READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published weekly. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. It is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations, Statewide court rules, and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, rescission, repeal or emergency action, must be published in the *Pennsylvania Bulletin*.

The following documents are published in the *Pennsylvania Bulletin*: Governor's Executive Orders; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or rescind regulations must first publish in the *Pennsylvania Bulletin* a Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. A Final Rulemaking must be published in the *Pennsylvania Bulletin* before the changes can take effect. If the agency wishes to adopt changes to the Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies, Statewide court rules and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes when they are adopted. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code* § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government.

How to Find Rules and Regulations

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacodeandbulletin.gov.

Source Notes give the history of regulations. To see if there have been recent changes not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

A quarterly List of *Pennsylvania Code* Sections Affected lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

The *Pennsylvania Bulletin* is available at www.pacodeandbulletin.gov.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires the Governor's Budget Office to prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions and authorities receiving money from the State Treasury. The fiscal note states whether the action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions. The fiscal note is required to be published in the *Pennsylvania Bulletin* at the same time as the change is advertised.

A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; and (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years. In item (8) the recommendation, if any, made by the Secretary of the Budget is published with the fiscal note. "No fiscal impact" means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended. See 4 Pa. Code Chapter 7, Subchapter R (relating to fiscal notes).

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish information except as provided by 1 Pa. Code § 3.44:

§ 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the [Legislative Reference] Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

THE GOVERNOR

Title 4—ADMINISTRATION

PART I. GOVERNOR'S OFFICE

[4 PA. CODE CH. 7A]

[EXECUTIVE ORDER NO. 2016-06, AS AMENDED]

Enterprise Information Technology Governance

October 27, 2020

Whereas, Commonwealth agencies under the Governor's jurisdiction (the "Enterprise") invest significant financial resources in obtaining, creating, securing, and supporting the Commonwealth's information technology ("IT") infrastructure and information systems; and

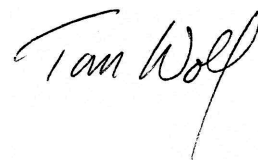

Whereas, it is essential that the Commonwealth utilize a central IT organization to govern, evaluate, coordinate, and improve Enterprise and agency IT planning, research, security, policy, governance, project prioritization, investment, and effectiveness; and

Whereas, Sections 501 and 502 of the Administrative Code of 1929, 71 P.S. §§ 181, 182, require administrative departments and the several independent and departmental administrative boards and commissions to coordinate their work and activities with other departments, boards, and commissions; and

Whereas, IT investments and development efforts should be prioritized and coordinated across Enterprise agencies to maximize efficiency and cost effectiveness, by enhancing information sharing and system compatibility through standardization, reducing expenditures for research and development, and enabling volume hardware, software and service purchases; and

Whereas, the Governor's Office of Administration ("OA") has confirmed that an integrated IT strategy will improve organizational and operational efficiency, streamline data collection and data sharing, and enhance the security posture of the Commonwealth.

Now, Therefore, I, Tom Wolf, Governor of the Commonwealth of Pennsylvania, by virtue of the authority vested in me by the Constitution of the Commonwealth of Pennsylvania and other laws do hereby establish an Enterprise IT governance structure within OA, and order and direct as follows:

Governor

Fiscal Note: GOV-2016-06 (Amended). No fiscal impact; (8) recommends adoption.

RULES AND REGULATIONS

Title 58—RECREATION

PENNSYLVANIA GAMING CONTROL BOARD

[58 PA. CODE CH. 685a]

Down Under Blackjack; Table Game Rules of Play

The Pennsylvania Gaming Control Board (Board), under the general authority in 4 Pa.C.S. § 1202(b)(30) (relating to general and specific powers) and the specific authority in 4 Pa.C.S. § 13A02(1) and (2) (relating to regulatory authority), adds Chapter 685a (relating to Down Under Blackjack) to read as set forth in Annex A.

Purpose of this Final-Form Rulemaking

This final-form rulemaking adds a new table game to the compliment of games available for play in this Commonwealth.

Explanation

Section 685a.1 (relating to definitions) contains the definitions used throughout the chapter. Section 685a.2 (relating to Down Under Blackjack table; Masque Card Reader device; physical characteristics; inspections) contains the physical characteristics of the table layout and associated equipment. Section 685a.3 (relating to cards; number of decks; value of cards) details the number of cards and decks used to play the game as well as the value assigned to certain cards. Section 685a.4 (relating to opening of the table for gaming) addresses how the dealer is to open the table game for play.

Section 685a.5 (relating to shuffle and cut of the cards) details how the cards are to be shuffled and cut. Section 682a.6 (relating to wagers) outlines the permissible wagers players may place during a round of play.

Section 685a.7 (relating to procedure for dealing the cards; completion of each round of play) addresses how the cards are to be dealt and the number of cards dealt to each player. In addition, this section details the process of placing cards in the reader and placement in specified areas of the table and determination of winning hands. Sections 685a.8, 685a.9 and 685a.10 (relating to Insurance Wager; Double Down Wager; and splitting pairs) set forth various optional wagers which a player may make during the course of play of a game. Section 685a.11 (relating to payout odds) outlines the permissible payout odds for winning wagers including for the basic game and the Match-the-Dealer side Wager. Section 685a.12 (relating to irregularities) addresses how a dealer is to handle irregularities during play.

In Down Under Blackjack, the approved payout tables in § 682a.11 associated with the base game have a hold percentage of between 0.43% and 0.49% for required wagers. For optional Match-the-Dealer Wagers, the hold percentage ranges from 3.67% to 4.06%.

Response to Comments

No comments were received from the general public on the proposed rulemaking. Comments were received from the Independent Regulatory Review Commission (IRRC) on November 21, 2018. The comments were related to minor clarity issues, and all recommended changes were made in this final-form rulemaking.

Fiscal Impact

Commonwealth.

The Board does not expect that this final-form rulemaking will have a fiscal impact on the Board or other Commonwealth agencies. Updates to Rules Submission forms and internal control procedures will be reviewed by existing Board staff.

Political subdivisions.

This final-form rulemaking will not have fiscal impact on political subdivisions of this Commonwealth.

Private sector.

This final-form rulemaking will provide certificate holders with an additional table game option. If a certificate holder decides to offer Down Under Blackjack within the licensed facility, the certificate holder will be required to train their dealers on the rules of play and purchase new equipment—specifically table layouts corresponding to the game and wagers offered and a Masque Card Reader device. Costs incurred to train employees or purchase/lease equipment should be offset by the proceeds of gaming.

General public.

This final-form rulemaking will not have fiscal impact on the general public.

Paperwork Requirements

If a certificate holder selects different options for the play of table games, the certificate holder will be required to submit an updated Rules Submission form reflecting the changes. These forms are available on the Board's public web site and submitted to Board staff electronically.

Effective Date

This final-form rulemaking will become effective upon final-form publication in the *Pennsylvania Bulletin*.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)), the Board submitted a copy of the proposed rulemaking, published at 48 Pa.B. 5860 (September 22, 2018) and a copy of the Regulatory Analysis Form to IRRC and to the Chairpersons of the House Gaming Oversight Committee and the Senate Community, Economic and Recreational Development Committee.

§ 685a.2. Down Under Blackjack table; Masque Card Reader device; physical characteristics; inspections.

(a) Down Under Blackjack shall be played at a table having betting positions for no more than six players on one side of the table and a place for the dealer on the opposite side of the table.

(b) The layout for a Down Under Blackjack table shall be submitted to the Bureau of Gaming Operations and approved in accordance with § 601a.10(a) (relating to approval of table game layouts, signage and equipment) and contain, at a minimum:

(1) The name or logo of the certificate holder.

(2) A separate betting area designated for the Bet Wager for each player.

(3) Three rectangular areas in front of the dealer's table position where the dealer's hand will be placed after the hole card's value range is determined using the Masque Card Reader device. The three areas shall be inscribed with the following:

(i) Small, 2-3-4-5

(ii) Medium, 6-7-8-9

(iii) Large, 10-J-Q-K-A

(4) The following inscriptions:

(ii) Insurance pays 2 to 1.

(iii) Dealer shall draw to 16 and stand on all 17s or other similar language approved by the Executive Director in accordance with § 601a.10(a).

(iv) Surrender is not available on a Down Under Blackjack table or other similar language. If the language is not inscribed on the layout, a sign specifying that surrender is not available shall be posted at each Down Under Blackjack table.

If the payout odds are not inscribed on the layout, a sign identifying the payout odds or amounts for all permissible wagers shall be posted at each Down Under Blackjack table.

(c) Each Down Under Blackjack table must have a drop box and tip box attached on the same side of the table as, but on opposite sides of, the dealer, as approved by the Bureau of Casino Compliance in accordance with § 601a.10(g). The Bureau of Casino Compliance may approve an alternative location for the tip box when a card shuffling device or other table game equipment prevents the placement of the drop box and tip box on the same side of the gaming table as, but on opposite sides of, the dealer.

(d) Each Down Under Blackjack table must have a Masque Card Reader device attached to the top of the dealer's side of the table. The floorperson assigned to the Down Under Blackjack table shall inspect the Masque

Card Reader device at the beginning of each gaming day to ensure that there has been no tampering with the device and that it is in proper working order.

(e) Each Down Under Blackjack table must have a discard rack securely attached to the top of the dealer's side of the table. The height of each discard rack must either:

(1) Equal the height of the cards, stacked one on top of the other, in the total number of decks that are to be used in the dealing shoe at that table.

(2) Be taller than the height of the total number of decks being used if the discard rack has a distinct and clearly visible mark on its side to show the exact height for a stack of cards equal to the total number of cards in the number of decks to be used in the dealing shoe at that table.

§ 685a.3. Cards; number of decks; value of cards.

(a) Except as provided in subsection (b), Down Under Blackjack shall be played with either a four-deck, five-deck, six-deck or eight-deck batch of cards that are identical in appearance and at least one cover card. The decks shall consist of 52 cards. The cards may be dealt from a multi-deck shoe or a continuous shuffler.

(b) If an automated card shuffling device is utilized, other than a continuous shuffler, Down Under Blackjack shall be played with two batches of cards in accordance with the following requirements:

(1) The cards shall be separated into two batches with four, five, six or eight decks included in each batch, with each batch containing the same number of decks.

(2) The cards in each batch must be of the same design but the backs of the cards in one batch must be of a different color than the cards in the other batch.

(3) One batch of cards shall be shuffled and stored in the automated card shuffling device while the other batch is being used to play the game.

(4) Both batches of cards shall be continuously alternated in and out of play, with each batch being used for every other dealing shoe.

(5) The cards from only one batch shall be placed in the discard rack at any given time.

(c) The decks of cards opened for use at a Down Under Blackjack table shall be changed at least once every 24 hours.

(d) The value of the cards shall be as follows:

(1) Any card from 2 to 10 shall have its face value.

(2) Any jack, queen or king shall have a value of 10.

(3) An ace shall have a value of 11 unless that value would give a player a score in excess of 21 or the dealer a score in excess of 22, in which case the ace shall have a value of 1.

(e) The dealer's hole card, after the cards are dealt and after placement in the Masque Card Reader device, will be assigned one of the following value ranges prior to being exposed to the players and prior to any action on the hand:

(1) Small, if the value of the hole card is either 2, 3, 4 or 5, indicated by a blue light on the Masque Card Reader device.

(2) Medium, if the value of the hole card is either 6, 7, 8 or 9, indicated by a red light on the Masque Card Reader device.

(3) Large, if the value of the hole card is either 10, jack, queen, king or ace, indicated by a yellow light on the Masque Card Reader device.

§ 685a.4. Opening of the table for gaming.

(a) After receiving the decks of cards at the table, the dealer shall inspect the cards for any defects. The floormperson assigned to the table shall verify the inspection.

(b) After the cards are inspected, the cards shall be spread out face up on the table for visual inspection by the first player to arrive at the table. The cards shall be spread in horizontal fan shaped columns by deck according to suit and in sequence.

(c) After the first player arriving at the table has been afforded an opportunity to visually inspect the cards, the cards shall be turned face down on the table, mixed thoroughly by a washing of the cards and stacked. Once the cards have been stacked, the cards shall be shuffled in accordance with § 685a.5 (relating to shuffle and cut of the cards).

(d) If an automated shuffling device is utilized, other than a continuous shuffler, all the decks in one batch of cards shall be spread for inspection, mixed, stacked and shuffled in accordance with subsections (a)—(c) separate from the decks in the other batch of cards.

(e) If the decks of cards received at the table are preinspected and reshuffled in accordance with § 603a.16(u) or (v) (relating to cards; receipt, storage, inspection and removal from use), subsections (a), (c) and (d) do not apply.

§ 685a.5. Shuffle and cut of the cards.

(a) Immediately prior to commencement of play, unless the cards were reshuffled in accordance with § 603a.16(u) or (v) (relating to cards; receipt, storage, inspection and removal from use), after each shoe of cards is dealt or when directed by a floormperson or above, the dealer shall shuffle the cards, either manually or by use of an automated card shuffling device, so that the cards are randomly intermixed. Upon completion of the shuffle, the dealer or device shall place the decks of cards in a single stack. The certificate holder may use an automated card shuffling device which, upon completion of the shuffling of the cards, inserts the stack of cards directly into a dealing shoe.

(b) After the cards have been shuffled and stacked, the dealer shall offer the stack of cards to be cut, with the backs facing away from the dealer, to the player determined under subsection (c). If no player accepts the cut, the dealer shall cut the cards.

(c) The cut of the cards shall be offered to players in the following order:

(1) The first player arriving at the table, if the game is just beginning.

(2) The player on whose betting area the cover card appeared during the last round of play.

(3) If the cover card appeared on the dealer's hand during the last round of play, the player at the farthest position to the right of the dealer. If this player refuses, the offer to cut the cards shall rotate to each player in a counterclockwise manner.

(4) If the reshuffle was initiated at the direction of the floorperson or above, the player at the farthest position to the right of the dealer. If this player refuses, the offer to cut the cards shall rotate to each player in a counterclockwise manner.

(d) The player or dealer making the cut shall place the cover card in the stack at least ten cards from the top or bottom of the stack. Once the cover card has been inserted, the dealer shall take all cards on top of the cover card and place them on the bottom of the stack. The dealer shall then insert the cover card in the stack at a position at least 1/4 of the way in from the bottom of the stack. The stack of cards shall then be inserted into the dealing shoe for commencement of play.

(e) After the cards have been cut and before the cards have been placed in the dealing shoe, a floorperson or above may require the cards to be recut if the floorperson determines that the cut was performed improperly or in any way that might affect the integrity or fairness of the game. If a recut is required, the cards shall be recut either by the player who last cut the cards or by the next person entitled to cut the cards, as determined under subsection (c). The stack of cards shall then be inserted into the dealing shoe for commencement of play.

(f) A reshuffle of the cards in the shoe shall take place after the cover card is reached in the shoe, as provided in § 685a.7(d) (relating to procedure for dealing the cards; completion of each round of play), except that a floorperson may determine that the cards should be reshuffled after any round of play.

(g) If there is no gaming activity at a Down Under Blackjack table which is open for gaming, the cards shall be removed from the dealing shoe and the discard rack and spread out on the table face down unless a player requests that the cards be spread face up on the table. After the first player arriving at the table is afforded an opportunity to visually inspect the cards, the procedures in § 685a.4 (relating to opening of the table for gaming) and this section shall be completed.

(h) A certificate holder may utilize a dealing shoe or other device that automatically reshuffles and counts the cards provided that the device is submitted to the Bureau of Gaming Laboratory Operations and approved in accordance with § 461a.4 (relating to submission for testing and approval) prior to its use in the licensed facility. If a certificate holder is utilizing the approved device, subsections (b)—(g) do not apply.

§ 685a.6. Wagers.

(a) Wagers at Down Under Blackjack shall be made by placing value chips, plaques or other Board-approved table gaming wagering instruments on the appropriate areas of the Down Under Blackjack layout. Verbal wagers accompanied by cash may be accepted provided that they are confirmed by the dealer and the cash is expeditiously converted into value chips or plaques.

(b) After the cards have been shuffled as required by § 685a.5 (relating to shuffle and cut of the cards), a certificate holder may prohibit any patron, whether seated at the gaming table or not, who does not make a wager on a given round of play from placing a wager on the next round of play and any subsequent round of play at that gaming table until either:

(1) The certificate holder chooses to permit the player to begin wagering again.

(2) A reshuffle of the cards has occurred.

(c) All wagers, except an Insurance Wager under § 685a.8 (relating to Insurance Wager), a wager to double down under § 685a.9 (relating to Double Down Wager) or a wager that splits pairs under § 685a.10 (relating to splitting pairs), shall be placed prior to the first card being dealt for each round of play. A player may not handle, remove or alter any wagers that have been made until a decision has been rendered and implemented with respect to that wager.

(d) A player shall place a Bet Wager to participate in a round of play and compete against the dealer's hand.

(e) If specified in its Rules Submission under § 601a.2 (relating to table games Rules Submissions), a certificate holder may offer to each player who placed a Bet Wager in accordance with subsection (d), the option of placing a Match-the-Dealer Wager. The Match-the-Dealer Wager may only be offered at Down Under Blackjack tables using a six-deck or eight-deck batch or batches of cards.

(f) The certificate holder shall specify in its Rules Submission under § 601a.2 the number of adjacent boxes on which a player may place a Bet Wager in one round of play.

§ 685a.7. Procedure for dealing the cards; completion of each round of play.

(a) All cards shall be dealt from a dealing shoe which must be located on the table in a location approved by the Bureau of Casino Compliance in accordance with § 601a.10(g) (relating to approval of table game layouts, signage and equipment). Once the procedures under § 685a.5 (relating to shuffle and cut of the cards) have been completed, the stacked cards shall be placed in the dealing shoe by the dealer or by an automated card shuffling device.

(b) Each card shall be removed from the dealing shoe with the hand of the dealer that is closest to the dealing shoe and placed on the appropriate area of the layout with the opposite hand. The dealer may deal cards to the two betting positions closest to the dealing shoe with the same hand.

(c) After each full batch of cards is placed in the shoe, the dealer shall remove the first card and place it in the discard rack. Each new dealer who comes to the table shall also remove one card and place it in the discard rack before dealing any cards to the players.

(d) If the cover card appears as the first card in the dealing shoe at the beginning of a round of play or appears during play, the cover card shall be removed and placed to the side and the hand will be completed. The dealer shall then:

(1) Collect and reshuffle the cards by removing the cards remaining in the shoe and placing them in the discard rack to ensure that no cards are missing.

(2) Shuffle the cards so that they are randomly intermixed.

(e) After all Blackjack and optional Match-the-Dealer Wagers have been placed, the dealer shall, starting with the player farthest to the dealer's left and continuing around the table in a clockwise manner, deal the cards as follows:

(1) One card face up to each box on the layout in which a Bet Wager is contained.

(2) One card face up to the dealer.

(3) A second card face up to each box in which a Bet wager is contained.

(4) A second card face down to the dealer.

(f) Immediately after the second card is dealt to each player and the dealer, but prior to any additional cards being dealt or before the dealer's hole card is placed in the Masque Card Reader device, the dealer shall, starting with the player farthest to the dealer's right and continuing around the table in a counterclockwise direction, settle the player's optional Match-the-Dealer Wagers by collecting all losing wagers and paying all winning wagers. If a player placed a Match-the-Dealer Wager and either or both of the player's initial two cards match the rank of the dealer's up card, the dealer shall pay the winning Match-the-Dealer Wager in accordance with § 685a.11(c) (relating to payout odds). Any card with a face value of 10 or a point value of 10 (a jack, queen or king) shall only match an identical card without regard to value.

(g) Immediately after the dealer settles the optional Match-the-Dealer Wagers, if the dealer's first card is an ace, the dealer shall offer the Insurance Wager or even money in accordance with § 685a.8 (relating to Insurance Wager).

(h) After the procedures in subsection (g) have been completed, if applicable, the dealer shall determine the value range of the dealer's hole card. The dealer shall insert the hole card into the Masque Card Reader device by moving the card face down on the layout without exposing it to anyone at the table, including the dealer. If the dealer's hole card is in the Small value range (2-3-4-5), the Masque Card Reader device will illuminate a blue light. If the dealer's hole card is in the Medium value range (6-7-8-9), the Masque Card Reader device will illuminate a red light. If the dealer's hole card is in the Large value range (10-J-Q-K-A), the Masque Card Reader device will illuminate a yellow light. The dealer will then place his hand in the corresponding area on the layout as described in § 685a.2(b)(3) (relating to Down Under Blackjack table; Masque Care Reader device; physical characteristics; inspections). If the dealer's first card and hole card are both in the Large value range, the dealer's hole card shall be exposed to the players prior to the beginning of action. If the dealer has a Blackjack, additional cards may not be dealt and if a player:

(1) Has a Blackjack, the dealer shall return the player's Bet Wager and pay out any Insurance Wager, if applicable.

(2) Does not have a Blackjack, the dealer shall collect the player's Bet Wager and pay out any Insurance Wager, if applicable.

(i) If the dealer's hole card did not give the dealer Blackjack, the dealer shall start with the player farthest to the dealer's left and continue around the table in a clockwise direction and if the player:

(1) Has Blackjack, the dealer shall announce and pay the Blackjack in accordance with § 685a.11(a) (relating to payout odds) and remove the player's cards.

(2) Does not have Blackjack, the player shall indicate whether he wishes to double down as permitted under § 685a.9 (relating to Double Down Wager), split pairs as permitted under § 685a.10 (relating to splitting pairs), stand or draw additional cards. Players may not surrender in Down Under Blackjack.

(j) As each player indicates his decision, the dealer shall deal face upwards whatever additional cards are necessary to effectuate the player's decision.

(k) A player may elect to draw additional cards whenever his point count total is less than 21, except that:

(1) A player having a hard or soft total of 21 may not draw additional cards.

(2) A player electing to double down in accordance with § 685a.9 may draw only one additional card.

(l) After the decisions of each player have been implemented and all additional cards have been dealt, the dealer shall turn the hole card face up, unless the hole card has already been exposed in accordance with this section.

(m) The dealer shall draw additional cards until he has a hard or soft total of 17, 18, 19, 20, 21 or 22. Any additional cards required to be dealt to the hand of the dealer shall be dealt face up. The dealer shall announce the dealer's total point count after each additional card is dealt.

(n) After all additional cards have been drawn, if the total point count of the dealer's hand:

(1) Is a 22, the dealer shall pay out any player's Bet Wager if the player has exactly two original Large value range cards or a hand with a hard or soft total of 21 in accordance with § 685a.11, and shall return all remaining player's Bet Wagers.

(2) Is not a 22, the dealer shall settle the player's Bet Wagers in accordance with subsections (o)—(q).

(o) A player shall win and be paid in accordance with § 685a.11 for the Bet Wager if:

(1) The total point count of the player's hand is 21 or less and the total point count of the dealer's hand is in excess of 22.

(2) The total point count of the player's hand exceeds the total point count of the dealer's hand without exceeding 21.

(p) A Bet Wager shall tie and be returned to the player if the total point count of the player's hand does not exceed 21 and is the same as the total point count of the dealer's hand.

(q) A player's Bet Wager shall lose and shall be collected if:

(1) The total point count of the player's hand is in excess of 21.

(2) The total point count of the dealer's hand exceeds the total point count of the player's hand without exceeding 21.

(r) The dealer shall collect all losing wagers and settle all winning wagers in accordance with one of the following procedures designated in the certificate holder's Rules Submission under § 601a.2 (relating to table games Rules Submissions):

(1) Collect all losing wagers beginning with the player farthest to the dealer's right and continuing around the table in a counterclockwise direction and then settle all winning wagers.

(2) Collect each player's losing wagers and settle each player's winning wagers beginning with the player farthest to the dealer's right and continuing around the table in a counterclockwise direction. The dealer shall place any losing wagers directly into the table inventory and may not pay off any player's winning wagers by using value chips collected from a losing wager.

(s) After all wagers have been settled, the dealer shall remove any remaining cards from the table and place them in the discard rack in a manner that permits the reconstruction of each hand in the event of a question or dispute.

(t) Players and spectators may not handle, remove or alter any cards used to play Down Under Blackjack.

§ 685a.8. Insurance Wager.

(a) If the first card dealt to the dealer is an ace, each player may make an Insurance Wager which shall win if the dealer's hole card is a 10, jack, queen or king.

(b) An Insurance Wager may be made by placing a value chip on the insurance line of the layout in an amount not more than 1/2 of the player's initial Bet Wager. A player may wager an amount in excess of 1/2 of the initial Bet Wager to the next unit that can be wagered in chips, when, because of the limitation of the value of chip denominations, half the initial Bet Wager cannot be bet. Insurance Wagers shall be placed prior to the dealer inserting his hole card into the Masque Card Reader device.

(c) Winning Insurance Wagers shall be paid in accordance with the payout odds in § 685a.11(b) (relating to payout odds).

(d) Losing Insurance Wagers shall be collected by the dealer immediately after the dealer inserts his hole card into the Masque Card Reader device and determines that he does not have a Blackjack and before he draws any additional cards.

§ 685a.9. Double Down Wager.

(a) Except when a player has Blackjack, a player may elect to make a Double Down Wager, which may not exceed the amount of his initial Bet Wager, on the first two cards dealt to that player, including any hands resulting from a split pair, provided that only one additional card shall be dealt to the hand on which the player has elected to double down.

(b) If a dealer obtains Blackjack after a player makes a Double Down Wager, the dealer shall collect only the amount of the initial Bet Wager of the player and may not collect the additional Double Down Wager.

(c) Upon a player's election to make a Double Down Wager, the dealer shall deal the one additional card face up and place it sideways on the layout.

§ 685a.10. Splitting pairs.

(a) If the first two cards dealt to a player are identical in value, the player may select to split the hand into two separate hands, provided that he makes a wager on the second hand formed in an amount equal to his initial Bet Wager. For example, if a player has two 8s or a king and a queen, the player may elect to split the hand.

(b) When a player splits pairs, the dealer shall deal a card to and complete the player's decisions to the first incomplete hand on the dealer's left before proceeding to deal any cards to the second hand.

(c) After a second card is dealt to each split pair hand, the player shall indicate his decision to stand, draw or double down with respect to that hand. A player may split pairs a maximum of one time, for a total of two hands.

(d) If the dealer obtains Blackjack after a player splits pairs, the dealer shall collect only the amount of the initial Bet Wager of the player and return the additional amount wagered in splitting pairs.

(e) If a player elects to split a pair of aces, each ace shall receive only one card.

§ 685a.11. Payout odds.

(a) The certificate holder shall pay out each winning Bet Wager at odds of 1 to 1, with the exception of Blackjack which shall be paid at odds of 3 to 2.

(b) The certificate holder shall pay out winning Insurance Wagers at odds of 2 to 1.

(c) The certificate holder shall pay out winning Match-the-Dealer Wagers at the odds in the following payable:

<i>6 decks Result</i>	<i>Pay</i>	<i>8 decks Result</i>	<i>Pay</i>
Suited match	11 to 1	Suited match	14 to 1
Unsuited match	4 to 1	Unsuited match	3 to 1

§ 685a.12. Irregularities.

(a) A card found face up in the shoe may not be used in that round of play and shall be placed in the discard rack.

(b) A card drawn in error without its face being exposed shall be used as though it were the next card from the shoe.

(c) After the first two cards have been dealt to each player and the dealer and a card is drawn in error and exposed to the players, the card shall be dealt to the players or dealer as though it were the next card from the shoe. Any player refusing to accept the card may not have additional cards dealt to him during the round. If the card is refused by the players and the dealer cannot use the card, the card shall be placed in the discard rack.

(d) If the dealer has 17 and accidentally draws a card for himself, the card shall be placed in the discard rack.

(e) If there are insufficient cards remaining in the shoe to complete a round of play, all of the cards in the discard rack shall be shuffled and cut in accordance with the procedures in § 685a.5 (relating to shuffle and cut of the cards). The first card shall be drawn face down and placed in the discard rack and the dealer shall complete the round of play.

(f) If no cards are dealt to a player's hand, the hand is dead and the player shall be included in the next deal. If only one card is dealt to a player's hand, at the player's option, the dealer shall deal the second card to the player after all players have received a second card.

(g) If after receiving the first two cards, the dealer fails to deal an additional card to a player who has requested a card, then, at the player's option, the dealer shall either deal the additional card after all other players have received their additional cards but prior to the dealer revealing his hole card, unless that hole card has been exposed in accordance with § 685a.7(h) (relating to procedure of dealing the cards; completion of each round of play), or call the player's hand dead and return the player's initial Bet Wager.

(h) If the Masque Card Reader device wrongly indicates the value range of the dealer's hole card by illuminating the wrong colored light, or if the dealer places the hole card in the incorrect spot on the layout prior to player action on the hand, the dealer shall either allow the player to continue the action on that hand with the decisions already made or call the player's hand dead and return the player's initial Bet Wager, including those Bet Wagers for players who exceeded 21.

(i) If a Masque Card Reader device malfunctions, the dealer may not continue dealing the game of Down Under Blackjack at that table until the Card Reader device is repaired or replaced.

(j) If an automated card shuffling device is being used and the device jams, stops shuffling during a shuffle or fails to complete a shuffle cycle, the cards shall be reshuffled.

(k) If an automated shuffling device malfunctions and cannot be used, the device must be covered or have a sign indicating that it is out of order placed on the device before any other method of shuffling may be utilized at that table.

Recitals

A. The Pennsylvania Department of Agriculture, Bureau of Animal Health and Diagnostic Services (Department), under the authority of the Domestic Animal Law (3 Pa.C.S.A. §§ 2301—2389), has the authority to protect the health of domestic animals and establish and enforce quarantine orders, “Whenever a dangerous transmissible disease or contamination by hazardous substances exists anywhere within or outside of the Commonwealth or whenever it is deemed advisable to test or treat a domestic animal upon the reasonable suspicion that it has . . . been exposed to . . . or is contaminated with a hazardous substance, . . . the department shall have the power to establish and enforce quarantines of any such infected, exposed, contaminated, suspected or susceptible domestic animal. In addition to the aforedescribed domestic animals, a quarantine may apply to any goods, products, facilities, containers, vehicles or materials that may . . . or may be contaminated with a hazardous substance and may be applied on or in or against any premises, area or locality as define in this chapter.” (3 Pa.C.S.A. § 2329(a))

B. The Department may establish three different types of quarantine orders; “. . . (1) interstate and/or international; (2) general; and (3) special; and shall continue in effect for such lengths of time as the department deems necessary or advisable.” (3 Pa.C.S.A. § 2329(b))

C. According to the United States Department of Justice, Drug Enforcement Administration (DEA) pentobarbital is a Schedule II barbiturate substance (Schedule II drugs, substances, or chemicals are defined as drugs with a high potential for abuse, with use potentially leading to severe psychological or physical dependence in humans).

D. Pentobarbital is commonly used in animals as a sedative, anesthetic, or for euthanasia, in the form of pentobarbital sodium. An overdose of pentobarbital sodium administered by rapid intravenous injection is an effective, fast, and humane method of euthanasia, and is approved by the American Veterinary Medical Association.

E. Rendered commercial feed or pet food products come from a process that converts animal tissues to commercial feed or pet food ingredients.

F. The Pennsylvania Department of Agriculture (Department) has authority under the Domestic Animal Law (3 Pa.C.S. § 2351) to regulate dead animal disposal “. . . to cause the sanitary and safe disposal of dead domestic animals, domestic animal products and domestic animal parts, tissues, excrement and other wastes to prevent the spread of transmissible diseases or dangerous transmissible diseases or the spread of contamination by hazardous substances. This subchapter shall not apply to the disposal of carcasses of domestic animals slaughtered for human food nor to the premises or the rendering operations on the premises of a licensed slaughter establishment subject to official Federal or State inspection, provided that such inspection includes inspection of the rendering operations.”

G. Rendering is an approved method of dead animal disposal in Pennsylvania, per the Domestic Animal Law.

H. The Food and Drug Administration (FDA) Center for Veterinary Medicine (CVM) is responsible for the regulation of animal feed (food) products and considers animal feed, including pet food, containing pentobarbital residues to be adulterated under the Federal Food, Drug, and Cosmetic Act (FD&C Act) and the FDA Food Safety Modernization Act (FSMA) preventive controls for animal food (PCAF) regulations.

I. The Pennsylvania Department of Agriculture, Bureau of Plant Industry, under the authority of the Commercial Feed Act (3 Pa.C.S.A. §§ 5101—5115), regulates commercial animal feed, including pet food. Pentobarbital residues may be considered an adulterant in accordance with section 5106(1) or 5106(2) of the Commercial Feed Act, “No person shall distribute adulterated feed. A commercial feed, customer-formula feed or exempted material shall be deemed to be adulterated if it meets any of the following criteria: (1) It bears or contains any poisonous or deleterious substance which may render it injurious to the health of humans or animals. If the substance is not an added substance, the commercial feed shall not be considered adulterated under this paragraph if the quantity of the substance in the commercial feed does not ordinarily render it injurious to health. (2) It bears or contains any added poisonous, added deleterious or added nonnutritive substance which is unsafe within the meaning of section 406 of the Federal Food, Drug, and Cosmetic Act (52 Stat. 1040, 21 U.S.C. § 301 et seq.) other than a pesticide chemical in or on a raw agricultural commodity or a food additive.” (3 Pa.C.S.A. § 5106(1) and (2)).

J. Pentobarbital residues are not affected by rendering or canning temperatures and pressures (such as heat treatments capable of killing pathogenic organisms). Because of this, to avoid the potential for residues in commercial feed and pet food, the FDA does not allow the use of animals euthanized with a chemical substance such as pentobarbital in the manufacture of animal foods. There is currently no set tolerance for pentobarbital in commercial feed or pet food.

K. Pentobarbital has been identified by the FDA in certain pet foods in recent years. Presently, it is assumed that the pentobarbital residues are entering pet foods from cattle or horses which were euthanized with pentobarbital and then rendered. The FDA reported finding pentobarbital in the tallow ingredient used in the affected pet food products.

L. If animals euthanized with pentobarbital are not disposed of properly there is the potential for exposure of scavenging domestic and wild animals to pentobarbital residues.

M. Possible harmful effects of pentobarbital residue in commercial feed and pet food and in contaminated carcasses which are consumed by other animals include drowsiness, dizziness, nausea and at high levels may lead to coma and death of the animal which consumed the food or carcass.

N. In Pennsylvania, pentobarbital has been identified in commercial feed, including pet food, most recently in

2019. The Department of Agriculture Bureau of Plant Industry traced the contaminant back to a slaughter and rendering plant that was selling tallow contaminated with the substance to commercial feed and pet food manufacturers.

O. In Pennsylvania, pentobarbital was identified as the cause of death in several Bald Eagles (*Haliaeetus leucocephalus*) in April 2020.

P. The Department has broad authority under the Domestic Animal Law to establish and enforce a General Quarantine Order against any area or locality within this Commonwealth to exclude, contain or eliminate dangerous transmissible diseases and hazardous substances. (3 Pa.C.S.A. § 2329(d)).

Order of Quarantine

With the foregoing recitals incorporated into this Order by reference, the Pennsylvania Department of Agriculture under authority of the Domestic Animal Law, at 3 Pa.C.S.A. § 2329(d) and § 1702 of the Administrative Code of 1929 (71 P.S. § 442), hereby establishes a General Order of Quarantine related to the hazardous substance pentobarbital and the proper disposal of animals euthanized with pentobarbital. Compliance and assurance of compliance with the provisions and terms of this Quarantine Order shall be the responsibility of all persons, individuals and entities subject to its terms. The terms of this Order are as follows:

1. *Quarantine Area.* The area covered by this General Quarantine Order is the entire Commonwealth of Pennsylvania and shall be in effect until further order of the Department.

2. *Applicable definitions.*

“*Cat*”—A carnivorous mammal scientifically known as *Felis Catus*.

“*Commercial feed*”—All materials distributed or intended to be distributed for use as feed or for mixing in feed. The term does not include unmixed whole seeds and physically altered entire unmixed seeds when the seeds are not adulterated within the meaning of section 5106 (relating to adulteration). The department by regulation may exempt from this definition or specific provisions of his chapter specific commodities, individual chemical compounds or substances when the commodities, compounds or substances are not mixed with other materials and are not adulterated within the meaning of section 5106.

“*Dog*”—The genus and species known as *Canis familiaris*.

“*Domestic animal*”—An animal maintained in captivity. The term also includes the germ plasm, embryos and fertile ova of such animals.

“*Pet food*”—Any commercial feed prepared and distributed for consumption by pets.

“*Hazardous substance*”—Any element, compound or material which threatens the health of domestic animals or humans.

“*Relay toxicity*”—Secondary poisoning which results when one organism comes into contact with or ingests another organism that has poison in its system. It typically occurs when a predator eats an animal which has previously been poisoned by a pesticide or other substance.

“*Rendering*”—The cooking or heating of dead domestic animals or parts of such dead animals until all such cooked or heated material is incapable of transmitting dangerous transmissible disease.

“*Tallow*”—A hard fatty substance made from rendered animal fat, used in making candles and soap.

3. *General provisions.* The following applies to domestic animals which are euthanized using pentobarbital:

a. All rendering, slaughter or other domestic animal processing establishments, producing commercial feed or pet food, are prohibited from processing dead domestic animals that have been euthanized using pentobarbital and the parts, offal and animal waste from such animals.

b. An animal and the parts, offal and waste of an animal bearing a mark indicating it was euthanized with pentobarbital and may contain pentobarbital residues, or otherwise known to contain pentobarbital residues may not be rendered or processed for commercial feed or pet food.

c. Domestic animals euthanized using pentobarbital shall be marked in the manner set forth in subsections d. and e. of this Order.

d. Veterinarians shall ensure that all domestic animals, excluding dogs and cats and other small companion animals which are euthanized with pentobarbital are visibly identified by placing readily visible paint marks using livestock paint on the animal’s head, on at least one side of the animal’s thorax, and on all hooves or feet as follows:

i. The head of the domestic animal shall be marked with a large letter “P” placed between the eyes to indicate the carcass and the parts are ineligible for rendering or processing to produce any commercial feed or pet food products in the Commonwealth of Pennsylvania.

ii. The thorax and any parts of the domestic animal shall be marked with a large letter “P” to indicate the carcass and the parts are ineligible for rendering or processing to produce any commercial feed or pet food products in the Commonwealth of Pennsylvania.

iii. The hooves or feet of the domestic animal shall be marked to indicate the carcass and the parts are ineligible for rendering or processing to produce any commercial feed or pet food products in the Commonwealth of Pennsylvania.

iv. The offal and animal waste such as viscera from a domestic animal euthanized with pentobarbital, excluding dogs, cats, and other small companion animals, shall be kept separate and shall be disposed of in a manner complying with section 2352(a) of the Domestic Animal Law (3 Pa.C.S. § 2352(a)), except that such materials may not be disposed of through rendering.

v. The veterinarian shall explain to the owner that carcasses must be properly disposed of within 48 hours in compliance with the Domestic Animal Law.

e. Owners or caretakers of domestic animals which are euthanized with pentobarbital shall ensure the animals are properly disposed of within 48 hours in compliance with the Domestic Animal Law, excluding disposal by

rendering for commercial feed or pet food, to avoid potential relay toxicity to domestic animals, scavengers and raptors. If proper disposal is not immediate, animal carcasses shall be covered or concealed in such a manner as to assure the prevention of access to the carcass, parts, offal and animal waste of such dead domestic animal by other domestic and wild animals.

f. Dead domestic animal haulers shall be prohibited from delivering any dead domestic animal, dead domestic animal carcass, parts, offal or waste, from animals euthanized with pentobarbital to rendering or other processing facilities for the production of commercial feed or pet food products.

g. If markings applied to indicate euthanasia with pentobarbital are not easily visible, the markings shall be reapplied prior to transfer of ownership or possession of the dead domestic animal, dead domestic animal carcass, parts, offal or waste.

h. It shall be unlawful for any person to remove a marking indicating the animal was euthanized using pentobarbital from any dead domestic animal, dead domestic animal carcass, parts, offal or waste.

4. *Violations and Penalties.* Any person violating the requirements of this Order shall be subject to enforcement and penalties as are allowed under the provisions of the Domestic Animal Law (3 Pa.C.S.A. § 2301 et seq.), which include revocation of license, criminal prosecution, civil penalties of up to \$10,000 per violation, injunctive relief or any combination of such penalties.

5. *No Restriction on Further Action by the Department.* This Order shall not be construed as limiting the Department's authority to establish additional quarantine or testing requirements or take any actions otherwise permitted under applicable statute or regulation.

6. *Contact information.* Questions regarding this General Quarantine Order may be addressed to the Commonwealth of Pennsylvania, Department of Agriculture, Bureau of Animal Health, 2301 North Cameron Street, Harrisburg, PA 17110 (717-772-2852); or by email at RA-ahds@pa.gov. Questions about commercial feed or pet food may be addressed to the Commonwealth of Pennsylvania, Bureau of Plant Industry, 2301 North Cameron Street, Harrisburg, PA 17110 (717-787-4843).

7. *Effective Date.* This Order shall become effective immediately upon publication in the *Pennsylvania Bulletin* and shall remain in effect unless rescinded or modified by subsequent Order.

I. The Pennsylvania Department of Agriculture, Bureau of Plant Industry, under the authority of the Commercial Feed Act (3 Pa.C.S.A. §§ 5101—5115), regulates commercial animal feed, including pet food. Pentobarbital residues may be considered an adulterant in accordance with section 5106(1) or 5106(2) of the Commercial Feed Act, “No person shall distribute adulterated feed. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environ- mental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the site(s) identified below, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the date specified below. During this comment period the municipality may request that the person identified below, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating

Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the Regional Office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

01-03040C: Sealed Air Corp.—Hanover Plant (260 North Blettner Avenue, Hanover, PA 17731) for the construction of a new central grinding system and new padded envelope production machine at the Hanover Facility in Conewago Township, **Adams County**. The new central grinding system will be controlled by two new IMS cyclones and a reverse jet fabric filter. The new padded envelope production machine will be controlled by two new cyclone/dust compactor units and a fabric filter. The project also involves modification of its existing padded envelope machines such that the existing baghouses are replaced by the new IMS cyclones and reverse jet fabric filter. The facility's existing hammer mills will be modified such that they are controlled by the two IMS cyclones and reverse jet fabric filter. The expected facility potential emissions as a result of the changes proposed are as follows: 3.05 tpy PM₁₀, 5.56 tpy NO_x, 4.66 tpy CO, 0.03 tpy SO₂, 0.86 tpy VOC and 0.10 tpy total HAPs. The facility will be a State Only facility upon completion of the project. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval may be incorporated into an Operating Permit pursuant to the provisions of 25 Pa. Code Chapter 127.

43-393A: Aspen Hill Pet Crematory, LLC (7065 E. State Street, Hermitage, PA 16148). The Department of Environmental Protection intends to issue a plan approval to Aspen Hill Pet Crematory to provide authorization for the construction and initial operation of an animal crematory at their existing facility located in Jefferson Township, **Mercer County**.

No air emission sources are currently authorized at this facility. The proposed source is not eligible for authorization under the GP-14 due to its limited function door interlocks. The operator also intends to open the crematory's door during operation in order to reposition remains and to reduce cremation cycle times. This crematory was not eligible for authorization under General Plan Approval 14 per the Department's instruction that those

facilities which open their primary chamber's door during operation, could no longer use the general permit. Special conditions will be included in this plan approval which address door opening and its' impact on emissions and operation. The crematory will be required to meet all emission and temperature requirements while the door is opened and will have additional recordkeeping and monitoring requirements.

This application proposes the installation of a new source at a non-Title V facility. Public notice is obligatory for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44. The Plan Approval will contain testing, recordkeeping, emission restriction, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements. Potential emissions from the proposed source are estimated to be: less than 2.75 tons per year (tpy) of particulate matter and less than 1.0 tpy (each) of SO_x, NO_x, CO, VOC, and HAP.

In accordance with 25 Pa. Code § 127.44(f)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP Office (Air Quality). Appointments for scheduling a review must be made by calling the DEP at (814) 332-6940.

In accordance with 25 Pa. Code § 127.44(f)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments. Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments, identification of the proposed plan approval [43-393A: Aspen Hill Pet Crematory] and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received.

All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department's Northwest Region. Written comments or requests for a public hearing should be directed to Eric A. Gustafson, 230 Chestnut St., Meadville, PA 16335; Phone (814) 332-6819.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

Parameter	30-Day Average	Daily Maximum	Instantaneous Maximum
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). D23-106EA. Clark Hoffman, 114 Painters Crossing Road, Chadds Ford, PA 19317. Chadds Ford Township, **Delaware County,** USACOE Philadelphia District.

Project proposes to remove the Painters Crossing Dam and approximately 2,727 cubic yards of legacy sediment from a 1.12-acre floodplain area involving unnamed tributaries to Harvey Run to restore natural aquatic ecosystems. A 0.15-acre impoundment will be eliminated to restore the stream channel and a wetland. This will re-establish 0.83 acre of wetlands within the restored floodplain, realign approximately 1,073 lineal feet of unnamed tributaries to Harvey Run to restore 1,100 LF of channel (total 3,373 LF including all anastomosed) within the restored floodplain. Plans also propose to install log sills, root wads, woody debris habitat structures, and wood grade control structures in the restored channels and floodplain, lower the floodplain elevation to effectively transition the floodplain into the existing upland grade, fill and grade the 0.15 acre pond to elevate the grade to reconnect the stream to the floodplain. These measures will address the existing lateral stream bank erosion and incising stream bed which provides a sediment source to the Harvey Run watershed. The proposal includes a General Permit Registration for use of two GP-11's to replace a culvert and a pedestrian bridge. The project is located across tributaries to Harvey Run (WWF, MF) (West Chester, Wilmington North, PA Quadrangles, Latitude: 39.8754; Longitude: -75.5560).

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

**UNDER ACT 2, 1995
PREAMBLE 2**

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the

appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

E6583220-028. The **Westmoreland County** portion of the project is located in Salem Township, U.S. Army Corps of Engineers, Pittsburgh District. The proposed project starts at MP 0.76, located west of Crooked Run Road (Latitude: 40.385011°; Longitude -79.541961°), and extending to MP 1.60, located East of Boggs Hollow Road (Latitude: 40.39135°; Longitude -79.529261°).

The proposed project impacts in Westmoreland County include a total of 81 feet of temporary impacts and 10 feet of permanent impacts to a UNT Beaver Run (HQ-CWF); 0.07 acre of floodway impacts; 0.23 acre of temporary impacts to Other Palustrine Emergent (PEM) wetlands; 0.06 acre of permanent indirect impacts to Other PEM wetlands; and 0.20 acre of permanent direct impacts to Other PEM wetlands. To compensate for the proposed permanent direct project impacts in Westmoreland County, the applicant is proposing to purchase off-site mitigation credits at a ratio of 1:1.

GP110683220-027. The **Berks County** portion of the project is located in Pike Township, U.S. Army Corps of Engineers, Philadelphia District. The proposed project is located at Texas Eastern's existing pig-launcher site off Mine Road (Latitude: 40.413992°; Longitude -75.707658°).

The proposed project impacts in Berks County include a total of 0.04 acre of a UNT Pine Creek (EV, MF) floodway impacts and 0.01 acre of temporary impacts to one (1) Exceptional Value PEM wetland.

EROSION AND SEDIMENT CONTROL

The following parties have applied for Erosion and Sediment Control Permits for earth disturbance associated with oil and gas exploration, production, processing, or treatment operations or transmission facilities.

Unless otherwise indicated, on the basis of preliminary review and application of lawful standards and regulations, the Department proposes to issue a permit to discharge, subject to certain limitations in the permit conditions. These proposed determinations are tentative. Limitations are provided as erosion and sediment control best management practices which restrict the rate and quantity of sediment discharged.

Applications Received Under Sections 5 and 402 of The Clean Streams Law (35 P.S. §§ 691.5 and 691.402).

The Department of Environmental Protection (Department) provides notice of receipt of an application for a Chapter 102, Erosion and Sediment Control General Permit for Earth Disturbance Associated with Oil and Gas Exploration, Production, Processing or Treatment Operations or Transmission Facilities. The application is currently under technical review for Appalachia to Market—Delmont Loop. The proposed facilities for the Project include two crossovers and one pick-up and relay and related appurtenances, all of which will be located within or adjacent to Texas Eastern's current right-of-way. In Salem Township, **Westmoreland County** the Delmont loop pick-up and relay is proposed which is a 0.8-mile segment of existing Line 27 that will be replaced with a 30-inch outside diameter pipeline. The proposed Delmont loop starts at MP 0.76, located west of Crooked Run Road (Latitude: 40.385011°; Longitude -79.541961°), and extending to MP 1.60, located East of Boggs Hollow Road (Latitude: 40.39135°; Longitude -79.529261°). New pig launcher/receiver facilities and other related appurtenances will be installed at the beginning and end of the loop. Permanent impervious land cover is proposed at the launcher and receiver cross over sites. One cross over is in **Berks County** and the other in **Fayette County**, for which each have less than 5 acres of earth disturbance.

This authorization is required for earth disturbance activities associated with oil and gas exploration, production, processing or treatment operations or transmission facilities when earth disturbance is 5 acres or greater. Review of this application is being coordinated among the Department and the associated county conservation districts.

STORAGE TANKS OUT-OF-SERVICE INSPECTION VARIANCE

The following variance from Out-of-Service Inspection requirements under the authority of the Storage Tank Spill Prevention Act (35 P.S. § 6021.301) and under 25 Pa. Code Chapter 245, Subchapter F, has been issued by the Bureau of Environmental Cleanup and Brownfields, P.O. Box 8762, Harrisburg, PA 17105-8762.

<i>Variance No.</i>	<i>Applicant Name</i>	<i>County</i>	<i>Municipality</i>	<i>Tank Type</i>	<i>Tank Capacity</i>
A-20-0002	Carpenter Company	Lehigh County	Upper Macungie Township	Toluene Diisocyanate	>21,000 gallons

The variance request asks that a large aboveground storage tank (AST) at the facility be excluded from part of the Out-of-Service Inspection requirements located in 25 Pa. Code § 245.553(c). Specifically, the variance requests that the facility be allowed to substitute a combined In-Service Integrity Inspection and in-service robotic floor inspection of the AST for a manned-entry Out-of-Service Inspection. The tank subject to the variance request is the only AST in Pennsylvania with a capacity greater than 21,000 gallons storing Toluene Diisocyanate (TDI). Documentation provided to DEP described the hazards associated with personnel exposure to residual TDI during tank entry that presented unique conditions which make a manned-entry Out-of-Service Inspection technically impractical and unsafe. A variance was granted upon conditions that the inspections include additional testing to fully evaluate the tank bottom, and that all inspection and testing activities are directly overseen by a DEP-certified "IAF". If deficiencies requiring the tank to be removed from service are observed, the tank must be immediately emptied. This variance approval applies only to the 2020 Out-of-Service Inspection of this AST.

Opening of New Grant Round for Recycling Program Development and Implementation Grants under Section 902 of Act 101, Municipal Waste Planning, Recycling and Waste Reduction Act of 1988

The Department of Environmental Protection (Department) announces the opening of a new section 902 grant round to support the development of municipal recycling programs under section 902 of the Municipal Waste Planning, Recycling and Waste Reduction Act of 1988 (Act 101) (53 P.S. § 4000.902). Municipalities eligible for recycling grants include counties, cities, boroughs, incorporated towns, townships, home rule municipalities, councils of governments, consortiums or similar entities established by two or more municipalities under 53 Pa.C.S. Chapter 23, Subchapter A (relating to inter-governmental cooperation). The application deadline is January 29, 2021, at 5 p.m.

Application Requirements

Municipalities who received a section 902 grant award in 2020 are not eligible to apply for funding during this solicitation period. Applicants must be in compliance with the provisions of Act 101 and the implementing regulations, the Department's Guidelines for Proper Management of Recyclable Materials, and any previous grant contract provisions to be eligible to receive grant funding. County applicants should be in compliance with planning and other county-related provisions of Act 101. Applicants who are not in compliance with Act 101 and annual reporting requirements or the program performance recycling grant requirements of the act of November 9, 2006 (P.L. 1347, No. 140) will not be considered. Programs must operate in compliance with their municipality's land use plan where applicable.

Municipalities are eligible for 90% funding of approved recycling program costs. Municipalities considered financially distressed by the Department of Community and Economic Development under the Municipalities Financial Recovery Act (53 P.S. §§ 11701.101—11701.712) are eligible for 100% of approved costs. No application requesting more than \$350,000 in grant funding will be accepted.

All applicants are required to complete the Sustainability Plan portion of the application that includes definitive actions and strategies for optimizing program self-sufficiency. The plan shall include, at a minimum, strategies for reducing costs and generating revenues, provisions for establishing incentives associated with waste reduction and recycling, mechanisms for public outreach and stakeholder input, and tracking mechanisms to document progress toward sustainability milestones until optimum sustainability is realized. The De-

partment's technical report on Building Financially Sustainable Recycling Programs can provide assistance in developing such methods and strategies. The technical report can be found on the Department's web site at http://files.dep.state.pa.us/Waste/Recycling/RecyclingPortalFiles/Documents/fin_sust_rec.pdf. Applicants that fail to complete the Sustainability Plan portion of the application will not be considered for funding.

The following elements will receive priority for funding:

- Development and implementation of an organics collection or management program, or both.
- Development and implementation of incentive-based pricing and collection programs designed to increase the quantities and types of recyclable materials and reduce the quantity of waste collected.
- Development and implementation of multimunicipal collection, processing or a materials marketing program, or both where capital costs are reduced or recycling marketability is enhanced, or both due to intergovernmental cooperation.
- Municipal recycling programs that will develop and implement methods of collection and processing of recyclable materials through source-separation, dual-stream or commingled practices. The applicant must demonstrate that these recyclable materials have value and greater marketability.
- New and innovative recycling educational programs that support the applicants' recycling collection efforts.

In addition, communities whose existing recycling programs contain the following components will receive additional consideration:

- Publicly provided or municipally contracted waste and recycling services.
- The collection of six or more of the following materials: newsprint, office paper, corrugated paper, other marketable grades of paper, aluminum cans, steel or bimetallic cans, colored glass containers, clear glass containers and plastics.
- Municipal recycling programs that are currently collecting and processing recyclable materials through source-separation, dual-stream or commingled practices. The applicant must demonstrate that these recyclable materials have value and greater marketability.
- Incentive-based pricing and collection programs designed to increase the quantities and types of recyclable materials and reduce the quantity of waste collected.

Eligibility Requirements

Only those projects involving municipalities that have a mandatory trash collection program or projects seeking support for a residential recycling program that have a corresponding commercial recycling program will be considered for funding. Applicants seeking funds to replace curbside collection containers or collection vehicles, or both, will need to demonstrate that the new equipment will increase collection efficiencies and tonnage of materials.

Eligibility Costs

Eligible recycling program development costs include: recycling program design costs, recycling market investigations, development of recycling market commitments; development of recycling program ordinances; development of recycling public education programs; and the

costs of developing contracts for procuring equipment or services necessary for the operation of the recycling program.

Eligible recycling program implementation costs include: purchasing or leasing vehicles used to collect recyclables, transporting recyclables to processing facilities or markets, and vehicles used in the operation of a materials recovery facility; reusable containers for the collection or storage of recyclable materials; acquiring or renovating buildings, or both, for the processing or storage of recovered materials; equipment used to process or manufacture recyclable materials into usable products; improvements to land needed to operate a recycling facility or yard waste composting facility authorized under 25 Pa. Code § 271.103(h) (relating to permit-by-rule for municipal waste processing facilities other than for regulated medical or chemotherapeutic waste; qualifying facilities; general requirements); and the costs associated with educating the public on recycling program requirements.

Under this grant solicitation, the following will not be eligible for funding: promotional items; glass crushing equipment (unless specific marketing arrangements have been identified); vehicles equipped with compaction units (except for the sole collection of yard waste or paper fiber); and backyard composting units and public recycling containers for parks and streetscapes.

Other eligible and noneligible costs are listed in the grant application packet. Composting projects and programs will be considered to be recycling projects or programs accordingly.

A municipality must retain sole ownership of equipment or facilities funded by the grant. Funding for equipment or facilities purchased for the recycling program used for recycling and other purposes will be prorated according to its recycling use (no equipment used for recycling less than 50% of the time will be eligible for funding). Funding for certain leaf and yard waste collection equipment may be limited according to its seasonal use. Funding for wood chipping equipment will be approved only when the equipment is part of an approved yard waste composting facility operating under the Department's guidelines and where the material is collected curbside from residents. Funding of street sweepers for the purpose of leaf collection will not be considered.

Funding may be restricted in situations where equipment or services requested through a grant application may be available from the public or private sector within the county of the applicant. Public notices may be required before the grant application may be submitted depending upon the nature of the funding request. When the municipality submits the recycling grant application to the Department, it must include proof of compliance with the notification requirements, a description of any responses received to the notice and an explanation of why the municipality has concluded that the mechanical processing equipment is not available to the program from the private sector.

Requirement for Preapplication Conference

Potential applicants must contact the appropriate Department regional planning and recycling coordinator to schedule a preapplication conference to discuss application requirements and program particulars. A list of these individuals is included at the end of this notice. Applica-

tions will be returned to municipalities that fail to schedule a preapplication conference. Grant preapplication forms are available from the Department's web site at www.dep.pa.gov (search term "Recycling Grants Financial Assistance").

Application Deadline

Grant applications must be submitted online through the Commonwealth's Electronic Single Application web site, eGrants, at www.esa.dced.state.pa.us. Applications must be received by 5 p.m. on Friday, January 29, 2021 to be eligible for funding. Applications will not be accepted after the deadline. All grant awards are predicated on the receipt of recycling fees required by sections 701 and 702 of Act 101 (53 P.S. §§ 4000.701 and 4000.702) and the availability of moneys in the Recycling Fund.

FISH AND BOAT COMMISSION

Classification of Wild Trout Streams; Proposed Additions, Amendments and Revisions; January 2021

Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Fish and Boat Commission (Commission) to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The Commission's Fisheries Management Division maintains the list of wild trout streams. The Executive Director, with the approval of the Commission, will from time-to-time publish the list of wild trout streams in the *Pennsylvania Bulletin*. The listing of a stream section as a wild trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate management of streams.

At the next Commission meeting on January 25 and 26, 2021, the Commission will consider changes to its list of wild trout streams. Specifically, the Commission will consider the addition of the following streams or portions of streams to the list:

* The source of Yellow Breeches Creek, from the headwaters to the confluence of Hairy Springs Hollow Run, was incorrectly identified as Sthromes Hollow Run when Sthromes Hollow Run was added to the Wild Trout Streams list. Sthromes Hollow Run is now being identified as Yellow Breeches Creek. The current listed wild trout limits of Yellow Breeches Creek will encompass what was formerly named Sthromes Hollow Run. This change does not result in additions to the Wild Trout Streams list and is only amending a stream name as new information becomes available.

Persons with comments, objections or suggestions concerning the classification of the streams listed may submit them in writing to the Executive Director, Fish and Boat Commission, P.O. Box 67000, Harrisburg, PA 17106-7000, within 30 days after publication of this notice in the *Pennsylvania Bulletin*. Comments submitted by facsimile will not be accepted.

Comments also may be submitted electronically by completing the form at www.fishandboat.com/regcomments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. FISH AND BOAT COMMISSION

Proposed Changes to List of Class A Wild Trout Waters; January 2021

The Fish and Boat Commission (Commission) is considering changes to its list of Class A Wild Trout Streams. Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource to conserve that resource and the angling it provides. Class A wild trout populations represent the best of this Commonwealth's naturally reproducing trout fisheries. With rare exceptions, the Commission manages these stream sections solely for the perpetuation of the wild trout fishery with no stocking.

Criteria developed for Class A Wild Trout fisheries are species specific. Wild Trout Biomass Class Criteria include provisions for:

(i) *Wild Brook Trout Fisheries*

(A) Total brook trout biomass of at least 30 kg/ha (26.7 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brook trout biomass must comprise at least 75% of the total trout biomass.

(ii) *Wild Brown Trout Fisheries*

(A) Total brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brown trout biomass must comprise at least 75% of the total trout biomass.

(iii) *Mixed Wild Brook and Brown Trout Fisheries*

(A) Combined brook and brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass must comprise less than 75% of the total trout biomass.

(E) Brown trout biomass must comprise less than 75% of the total trout biomass.

(iv) *Wild Rainbow Trout Fisheries*

Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 2.0 kg/ha (1.78 lbs/acre).

(v) *Mixed Wild Brook and Rainbow Trout Fisheries*

(A) Combined brook and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

(vi) *Mixed Wild Brown and Rainbow Trout Fisheries*

(A) Combined brown and rainbow trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brown trout biomass shall comprise less than 75% of the total trout biomass.

(E) Rainbow trout biomass shall comprise less than 75% of the total trout biomass.

During recent surveys, Commission staff documented the following stream sections to have Class A wild trout populations. The Commission intends to consider adding these waters to its list of Class A Wild Trout Streams at its meeting on January 25 and 26, 2021.

GAME COMMISSION

Chronic Wasting Disease—Establishment of CWD Containment Zone Permit

Executive Order

Whereas, Chronic Wasting Disease (CWD) is an infectious and progressive neurological disease that is found in, and always proves fatal to, members of the family Cervidae (deer, elk or moose, and other susceptible species, collectively called cervids); and

Whereas, There are no known treatments for CWD infection, no vaccines to protect against CWD infection, and no approved tests that can detect the presence of CWD in live cervids; and

Whereas, CWD has been designated a “dangerous transmissible disease” of animals by order of the Secretary of Agriculture under the provisions of the Domestic Animal Law (3 Pa.C.S. §§ 2301 et seq.) at 3 Pa.C.S. § 2321(d); and

Whereas, CWD is known to be transmissible from infected to uninfected cervids by contact with or ingestion of CWD-infected or contaminated cervid parts or materials; and

Whereas, CWD is of particular concern to the Commonwealth of Pennsylvania because it has the potential to have a detrimental impact on both Pennsylvania’s wild and captive cervid populations; and

Whereas, CWD has been detected in both Pennsylvania’s wild and captive cervid populations; and

Whereas, The Game and Wildlife Code (Code) (34 Pa.C.S. §§ 101 et seq.) and regulations promulgated thereunder (58 Pa. Code §§ 131.1 et seq.) collectively provide broad authority to the Pennsylvania Game Commission (Commission) to regulate activities relating to the protection, preservation, and management of game and wildlife, including cervids; and

Whereas, 58 Pa. Code § 137.34 provides specific emergency authority to the Executive Director of the Commission to take actions to mitigate risk factors and to determine the prevalence and geographic distribution of CWD, including the authority to designate Disease Management Areas (DMAs) and also allow the taking of cervids without regard to established seasons and bag limits and methods of take; and

Whereas, The Commission has determined that it is necessary to increase the harvest of white-tailed deer within areas designated as CWD Containment Zones in an effort to reduce risk of further disease transmission within same.

Now Therefore, I, BRYAN BURHANS, Executive Director of the Pennsylvania Game Commission, pursuant to the authority vested in me by the Code and regulations promulgated thereunder, do hereby order and direct the following:

1. *Definitions*. The following words and terms, when used under this Order, have the following meanings, unless the context clearly indicates otherwise:

Antlered deer—Notwithstanding the definition in 58 Pa. Code § 131.2, any antlered deer located within a CWD Containment Zone and harvested under a CWD Containment Zone Permit that has two or more points to one antler or one antler 3 inches or more in length.

CWD Containment Zone—Any area within a CWD Disease Management Area (DMA) within the Commonwealth that has been designated by the Commission to receive focused management strategies to prevent the establishment and further spread of CWD on the landscape and that is located within an area encompassing an approximate 1-mile radius centered on a known positive CWD detection in a wild cervid.

2. *General*: This Order does hereby create and implement the CWD Containment Zone Permit Program for the 2020/2021 hunting license/permit year. This program will make permits available to eligible individuals to authorize increased harvest of antlered and antlerless deer in areas designated as CWD Containment Zones during open white-tailed deer seasons outside of and in addition to standard antlered and antlerless deer license allocations and bag limits. Applicants will be eligible to obtain up to one (1) antlered and unlimited antlerless Containment Zone permits. Notwithstanding the applicable standard open white-tailed deer seasons applicable to other Wildlife Management Units (WMUs) as set forth in 58 Pa. Code § 139.4, areas designated as CWD Containment Zones will be subject to the broader open seasons established for WMUs 2B, 5C, and 5D.

3. *Eligibility*: Resident and non-resident individuals that have previously acquired a valid general hunting license for the 2020/2021 hunting license year are eligible to make application for CWD Containment Zone Permit(s).

4. *Application*: Applicants shall contact the Commission using the phone number(s) or email address(es) designated to receive applications for CWD Containment Zone Permits. The Commission will process valid applications in the order in which they are received and thereafter mail successful applicants their permit, harvest ear tag, and related instructional literature.

a. *Required Information*: Applicants shall provide the Commission with required application information, including the following:

i. The name, CID number, address, phone number and email address of the applicant;

ii. The unit number for each CWD Containment Zone the applicant is requesting permit(s) for;

iii. The name and address of each landowner within the requested zone(s) from whom the applicant has received permission to hunt; and

iv. The type and number of permit(s) (i.e., antlered and/or antlerless) the applicant is requesting.

b. *Cost:* CWD Containment Zone Permits will be made available to eligible applicants at no cost.

5. *Permit Usage:* CWD Containment Zone Permits may be used to harvest deer during any open hunting season for white-tailed deer (including antlered only or antlerless only deer seasons) within the applicable CWD Containment Zone listed on the permit. Permits must be signed, produced and possessed by the Permittee with all other licensing documentation anytime the Permittee is exercising the permit's privileges. CWD Containment Zone Permits and their harvest tags are nontransferable and may not be possessed in the field by anyone other than the permittee whose name is represented on the permit or harvest tag. Immediately after harvest, before moving the carcass, the Permittee shall complete the CWD Containment Zone Permit Deer Harvest Ear Tag associated with the permit and then attach the ear tag only to the ear of the carcass.

6. *Reporting:* Positive or negative reporting, whichever is applicable, is required for each CWD Containment Zone Permit issued. Permittees shall report all successful harvests within ten (10) days after the harvest. Permittees shall report all negative harvests within ten (10) days after the close of the final white-tailed deer season applicable to the CWD Containment Zone listed on the permit. All reports shall be made in accordance with the instructions provided with the permit. Failure to report as required is a violation of this Order and may result in

criminal prosecution and/or render the Permittee ineligible to make application for this program the following license/permit year, should it be extended.

7. Permittees exercising any privilege granted by a CWD Containment Zone Permit shall comply with all applicable arms, ammunition, methods of take, protective material (fluorescent orange) and any special licensing requirements pertaining to the open white-tailed deer hunting season then in effect within each applicable Wildlife Management Unit.

8. The requirements and restrictions of this Order are to be construed as separate from and in addition to any previous or future Executive Orders concerning the importation of high risk cervid parts from areas outside of this Commonwealth or response to CWD within the Commonwealth.

9. This Order shall not be construed in any manner to limit the Commission's authority to establish additional importation, exportation, possession, transportation or testing requirements on cervid parts or materials.

This Order is effective immediately and shall remain in effect until rescinded or modified by subsequent order.

Given under my hand and seal of the Pennsylvania Game Commission on this 4th day of November, 2020.

BRYAN J. BURHANS,
Executive Director

INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b).

The Commission has issued comments on the following proposed regulations. The agency must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

Environmental Quality Board Regulation # 7-553 (IRRC # 3260)

Water Quality Standard for Manganese and Implementation

October 26, 2020

We submit for your consideration the following comments on the proposed rulemaking published in the July 25, 2020 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (RRA) (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Environmen-

tal Quality Board EQB to respond to all comments received from us or any other source.

1. Whether the regulation is consistent with the intent of the General Assembly; Comments, objections or recommendations of a committee; Possible conflict with or duplication of statutes or existing regulations.

This proposed rulemaking deletes manganese and the existing criterion of 1.0 mg/L from Table 3 of Section 93.7 (relating to specific water quality criteria) and adds manganese and the criterion of 0.3 mg/L to Table 5 of Section 93.8c (relating to human health and aquatic life

criteria for toxic substances). Table 3 identifies a specific water use and was established for the protection of potable water supply use. Table 5 identifies organisms to be protected by the criterion, such as human health and aquatic life.

The rulemaking also proposes two alternatives for point of compliance for the manganese water quality standard. The first alternative, as required by Act 40 of 2017 (Act 40), moves the point of compliance to the point of all existing or planned surface potable water supply withdrawals. The specific language of Act 40 that forms the basis for part of this rulemaking reads as follows:

The board shall promulgate regulations under the act of June 22, 1937 (P.L. 1987, No. 394) known as the "Clean Streams Law (CSL)," or other laws of this Commonwealth that require that the water quality criteria for manganese established under 25 Pa. Code Chapter 93 (relating to water quality standards) shall be met, consistent with the exception in 25 Pa. Code Section 96.3(d) (relating to water quality protection requirements). Within ninety days of the effective date of this subsection, the board shall promulgate proposed regulations. (See Section 1920-A(j) of the Administrative Code of 1929 (71 P.S. Section 510-20(j)).

The second alternative is to maintain the existing point of compliance in all surface waters, which is the point of discharge. In addition to Act 40, the EQB has cited the other environmental laws as part of its statutory authority for this proposed rulemaking. These laws include the Clean Streams Law (CSL) (35 P.S. § 691.1 et seq.), the Pennsylvania Safe Drinking Water Act (35 P.S. § 721.1 et seq.) and the Federal Clean Water Act (CWA) (33 U.S.C.A. § 1251 et seq.). The Board states that these statutes, and the regulations promulgated under those statutes, require the Department to protect the waterways of the Commonwealth.

The EQB is seeking comment on both alternatives.

The House Environmental Resources and Energy Committee (House Committee) submitted a letter stating that the proposed regulation and the inclusion of two possible points of compliance for manganese is contrary to Act 40 and the intention of the General Assembly. According to the Committee, the intent of Act 40 was to move the point of compliance for manganese from the point of discharge to the point of potable water withdrawal. Commentators from the industrial and mining sectors have expressed the same concern. Other commentators, including water supply companies and environmental organizations are opposed to Act 40 and moving the point of compliance for manganese downstream.

While a goal of the RRA is the reaching of consensus among interested parties, this Commission must first and foremost determine whether the agency has the statutory authority to promulgate a specific regulation and whether the regulation conforms to the intention of the General Assembly in the enactment of the statute upon which the regulation is based. In making that determination, the RRA directs this Commission to consider, among other things, written comments submitted by a committee.

We recognize that the other environmental laws cited above require the Department of Environmental Protection (DEP) to protect the waterways of the Commonwealth and also the health, safety and welfare of its citizens. Commentators have argued that the requirement of Act 40 and this proposal conflict with the other environmental laws. However, the mandate of Act 40 is

clear and does not provide discretion to the EQB. Given the language of Act 40, the comments submitted by the Committee, and the requirements of the RRA, we ask the EQB to explain why this rulemaking and the inclusion of two possible points of compliance is consistent with the intent of the Act 40 and the General Assembly.

2. Compliance with the provisions of the RRA or the regulations of IRRC in promulgating the regulation.

The House Committee, Senate Environmental Resources and Energy Committee (Senate Committee) and some commentators representing the industrial sector believe it is inappropriate for a proposed regulation to offer two alternatives for the regulation of manganese. The House Committee states, in part, "... proposing two different alternatives within the same regulatory package is not the process that the Regulatory Review Act envisions or authorizes." They contend this approach does not provide the interested parties with a clear picture of what the final regulation will require of the regulated community, and therefore, it is not possible to provide appropriate comments.

In the Preamble to the final-form regulation, we ask the EQB to explain why it included two alternative points of compliance in a single regulatory package. We also ask the EQB to explain why this approach is in compliance with the RRA and the regulations of IRRC. Specifically, the EQB should explain why this proposal meets the RRA definition of a "proposed regulation" which reads as follows:

A document intended for promulgation as a regulation which an agency submits to the commission and the committees and for which the agency gives notice of proposed rulemaking and holds a public comment period pursuant to the act of July 31, 1968 (P.L. 769, No. 240), referred to as the Commonwealth Documents Law.

3. Whether the regulation is supported by acceptable data; Reasonableness; Need.

The proposed lowering of the manganese standard from 1.0 mg/L to .3 mg/L has generated significant comment from the regulated community. The House and Senate Committees also commented on this issue. Commentators that support the lower standard believe it is appropriate and backed by the science cited and reviewed by the EQB in support of the rulemaking. Commentators opposed to the lower standard do not believe the regulation of manganese at this level is needed to protect human health and is not backed by the most recent scientific data.

We ask the EQB to review and consider the scientific data and studies provided by the commentators that are opposed to the lower standard. In the Preamble to the final-form regulation, the EQB should clearly state and justify why the lower standard is needed and why the science on which the rulemaking is ultimately based is the most appropriate for the Commonwealth.

We also ask the EQB to explain why it is reasonable to impose a manganese standard that is lower than other states and why it is reasonable to regulate manganese in a manner different than the Environmental Protection Agency.

Finally, we acknowledge the process used by the EQB to promulgate this rulemaking. This process included the issuance of an Advanced Notice of Proposed rulemaking, consultation with the DEP's Water Recourses Advisory

Committee, the Agricultural Advisory Board and the Small Water Systems Technical Assistance Center Advisory Board. The EQB also held three public hearings to solicit additional input. We believe other advisory boards of DEP could provide valuable input on this rulemaking. Since the representatives of the coal and aggregate industry have submitted comments questioning the science, need and cost associated with this proposal, we suggest that the final-form regulation be presented to the Mining Reclamation Advisory Board and the Aggregate Advisory Board for input. We believe these Boards could provide valuable input that could lead to a final regulation that is in the best interest of all citizens of the Commonwealth.

4. Direct and indirect costs to the Commonwealth, its political subdivisions and to the private sector.

The Regulatory Analysis Form (RAF) and the Preamble submitted with this proposal do not provide specific estimates of the costs or savings that may be experienced by the regulated community, local governments and state government. Potential cost of the rulemaking is an issue raised by commentators. For example, some believe that moving the point of compliance will shift costs from dischargers to public water suppliers and those costs would be passed on to consumers. Others believe that the lower standard for manganese will be impossible for some dischargers, including those involved in remining and abandoned mine reclamation projects, to meet because of increased cost.

The Senate Committee also raised the issue of cost. They question how the lower standard will affect the remediation of legacy acid mine drainage sites, bond forfeiture sites and note the potential increased costs for state and local agencies related to public highway construction.

The EQB's response regarding cost does not provide this Commission with sufficient information to determine if the regulation is in the public interest. After the language of the rulemaking is finalized, the EQB should work with the regulated community and the advisory boards noted above to determine actual costs or savings that could be realized and this information should be included in the RAF and Preamble.

5. Implementation procedures.

In response to Question # 29 of the RAF, the EQB indicates that the effective date of the final-form regulation will be upon publication in the *Pennsylvania Bulletin* for CSL permit and approval actions, or as approved by the United States Environmental Protection Agency (EPA) for purposes of CWA permits. A commentator does not believe the lower manganese standard will be approved by EPA because it is not based on sound science and it is not consistent with the manner in which EPA regulates manganese. If EPA does not approve the lower standard, how will the Department proceed with the implementation of this rulemaking? We ask EQB to explain this in the Preamble to the final-form rulemaking.

Pennsylvania Gaming Control Board Regulation # 125-230 (IRRC # 3262)

Video Gaming November 4, 2020

We submit for your consideration the following comments on the proposed rulemaking published in the September 5, 2020 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory

Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Pennsylvania Gaming Control Board (Board) to respond to all comments received from us or any other source.

1. Protection of the public health, safety and welfare; Implementation procedures.

Act 42 of 2017 amended Title 4 Pa.C.S., relating to Amusements, to expand gaming opportunities in the Commonwealth. As it pertains to this rulemaking, Act 42 legalized video gaming terminals (VGTs) at truck stop establishments.

Under Act 42, the Board was given authority to promulgate temporary regulations to administer VGT gaming. Those temporary VGT regulations were published in the March 17, 2018 edition of the *Pennsylvania Bulletin*. The temporary regulations, except for regulations related to security and surveillance, expired two years after publication.

This proposed regulation begins the process of converting the Board's temporary VGT regulations to permanent regulations. In response to Regulatory Analysis Form (RAF) question # 29, the Board indicates that the expected date of delivery of the final-form regulation is the third or fourth quarter of 2021. A cornerstone of the Pennsylvania Race Horse Development and Gaming Act (Act) (4 Pa.C.S. §§ 1101—4506) is the protection of the public health, safety and welfare and also the protection of the integrity of gaming. How will Board protect the public and also the integrity of the games it is charged with overseeing without temporary or permanent regulations in place? We urge the Board to return this regulatory package for final review to the Independent Regulatory Review Commission (IRRC) and the designated standing committees of the General Assembly as quickly as possible to ensure that VGTs are properly regulated.

2. Compliance with the RRA and regulations of IRRC.

Section 5.2 of the RRA (71 P.S. § 745.5b) directs IRRC to determine whether a regulation is in the public interest. When making this determination, IRRC considers criteria such as economic or fiscal impact and reasonableness. To make that determination, IRRC must analyze the text of the proposed regulation and the reasons for the new or amended language. IRRC also considers the information a promulgating agency is required to provide under Section 5 of the RRA in the RAF (71 P.S. § 745.5(a)).

There are several instances where the Board's responses to RAF questions are incomplete. We ask the Board to provide more complete answers as directed below:

- Identify what other states allow VGTs and how those states administer video gaming in response to RAF question # 12; and
- Categorize those entities mentioned in response to RAF question # 15 as either small businesses or another size business.

3. Section 1101a.2. Definitions.—Clarity; Reasonableness.

The Board is defining the term "commercial motor vehicle" by referencing that definition from the Uniform Commercial Driver's License Act found in 75 Pa.C.S. § 1603 (relating to definitions.) Why did the Board decide to use this definition for the term "commercial motor vehicle"?

4. Section 1102a.3. Conditional terminal operator and procurement agent licenses.—Clarity.

We have two concerns with this section. First, the title of this section references two types of licenses. However, the text of this section only addresses conditional terminal operator licenses. We suggest that the title be amended to reflect the correct subject matter of this section.

Second, the last subsection of this section, Subsection (f), states the following: “A request for conditional licensure must include a \$100 fee in addition to the applicable fee under 4 Pa.C.S. § 4101 (relating to fee).” This is the first reference to the fact that the request for conditional licensure is separate and optional from that of a permanent license. We believe the clarity of the section would be improved if this was mentioned at the beginning of the section. Also, is the request made on a form or in some other manner? This should also be clarified in the final-form regulation.

We note that similar language is found in §§ 1103a.3 (relating to conditional establishment licenses) and 1104a.2 (relating to conditional procurement agent principal licenses) and ask the Board clarify those sections as well.

5. Section 1102a.4. Terminal operator licensee change of control.—Clarity.

This section uses phrase the “change of control” and “controlling interest” interchangeably. We have two concerns. First, the phrase “controlling interest” is defined in Section 3102 of the Act (4 Pa.C.S. § 3102). We believe it would be beneficial to the regulated community if that term was included in § 1101a.2, relating to definitions.

Second, we believe the clarity of Subsection (a) would be improved by adding the phrase “or acquisition of controlling interest” after the phrase “controlling interest.” We note that similar language is found in §§ 1103a.4(a) (relating to establishment licensee change of control), 1106a.1(g)(1) (relating to supplier licenses) and 1107a.1(g)(1) and ask the Board to clarify those sections as well.

6. Section 1103a.1. Establishment licenses.—Need; Reasonableness.

Subsection (b) states that truck stop establishments must meet certain requirements. Subsection (b)(2) requires at least 20 parking spots for commercial motor vehicles. The definition of “commercial motor vehicle” noted above addresses the weight or type of vehicle that qualifies as such, but it does not address the length or width of a particular vehicle. Why does Subsection (b)(2) require parking spaces to be “of sufficient size to accommodate vehicles which are 8 feet in width and 53 feet in length” or of a certain weight? What is the need for the length and width requirements of this subsection? This should be explained in the Preamble to the final-form regulation.

7. Section 1106a.1. Supplier licenses.—Protection of the public health, safety and welfare; Clarity; Reasonableness.

We have two concerns with this section. First, Subsection (a)(1) states the following: “A supplier filing an application of licensure under this chapter shall not be required to file a diversity plan as set forth in § 431a.2(a)(3).” Why is a diversity plan not needed for this type of license? We ask the Board to explain the need for this provision in the Preamble to the final-form

regulation. We note a similar provision can be found at § 1107a.1(a)(1), relating to manufacturer licenses.

Second, Subsection (b)(5) requires an applicant to submit details of “any supplier license issued by the Board to the applicant under section 1317 of the act (relating to supplier licenses).” To protect the integrity of gaming, we believe it would be beneficial to amend this subsection to require applicants to notify the Board of any supplier license that was not only issued, but also denied. This would be similar to requirement of Subsection (b)(6) to notify the Board if a license was granted or denied by other gaming jurisdictions.

We note that similar language is found in § 1107a.1(b) (relating to manufacturer licenses) and ask the Board to clarify that section as well.

8. Chapter 1112a. Video gaming terminal, redemption terminal and associated equipment testing and certification.—Clarity.

Section 1112a.1, relating to definitions, includes a definition for “educational institution.” This term is not used in the body of Chapter 1112a. However, it is used in Chapter 1113a, relating to possession of video gaming terminals. When the Board prepares the final-form regulation, we ask that it review the definitions included in Chapter 1112a to ensure they are being used in that chapter and to delete or add definitions as appropriate.

9. Section 1112a.1. Definitions.—Clarity.

The definition of “asset number” reads as follows: “A unique number assigned to a video gaming terminal by a terminal operator for the purpose of tracking the video gaming terminal, while owned by the terminal operator.” It is our understanding that VGTs can also be leased by terminal operators. We suggest that this definition be amended to reflect that fact or amended to delete the reference to ownership of VGTs.

10. Section 1112a.9. Redemption terminals.—Clarity.

Subsection (g)(1) requires a lock securing a storage box. Subsection (g)(3) requires a lock securing the contents of the storage box and the key to lock “must be different from the keys referenced in paragraphs (1) and (2).” These provisions are unclear because Subsection (g)(1) and (g)(2) reference locks, but Subsection (g)(3) references keys. In addition, it is unclear if the lock or key referenced in Subsection (g)(1) must be different than the lock or key referenced in Subsection (g)(3). This should be clarified in the final-form regulation.

11. Section 1113a.1. Possession of video gaming terminals generally.—Clarity.

Subsection (b)(1) includes a reference to VGTs outside of a “licensed facility.” We believe the intent of this subsection is to regulate the possession of VGTs outside of the establishment licensee’s facility and suggest that the final-form regulation be amended to reflect that distinction.

12. Section 1116a.3. Redemption terminals.—Clarity.

Subsection (d) reads as follows: “The redemption terminal must only accept redemption tickets from video gaming terminals in the same video gaming area.” We note that § 1112a.9(e), allows a redemption terminal to function as bill breaker. We believe the clarity of Subsection (d) would be improved if it included a reference to § 1112a.9(e) and the fact that redemption terminals can also be used as bill breakers.

13. Section 1118a.5. Penalties.—Clarity.

Chapter 1118a relates to compulsive and problem gaming. This section reads as follows: “An establishment

licensee that fails to fulfill any of the requirements of this chapter shall be assessed an administrative penalty and may have its establishment license suspended by the Board.” It is our understanding that Section 3516 of the Act (relating to issuance and renewal) (4 Pa.C.S. § 3516) allows the Board to suspend, revoke or deny renewal of a license. Since the Board has the authority to revoke and deny renewal of a license, we suggest that those potential actions also be included in this section of the rulemaking and other sections as the Board deems appropriate.

14. Chapter 1119a. Self-exclusion.—Protection of the public health, safety and welfare; Clarity.

On January 29, 2020, IRRC submitted comments related to the Board’s proposed regulation # 125-225 (IRRC # 3246) entitled “Slot Machine Licenses; Accounting and Internal Controls; Compulsive and Problem Gambling Requirements; Casino Self-Exclusion; Table Game Equipment; Credit.” IRRC’s comment # 1 related to self-exclusion and raised several concerns regarding how the Board would handle the self-exclusion process as relates to the various forms of gaming. The Board has communicated with IRRC that the language included in Chapter 1119a has been amended to align with the language in proposed regulation # 125-225. We ask the Board to ensure that the language in this final-form regulation mirrors, as appropriate, the language in final-form regulation # 125-225 in order to protect the public health, safety and welfare and to provide clarity for the regulated community.

15. Chapter 1120a. Exclusion of persons from video gaming.—Clarity.

Subsection 1120a.2(a) states that the Board will maintain a list of persons to be excluded or ejected from an “establishment licensee facility.” This term is also used in §§ 1120a.3(a)(1) and (2). However, other subsections of this chapter such as §§ 1120a.3(a)(3) and (4) and (b)(1) use the term “licensed facility.” These defined terms have different meanings. We ask the Board to review the use of these two terms throughout this chapter to ensure that the proper terminology is used consistently.

16. Miscellaneous clarity.

- § 1104a.1(e) should be amended to include the word “applicant” after the word “principal.”
- § 1105a.1(e) should be amended to include the word “applicant” after the phrase “key employee.”
