## DEPARTMENT OF AGRICULTURE

### General Permit Standards and Requirements for Hemp

#### *Recitals.*

This Notice amends and replaces the previous Notice “General Permit Standards and Requirements for Hemp” published in the December 5, 2020 *Pennsylvania Bulletin* (50 Pa.B. 6906, Saturday, December 5, 2020).

A. The Act relating to Controlled Plants and Noxious Weeds (“Act”) (3 Pa.C.S.A. § 1501 et seq.) authorizes the Department of Agriculture (Department) through the Controlled Plant and Noxious Weed Committee (Committee) to establish a controlled plant list and to add plants to or remove plants from the controlled plant list (3 Pa.C.S.A. § 1511(b)(3)(ii)(iii)).

B. The Act provides for publication of the noxious weed and the controlled plant list and additions or removals or changes thereto to be published as a notice in the *Pennsylvania Bulletin* and for such additions or removals to become effective sixty (60) days from publication (3 Pa.C.S.A. § 1511(b)(3)(iv)).

C. Pursuant to that authority, the Committee acted to add hemp to the Controlled Plant List and published such Notice in the *Pennsylvania Bulletin* on April 6, 2019 (49 Pa.B. 1667, Saturday, April 6, 2019).

D. Section 1513 of the Act authorizes the Department to issue General Permits, on a Statewide or Regional basis, for the research, marketing, retail, wholesale, transport, storage, warehousing, display, distribution, cultivation or propagation of controlled plants, where the controlled plants have similar characteristics and are capable of being cultivated, propagated, processed and controlled or eradicated in a similar fashion (3 Pa.C.S.A. § 1513(1)).

E. General Permits and applications for General Permits must address at least those requirements set forth at section 1514(5)(i)—(viii) (3 Pa.C.S.A. § 1514(5)(i)—(viii)), but may include and address additional requirements as established by the Department herein (3 Pa.C.S.A. § 1513(3)).

F. General permits shall be published in the *Pennsylvania Bulletin* and become effective upon publication (3 Pa.C.S.A. § 1513(2)).

G. Hemp is also regulated on the Federal level by the United States Department of Agriculture (USDA) as authorized by the Agricultural Improvement Act of 2018 (115-334), (2018 Farm Bill).

H. The 2018 Farm Bill defined “hemp” as the plant species *Cannabis sativa L.* and any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not, with a delta-9 tetrahydrocannabinol concentration of not more than 0.3 percent on a dry weight basis.

I. The 2018 Farm Bill directed USDA to establish guidelines for states to follow in establishing plans to allow for state primacy in the regulation of growing or cultivation of hemp plants.

J. With the designation of hemp as a Controlled Plant under the authority of the Act, persons are required to

obtain a permit from the Department prior to cultivating, propagating, growing or processing hemp.

K. Hemp has been designated a controlled plant in Pennsylvania and its propagation, cultivation, testing, transportation, warehousing and storage, processing, distribution and sale is of a statewide concern.

L. This General Permit establishes rules and requirements for the distribution and sale of hemp planting materials, and for the propagation, cultivation, testing, transportation, warehousing, storage, and processing of hemp as authorized by the Act.

M. This General Permit does not and may not abrogate the provisions of the act related to industrial hemp research, at 3 Pa.C.S.A. §§ 701—710, including, permitted growers must still submit fingerprints to the Pennsylvania State Police for the purpose of obtaining criminal history record checks. The Pennsylvania State Police or its authorized agent shall submit the fingerprints to the Federal Bureau of Investigation for the purpose of verifying the identity of the applicant and obtaining a current record of any criminal arrests and convictions.

#### *General Permit.*

With the forgoing recitals incorporated into this General Permit by reference, the Department hereby establishes a General Permit, under the authority of the act related to controlled plants and noxious weeds (Act)(3 Pa.C.S.A. § 1501 et seq.), for the Controlled Plant, hemp. The terms of the General Permit are as follows:

#### *Article I. General Provisions and Definitions.*

(a) *Establishment of the Hemp General Permit.* A General permit is hereby established for the Controlled Plant, hemp, defined as the plant *Cannabis sativa L.* and any viable part of that plant, with a delta-9 tetrahydrocannabinol (THC) concentration of not more than 0.3 percent on a dry weight basis. This General Permit covers the entire Commonwealth.

(b) *Purpose of the General Permit.* The purpose of this general permit is as follows:

(1) To establish provisions to control the planting, growing, propagation and cultivation of hemp.

(2) To establish requirements under which persons may apply to plant, grow, propagate or cultivate hemp in the Commonwealth for the purpose of research or commercial production.

(3) To establish requirements detailing where hemp may be planted, grown, propagated and cultivated in the Commonwealth.

(4) To establish requirements for sale and distribution of hemp nursery stock.

(5) To establish requirements under which persons may apply to process hemp in the Commonwealth.

(6) To establish requirements for tetrahydrocannabinol (THC) testing of hemp planted, grown, propagated, cultivated or processed in the Commonwealth.

(7) To establish requirements for the transportation of hemp planted, grown, propagated and cultivated in the Commonwealth.

(8) To establish requirements for storage and warehousing of hemp planted, grown, propagated and cultivated in the Commonwealth.

(9) To establish requirements for the disposal of a permitted crop where the THC concentration exceeds 0.3 percent on a dry weight basis.

(c) *Definitions*

*Acceptable hemp THC level.* When a laboratory tests a sample, it must report the total delta-9 tetrahydrocannabinol content concentration level on a dry weight basis and the measurement of uncertainty. The acceptable hemp THC level for the purpose of compliance with the requirements of this General Permit is when the application of the measurement of uncertainty to the reported total delta-9 tetrahydrocannabinol content concentration level on a dry weight basis produces a distribution or range that includes 0.3 percent or less. For example, if the reported total delta-9 tetrahydrocannabinol content concentration level on a dry weight basis is 0.35 percent and the measurement of uncertainty is  $\pm 0.06$  percent, the measured total delta-9 tetrahydrocannabinol content concentration level on a dry weight basis for this sample ranges from 0.29 percent to 0.41 percent. Because 0.3 percent is within the distribution or range, the sample is within the acceptable hemp THC level for the purpose of plan compliance.

*Act.* The act of October 30, 2017, P.L. 774, No. 46, at 3 Pa.C.S.A. §§ 1501—1562, related to controlled plants and noxious weeds.

*Agent or inspector.* A representative of the Department of Agriculture duly appointed by the Secretary of Agriculture to carry out the provision of the Act and this General Permit.

*Applicant.* A person(s) signing and submitting a hemp application and responsible for ensuring compliance with the terms of the application and permit.

*Committee.* The Controlled Plant and Noxious Weed Committee established in section 1511 (relating to designation of noxious weeds and controlled plants).

*Control order.* A written order issued by the department to a person detailing required treatment measures to control noxious weeds or controlled plants.

*Controlled plant.* A plant species or subspecies that has been designated by the Committee as a controlled plant and is regulated to prevent uncontained growth and to negate undesirable characteristics.

*Controlled Substances Act (CSA).* The Federal statute codified in 21 U.S.C. 801—971, establishing Federal U.S. drug policy under which the manufacture, importation, exportation, possession, use and distribution of certain substances is regulated.

*Conviction.* Any plea of guilty or nolo contendere, or any finding of guilt, except when the finding of guilt is subsequently overturned on appeal, pardoned, or expunged.

*Culpable mental state greater than negligence.* To act intentionally, knowingly, willfully or recklessly.

*Decarboxylation.* The removal or elimination of carboxyl groups from a molecule or organic compound. Refers to the completion of the chemical reaction that converts THCA into delta-9 THC, the intoxicating component of cannabis. The decarboxylated value is also calculated using a molecular mass conversion ratio that sums delta-9 THC and eighty-seven and seven tenths (87.7) percent of THC-acid ((delta-9 THC) + (0.877\*THCA)).

*Delta-9 tetrahydrocannabinol.* Also referred to as “Delta-9 THC” or “THC” is the primary psychoactive

component of cannabis. For the purposes of this General Permit, delta-9 THC and THC are interchangeable.

*Department.* The Department of Agriculture of the Commonwealth.

*Distribute or distribution.* To barter, consign, exchange, give away, import, in any way transfer, offer for sale, sell or otherwise supply or transport a noxious weed or controlled plant in this Commonwealth.

*Drug Enforcement Administration (DEA).* A Federal law enforcement agency under the United States Department of Justice, and the lead agency for domestic enforcement of the Controlled Substances Act.

*Dry weight basis.* The ratio of the amount of moisture in a sample to the amount of dry solid in a sample. A basis for expressing the percentage of a chemical in a substance after removing the moisture from the substance. Percentage of THC on a dry weight basis means the percentage of THC, by weight, in a cannabis item (plant, extract, or other derivative), after excluding moisture from the item.

*Eradication.* The elimination or removal of a noxious weed or controlled plant so that no further growth occurs for at least three consecutive years.

*Farm Service Agency (FSA).* An agency of the United States Department of Agriculture that provides services to farm operations.

*General permit.* A Statewide or regional permit that is issued by the department for a controlled plant and specifies terms and conditions for distribution, cultivation or propagation of the controlled plant.

*Hemp.* The plant *Cannabis sativa L.* and any viable part of that plant, with a delta-9 tetrahydrocannabinol (THC) concentration of not more than 0.3 percent on a dry weight basis.

*Key participants.* A sole proprietor, a partner in partnership, or a person with executive managerial control in a corporation. A person with executive managerial control includes persons such as a chief executive officer, chief operating officer, and chief financial officer. This definition does not include non-executive managers such as farm, field, or shift managers.

*Landowner.* A person in whom is vested the title of property or with any rights in real property that permit possession or control of surface activities on the real property. The term includes a department, board, commission, agency and instrumentality of the Federal Government and the Commonwealth and any of its political subdivisions.

*Lessee.* A person who has entered into a contract granting the person occupation or use of property during a certain period of time in exchange for a specified rent.

*Lot.* The term “lot,” as defined in the Agricultural Marketing Service Final Rule (FR) on the Establishment of a Domestic Hemp Production Program (86 FR 5596), refers to a contiguous area in a field, greenhouse or indoor growing structure containing the same variety or strain of cannabis throughout the area. In addition, “lot” refers to the batch of contiguous, homogeneous whole of a product being sold to a single buyer at a single time. To be defined by the producer in terms of farm location, field acreage and variety (i.e. cultivar) and to be reported as such to the Department and the FSA.

*Negligence.* Failure to exercise the level of care that a reasonably prudent person would exercise in complying with the regulations and standards established.

*Permit.* A document issued by the Department authorizing a person to perform functions and activities related to hemp which require adherence to the rules and requirements established by this General Permit.

*Person.* An individual, corporation, association, partnership, municipality or any other entity.

*Processor.* Any person who converts hemp material from its form while in the field into a different form or product, as well as any person who receives viable hemp material from a secondary supplier, to further convert into a different form or product.

*Propagate.* To increase, multiply or spread a plant or crop through planting, cultivation or any means of reproduction.

*Remediation.* The process of rendering non-compliant cannabis, compliant. Remediation can occur by removing and destroying flower material while retaining stalk, stems, leaf material, and seeds. Remediation can also occur by shredding the entire plant into a bio-mass like material, then re-testing the shredded biomass material for compliance.

*School Property.* Any property used by students that is under the jurisdiction of a public school district, intermediate unit, area vocational-technical school, charter school or non-public school.

*THC.* The chemical delta-9 tetrahydrocannabinol. For the purposes of this General Permit, THC shall include total potential delta-9 tetrahydrocannabinol in a plant or product. THC value is determined after the process of decarboxylation, or the application of a conversion factor if the testing methodology does not include decarboxylation, that expresses the potential total delta-9 tetrahydrocannabinol content derived from the sum of the THC and THCA content and reported on a dry weight basis. This post-decarboxylation value of THC can be calculated by using a chromatograph technique using heat, such as gas chromatography, through which THCA is converted from its acid form to its neutral form, THC. Thus, this test calculates the total potential THC in a given sample. The total THC can also be calculated by using a liquid chromatograph technique, which keeps the THCA intact. This technique requires the use of the following conversion:  $(\text{Total THC} = (0.877 \times \text{THCA}) + \text{THC})$  which calculates the potential total THC in a given sample.

*USDA.* The United States Department of Agriculture.

## Article II. Procedure for Application and Permitting.

(a) *Permit Application Process.* The following rules and requirements apply to permitting and the application for a permit.

(1) To produce, process or research hemp under the Pennsylvania Hemp General Permit, a person must apply for and be issued a Permit from the Department.

(ii) *Hemp Varieties of Concern.* Hemp Varieties of Concern are varieties that have tested higher than 0.3% THC in some Pennsylvania planting locations in previous years, or have tested high in other states, resulting in crop destruction. Hemp Varieties of Concern are listed by the Department as an aid to growers making variety choices, since these varieties may present greater risk for loss. There is, however, no prohibition on planting, propagation, cultivation, sale, transfer, retail, wholesale, distribution, transportation, storage, warehousing, or processing of Hemp Varieties of Concern in the Commonwealth.

2. shall only sell hemp stock plants to permit holders within Pennsylvania or to out-of-state persons that meet the requirements of the hemp program rules in their state, which may be verified by requesting visible proof of state permit or referencing a state listing of permit or license holders.

3. *Records of planting material sales.* Records of the sale or distribution of hemp nursery stock shall be maintained for a minimum of three (3) years and shall contain the following information for each sale or distribution.

(aa) Date of the sale or distribution.

(3) All records, reports and documents shall be kept and maintained for a minimum of three years and made available to the Department for inspection upon request.

(d) *General Responsibilities.*

(1) Assure all hemp plants and products are within the boundaries of the legal description of the land, plot map and geospatial location submissions made to the Department as required by subsection (ii) above. Cannabis plants found planted, cultivated, propagated or growing outside of the boundaries will not be covered by the permit, will constitute a violation of this General Permit and will be subject to destruction.

(2) *Cessation of propagation.* If the permit holder intends to stop planting, growing, propagating or cultivating hemp, the permit holder shall notify the Department and implement all measures ordered by the Department to destroy the hemp, including all regrowth, seeds, plantings, cultivars and parts of the hemp plant.

(3) *Abandonment.* If the permit holder abandons, relinquishes possession or ownership of, control over or responsibility for the hemp in a manner inconsistent with the provisions of this General Permit, all plant material, regrowth, seeds, plantings, cultivars and parts of the hemp plant shall be destroyed in a manner ordered and approved by the department.

(4) *Continued responsibility.* The original permit holder shall continue to be responsible for the hemp and hemp materials, seeds, regrowth, plantings, cultivars and parts of the hemp plant and the cost of destruction and eradication thereof.

(5) *Penalties.* The original permit holder shall continue to be subject to the penalties imposed under the Act and this General Permit.

*Article IV. Sampling and Testing for THC.*

(a) *Sampling and testing for THC.* All hemp planted, cultivated, propagated or growing in Pennsylvania shall be sampled and tested to determine THC concentration levels.

(1) *Sampling*

(i) Official samples must be collected by a Department-certified sampling agent and in accordance with the sampling procedures and requirements established by the Department and set forth on the Department's Hemp Program webpage: [https://www.agriculture.pa.gov/Plants\\_Land\\_Water/industrial\\_hemp/Pages/default.aspx](https://www.agriculture.pa.gov/Plants_Land_Water/industrial_hemp/Pages/default.aspx).

(ii) The sampling procedures shall assure a representative sample of each variety and lot is procured for testing and address the process and procedures to be followed from entering a growing area and collecting the minimum number of plant specimens necessary to accurately represent the THC content, through laboratory testing of the samples and reporting results. At a minimum samples shall be obtained from the flowering tops of plants when flowering tops are present, and shall be approximately five to eight inches in length from the "main stem" (that includes the leaves and flowers), "terminal bud" (that

occurs at the end of a stem), or “central cola” (cut stem that could develop into a bud) of the flowering top of the plant.

(iii) The method used for sampling must be sufficient at a confidence level of 95 percent that no more than one percent of the plants in each lot would exceed the acceptable hemp THC Level and ensure that a representative sample is collected that represents a homogeneous composition of the lot. Alternatively, the Department may adopt a performance-based alternative sampling procedure following the standard in parts (A) through (E) below:

(A) Detailed description of the performance-based sampling procedure will be published on the Department’s Hemp Program webpage: [https://www.agriculture.pa.gov/Plants\\_Land\\_Water/industrial\\_hemp/Pages/default.aspx](https://www.agriculture.pa.gov/Plants_Land_Water/industrial_hemp/Pages/default.aspx) and will be subject to USDA approval.

(B) The performance-based sampling method will have the potential to ensure, at a confidence level of 95 percent, that the lots subject to this alternative sampling will not test above the acceptable hemp THC level.

(C) Performance based sampling will be considered for situations in which material obtained from a single source has been planted in non-contiguous areas that may be identified and tracked independently from other source materials. In this case, a composite sample across multiple lots may be allowable.

(D) Performance based sampling will be considered for lots for which a seed certification process has consistently demonstrated the variety represented in that lot to be compliant, or when the Department can demonstrate the variety to have tested compliant on a consistent basis in previous years.

(E) Alternative sampling will be considered when a permittee is conducting research on hemp.

(iv) Samples must be collected no more than thirty (30) days prior to harvest. If THC results are returned within the THC compliance level, but the permittee fails to complete harvest within thirty (30) days of sample collection, a second pre-harvest sample of the lot shall be required to be submitted for testing.

(v) A Chain of Custody Form developed by the Department shall be utilized by all persons authorized to take official samples.

(vi) A sample receipt shall be completed by the certified sampling agent or Department employee conducting the sampling and signed by the hemp permit holder or an authorized representative thereof, who must be present at the growing site.

(vii) No sample(s) may be removed from the permitted site prior to the chain of custody form and sample receipt being completed and signed.

(2) It shall be the responsibility of the hemp permit holder to assure that each hemp lot described in their permit is sampled and tested according to the standards established in this Order, including any alternative standards as allowed above.

(i) The hemp permit holder shall hire a Department-certified sampling agent to take a representative sample of each lot of hemp planted, cultivated, propagated or grown, to submit for testing.

(ii) It is the responsibility of the permit holder to schedule official sampling and testing prior to harvest and to be present or have an authorized representative present at the growing site at the time of sampling.

(iii) The permit holder shall designate the specific laboratory where samples will be sent for THC testing. The laboratory shall be an independent laboratory approved by the Department and able to meet all requirements for testing and reporting outlined in Article IV sections (e) and (f) below.

(iv) The hemp permit holder shall pay any fees charged and costs associated with sampling and testing.

(v) A permit holder may request that the laboratory run a second test on an official sample retained by the laboratory, if the grower questions the results of that first test. The permitted grower shall pay the fees and costs of retesting.

(vi) A permit holder may request a second official pre-harvest sampling and testing if it is believed that the original results were in error. The permittee may choose to use the same or a different laboratory for the test. No more than two official samples per lot will be considered by the Department; only the final official sample will be considered by the Department when determining compliance. The permitted grower shall pay the fees and costs of resampling and retesting.

(vii) The permitted grower shall agree to the release of all official test results from the laboratory directly to the Department.

(3) The Department may conduct random audits of hemp permit holders and take its own samples for testing.

(i) A Department employee may take official samples to audit samples taken by a certified sampling agent. Such audits will be done on a random basis and may be done at the Department’s discretion.

(ii) The Department may also take official samples pursuant to an investigation, as the result of a complaint or where an official sample tests above the 0.3% THC concentration threshold.

(b) *Prohibition Against Harvest Prior to Testing.*

(1) Hemp may not be harvested prior to an official sample being taken by the Department or a Department certified sampling agent.

(2) Any sample taken after harvest shall not be accepted, the crop will no longer be compliant, a notice of violation may be issued, and the harvested material may be required to be destroyed. Limited exceptions may be made, at the discretion of the Department, if errors in the process of sampling and testing rendered an official sample suspect or untestable, and the permit holder had already begun legal harvest before a second sample could be obtained.

(c) *Movement Prohibition.* The following rules and requirements shall apply to the movement of hemp plants, parts and products. No hemp plants, plant parts or products are permitted to be removed from the permitted growing site until all the following rules and requirements have been met:

(1) THC testing has been completed on all samples by the Department or an independent laboratory able to meet all requirements for testing and reporting outlined in Article IV sections (e) and (f) below.

(2) The testing confirms acceptable THC level(s) at or below 0.3% on a dry weight basis for all samples from each representative lot.

(d) *THC Testing.*

(1) THC levels in representative samples must test at or below a THC level of 0.3% on a dry weight basis.

(2) Hemp plant, plant parts or products testing above 0.3% may be subject to a control order and may be required to be destroyed.

(3) Harvested plants and plant parts must be separated and stored separately from each other according to lot, in a manner that maintains identity sufficient to associate that harvested material with specific THC test results, such as signage on bays of a storage facility, or tags on bales or packages, that provide lot or sample information.

(e) *THC Testing Laboratory Standards and Methods.* All the following shall comprise the rules and requirements for THC testing.

(1) Testing shall be done at the Department laboratory or an independent laboratory approved by the Department and able to meet all requirements for testing and reporting outlined in Article IV sections (e) and (f). The Department's approval process for laboratories will be published on the Department's Hemp Program webpage: [https://www.agriculture.pa.gov/Plants\\_Land\\_Water/industrial\\_hemp/Pages/default.aspx](https://www.agriculture.pa.gov/Plants_Land_Water/industrial_hemp/Pages/default.aspx).

(2) After December 31, 2022, only laboratories registered with the DEA will be approved to conduct testing under this section.

(3) Sample preparation shall include grinding of entire sample to ensure homogeneity of plant material prior to testing.

(4) Testing for THC will be conducted using post-decarboxylation or other similarly reliable method approved by the Department and by USDA where the THC concentration level measured includes the potential to convert tetrahydrocannabinolic acid (THCA) into THC. Testing methodologies currently meeting these requirements include those using gas or liquid chromatography with detection. The Department will provide additional instructions to laboratories on approved procedures via posting on the Department's hemp website.

(5) Testing shall be done and reported on a dry weight basis, determined either through testing of dried samples or calculation using moisture content analysis of samples.

(6) The laboratory must report a Measurement of Uncertainty (MU) with each hemp test result. The laboratory must be able to provide documentation for derivation of the measurement of uncertainty if requested by the Department. Laboratories shall use appropriate, validated methods and procedures for all testing activities and evaluate measurement of uncertainty.

(7) If through audit sampling, records review or other means the Department determines that a laboratory is not meeting an acceptable standard of quality in required hemp testing, it may prohibit permittees from using that laboratory for the purpose of the regulatory testing required under this General Permit.

(f) *Test Results.*

(1) Laboratories performing THC testing for hemp produced under this program shall submit certified electronic copies of all test results to the Department.

(2) The Department will provide instructions, to all laboratories performing testing for Pennsylvania permitted growers, on the information required to be included

on the test report and the manner to electronically submit test results to the Department.

(3) Permitted growers shall receive and be able to provide a copy of all test results to the Department at the Department's request.

(4) Permitted growers shall be responsible for maintaining a copy of all test results for a period of 3 years and making them available to the Department upon request.

*Article V. Disposal or Remediation of Non-compliant Products.*

(a) Where test results evidence THC levels exceeding the acceptable hemp THC level of 0.3%, the laboratory conducting the test shall promptly notify the permitted grower and the Department and provide a copy of the test results.

(b) All non-compliant hemp plants, plant parts and products shall be subject to destruction or remediation measures. The Department will issue a control order outlining options for destruction and remediation, as well as procedures the Department will use for verification of crop destruction or remediation.

(c) If the permittee opts to destroy the crop, that non-compliant crop shall be held for disposal in a manner that complies with the provisions of the control order. The disposal must be conducted either on site at the farm or hemp production facility, or by using a DEA-registered reverse distributor or law enforcement.

(d) If a producer elects to perform remediation activities, only those remediation activities outlined in the control order may be considered. An additional official sampling and testing of the post-remediated crop must occur to determine THC concentration levels, with results sent directly from the laboratory to the Department. Any non-compliant material resulting from the remediation process shall be disposed of in a manner established by the Department in the control order.

(e) If testing of a remediated lot results in a THC level above 0.3% (with the measurement of uncertainty taken into account), then that lot would be considered non-compliant and will receive a control order for crop destruction.

(f) Prior to the disposal of non-compliant hemp plants, plant parts or products, the permit holder must provide the following information and obtain approval from Department. Information shall include all the following.

- (1) DEA or USDA issued order of destruction, if any.
- (2) Anticipated date of removal, if any.
- (3) Anticipated date of destruction.
- (4) Method of destruction.

(e) Documentation of removal and destruction of the non-compliant hemp plants, hemp parts and hemp products. Documentation shall be submitted to the Department within five (5) business days of completion of the removal and destruction and shall include:

(1) Removal and destruction shall be performed by an entity approved by the Department.

(2) The permittee shall provide the Department with a copy of the documentation, including verification statements, pictures, videos or other proof approved by the Department, of disposal provided by the approved entity performing the removal and destruction; and

(3) Compliance with the reporting requirements established by the Department and USDA.

*Article VI. Transportation.*

(a) All hemp plants, hemp parts and hemp products being transported in the Commonwealth shall be packaged in a manner that complies with and allows for all the following:

(1) Conspicuous marking and individual identification of each package, bale, or load.

(2) Provides permit information to the transporter that can be utilized by law enforcement to verify the material is hemp, sets forth the manner of packaging, variety(s) and quantity and variety of material in each package.

(3) Provides information setting forth each variety of hemp plant, hemp part and hemp product in the shipment.

(4) Provides test results for all hemp, hemp parts and hemp product being transported, verifying they meet the THC standards established by law and regulation.

(b) All movement of hemp plants, plant parts and hemp products from a planting, cultivation, propagation or growing site or initial processing site shall be conducted in a manner to prevent any release of viable plant material to the environment and to maintain the identification of the producer, permit number and lot information.

(c) All shipments must be accompanied by shipping documents produced by the permit holder that shall include the following information (excluding samples being submitted for laboratory analysis):

- (1) Shipping date.
- (2) Origin of the shipment.

- (i) Permit holders name, address, phone number.
- (ii) Growing location address (if different).
- (iii) Permit number.
- (iv) Variety information.
- (13) For harvested material shipped in bulk, including bales, in addition to the accompanying documentation

listed above, the shipping documents shall include the approximate weight of the shipment and if baled the number of bales and a description of the plant material included in the shipment.

*Article VII. Warehousing and Storage.*

(a) *Movement Off the Permitted Site Prior to Results.* Hemp harvested prior to receiving THC test results, including hemp plants, hemp parts, hemp materials and hemp products, may not be moved from the permitted site until testing of an official sample at or below the acceptable THC level of 0.3% is received by the permit holder.

(b) *Movement Upon Notification of Acceptable Test Results.* Once documentation of acceptable test results are received, movement of hemp, including hemp plants, hemp parts, hemp materials and hemp products to an offsite storage location, buyer, processor or any other location shall be accompanied by all required transportation and shipping documents required under this General Permit, Article VI.

(c) *Containment.* All transportation, warehousing and storage of hemp plants, hemp parts, hemp materials and hemp products shall be conducted in a manner to prevent any release of viable plant material to the environment and to maintain the identification of the producer, permit number and varietal information for the material in storage.

- (4) Quantity, type, variety and amount of each, shipped to the facility.
- (5) Total amount of hemp in storage at each off-site location.
- (6) Permit number under which each separate load was shipped.

*Article VIII. Processing.*

(a) Hemp processors located in the Commonwealth are required to obtain a permit before receiving hemp materials at their facility. Some examples of processing hemp material include drying, grinding, trimming, bucking, extracting, etc. Further guidance for processing permits can be found on the Department's Hemp Program webpages.

- (1) No separate processing permit is required if all hemp being processed is from a growing permit under the same permittee and address.
- (2) If hemp is received from another address, a processing permit must be obtained. A processing permit is required if receiving hemp material from other permittees or moving hemp from sites with separate permits, but all under the same permittee.

(3) No permit is required for secondary or tertiary processors that do not receive any potentially viable hemp material.

(b) A permitted processor may not accept hemp plants or plant parts unless they are

(1) From a permitted or licensed grower; and

(2) Accompanied by a certificate of analysis from a laboratory confirming the THC level of the material is not above the 0.3% limit.

(3) Hemp material received from out-of-state must meet the same sampling and testing requirements required for Pennsylvania hemp growers, as described in Article IV of this General Permit.

(c) A permit holder shall keep and make available to the Department upon request, at a minimum, the following records and documentation:

(1) Information on all shipments of hemp plants and plant parts received from all in-state and out-of-state hemp growers, including

(i) Permit or license number of the grower.

(ii) Name address and phone number of the permitted or licensed grower.

(iii) Certificate of analysis evidencing compliance with THC levels for each lot received.

(iv) Date of delivery.

(v) Amount and description of materials received.

(2) Processors shall document procedures used to render all plant material non-viable, and how that non-viable material leaves the facility (whether as usable product or waste).

(d) Processors are required to notify the Department of any attempt to sell or distribute hemp or cannabis material to them by a person who does not hold a valid permit or license from the state of origin of the shipment. The documentation shall include, if known, the name, address, phone number, amount of material offered, source of the material, and varieties.

(e) Processors are required to report to the Department any shipment of material that does not contain all the information required by section (b) of this Article VIII (related to processing).

#### *Article IX. Distribution and Sale.*

(a) *Legal Responsibility.* Growers, cultivators or propagators of hemp and processors of finished hemp products shall meet all laws, regulations, orders and requirements of all authorities that regulate any produced, marketed, labeled, or distributed hemp plant, plant part or product or such material that is sold as part of the permitted hemp program.

(b) *Branding.* The name, symbols, and logos of the Commonwealth of Pennsylvania or any of its agencies, including the Pennsylvania Department of Agriculture, may not in any way be used in the labeling, promotion or marketing of any hemp products associated with the permit without explicit written permission from the Department.

#### *Article X. Hemp Permit Denial, Revocation and Suspension.*

(a) *Denial, Suspension or Revocation of Hemp Permit.* A hemp permit may be suspended or revoked if the Department or its representative receives credible information that a permittee has done any of the following:

(1) Violated a provision of the Act, the General Permit or the Department-issued Permit.

(2) Failed to comply with a written order of the Department.

(3) Failed to comply with a statutory or regulatory requirement of the USDA or other Federal agency with jurisdiction over the growing, planting, cultivation, propagation, distribution, sale, transportation, processing, warehousing, storage or marketing of hemp.

(b) *Action Upon Suspension, Revocation or Denial.* Upon suspension, revocation or denial of a permit the permit holder shall cease all activities, including planting, cultivation, propagation, selling, distribution, transportation, harvesting, and handling of any hemp plant, hemp plant part, hemp product or hemp material and shall not remove hemp or cannabis from the permitted site or location where hemp or other cannabis was located at the time when the Department issued the suspension, revocation or denial order.

#### *Article XI. Violations and Effective Date.*

(a) The Department will carry out all enforcement provisions of the Act.

(b) When the Department determines that a negligent violation has occurred, the Department may issue a Notice of Violation and require a corrective action plan to be developed and implemented.

(c) Negligent violations include (but are not limited to):

(1) failure to provide a legal description of the land on which the hemp is produced;

(2) failure to obtain a permit before engaging in production or processing;

(3) production of plants exceeding the acceptable hemp THC level. The Department will not consider hemp producers as committing a negligent violation if they produce plants exceeding the acceptable hemp THC level if they use reasonable efforts to grow hemp and the lot does not have a THC concentration of more than 1.0 percent on a dry weight basis.

(4) Failing to file required reports with the Department in a timely manner.

(i) Planting Report or Inactive Permit Report must be submitted to the Department by September 1 of the permit year. Extensions may be granted at the discretion of the Department.

(ii) Harvest Report or Crop Loss Report must be submitted to the Department by November 15 of the permit year. Extensions to filing deadline may be granted at the discretion of the Department.

(f) The Department shall approve and review a corrective action plan with the permittee and its implementation may be verified during a future audit or site visit.

(g) A permit holder who has received three negligent violations in a five-year period is ineligible to produce hemp for a period of five years from the date of the third violation. Negligent violations are not subject to criminal enforcement.

(h) If the Department determines that a violation is made with a culpable mental state greater than negligence, the Department shall report the violation to the Attorney General and the chief law enforcement officer of the commonwealth, as applicable, in addition to its own enforcement action.

*Effective date.* This General Permit shall become effective upon signature and publication in the *Pennsylvania Bulletin* and shall remain in effect until rescinded by subsequent order.

Section II identifies individual NPDES permit applications received and draft permits issued by DEP relating to sewage, industrial waste, industrial stormwater, MS4s, pesticides and CAFOs. A 30-day public comment period applies to these applications, except when a site-specific water quality criterion is used to establish effluent limitations, in which case a 45-day public comment period applies. The period for comment may be extended at the discretion of the Department for one additional 15-day period. Additional information, including links to draft permits and fact sheets that explain the basis for DEP's tentative determinations may be reviewed by generating the “Applications Received with Comment Periods Report” on DEP's website at [www.dep.pa.gov/CWPublicNotice](http://www.dep.pa.gov/CWPublicNotice). Notification of 15-day extensions for comment will be provided in the “Applications Received with Comment Periods Report” (Comments column).

Section III provides notice of applications and draft individual permits for stormwater discharges associated with construction activities. Where indicated, DEP has made tentative determinations, based on preliminary review, to issue permits subject to proposed effluent limitations consisting of best management practices identified in the erosion and sediment control (E&S) plans and post-construction stormwater management (PCSM) plans submitted with the applications, as well as other terms and conditions based on the permit applications. A 30-day public comment period applies to these applications.

Applications and NOIs may be reviewed at the DEP office that received the application or NOI. Contact information for each DEP office for Sections I & II is listed as follows. Contact information for Section III is available within the table. Members of the public are encouraged to use DEP's website to obtain additional information as previously discussed.

Comments received within the appropriate comment periods for WQM and NPDES permit applications will be retained by DEP and considered in the final determinations regarding the applications. A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform DEP of the exact basis of a comment and the relevant facts upon which it is based.

DEP office contact information to review applications and NOIs in Sections I & II and to submit comments for those application and NOIs, when applicable, is as follows:

A hearing will be held if the Department determines that there is a significant public interest. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. ## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 1

#### Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of

one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

## **AIR QUALITY**

### **PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS**

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chap-

ters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the Regional Office listed before the application. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

Code §§ 77.121—77.123 and 86.31—86.34 (relating to public notices of filing of permit applications, opportunity for comment, and informal conferences).

Written comments or objections related to a mining permit application should contain the name, address and telephone number of persons submitting comments or objections; application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code § 77.123 (relating to public hearing-informal conferences) or § 86.34 (relating to in-

formal conferences), must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

Where a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. A separate notice will be provided after the draft NPDES permit is prepared.

#### MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

##### *Effluent Limits for Coal Mining Activities*

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity\*

\*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a

precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

*Effluent Limits for Noncoal Mining Activities*

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30-days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Comments should contain the name, address and telephone number of the person commenting,

identification of the certification request to which the comments or objections are addressed, and a concise statement of comments, objections or suggestions including the relevant facts upon which they are based.

The Department may conduct a fact-finding hearing or an informal conference in response to comments if deemed necessary. Each individual will be notified, in writing, of the time and place of a scheduled hearing or conference concerning the certification request to which the comment, objection or suggestion relates. Maps, drawings and other data pertinent to the certification request are available for inspection between the hours of 8:00 AM and 4:00 PM on each working day at the office noted above the application.

If you are a person with a disability and wish to attend the hearing and you require an auxiliary aid, service or other accommodation to participate in the proceedings, please contact the specified program. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

**Permit No. E4601121-002, Pennsylvania Department of Transportation**, Engineering District 6-0, 7000 Geerdes Boulevard, King of Prussia, PA 19406, New Hanover Township, **Montgomery County**, ACOE Philadelphia District.

The Pennsylvania Department of Transportation (PennDOT) is proposing to amend a previously authorized Water Obstruction and Encroachment Permit, Permit No. E46-1189, due to design changes to the proposed stream enclosure. PennDOT is proposing remove an existing 40.8-foot long, 6-foot by 3-foot concrete box culvert and in its place, construct and maintain a 115-foot long, 18-foot by 5.2-foot single cell precast concrete box stream enclosure carrying Minster Creek (TSF-MF) depressed 1-foot of natural streambed material. This activity will result in 166 linear feet (7,118 square feet, 0.16 acre) of permanent stream impact, 33 linear feet (528 square feet, 0.01 acre) of temporary stream impact, 240 linear feet (24,000 square feet, 0.55 acre) of permanent floodway impact which includes grading and bank repair downstream of proposed stream enclosure, and 4,700 square feet (0.110 acre) of temporary floodway impact due to access and erosion and sediment control measures. Wetland impacts include 135 square feet (0.003 acre) of permanent and 448 square feet (0.010 acre) of temporary wetland impacts to two PEM wetlands. There are two additional activities within the project boundary which include the construction and maintenance of a new 48-inch diameter outfall with placement of riprap rock apron located downstream of the proposed PennDOT stream enclosure and also the removal of an abandoned driveway pipe culvert upstream of the proposed PennDOT stream enclosure. Impacts to resources are accounted for within the permanent floodway and stream impacts stated previously.

The overall project will result in 16,123 square feet (0.370 acre) of floodplain impact and is located approximately 280 feet north of the North Charlotte Street and Swamp Pike intersection in New Hanover Township, Montgomery County (USGS PA Sassamansville Quadrangle—Latitude: 40.300076 N, Longitude: 75.584671 W).

This action is a result of the review of a minor update revision for the Rapho Business Park Sewer Extension (DEP Code No. C3-36948-484-3; APS ID No. 949658). The existing development—located along Shellyland Road and Arrowhead Drive in Manheim—consists of commercial sites within the Rapho Business Park that are currently using on-lot disposal systems. The proposed change in method of sewage disposal involves extending public sewer to allow connections for these businesses, with additional sewage flows totaling 9,400 gallons per day tributary to the Mount Joy Borough Authority sewer system. The Department's review of the minor update revision has not identified any significant impacts resulting from this proposal.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 2

**The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).**

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of receipt of plans or reports appears. If information con-

cerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 3

**The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. ## CORRECTIVE ACTION UNDER ACT 32, 1989 PREAMBLE 2

**The following plans and reports were submitted under the Storage Tank and Spill Prevention Act (35 P.S. §§ 6021.101—6021.2104).**

Provisions of 25 Pa. Code Chapter 245, Subchapter D, Administration of the Storage Tank and Spill Prevention Program, require the Department of Environmental Protection (DEP) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A remedial action plan is submitted to summarize the site characterization, document the design and construction details for the remedial action, and describe how the remedial action will attain the selected remediation standard. The remedial action plan also provides results of studies performed and data collected to support the remedial action and a description of postremediation care requirements. A remedial action completion report is submitted to document cleanup of a release of a regulated substance at a site to the selected remediation standard. A remedial action completion report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure

factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected.

For further information concerning plans or reports, please contact the Environmental Cleanup Program Manager in the DEP Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the DEP through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

The remedial action plan also provides results of studies performed and data collected to support the remedial action and a description of postremediation care requirements. A remedial action completion report is submitted to document cleanup of a release of a regulated substance at a site to the selected remediation standard. A remedial action completion report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling meth-

## DEPARTMENT OF HUMAN SERVICES

### Temporary Fee Schedule Rates for Community Participation Support and Transportation Trip Services Funded Through the Consolidated, Community Living, Person/Family Directed Support and Adult Autism Waivers and the Community Intellectual Disability Base-Funded Program

The Department of Human Services (Department) is implementing temporary increases to the Fee Schedule Rates for Community Participation Support services in the Consolidated, Community Living and Person/Family Directed Support (P/FDS) Waivers and for Transportation Trip services in the Consolidated, Community Living, P/FDS and Adult Autism Waivers. These changes are being made due to impacts on service as a result of the novel coronavirus (COVID-19) pandemic. The temporary increases to existing Fee Schedule Rates are retroactive to January 1, 2021. The temporary increase to the Fee Schedule Rates will end on June 30, 2021.

These temporary increases to the rates will also apply to the Department-established fees under 55 Pa. Code § 4300.115(a) (relating to Department established fees) for base-funded services managed through county programs for individuals with an intellectual disability under the Mental Health and Intellectual Disability Act of 1966 (50 P.S. §§ 4101—4704); 55 Pa. Code Chapter 4300 (relating to county mental health and intellectual disability fiscal manual); and 55 Pa. Code Chapter 6100 (relating to services for individuals with an intellectual disability or autism).

The temporary Fee Schedule Rates have been loaded to PROMISE™ and may be billed. The Home and Community Services Information System has also been automatically updated to include the new Community Participation Support and Transportation Trip Fee Schedule Rates and critical revisions to Individual Support Plans will not be necessary to implement the change to the Fee Schedule Rates. Providers should review service authorizations to confirm that they are billing the increased Fee Schedule Rate.

#### *Fee Schedule Rates*

The Department used a market-based approach to establish the temporary Fee Schedule Rates for Community Participation Support and Transportation Trip services. To determine the temporary Fee Schedule Rates, the Department decreased the productivity assumptions due to individuals being absent from services as a result of COVID-19. The Department established the temporary increases to the Fee Schedule Rates to fund services provided at a level sufficient to ensure access, encourage provider participation and promote provider choice during the COVID-19 pandemic, while at the same time ensuring cost effectiveness and fiscal accountability. The temporary increases to the Fee Schedule Rates represent the maximum rates that the Department will pay for services.

**Fee Schedule Rate for Community Participation Support Services Effective  
January 1, 2021, through June 30, 2021**

**Fee Schedule Rate for Transportation Trip Services Effective  
January 1, 2021, through June 30, 2021**

<i>Service</i>	<i>Unit of Service</i>	<i>Procedure Code</i>	<i>Temporary Fee Schedule Rate</i>
Transportation Trip	Zone 1 (greater than 0 and up to 10 miles)	W7274	\$33.83
	Zone 2 (greater than 10 miles and up to 30 miles)	W7275	\$60.91
	Zone 4 (over 30 miles)	W7276	\$69.19

*Fiscal Impact*

It is anticipated that the temporary enhanced rates from January 1, 2021, through June 30, 2021, would cost a total of \$18.837 million (\$7.836 million in State funds), which includes \$16.337 million (\$6.796 million in State funds) for Community Participation Support and \$2.500 million (\$1.040 million in State funds) for Transportation Trip. However, the Department anticipates the decrease in utilized services resulting in a decrease of expenditures, which will offset any increase as a result of the temporary enhanced rates. This should keep expenditures within the current level of funding for Fiscal Year 2020-2021 for all affected programs.

*CWSRF Projects Being Considered:*

<i>Applicant:</i>	Lewis Township
<i>County:</i>	Northumberland
<i>Applicant Address:</i>	P.O. Box 143 Watsonstown, PA 17777-0143

*Project Description:* The project includes the installation of approximately 1,440 linear feet of 8-inch gravity sewer mains, 850 linear feet of 1.5-inch high-density polyethylene (HDPE) low pressure sewer mains, 840 linear feet of 1.25-inch HDPE low pressure sewer mains and 3,700 linear feet of 3-inch HDPE force mains. The project also includes construction of a pump station to convey wastewater from the 19 homes served in the project area to the existing Lewis Township wastewater treatment plant.

*Problem Description:* This project addresses a needs area in the Schell Road and Koch Road area of Lewis Township, Northumberland County, which consists of 26 equivalent dwelling units (EDU). The Township found that 14 of the 26 EDUs exhibit confirmed malfunctions.

The finalized service area addressed by the project will serve 19 EDUs including all 14 of the malfunctions.

<i>Applicant:</i>	Londonderry Township
<i>County:</i>	Dauphin
<i>Applicant Address:</i>	783 South Geyers Church Road Middletown, PA 17057

*Project Description:* A 1.25-inch to 3-inch diameter low-pressure sanitary sewer main will be installed in the Londonderry Estates area of Londonderry Township. The public portion of the sewer line will be approximately 4,425 linear feet in length and designed to carry the flow to the existing Derry Township Municipal Authority's (DTMA) collection and conveyance system. The project also includes installing approximately four air release valves inside of concrete manholes, terminal cleanout assemblies, inline clean-out assemblies and corrosion protection lining systems in three existing manholes downstream of the low-pressure sewer connection.

*Problem Description:* The Londonderry Estates area of Londonderry Township consists of 50 existing onlot septic systems, some of which have failed while others are suspected to be failing. A new public sewer system will convey all flow collected in the service area to DTMA's Clearwater Road wastewater treatment plant for treatment and disposal.

<i>Applicant:</i>	Masontown Municipal Authority
<i>County:</i>	Fayette
<i>Applicant Address:</i>	1 East Church Avenue Masontown, PA 15461

*Project Description:* There are four construction contracts with this project. Two construction contracts are proposed for the Big Run Service Area. Contract # 1, servicing four sewersheds, consists of removing and replacing approximately 16,000 linear feet of sanitary sewer. Contract # 2, servicing three sewersheds, consists of removing and replacing approximately 21,000 linear feet of sanitary sewer. Downspout and sump pump connections will also be removed in the Big Run Service Area by means of Contracts # 1 and # 2. Contract # 3, servicing all four sewersheds within the Bessemer Run service area, involves removing and replacing approximately 15,000 linear feet of sanitary sewer. Contract # 4 is for storm sewer improvements. Approximately 1,400 linear feet of an existing 48-inch x 36-inch pipe arch, currently undersized and restricting channel infiltration, will be removed while the original channel will be restored to accommodate increased storm flows from the project area. In addition, a new aluminum pipe arch will be constructed at North Redwood Street.

*Problem Description:* Hydraulic overloading of the existing sanitary sewer system exists during wet weather at Masontown Municipal Authority's wastewater treatment facilities. Televised inspection of the sanitary sewer collection and conveyance system revealed extensive infiltration from vitrified clay pipe as well as inflow issues. The project replaces failing infrastructure and will eliminate stormwater connections to the sanitary sewer system in an attempt to eliminate the hydraulic overloading.

*DWSRF Projects Being Considered:*

<i>Applicant:</i>	Columbia Water Company
<i>County:</i>	Lancaster
<i>Applicant Address:</i>	220 Locust Street Columbia, PA 17512

*Project Description:* The project consists of three components. The first component is constructing a new river intake adjacent to the existing intake in the Susquehanna River for the Walnut Street water treatment plant and installing a new air burst system, a frazil ice protection system and a new valve vault. The second component is rehabilitating the Prospect Road storage tank. The third component is installing an emergency generator at the Spruce Street booster station.

*Problem Description:* The existing intake consists of only bar screens, which allow passage of sediment and debris to the water treatment plant resulting in increased maintenance. The existing intake is also subject to clogging by sediment and frazil ice and requires frequent backflushing. The existing valve vault is located on the river's edge and inaccessible during floods or ice jams. The proposed valve vault will allow safe operation of the valves during these conditions. No changes to the permitted withdraw amount or location are proposed. The Prospect Road storage tank was recently inspected and found to need a complete replacement of the interior coating system and, at a minimum, an over-coating of the exterior. An emergency generator is required at the Spruce Street booster station to meet the Department's uninterrupted service requirements.
