### Fiscal Year 2020-2021 Annual Plan for Awarding Grants Under the Pennsylvania Agricultural Fair Act

This notice presents the Fiscal Year (FY) 2020-2021 Annual Plan (Annual Plan) of the Department of Agriculture (Department) for the administration of the grant

program authorized under the Pennsylvania Agricultural Fair Act (act) (3 P.S. §§ 1501—1508.1). It prescribes how the available funds appropriated by the General Assembly shall be distributed. This Annual Plan is authorized by section 8(a) of the act (3 P.S. § 1508(a)), has been prepared with the assistance and advice of the Agricultural Fair Advisory Committee (Committee), and was approved by that Committee at its September 21, 2020, meeting.

The act authorizes the Department to make grants to organizations conducting eligible agricultural fairs, State-wide agricultural organizations which contribute to the development of agriculture and agribusiness and to eligible agricultural youth groups for support of their programs.

Funds appropriated by the General Assembly to fund the act in FY 2020-2021 shall be dispersed by the Department as follows, on a funds-available basis, in the following order of priority:

1. First priority shall be given to grants to finance a portion of a fair's operating costs. These costs include, but are not limited to, the cost of exhibiting agribusiness products, materials and equipment, conducting agricultural or agribusiness educational activities and demonstrations, and awarding premiums to contest and exhibit winners at the agricultural fair. For these grants, the maximum payment shall be as allowed for each Class Fair under section 5(1)(i)(A) of the act (3 P.S. § 1505(1)(i)(A)). These maximum payments range from \$2,500 to \$14,000, depending on the Class Fair involved.

2. Second priority shall be given to grants to finance a portion of the agricultural premiums identified in section 5(1)(i)(B) of the act. For these grants, the maximum payment shall not exceed \$15,000.

3. Third priority shall be given to grants to reimburse a county agricultural society, or an independent agricultural society, that conducts harness horse racing at its annual agricultural fair, other than races for colts and fillies 2 and 3 years of age, in an amount equal to that used during the annual agricultural fair as purse money for harness horse racing, track and stable maintenance, starting gate rental and the cost of harness horse racing officials during the annual fair. For these grants, the maximum amount of reimbursement shall be as allowed under section 5(1)(iii) of the act. This maximum amount is \$13,000, at least \$4,000 of which must be used to reimburse purse money.

4. Fourth priority shall be given to grants to reimburse a county agricultural society, or an independent agricultural society, that conducts harness horse racing for 2-year-old and 3-year-old colts and fillies at its annual agricultural fair. For these grants, the maximum amount of reimbursement shall be as allowed under section 5(1)(iv) of the act. This maximum amount is \$7,600.

5. Fifth priority shall be given to grants to reimburse a Statewide agricultural organization that conducts an agricultural fair and is otherwise eligible for grants under section 5(2) of the act, for up to \$2,000 of its fair's operating expenses (including premium payments) on a dollar-for-dollar basis, and for 50% of all additional premium costs that are not included in that initial dollar-for-dollar reimbursement, up to a maximum amount of \$10,000. The total maximum payment shall not exceed \$12,000.

6. Sixth priority shall be given to grants to countywide or Statewide 4-H and Future Farmers of America (FFA) or combined FFA and Future Homemakers of America units of boys and girls under 21 years of age that are eligible for grants under section 5(3) of the act. Grants shall be awarded in accordance with the requirements of that provision of the act.

a. The purpose of the act is to make funds available to encourage the further development and improvement of this Commonwealth's agricultural fairs, and to continue the contribution of agricultural fairs to agriculture and agribusiness by encouraging related careers, fostering agricultural production and agricultural product improvements, and promoting increased investments in agriculture. This Commonwealth's agricultural fairs also enrich the life of the community by showcasing agricultural and agribusiness achievements, offering recreational opportunities and promoting tourism. For these reasons, the Department encourages those agricultural youth groups that are eligible for grants under section 5(3) of the act to engage in projects and activities that are conducted at agricultural fairs or that are of direct benefit to agricultural fairs.

b. The Department will award grants to the agricultural youth groups previously described as follows:

i. For actual expenses incurred for activities which contribute to the advancement of agriculture or agribusiness by a 4-H Youth group, a payment which will be calculated according to the following formula, under authority of section 5(3) of the act:

*Tier 1:* \$2,000 for total enrollment of up to 1,000 members plus \$1.50 for each traditional member and \$1 for each school enrichment/special interest member.

*Tier 2:* \$2,500 for total enrollment of 1,001 to 2,000 members plus \$1.50 for each traditional member and \$1 for each school enrichment/special interest member.

*Tier 3:* \$3,000 for total enrollment of 2,001 to 3,000 members plus \$1.50 for each traditional member and \$1 for each school enrichment/special interest member.

*Tier 4:* \$3,500 for total enrollment of 3,001+ members plus \$1.50 for each traditional member and \$1 for each school enrichment/special interest member, a maximum reimbursement of \$9,000.

ii. For actual expenses incurred for activities which contribute to the advancement of agriculture or agribusiness by FFA Youth groups, a payment which will be calculated using the following formula, under authority of section 5(3) of the act:

*Tier I:* County FFA Organizations with 100 members or less will receive base funding of \$1,000 with an additional \$4 per member.

*Tier II:* County FFA Organizations with 101 to 210 members inclusive will receive a \$2,000 base funding with an additional \$2 per member.

*Tier III:* County FFA Organizations with 211 members or more will receive funding of \$2,000 with an additional \$4 per member for every member over 210.

7. Any funds remaining after the previous grants have been awarded shall be utilized for capital improvement as provided in section 5(1)(ii) of the act.

Given the ongoing novel coronavirus (COVID-19) pandemic, the Department advises that the amount of funding appropriated for dispersal in accordance with the act and this Annual Plan may ultimately be less than in previous years. Also, in the event subsequent COVID-19-related legislation changes available funding amounts or requires that expenditures of available funding be reprioritized, the Department will publish a revised version of this Annual Plan that is consistent with that legislation.

The Department will endeavor to disburse the previous payments at the earliest date practicable.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 1

#### Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environ- mental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of

the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

### PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources

with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the Regional Office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

**Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.**

The Plan Approval also

allows the installation and initial temporary operation of: two (2) 10,400 SCFM afterburners and spray coolers; one (1) 63,300 SCFM Circulating Bed Scrubber; one (1) 70,900 SCFM baghouse; four (4) electric oxide production sources; four (4) 13,340 SCFM baghouses; one (1) 2,000 SCFM baghouse; one (1) 2,450 SCFM baghouse; three (3) 1,200 SCFM bin vent collectors; one (1) unloading source controlled by a 1,300 baghouse; one (1) packaging source; one (1) 1,900 SCFM baghouse; one (1) 277 ton hydrated lime silo; one (1) 507 SCFM bin vent filter; one (1) 386 tons spent hydrated lime silo and truck loading source; one (1) 1,229 SCFM baghouse; and the continued use of the facility paved roadway. The facility is located in Smith Township, **Washington County**.

Facility-wide potential to emit after completion of the project shall not equal or exceed 37.0 tons of nitrogen oxides (NO<sub>x</sub>), 28.0 tons of carbon monoxide (CO), 75.0 tons of particulate matter less than 10 microns in diameter (PM<sub>10</sub>), 74.0 tons of particulate matter less than 2.5 microns in diameter (PM<sub>2.5</sub>), 249.7 tons of sulfur dioxide (SO<sub>2</sub>), 5.0 tons of volatile organic compounds (VOC), and 1.0 ton of total hazardous air pollutants (HAPs). Both roasters will be controlled by one (1) Circulating Bed Dry Scrubber and one (1) baghouse combined. Control of the four (4) oxide production sources will be through two (2) baghouses each as well as good operating practices. The proposed controls for the three (3) raw material silos and one (1) hydrated lime silo are bin vent filters. Control for raw silo unloading, packaging, and spent hydrated lime silo and truck loading is one (1) baghouse. The existing paved road will be controlled via water truck and sweepers as needed. All new sources were evaluated for compliance with best available technology (BAT) requirements. Grand-fathered sources not subject BAT and their proposed controls have been evaluated for technical stringency.

The authorization is subject to State as well as Federal National Emission Standards for Hazardous Air Pollutants regulations under 40 CFR Part 63 Subpart YYYYYY. This project was evaluated for, but does not trigger the requirements of, 25 Pa. Code Chapter 127 Subchapter D and 40 CFR Part 52.21 Prevention of Significant Deterioration requirements. **MINING ACTIVITY NPDES DRAFT PERMITS**

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

*Effluent Limits for Coal Mining Activities*

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

\*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

*Effluent Limits for Noncoal Mining Activities*

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96). The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. ## PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania*

*Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30-days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

**LAND RECYCLING AND ENVIRONMENTAL REMEDIATION**

**UNDER ACT 2, 1995  
PREAMBLE 2**

**The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).**

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated

substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and

cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

### PREAMBLE 2

The following plans and reports were submitted under the Storage Tank and Spill Prevention Act (35 P.S. §§ 6021.101—6021.2104).

Provisions of 25 Pa. Code Chapter 245, Subchapter D, Administration of the Storage Tank and Spill Prevention Program, require the Department of Environmental Protection (DEP) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. The remedial action plan also provides results of studies performed and data collected to support the remedial action and a description of postremediation care requirements. A remedial action completion report is submitted to document cleanup of a release of a regulated substance at a site to the selected remediation standard. A remedial action completion report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or non-residential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected.

## DEPARTMENT OF HUMAN SERVICES

### Medical Assistance Quality Strategy for the Commonwealth

The Department of Human Services (Department) is making available for public review and comment the Medical Assistance (MA) and Children's Health Insurance Program (CHIP) Managed Care Quality Strategy for the Commonwealth.

#### *Background*

The Centers for Medicare & Medicaid Services (CMS) requires states to draft and implement a written quality strategy for assessing and improving the quality of health care and services furnished by managed care organizations that have a contract with the Department (see 42 CFR 438.340 (relating to managed care State quality strategy)). As a result, the Department has developed the MA and Children's Health Insurance Managed Care Quality Strategy for the Commonwealth (Quality Strategy), which discusses the various quality improvement initiatives the Department has implemented to increase the quality of care for individuals receiving services through its managed care programs. The Quality Strategy for the Commonwealth is not intended to comprehensively describe all the activities that the Department undertakes to assure the quality of care rendered to individuals who are receiving services through managed care programs.

The Department is required by 42 CFR 438.340(c)(2) to update its managed care quality strategy as needed. The updates included in this version of the Quality Strategy reflect developments in the Community HealthChoices program, changes made to improve alignment among the various managed care programs, new value-based pur-

chasing, targets, and updated goals, objectives, and quality improvement initiatives. All Federal regulatory references have been updated to refer to the current version of the Medicaid managed care final rule.

#### *Discussion*

The Quality Strategy will be used to assure that the contractors that are implementing the Department's managed care programs are in compliance with the terms of their agreements with the Department and have committed resources to meet the following: to perform monitoring and ongoing quality improvement; to contribute to the improvement of health for the populations they serve; and to incorporate new programmatic changes to assure that the individuals they serve have timely access to high-quality care.

Across the Department, the focus is on increasing alignment among the various managed care programs, moving toward compliance with Federal law by reporting on the CMS Core Set by 2024, and improving the provision of services to Pennsylvanians who are especially vulnerable, including individuals with disabilities, individuals with serious persistent mental illness and individuals with opioid use disorder.

The Office of Medical Assistance Programs' (OMAP) key initiatives continue to be centered around value-based purchasing, and include reducing preventable hospital admissions and readmissions, improving coordination and integration between physical health and behavioral health managed care programs, and incentivizing hospitals to follow-up on opioid-related emergency department admissions. OMAP is also encouraging expanded use of community-based care management teams, as well as continued implementation of the Patient Centered Medical Home model and the development of a Perinatal Quality Collaborative.

The Office of Mental Health and Substance Abuse Services' key quality improvement initiatives include value-based purchasing arrangements, expansion of telepsychiatry services, implementation of a Section 1115 Demonstration Waiver to provide substance use disorder treatment services, suicide prevention and tobacco cessation initiatives, and further expansion of the evidence-based programs available for Behavioral HealthChoices consumers.

The Office of Long-Term Living (OLTL) has implemented Community HealthChoices, a Statewide mandatory managed care program. Eligible individuals include: (i) adults that are eligible for MA and need long-term services and supports; and (ii) individuals who are dually eligible for MA and Medicare. As this program matures, OLTL will focus on developing value-based purchasing models for home and community-based services and will use Performance Improvement Programs to reduce potentially avoidable nursing facility admissions.

The Office of CHIP recently transitioned to become a part of OMAP. As a result of this transition, CHIP will be making changes in its policies and procedures to better align with the procedures and resources of MA, allowing individuals to easily transition between the CHIP and MA Programs.

Finally, key quality initiatives for the Adult Community Autism Program (ACAP) include increasing the number of community-based services available for individuals who receive services through ACAP, improving coordination across multiple systems that provide support for adults

with autism and improving the service delivery system to address the diversity of needs of individuals who are diagnosed with autism.

The MA Quality Strategy for the Commonwealth can be viewed at <http://www.healthchoices.pa.gov/providers/resources/publications/physical/index.htm>.

#### Public Comment

Interested persons are invited to submit comments regarding the MA Quality Strategy for the Commonwealth to the Department at RA-PWQualityStrategy@pa.gov. Comments received within 30 days must be reviewed and considered before the Quality Strategy is submitted to CMS for review (see 42 CFR 438.340(c)(1)).

Persons with a disability who require an auxiliary aid or service may submit comments using the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users).
