crematory at their facility located in Clarion Borough, **Clarion County**. This is an existing non-Title V facility. Public notice is required for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

This application proposes occasional opening of the crematory's door during operation. This crematory was not eligible for authorization under General Plan Approval 14 per the Department's instruction that those facilities which open their primary chamber's door during operation, could no longer use the general permit. Robert V. Burns Crematorium has elected to apply for a plan

approval rather than discontinue the opening of their crematories' doors which they feel is necessary for economical and complete cremation cycles. Special conditions will be included in this plan approval which address door opening and its' impact on emissions and operation. The crematory will be required to meet all emission and temperature requirements while the door is opened and will have additional recordkeeping and monitoring requirements.

The Plan Approval will contain testing, recordkeeping, emission restriction, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements. Emissions from the proposed source are estimated to be: less than 1.25 ton per year (tpy) of particulate matter, less than 1.0 tpy (each) of SO_x, NO_x, CO, VOC, and HAP.

In accordance with 25 Pa. Code § 127.44(f)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP Office (Air Quality). Appointments for scheduling a review must be made by calling the DEP at (814) 332-6940.

In accordance with 25 Pa. Code § 127.44(f)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments. Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval 16-148D: Robert V. Burns Crematorium and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department's Northwest Region. MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30-days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. Residual Waste General Permit WMGR123; Base Permit Extension

Under the authority of the Solid Waste Management Act (35 P.S. §§ 6018.101—6018.1003) and the Municipal Waste Planning, Recycling and Waste Reduction Act (53 P.S. §§ 4000.101—4000.1904), the Department of Environmental Protection (Department) by this notice issues a 3-month extension of the terms of its current General Permit No. WMGR123. The current General Permit No. WMGR123 is scheduled to expire October 4, 2020. This General Permit authorizes permittees to process, transfer and beneficially use oil and gas liquid waste to develop or hydraulically fracture an oil or gas well.

The Department published notice of its intent to modify and renew General Permit No. WMGR123 (WMGR123) at 50 Pa.B. 2137 (April 18, 2020). The Department received significant public interest in the proposed modifications to WMGR123. Due to the volume and breadth of the comments received, WMGR123 will be renewed with its existing permit language for 3 months, until January 4, 2021. This will allow time for the Department to finalize responses to the comments received during the 60-day public comment period.

At this time, the Department will not take a final action on pending renewal applications under WMGR123 until the revised General Permit WMGR123 has been issued. Until the Department acts on the pending renewal applications, existing coverage under WMGR123 will automatically continue in accordance with the following general permit Condition C.19., provided permittees are in compliance with all other terms and conditions of WMGR123:

“In the event that a timely and complete application for renewal has been submitted and the Department is unable, through no fault of the permittee, to reissue the general permit or approval for coverage before its current coverage expiration date, the terms and conditions of the approved coverage will automatically continue and will remain fully effective and enforceable pending the issuance or denial of the renewal for permit coverage, provided the permittee is, and has been, operating in compliance with the terms and conditions of the general permit.”

The terms and conditions of WMGR123 remain fully effective and enforceable pending the Department's final action on the application for renewal of permit coverage.

Persons interested in reviewing the general permit may contact Chris Solloway at csolloway@pa.gov, (717) 787-7381, or Environmental Group Manager, Permits Section, Division of Municipal and Residual Waste, Bureau of Waste Management, P.O. Box 69170, Harrisburg, PA 17106-9170.

This Agenda represents the Administration's present intentions regarding future regulations. The information provided is current as of September 21, 2020. Administration of the Land Recycling Program 25 Pa. Code Chapter 250 (# 7-552)	Quarter 1, 2021, Consideration as Final	The rulemaking proposes to amend 25 Pa. Code Chapter 250 to update the medium specific concentrations (MSCs) established under the Statewide health standard based on the most recent published scientific information. MSCs are concentrations of contaminants in soil and groundwater that are protective of human health and the environment under various exposure scenarios. This rule also proposes to add MSCs for three new contaminants, including Perfluorooctanoic Acid (PFOA), Perfluorooctance Sulfonate (PFOS), and Perfluorobutane Sulfonate (PFBS). These contaminants are within the Per- and Poly-fluoroalkyl Acid (PFAS) family of compounds for which the U.S. Environmental Protection Agency (EPA) has published toxicological data. These regulations identify the formulas DEP must use to calculate MSCs and the sources of the toxicological information. This rulemaking also proposes to clarify administrative elements of Chapter 250. DEP is required by § 250.11 to propose appropriate MSC changes based on current scientific information no more than 36 months after the effective date of the most recently promulgated MSCs. Water Quality Standards—Class A Stream Redesignations 25 Pa. Code Chapter 93 (# 7-548)	Quarter 4, 2020, EQB Consideration, as Final	The regulatory changes included in this rulemaking are the result of stream evaluations conducted by DEP in response to a submittal of data from the Pennsylvania Fish and Boat Commission (PFBC). In this rulemaking, redesignations rely on § 93.4b(a)(2)(ii) to qualify streams for High Quality (HQ) designations based upon their classifications as Class A wild trout streams. DEP staff conducted an independent review of the trout biomass data in the PFBC's fisheries management reports for streams throughout the Commonwealth to ensure that the HQ criteria were met. Based on these data and appropriate regulatory criteria, DEP developed this package of stream redesignations including HQ stream redesignations in the Delaware, Susquehanna and Ohio River basins. Code Chapters 93 and 96 (# 7-553)	Quarter 2, 2021, EQB Consideration as Final	This rulemaking proposes to address a provision regarding the water quality standards for manganese included in Act 40 of 2017. This rulemaking proposes to amend 25 Pa. Code Chapter 93 (relating to water quality standards) and 25 Pa. Code Chapter 96 (relating to water quality standards implementation). The amendments propose to delete manganese from Table 3 at § 93.7 (relating to specific water quality criteria) and add manganese to Table 5 at § 93.8c (relating to human health and aquatic life criteria for toxic substances). Also, the amendments propose two alternatives for a point of compliance with the manganese water quality standard: the point of all existing or planned surface potable water supply withdrawals; or all surface waters (i.e., near the point of discharge). Water Quality Standards—Dunbar Creek et al. Stream Redesignations 25 Pa. Code Chapter 93 (# 7-557)	Quarter 4, 2020 EQB Consideration, as Proposed	The regulatory changes included in this rulemaking are the result of stream evaluations conducted by DEP in response to petitions submitted by citizens and data collected by the Department. In this rulemaking, redesignations rely on § 93.4b(a) and (b) to qualify one water for High Quality (HQ) and seven waters for Exceptional Value (EV) as well as correct the erroneous HQ designation of UNT Oley Creek to remove HQ. One water will be redesignated from Trout Stocking to Cold Water Fishes. Based on these data and appropriate regulatory criteria, DEP developed this package of stream redesignations including HQ stream redesignations in the Delaware, Susquehanna and Ohio River basins. Water Quality Management and NPDES Permit Application Fees and Annual Fees 25 Pa. Code Chapters 91 and 92a (# 7-533)	Quarter 1, 2021, EQB Consideration, as Final	This rulemaking proposes to amend fees related to water quality management permitting (Chapter 91) and proposes to amend the fee schedule for NPDES permit applications (Chapter 92a). Chapter 91 establishes, among other things, a water quality management (WQM) permitting program for the construction of sewage and industrial waste treatment facilities and for land application of sewage and industrial wastes. DEP began its Chapter 92a annual invoicing and fee collection program in December 2010. Chapter 92a updated the fee schedule for NPDES permit applications for persons to discharge pollutants from point sources into surface waters. In addition, Chapter 92a introduced an annual fee for certain facilities authorized to discharge pollutants by individual NPDES permits. A fee analysis that DEP presented to the EQB in 2014 highlighted that, despite the fee increase in 2010, revenue continues to fall short of expenses, impeding the work of Programs to carry out necessary tasks for protecting water resources in the Commonwealth. INSURANCE DEPARTMENT

COVID-19 Guidance—Discontinuation of Temporary Resident Producer Licensure; Notice 2020-21

This notice is being issued to all insurers, insurance agencies and interested parties in this Commonwealth to provide information on the discontinuation of temporary resident producer licensure in this Commonwealth. This notice modifies notice 2020-12 published at 50 Pa.B. 2354 (May 2, 2020).

On April 22, 2020, to assure the continuity of certain vital insurance services and to address the disruption caused by the spread of the novel coronavirus (COVID-19) in this Commonwealth, the Insurance Department (Department) issued notice 2020-12 to announce the Department's beginning of temporary resident producer licensure to qualifying individuals under section 609-A of The Insurance Department Act of 1921 (40 P.S. § 310.9). Since test centers are now operating, and online remote testing is available for insurance license examinations in the Commonwealth, the disruption caused by COVID-19 has been mitigated. Therefore, effective October 19, 2020, the Department will no longer accept applications for temporary licensure.

As a reminder, temporary producer licensees must adhere to the following terms and conditions to convert a temporary license to a full resident producer license:

- Individuals will be required to take and pass the appropriate producer licensing examination.
- Producer licensing examination sites adhere to the safety restrictions and guidelines to enforce social distancing established by Governor Tom Wolf and the Department of Health. Note that the operating status of an examination site is subject to change should such closure become necessary to protect the health of the public.
- The Department offers the option of remote testing for insurance license exams. Confirm that individuals meet all technical compatibility requirements when scheduling the examination.
- Be aware that the appointment with the sponsoring insurer will be cancelled when the individual's full resident producer license is issued.

If individuals take and pass the producer licensing exam while their temporary license is active:

- The examination score will be forwarded to the Department.
- The full resident producer license will be issued upon receipt of the individual's passing exam score.
- Individuals will receive an e-mail notification with their resident producer license number.
 - o Individuals do not need to submit a new application, pay a fee or complete a fingerprinting/background check.
- If individuals take and pass the producer licensing exam within 6 months after their temporary license expires:
 - The examination score will be automatically sent to the Department.
 - Individuals do not need to submit a new application or pay a fee.
 - Individuals must complete a fingerprinting/background check at an Identogo enrollment center. To

pre-register and schedule an appointment, visit uenroll.identogo.com and enter service code 1KG8Q3.

If individuals take and pass the licensing exam 7 or more months after their temporary license expires:

- Individuals will be required to submit a new application and pay a fee.
- Individuals must complete a fingerprinting/background check at an Identogo enrollment center. To pre-register and schedule an appointment, visit uenroll.identogo.com and enter service code 1KG8Q3.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Electric Generation Supplier License Cancellations of Companies with an Expired Financial Security, Insufficient Financial Security Amount or Language

Public Meeting held
September 17, 2020

Commissioners Present: Gladys Brown Dutrieuille, Chairperson; David W. Sweet, Vice Chairperson; John F. Coleman, Jr.; Ralph V. Yanora

Electric Generation Supplier License Cancellations of Companies with an Expired Financial Security, Insufficient Financial Security Amount or Language;
M-2020-3015227

Tentative Order

By the Commission:

The Commission's regulations at 52 Pa. Code § 54.40(a) state that an Electric Generation Supplier (EGS) license will not be issued or remain in force until the licensee furnishes a bond or other security approved by the Commission. In addition, 52 Pa. Code § 54.40(d) states that the maintenance of an EGS license is contingent on the licensee providing proof to the Commission that a bond or other approved security in the amount directed by the Commission has been obtained.

Each EGS must file an original bond, letter of credit, continuation certificate, amendment, or other approved financial instrument with Rosemary Chiavetta, Secretary, Pennsylvania Public Utility Commission, 400 North Street, Harrisburg, PA 17120, prior to the EGS's current security expiration date. Each financial instrument must be an original document that displays a "wet" signature or digital signature, preferable in blue ink, and displays a "raised seal" or original notary stamp. The name of the principal on the original financial instrument must match exactly with the name that appears on the EGS's license issued by the Commission.

Failure to file before the financial security's expiration date may cause Commission staff to initiate a formal proceeding that may lead to the following: cancellation of

each company’s electric supplier license, removal of each company’s information from the Commission’s website and notification to all electric distribution companies, in which each company is licensed to do business, of the cancellation of the license.

While we recognize that the COVID-19 pandemic has provided some challenges related to the continuance of normal business operations, it is imperative that the Commission have an approved financial security in place with each EGS to ensure compliance with 52 Pa. Code § 54.40(d). On March 25, 2020, Commission staff issued an EGS Financial Security Filing Guidance Memo (Guidance Memo) that stated the following:

- Where practical, EGSs should file an original bond, letter of credit, continuation certificate, amendment, or other financial instrument. These original financial instruments should display “wet” signatures or digital signatures, preferably in blue ink, and display a “raised seal” or original notary stamp.
- EGSs should email a copy of the original financial instrument directly to Secretary Chiavetta at rchiavetta@pa.gov. Secretary Chiavetta has waived the restriction on emailed filings that contain confidential and proprietary material. As such, financial security instruments will be permitted to be filed by email for the duration of the Commission’s work from home order.
- If an EGS is unable to acquire a “raised seal” or original notary stamp on the financial security during the pendency of the COVID-19 emergency, the Secretary’s Bureau will not reject the financial security.
- If an EGS has been granted a reduction in its financial security, and it is time to renew the annual reduction, please file an original annual compliance

filing with the Secretary’s Bureau and a copy via email at rchiavetta@pa.gov.

Please note that the requirement that EGSs maintain a valid financial security on file with the Commission, remains in effect.

Be advised that emailed financial security instruments—after review and acceptance of the Secretary’s Bureau and the Bureau of Technical Utility Services—will be provisionally approved by the Commission until Commission staff resume working in the Keystone Building. EGSs must still mail the original bond with original signatures and notary stamp as per the Commission’s normal practice.

On July 27, 2020, the Commission issued a Secretarial Letter which modified certain filing and service requirements.¹ Specifically, this Secretarial Letter amended the Emergency Order issued on March 20, 2020, at Docket No. M-2020-3019262 regarding the filing of certain confidential documents. At the time the Emergency Order was issued, the Commission did not have access to its physical location. However, since that time the Commission has secured limited access to its place of business. Under these circumstances and consistent with the authority provided to the Secretary by the Emergency Order, the Secretarial Letter requires that confidential filings made pursuant to 52 Pa. Code § 54.40(a) (EGS financial securities), must be filed with the Secretary by overnight delivery and are not to be filed electronically with the Secretary.

As of September 4, 2020, each EGS listed in the Supplier Table below has not provided proof to the Commission that it has a bond or other approved security in the amount or language directed by the Commission, to replace a bond which is expired or which is non-compliant with Commission regulations.

*Taking title to electricity

As part of its EGS license validation procedures, the Commission’s Bureau of Technical Utility Services sent a 90-day Security Renewal Notice email to each entity in the Supplier Table above stating that original documentation of a bond, or other approved security in the amount or language directed by the Commission, must be filed within 30 days prior to each entity’s security expiration date. None of the companies listed in the Supplier Table provided the required documentation.

Based on the above facts, we tentatively conclude that the EGSs listed in the Supplier Table are not in compliance with 52 Pa. Code § 54.40(a) and (d) and therefore it is appropriate to initiate the cancellation process for the EGS license of each company listed in the Supplier Table, without the necessity of a formal complaint, as being in the public interest; *Therefore,*¹

¹ Docket No. M-2020-3019262

It Is Ordered That:

1. Cancellation of the Electric Generation Supplier License of each company listed in the Supplier Table is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, the Bureau of Investigation & Enforcement, all electric distribution companies, all of the Electric Generation Suppliers in the Supplier Table and publish a copy of this Tentative Order in the *Pennsylvania Bulletin* with a 30-day comment period.

3. The Secretary serve a copy of this Tentative Order upon the Pennsylvania Department of Revenue—Bureau of Compliance, Business License Clearance Division.

4. Absent the filing of adverse public comment or the filing of an approved security within 30 days after publication in the *Pennsylvania Bulletin*, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary.

5. Upon entry of the Final Order described in Ordering Paragraph No. 4 above, each company listed in the Supplier Table will be stricken from all active utility lists maintained by the Commission's Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, removed from the Commission's website, and notifications be sent to all electric distribution companies in which the Electric Generation Suppliers are licensed to do business.

6. Upon entry of the Final Order described in Ordering Paragraph No. 4, each electric distribution company in which the Electric Generation Suppliers are licensed to do business, shall return the customers of the Electric Generation Suppliers to default service.
