READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published weekly. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. It is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations, Statewide court rules, and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, rescission, repeal or emergency action, must be published in the *Pennsylvania Bulletin*.

The following documents are published in the *Pennsylvania Bulletin*: Governor's Executive Orders; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or rescind regulations must first publish in the *Pennsylvania Bulletin* a Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. A Final Rulemaking must be published in the *Pennsylvania Bulletin* before the changes can take effect. If the agency wishes to adopt changes to the Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies, Statewide court rules and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes when they are adopted. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code* § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government.

How to Find Rules and Regulations

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacodeandbulletin.gov.

Source Notes give the history of regulations. To see if there have been recent changes not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

A quarterly List of *Pennsylvania Code* Sections Affected lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

The *Pennsylvania Bulletin* is available at www.pacodeandbulletin.gov.

Printing Format

Rules, Regulations and Statements of Policy in Titles 1—107 of the Pennsylvania Code

Text proposed to be added is printed in **underscored bold face**. Text proposed to be deleted is enclosed in brackets [] and printed in **bold face**.

Proposed new chapters and sections are printed in regular type to enhance readability. Final rulemakings and statements of policy are printed in regular type.

Ellipses, a series of five asterisks, indicate text that is not amended.

In Proposed Rulemakings and proposed Statements of Policy, existing text corresponds to the official codified text in the *Pennsylvania Code*.

Court Rules in Titles 201—246 of the Pennsylvania Code

Added text in proposed and adopted court rules is printed in **underscored bold face**. Deleted text in proposed and adopted court rules is enclosed in brackets [] and printed in **bold face**.

Proposed new chapters and rules are printed in regular type to enhance readability.

Ellipses, a series of five asterisks, indicate text that is not amended.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires the Governor's Budget Office to prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions and authorities receiving money from the State Treasury. The fiscal note states whether the action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions. The fiscal note is required to be published in the *Pennsylvania Bulletin* at the same time as the change is advertised.

A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; and (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years. In item (8) the recommendation, if any, made by the Secretary of the Budget is published with the fiscal note. "No fiscal impact" means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended. See 4 Pa. Code Chapter 7, Subchapter R (relating to fiscal notes).

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish information except as provided by 1 Pa. Code § 3.44:

§ 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the [Legislative Reference] Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

GOVERNOR'S OFFICE

Amendment to Proclamation of Disaster Emergency

August 4, 2021

Whereas, on January 10, 2018, I declared a disaster emergency due to the opioid crisis that is ravaging the country, including the Commonwealth of Pennsylvania and its citizens;

Whereas, my Proclamation of Disaster Emergency dated January 10, 2018, was renewed by Amendment to Proclamation of Disaster Emergency (1st Amendment) on April 4, 2018, for an additional ninety days. The April 4, 2018, 1st Amendment would have automatically expired by operation of law on July 3, 2018, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on June 28, 2018. The June 28, 2018, Amendment to Proclamation of Disaster Emergency (2nd Amendment) was set to expire by operation of law on September 26, 2018, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on September 24, 2018. The September 24, 2018, Amendment to Proclamation of Disaster Emergency (3rd Amendment) was set to expire by operation of law on December 23, 2018, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on December 21, 2018. The December 21, 2018, Amendment to Proclamation of Disaster Emergency (4th Amendment) was set to expire by operation of law on March 21, 2019, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on March 20, 2019. The March 20, 2019, Amendment to Proclamation of Disaster Emergency (5th Amendment) was set to expire by operation of law on June 18, 2019, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on June 14, 2019. The June 14, 2019, Amendment to Proclamation of Disaster Emergency (6th Amendment) was set to expire by operation of law on September 12, 2019, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on September 5, 2019. The September 5, 2019, Amendment to Proclamation of Disaster Emergency (7th Amendment) was set to expire by operation of law on December 4, 2019, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on December 3, 2019. The December 3, 2019, Amendment to Proclamation of Disaster Emergency (8th Amendment) was set to expire by operation of law on March 2, 2020, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on February 25, 2020. The February 25, 2020, Amendment to Proclamation of Disaster Emergency (9th Amendment) was set to expire by operation of law on May 25, 2020, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on May 22, 2020. The May 22, 2020, Amendment to Proclamation of Disaster Emergency (10th Amendment) was set to expire by operation of law on August 20, 2020, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on August 18, 2020. The August 18, 2020, Amendment to Proclamation of Disaster Emergency (11th Amendment) was set to expire by operation of law on November 16, 2020, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on November 12, 2020. The November 12, 2020, Amendment to Proclamation of Disaster Emergency (12th Amendment) was set to expire by operation of law on February 10, 2021, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on February 9, 2021. The February 9, 2021, Amendment to Proclamation of Disaster Emergency (13th Amendment) was set to expire by operation of law on May 10, 2021, unless further extended by my official renewal;

Whereas, I renewed the Proclamation of Disaster Emergency for an additional ninety days by official action on May 7, 2021. The May 7, 2021, Amendment to Proclamation of Disaster Emergency (14th Amendment) is set to expire by operation of law on August 5, 2021, unless further extended by my official renewal;

Whereas, the opioid crisis continues to be of such magnitude or severity that emergency action is necessary to protect the health, safety, and welfare of affected citizens in Pennsylvania;

Whereas, the opioid crisis continues to be a public health emergency in Pennsylvania contributing to addiction, overdose emergencies and deaths; and

Whereas, investigations by the Opioid Unified Coordination Group indicate that additional resources of the Commonwealth may be needed to mitigate and contend with the magnitude and severity of this continuing and expanding disaster emergency.

Now Therefore, pursuant to the provisions of section 7301(c) of the Emergency Management Services Code, 35 Pa.C.S. § 7301(c), I do hereby order and direct as follows:

1. The Proclamation of Disaster Emergency of January 10, 2018, renewed by Amendments to Proclamation of Disaster Emergency dated April 4, 2018, June 28, 2018, September 24, 2018, December 21, 2018, March 20, 2019, June 14, 2019, September 5, 2019, December 3, 2019, February 25, 2020, May 22, 2020, August 18, 2020, November 12, 2020, February 9, 2021, and May 7, 2021, is renewed, and shall continue to apply to the Commonwealth of Pennsylvania.

2. All directives, authorized actions and provisions of the January 10, 2018, Proclamation of Disaster Emergency, and the April 4, 2018, June 28, 2018, September 24, 2018, December 21, 2018, March 20, 2019, June 14, 2019, September 5, 2019, December 3, 2019, February 25, 2020, May 22, 2020, August 18, 2020, November 12, 2020, February 9, 2021, and May 7, 2021, Amendments to Proclamation of Disaster Emergency shall remain in full force and effect.

3. This Proclamation Amendment (15th Amendment) shall take effect immediately.

Given under my hand and the Seal of the Governor, at the city of Harrisburg, on this fourth day of August two thousand twenty-one, the year of the commonwealth the two hundred and forty-sixth.

Effective Dates of Statutes

The effective dates specified for laws and appropriation acts were contained in the applicable law or appropriation act. Where no date is specified or where the effective date specified is prior to the date of enactment, the effective date is 60 days after final enactment except for statutes making appropriations or affecting budgets of political subdivisions. See 1 Pa.C.S. §§ 1701—1704 (relating to effective date of statutes).

Advance Copies of Statutes

Section 1106 of 1 Pa.C.S. (relating to prothonotaries to keep files of advance copies of statutes) provides that the prothonotaries of each county shall file advance copies of statutes in their offices for public inspection until the *Laws of Pennsylvania* are generally available.

One-time purchases of the advance copies of statutes can be purchased through the State Bookstore's web site at www.shoppaheritage.com.

Title 231—RULES OF CIVIL PROCEDURE

PART I. GENERAL

[231 PA. CODE CH. 1000]

Proposed Amendment of Pa.R.C.P. No. 1035.3

The Civil Procedural Rules Committee is considering proposing to the Supreme Court of Pennsylvania the amendment of Rule 1035.3 for the reasons set forth in the accompanying explanatory report. Pursuant to Pa.R.J.A. 103(a)(1), the proposal is being published in the *Pennsylvania Bulletin* for comments, suggestions, or objections prior to submission to the Supreme Court.

Any reports, notes, or comments in the proposal have been inserted by the Committee for the convenience of those using the rules. They will neither constitute a part of the rules nor be officially adopted by the Supreme Court.

Additions to the text of the proposal are bolded and underlined; deletions to the text are bolded and bracketed.

The Committee invites all interested persons to submit comments, suggestions, or objections in writing to:

Annex A

TITLE 231. RULES OF CIVIL PROCEDURE

PART I. GENERAL

CHAPTER 1000. ACTIONS

Subchapter A. CIVIL ACTION

PLEADINGS

Rule 1035.3. Response. Judgment for Failure to Respond.

(a) Except as provided in subdivision (e), the adverse party may not rest upon the mere allegations or denials of the pleadings but must file a response within [**thirty**] 30 days after service of the motion identifying

(1) one or more issues of fact arising from evidence in the record controverting the evidence cited in support of the motion or from a challenge to the credibility of one or more witnesses testifying in support of the motion, or

Official Note: If the moving party has supported the motion with oral testimony only, the response may raise the defense that there is a genuine issue of material fact because the cause of action is dependent upon the credibility and demeanor of the witnesses who will testify at trial. See *Nanty-Glo v. American Surety Co.*, 309 Pa. 236, 163 A. 523 (1932); *Penn Center House, Inc. v. Hoffman*, 520 Pa. 171, 553 A.2d 900 (1989).

(2) evidence in the record establishing the facts essential to the cause of action or defense which the motion cites as not having been produced.

(b) An adverse party may supplement the record or set forth the reasons why the party cannot present evidence essential to justify opposition to the motion and any action proposed to be taken by the party to present such evidence.

(c) The court may rule upon the motion for judgment or permit affidavits to be obtained, depositions to be taken or other discovery to be had or make such other order as is just.

(d) Summary judgment may be entered against a party who does not respond.

Official Note: Procedural requirements with respect to argument and briefs are governed by local rule.

In certain counties, the failure to respond to a motion may result in the motion being deemed uncontested and the entry of the judgment sought.

See Rule 1035.2 providing for the entry of judgment in whole or in part.

(e)(1) Nothing in this rule is intended to prohibit a court, at any time prior to trial, from ruling upon a motion for summary judgment without written responses or briefs if no party is prejudiced. A party is prejudiced if he or she is not given a full and fair opportunity to supplement the record and to oppose the motion.

(2) A court granting a motion under subdivision (e)(1) shall state the reasons for its decision in a written opinion or on the record.

Official Note: Subdivision (e) does not abrogate the requirement that a motion for summary judgment be timely filed pursuant to Rule 1035.2 or case management order.

If a motion is not timely filed, subdivision (e) provides the court with the discretion as to the manner of proceeding, including whether to consider the motion at all. The court should not consider the motion except in the interests of justice.

(f) If the reasons for the order denying summary judgment do not appear of record, any party may, within ten days of the order, request the trial court to provide the reasons for such ruling, either in writing or orally, on the record within 15 days of the request. The failure of the trial court to provide such reasons pursuant to this subdivision shall not be immediately appealable nor an independent basis for judicial relief.

PUBLICATION REPORT

The Civil Procedural Rules Committee is considering proposing to the Supreme Court an amendment to Pa.R.C.P. No. 1035.3 governing summary judgment to

permit a party to request the trial court to provide on the record the reasons for the denial of summary judgment.

This proposal arose from a request of a state association seeking a procedural requirement for a court, upon motion, to state the reasons for granting or denying a motion for summary judgment. In support of its request, the association contended:

In Common Pleas courts, decisions granting and denying critical and often complex motions for summary judgment are sometimes issued by way of orders with no opinion explaining the basis for the decision. Orders without any stated reasons for the decision appear to be more common in some counties and less common in others.

When these important motions are decided without opinion, the parties are left without knowledge of what issues have been decided and how they were decided, often making it difficult to know how to proceed further with the case in regard to issues for trial and whether to attempt to settle. Often later judges in the same case, or in a subsequent case where the decision becomes pertinent, are in the dark as to the meaning of the decision.

The association noted that the present practice varies among judicial districts with some providing the rationale and others not at all. A rule would provide some level of statewide consistency. It also recognized the tension between the benefit of the parties receiving reasons and the anticipated burden on the judges who currently do not provide reasons.

Upon review of the proposal, the Committee agreed there is a benefit to the parties in understanding the rationale for the decision insofar as it better informs the parties as to which outstanding questions of material facts may exist, the applicability of the law to those facts, and whether a right of appeal may exist. This information may result in more productive settlement discussions, pretrial conferences, and trial of contested matters especially when the parties' stipulations and admission do not facilitate identification of material items of dispute.

In the absence of data to indicate the precise scope of present judicial practice of providing rationale, the Committee is unable to determine the extent of the burden such a requirement may place on judges who currently do not provide reasons. To lessen any burden, the Committee agreed that a statement of reasons should not be tantamount to a full opinion; rather, the reasons may be set forth in a brief written opinion, a written note appended to or footnoted in an order, or, as stated previously, orally on the transcribed record. Further, the Committee revised the proposal to remove any requirement for reasons for granting a motion for summary judgment. That rationale would be forthcoming in the form of a Pa.R.A.P. 1925 opinion if and when an appeal is taken from a final order. Moreover, the Committee believed that any procedural mechanism for requesting a statement of reasons should not result in the possibility of prolonging litigation or create more work than is necessary for the judge. Therefore, the Committee added to the rule that judicial non-compliance should neither be an appealable order nor serve as a basis for seeking judicial relief. As for the timing element, the Committee did not believe that 15 days was overly burdensome on a judge to disclose reasons for a recent decision. This deadline was intended to be directory, not mandatory.

In sum, the proposal would amend Rule 1035.3 to add subdivision (f) to permit a party to request the trial court to provide its reason for denying a motion for summary judgment and for the judge to provide the same within 15 days of the request. This new subdivision may change the present practice for some judges and the Committee specifically seeks input from those jurists. There may be a day when subdivision (f) becomes unnecessary when all judges, as a matter of course, provide their reasoning contemporaneous with an order denying a motion for summary judgement.

The Committee invites all comments, objections, concerns, and suggestions regarding this proposed rule-making.

Title 25—LOCAL COURT RULES

BUCKS COUNTY

Adoption of Court Action to Reduce Evictions Program; Administrative Order No. 101

Order

And Now, this 2nd day of August, 2021, pursuant to the following August 2, 2021, Order of the Pennsylvania Supreme Court specifically authorizing the undersigned to establish and operate the Court Action to Reduce Evictions program, and upon consideration of:

1. the continuing economic effects of the ongoing COVID-19 pandemic, including with particular relevance to this order, job losses and the attendant income reduction or elimination for those who have lost employment, many of whom rely on residential rental properties to provide shelter for themselves and their families;
2. the potential negative impacts upon individuals, families and public health caused by eviction for those who due to the above economic effects of the COVID-19 pandemic have been unable make the timely payments required to maintain their residential rental arrangement;
3. the pending July 31, 2021, expiration of the CDC Order originally issued on September 1, 2020, and most recently extended on June 24, 2021, which stays all residential evictions for non-payment of rent upon submission of a declaration in compliance with the Order;
4. the existence of available government funds to assist both tenants facing eviction and landlords whose rental income has been reduced or eliminated due to the combination of the economic effects of the COVID-19 pandemic and the continuance on evictions imposed by the CDC Order; and
5. the valuable work of the Bucks County Emergency Rental Assistance ("BERA") program and other similar organizations for the benefit of tenants and landlords in both educating the public regarding the availability of government assistance, and securing delivery of funds to satisfy past and ongoing rental obligations in appropriate cases;

it is *Ordered* and *Decreed* that the Court Action to Reduce Evictions program is adopted as follows:

1. At any time subsequent to commencement of an action for recovery of possession of residential real property for non-payment of rent, any party to the action, or BERA upon consent of a party to the action, may submit a request to the presiding Magisterial District Judge for a continuance of proceedings, which request shall be signed by a representative of BERA and certify that the defendant has applied for emergency rental assistance. Upon receipt by the Magisterial District Judge of such a request, all proceedings, including pending execution on any order of possession, shall be continued for 30 days.

2. If a request for continuance pursuant to this order is not submitted by or not signed by a representative of BERA, the Magisterial District Judge, if satisfied that a good faith application for rental assistance has been or will be submitted to BERA or another comparable assistance agency, may continue the matter in her or his sole discretion for 30 days.

3. In the Magisterial District Judge's sole discretion, a continuance pursuant to this order may be extended for an additional 30 days upon request or sua sponte. One such extension of the continuance may be granted; no further extension is permitted. No continuance shall exceed a total of 60 days, and only one continuance pursuant to this order may be imposed in any action.

4. Should any pending BERA application be denied, withdrawn, or otherwise finally determined in a manner adverse to the applicant during the period of a continuance entered pursuant to this order, the Magisterial District Judge may in her or his discretion terminate the continuance and the action shall proceed.

5. A continuance pursuant to this order shall be imposed only in actions for recovery of possession of residential real property for non-payment of rent in which an application for rental assistance has been submitted to BERA or another comparable assistance agency. Nothing herein shall be construed to require imposition of a continuance in actions brought for reasons other than non-payment of rent or actions in which no application for rental assistance has been submitted.

6. A continuance imposed pursuant to this order prior to expiration of the order shall survive the expiration of the order and may be extended as permitted above. Said continuance shall expire 30 or 60 days from imposition as directed herein.

7. Insofar as any continuance mandated by or otherwise entered pursuant to this order should come into conflict with Pa.R.C.P.M.D.J. No. 209 and Pa.R.C.P.M.D.J. Nos. 515—519, the operation of said rules is hereby suspended for the duration of this order.

This order is effective immediately and shall expire on October 31, 2021.

PROPOSED RULEMAKING

ENVIRONMENTAL QUALITY BOARD

[25 PA. CODE CHS. 225, 227, 227a AND 228]

Radiation Safety Requirements for Non-Healing Arts Radiation Generating Devices

The Environmental Quality Board (Board) proposes to amend Chapters 225 and 228 (relating to radiation safety requirements for industrial radiographic operations; and radiation safety requirements for particle accelerators), delete Chapter 227 (relating to radiation safety requirements for analytical X-ray equipment, X-ray gauging equipment, electron microscopes and X-ray calibration systems) and add Chapter 227a (relating to radiation safety requirements for non-healing arts radiation-producing devices) to read as set forth in Annex A. This proposed rulemaking would amend these chapters in Article V (relating to radiological health) to include clarification and guidance regarding radiation safety and update the standards for protection against radiation.

This proposed rulemaking was adopted by the Board at its meeting on May 19, 2021.

A. Effective Date

This proposed rulemaking will be effective 90 days after final-form publication in the *Pennsylvania Bulletin*.

B. Contact Persons

For further information, contact John Chippo, Chief, Division of Radiation Control, P.O. Box 8469, Rachel Carson State Office Building, Harrisburg, PA 17105-8469, (717) 783-9730; or Christopher Minott, Assistant Counsel, Bureau of Regulatory Counsel, P.O. Box 8464, Rachel Carson State Office Building, Harrisburg, PA 17105-8464, (717) 787-9372. Information regarding submitting comments on this proposed rulemaking appears in section J of this preamble. Persons with a disability may use the Pennsylvania Hamilton Relay service, (800) 654-5984 (TDD users) or (800) 654-5988 (voice users). This proposed rulemaking is available electronically on the Department of Environmental Protection's (Department) web site at www.dep.pa.gov (select "Public Participation," then "Environmental Quality Board").

C. Statutory Authority

The proposed amendments to Chapters 225, 227, 227a and 228 are authorized under section 301(c) of the Radiation Protection Act (35 P.S. § 7110.301(c)), which requires the Department to develop and conduct comprehensive programs addressing the "registration, licensing, control, management, regulation and inspection of radiation sources and radiation source users," section 302(a) of the Radiation Protection Act (35 P.S. § 7110.302(a)), which requires the Board to "adopt the rules and regulations of the department to accomplish the purposes and carry out the provisions of [the] act," and section 1920-A of the Administrative Code of 1929 (71 P.S. § 510-20), which authorizes the Board to promulgate rules and regulations necessary for the performance of the work of the Department.

D. Background and Purpose

The Board last updated the radiological health regulations in 2019 to provide for updates and technological advances in uses of radiation sources in medical X-ray operations. However, radiological health regulations re-

lated to non-medical X-ray equipment have not been updated since 2009. Since then, advancements in X-rays and other ionizing radiation particles used for nonmedical purposes have necessitated updated regulations to ensure the public, workers and environment are protected from the potentially harmful effects of ionizing radiation. Over-exposure to radiation can cause a wide range of potential negative health impacts, such as skin burns, radiation sickness, cancer and death in the most extreme cases.

Given these potential health impacts, the proposed amendments included in this proposed rulemaking address nonmedical X-ray operations and emerging technologies in the industrial field to ensure that exposure to radiation from nonmedical radiation-producing devices is as low as reasonably possible. Some examples of nonmedical X-ray operations and emerging technologies that these proposed regulations would apply to include many recent advances in X-ray capabilities for bomb detection, contrast scanning, and advanced welding and detection capabilities.

The proposed regulations would affect approximately 1,400 radiation-producing device registrants in this Commonwealth. These registrants include radiographers, drug rehabilitation centers, food manufacturers, primary metal manufacturers, fabricated metal product manufacturers, machinery manufacturers, computer and electronic product manufacturers, and other miscellaneous manufacturers. In addition to these types of businesses, registrants could be government offices such as prisons and courthouses, universities and research laboratories. A small number of registrants (currently three registrants) for radiation-producing devices used in individual security screening will be affected by being required to provide training on the use of equipment to staff that do not have formal training or knowledge in radiological sciences or radiation safety. These are the registrants of radiation-producing devices used in individual security screening as described in proposed § 227a.52 (relating to radiation-producing devices used in individual security screening).

As more fully explained as follows, the proposed amendments to Chapter 225 are intended to separate and more clearly outline requirements applicable to nonmedical X-ray operations and field radiography. It is proposed that Chapter 227, which pertains to radiation safety requirements for analytical X-ray gauging equipment, electron microscopes and X-ray calibration systems, be deleted and reserved. Regulations currently in Chapter 227 are to be moved to proposed Chapter 227a, which outline radiation requirements for these nonhealing arts radiation-producing devices. The requirements were rewritten and rearranged to incorporate Suggested State Regulations (SSR) Part H and Part E, and to clarify all the requirements. The regulated community suggested that creating this new chapter would help them to more clearly understand their regulatory obligations. Existing Chapter 228 is proposed to be amended to update a definition to match the United States Nuclear Regulatory Commission's terminology.

These proposed amendments are based on standards for radiation-producing devices set by recognized accrediting bodies and National organizations. Specifically, the proposed amendments incorporate the SSR Part H and the training requirements in SSR Part E that were developed by the Conference of Radiation Control Program Directors (CRCPD). The American National Stan-

dards Association was consulted in developing these amendments. One of CRCPD's goals is to ensure uniformity in Federal and state radiation protection laws and regulations. Typically, Federal agencies develop radiation control regulations and standards, but it is left to the state to implement and enforce those regulations and standards. The CRCPD reviews draft and final Federal regulations and, through various working groups, develops model state regulations called SSRs. A new SSR could be developed for a given issue or problem, but more often they are updated to reflect new Federal regulations. As with Federal regulations, once new or revised SSRs are complete, they undergo a CRCPD Board and peer review and then are published as draft within the CRCPD Director Members for comment. The draft SSRs are sent to Federal agencies for concurrence. States may adopt a CRCPD model state SSR as is or modify them to conform to their regulatory frameworks.

This proposed rulemaking was also developed in consultation with the Department's Radiation Protection Advisory Committee (RPAC). Members of RPAC represent the regulated community, including professional health physics and medical physics organizations, as well as environmental, health, science, engineering, business or public interest groups. This proposed rulemaking was introduced to RPAC on October 10, 2019. An RPAC subcommittee, which was comprised of professionals in the industries potentially impacted by these proposed regulations, had further discussions on the draft proposed rulemaking on December 15, 2019, and January 15, 2020. RPAC again reviewed the package with the revisions made as a result of the recommendations of the subcommittee on March 19, 2020. On July 9, 2020, RPAC voted to concur with the Department's recommendation that this proposed rulemaking move forward in the regulatory process.

E. Summary of Regulatory Requirements

The heading for Subchapter B (relating to radiation-producing machines) is proposed to be changed to "Radiation-Producing Devices" to more accurately reflect the applicability of the subchapter. Similar changes are proposed throughout various sections of Chapter 225.

§ 225.71. Definitions

Section 225.71 (relating to definitions) is proposed to be amended to add a definition for "radiographic X-ray systems" to accommodate the revisions to § 225.101 and to delete the definitions of "cabinet radiography," "cabinet X-ray system," "certified cabinet X-ray system," "permanent radiographic installation" and "shielded room radiography." These deleted definitions are proposed to be moved to Chapter 227a. The definition of "radiographer trainee" is proposed to be deleted because, according to the industry, this is not a position. The definition of "industrial radiography" is proposed to be amended to match the Federal definition: "An examination of the structure of materials by nondestructive methods, utilizing ionizing radiation to make radiographic images."

§ 225.72. Duties of personnel

Subsection (d) is proposed to be deleted and reserved. The prohibition in subsection (d) against a radiographer trainee using radiation-producing devices is not applicable because, according to the industry, there is not a position as a radiographer trainee. This is the reason for the proposed deletion of the definition of "radiographer trainee" in § 225.71.

§ 225.74. Training and testing

Subsection (a)(3) is proposed to be amended by adding "at least 160 hours" to the requirement of receiving

instruction covering regulatory requirements, operating and emergency procedures, and the use of radiation-producing devices and radiation survey instruments of the registrant or licensee. This amendment is being proposed to incorporate the training requirement from SSR Part E. Subsection (c) is proposed to be amended to lengthen the record retention requirement from 3 years to 5 years to maintain consistency throughout this Commonwealth's radiological health regulations.

§ 225.76. Reporting requirements

Subsection (a)(2) is proposed to be amended by deleting the requirement of paragraph (2) that an interlock failure during shielded room radiography is subject to the reporting requirements of this section. These reporting requirements are being deleted from this section because the subject of shielded room radiography has been moved to Chapter 227a. The reporting requirements in subsection (a)(1) are incorporated in subsection (a).

§ 225.81. Permanent radiographic installations

Section 225.81, which outlines entrance and entrance control requirements for permanent radiographic control devices, is proposed to be deleted and reserved as these requirements have been moved to the new Chapter 227a.

§ 225.82. Operating requirements

Subsection (a) is proposed to be amended to clarify that the operating requirements of this section apply to field radiographic operations rather than at a location other than a permanent radiographic installation. Also, the reference to "radiographer trainee" is deleted.

A minor editorial change is proposed in subsection (c)(4) of this section by switching the placement of a reference to 200 milliroentgen. The proposed switch will equate the Board's regulations to Federal nomenclature and will not change the meaning of the subsection.

§ 225.84. Operating and emergency procedures

Paragraph (9) is proposed to be amended from radiation-producing machines to radiation-producing devices.

§ 225.85. Surveys and survey records

Subsection (b) is proposed to be amended to lengthen the record retention requirement from 3 years to 5 years to maintain consistency throughout this Commonwealth's radiological health regulations.

§ 225.86. Utilization logs

Several provisions are proposed to be amended from radiation-producing machine to radiation-producing device. This section is proposed to be amended to lengthen the record retention requirement from 3 years to 5 years to maintain consistency throughout this Commonwealth's radiological health regulations.

§ 225.92. Radiation survey meter calibration requirements

Minor editorial amendments are proposed for subsections (a) and (b)(5) by switching the placement of units of measurement and to correct a typographical error. The proposed changes will not change the meaning of the subsections. Subsection (c) is proposed to be amended to lengthen the record retention requirement from 3 years to 5 years to maintain consistency throughout this Commonwealth's radiological health regulations.

§ 225.93. Personnel monitoring control

A minor editorial change is proposed for subsection (d)(1) of this section by switching the placement of a

reference to 200 mR. The proposed switch will equate the Department's regulations to Federal nomenclature and will not change the meaning of the subsection. Subsection (d)(3) is proposed to be amended to lengthen the record retention requirement from 3 years to 5 years to maintain consistency throughout this Commonwealth's radiological health regulations.

§ 225.101. *Cabinet X-ray systems and baggage/package X-ray systems*

This section is proposed to be deleted and reserved. Requirements applicable to cabinet X-ray systems, security screening systems, baggage and package systems are proposed under Chapter 227a, as described as follows in section E.

§ 225.101a. *Radiographic X-ray systems*

This section proposes to add requirements applicable to radiographic X-ray systems. Paragraphs (1)—(7) would establish a dose limit measured at a distance of 1 meter of 100 mR in 1 hour when an X-ray tube is operated at its leakage technique factors and compliance would be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters; require that an X-ray system have a collimator to restrict the useful beam; require that a means be provided to terminate exposure after a preset time, a preset to image receptor, or a preset product of exposure time and tube current; require that the X-ray control have a dead-man type exposure switch; require that X-ray controls indicate technique factors (for example, kilovoltage, tube current and exposure time); specify labeling requirements, including a requirement for a sign bearing the radiation symbol; and a requirement that an easily visible warning light be located adjacent to an X-ray tube and be illuminated only when the X-ray tube is energized or the shutter is open. These regulations are currently in § 225.104(c) (relating to X-ray detection systems for explosives, weapons and illegal items) but are proposed to be relocated to this section due to splitting the types of radiography regulated between Chapters 225 and 227a.

Paragraph (8) would require registrants to perform radiation surveys to demonstrate compliance with 10 CFR 20.1301 (relating to dose limits for individual members of the public). Additionally, this paragraph includes a record retention requirement of 5 years to maintain consistency throughout this Commonwealth's radiological health regulations. The registrant would be required to maintain records upon acceptance of the equipment, following maintenance requiring the disassembly or removal of any shielding equipment, and when a visual inspection reveals an abnormal condition.

Paragraph (9) would require that records of tests of on-off switches, interlocks and safety devices subject to this section be maintained for 5 years rather than the currently required 3 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

§ 225.102. *Shielded room X-ray radiography*

This section is proposed to be deleted and reserved. The provisions of subsections (a)—(c) are proposed to be transferred to proposed § 227a.55 (relating to shielded room radiation-producing devices) with minor editorial changes. The exemption provision of existing subsection (d) is proposed to be deleted, because shielded room radiography is proposed to be transferred to Chapter 227a and these exemptions are for Chapter 225 for field

radiography. Chapter 227a exemptions are in proposed § 227a.3 (relating to exemptions).

§ 225.103. *Field site radiography*

It is proposed that the heading of this section be amended by deleting "site" to make it clear the section applies to field radiography.

Subsection (a) is proposed to be amended by requiring that survey results and records of boundary locations be maintained for 5 years rather than 3 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

Subsections (a.1) through (a.6) are proposed to be added to require surveillance of the exposure area be maintained during operation; require that a suitable calibrated radiation detection instrument be used to verify the radiation sources is in its shielded position or that the X-ray tube has been de-energized; establish that an appropriately designed and calibrated personal alarming dose meter must be worn to approach the work area to detect the source; and that measurements of radiation levels for a radiation survey be performed using an appropriate calibrated radiation survey meter; the radiation levels shall be measured around the perimeter, which shall be adjusted accordingly, of the controlled area; and, the survey around the perimeter shall be made for each new operating condition. These provisions are incorporated from SSR Part H; however, it is proposed that they be split between Chapters 225 and 227a to be consistent with the types of radiography regulated under the respective chapters.

§ 225.104. *X-ray detection systems for explosives, weapons and illegal items*

It is proposed that this section be deleted and reserved. Requirements in this section are instead proposed to be addressed in proposed Chapter 227a.

Chapter 227. Radiation Safety Requirements for Analytical X-ray Equipment, X-ray Gauging Equipment, Electron Microscopes and X-ray Calibration Systems

Chapter 227 is proposed to be deleted and reserved. A new Chapter 227a, entitled "Radiation Safety Requirements for Non-Healing Arts Radiation-Producing Devices" and consisting of four subchapters, is proposed to be added as more fully described as follows. The proposed subchapters relate to general provisions, general technical requirements, closed-beam radiation-producing devices and open-beam radiation-producing devices. This new chapter expands upon the explanations of the requirements that are in the current Chapter 227 to provide more clarity to the regulated community and includes emerging technologies in the field.

Chapter 227a. Radiation Safety Requirements for Non-Healing Arts Radiation-Producing Devices

Subchapter A. General Provisions

§ 227a.1. *Purpose and scope*

Proposed § 227a.1 establishes that Chapter 227a would regulate nonhealing arts radiation-producing devices operating between 5 kiloelectron volts and 1 million electron volts and apply to all devices defined in § 227a.2. It clarifies that registrants subject to this chapter would also be subject to the requirements of Chapters 215, 216, 219 and 220. The proposed chapter would not pertain to radiation safety requirements for X-ray equipment covered under Chapters 221 (relating to X-rays in the healing arts), 225 and 228.

This section would establish that the provisions in proposed Chapter 227a would apply to cabinet radiography, shielded room radiography, bomb detection equipment and open-beam radiography. Open-beam industrial radiography not in a shielded room or specifically listed in this chapter is regulated under Chapter 225.

§ 227a.2. *Definitions*

Proposed § 227a.2 sets forth the definitions of 55 terms and acronyms which are used in Chapter 227a. These definitions have been incorporated from SSR Part H, except for “electron microscope” which is moved from § 227.2, and “lockout/tagout,” “radiation-producing devices used in individual security screening system,” “open-beam radiation-producing device,” and “permanent radiographic installation”, which are new definitions. Additionally, the terms “qualified expert,” “radiation safety officer” and “registrant” have been added and are defined by referencing their definitions in § 215.2 (relating to definitions), as well as the definition for “X-ray tube” as defined in § 221.2 (relating to definitions).

§ 227a.3. *Exemptions*

Proposed subsections (a) and (b) provide that bomb protection radiation equipment and handheld radiation-producing devices are exempt from the posting requirements of proposed § 227a.16 (relating to posting). Posting is unnecessary for these as they are mobile devices and radiation safety of the equipment and devices is under the control of the user.

Proposed subsection (c) describes equipment which is exempt from the requirements of Chapter 227a. Exempt equipment includes domestic television receivers, cold-cathode gas discharge tubes and other electrical equipment, other than electron microscopes that produce radiation incidental to its operation. To be exempt, the referenced equipment must conform to exposure limits specified in the proposed regulation.

Proposed subsection (d) clarifies that the equipment described in this section would not be exempt from the requirements of Chapter 227a if it is used or handled in a way that an individual might receive a radiation dose in excess of limits specified in Chapter 219 (relating to standards for protection against radiation).

Proposed subsection (e) provides that equipment operating at less than or equal to 50 kiloelectron volts (kV) tube voltage and designed to be held by an operator is exempt from the requirements of Chapter 227a except for those set forth in §§ 227a.12 and 227a.21 (relating to labeling; and instruction and training). This is because the exposure levels are negligible and do not affect the public's health or safety.

§ 227a.4. *Application for exemptions*

Proposed § 227a.4 (relating to application for exemptions) describes how a registrant that is subject to the requirements of Chapter 227a but cannot meet one or more requirements of Chapter 227a shall request an exemption to those requirements and what information needs to be submitted for the exemption. The information to be submitted would include a demonstration that the use will not result in undue hazard to public health and safety; that compliance with the provision from which exemption is sought would not require replacement or substantial modification of the radiation-producing device; and that radiation protection equivalent to that required by the provision from which the exemption is sought will be achieved.

Subchapter B. General Technical Requirements

Proposed Subchapter B (relating to general technical requirements) outlines general technical requirements applicable to proposed Chapter 227a. Proposed Subchapter B includes proposed §§ 227a.10—227a.22.

§ 227a.10. *Radiation safety program*

Proposed § 227a.10 (relating to radiation safety program) outlines the requirements for a radiation safety program for registrants intending to use radiation-producing devices. The program would include employee training, normal operating procedures, emergency procedures, monitoring reports, internal review systems and an organizational structure for radiation protection. This requirement is added to ensure the safety of those operating and subjected to radiation-producing devices.

§ 227a.11. *Warning devices*

Proposed § 227a.11 (relating to warning devices) would require that warning devices be labeled with their purpose to ensure awareness and to have a warning light of a fail-safe design to prevent any failures of the warning light.

§ 227a.12. *Labeling*

Proposed subsection (a) prescribes labeling requirements for radiation-producing devices to provide the user or anyone near with a visual warning that the equipment may become dangerous when energized. Proposed subsection (b) prescribes labeling requirements for radiation-producing devices with designed openings for object entries, such as baggage units.

§ 227a.13. *Radiation source housing*

Proposed subsection (a) requires that when an X-ray tube housing is the primary shielding for an X-ray tube, the housing be equipped with an interlock that shuts off the high voltage to the X-ray tube if the housing is opened for normal use or maintenance.

Proposed subsection (b) requires that the housing be constructed so that the leakage radiation measurement at 5 centimeters distance does not exceed 2.5 millirem to ensure dose rates are maintained at a rate that is as low as reasonably achievable.

§ 227a.14. *Generating cabinet or high voltage source radiation emission limits*

Proposed § 227a.14 (relating to generating cabinet or high voltage source radiation emission limits) provides that an X-ray generator or high-voltage source must have a protective cabinet that limits leakage radiation to 0.5 millirem per hour at 5 centimeters. Alternative measurement specifications are proposed for closed-beam radiation-producing devices, radiation-producing devices in a shielded room with the high-voltage generator also inside the room and for handheld, open-beam radiation-producing devices. These alternative measurement specifications are proposed, because different device types have different dose rates associated with them.

§ 227a.15. *Surveys*

Proposed subsection (a) provides that radiation surveys must be sufficient to evaluate the radiation emissions and potential hazards and that the survey records be maintained for 5 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations. It specifies that a survey must be performed upon installation and once every 12 months thereafter; after a change in initial arrangement, number or type of local components and prior to

returning to service; following maintenance that requires disassembly, removal or repair; during performance of maintenance, calibration and another procedure if it requires the presence of a primary beam while any local component is disassembled or removed; following bypass of a safety device or interlock; when a visual inspection of the local components shows an abnormal condition; and when a personal monitoring device shows a significant increase, as predetermined by the registrant, over the previous monitoring period or approaches the limits of 10 CFR 20.1201 (relating to occupational dose limits). Surveys after these events are important, because these types of events could involve changes to the major parts of the device and therefore, the resulting beam produced could be altered. The surveys are necessary to make sure the beam is not performing outside of its intended limits.

Proposed subsection (b) provides that a registrant must have access to sufficiently calibrated, appropriate and operable radiation survey instruments to make physical radiation surveys required under Chapter 227a.

Proposed subsection (c) requires that a registrant assure the maintenance and calibration of all monitoring and survey instruments under 10 CFR 20.1501 (relating to general) to ensure the instruments can accurately detect the type of radiation measured.

Proposed subsection (d) provides that radiation surveys are not required if a registrant otherwise demonstrates compliance with Chapter 227a to the Department's satisfaction.

§ 227a.16. *Posting*

Proposed § 227a.16 (relating to posting) provides that signage must be conspicuously posted in each area or room containing a radiation-producing device where an individual may receive 2 millirem (0.02 mSv) in any 1 hour or 100 millirem (1mSv) per year to caution individuals that radiation is produced when the device is energized.

§ 227a.17. *Security*

Proposed § 227a.17 (relating to security) provides that radiation-producing devices must be secured at all times to be accessible or operated only by authorized personnel to prevent unauthorized use and possible unintended radiation exposure.

§ 227a.18. *Operating requirements*

Proposed subsection (a) would require normal operating procedures to be written and available to all radiation-producing device workers to ensure all workers are properly trained in the correct use of the device, thus preventing unnecessary radiation exposure.

Proposed subsection (b) outlines requirements relating to bypassing. A safety device or interlock may be bypassed only if approved by the radiation safety officer. When there is a bypass, a sign explaining that the safety device is not working must be placed on the radiation source housing and at the control switch. These requirements are from the current § 227.13a and are being transferred to this section.

Proposed subsection (b) would also require that records of bypasses be maintained to ensure proper procedures were followed during the bypass as these procedures will be reviewed during an inspection, and to ensure the safety of those involved in the procedure. Records of bypasses must contain the date and a detailed description of the bypass, length of time the unit was in the altered condition, the post bypass survey noted in § 227a.15

(relating to surveys) and other relevant information. The records shall be signed by the radiation safety officer, the individual who performed the bypass and the individual who restored the unit.

Proposed subsection (c) outlines requirements relating to the control panel. A radiation-producing device may only be activated from a control panel, and indicators and controls that control the primary beam must be identifiable through the use of labels, symbols, software displays or equivalent methods.

Proposed subsection (d) outlines requirements relating to interlocks. An interlock may only be used to de-activate an X-ray tube in an emergency or during testing of an interlock system. In addition, the resetting of a radiation-producing device must only be possible from the control panel and all interlocks must be of a fail-safe design.

Proposed subsection (e) outlines requirements applicable to multiple sources of radiation being operated from a control panel. Visual indicators must identify which tube assembly or focal spot was selected and if a letter or number is used for identification, a reference card or table explaining the code must be affixed to the control panel.

§ 227a.19. *Repair or modification of X-ray tube or radiation-producing device*

Proposed § 227a.19 (relating to repair or modification of X-ray tube or radiation-producing device) provides that only trained personnel or registered service providers are permitted to install or repair a radiation-producing device. It provides that certain operations may only be performed after ascertaining that the X-ray tube is off and that a lock-out/tag-out must be used for routine shutdown for repairs. These requirements will ensure that experts are the only individuals able to repair or modify a radiation-producing device and provides for specifications to ensure the safety of this personnel while completing the repairs.

§ 227a.20. *Testing of safety devices*

Proposed subsection (a) requires that tests of safety devices be conducted at intervals not to exceed 12 months to ensure the proper operation of the safety devices so no unnecessary exposure of radiation could occur.

Proposed subsection (b) provides that if a safety device fails, it must be removed from service until repaired or temporary administrative controls are established. Temporary administrative controls must be approved by the radiation safety officer. An example of temporary administrative controls is disconnecting the device from its power source, so that no radiation can be produced until the device can be repaired.

Proposed subsection (c) requires that records of safety device tests, check dates, findings and corrective actions be retained for 5 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

Proposed subsection (d) specifies that the records must include the date of the tests, a list of safety devices tested, survey instrument information, calibration date, the results of the test, the name of the person performing the test and corrective actions taken if the device fails the test.

Proposed subsection (e) provides that a test may be deferred if the unit or installation is clearly marked and kept out of service. A unit or installation brought back into service after 12 months must be tested prior to use.

Proposed subsection (f) provides that if a safety device test cannot be performed due to manufacturer design, the registrant must document that and specify why the safety device cannot be tested.

§ 227a.21. *Instruction and training*

Proposed § 227a.21 outlines training requirements for individuals who operate or maintain a radiation-producing device or enters a shielded room. An individual must receive instruction in and demonstrate competence in types of radiation and hazards associated with the use of the device and precautions and measures to minimize radiation exposure; the significance of warnings and safety devices installed on the equipment or reasons that they are not installed; the potential hazards of use, biological effects of radiation, radiation risks and recognition of symptoms of an acute exposure; normal operating procedures, including training, for each type of device and associated equipment; emergency procedures for reporting actual or suspected accidental exposures; and radiation survey performance. Records of all required training and instruction shall be retained onsite and available for the Department to review for 5 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

§ 227a.22. *Radiation protection responsibility*

Proposed subsection (a) provides that a registrant's designated senior management is responsible for the ultimate decision to use a radiation-producing device and for radiation safety. The registrant will document the designated senior management responsible for radiation safety and maintain those records for the Department to review for 5 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

Proposed subsection (b) provides that the registrant's senior management will designate a radiation safety officer. That individual would be responsible for: ensuring devices are operated in accordance with an established radiation safety program and normal operating procedures; instructing personnel in safe working practices; the investigation and reporting of incidents; ensuring safety devices, interlocks, warning signals, labels, postings and signs are functioning and located where required; and for maintaining radiation safety records for 5 years.

Subchapter C. Closed-Beam Radiation-Producing Devices

Subchapter C (relating to closed-beam radiation-producing devices) is proposed to be added to establish requirements applicable to closed-beam radiation-producing devices. Subchapter C includes proposed §§ 227a.30—227a.35 as more fully described as follows.

§ 227a.30. *System enclosure*

Proposed § 227a.30 (relating to system enclosure) provides that a radiation source, sample or object, detector and analyzing crystal of a closed-beam radiation-producing device must be enclosed in a chamber or coupled chambers that cannot be entered by any part of the human body during normal operation to protect the user from unnecessary radiation exposure.

§ 227a.31. *Interlocks*

Proposed § 227a.31 (relating to interlocks) provides that the doors and panels of a closed-beam radiation-producing device must be interlocked and the interlock must be of a fail-safe design. These interlocks will not allow the doors or panels of a device to be opened while energized, thus preventing unnecessary exposure to radiation.

§ 227a.32. *Interlock functions*

Proposed § 227a.32 (relating to interlock functions) provides that a closed-beam radiation-producing device enclosure, sample chamber or similar enclosure must be interlocked with the X-ray tube high voltage supply or a shutter in the primary beam, or both, so that no X-ray beam can enter the sample or object chamber while it is open unless the interlock has been deliberately defeated. An interlock would be deliberately defeated if a bypass was performed as described in § 227a.18 (relating to operating requirements). It provides that the interlock must be of a fail-safe design or have adequate administrative controls to ensure operations can only continue with a proper functioning interlock.

§ 227a.33. *Radiation emission limit*

Proposed § 227a.33 (relating to radiation emission limit) provides that the radiation dose for closed-beam radiation-producing devices must not exceed 0.5 millirem (0.005 mSv) per hour at 5 centimeters outside any accessible surface. This dose limit was taken from SSR Part H and the current § 227.12a(b), which is proposed to be deleted and replaced by this section.

§ 227a.34. *Security screening devices*

Proposed § 227a.34 (relating to security screening devices) requires that closed-beam security screening devices must have a mechanism to ensure operator presence at the control area in a location that enables surveillance of the openings and doors of the control area during generation of radiation. During an exposure or preset succession of exposures of less than 0.5 second duration, the closed-beam security screening device must have a mechanism to enable the operator to terminate exposure or a preset succession of exposures at any time. The device must also have a mechanism to allow completion of the radiation exposure in progress but must enable the operator to prevent additional exposure during an exposure or preset succession of exposures of less than 0.5 second duration. These requirements ensure that an operator is able to safely monitor and manage an active security screening device.

§ 227a.35. *Electron microscope devices*

Proposed subsection (a) outlines the labeling requirements for closed-beam electron microscope devices. It must have a conspicuous sign bearing the words, "Caution Radiation—This Equipment Produces Radiation When Energized," or words containing a similar warning.

Proposed subsection (b) provides radiation levels 5 centimeters from an accessible surface of a closed-beam electron microscope device may not exceed 0.5 millirem (0.005 mSv) per hour.

Proposed subsection (c) provides that no individual may operate or conduct maintenance on closed-beam electron microscopes until the individual has a copy of, is instructed in, and has demonstrated an understanding of the normal operating procedures to ensure radiation safety.

Subchapter D. Open-Beam Radiation-Producing Devices

Subchapter D (relating to open-beam radiation-producing devices) is proposed to be added to establish requirements applicable to open-beam radiation-producing devices. Subchapter D includes proposed §§ 227a.40—227a.55 as more fully described as follows.

§ 227a.40. *Safety device*

Proposed subsection (a) provides that a registrant must document its justification of the registrant's use of an

open-beam radiation-producing device rather than a closed-beam radiation-producing device. This requirement is proposed due to the higher likelihood of radiation exposure associated with an open-beam system compared to a closed beam system.

Proposed subsection (b) provides that if a registrant uses an open-beam radiation-producing device, the registrant must consider the use of a safety device to minimize the chance of entry of any portion of the operator's body into the path of the primary beam or which causes the primary beam to shut off upon entry into its path.

Proposed subsection (c) provides that if a safety device cannot be used to minimize the chance of direct body exposure, the registrant must maintain a record of the various safety devices evaluated and reasons the devices cannot be used. The records must be maintained for as long as the method is used plus an additional 5 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

Proposed subsection (d) provides that if a registrant's use of an open-beam radiation-producing device prevents the use of a safety device, the registrant must use alternative methods, such as policies and procedures, to minimize the possibility of unnecessary exposure. The alternative methods must be documented, and the documentation maintained for as long as the methods are used, plus an additional 5 years to ensure consistency in record retention time requirements throughout this Commonwealth's radiological health regulations.

Proposed subsection (e) provides that a portable open-beam radiation-producing device without a safety device described in § 227a.40(b) (relating to safety device) that is manufactured to be used as a handheld device will meet the safety device requirements described in subsections (b)—(d) by complying with § 227a.50 (relating to handheld radiation-producing devices) prior to use.

§ 227a.41. X-ray on status

Proposed § 227a.41 (relating to X-ray on status) requires that open-beam radiation-producing devices must provide a conspicuous and active indication of the following, as applicable; an X-ray tube "on-off" status indicator located near the radiation source; and a shutter "open-closed" status indicator located at the control panel and near each beam port on the radiation source housing. The X-ray tube "on-off" and shutter "open-closed" status indicators must be of a fail-safe design. These requirements ensure the safety of the operator and prevent unnecessary radiation exposure.

§ 227a.42. Labeling

Proposed § 227a.42 (relating to labeling) provides that each unit must be labeled at or near the X-ray exit beam port to identify the location of the beam with the words "CAUTION—X-RAY BEAM" or "CAUTION—HIGH INTENSITY X-RAY BEAM" or words with similar intent. This ensures the safety of the operator and any other users.

§ 227a.43. Beam ports

Proposed § 227a.43 (relating to beam ports) requires that unused beam ports on radiation source housing be secured in the closed position to prevent them from being inadvertently used.

§ 227a.44. Shutters

Proposed § 227a.44 (relating to shutters) provides that for open-beam radiation-producing device configurations

that are designed to accommodate interchangeable components, each beam port on the radiation source housing must be equipped with a shutter that cannot be opened unless a collimator or a component coupling has been connected to the beam port. This has been incorporated from SSR Part H and prevents unnecessary radiation being emitted from a port that is not being used.

§ 227a.45. Radiation emission limits

Proposed § 227a.45 (relating to radiation emission limits) provides that radiation emission limits (exclusive of the primary beam), set by the registrant, must be met at any specified tube rating established by the manufacturer. Local components of an open-beam radiation-producing device must be located and arranged and include sufficient shielding or access control so that no radiation emissions exist in any area surrounding the local component group which could result in an occupational radiation dose in excess of that specified in 10 CFR Part 20 Subpart C (relating to occupational dose limits) or a dose to an individual present therein in excess of the radiation dose limits outlined in § 219.51 (relating to dose limits for individual members of the public).

§ 227a.46. Primary beam attenuation

Proposed § 227a.46 (relating to primary beam attenuation) provides that in cases where the primary beam is not intercepted by the detector devices under all conditions of operation, protective measures, such as auxiliary shielding or administrative procedures, must be provided to avoid exposure to any individual from the transmitted primary beam.

§ 227a.47. Operator attendance

Proposed § 227a.47 (relating to operator attendance) provides that the operator must be present at all times when the equipment is in operation except when the area is locked or the equipment is secured against unauthorized or accidental entry.

§ 227a.48. Control of access

Proposed § 227a.48 (relating to control of access) provides that if a radiation-producing device is not in a restricted area as defined in 10 CFR 20.1003 (relating to definitions), an operator of a radiation-producing device shall control access to the device at all times during operation. Radiation areas must be conspicuously identified, and the source located within a conspicuous perimeter that identifies where the radiation levels could result in an exposure to an individual in excess of 0.005 rem (0.05 mSv) in 1 hour or 0.1 rem (1 mSv) in 1 hour if it is a high radiation area. In radiation areas and high radiation areas, the perimeter must have a radiation caution sign and the operator must ensure no one enters the area during the operation of the device. In addition, an operator must perform a visual check of the controlled area to ensure that it is free of unauthorized personnel prior to activating or exposing the source.

§ 227a.49. Instruction and training

Proposed § 227a.49 (relating to instruction and training) provides that an individual may not operate or maintain an open-beam radiation-producing device unless the individual has met the requirements of § 227a.21 and received training applicable to the procedures to be performed and the equipment used. Applicable training may include instruction and demonstrated competence as to sources and magnitude of common radiation exposure; units of radiation measurement; radiation protection concepts of time, distance, shielding and ALARA (as low as reasonably achievable); procedures and rights of a de-

clared pregnancy; regulatory requirements and area postings; worker embryo/fetus and public dose limits; proper use of survey instruments and dosimetry; and policies and procedures required under § 227a.40.

§ 227a.50. *Handheld radiation-producing devices*

Proposed § 227a.50 outlines additional requirements in Chapter 227a applicable to open-beam handheld radiation-producing devices. Paragraph (1) would require a registrant to have operating policies and procedures which ensure: that radiation protection is provided equivalent to that afforded under § 219.51 and § 227a.46; that the operator will not hold the sample during operation of the device and the operator's hands will not approach the primary beam; that the operator will not aim the primary beam at themselves or any individual during operation of the device; and that operator exposure is as low as reasonably achievable by use of means such as ancillary equipment.

With respect to training, paragraph (2) proposes that in addition to the proposed training requirements under §§ 227a.21 and 227a.49, a registrant of handheld radiation-producing devices provide training specified in this section for all users of the devices. This is due to the ease of unnecessary radiation exposure with these devices. Records of all user and operator training would be required to be maintained for 5 years to ensure consistency with record retention time requirements throughout this Commonwealth's radiological health regulations.

With respect to radiation emission limits, paragraph (3) proposes that the radiation emission limits in §§ 227a.13(b) (relating to radiation source housing) and 227a.14, excluding the primary beam, would be met if the radiation emission on any accessible surface of the device does not exceed 2.5 millirem (0.025mSv) per hour at 5 centimeters.

§ 227a.51. *Bomb detection radiation-producing devices*

Proposed § 227a.51 (relating to bomb detection radiation-producing devices) sets forth additional requirements applicable to bomb detection radiation-producing devices. The additional requirements are that the device be locked to prevent unauthorized use when not in use; a use log be maintained for each device that includes a description of the unit, date removed from storage, date returned to storage, name and signature of person assigned the device and the dates and sites of use; and that security be provided to prevent entry by individuals when the device is energized during training.

§ 227a.52. *Radiation-producing devices used in individual security screening*

Proposed § 227a.52 sets forth additional requirements for radiation-producing devices used in individual security screening. A person requesting Department approval for these devices would be required to submit information addressing the requirements described as follows and receive Department approval prior to use.

A requester must submit an efficacy evaluation which evaluates all known alternate methods that could achieve the goals of the individual security screening program and explain why these methods will not be used in preference to the applicant's approach using ionizing radiation and an equipment evaluation by a qualified expert upon installation of the individual security screening device; after maintenance that affects the shielding, shutter mechanism or X-ray production components; upon any damage to the system; and every 12 months.

The applicant must show how the radiation dose limits described herein will be met. Dose limits for general use systems must be limited to 25 microrem (rem) when used without regard to the number of scans per individual per year; dose limits for limited-use systems must be less than or equal to 1 mrem (0.01 mSv) when equipment is capable of operation greater than 25 rem in a 12-month period at the facility; and dose limits for repeat individual security screenings at a single site may not receive an effective dose greater than 25 mrem (0.25 mSv) in a 12-month period.

Other requirements include: information regarding the effective radiation dose from one screening and example comparing the dose with known sources of radiation exposure be made available to screening subjects; training includes 8 hours of training for the radiation safety officer in radiation safety, 2 hours of training for the operator in radiation safety in addition to operation training provided by the manufacturer and annual refresher training for operators and radiation safety officers; individual security screening is prohibited on an individual under 18 years of age and individuals who have declared pregnancy without prior Department approval; a preventive maintenance schedule from the manufacturer be followed; the registrant is responsible to have a written radiation safety program based on accepted radiation protection principles developed and implemented, and that program be reviewed at least annually by the radiation safety officer; and that relevant records be maintained for 5 years.

§ 227a.53. *Radiation-producing devices used in vehicle security screening*

Proposed subsection (a) provides that when procedures for the operation of a mobile or transportable device used for security screening of vehicles includes knowingly exposing human occupants, the system is subject to the same requirements as general-use or limited-use systems in § 227a.52(1)–(5), described in the first two paragraphs of the discussion of § 227a.52.

Proposed subsection (b) provides that if the requirements of § 227a.52(1)–(5) cannot be met, then a means must be provided to assure that no occupants are present in the vehicle during screening.

Proposed subsection (c) provides that the effective radiation dose for a single inadvertent exposure to an individual must not exceed 500 mrem (5 mSv) and that a pre-screening with a mode or system that can meet the limits in § 227a.52(3)–(5) (described in the second paragraph of the discussion of § 227a.52 previously) must be used to verify the vehicle is unoccupied if the 500 mrem (5 mSv) limit cannot be assured.

§ 227a.54. *Permanent radiographic installations*

Proposed subsection (a) provides that each entrance for personnel access have visual warning signals for whenever the X-ray source is energized and have audible warning signals when an attempt is made to enter the installation when the source is energized to warn of the presence of radiation.

The entrance control device or alarm system is to be tested prior to beginning operations on each day of use to ensure proper functionality.

If the entrance control device or alarm system is not functioning properly, it must be removed from service and repaired or replaced immediately. If there is no replacement available, the facility may continue to be used as long as the registrants provide continuous surveillance in accordance with 10 CFR 34.51 and 34.53 (relating to

surveillance; and posting) and § 225.85 (relating to surveys and survey records) and uses an alarming ratemeter. These extra requirements are necessary to verify and document that the X-ray source is not energized while also ensuring the safety of the workers.

Proposed subsection (b) requires records of the tests performed to be maintained for 5 years. This ensures consistency with record retention time requirements throughout this Commonwealth's radiological health regulations.

§ 227a.55. Shielded room radiation-producing devices

Proposed subsection (a) provides that a room used for shielded room X-ray radiography must be shielded so every location on the exterior meet conditions for an unrestricted area and that access to the room may only be through openings that are interlocked.

Proposed subsection (b) requires an operator to conduct a physical radiation survey to determine the source is deenergized prior to entry into the exposure area.

Proposed subsection (c) provides that an operator may use an independent radiation monitoring system that displays when radiation levels have returned to their pre-irradiation levels as an alternative to the survey required in subsection (b).

Chapter 228. Radiation Safety Requirements for Particle Accelerators

§ 228.2. Definitions

Section 228.2 (relating to definitions) contains the definitions applicable to the provisions of Chapter 228. Except for a revision of the definition of "accelerator or particle accelerator" no changes are proposed for Chapter 228. The definition of "accelerator or particle accelerator" is proposed to be changed to match the United States Nuclear Regulatory Commission's definition.

F. Benefits, Costs and Compliance Benefits

This proposed rulemaking will affect users of nonmedical radiation-producing devices within this Commonwealth. Users of these devices include prisons, government offices, schools and manufacturers. These users would be required to comply with radiation protection standards that would not only protect and benefit users and employees but would also benefit the general public. This proposed rulemaking would ensure that operators of radiation-producing devices are trained properly so that both the operator and the public are adequately protected from radiation exposure.

Compliance costs

No changes are proposed to the fee schedule set forth in Chapter 218 (relating to fees). The proposed regulations do require additional training for radiation safety officers and operators of individual security screening devices as described in § 227a.52. Currently, there are three registrants of these devices. The additional training requirements are proposed due to operators not having experience or training in radiation protection practices. There could be a cost at start-up for the initial training provided by the vendor installing the device. The cost of initial training is approximately \$950. There are no additional requirements for other devices covered by the proposed amendments since they are already required under existing regulations.

Compliance assistance plan

Outreach and support will be provided by regional inspectors and technical staff of the Department's Radia-

tion Control Division. Assistance will be offered to address requirements for new technologies.

Paperwork requirements

This proposed rulemaking does not create any new paperwork requirements. However, it would extend various existing records retention requirements to a 5-year records retention period. This proposed extension was suggested by RPAC, and the Department agrees, to promote consistency in records retention requirements throughout this Commonwealth's radiological health regulations. These records do not need to be in paper format and may be stored electronically.

G. Pollution Prevention

Pollution prevention is not applicable to this proposed rulemaking.

H. Sunset Review

The Board is not proposing a sunset date for these regulations since they are needed for the Department to carry out its statutory authority. The Department will continue to closely monitor these regulations for their effectiveness and recommend updates to the Board as necessary.

I. Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)), on July 14, 2021, the Department submitted a copy of this proposed rulemaking and a copy of the Regulatory Analysis Form to the Independent Regulatory Review Commission (IRRC) and the Chairpersons of the House and Senate Environmental Resources and Energy Committees. A copy of this material is available to the public upon request.

Under section 5(g) of the Regulatory Review Act, IRRC may convey comments, recommendations or objections to the proposed rulemaking within 30 days of the close of the public comment period. The comments, recommendations or objections must specify the regulatory review criteria in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5(b)) which have not been met. The Regulatory Review Act specifies detailed procedures for review, prior to final publication of the rulemaking, by the Department, the General Assembly and the Governor of comments, recommendations or objections raised.

J. Public Comments

Interested persons are invited to submit written comments, suggestions, support or objections regarding the proposed rulemaking to the Board. Comments, suggestions or objections must be received by the Board by September 13, 2021.

Comments may be submitted to the Board online, by e-mail, by mail or by express mail as follows:

Comments may be submitted to the Board online by accessing the Board's online comment system at <http://www.ahs.dep.pa.gov/eComment>.

Comments may be submitted to the Board by e-mail at RegComments@pa.gov. A subject heading of this proposed rulemaking and a return name and address must be included in each transmission.

If an acknowledgement of comments submitted online or by e-mail is not received by the sender within 2 working days, the comments should be retransmitted to the Board to ensure receipt. Comments submitted by facsimile will not be accepted.

Written comments should be mailed to the Environmental Quality Board, P.O. Box 8477, Harrisburg, PA 17107-8477. Express mail should be sent to the Environmental Quality Board, Rachel Carson State Office Building, 16th Floor, 400 Market Street, Harrisburg, PA 17101-2301.

K. Public Hearings

If sufficient interest is generated as a result of this publication, a public hearing will be scheduled at an appropriate location to receive additional comments.

PATRICK McDONNELL,

**TITLE 25. ENVIRONMENTAL PROTECTION
PART I. DEPARTMENT OF ENVIRONMENTAL
PROTECTION**

**Subpart D. ENVIRONMENTAL HEALTH AND
SAFETY**

ARTICLE V. RADIOLOGICAL HEALTH

**CHAPTER 225. RADIATION SAFETY
REQUIREMENTS FOR INDUSTRIAL
RADIOGRAPHIC OPERATIONS**

**Subchapter B. RADIATION-PRODUCING
[MACHINES] DEVICES**

GENERAL ADMINISTRATIVE REQUIREMENTS

§ 225.71. Definitions.

The following words and terms, when used this subchapter, have the following meanings, unless the context clearly indicates otherwise:

[**Cabinet radiography**—Industrial radiography conducted in an enclosure or cabinet (not a room) so shielded that doses to individual members of the public at every location on the exterior meet the limitations specified in 10 CFR 20.1301 (relating to dose limits for individual members of the public).

Cabinet X-ray system—An X-ray system with the X-ray tube installed in an interlocked enclosure or cabinet, designed to exclude personnel from its interior during operation.

(i) Included are all X-ray systems designed primarily for the inspection of baggage or packages.

(ii) An X-ray tube used within a shielded part of a building or X-ray equipment which may temporarily or occasionally incorporate portable shielding is not considered a cabinet X-ray system.

Certified cabinet X-ray system—An X-ray system which has been certified under 21 CFR 1010.2 (relating to certification) as being manufactured and assembled under 21 CFR 1020.40 (relating to cabinet x-ray systems).]

DRD—Direct reading dosimeter—

(i) As used in this subchapter, means an “individual monitoring device” (see 10 CFR 20.1003 (relating to definitions)) that does not require additional processing to measure an individual’s dose.

(ii) The term also includes the direct reading personnel (individual) monitoring devices known as pocket dosimeter, pocket ionization chamber and electronic personal dosimeter (EPD).

Field radiography—A location where radiographic operations are conducted (onsite or offsite) other than those designated as a permanent radiographic facility.

Industrial radiography—[**An examination of the structure of materials by nondestructive methods, including fluoroscopy, which utilizes radiation producing machines to make radiographic images**] **An examination of the structure of materials by nondestructive methods, utilizing ionizing radiation to make radiographic images.**

NVLAP—National Voluntary Laboratory Accreditation Program.

[**Permanent radiographic installation**—A shielded installation or structure designed or intended for radiography in which radiography is regularly performed.]

Personal supervision—The provision of guidance and instruction to a radiographer’s assistant given by a radiographer who is:

(i) Physically present at the site.

(ii) In visual contact with the radiographer’s assistant while the assistant is using radiation sources.

(iii) In proximity so that immediate assistance can be given if required.

Personnel dosimeter—As used in this subchapter, means any of the “individual monitoring devices” (see 10 CFR 20.1003) that shall be processed and evaluated to generate a permanent record of an individual’s dose, for example, a film badge, thermoluminescent dosimeter (TLD) or optically stimulated luminescent dosimeter (OSLD).

RSO—radiation safety officer—An individual who ensures that, in the daily operation of the registrant’s or licensee’s radiation safety program, activities are being performed in accordance with approved procedures and are in compliance with Department requirements.

Radiographer—An individual who performs radiographic operations or an individual in attendance at a site where [**radiation producing machines**] **radiation-producing devices** are being used who personally supervises industrial radiographic operations.

Radiographer’s assistant—An individual who, under the personal supervision of a radiographer, uses [**radiation producing machines**] **radiation-producing devices** or radiation survey instrumentation.

[**Radiographer trainee**—An individual who is in the process of becoming a radiographer’s assistant or a radiographer.]

Radiographic operations—The activities associated with a [**radiation producing machine**] **radiation-producing device** during use of the [**machine**] **device**, to include surveys to confirm adequacy of boundaries, setting up equipment and any activity inside restricted area boundaries.

Radiographic X-ray systems—A system utilizing a **radiation generating device for quality assurance, materials detection or nondestructive testing used in industrial settings.**

Safety device—As applied to radiation-producing [**machines**] **devices** in this subchapter, a device or component that causes the unit to de-energize or interrupt the beam.

[Shielded room radiography—Industrial radiography that is conducted in an enclosed room, the interior of which is not occupied during radiographic operations.]

§ 225.72. Duties of personnel.

(a) The RSO shall assure that the radiation safety program of the registrant or licensee is implemented and suspend or terminate operations that are not being conducted in accordance with approved procedures or the Department's requirements.

(b) The radiographer is responsible to the registrant or licensee for following the procedures of the registrant or licensee and for complying with the Department's requirements while industrial radiographic operations are being conducted.

(c) The radiographer's assistant shall only use **[radiation producing machines] radiation-producing devices** or radiation survey instrumentation under the personal supervision of a radiographer.

(d) **[The radiographer trainee is not permitted to operate radiation producing machines or radiation survey instrumentation] (Reserved).**

§ 225.74. Training and testing.

(a) The registrant may not permit an individual to act as a radiographer until that individual has:

(1) Been instructed in the subjects outlined in Appendix A.

(2) Received copies of this chapter, Chapters 219 and 220 (relating to standards for protection against radiation; and notices, instructions and reports to workers; inspections and investigations), and copies of the license or certificate of registration and the operating and emergency procedures of the registrant or licensee.

(3) Received **at least 160 hours of** instruction covering regulatory requirements, operating and emergency procedures and the use of radiation-producing **[machines] devices** and radiation survey instruments of the registrant or licensee.

(4) Demonstrated competency and understanding of the information in this subsection to the satisfaction of the registrant or licensee as evidenced by the successful completion of a written test and a field examination.

(b) The registrant or licensee may not permit an individual to act as a radiographer's assistant until that individual has:

(1) Received copies of, and instruction in, the applicable operating and emergency procedures and has been instructed in the use of sources of radiation and radiation survey instruments of the registrant or licensee.

(2) Demonstrated that, under direct personal supervision of a radiographer, the individual is competent to use sources of radiation and radiation survey instruments as evidenced by the successful completion of a written or oral test and a field examination on the subjects relevant to being an assistant radiographer.

(c) Records of the training required under subsections (a) and (b), including copies of written tests, dates of oral tests and field examinations, shall be maintained for inspection by the Department for **[3] 5** years following termination of employment by the individual or until the registration or license is terminated.

§ 225.76. Reporting requirements.

(a) In addition to the reporting requirements in §§ 219.221 and 219.222 (relating to reports of stolen, lost or missing licensed or registered sources of radiation; and notification of incidents and reportable events), each registrant or licensee shall provide to the Department, within 30 days of its occurrence, a written report on **[any of the following incidents involving machines or equipment used in radiographic operations:] an incident involving the inability to terminate irradiation from a radiation-producing device.**

(1) **[The inability to terminate irradiation from a radiation producing machine] (Reserved).**

(2) **[An interlock failure during shielded room radiography] (Reserved).**

(b) The registrant or licensee shall include the following information in each report submitted under subsection (a):

(1) A description of the equipment problem.

(2) The cause of the incident, if known or determined.

(3) The manufacturer and model number of the equipment involved.

(4) The place, date and time of the incident.

(5) Actions taken to reestablish normal operations.

(6) Corrective actions taken or planned to prevent recurrence.

(7) The names and qualifications of personnel involved.

(c) Reports of overexposures, required under 10 CFR 20.2202 (relating to notification of incidents) or of excessive exposures, required under 10 CFR 20.2203 (relating to reports of exposures, radiation levels and concentrations of radioactive material exceeding the limits) which involve the failure of safety components of radiography equipment shall also include, to the extent known, the information specified under subsection (b). Complete information required in subsection (b) shall be available in the 30-day follow-up report rule under 10 CFR 20.2203(a).

GENERAL TECHNICAL REQUIREMENTS

§ 225.81. [Permanent radiographic installations] (Reserved).

[(a) Permanent radiographic installations having high radiation area entrance controls of the types described in 10 CFR 20.1601 and 20.1902 (relating to control of access to high radiation areas; and posting requirements) shall also meet all of the following requirements:

(1) **Each entrance that is used for personnel access to the high radiation area in a permanent radiographic installation shall have both visible and audible warning signals to warn of the presence of radiation. The visible signal shall be actuated by radiation whenever the X-ray source is energized. The audible signal shall be actuated when an attempt is made to enter the installation while the X-ray source is energized.**

(2) **The entrance control device or alarm system shall be tested for proper function prior to beginning operations on each day of use.**

(3) **The radiographic exposure system may not be used if an entrance control device or alarm system is not operating properly. If an entrance control**

device or alarm system is not functioning properly, it shall be removed from service and repaired or replaced immediately. If no replacement is available, the facility may continue to be used provided that the registrant implements the continuous surveillance under 10 CFR 34.51 and 34.53 (relating to surveillance; and posting), § 225.83 (relating to records required at field radiography sites) and uses an alarming ratemeter. Before the entrance control device or alarm system is returned to service, the radiation safety officer or an individual designated by the radiation safety officer shall validate the repair.

(b) Records of the tests performed under subsection (a) shall be maintained for inspection by the Department for 5 years.]

§ 225.82. Operating requirements.

(a) When field radiographic operations are performed [**at a location other than a permanent radiographic installation**], a minimum of two radiographic personnel shall be present to operate the X-ray device. At least one of the radiographic personnel shall be qualified as a radiographer. The other individual may be either a radiographer[,] or a radiographer's assistant [**or a radiographer trainee**].

(b) Other than a radiographer, or a radiographer's assistant who is under the personal supervision of a radiographer, an individual may not manipulate the controls or operate the equipment used in industrial radiographic operations.

(c) At each job site, the following shall be supplied by the registrant or licensee:

- (1) The appropriate barrier ropes and warning signs.
- (2) At least one operable, calibrated radiation survey instrument.
- (3) For each worker requiring monitoring, an individual personnel dosimeter that is processed and evaluated by an NVLAP processor.
- (4) An operable, calibrated direct reading dosimeter with a range of zero to [**51.6 µC/kg (200 milliroentgen)**] **200 milliroentgen (51.6 µC/kg)** for each worker requiring monitoring.

(d) An industrial radiographic operation may not be performed if any of the items in subsection (c) is not available at the job site or is inoperable.

§ 225.84. Operating and emergency procedures.

The operating and emergency procedures of the registrant or licensee shall include instruction in at least the following:

- (1) Handling and use of sources of radiation to be employed so that no individual is likely to be exposed to radiation in excess of the limits established in Chapter 219 (relating to standards for protection against radiation).
- (2) Methods and occasions for conducting radiation surveys and the proper use of survey meters.
- (3) Methods for controlling access to areas where radiographic operations are being conducted.
- (4) Methods and occasions for locking and securing sources of radiation.

(5) Personnel monitoring and the use of individual monitoring devices, including steps that are to be taken immediately by radiographic personnel when a direct reading dosimeter is found to be off-scale.

(6) Methods and procedures for minimizing exposure to individuals in the event of an accident.

(7) The procedure for notifying proper personnel in the event of an accident.

(8) Maintenance of records required by the Department.

(9) The inspection and maintenance of radiation-producing [**machines**] devices and survey meters.

§ 225.85. Surveys and survey records.

(a) A survey with a calibrated radiation survey instrument shall be made after each radiographic exposure to determine that the emission of radiation has terminated.

(b) Records of the surveys required by subsection (a) shall be maintained (for inspection by the Department) for [**3**] **5** years. If the survey has been used to determine an individual's exposure, the records of the survey shall be maintained until the Department terminates the registration or license.

§ 225.86. Utilization logs.

A registrant or licensee shall maintain current logs, which shall be kept available for inspection by the Department for [**3**] **5** years from the date of the event, showing for each radiation-producing [**machine**] device, the following applicable information:

- (1) The identity (name and signature) of the operator to whom the radiation-producing [**machine**] device is assigned.
- (2) The model and serial number of the radiation-producing [**machine**] device.
- (3) The locations and dates of use.
- (4) The technique factors (tube kilovoltage, tube current, exposure time) used for each radiographic exposure.

RADIATION SURVEY INSTRUMENT AND PERSONNEL MONITORING REQUIREMENTS

§ 225.92. Radiation survey meter calibration requirements.

(a) In addition to the requirements of § 225.91 (relating to survey meter requirements), instruments required by this chapter shall have a range so that [**0.516 µC/kg (2 mR)**] **2 mR (0.516 µC/kg)** per hour through [**258 µC/kg (1 R)**] **1 R (258 µC/kg)** per hour can be measured.

(b) Each radiation instrument shall be calibrated:

- (1) At energies appropriate for use.
- (2) At intervals not to exceed 6 months.
- (3) After each instrument servicing, other than battery replacement.
- (4) To within an accuracy of +/- 20%.
- (5) At two points located approximately one-third and two-thirds of full scale on each scale of linear scale instruments; at mid-range of each decade and at two points of at least 1 decade for logarithmic scale instruments; and for digital instruments, at three points be-

tween [**2 mR** **0.516 $\mu\text{C/kg}$**] **2 mR (0.516 $\mu\text{C/kg}$)** and [**1000 mR** **258 $\mu\text{C/kg}$**] **1000 mR (258 $\mu\text{C/kg}$)** per hour.

(6) By a person authorized by the Department, the NRC or an agreement state.

(c) Calibration records shall be maintained for inspection by the Department for [**3**] **5** years after the date of calibration.

§ 225.93. Personnel monitoring control.

(a) The registrant or licensee may not permit an individual to act as a radiographer or as a radiographer's assistant unless, at all times during radiographic operations, each individual wears a direct reading dosimeter and a personnel dosimeter that is processed and evaluated by an NVLAP processor.

(1) Personnel monitoring devices used to determine compliance with dose limits for the whole body shall be worn on the trunk of the body over the area most likely to receive exposure.

(2) This does not relieve the registrant or licensee from providing peripheral monitoring devices such as ring finger TLDs when appropriate.

(3) Each personnel monitoring device shall be assigned to and worn by only one individual.

(b) Film badges shall be replaced at intervals not to exceed 1 month. Other personnel dosimeters processed and evaluated by an accredited NVLAP processor shall be replaced at intervals not to exceed 3 months.

(c) Direct reading dosimeters shall meet the criteria as in ANSI N13.5-1972, "Performance Specifications for Direct Reading and Indirect Reading Pocket Dosimeters for X- and Gamma-Radiation" published in 1972, exclusive of subsequent amendments or additions.

(d) The use of DRDs is subject to the following requirements:

(1) DRDs shall have a range of zero to [**(200 mR)** **51.6 $\mu\text{C/kg}$**] **200 mR (51.6 $\mu\text{C/kg}$)** and shall be rezeroed at the start of each work shift.

(2) As a minimum, at the beginning and the end of each worker's shift involving the use of a source of radiation, DRDs shall be read and the exposure values recorded.

(3) Direct reading dosimeters shall be checked for correct response to radiation at periods not to exceed 1 year. A dosimeter may not be used for personnel monitoring unless the response is accurate within +/- 20% of the true radiation exposure. Records of dosimeter response checks shall be maintained for inspection by the Department for [**3**] **5** years.

(4) If an individual's DRD indicates exposure that is "off-scale" beyond the range it can measure, industrial radiographic operations by that individual shall cease immediately and the individual's personnel dosimeter shall be sent immediately for processing. The individual may not use any sources of radiation until the individual's radiation dose has been determined.

(e) Data on personnel exposure reported or recorded from personnel monitoring devices shall be kept for inspection by the Department until the certificate of registration or license is terminated or until the Department authorizes their disposition, in writing, following a

determination by the Department that the records contain inaccurate personnel monitoring information.

RADIATION-PRODUCING [MACHINE] DEVICE REQUIREMENTS

§ 225.101. [**Cabinet X-ray systems and baggage/package X-ray systems**] **(Reserved).**

[(a) **Cabinet and baggage/package X-ray systems that are certified under 21 CFR Chapter I, Subchapter J (relating to radiological health) shall also meet the requirement of 21 CFR 1020.40 (relating to cabinet X-ray systems).**

(b) **A cabinet X-ray system may not be energized unless all openings are securely closed and exposure to radiation from the system does not exceed the limits in 10 CFR 20.1301 (relating to dose limits for individual members of the public). Each access door to the cabinet shall have an interlock that terminates the exposure whenever the door is opened. The enclosure shall be shielded so that every location on the exterior meets the conditions for an unrestricted area.**

(c) **A registrant may not permit an individual to operate a cabinet X-ray system until the individual has received a copy of, and instruction in, the operating procedures for the X-ray system and has demonstrated competency in the use of the cabinet X-ray system and an understanding of the operating procedures.**

(d) **The registrant shall perform radiation surveys to demonstrate compliance with 10 CFR 20.1301 and maintain records of these surveys for inspection by the Department for 3 years:**

(1) **Upon installation of the equipment.**

(2) **Following maintenance requiring the disassembly or removal of any shielding component.**

(3) **When a visual inspection reveals an abnormal condition.**

(e) **The registrant shall test on-off switches, interlocks and safety devices at intervals not exceeding 1 year and make repairs as necessary to maintain all safety features including warning labels. Records of these tests shall be maintained for inspection by the Department for 3 years.**

(f) **Cabinet X-ray systems and baggage/package X-ray systems are exempt from all other provisions of this chapter.]**

(Editor's Note: The following section is proposed to be added and printed in regular type to enhance readability.)

§ 225.101a. Radiographic X-ray systems.

Radiographic X-ray systems shall conform to the following:

(1) The leakage radiation from the source assembly measured at a distance of 1 meter in any direction from the source may not exceed 100 mR (25.8 $\mu\text{C/kg}$) in 1 hour when the X-ray tube is operated at its leakage technique factors. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(2) The X-ray system shall be equipped with collimators which are capable of restricting the useful beam to the area of interest. Collimators shall provide the same degree of protection required in subsection (1).

(3) A means shall be provided to terminate the exposure after a preset time, a preset to image receptor or a preset product of exposure time and tube current.

(4) The X-ray control shall have a dead-man type exposure switch.

(5) The X-ray controls shall indicate the technique factors, such as kilovoltage, tube current and exposure time or the product of tube current and exposure time.

(6) The X-ray system shall be labeled with a readily discernible sign bearing the radiation symbol and the words "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED" or words having a similar intent, near any switch that energizes the X-ray tube.

(7) For X-ray systems, an easily visible warning light shall be located adjacent to the X-ray tube and labeled with the words "X-RAY ON" or words having a similar intent. The warning light shall be illuminated only when the X-ray tube is energized or only when the shutter is open.

(8) The registrant shall perform radiation surveys to demonstrate compliance with 10 CFR 20.1301 (relating to dose limits for individual members of the public) and maintain records of these surveys for inspection by the Department for 5 years:

- (i) upon acceptance of the equipment;
- (ii) following maintenance requiring the disassembly or removal of any shielding component; and
- (iii) when a visual inspection reveals an abnormal condition.

(9) The registrant shall test on-off switches, interlocks and safety devices at intervals not exceeding 1 year and make repairs as necessary to maintain all safety features including warning labels. Records of these tests shall be maintained for inspection by the Department for 5 years.

§ 225.102. [**Shielded room X-ray radiography**] (**Reserved**).

[(a) A room used for shielded room X-ray radiography shall be shielded so that every location on the exterior meets conditions for an unrestricted area and the only access to the room is through openings which are interlocked so that the radiation source will not operate unless all openings are securely closed and meet the requirements of 10 CFR 20.1601 (relating to control of access to high radiation areas).

(b) The operator shall conduct a physical radiation survey to determine that the radiation source is deenergized prior to each entry into the radiographic exposure area.

(c) As an alternative to subsection (b), the registrant may use an independent radiation monitoring system that displays the radiation intensity or displays when radiation levels have returned to their pre-irradiation levels.

(d) With the exception of the provisions in §§ 225.4a, 225.76 and 225.84 (relating to radiation safety program; reporting requirements; and operating and emergency procedures), shielded room radiography is exempt from all other provisions of this chapter.]

§ 225.103. Field [**site**] radiography.

(a) The operator shall conduct a physical radiation survey to determine that the radiation source is de-

energized prior to each entry into the radiographic exposure area. Survey results and records of the boundary location shall be maintained and kept available for inspection by the Department for [**3**] **5** years.

(a.1) Surveillance of the exposure area shall be maintained during operation, either by visual or by other reliable means, to ensure that no person enters the area.

(a.2) With the exception of hand-held X-ray systems, when approaching the radiation source, following the conclusion of an exposure, the operator shall use a suitable calibrated and operable radiation detection instrument to verify that the radiation source is in its fully shielded condition or that the X-ray tube has been de-energized.

(a.3) A personal alarming dose rate meter shall also be worn to approach the work area if the device is appropriately designed and calibrated for the type of X-ray emitted, either pulse or continuous, set at an appropriate level to detect the presence of the source, for example 2 mrem (0.02 mSv) per hour and has been source-checked prior to use. The radiation in the work area must be reasonably uniform so that the device responds to radiation exposure to any part of the body. It may not be used to measure radiation levels, nor may it be used to indicate the presence of the source for potential non-uniform exposure, such as may occur during device maintenance or work in a radiation-producing device target area.

(a.4) Measurement of radiation levels for a radiation survey shall be performed using an appropriately calibrated radiation survey meter. A radiation survey meter shall also be used when there is potential for non-uniform exposure to personnel, such as may occur during device maintenance or work in a radiation-producing device target area.

(a.5) During the initial exposure, the radiation levels shall be measured around the perimeter of the controlled area. The perimeter shall be adjusted accordingly to meet the access control requirement for radiation areas or high radiation areas.

(a.6) The survey around the perimeter shall be made for each new operating condition and the perimeter adjusted accordingly. The area of operation shall be monitored periodically if radiation levels are variable.

(b) Mobile or portable [**radiation producing machines**] **radiation-producing devices** shall be physically secured to prevent tampering or removal by unauthorized personnel.

§ 225.104. [**X-ray detection systems for explosives, weapons and illegal items**] (**Reserved**).

[(a) This section applies to X-ray systems that produce an image that may be used to screen for the presence of explosive devices or components, weapons, contraband or prohibited items. This section does not apply to cabinet and baggage/package X-ray systems covered under § 225.101 (relating to cabinet X-ray systems and baggage/package X-ray systems).

(b) An X-ray system used for detection of explosives, weapons or illegal items may not be used on human beings or animals without specific permission of the Department. X-ray systems that irradi-

ate human beings for medical diagnosis are covered under Chapter 221 (relating to human use of X-ray machines). X-ray systems that irradiate animals for diagnosis or therapy are covered under Chapter 223 (relating to veterinary medicine).

(c) Radiographic X-ray detection systems shall conform to the following:

(1) The leakage radiation from the source assembly measured at a distance of 1 meter in any direction from the source may not exceed 25.8 $\mu\text{c}/\text{kg}$ (100 mR) in 1 hour when the X-ray tube is operated at its leakage technique factors. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(2) Portable X-ray systems shall be equipped with collimators which are capable of restricting the useful beam to the area of interest. Collimators shall provide the same degree of protection required in paragraph (1).

(3) A means shall be provided to terminate the exposure after a preset time, a preset to image receptor or a preset product of exposure time and tube current.

(4) The X-ray control shall have a dead-man type exposure switch.

(5) The X-ray controls shall indicate the technique factors, (that is, kilovoltage, tube current and exposure time or the product of tube current and exposure time).

(6) The X-ray machine shall be labeled with a readily discernible sign bearing the radiation symbol and the words, "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED" or words having a similar intent, near any switch that energizes the X-ray tube.

(7) For fixed radiographic equipment, an easily visible warning light shall be located adjacent to the X-ray tube and labeled with the words "X-RAY ON" or words having a similar intent. The warning light shall be illuminated only when the X-ray tube is energized or only when the shutter is open.

(d) Fluoroscopic X-ray detection systems shall conform to the following:

(1) The leakage radiation from the source assembly measured at a distance of 1 meter in any direction from the source may not exceed 25.8 $\mu\text{c}/\text{kg}$ (100 mR) in 1 hour when the X-ray tube is operated at its leakage technique factors. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(2) The X-ray machine shall be labeled with a readily discernible sign bearing the radiation symbol and the words, "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED" or words having a similar intent, near any switch that energizes the X-ray tube.

(3) To the extent practicable, the X-ray system (X-ray tube, imaging system and the object being irradiated) shall be completely enclosed so that every location on the exterior meets conditions for an unrestricted area and the only access to the room or enclosure is through openings which are interlocked so that the radiation source will not

operate unless all openings are securely closed and meet the requirements of 10 CFR 20.1601 (relating to control of access to high radiation areas).

(4) The equipment shall be constructed so that, under conditions of normal use, the entire cross-section of the useful beam shall be attenuated by a primary protective barrier permanently incorporated into the equipment.

(5) The X-ray control shall have a dead-man type exposure switch. Activation of the X-ray beam shall be possible only by continuous pressure on the exposure switch.

(6) An easily visible warning light shall be located adjacent to the X-ray tube or on the outside of the enclosure and be labeled with the words "X-RAY ON" or words having a similar intent. This light shall be illuminated only when the X-ray tube is energized or only when the shutter is open.

(e) Operating procedures for portable radiographic X-ray detection systems are as follows:

(1) To the extent practicable, portable X-ray tube heads shall be supported by a stand.

(2) To the extent practicable, supporting or positioning devices for the image receptor shall be used during radiation exposures.

(3) Individuals, other than those whose presence is necessary to conduct the X-ray procedure, shall be located at least 2 meters away from the X-ray tube and the object being irradiated during exposures.

(4) An individual may not be regularly employed to support the image receptor or object during radiation exposures.

(f) Operating procedures for fixed radiographic X-ray detection systems are as follows:

(1) A registrant shall test the safety and warning devices, including interlocks, at intervals not to exceed 12 months. Test records shall be maintained for inspection by the Department for 3 years after the test has been conducted.

(2) Safety or warning devices that do not function properly shall be repaired in a timely manner.

(3) If an X-ray detection system is required to be operated while in need of repair, procedures shall be modified to maintain the design level equivalent of safety or else the equipment may not be used.]

CHAPTER 227. [RADIATION SAFETY REQUIREMENTS FOR ANALYTICAL X-RAY EQUIPMENT, X-RAY GAUGING EQUIPMENT, ELECTRON MICROSCOPES AND X-RAY CALIBRATION SYSTEMS] (Reserved)

[GENERAL PROVISIONS]

§ 227.1. [Purpose and scope] (Reserved).

[This chapter establishes the requirements for the use of analytical X-ray equipment, X-ray gauging equipment, electron microscopes and X-ray calibration systems. Registrants who use analytical X-ray equipment, X-ray gauging equipment, electron microscopes or X-ray calibration systems shall comply with this chapter. The requirements of this chapter are in addition to, and not in substitution for, other applicable provisions of this article.]

§ 227.2. [Definitions] (Reserved).

[The following words and terms, when used in this chapter, have the following meanings, unless the context clearly indicates otherwise:

Analytical X-ray machine—An assembly of components utilizing X-rays to determine the elemental or chemical composition or to examine the microstructure of materials usually by X-ray diffraction or fluorescence.

Electron microscope—Equipment utilizing the wave characteristics of electrons that have been accelerated by an electric field to visualize the microscopic structure of material.

Fail-safe characteristics—A design feature which causes X-ray production to cease, beam port shutters to close or otherwise prevents emergence of the primary beam, upon the failure of a safety or warning device.

Local components—Parts of an analytical X-ray system, such as radiation source housings, port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors and shielding, that contain or are in the path of the X-ray beam. The term does not include power supplies, transformers, amplifiers, readout devices and control panels.

Open-beam configuration—An analytical X-ray system in which the beam is not enclosed or shielded so any portion of an individual's body could accidentally be placed in the beam path during normal operation.

Operating procedures—Step-by-step instructions necessary to accomplish the analysis.

Primary beam—Radiation which passes through an aperture of the source housing by a direct path from the X-ray tube or a radioactive source located in the radiation source housing.

X-ray calibration systems—Radiation-producing machines and equipment used to calibrate radiation detection or measuring devices.

X-ray gauging equipment—A machine utilizing X-rays to detect, measure, gauge or control thickness, density, level or interface location.]

[ANALYTICAL X-RAY EQUIPMENT]

§ 227.11a. [Equipment requirements] (Reserved).

[(a) Open-beam configurations shall have a safety device which either prevents the entry of any portion of an individual's body into the primary X-ray beam path, or causes the beam to be terminated or interrupted upon entry into the path. A registrant may apply to the Department for an exemption from the requirement of a safety device. The application for an exemption shall include the following:

(1) A description of the various safety devices that have been evaluated.

(2) The reason each of these safety devices cannot be used.

(3) A description of the alternative methods that will be employed to minimize the possibility of an accidental exposure, including procedures to assure that operators and others in the area will be informed of the absence of safety devices.

(b) Open-beam configurations shall be provided with a readily discernible indication of one or both of the following:

(1) X-ray tube status (on-off) located near the radiation source housing, if the primary beam is controlled in this manner.

(2) Shutter status (open-closed) located near each port on the radiation source housing, if the primary beam is controlled in this manner.

(c) Warning devices shall be labeled so that their purpose is easily identified. In addition, equipment manufactured after December 17, 1987, shall have fail-safe characteristics.

(d) An easily visible warning light located immediately adjacent to the tube head or port and labeled with the words "X-ray on," or words containing a similar warning, shall be provided and shall be illuminated when the X-ray tube is energized.

(e) Unused ports on radiation source housings shall be secured in the closed position in a manner which will prevent casual opening.

(f) Analytical X-ray equipment shall be labeled with a readily discernible sign bearing the radiation symbol and both of the following:

(1) "CAUTION—HIGH INTENSITY X-RAY BEAM" or words having a similar intent on the X-ray source housing.

(2) "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED," or words having a similar intent, near any switch that energizes an X-ray tube.

(g) On equipment with an open-beam configuration manufactured and installed after December 19, 1987, each port on the radiation source housing shall be equipped with a shutter that cannot be opened unless a collimator or coupling has been connected to the port.

(h) Equipment exclusively designed and exclusively used for vacuum spectroscopy where the tube housing and sample chamber is located behind all external surfaces of the unit shall be exempt from the requirements of this section, §§ 227.12a and 227.13a (relating to area requirements; and operating requirements), but shall meet the requirements of § 227.14 (relating to personnel requirements) and the following:

(1) The unit shall be designed so that when the unit is operating at the maximum kilovoltage and current ratings, the leakage radiation will not be in excess of 0.5 milliroentgens (.129 C/kg) per hour at a distance of 4 centimeters from any external surface.

(2) Radiation surveys using appropriate radiation survey equipment shall be performed on the analytical X-ray unit upon installation, after moving the unit to a new location, and after maintenance or repair requiring the disassembly or removal of a local component or radiation shielding.

(3) Safety and warning devices shall be tested for proper operation at least annually. If the test reveals that a safety or warning device is not working properly, the unit may not be operated until the warning device is repaired or replaced.

(4) Records of all tests and surveys sufficient to show compliance with subsection (h) shall be maintained and kept available for inspection by the Department for 4 years.

(5) A sign bearing the radiation symbol and the words "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED," or words of similar intent shall be placed next to any switch or device that activates the X-ray tube.

(6) A sign bearing the radiation symbol and the words "CAUTION—RADIATION," or words of similar intent shall be placed next to the opening of the sample chamber.

(i) Analytical X-ray equipment operating at less than or equal to 50 kV tube voltage and designed to be held by an operator during use are exempt from the requirements of this section and § 227.12a(b), but shall meet the requirements of subsection (f)(2) and §§ 227.13a(a) and 227.14(a).]

§ 227.12a. [Area requirements] (Reserved).

[(a) The source housing construction shall be of a type that when all the shutters are closed and the source is in any possible operating mode, the leakage radiation will not be in excess of 2.5 milliroentgens (.645 µC/kg) per hour at a distance of 5 centimeters from the housing surface.

(b) The X-ray generator shall have a protective cabinet constructed so that the leakage radiation will not be in excess of 0.5 milliroentgen (.129 µC/kg) per hour at a distance of 5 centimeters from the housing surface.

(c) The local components of an analytical X-ray system shall be located and arranged and shall include sufficient shielding or access control so that no radiation levels exist in any area surrounding the local component group which could result in a dose to an individual present therein in excess of the limits given in 10 CFR 20.1301 (relating to dose limits for individual members of the public). For systems utilizing X-ray tubes, these requirements shall be met at any specified tube rating.

(d) To show compliance with subsections (a)—(c), the registrant shall perform radiation surveys:

(1) Upon installation of the equipment and at least every 12 months thereafter.

(2) Following a change in the initial arrangement, number or type of local components in the system.

(3) Following maintenance requiring the disassembly or removal of a local component in the system.

(4) During the performance of maintenance and alignment procedures if the procedures require the presence of a primary X-ray beam when a local component in the system is disassembled or removed.

(5) When a visual inspection of the local components in the system reveals an abnormal condition.

(6) When personnel monitoring devices show a significant increase in radiation exposure over the previous monitoring period or the readings are approaching the radiation dose limits.

(7) When the machine is operated in a manner other than the routine manner specified in § 227.13a (relating to operating requirements).

(e) The registrant shall test and inspect all safety and warning devices at least annually to insure their proper operation. If a safety or warning device is found to be malfunctioning, the machine shall be removed from service until repairs to the malfunctioning device are completed.

(f) Records of surveys and tests sufficient to show compliance with this chapter shall be maintained for 4 years and kept available for inspection by the Department.

(g) The equipment used to conduct the surveys and tests required in this chapter shall be adequate to measure the radiation produced by the radiation source.]

§ 227.13a. [Operating requirements] (Reserved).

[(a) Operating procedures shall be written and available to the analytical X-ray equipment operators. These procedures shall include instructions for sample insertion and manipulation, equipment alignment, routine maintenance and data recording procedures which are related to radiation safety. An individual may not operate analytical X-ray equipment in a manner other than that specified in the operating procedures unless the individual has obtained written approval from the radiation safety officer.

(b) An individual may not bypass or otherwise circumvent a safety device unless the individual has obtained the prior written approval of the radiation safety officer. The radiation safety officer may grant the permission only if the following conditions are met:

(1) The radiation safety officer establishes administrative controls and procedures to assure the radiation safety of individuals working around the system.

(2) The period for the bypass of the safety device is not more than 30 days unless written permission is obtained from the Department for a longer period.

(3) A readily discernible sign bearing the words "SAFETY DEVICE NOT WORKING," or words containing a similar warning, is placed on the radiation source housing.

(c) Except as specified in subsection (b), an operation involving removal of covers, shielding materials or tube housings or modifications to shutters, collimators or beam stops may not be performed without ascertaining that the tube is off and will remain off until safe conditions have been restored. The main switch, rather than interlocks, shall be used for routine shutdown in preparation for repairs.

(d) Emergency procedures shall be written and posted near the equipment and shall list the names and telephone numbers of personnel to contact. The emergency procedures shall also provide information necessary to de-energize the equipment, such as location and operation of the power supply or circuit breakers.]

§ 227.14. [Personnel requirements] (Reserved).

[(a) An individual may not operate or maintain analytical X-ray equipment unless the individual has received instruction in and demonstrated competence as to:

(1) Identification of radiation hazards associated with the use of the equipment.

(2) Significance of the various radiation warning and safety devices incorporated into the equipment, or the reasons they have not been installed on certain pieces of equipment, and the extra precautions necessary if the devices are absent or bypassed.

(3) Written operating and emergency procedures for the equipment.

(4) Symptoms of an acute localized radiation exposure.

(5) Procedures for reporting an actual or suspected exposure.

(6) Use of survey and personnel monitoring equipment.

(7) The applicable regulations of this article and those incorporated by reference.

(b) Finger or wrist personnel monitoring devices shall be provided to and shall be used by:

(1) Analytical X-ray equipment workers using systems having an open-beam configuration and not equipped with a safety device as described in § 227.12a(c) (relating to area requirements).

(2) Personnel maintaining analytical X-ray equipment if the maintenance procedures require the presence of a primary X-ray beam when a local component in the analytical X-ray system is disassembled or removed or when safety devices are bypassed.

(c) Reported dose values may not be used for the purpose of determining compliance with 10 CFR 20.1201 (relating to occupational dose limits for adults) unless they are evaluated by a qualified expert.

(d) The registrant or licensee shall notify the Department within 5 days of a suspected radiation overexposure to an individual from analytical X-ray machines. This notification is required even if subsequent investigation reveals no actual overexposure actually occurred.]

[X-RAY GAUGING EQUIPMENT]

§ 227.21. [Warnings] (Reserved).

[X-ray gauging equipment shall be labeled with a readily discernable sign or signs bearing the radiation symbol and the words, "Caution Radiation—This Equipment Produces Radiation When Energized," or words containing a similar warning.]

§ 227.22. [Radiation levels] (Reserved).

[An X-ray tube housing shall be constructed so that, with the unit in normal operation, the leakage radiation measured 5 centimeters from a surface is no more than 2.5 milliroentgens (645 nC/kg) per hour.]

§ 227.23. [Personnel requirements] (Reserved).

[No registrant may permit an individual to operate or conduct maintenance upon X-ray gauging equipment until the individual has received a copy of and instruction in, and demonstrated an understanding of, the operating procedures necessary to ensure radiation safety.]

[ELECTRON MICROSCOPES]

§ 227.31. [Warnings] (Reserved).

[An electron microscope shall be labeled with a readily discernable sign bearing the words, "Caution Radiation—This Equipment Produces Radiation When Energized," or words containing a similar warning.]

§ 227.32. [Radiation levels] (Reserved).

[Radiation levels measured 5 centimeters from any accessible surface of an electron microscope may not exceed .5 milliroentgen (129 nC/kg) per hour.]

§ 227.33. [Personnel requirements] (Reserved).

[A registrant may not permit an individual to operate or conduct maintenance upon any electron microscope until the individual has received a copy of, instruction in, and demonstrated an understanding of, the operating procedures necessary to insure radiation safety.]

[X-RAY CALIBRATION SYSTEMS]

§ 227.101. [Scope] (Reserved).

[This section and §§ 227.102—227.104 apply to registrants who use X-ray producing machines to calibrate or test radiation detection or measuring devices.]

§ 227.102. [Area requirements] (Reserved).

[A room or enclosure used for testing or calibration shall be shielded so that every location on the exterior meets conditions for an unrestricted area, and the only access to the room or enclosure is through openings which are interlocked so that the radiation source will not operate unless all openings are securely closed and meet the requirements of 10 CFR 20.1601 (relating to control of access to high radiation areas).]

§ 227.103. [Operating requirements] (Reserved).

[(a) The operator shall conduct a physical radiation survey to determine that the radiation machine X-ray tube is de-energized prior to each entry of any body part into the X-ray exposure area.

(b) As an alternative to subsection (a), the registrant may use an independent radiation monitoring system that displays the radiation intensity or displays when radiation levels have returned to their pre-irradiation levels.]

§ 227.104. [Personnel requirements] (Reserved).

[A registrant may not permit an individual to operate or conduct maintenance on any X-ray calibration system until the individual has received a

copy of, instruction in, and demonstrated an understanding of, the operating procedures necessary to ensure radiation safety.]

Subchapter A. GENERAL PROVISIONS

Sec.

- 227a.1. Purpose and scope.
- 227a.2. Definitions.
- 227a.3. Exemptions.
- 227a.4. Application for exemptions.

§ 227a.1. Purpose and scope.

(a) This chapter establishes special requirements for non-healing arts radiation-producing devices operating between 5 kiloelectron volts (keV) and 1 million electron volts (MeV). This chapter shall apply to all devices defined in § 227a.2 (relating to definitions). Machines operating at energies greater than 1 MeV are subject to Chapter 228 (relating to radiation safety requirements for particle accelerators).

(b) In addition to this chapter, all registrants are subject to Chapters 215, 216, 219 and 220. This chapter does not pertain to radiation safety requirements for X-ray equipment covered under Chapters 221 and 225 (relating to X-rays in the healing arts; and radiation safety requirements for industrial radiographic operations) and 228.

(c) Radiography that meets the definition of "cabinet radiography," including cabinet X-ray systems, is regulated under this chapter.

(d) Radiography that occurs in a "shielded room" is regulated under this chapter.

(e) Radiography equipment that meets the definition of "bomb detection radiation-producing devices" is regulated under this chapter.

(f) Industrial radiography that is open-beam, and not in a shielded room and not otherwise listed here, is regulated under Chapter 225.

§ 227a.2. Definitions.

The following words and terms, when used in this chapter, have the following meanings unless the context clearly indicates otherwise:

Accessible surface—The external or outside surface of the enclosure or housing provided by the manufacturer. The term includes the high-voltage generator, doors, access panels, latches, control knobs and other permanently mounted hardware, including the plane across the exterior edge of any opening.

ALARA—As low as reasonably achievable.

Analytical X-ray equipment—Equipment that generates, by electronic means, and uses ionizing radiation for the purpose of examining the microstructure of materials, namely diffraction and spectroscopy, including fluorescence.

Beam port—An opening on the X-ray apparatus designed to emit a primary beam. This term does not include an opening on a security screening device.

Bomb detection radiation-producing device—X-ray-generating equipment used solely for the purpose of remotely detecting explosive devices. For the purposes of this chapter, this term does not include hand-held X-ray bomb detection devices.

Cabinet radiography—Industrial radiography using radiation-producing devices not subject to United States Food and Drug Administration performance standards for cabinet X-ray systems, in an enclosed, interlocked cabinet in which the portion of a material being irradiated is contained, and in which all of the following are met:

(i) The radiation-producing device will not operate unless all openings are closed with interlocks activated.

(ii) The cabinet is shielded so that every location on the exterior meets the conditions for an unrestricted area as defined under 10 CFR 20.1003 (relating to definitions).

(iii) The cabinet is constructed or arranged as to exclude the entrance of any part of the body of an individual during irradiation.

Cabinet X-ray system—An X-ray system with the X-ray tube installed in an enclosure which, independently of existing architectural structures except the floor on which it may be placed, is intended to contain at least that portion of a material being irradiated, provide radiation attenuation and exclude personnel from its interior during generation of radiation. The term does not include an X-ray tube used within a shielded part of a building, or X-ray equipment which may temporarily or occasionally incorporate portable shielding.

Cathode ray tube—A device used to accelerate electrons for demonstration or research purposes, except where the tube is incorporated into a television or display monitor that is subject to, and has met applicable Federal radiation safety performance standards under, 21 CFR Part 1010 (relating to performance standards for electronic products: general) and 21 CFR 1020.10 (relating to television receivers).

Certified cabinet X-ray system—A radiation-producing device certified by the manufacturer under 21 CFR 1010.2 (relating to certification) as being manufactured and assembled under the provisions of applicable Federal radiation safety performance standards under 21 CFR Part 1010 and 21 CFR 1020.40 (relating to cabinet X-ray systems).

Closed-beam radiation-producing device—A device in which the beam path cannot be entered by any part of the body during normal operation.

Cold-cathode gas discharge tube—An electronic device in which electron flow is produced and sustained by ionization of contained gas atoms and ion bombardment of the cathode.

Collimator—A device for restricting the useful radiation in one or more directions.

Control panel—A device containing means for regulation and activation of a radiation-producing device or for the preselection and indications of operating factors.

Electron microscope—Equipment using the wave characteristics of electrons that have been accelerated by an electric field to visualize the microscopic structure of material.

Emergency procedure—The written planned steps to be taken in the event of actual or suspected exposure of an individual in excess of an administrative or regulatory limit, including the names and telephone numbers of individuals to be contacted as well as directives for processing the film badge or other personnel monitoring devices.

Fail-safe design—A design in which all realistically anticipated failures of indicators or safety components result in a condition in which individuals are safe from exposure to radiation. For example, the production of X-rays must be prevented if a light indicating “X-RAY ON” fails and the shutter must close if a shutter status indicator fails.

General-use system—An individual screening system that delivers an effective dose equal to or less than 25 rem (0.25 μ Sv) per screening. Given proper justification and certain restrictions, general-use systems may be operated without specific controls that would limit the number of individuals scanned or the number of scans per individual in a year.

Handheld radiation-producing device—A portable device designed to operate when held in the hand, such as a hand-held XRF analytical device.

Industrial radiography—An examination of the structure of materials by nondestructive methods, utilizing ionizing radiation to make radiographic images.

Interlock—A device or engineered system that precludes access to an area of radiation hazard either by preventing entry or by automatically removing the hazard.

kV—Kilovolt.

Leakage radiation—Radiation coming from within the source housing, other than the useful beam.

Limited-use system—An individual screening system that is capable of delivering an effective dose greater than 25 rem (0.25 μ Sv) per screening but that cannot exceed an effective dose of 1 mrem (10 μ Sv) per screening. A limited-use system requires additional controls and documentation to ensure that annual individual dose limits required under § 227a.53(e) (relating to radiation-producing devices used in vehicle security screening) are not exceeded.

Local components—Parts of a radiation-producing device X-ray system, including areas struck by X-rays, such as radiation source housings, beam port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors and shielding. The term does not include power supplies, transformers, amplifiers, readout devices or control panels.

Lockout/tagout—A safety procedure that ensures dangerous devices and energy sources are properly shut off and cannot startup unexpectedly while maintenance or service work is being completed.

μ rem—Microrem.

μ Sv—Micro Sievert.

mrem—Millirem.

mSv—Milli Sievert.

Mobile device—Radiation-producing device mounted on a permanent base with wheels or casters, or both, for moving while completely assembled.

Normal operating procedures—Step-by-step instructions necessary to accomplish the task. Examples include sample insertion and manipulation, equipment alignment,

routine maintenance by the registrant and data recording procedures, which are related to radiation safety.

Open-beam radiation-producing device—A device in which any part of the body could enter the beam path during normal operations. Examples include X-ray gauges, tabletop and handheld X-ray devices and electron beam welders.

Permanent radiographic installation—A shielded installation or structure designed or intended for radiography in which radiography is regularly performed.

Portable device—Radiation-producing device designed to be hand-carried.

Primary beam—The ionizing radiation coming directly from the radiation source through a beam port into the volume defined by the collimation system.

Qualified expert—The term has the meaning given to it under § 215.2 (relating to definitions).

RSO—Radiation Safety Officer—The term has the meaning given to it under § 215.2.

Radiation-producing device—A radiation-producing device where the apparatus, device, electronic product, system, subsystem or component of any of them may generate X-rays or particle radiation between 5 keV and 1 MeV. The device is not intended for healing arts use for humans or animals. The device must be fixed or portable, such as mobile devices, portable devices, stationary equipment or transportable equipment.

Radiation-producing device used in individual security screening—X-ray equipment used on humans for security evaluation.

Radiation source (or X-ray tube) housing—That portion of an X-ray system that contains the X-ray tube or secondary target, or that contains both. Often the housing contains radiation shielding material or inherently provides shielding.

Radiograph—A permanent film or digital image produced on a sensitive surface by a form of radiation other than direct visible light.

Radiography—The process of creating a radiographic image through X-ray radiation.

Registrant—The term has the meaning given to it under § 215.2.

Safety device—A device, interlock or system that prevents the entry of any portion of an individual's body into the primary X-ray beam or that causes the beam to shut off upon entry into its path.

Scattered radiation—Radiation that has been deviated in direction or energy, or both, by passing through matter.

Security screening device—A non-human use open-beam system or cabinet X-ray system with accessible openings designed for the detection of weapons, bombs or contraband concealed in baggage, mail, a package or another commodity or structure.

Shielded room—A room housing a non-healing arts radiation-producing device where, with the radiation-producing device at maximum techniques, the exterior room environs meet the unrestricted area limits of 2 mrem (0.02 mSv) in any 1 hour and 100 mrem (1 mSv) in a year at 30 centimeters from the barrier. The term does not include a room housing a radiation-producing device that meets the definition of cabinet X-ray systems.

Shutter—A moveable device used to block the useful (or primary) beam emitted from an X-ray tube assembly.

Source—The point of origin of the radiation. An example of this term is the focal spot of an X-ray tube.

Stationary equipment—Radiation-producing device equipment that is installed or placed in a permanent or fixed location.

Transportable equipment—Radiation-producing device equipment to be installed in a vehicle or that may be readily disassembled for transport or use in a vehicle.

Warning device—A visible or audible signal that warns individuals of a potential radiation hazard.

X-ray gauge—An X-ray-producing device designed and manufactured for the purpose of detecting, measuring, gauging, or controlling thickness, density, level or interface location.

X-ray generator—That portion of an X-ray system which provides the accelerating high voltage and current for the X-ray tube.

X-ray tube—The term has the meaning given to it under § 221.2 (relating to definitions).

§ 227a.3. Exemptions.

(a) A radiation-producing device meeting the definition of “bomb detection radiation-producing device” is exempt from § 227a.16 (relating to posting).

(b) Unless used in a dedicated location, a handheld radiation-producing device is exempt from § 227a.16.

(c) The following devices and equipment are exempt from this chapter:

(1) Domestic television receivers, providing the exposure rate at 5 centimeters from any outer surface is less than 0.5 mrem (0.005 mSv) per hour.

(2) Cold-cathode gas discharge tubes, providing the exposure rates do not exceed 10 mrem (0.1 mSv) per hour at 30 centimeters from any point on the external surface of the tube.

(3) Other electrical equipment, except electron microscopes, that produces radiation incidental to its operation for other purposes, providing the dose rate to the whole body at the point of nearest approach to the equipment when any external shielding not integral to the equipment is removed does not exceed 25 mrem (0.25 mSv) per year. The product testing of any radiation-producing device or factory servicing of the equipment is not exempt.

(d) Equipment described in this section is not exempt from this chapter if it is used or handled in a manner an individual might receive a dose of radiation in excess of the limits specified in Chapter 219 (relating to standards for protection against radiation).

(e) Equipment operating at less than or equal to 50 kV tube voltage and designed to be held by an operator during use is exempt from this chapter except for §§ 227a.12 and 227a.21 (relating to labeling; and instruction and training).

§ 227a.4. Application for exemptions.

A radiation-producing device registrant who is subject to the requirements of this chapter and cannot meet one or more requirements of this chapter shall submit to the Department a written request for an exemption to the requirements that cannot be met. The exemption request must explain why the provision cannot be met and must demonstrate all of the following to the Department's satisfaction:

(1) That the use of the radiation-producing device will not result in undue hazard to public health and safety or to property.

(2) That compliance with the provision from which the registrant is seeking exemption would require replacement or substantial modification of the radiation-producing device.

(3) That the registrant will achieve, through other means, radiation protection equivalent to that required by the provision from which the registrant is seeking exemption.

Subchapter B. GENERAL TECHNICAL REQUIREMENTS

Sec.
 227a.10. Radiation safety program.
 227a.11. Warning devices.
 227a.12. Labeling.
 227a.13. Radiation source housing.
 227a.14. Generating cabinet or high voltage source radiation emission limits.
 227a.15. Surveys.
 227a.16. Posting.
 227a.17. Security.
 227a.18. Operating requirements.
 227a.19. Repair or modification of X-ray tube or radiation-producing device.
 227a.20. Testing of safety devices.
 227a.21. Instruction and training.
 227a.22. Radiation protection responsibility.

§ 227a.10. Radiation safety program.

A registrant who intends to use radiation-producing devices shall have a program for training personnel, written normal operating procedures and emergency procedures, individual monitoring reports required under 10 CFR 20.2206(a)(2) (relating to reports of individual monitoring), an internal review system and an organizational structure for radiation protection which includes specified delegations of authority and responsibility for operation of the program.

§ 227a.11. Warning devices.

(a) *Label*. Warning devices must be labeled so that their purpose is easily identified.

(b) *Warning device light*. An easily visible warning device light labeled with the words “X-RAY ON,” or words having a similar intent, must be located near every switch that energizes an X-ray tube and must be illuminated only when the tube is energized. This warning light must be of a fail-safe design.

§ 227a.12. Labeling.

(a) *General rule*. A radiation-producing device must be labeled with a readily visible and discernible sign or signs bearing the radiation symbol as defined under § 219.159 (relating to posting of radiation-producing machines) and the words: “CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED,” or words having a similar intent, near every switch that energizes an X-ray tube.

(b) *Devices with designed openings*. For radiation-producing devices with designed openings for object entries, such as baggage units, the following must be posted at or near every opening: “CAUTION—X-RAY HAZARD: DO NOT INSERT ANY PART OF THE BODY WHEN SYSTEM IS ENERGIZED” or words having similar intent.

§ 227a.13. Radiation source housing.

(a) *Interlock*. When the X-ray tube housing is the primary shielding for the X-ray tube and is intended to be

opened for normal use or maintenance, the housing must be equipped with an interlock that shuts off the high voltage to the X-ray tube if the housing is opened.

(b) *Radiation emission limit.* Except as specified elsewhere in this chapter, each X-ray tube housing must be constructed so that, with all shutters closed, the leakage radiation measured at 5 centimeters from the X-ray tube housing surface does not exceed 2.5 mrem (0.025 mSv) per hour. This limit must be met at the maximum tube rating.

§ 227a.14. Generating cabinet or high voltage source radiation emission limits.

Each X-ray generator or high-voltage source must be supplied with a protective cabinet which limits leakage radiation to 0.5 mrem (5.0 μ Sv) per hour at 5 centimeters measured at the nearest accessible surface. For closed-beam radiation-producing devices, this requirement may be met by complying with § 227a.33 (relating to radiation emission limit). For a radiation-producing device in a shielded room with the high-voltage generator also inside the shielded room, this limit may be met by measuring from any accessible surface outside the room housing the radiation-producing device. For hand-held, open-beam radiation-producing devices, this requirement may be met by complying with the limits under § 227a.50(3) (relating to handheld radiation-producing devices).

§ 227a.15. Surveys.

(a) *General rule.* Radiation surveys of all radiation-producing devices must be sufficient to show compliance under § 219.51 (relating to radiation dose limits for individual members of the public) and to show compliance with radiation emission requirements of this chapter. The radiation surveys must be sufficient to evaluate the magnitude and extent of radiation emissions and the potential radiological hazards that could be present. Records of these surveys must be maintained for 5 years for inspection by the Department. At a minimum, surveys shall be performed in the following instances:

(1) Upon installation of the equipment and at least once every 12 months thereafter.

(2) Following a change in the initial arrangement, number or type of local components in the system, and prior to returning to service.

(3) Following maintenance requiring the disassembly, removal or repair of a local component in the system, and prior to returning to service.

(4) During the performance of maintenance, calibration and another procedure if the procedure requires the presence of a primary beam while any local component in the system is disassembled or removed.

(5) Following bypass of a safety device or interlock as required by § 227a.18(b) (relating to operating requirements).

(6) When a visual inspection of the local components in the system reveals an abnormal condition.

(7) When a personnel monitoring device shows a significant increase, as predetermined by the registrant, over the previous monitoring period or readings approach the limits specified in 10 CFR 20.1201 (relating to occupational dose limits for adults).

(b) *Instrument requirements.* The registrant shall have access to sufficiently calibrated, appropriate and operable radiation survey instruments to make physical radiation surveys as required by this chapter. The instruments

must be capable of detecting and measuring the types and levels of radiation involved, including primary, scattered and leakage radiation.

(c) *Maintenance and calibration.* The registrant shall assure the maintenance and calibration of all monitoring and survey instruments under 10 CFR 20.1501 (relating to general).

(d) *Exception.* Radiation surveys are not required if a registrant otherwise demonstrates compliance under this chapter to the satisfaction of the Department.

§ 227a.16. Posting.

Each area or room containing a radiation-producing device where an individual may receive 2 mrem (0.02 mSv) in any 1 hour or 100 mrem (1 mSv) per year shall be conspicuously posted with a sign or signs bearing the radiation symbol and "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED," or words having a similar intent.

§ 227a.17. Security.

A radiation-producing device must be secured to be accessible only to authorized personnel at all times.

§ 227a.18. Operating requirements.

(a) *Procedures.* Normal operating procedures shall be written and available to all radiation-producing device workers. An individual may not operate a radiation-producing device in a manner other than that specified in the normal operating procedures unless the individual has obtained written approval of the radiation safety officer.

(b) *Bypassing.*

(1) An individual may not bypass a safety device or interlock, and may not remove shielding, unless the individual has obtained approval of the radiation safety officer. The approval shall be limited to a specified period of time.

(2) When a safety device or interlock has been bypassed, a conspicuous sign bearing the words "SAFETY DEVICE NOT WORKING," or words having a similar intent, shall be placed on the radiation source housing and at the control switch.

(3) A record of a bypass of a safety device or interlock shall be maintained.

The record must contain all of the following information:

(i) The date the bypass was made.

(ii) A detailed description of the bypass.

(iii) The length of time the unit remained in the altered condition.

(iv) The post bypass survey as noted in § 227a.15 (relating to surveys).

(v) Other relevant information for the bypass.

(4) A record of a bypass shall be signed by the radiation safety officer, the individual who performed the bypass and the individual who restored the unit to its original condition.

(c) *Control panel.*

(1) The radiation-producing device may only be activated from a control panel.

(2) All indicators and controls that control the primary beam must be identifiable and discernible through the use of labels, symbols, software displays or equivalent methods.

(d) *Interlocks.*

(1) An interlock may not be used to de-activate the X-ray tube of a radiation-producing device, except in an emergency or during testing of the interlock system.

(2) After an interlock is triggered, resetting the radiation-producing device to full operation must only be possible from a control panel.

(3) All interlocks must be of a fail-safe design.

(e) *Multiple Sources.* If more than one X-ray tube assembly or focal spot can be operated sequentially or simultaneously from a control panel, visual indicators must identify which tube assembly or focal spot has been selected. The selectors must be identified as to their function. If a letter or number is used, a reference card or table explaining the code must be affixed to the control panel.

§ 227a.19. Repair or modification of X-ray tube or radiation-producing device.

Only trained personnel or a registered service provider may install, repair or make modifications to a radiation-producing device. An operation involving removal of covers, shielding materials or tube housings, or an operation involving modifications to shutters, collimators or beam stops, may only be performed after ascertaining that the tube is off and will remain off until safe conditions have been restored. The main power switch with a lock-out/tag-out, rather than interlocks, shall be used for routine shutdown in preparation for repairs. The registrant shall ensure that only qualified personnel install, repair and make modifications to a radiation-producing device.

§ 227a.20. Testing of safety devices.

(a) *Testing interval.* Testing of safety devices, such as interlocks, shutters, warning lights and required emergency shut-off switches, shall be conducted on all operable radiation-producing devices at intervals not to exceed 12 months.

(b) *Device failure.* If a safety device fails during testing, the radiation-producing device shall be removed from service until the safety device is corrected or proper temporary administrative controls are established. The radiation safety officer shall approve in writing the temporary administrative controls.

(c) *Availability of records.* Records of safety device tests, check dates, findings and corrective actions shall be available for inspection and maintained for 5 years.

(d) *Record requirements.* Records required under this section must include the date of the test, a list of the safety devices tested, survey instrument information, the calibration date, the results of the test, the name of the person performing the test and, for safety devices that fail the required test, corrective actions taken.

(e) *Out of service requirements.* Testing of safety devices may be deferred if the unit or installation, or both, are clearly marked and kept out of service. A unit or installation, or both, brought back into service after the 12-month interval specified in subsection (a) shall be tested prior to use.

(f) *Testing constraints.* If testing of a safety device cannot be performed due to manufacturer design, the

registrant shall document that the safety device cannot be tested and specify why the safety device cannot be tested.

§ 227a.21. Instruction and training.

The registrant shall document the scope of training required for the radiation-producing device the registrant possesses under this section. An individual may not operate or maintain a radiation-producing device or enter a shielded room without appropriate instruction and training. Records of all required training and instruction shall be maintained onsite and made available for review by the Department for 5 years. Before an individual may operate or maintain a radiation-producing device or enter a shielded room, the individual shall receive instruction in and shall demonstrate competence as to the following:

(1) Types of radiation, identification of radiation hazards associated with the use of the radiation-producing device and associated equipment, and precautions or measures to take to minimize radiation exposure.

(2) Significance of the various radiation warnings, safety devices and interlocks incorporated into the equipment, or the reasons that warnings, safety devices or interlocks have not been installed on equipment and the extra precautions required in these cases.

(3) Commensurate with potential hazards of use, biological effects of radiation, radiation risks and recognition of symptoms of an acute localized exposure.

(4) Normal operating procedures for each type of radiation-producing device and associated equipment, as well as procedures to prevent unauthorized use. Training in normal operating procedures must include hands-on training.

(5) Emergency procedures for reporting actual or suspected accidental exposure and other radiation safety concerns, such as an unusual occurrence or malfunction that may involve exposure to radiation.

(6) Radiation survey performance, where applicable.

§ 227a.22. Radiation protection responsibility.

(a) *Responsibility.* The registrant's designated senior management shall make the decision to use a radiation-producing device. The registrant shall document the designated senior management responsible for radiation safety and those records shall be available for inspection by the Department and maintained for 5 years.

(b) *Radiation safety officer designation.* The registrant's senior management shall designate a radiation safety officer. This individual shall have direct access to senior management for radiation safety issues. This individual shall have training and experience commensurate with the scope of the radiation safety program to carry out the following responsibilities:

(1) Ensuring that all radiation-producing devices are operated within the limitations of the established radiation safety program and normal operating procedures.

(2) Instructing personnel on safe working practices and ensuring that all personnel are trained in radiation safety commensurate with the hazards of the job.

(3) Investigating all incidents of abnormal operation and of abnormal exposure or suspected overexposure of an individual to determine the cause of the incident, to take remedial action and to report the incident to the proper authority.

(4) Ensuring that safety devices, interlocks, warning signals, labels, postings and signs are functioning and located where required.

(5) Maintaining all radiation safety records, including annual audits of the radiation protection program and documentation of its findings, and making the records available for review by the Department for 5 years.

Subchapter C. CLOSED-BEAM RADIATION-PRODUCING DEVICES

Sec.

- 227a.30. System enclosure.
- 227a.31. Interlocks.
- 227a.32. Interlock functions.
- 227a.33. Radiation emission limit.
- 227a.34. Security screening devices.
- 227a.35. Electron microscope devices.

§ 227a.30. System enclosure.

The radiation source, sample or object, detector and analyzing crystal, if used, of a closed-beam radiation-producing device must be enclosed in a chamber or coupled chambers that cannot be entered by any part of the body during normal operation.

§ 227a.31. Interlocks.

Doors and panels accessing the closed-beam radiation-producing device must be interlocked. The interlocks required by this section must be of a fail-safe design.

§ 227a.32. Interlock functions.

The closed-beam radiation-producing device enclosure, sample chamber, or other similar closure must be interlocked with the X-ray tube high voltage supply or a shutter in the primary beam, or both, so that no X-ray beam can enter the sample or object chamber while the chamber is open unless the interlock has been conspicuously and deliberately defeated. The interlock required by this section must be of fail-safe design or have adequate administrative controls to ensure that operations will only continue with a proper functioning interlock.

§ 227a.33. Radiation emission limit.

The radiation emission for a closed-beam radiation-producing device may not exceed a dose rate of 0.5 mrem (0.005 mSv) in 1 hour at 5 centimeters outside any accessible surface.

§ 227a.34. Security screening devices.

Closed-beam security screening devices must have a mechanism to ensure operator presence at the control area in a location that enables surveillance of the openings and doors of the control area during generation of radiation. The following apply:

(1) During an exposure or preset succession of exposures of 0.5 second or greater duration, the closed-beam radiation-producing device must have a mechanism to enable the operator to terminate the exposure or preset succession of exposures at any time.

(2) During an exposure or preset succession of exposures of less than 0.5 second duration, the closed-beam radiation-producing device must have a mechanism to allow completion of the exposure in progress but must enable the operator to prevent additional exposures.

§ 227a.35. Electron microscope devices.

(a) *Labeling.* A closed-beam electron microscope device must be labeled with a conspicuous sign bearing the words, "Caution Radiation—This Equipment Produces Radiation When Energized," or words containing a similar warning.

(b) *Maximum radiation level.* Radiation levels measured 5 centimeters from an accessible surface of a closed-beam electron microscope may not exceed 0.5 millirem (0.005 mSv) per hour.

(c) *Operation.* A registrant may not permit an individual to operate or conduct maintenance upon any closed-beam electron microscope until the individual has received a copy of, instruction in, and demonstrated an understanding of the normal operating procedures necessary to ensure radiation safety.

Subchapter D. OPEN-BEAM RADIATION-PRODUCING DEVICES

Sec.

- 227a.40. Safety device.
- 227a.41. X-ray on status.
- 227a.42. Labeling.
- 227a.43. Beam ports.
- 227a.44. Shutters.
- 227a.45. Radiation emission limits.
- 227a.46. Primary beam attenuation.
- 227a.47. Operator attendance.
- 227a.48. Control of access.
- 227a.49. Instruction and training.
- 227a.50. Handheld radiation-producing devices.
- 227a.51. Bomb detection radiation-producing devices.
- 227a.52. Radiation-producing devices used in individual security screening.
- 227a.53. Radiation-producing devices used in vehicle security screening.
- 227a.54. Permanent radiographic installations.
- 227a.55. Shielded room radiation-producing devices.

§ 227a.40. Safety device.

(a) *Documentation.* The registrant shall document its justification of the use of an open-beam instead of closed-beam radiation-producing device.

(b) *Open-beam considerations.* If the registrant needs to use an open-beam radiation-producing device, the registrant shall consider a safety device which minimizes the chance of entry of any portion of the operator's body into the path of the primary beam or which causes the primary beam to be shut off upon entry into its path.

(c) *Records.* If the registrant's use of an open-beam radiation-producing device does not permit the use of a safety device to minimize the chance of direct body exposure, the registrant shall maintain a written record of a description of the various safety devices that have been evaluated and reasons the devices cannot be used. These records shall be available onsite for inspection as long as this method is used, plus an additional 5 years.

(d) *Alternative methods.* If the registrant's use of the open-beam radiation-producing device does not permit the use of a safety device to minimize the chance of direct body exposure, the registrant shall use alternative methods, such as policies and procedures, to minimize the possibility of unnecessary exposure. The registrant shall document the alternative methods used. The documentation must include information about the absence of safety devices. This documentation shall be available for inspection as long as the methods are used plus an additional 5 years.

(e) *Compliance.* For a portable open-beam radiation-producing device without a safety device described under subsection (b) that is manufactured to be used or potentially used as a handheld device, the safety device requirements under subsections (b)—(d) shall be met by complying with § 227a.50 (relating to handheld radiation-producing devices) prior to use.

§ 227a.41. X-ray on status.

Open-beam radiation-producing devices must have a conspicuous and active indication of the following, as applicable:

(1) X-ray tube “on-off” status indicator located near the radiation source housing. The warning lights required under § 227a.11(b) (relating to warning devices), meet this requirement if the warning lights are conspicuous and viewable by anyone near the primary beam.

(2) Shutter “open-closed” status indicator located at the control panel and near each beam port on the radiation source housing, if the primary beam is controlled with a shutter. The shutter status device must be clearly labeled to indicate whether the shutter is open or closed. The status light at the control panel meets the requirement for the status light at the beam port if the status light at the control panel is conspicuous and viewable by anyone near the primary beam.

(3) The X-ray tube “on-off” status indicator and the shutter “open-closed” status indicators must be of a fail-safe design.

§ 227a.42. Labeling.

Each unit must be labeled at or near the X-ray exit beam port to identify the location of the beam with the words, “CAUTION—X-RAY BEAM,” “CAUTION—HIGH INTENSITY X-RAY BEAM,” or words having a similar intent.

§ 227a.43. Beam ports.

Unused beam ports on radiation source housings shall be secured in the closed position in a manner which will prevent inadvertent opening.

§ 227a.44. Shutters.

On open-beam radiation-producing device configurations that are designed to accommodate interchangeable components, each beam port on the radiation source housing must be equipped with a shutter that cannot be opened unless a collimator or a component coupling has been connected to the beam port.

§ 227a.45. Radiation emission limits.

Radiation emissions limits, set by the registrant and exclusive of the primary beam, must be met at any specified tube rating established by the manufacture. The local components of an open-beam radiation-producing device must be located, and be arranged and include sufficient shielding or access control to prevent either of the following from occurring:

(1) Radiation emissions in any area surrounding the local component group which could result in an occupational dose in excess of 10 CFR Part 20 Subpart C (relating to occupational dose limits).

(2) A dose to an individual in an area surrounding the local component group in excess of the dose limits outlined under § 219.51 (relating to dose limits for individual members of the public).

§ 227a.46. Primary beam attenuation.

In cases where the primary beam is not intercepted by the detector device under all conditions of operation, protective measures, such as auxiliary shielding or administrative procedures, shall be provided to avoid exposure to any individual from the transmitted primary beam.

§ 227a.47. Operator attendance.

The operator shall be present at all times when the equipment is in operation except when the area is locked, or the equipment is secured to protect against unauthorized or accidental entry.

§ 227a.48. Control of access.

If the radiation-producing device is not in a restricted area as defined in 10 CFR 20.1003 (relating to definitions), the operator shall control access to the radiation-producing device at all times during operation. If the radiation-producing device is not in a restricted area and the radiation-producing device is capable of creating a radiation area or a high radiation area as defined 10 CFR 20.1003 (relating to definitions), the operator shall control access to the radiation-producing device at all times during operation. The following apply:

(1) Radiation areas must be conspicuously identified. The following apply:

(i) The radiation source must be within a conspicuous perimeter, for instance, a rope, tape or other barrier, that identifies the area in which radiation levels could result in an individual receiving a dose equivalent in excess of 0.005 rem (0.05mSv) in 1 hour.

(ii) The area described in subparagraph (i) must be suitably posted with “CAUTION—RADIATION AREA” signs.

(iii) The operator shall ensure that no one is inside and that no one enters the radiation area during operation of the radiation-producing device.

(2) High radiation areas must be conspicuously identified. The following apply:

(i) The radiation source must be within a conspicuous perimeter, for instance, a rope, tape, or other barrier, that identifies the area in which radiation levels from radiation sources external to the body could result in an individual receiving a dose equivalent in excess of 0.1 rem (1 mSv) in 1 hour.

(ii) The area described in subparagraph (i) must be suitably posted with “CAUTION—HIGH RADIATION AREA” signs.

(iii) The operator shall ensure that no one is inside or enters the high radiation area during operation of the radiation-producing device.

(3) The operator shall perform a visual check of the controlled area to ensure that it is free of all unauthorized personnel immediately prior to activating or exposing the radiation source.

§ 227a.49. Instruction and training.

In addition to meeting the requirements of § 227a.21 (relating to instruction and training), an individual may not operate or maintain an open-beam radiation-producing device unless the individual has received training applicable to the procedures to be performed and the specific equipment used. This training may include more specific and detailed instruction in, and demonstrated competence as to, the following:

(1) Sources and magnitude of common radiation exposure.

(2) Units of radiation measurement.

(3) Radiation protection concepts of time, distance, shielding and ALARA.

(4) Procedures and rights of a declared pregnancy.

(5) Regulatory requirements and area postings.

(6) Worker, embryo/fetus and public dose limits.

(7) Proper use of survey instruments and dosimetry.

(8) Policies and procedures required under § 227a.40 (relating to safety device).

§ 227a.50. Handheld radiation-producing devices.

In addition to the requirements in Subchapter B and this subchapter (relating to general technical requirements; and open-beam radiation-producing devices), the following requirements apply to open-beam, hand-held radiation-producing devices.

(1) *Procedures.* A registrant possessing an open-beam, hand-held radiation-producing device shall have available for review operating policies and procedures that contain measures to ensure that the following are met:

(i) Radiation protection is provided equivalent to that afforded under § 219.51 (relating to dose limits for individual members of the public).

(ii) Radiation protection is provided equivalent to that afforded under § 227a.46 (relating to primary beam attenuation).

(iii) The operator will not hold the sample during operation of the radiation-producing device and that the operator's hands will not approach the primary beam.

(iv) The operator will not aim the primary beam at any individual, including the operator, during the operation of the radiation-producing device.

(v) Operator radiation exposure is as low as reasonably achievable by use of means such as ancillary equipment that will reduce exposure.

(2) *Training.* In addition to the training requirements under §§ 227a.21 and 227a.49 (relating to instruction and training), the registrant shall provide training for all users and operators on the subjects specified under this section. Records shall be maintained for all user and operator training and be made available for review by the Department for 5 years.

(3) *Radiation emission limit.* For hand-held radiation-producing devices, the limits of §§ 227a.13(b) and 227a.14 (relating to radiation source housing; and generating cabinet or high voltage radiation emission limits), excluding the primary beam, shall be met if the radiation emission at any accessible surface of the radiation-producing device does not exceed 2.5 mrem (0.025 mSv) per hour at 5 centimeters.

§ 227a.51. Bomb detection radiation-producing devices.

In addition to the requirements in Subchapter B (relating to general technical requirements), except § 227a.16 (relating to posting), the following requirements apply to bomb detection radiation-producing devices:

(1) *Control panel security.* In addition to the requirements in § 227a.17 (relating to security), bomb detection radiation-producing devices shall be locked to prevent unauthorized use when not in use.

(2) *Use log.* The registrant shall maintain a use log for each bomb detection radiation-producing device. This log must record the description of the unit, the date removed from storage, the date returned to storage, the identity and signature of the person to whom the device is assigned, the dates of use and the site or sites of use.

(3) *Area control.* The registrant shall provide security to prevent entry by individuals from any point when the device is energized during training.

§ 227a.52. Radiation-producing devices used in individual security screening.

In addition to the requirements in Subchapter B (relating to general technical requirements), the following

requirements apply to radiation-producing devices used in individual security screening. A person requesting Department approval for a radiation-producing device to be used for individual security screening with intended human exposure to the primary beam for public protection shall submit the following information to the Department for evaluation and approval. The applicant shall state how the dose limits in this section will be met. The applicant shall receive Department approval prior to use.

(1) *Efficacy evaluation.* An evaluation of all known alternate methods that could achieve the goals of the individual security screening program and an explanation of why these methods will not be used in preference to the applicant's proposed approach using ionizing radiation.

(2) *Equipment evaluation.* A device used for individual security screening of humans shall be evaluated by a qualified expert at the following times for optimization of image quality and radiation dose per manufacturer's recommendations and this section:

(i) Upon installation of the device.

(ii) After maintenance that affects the radiation shielding, shutter mechanism or X-ray production components.

(iii) Upon damage to the system.

(iv) Every 12 months.

(3) *Dose limits for general-use systems.* An effective dose for a single complete screening must be limited to 25 μ rem (0.25 μ Sv) when the system is used without regard to the number of individuals scanned or number of scans per individual in a year.

(4) *Dose limits for limited-use systems.* The effective dose per screening must be less than or equal to 1 mrem (0.01mSv) when equipment is capable of operation greater than 25 μ rem (0.25 μ Sv) per screening and is used with discretion.

(5) *Dose limits for repeat security screenings.* An individual subject to repeat individual security screenings at a single venue may not receive an effective dose greater than 25 mrem (0.25 mSv) in a 12-month period at the registrant's or licensee's facility.

(6) *Information available to screening subjects.* At a minimum, the registrant shall make the following information available to screening subjects prior to scanning:

(i) The estimated effective dose from one screening.

(ii) Examples comparing the effective dose with commonly known sources of radiation exposure.

(7) *Training.* Training must include the following:

(i) The radiation safety officer shall have 8 hours of training in radiation safety which must include X-ray physics, biological effects, units of measure, safety standards, and protection regulations.

(ii) In addition to X-ray scanner operation training by the manufacturer, an operator shall receive at least 2 hours of radiation safety training.

(iii) All operators and the radiation safety officer shall receive annual radiation safety refresher training. Training must include the applicable topics under Chapter 221, Appendix A (relating to determination of competence).

(8) *Scanning of minors and pregnant individuals.* The scanning of an individual under 18 years of age or an individual known or declared pregnant is prohibited without prior departmental approval.

(9) *Preventative maintenance.* The registrant shall follow the manufacturer's recommended preventive maintenance schedule.

(10) *Radiation protection program.* A written radiation safety program must be based on accepted radiation protection principles, including keeping an exposure ALARA. The registrant is responsible to have the program developed, documented and implemented. The radiation safety officer shall review the radiation protection program at least annually.

(11) *Records retention.* The registrant shall maintain all records relative to the use of the radiation-producing device for at least 5 years.

§ 227a.53. Radiation-producing devices used in vehicle security screening.

(a) *Procedure for human exposure.* When the procedures for operation of a mobile or transportable radiation-producing device used for security screening of vehicles includes knowingly exposing human occupants to the primary beam when screening vehicles, structures or containers, the system is subject to the same requirements as general-use or limited-use systems as provided in § 227a.52(1)–(5) (relating to radiation-producing devices used in individual security screening).

(b) *Minimizing human exposure.* If vehicle occupants are knowingly exposed to the primary beam of a security screening device and the requirements in § 227a.52(3)–(5) cannot be met, then there shall be means to assure the occupied portion of the vehicle is outside of the scan area while the primary beam is emitted or procedures shall be established and implemented to assure that no occupants are present in the vehicle during screening.

(c) *Dosage limits.* The effective dose to an individual for a single inadvertent exposure to the primary beam must not exceed 500 mrem (5 mSv). The reliability of the procedure used to assure that a vehicle to be scanned is unoccupied must be commensurate with the potential severity of an inadvertent exposure. A pre-screening with a mode or system that can meet the limits under § 227a.52(3)–(5) shall be used to verify that the vehicle being examined is unoccupied if the 500 mrem (5 mSv) limit cannot be assured.

§ 227a.54. Permanent radiographic installations.

(a) *Entrance controls.* Permanent radiographic installations having high radiation area entrance controls of the types described in 10 CFR 20.1601 and 20.1902 (relating to control of access to high radiation areas; and posting requirements) must also meet the following requirements:

(1) Each entrance that is used for personnel access to the high radiation area in a permanent radiographic installation must have both visible and audible warning signals to warn of the presence of radiation. The visible signal shall be activated by radiation whenever the X-ray source is energized. The audible signal shall be activated when an attempt is made to enter the installation while the X-ray source is energized.

(2) The entrance control device or alarm system shall be tested for proper function prior to beginning operations on each day of use.

(3) The industrial radiographic system may not be used if an entrance control device or alarm system is not operating properly. If an entrance control device or alarm system is not functioning properly, it shall be removed from service and repaired or replaced immediately. If no

replacement is available, the facility may continue to be used provided that the registrant implements the continuous surveillance under 10 CFR 34.51 and 34.53 (relating to surveillance; and posting), § 225.85 (relating to surveys and survey records) and uses an alarming ratemeter. Before the entrance control device or alarm system is returned to service, the radiation safety officer or an individual designated by the radiation safety officer shall validate the repair.

(b) *Records.* Records of the tests performed under subsection (a) shall be maintained for inspection by the Department for 5 years.

§ 227a.55. Shielded room radiation-producing devices.

(a) *Control of access.* A room used for shielded room X-ray radiography must be shielded so that every location on the exterior meets conditions for an unrestricted area. Access to the room may only be through openings that are interlocked. The openings must be interlocked so that the radiation source cannot operate unless all openings are securely closed and meet the requirement of 10 CFR 20.1601 (relating to control of access to high radiation areas).

(b) *Physical radiation survey.* The operator shall conduct a physical radiation survey to determine that the radiation source is deenergized prior to each entry into the radiographic exposure area.

(c) *Radiation monitoring system.* The operator may use an independent radiation monitoring system that displays the radiation intensity or displays when radiation levels have returned to their pre-irradiation levels as an alternative to subsection (b).

**CHAPTER 228. RADIATION SAFETY REQUIREMENTS FOR PARTICLE ACCELERATORS
GENERAL PROVISIONS**

§ 228.2. Definitions.

The following words and terms, when used in this chapter, have the following meanings, unless the context clearly indicates otherwise:

Accelerator or particle accelerator—A radiation-producing machine [**that imparts kinetic energies of one of the following:**

(i) **One-tenth of one MeV or greater to electrons if the electron beam is brought out of the evacuated region of the unit.**

(ii) **One MeV or greater to electrons if the electrons are utilized for X-ray production.**

(iii) **One-tenth of one MeV or greater to other particles.]**

capable of accelerating electrons, protons, deuterons, or other charged particles in a vacuum and of discharging the resultant particulate or other radiation into a medium at energies usually in excess of 1 megaelectron volt (MeV).

Applicator—A structure which determines the extent of the treatment field at a given distance from the virtual source.

DEPARTMENT OF AGRICULTURE

Farm-to-School Grant Program; 2021-2022 Program Guidelines

The Department of Agriculture (Department) announces the program requirements and application period for grants under the Farm-to-School Program (Program). The Program is a grant program authorized under the Farm-to-School Act (3 Pa.C.S. §§ 10901—10910). These Program guidelines have been developed in consultation with the Commission for Agricultural Excellence and the Department of Health.

1. Program objectives.

The purpose of the Program is to educate prekindergartners through fifth graders and their families about the importance of choosing healthy, locally produced foods and increase awareness of agriculture in this Commonwealth. This initiative will also aid farmers in this Commonwealth in gaining access to new markets within this Commonwealth.

2. Eligible applicants and projects.

(a) *Eligible applicants.* A school district, charter school or private school with prekindergarten classes, a kindergarten program or elementary school classes through the fifth grade, that is located and operates within this Commonwealth, may submit an application for funding.

(b) *Eligible projects.* Grants will be awarded to develop the Program in prekindergarten classes, kindergarten classes or elementary school classes through the fifth grade in this Commonwealth. Eligible projects are those that do all of the following:

(1) Educate prekindergartners through fifth graders and their families about the importance of choosing healthy, locally produced foods and increase awareness of agriculture in this Commonwealth.

(2) Achieve one or more of the following objectives of the Program:

(i) Nutrition education involving student participation which is integrated into regular subjects in the curriculum of primary and secondary education institutions.

(ii) Focusing on locally grown foods provided from farms in this Commonwealth.

(iii) Equipping teachers and other educators to incorporate nutrition and agriculture education into their instruction.

(iv) Providing for new direct marketing opportunities for farmers in this Commonwealth.

(v) Providing for family and community involvement, including parent, caregiver and community group participation in education activities.

(vi) Visits to nearby farms for school children so they may understand and learn more about the sources of their food.

(3) Contain one or more of the following elements:

(i) A list of farmers in this Commonwealth who have agreed to supply food products from farms in this Commonwealth, verifiable by the Department.

(ii) Nutrition and agriculture education, including integration into regular classroom subjects.

(iii) Training of teachers and other educational staff on nutrition and agriculture education.

(iv) The inclusion of parents, caregivers and community groups in educational activities.

(v) Field trips to farms in this Commonwealth or other direct agricultural educational experiences which teach children about sources of food and agriculture in this Commonwealth.

(vi) Provision for reimbursement of up to 75% of the costs for purchasing locally grown foods provided from farms in this Commonwealth and foods purchased directly from farmers in this Commonwealth to meet the objectives set forth in subparagraphs (2)(ii) and (iv).

3. Definitions.

The following words and terms have the following meanings:

“*Department.*” The Department of Agriculture of the Commonwealth.

“*Program.*” The Farm-to-School Program.

“*Secretary.*” The Secretary of the Department.

4. Limitations on grants.

(a) *Total funds available.* The sum of \$500,000 is available for grants under the Program for Fiscal Year 2021-2022. Grant funds will be awarded on a funds-available basis.

(b) *Project duration.* A project must have a completion date of no later than June 30, 2022.

(c) *Reimbursement grants.* Grant funds will be awarded as reimbursement grants.

(d) *Percentage cap.* A single grant shall be limited to 75% of the cost of the project identified in the grant application.

(e) *Per-school cap.* Grant amounts shall not exceed \$15,000 annually, per school.

(f) *In-kind support.* Grant recipients may use the value of in-kind support to match the amount granted.

(g) *Additional restrictions.* The Secretary may impose additional restrictions or special conditions upon the issuance of a grant.

5. Applications.

(a) *Electronic applications only.* Interested applicants must submit a complete grant application using the Department of Community and Economic Development's Electronic Single Application web site at www.esa.dced.state.pa.us.

(b) *Application content.* The application shall require the applicant to explain how the project for which grant funds are sought is an eligible project as described in section 2(b), and other information as the Department may reasonably require.

(c) *Application window.* Completed applications may be electronically submitted beginning August 16, 2021. All applications must be received no later than 4:59 p.m. on October 1, 2021.

6. *Review of application.* The Secretary will review and evaluate applications and supporting documents for completeness, and will evaluate applications based on the following considerations:

- (1) The ability of the applicant to complete the Program.
- (2) The ability of the applicant to incorporate all of the Program requirements.
- (3) The location of the school in an area where a high percentage of the children receive free or reduced-price school meals.
- (4) The potential of the Program to increase knowledge about nutrition and healthy eating habits for the children, their caregivers and the community.
- (5) The potential of the Program to increase knowledge about agriculture in this Commonwealth for the children, their caregivers and the community.
- (6) The ability of the applicant to procure locally grown foods for the applicant's Program.
- (7) The potential of the Program to increase markets for local agricultural producers.
- (8) The number of people who will be served by the Program.
- (9) The ability of the applicant to sustain the Program.
- (10) The overall performance of the applicant if a grant was received in a previous year.

7. *Notice of disposition of application.*

The Department will provide an applicant written notice (by regular mail or e-mail) of the acceptance or rejection of a grant application.

8. *Grant agreement.*

After the Secretary approves a grant application, and as a precondition to the Department's release of grant moneys to a successful applicant, the Department and the applicant will execute a written or electronic Grant

Agreement which describes the terms and conditions subject to which the grant is made. The Grant Agreement shall contain and conform to the requirements of this notice and shall also contain special terms and conditions as required by the Secretary.

9. *Verification of project completion.*

(a) *General.* Within 30 days of completion of the subject project, the applicant shall provide the Department with proof of the completion of the project and eligibility to receive reimbursement grant funds from the Department.

(b) *Required documentation.* The proof described in subsection (a) shall consist of:

(1) copies of invoices for goods or services directly related to the project, along with the written certification of the president or treasurer of the applicant that the goods or services that are the subject of the invoices have been delivered or provided to the applicant; and

(2) a certificate of completion, signed by its president or treasurer, verifying completion of the subject project and stating that the grant funds will reimburse the applicant for a portion of the costs incurred by the applicant in completing the subject project.

10. *Questions and additional information.*

Questions regarding this Program, including the online application process may be directed to Patrick Andrews, Bureau of Market Development, Department of Agriculture, 2301 North Cameron Street, Room 310, Harrisburg, PA 17110-9408, (717) 772-1429, RA-AGFARMTOSCHOOL@pa.gov.

DEPARTMENT OF BANKING AND SECURITIES

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of September 2021

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P.L. 13, No. 6) (41 P.S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of September 2021, is 4 1/4%.

The interest rate limitations under the Commonwealth's usury statute were pre-empted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub.L. No. 96-221). Further pre-emption was instituted with the signing of Pub.L. No. 96-399, which overrode State interest rate

limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board or the United States Treasury, or both. The latest yield rate on long-term government securities is 1.71 to which was added 2.50 percentage points for a total of 4.21 that by law is rounded off to the nearest quarter at 4 1/4%.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Applications, Actions and Special Notices

APPLICATIONS

THE PENNSYLVANIA CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT

APPLICATIONS FOR NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS UNDER THE CLEAN STREAMS LAW AND FEDERAL CLEAN WATER ACT

This notice provides information about persons who have applied to the Department of Environmental Protection (DEP) for a new, renewed, or amended NPDES or WQM permit, or a permit waiver for certain stormwater discharges, or have submitted a Notice of Intent (NOI) for coverage under a General Permit. The applications and NOIs concern, but are not limited to, effluent discharges from sewage treatment facilities and industrial facilities to surface waters or groundwater; stormwater discharges associated with industrial activity (industrial stormwater), construction activity (construction stormwater), and municipal separate storm sewer systems (MS4s); the application of pesticides; the operation of Concentrated Animal Feeding Operations (CAFOs); and the construction of sewage, industrial waste, and manure storage, collection and treatment facilities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376). More information on the types of NPDES and WQM permits that are available can be found on DEP's website (visit www.dep.pa.gov and select Businesses, Water, Bureau of Clean Water, Wastewater Management, and NPDES and WQM Permitting Programs).

<i>Section</i>	<i>Category</i>
I	Individual and General WQM Permit Applications/NOIs Received, General NPDES Permit NOIs Received, and All Transfer and Minor Amendment Applications/NOIs Received
II	Individual NPDES Permits—New, Renewal, and Major Amendment Applications and Draft Permits for Discharges Relating to Sewage, Industrial Waste, Industrial Stormwater, MS4s, Pesticides and CAFOs
III	Individual NPDES Permit Applications for Discharges of Stormwater Associated with Construction Activity

Section I identifies the following applications and NOIs that have been received by DEP:

- Individual and General WQM Permit Applications Received—DEP provides a 15-day public comment period for Individual WQM Permit Applications for new and reissued permits. There is no public comment period for General WQM Permit NOIs.
- General NPDES Permit NOIs Received—There is no public comment period for General NPDES NOIs received.
- All Transfer and Minor Amendment Applications/NOIs Received—Transfer and Minor Amendment Applications/NOIs received for Individual and General WQM Permits and Individual and General NPDES Permits are identified but do not have public comment periods. DEP provides a 15-day public comment period for Individual WQM Permit Applications for amendments.

Additional information on these applications and NOIs may be reviewed by generating the “Applications and NOIs without Comment Periods Report” or, for Individual WQM Permit Applications, the “Applications Received with Comment Periods Report” on DEP’s website at www.dep.pa.gov/CWPublicNotice.

Section II identifies individual NPDES permit applications received and draft permits issued by DEP relating to sewage, industrial waste, industrial stormwater, MS4s, pesticides and CAFOs. A 30-day public comment period applies to these applications, except when a site-specific water quality criterion is used to establish effluent limitations, in which case a 45-day public comment period applies. The period for comment may be extended at the discretion of the Department for one additional 15-day period. Additional information, including links to draft permits and fact sheets that explain the basis for DEP’s tentative determinations may be reviewed by generating the “Applications Received with Comment Periods Report” on DEP’s website at www.dep.pa.gov/CWPublicNotice. Notification of 15-day extensions for comment will be provided in the “Applications Received with Comment Periods Report” (Comments column).

Section III provides notice of applications and draft individual permits for stormwater discharges associated with construction activities. Where indicated, DEP has made tentative determinations, based on preliminary review, to issue permits subject to proposed effluent limitations consisting of best management practices identified in the erosion and sediment control (E&S) plans and post-construction stormwater management (PCSM) plans submitted with the applications, as well as other terms and conditions based on the permit applications. A 30-day public comment period applies to these applications.

Applications and NOIs may be reviewed at the DEP office that received the application or NOI. Contact information for each DEP office for Sections I & II is listed as follows. Contact information for Section III is available within the table. Members of the public are encouraged to use DEP’s website to obtain additional information as discussed previously.

Comments received within the appropriate comment periods for WQM and NPDES permit applications will be retained by DEP and considered in the final determinations regarding the applications. A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform DEP of the exact basis of a comment and the relevant facts upon which it is based.

DEP office contact information to review applications and NOIs in Sections I & II and to submit comments for those application and NOIs, when applicable, is as follows:

DEP will also accept requests or petitions for public hearings on applications. The request or petition must indicate the interest of the party filing and the reasons why a hearing is warranted. A hearing will be held if the Department determines that there is a significant public interest. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. DEP will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

STATE CONSERVATION COMMISSION

PROPOSED NUTRIENT MANAGEMENT PLANS RELATED TO APPLICATIONS FOR NPDES PERMITS FOR CAFOs

This notice provides information about agricultural operations that have submitted nutrient management plans (NMPs) for approval under 3 Pa.C.S. Chapter 5 and that have or anticipate submitting applications for new, amended or renewed (National Pollutant Discharge Elimination System) NPDES permits, or Notices of Intent (NOIs) for coverage under a general permit, for CAFOs, under 25 Pa. Code Chapter 92a. This notice is provided in accordance with 25 Pa. Code Chapter 92a and 40 CFR Part 122, implementing The Clean Streams Law and the Federal Clean Water Act.

Based upon preliminary reviews, the State Conservation Commission (SCC) or County Conservation Districts (CCD) working under a delegation agreement with the SCC have completed an administrative review of NMPs described. These NMPs are published as proposed plans for comment prior to taking final actions. The NMPs are available for review at the CCD office for the county where the agricultural operation is located. A list of CCD office locations is available at <http://www.nacdnet.org/about/districts/directory/pa.phtml> or can be obtained from the SCC at the office address listed or by calling (717) 787-8821.

Persons wishing to comment on an NMP are invited to submit a statement outlining their comments on the plan to the CCD, with a copy to the SCC for each NMP, within 30-days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the NMPs. Comments should include the name, address and telephone number of the writer and a concise statement to inform the SCC of the exact basis of the comments and the relevant facts upon which they are based. Comments should be sent to the SCC, Agriculture Building, Room 310, 2301 North Cameron Street, Harrisburg, PA 17110.

Persons with a disability who require an auxiliary aid, service, including TDD users or other accommodations to seek additional information should contact the SCC through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

PUBLIC WATER SUPPLY PERMITS

Under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17), the following parties have applied for PWS permits to construct or substantially modify public water systems.

Persons wishing to comment on permit applications are invited to submit statements to the office listed before the application within 30 days of this public notice. Comments received within this 30-day comment period will be considered in the formulation of the final determinations regarding an application. A comment should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based. A public hearing may be held after consideration of comments received during the 30-day public comment period.

Following the comment period, the Department will make a final determination regarding the proposed permit. Notice of this final determination will be published in the *Pennsylvania Bulletin* at which time this determination may be appealed to the Environmental Hearing Board.

The permit application and related documents are on file at the office listed before the application and available for public review. Arrangements for inspection and copying information should be made with the office listed before the application.

Persons with a disability that require an auxiliary aid, service or other accommodations to participate during the 30-day public comment period should contact the office listed before the application. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

**UNDER ACT 2, 1995
PREAMBLE 1**

Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

Pesticides including dieldrin were reported in soil and groundwater. The intended future use of the property is residential. The proposed cleanup standard for the site is site-specific standard/Statewide health standard. The Notice of Intent to Remediate was published in the *Bucks County Courier Times* on July 6, 2021.

DETERMINATION FOR APPLICABILITY FOR RESIDUAL WASTE GENERAL PERMITS

Application(s) for Determination of Applicability is Administrative Complete Under the Solid Waste Management Act (35 P.S. §§ 6018.101–6018.1003); the Municipal Waste Planning, Recycling and Waste Reduction Act (53 P.S. §§ 4000.101–4000.1904); and Residual Waste Regulations for a General Permit to Operate Residual Waste Processing Facilities and/or the Beneficial Use of Residual Waste Other Than Coal Ash.

Southcentral Region: Regional Solid Waste Manager, 909 Elmerton Avenue, Harrisburg, PA 17110.

General Permit Application No. WMGR159SC001. PA Department of Corrections, SCI Camp Hill,

2500 Lisburn Road, Camp Hill, PA 17001 located in Lower Allen Township, **Cumberland County**. This general permit would authorize the processing prior to beneficial use and beneficial use of reclaimed waste coal ash as an ingredient in concrete manufacturing. The application for determination of applicability under WMGR159 was determined to be administratively complete by the Southcentral Regional Office on August 2, 2021.

Persons interested in obtaining more information about the general permit application may contact John Oren, P.E., Permits Section Chief, Southcentral Regional Office, Waste Management Program, 909 Elmerton Avenue, Harrisburg, PA 17110, 717-705-4706. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service, (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E,

or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the Regional Office listed before the application. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

15-0010F: Cleveland-Cliffs Plate LLC (139 Modena Road, Coatesville, PA 19320) for the replacement of an existing 145’ NAB furnace with a new furnace and the installation of a new NAB Shot Blast process at their Coatesville facility located in the city of Coatesville, **Chester County**. The facility is a Title V facility. The potential emissions from the project are the following: 15 TPY NO_x, 19.55 TPY CO, 1.18 TPY VOC, 0.11 TPY SO_x, 8.68 TPY PM, 0.385 TPY single HAP, and 0.403 TPY total HAPs. The new furnace will employ Ultra low NO_x Burners (ULNB) in order to reduce NO_x emissions, while the new Shot Blaster will be controlled by a dust collector in order to reduce PM emissions. The company will comply with all required monitoring, recordkeeping, and testing requirements.

The requirements from 40 CFR Part 64 for Compliance Assurance Monitoring apply to the baghouse, and testing, monitoring, recordkeeping, and work practice requirements were added to this plan approval to address this requirement.

Anyone wishing to request information regarding this action can do so by contacting the Southeast Regional Office through the contact person listed in the previously listed header. Comments on the draft plan approval can be submitted through the Air Quality resource account at RA-EPSEROPUBCOM@pa.gov.

29-03001B: JLG Equipment Services, Inc. (1 JLG Drive, McConnellsburg, PA 17233), for the installation of a new primer spray coating booth to debottleneck the

roll-on truck deck manufacturing facility located in Ayr Township, **Fulton County**. The new spray booth will use HVLP application of compliant coatings, panel filters to control overspray, and includes a 3.4 mmBtu/hr natural gas makeup air unit. The increase in potential emissions are 11.36 tpy VOC, 24.15 tpy PM₁₀, 0.03 tpy HAP, 1.46 tpy NO_x, 0.01 tpy SO_x, and 1.23 tpy CO. The facility is a synthetic minor facility. The Department of Environmental Protection's (DEP's) review of the information submitted by the company indicates that the air contamination sources will comply with all regulatory requirements, including monitoring, recordkeeping, and reporting requirements, and pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code § 127.1 and 127.12 as well as standards for metal parts coating sources of 25 Pa. Code § 129.52 and § 129.52d. Based on this finding, DEP proposes to issue a plan approval for the proposed installation. The facility is a State Only facility. If DEP determines that the sources are constructed and operated in compliance with the plan approval conditions and the specifications of the application for plan approval, the requirements established in the plan approval will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

18-00021D: Avery Dennison Performance Polymers (171 Draketown Road, Mill Hall, PA 17751) for the construction and operation of the R-900 Emulsion Reactor System at their facility located in Bald Eagle Township, **Clinton County**. This is a State Only "Synthetic Minor" Facility.

The Department's review of the information contained in the application submitted by Avery Dennison Performance Polymers, indicates that the sources will comply with all applicable air quality requirements pertaining to air contamination sources and the emission of air contaminants, including the fugitive air contaminant emission requirement of 25 Pa. Code § 123.1, the particulate matter emission limitation of 25 Pa. Code § 123.13, the sulfur oxide emission limitation of 25 Pa. Code § 123.21 and the visible emission limitation of 25 Pa. Code § 123.41. The plan approval, if issued, will subsequently be incorporated into the State Only (Synthetic Minor) operating permit via an administrative amendment in accordance with 25 Pa. Code § 127.450 once the permittee has complied with all terms and conditions of the plan approval.

Based upon this finding, the Department proposes to issue a plan approval for the construction and operation of the R-900 emulsion reactor system. The following is a summary of the types of conditions the Department intends to place in the plan approval to ensure compliance with all applicable regulatory requirements.

All volatile organic compounds captured from the R-900 emulsion reactor system incorporated into Source ID P102 shall be ducted to Control Device C102C. The volatile organic compound destruction efficiency of Control Device C102C shall be equal to, or greater than 99% or a VOC concentration not to exceed 20 parts per million (as propane) by volume, dry basis (ppmdv) at 3% oxygen at all times.

The combustion chamber temperature of Control Device C102C shall not be less than 1,600°F at any time while

controlling air contaminant emissions from the R-900 emulsion reactor system incorporated in Source ID P102.

Work practice requirements to operate the sources and control devices with good air pollution control practices.

Monitoring, Recordkeeping and Reporting conditions to verify compliance with the emission limitations and all applicable requirements.

A copy of the plan approval application and the Department's review is available for public review between 8 a.m. and 4 p.m. at the Department's Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review may be made by calling the Department at 570-327-3693. Written comments or requests for a public hearing should be directed to Muhammad Q. Zaman, Program Manager, New Source Review Section, Department of Environmental Protection, Air Quality Program, Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701.

06-03128: Royal Green LLC (30 West Huller Lane, Temple, PA 19605) to issue a State Only Operating Permit for their ferrous metal shredding operation located in Ontelaunee Township, **Berks County**. The potential emissions from the facility are estimated at 11.0 tpy of PM. The Operating Permit will include emission limits and work practice standards along with monitoring, recordkeeping and reporting requirements to ensure the facility complies with the applicable air quality regulations. Among other items, the conditions include provisions derived from 25 Pa. Code § 123.13 processes and 25 Pa. Code § 129.63 Degreasing operation.

36-05167: Armstrong Flooring, Inc. (1067 Dillerville Road, Lancaster, PA 17603-2613) for operation of their flooring manufacturing plant in the City of Lancaster, **Lancaster County**. Actual emissions from the facility in 2020 were estimated at 6.49 tons CO, 7.84 tons NO_x, 14.71 tons PM₁₀, 14.71 tons PM_{2.5}, 0.05 ton SO_x, 19.28 tons VOC, 0.15 ton of a single HAP (hexane), and 0.25 ton of combined HAPs. The Operating Permit will include emission limits and work practice standards along with monitoring, recordkeeping and reporting requirements to ensure the facility complies with the applicable air quality regulations. Among other items, the conditions include provisions derived from 40 CFR 60 Subpart Dc—Standards of Performance for Small Industrial—Commercial-Institutional Steam Generating Units & 40 CFR 63, Subpart ZZZZ—National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines.

56-00265: Abilene Boot Co., Inc. (841 S. Center Ave., Somerset, PA 15501). In accordance with 25 Pa. Code §§ 127.424, 127.425 and 127.521, the Department is

providing notice that it intends to issue a renewal natural minor State Only Operating Permit (SOOP) for the operation of a western and military boot manufacturing facility located in Somerset Township, **Somerset County**.

Equipment at this facility consists of various shoe manufacturing equipment including several spray booths for the application of various glues, cements, adhesives, and other solvents. The facility also contains cyclone/baghouse systems for capturing particulate emissions from trimming/grinding/buffing operations. The potential emissions from the facility are estimated to be 11.8 tons VOC per year and 9.6 tons of total HAPs per year although actual emissions have historically been less than 3.0 tons each of VOC and HAPs.

The facility is subject to the applicable requirements of 25 Pa. Code Article III, Chapters 121—145. The proposed operating permit includes emissions limitations, monitoring, work practice standards, reporting, and recordkeeping requirements for the facility.

The application, DEP's Review Memorandum, and the proposed permit are available for public review during normal business hours at DEP's Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. A file review can be scheduled through the DEP's website at <https://www.dep.pa.gov/Citizens/PublicRecords/Pages/Informal-File-Review.aspx>.

Any person may submit comments, a request for the Department to hold a public hearing, or a protest to the proposed operating permit or a condition thereof by submitting the information to Nick Waryanka, P.E., Air Quality Engineer, at the Southwest Regional Office. A 30-day comment period from the date of publication of this notice will exist for the submission of comments. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed permit (specify Operating Permit 56-00265) and concise statements regarding the relevancy of the information in the proposed permit or objections to issuance of the permit.

A public hearing may be held in accordance with 25 Pa. Code § 127.429, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. If a public hearing is held, all persons who have properly filed a protest under 25 Pa. Code § 127.426 may appear and give testimony. The applicant, the protestant, and other participants will be notified of the decision to hold a hearing (and the time, place and purpose of such hearing) by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone, where the Department determines such notification by telephone is sufficient.

33-00107: Beverage-Air Corporation, Brookville Plant (119 Progress St., Brookville, PA 15825). The Department intends to issue the renewal State-Only Operating Permit of a refrigeration equipment manufacturing facility located in Brookville Borough, **Jefferson County**. Permitted air contamination sources at the facility are wiping operations, a curing oven, two emergency generators, a parts washer, and miscellaneous

natural gas usage. For permitting purposes, the facility is Natural Minor. In this renewal, a second emergency generator is added as a permitted source. The hand wiping operation prior to powder coating is also added as a permitted source and subject to work practice requirements for coated-related cleaning activities pursuant to 25 Pa. Code § 129.52d. Section 129.63a of 25 Pa. Code is added as a permit requirement for non-coating-related solvent wiping operation. A previously permitted dip coating operation, which is no longer part of the manufacturing process, is removed from the permit.

Approval of a Reasonably Available Control Technology (RACT II) plan for **Texas Eastern Transmission, LP** located in Cresson Township, **Cambria County**.

In accordance with 25 Pa. Code §§ 129.96—129.100, the Pennsylvania Department of Environmental Protection has made a determination for an alternative Reasonably Available Control Technology (RACT II) plan and seeks approval of the amendment to the State Implementation Plan (SIP) for the Lilly Compressor Station owned and operated by Texas Eastern Transmission, LP (2601 Market Place, Suite 400, Harrisburg, PA 17110-9363) in Cresson Township, Cambria County. This is a revised notice of the Notice of Public Hearing published in the *Pennsylvania Bulletin* on March 23, 2019 and the notice published by Texas Eastern Transmission, LP in the *Tribune Democrat* on March 18, 19 and 20, 2019.

The SIP revision does not adopt any new regulations. It incorporates the provisions and requirements contained in the amended RACT II approval for the facility, which are intended to satisfy the requirements for the 1997 National Ambient Air Quality Standard (NAAQS) and the 2008 NAAQS for ozone.

The amendments to the RACT II determination have been incorporated into the revised operating permit TV-11-00258 for the facility. After the public participation requirements of 40 CFR 51.102 are met, including that public hearings to be held on the dates and at the location advertised as follows, the relevant RACT II requirements will be submitted to the U.S. Environmental Protection Agency (EPA) as a revision to Pennsylvania's State Implementation Plan and will remain in effect until replaced pursuant to 40 CFR 51 and approval by the EPA. Requirements that are not part of the RACT II determination will be excluded from the SIP submittal.

The following is a summary of the amendments to the RACT II determination for this operation that will be submitted to the EPA as a SIP revision:

<i>Source</i>	<i>VOC RACT</i>	<i>TVOP No. 11-00258 Condition No./Location</i>
102—Westinghouse Turbine	Install, maintain, and operate the source per manufacturer's specifications and good operating practices.	Section D, Source ID 102, Work Practice Requirements
103—Westinghouse Turbine	Install, maintain, and operate the source per manufacturer's specifications and good operating practices.	Section D, Source ID 103, Work Practice Requirements
104—GE Frame 5 Gas Turbine	Install, maintain, and operate the source per manufacturer's specifications and good operating practices.	Section D, Source ID 104, Work Practice Requirements

This is also a notice that the proposed amendments to the RACT II determination including the previously listed conditions, if finally approved, will be incorporated into a modification of the Title V Operating Permit TV-11-00258 for the facility.

A public hearing will be held on Wednesday, September 22, 2021, from 10:00 AM to 11:00 AM at the Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222. To register to speak at a hearing, or to inquire if a hearing will be held, please contact Thomas Joseph at 412.442.4336. The last day to pre-register to speak at the hearing will be September 16, 2021. If we do not receive any pre-registered speakers by this date, the hearing will be cancelled.

Please note that any updates made to any aspect of the hearing, including whether or not a hearing will be held, will be posted online at <https://www.dep.pa.gov/About/Regional/SouthwestRegion/Community%20Information/Pages/default.aspx>. We ask that you contact Thomas Joseph at 412.442.4336 or monitor our website to determine if a hearing will be held.

Oral testimony will be limited to a maximum of 10 minutes per individual and two written copies of the oral testimony are requested. Each organization is requested to designate one witness to present testimony on its behalf. Persons unable to attend the hearing, if it is held, may submit three (3) copies of a written statement and exhibits within 10 days thereafter to Mark Gorog, Environmental Program Manager, Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222.

Persons wishing to file a written protest or provide comments or additional information may submit the information to Mark Gorog, Environmental Program Manager, Pennsylvania Department of Environmental Protection, Southwest Regional Office, 400 Waterfront Drive, Pittsburgh, PA 15222 or by email to mgorog@pa.gov. A 30-day comment period from publication date will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the RACT II Operating Permit/Title V operating permit including the permit number and a concise statement regarding the relevancy of the information or objections to the RACT II Plan and Title V modification.

All pertinent documents are available for public review between 8 a.m. and 4 p.m. at the Pennsylvania Department of Environmental Protection, Southwest Regional

Office, 400 Waterfront Drive, Pittsburgh, PA 15222. Appointments for scheduling a review may be made online at <https://www.dep.pa.gov/Citizens/PublicRecords/Pages/Informal-File-Review.aspx> or by calling the Department at 412.442.4000.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodations to do so should contact Lauren Fraley at 412.442.4203 or the Pennsylvania Hamilton Relay Service at 1.800.654.5984 (TDD) to discuss how the Department may accommodate your needs.

Plan Approval No. 39-00041A will be incorporated into a Natural Minor Operating Permit at a later date.

Plan Approval No. 39-00041A is for a crematory facility which includes one (1) propane- or natural gas-fired cremation unit controlled by an afterburner. The company shall be subject to and comply with BAT requirements for this source. The Plan Approval and Operating permit will contain additional recordkeeping and operating restrictions designed to keep the facility operating within all applicable air quality requirements.

Copies of the application, DEP's analysis and other documents used in the evaluation of the application are available for public review during normal business hours at Air Quality Program, 2 Public Square, Wilkes-Barre, PA 18701-1915.

Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to the address shown in the preceding paragraph. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed permit No. 39-00041A and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where DEP determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Ray Kempa,

Chief, New Source Review Section, Air Quality Program, 2 Public Square, Wilkes-Barre, PA 18701-1915, Phone 570-826-2511 within 30 days after publication date.

48-00067A: New Enterprise Stone & Lime Co. (3912 Brumbaugh Road, New Enterprise, PA 16664-0077) for the replacement of three conveyors at their facility located in Lower Nazareth Township, **Northampton County**.

In accordance with 25 Pa. Code §§ 127.44(a) and 127.45(a), that the Department of Environmental Protection (DEP) has received and intends to issue a Plan Approval to New Enterprise Stone & Lime for their facility located in Lower Nazareth Township, Northampton County. Plan Approval No. 39-00041A will be incorporated into the existing Synthetic Minor Operating Permit through administrative amendment at a later date.

Plan Approval No. 39-00041A is for a crematory facility which includes one (1) propane- or natural gas-fired cremation unit controlled by an afterburner. The company shall be subject to New Source Performance Standards 40 CFR Part 60 Subpart OOO. The Plan Approval and Operating permit will contain additional recordkeeping and operating restrictions designed to keep the facility operating within all applicable air quality requirements.

Copies of the application, DEP's analysis and other documents used in the evaluation of the application are available for public review during normal business hours at Air Quality Program, 2 Public Square, Wilkes-Barre, PA 18701-1915.

Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to the address shown in the preceding paragraph. Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed permit No. 39-00041A and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. COAL & NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P.S. §§ 1396.1—1396.31); the Noncoal Surface Mining Conservation and Reclamation Act (52 P.S. §§ 3301—3326); the Clean Streams Law (35 P.S. §§ 691.1—691.1001); the Coal Refuse Disposal Control Act (52 P.S. §§ 30.51—30.66); the Bituminous Mine Subsidence and Land Conservation Act (52 P.S. §§ 1406.1—1406.21). Mining activity permits issued in response to such applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P.S. §§ 4001—4015); the

Dam Safety and Encroachments Act (32 P.S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P.S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection. A copy of the application is available for inspection at the District Mining Office indicated above each application. Notices of requests for 401 Water Quality Certifications are included in individual application notices, as noted.

Written comments or objections, or requests for an informal conference, or a public hearing, as applicable, on a mining permit application may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the address of the District Mining Office indicated above each application within 30-days of this publication, or within 30-days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34 (relating to public notices of filing of permit applications, opportunity for comment, and informal conferences).

Written comments or objections related to a mining permit application should contain the name, address and telephone number of persons submitting comments or

objections; application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code § 77.123 (relating to public hearing-informal conferences) or § 86.34 (relating to informal conferences), must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

Where a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. A separate notice will be provided after the draft NPDES permit is prepared.

Coal Applications Received

Effluent Limits—The following range of effluent limits will apply to NPDES permits issued in conjunction with the associated coal mining activity permit and, in some cases, noncoal mining permits:

Table 1

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (total)	1.5 to 3.0 mg/l	3.0 to 6.0 mg/l	3.5 to 7.0 mg/l
Manganese (total)	1.0 to 2.0 mg/l	2.0 to 4.0 mg/l	2.5 to 5.0 mg/l
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l
Aluminum (Total)	0.75 to 2.0 mg/l	1.5 to 4.0 mg/l	2.0 to 5.0 mg/l
pH ¹		greater than 6.0; less than 9.0	

¹ The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; and mined areas backfilled and revegetated; and drainage (resulting from a precipitation event of less than or equal to a 1-year 24-hour event) from coal refuse disposal piles.

Permit No. 32211301 and NPDES Permit No. PA0236560. Rosebud Mining Company, 301 Market Street, Kittanning, PA 16201 to operate a new underground coal mine and related NPDES Permit, called Mahoning Creek Mine and the application includes three (3) proposed outfalls. Mahoning Creek Mine located in South Mahoning and West Mahoning Townships, **Indiana County** affecting 82.7 proposed surface acres, 7,931.9 proposed underground acres, and 7,931.9 proposed subsidence control plan acres. Receiving stream(s): Unnamed Tributary to North Branch Plum Creek classified for the following use: CWF; Unnamed Tributary to Little Mahoning Creek classified for the following use: HQCWF; and Ross Run classified for the following use: HQCWF. The application was considered administratively complete on July 23, 2021. Application received: March 12, 2021.

Pottsville District Mining Office: 5 West Laurel Boulevard, Pottsville, PA 17901, (570) 621-3118, (Contact: Theresa Reilly-Flannery).

Permit No. 19960101R5. City of Philadelphia, Trustee, Acting by the Board of Directors of City Trusts for Girard Estate, 1101 Market Street, Suite 2600, Philadelphia, PA 19107, renewal of an existing anthracite surface mine, coal refuse reprocessing, coal refuse disposal and preparation plant operation in Conyngham, Union and Butler Townships, **Columbia and Schuylkill Counties** affecting 876.0 acres. Receiving stream: Mahanoy Creek, classified for the following uses: warm water and migratory fishes. Application received: July 14, 2021.

Permit No. GP12-19960101R2. Keystone Anthracite Co., Inc., 259 North Second Street, Girardville, PA 17935, renewal application to operate a coal preparation plant whose pollution control equipment is required to meet all applicable limitations, terms and conditions of General Permit, BAQ-GPA/GP-12 on Surface Mining Permit No. 19960101 in Conyngham, Union and Butler Townships, **Columbia and Schuylkill Counties**. Application received: July 14, 2021.

Noncoal Applications Received

Effluent Limits—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

Table 2

Parameter	30-day Average	Daily Maximum	Instantaneous Maximum
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l
Alkalinity exceeding acidity* pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

Pennsy Supply, Inc., 2400 Thea Drive, Suite 3A, Harrisburg, PA 17110, renewal of an NPDES Permit for discharge of treated mine drainage from a quarry operation in Dorrance Township, **Luzerne County** affecting 314.15 acres. Receiving streams: unnamed tributary to the Big Wapwallopen, classified for the following use: cold water fishes, and Balliet Run, classified for the following use: HQ—cold water fishes. Application received: July 19, 2021.

Permit No. 58152502. FS Lopke Contracting, Inc., 3430 State Route 434, Apalachin, NY 13732, Stage I & II bond release of a quarry operation in Lenox Township, **Susquehanna County** affecting 10.0 acres on quarry owned by FS Lopke Contracting, Inc. Application received: July 26, 2021.

Permit No. 64980802. Joseph G. Bunnell, 267 Tryon Street, Honesdale, PA 18431, Stage I & II bond release of a quarry operation in Texas Township, **Wayne County** affecting 1.0 acre on quarry owned by Joseph G. Bunnell. Application received: July 26, 2021.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30-days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Coal NPDES Draft Permits

California District Mining Office: 25 Technology Drive, California Technology Park, Coal Center, PA 15423, (724) 769.1100.

NPDES No. PA0110035 (Mining Permit No. 56733702), Robindale Energy Services, Inc., 224 Grange Hall Road, P.O. Box 228, Armagh, PA 15920, a renewal to the NPDES and mining activity permit for Marmon Refuse Site in Jenner

Township, **Somerset County**, affecting 215.1 surface acres. Receiving stream(s): North Branch Quemahoning Creek: CWF and Tributary 45500 to Beaverdam Run: CWF. Kiskiminetas-Conemaugh River Watershed TMDL. The application was considered administratively complete: July 9, 2020. The application was received: April 30, 2020.

Unless otherwise noted for a specific outfall, the proposed effluent limits for all outfalls in this permit are the BAT limits described previously for coal mining activities.

FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The following permit applications, requests for Environmental Assessment approval and requests for 401 Water Quality Certification have been received by the Depart-

ment of Environmental Protection. Section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341), requires the State to certify that the involved projects will not violate the applicable provisions of Sections 301—303, 306 and 307 of the

FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317), as well as relevant State requirements. Persons objecting to approval of a request for certification under Section 401 or to the issuance of a Dam Permit or Water Obstruction and Encroachment Permit, or the approval of an Environmental Assessment must submit any comments, suggestions or objections within 30-days of the date of this notice, as well as any questions to the office noted above the application. Comments should contain the name, address and telephone number of the person commenting, identification of the certification request to which the comments or objections are addressed, and a concise statement of comments, objections or suggestions including the relevant facts upon which they are based.

The Department may conduct a fact-finding hearing or an informal conference in response to comments if deemed necessary. Each individual will be notified, in writing, of the time and place of a scheduled hearing or conference concerning the certification request to which the comment, objection or suggestion relates. Maps, drawings and other data pertinent to the certification request are available for inspection between the hours of 8:00 AM and 4:00 PM on each working day at the office noted above the application.

If you are a person with a disability and wish to attend the hearing and you require an auxiliary aid, service or other accommodation to participate in the proceedings, please contact the specified program. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

WATER OBSTRUCTIONS AND ENCROACHMENTS

Applications Received Under the Dam Safety and Encroachments Act (32 P.S. §§ 693.1—693.27) and Section 302 of the Flood Plain Management Act (32 P.S. § 679.302) and Requests for Certification Under Section 401 of the Federal Water Pollution Control Act (33 U.S.C.A. § 1341(a)).

Permit No. E1501221-013, Stephen Eldredge and Melissa Novak Eldredge, 2261 South Valley Road, Berwyn, PA 19312, Easttown Township, **Chester County**, ACOE Philadelphia District.

Stephen and Melissa Novak Eldredge are proposing to construct and maintain a 3-inch outfall with headwall and riprap apron discharging flow to an unnamed tributary to Waynesborough Run (HQ-CWF-MF) from a proposed individual residence sewage treatment plant to serve an existing four (4) bedroom single family home. This activity will result in 35 square feet of permanent floodway impact and 152 square feet of temporary floodway impact. The outfall will have 5-foot offset from edge of watercourse.

This project is located at 2261 South Valley Road in Easttown Township, Chester County (USGS PA Valley Forge Quadrangle—Latitude: 40.017724 N, Longitude: 75.464588 W).

Permit No. E4601221-014, Adelpia Gateway, LLC, 1415 Wyckoff Road, Wall, NJ 07719, Skippack Township, **Montgomery County**, ACOE Philadelphia District.

To restore and maintain an exposed 18-inch diameter natural gas pipeline across the UNT to Perkiomen Creek (TSF) associated with the safeguard protection of the exposed pipeline. The pipe will be protected with 4.5-inch Articulated Concrete Matting (ACMs) and Longitudinal Peaked Stone Toe Protections (LPSTPs) for the stream and bank stabilization. Total length of the stream impact is 338 feet and the temporary wetland (PEM) impact is 0.054 acre.

The site is located about 200-feet southwest of Perkiomen Creek Road and Creekwood Drive (Collegeville, PA USGS Quadrangle Latitude: 40.233910; Longitude: -75.450200) in Skippack Township, Montgomery County.

Southcentral Region: Waterways & Wetlands Program, 909 Elmerton Avenue, Harrisburg, PA 17110.

E0703220-001. Antis Township, 909 North 2nd Street, Bellwood, PA 16617, in Antis Township, **Blair County**, U.S. Army Corps of Engineers Baltimore District.

To construct and maintain a trail with (1) a 12.75 foot x 110 foot bridge over Bells Gap Run (TSF), (2) place fill within the floodway and floodplain of Bells Gap Run and UNT Little Junita River (CWF), and (3) place fill within Wetlands (EV). The project proposed to impact permanently impact 150 feet and temporarily impact 263 feet and permanently impact 0.01 acre and temporarily impact 0.03 acre of wetlands. The project is located in Antis Township, Blair County (40.599°, -78.3359°).

Northwest Region: Waterways and Wetlands Program, 230 Chestnut Street, Meadville, PA 16335-3481.

To construct and maintain a boat ramp, jetty, and fishing hole on the Allegheny River. Dredging and fill activities will result in 0.16 acre permanent impact to the watercourse and 0.14 acre of permanent impact to the floodway.

DAM SAFETY

Central Office: Bureau of Waterways Engineering and Wetlands, Rachel Carson State Office Building, Floor 2, 400 Market Street, Harrisburg, PA 17101, telephone number: 717-787-3411.

D24-005. James Reinsburrow, Chairman, Johnsonburg Municipal Authority, 601 Market Street, Johnsonburg, PA 15845, Johnsonburg Borough, **Elk County**. USACOE Pittsburgh District.

Project proposes to remove the Powers Run Dam to eliminate a threat to public safety and to restore approximately 500 feet of stream channel to a free-flowing condition. The project is located across Powers Run (CWF) (Ridgway, PA Quadrangle, Latitude: 41.4828; Longitude: -78.6606).

STORAGE TANKS

SITE-SPECIFIC INSTALLATION PERMITS

The following Storage Tank Site-Specific Installation Permit application has been received by the Department of Environmental Protection (Department) and is currently under review. Persons wishing to comment on the proposed permit are invited to submit a statement to the Bureau of Environmental Cleanup and Brownfields, Division of Storage

Tanks, P.O. Box 8762, Harrisburg, PA 17105-8762, within 30 days from the date of this publication. Comments may also be submitted via email to tanks@pa.gov. Comments received within this 30-day period will be considered in the formulation of the final determinations regarding this application. Responses should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of the comment and the relevant facts upon which it based.

The following applications have been received for Storage Tank Site-Specific Installation Permits under the authority of the Storage Tank Spill Prevention Act (35 P.S. §§ 6021.304, 6021.504, 6021.1101 and 6021.1102) and under 25 Pa. Code Chapter 245, Subchapter C.

ACTIONS

THE PENNSYLVANIA CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT

FINAL ACTIONS TAKEN FOR NPDES PERMITS AND WQM PERMITS

The Department has taken the following actions on previously received applications for new, amended, and renewed NPDES and WQM permits, applications for permit waivers, and NOIs for coverage under General Permits, as listed in the following tables. This notice of final action is published in accordance with 25 Pa. Code Chapters 91, 92a, and 102 and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376). The official file for each listed action can be reviewed at the DEP or delegated county conservation district (CCD) office identified in the table for the action. DEP/CCD office contact information is listed as follows for Section I and is contained within the table for Section II. Additional information for permits issued under 25 Pa. Code Chapters 91 and 92a, including links to Individual NPDES and WQM Permits, may be reviewed by generating the “Final Actions Report” on DEP’s website at www.dep.pa.gov/CWPublicNotice.

DEP office contact information to review official files relating to the final actions in Section I. is as follows:

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law). The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Hamilton Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30-days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board’s rules of practice and procedure may be obtained from the Board. The appeal form and the Board’s rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30-days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

**STATE CONSERVATION COMMISSION
NUTRIENT MANAGEMENT PLANS RELATED TO APPLICATIONS FOR NPDES
PERMITS FOR CAFOs**

The State Conservation Commission has taken the following actions on previously received applications for nutrient management plans under 3 Pa.C.S. Chapter 5, for agricultural operations that have or anticipate submitting applications for new, amended or renewed NPDES permits or NOIs for coverage under a general permit for CAFOs under 25 Pa. Code Chapter 92a. This notice is provided in accordance with 25 Pa. Code Chapter 92a and 40 CFR Part 122, implementing The Clean Streams Law and the Federal Clean Water Act.

Persons aggrieved by an action may appeal under 3 Pa.C.S. § 517, section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704 to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users should contact the Environmental Hearing Board (Board) through the Pennsylvania Hamilton Relay Service at (800) 654-5984. Appeals must be filed with the Board within 30-days of publication of this notice in the *Pennsylvania Bulletin*. Copies of the appeal form and the Board’s rules of practice and procedure may be obtained from the Board. The appeal form and the Board’s rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge actions, appeals must reach the Board within 30-days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary of the Board at (717) 787-3483 for more information.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Hamilton Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30-days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

SEWAGE FACILITIES ACT PLAN APPROVAL

Plan Approvals Granted Under the Pennsylvania Sewage Facilities Act, Act of January 24, 1966, P.L. 1535, as amended, 35 P.S. § 750.5.

Southcentral Region: Clean Water Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110.

Plan Location:

Township	Township Address	County
Londonderry Township	783 South Geysers Church Road Middletown, PA 17057	Dauphin

Plan Description:

Approval is granted for an Act 537 Plan Special Study for Londonderry Township, Dauphin County. The plan provides for the upgrade and expansion of the Derry Township Municipal Authority Southwest sewage treatment plant at 1800 Swatara Creek Road to an annual average flow of 1.54 MGD. The Department's review of the Special Study has not identified any significant impacts resulting from this proposal. Permits must be acquired in the name of the Derry Township Municipal Authority. The DEP Code Number for this plan is E1-22920-ACT and Application No. 36882.

SEWAGE FACILITIES ACT PLAN DISAPPROVAL

Plan Disapprovals Granted Under the Pennsylvania Sewage Facilities Act, Act of January 24, 1966, P.L. 1535, as amended, 35 P.S. § 750.5.

Southcentral Region: Clean Water Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110.

Plan Location:

Borough or Township	Borough or Township Address	County
City of Harrisburg	10 North 2nd Street Harrisburg PA 17101	Dauphin County

Plan Description:

The request for planning exception for the VOPA Tiny Home Community Subdivision (DEP Code No. A3-22001-190-3E; APS ID No. 1042150) has been disapproved. The proposed development—located at 1103 South Front Street in the City of Harrisburg, PA—consists of sewage planning to connect 21 new tiny homes to the Capital Region Water public sewer system. This request for planning exemption has been disapproved because the submission does not qualify as an exemption from the requirement to revise the Official Plan because the subdivision proposes the connection to or an extension of a privately owned facility as per Chapter 71, Section 71.51(b)(2).

HAZARDOUS SITES CLEANUP UNDER THE HAZARDOUS SITES CLEANUP ACT OF OCTOBER 18, 1988

Public Notice of Proposed Consent Order and Agreement Pennsylvania Department of Environmental Protection

Kwiatkowski Landfill Site, Hickory Township, Lawrence County.

Pursuant to Section 1113 of the Pennsylvania Hazardous Sites Cleanup Act, Act of October 18, 1988, P.L. 756, No. 108, 35 P.S. § 6020.101—6020.1305 (HSCA), notice is hereby provided that the Pennsylvania Department of Environmental Protection (Department) has agreed to a Consent Order and Agreement (Consent Order and Agreement) with TPC-York, Inc. (TPC-York) concerning cost recovery for the cleanup of three lagoons at the Kwiatkowski Landfill Site (Site).

The Site consists of a 93.86-acres abandoned municipal and industrial waste landfill located approximately one mile east of the City of New Castle on the north side of County Line Road. The unpermitted landfill was owned by Rudolph and Chester Kwiatkowski and operated from 1960 until 1982. The Site also included three unlined lagoons/impoundments used for the disposal of sludge wastes and pottery wastes (Operable Unit 1). During operations, pottery wastes generated at the Mayer China New Castle facility were disposed in Operable Unit 1.

In 2013 and 2014, the Department performed an Interim Response within Operable Unit 1 of the Site pursuant to Section 501 of the HSCA 35 P.S. § 6020.501 to protect the public and environmental receptors from direct contact with site-related hazardous substances and eliminate the ongoing release and threat of release of hazardous substances into the environment. The Interim Response included the stabilization, excavation, and off-site disposal of trichloroethylene and lead waste, clean soil backfill, site grading, and re-vegetation of the disturbed areas. Excavated areas met Pennsylvania Statewide health standards for soil. The wastes included elements and chemical compounds which are "hazardous substances" pursuant to Section 103 of the HSCA, 35 P.S. § 6020.103. The presence of these hazardous substances in Site surface water, sediment, and waste and soil constituted a "release" and "threatened release" of hazardous substances at the Site pursuant to Section 103 of the HSCA, 35 P.S. § 6020.103. The Department expended \$682,986.69 on investigation and remediation activities at Operable Unit 1 (Response Costs).

TPC-York is the successor to companies that owned Mayer China and is a "responsible party" as defined in Section 103 of HSCA, 35 P.S. § 6020.103. The specific terms of this settlement are described in the Consent Order and Agreement and include that TPC-York shall pay \$85,000 to the Department in settlement of its share of Response Costs for Operable Unit 1. Upon the effective date of the Consent Order and Agreement, TPC-York shall obtain a covenant not to sue from the Department and contribution protection, both as further described in the Consent Order and Agreement.

The Department will receive and consider public comments relating to the Consent Order and Agreement for sixty (60) days, from August 14, 2021 to October 20, 2021. The Department has the right to withdraw its consent to the Consent Order and Agreement if the comments

received disclose facts or considerations that indicate that the Consent Order and Agreement is inappropriate, improper, or not in the public interest. After the public comment period, the Department's settlement with TPC-York shall be effective upon the date that the Department notifies TPC-York, in writing, that the Consent Order and Agreement is final and effective in its present form, and that the Department has filed a response to significant written comments to the Consent Order and Agreement, or that no such comments were received.

Copies of the Consent Order and Agreement are available for inspection at the Department's Northwest Regional Office at 230 Chestnut Street, Meadville, PA 16335. Comments may be submitted, in writing, to Colin Kosinski, Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335. Further information may be obtained by contacting Colin Kosinski, at 814-332-6648. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at 800-645-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval, and requests for Water Quality Certification under Section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with the applicable provisions of Sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317), and that the construction will not violate applicable Federal and State Water Quality Standards.

Any person aggrieved by these actions may appeal, pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. § 7514, and the Administrative Agency Law, 2 Pa.C.S. Chapter 5A, to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Hamilton Relay Service, (800) 654-5984. Appeals must be filed with the Environmental Hearing Board within 30-days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

If you want to challenge this action, your appeal must reach the Board within 30-days. You do not need a lawyer to file an appeal with the Board.

Important legal rights are at stake, however, so you should show this notice to a lawyer at once. If you cannot afford a lawyer, you may qualify for free pro bono representation. Call the Secretary to the Board (717) 787-3483 for more information.

WATER OBSTRUCTIONS AND ENCROACHMENTS

Actions on applications for the following activities filed under the Dam Safety and Encroachments Act (32 P.S. §§ 693.1—693.27), section 302 of the Flood Plain Management Act (32 P.S. § 679.302) and The Clean Streams Law and Notice of Final Action for Certification under section 401 of the FWPCA.

Permit No. E4601220-043, Southeastern Pennsylvania Transportation Authority, 1234 Market Street, Philadelphia, PA 19107, Abington and Cheltenham Townships and Jenkintown Borough, **Montgomery County**, ACOE Philadelphia District.

To perform the following water obstruction and encroachment activities associated with the SEPTA Jenkintown Flood Mitigation Project:

1. To perform repointing work and gabion retaining walls with Redi-Rock walls associated with rehabilitation

of a bridge over Tacony Creek (WWF-MF, SEPTA Bridge 11.22) and in place of the gabion retaining wall system, construct and maintain Redi-Rock retaining walls. This work will result in 98 linear feet (2,159 square feet) of temporary stream impact, 5,026 square feet (0.115 acre) of temporary floodway impact, and 1,291 square feet (0.29 acre) of temporary floodplain impact due to erosion and sedimentation controls required to do the work. (USGS PA Abington Quadrangle—Latitude 40.097914 N, Longitude 75.142236 W).

2. To remove an existing culvert over Tacony Creek (WWF-MF, SEPTA Culvert 0.16) and in its place, construct and maintain a 34-foot wide, 78-foot long, CON/SPAN arch bridge system resulting in 79 linear feet (2,441 square feet) of permanent watercourse impact (USGS PA Abington Quadrangle—Latitude 40.097914 N, Longitude 75.139112 W). Also, to perform a stream restoration with the construction and maintenance of an overflow basin within the 100-year floodplain of Baeder Run (WWF-MF) and five (5) outfall with the placement of riprap rock aprons. This work will result in 57 linear feet (428 square feet) of permanent watercourse impact for the outfalls, 1,216 linear feet (14,661 square feet) of temporary impact for the culvert replacement and stream restoration, 13,782 square feet (0.320 acre) of permanent floodway impact for the outfalls and stream restoration, 9,313 square feet (0.213 acre) of temporary floodway impact for the culvert replacement and stream restoration, and 42,246 square feet (0.969 acre) of permanent floodplain impact with 18,134 square feet (0.416 acre) of temporary floodplain impact for the stream restoration and overflow basin (USGS PA Abington Quadrangle—Latitude 40.097914 N, Longitude 75.139112 W).

3. To perform a stream restoration on Tacony Creek (WWF-MF) resulting in 91 linear feet (3,384 square feet) of permanent watercourse impact due to placement of riprap for scour hole repairs and 506 linear feet (17,455 square feet) of temporary watercourse impact, 10,161 square feet (0.233 acre) of permanent floodway impact, 3,405 square feet (0.077 acre) of temporary floodway impact, 25,085 square feet (0.576 acre) of permanent floodplain impact, and 18,886 square feet (0.434 acre) of temporary floodplain impact for the stream restoration. Additional impact includes 253 square feet (0.006 acre) of permanent floodplain impact associated with the construction and maintenance of an outfall and includes the placement of riprap rock apron. This work also includes rehabilitation work associated with a bridge (SEPTA Bridge 10.97) which includes repointing, replacement of missing stones, and spall repair (USGS PA Abington Quadrangle—Latitude 39.836710 N, Longitude 75.389625 W).

This project is located near the Jenkintown-Wyncote SEPTA train station within and adjacent to SEPTA Right-of-Way in Abington Township, Montgomery County (USGS PA Germantown Quadrangle—Latitude 40.097159 N, Longitude 75.138727 W). Permit issued July 27, 2021.

CORRECTIVE ACTION UNDER ACT 32, 1989

PREAMBLE 2

**The Following Plans and Reports Were Submitted
 Under the Storage Tank and Spill Prevention Act
 (35 P.S. §§ 6021.101—6021.2104).**

Provisions of 25 Pa. Code Chapter 245 Subchapter D,
 Administration of the Storage Tank and Spill Prevention

Program, require the Department of Environmental Protection (DEP) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A remedial action plan is submitted to summarize the site characterization, document the design and construction details for the remedial action, and describe how the remedial action will attain the selected remediation standard. The remedial action plan also provides results of studies performed and data collected to support the remedial action and a description of postremediation care requirements. A remedial action completion report is submitted to document cleanup of a release of a regulated substance at a site to the selected remediation standard. A remedial action completion report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected.

For further information concerning plans or reports, please contact the Environmental Cleanup Program Manager in the DEP Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone DEP through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

SPECIAL NOTICES

WASTE MANAGEMENT

Requests Proposals for Municipal Solid Waste Disposal and/or Processing Capacity Susquehanna County Board of Commissioners, Montrose, PA

In accordance with Pennsylvania Code Title 25, Environmental Protection, Chapter 272.225 Municipal Waste Planning Recycling and Waste Reduction (as amended December 22, 2000), the Susquehanna County Board of Commissioners is hereby soliciting proposals for disposal or processing capacity for municipal solid waste (MSW) generated in Susquehanna County, PA for the period covering the years 2021 to 2031. The waste disposal or processing capacity for MSW also includes construction/demolition waste (C&D) and sewage sludge generated within the County.

The Susquehanna County Municipal Solid Waste Management Plan is absent flow control provisions. MSW generated within the County may be disposed at any facility with an active operating permit issued by the PADEP or equivalent agency if the facility is located within another state. Susquehanna County offers no guarantees that any amount of waste generated therein will be delivered for disposal to those facilities entering into agreement with the County for secured capacity.

The Request for Proposals (RFP) will be available electronically from Nestor Resources, Inc., michele@nestorresources.com, consultant to Susquehanna County, on or after Monday, July 12, 2021. All proposals must be made on and inclusive of the required Proposal Forms and be in accordance with the Requirements for Submitting Proposals contained in the Request for Proposals. Proposers may withdraw their proposal at any time prior to the scheduled closing time for receipt of proposals.

The Susquehanna County Board of Commissioners reserves the right to reject any or all proposals, to waive any irregularities and/or information in any proposal and to make an award in any manner, consistent with applicable laws, which is deemed to be in the best interest of the County

Proposals should be submitted and be addressed to: Office of the Chief Clerk, Susquehanna County Courthouse, P.O. Box 218, 31 Lake Avenue, Montrose, PA 1880. Sealed proposals will be received until 3 p.m., prevailing time on Thursday, August 26, 2021. The Proposer is required to submit two (2) hard copies, each executed in blue ink and labeled "original," and one (1) separate electronic media, (Flash Drive) each with a copy of the proposal in MS Word or pdf format. The proposals must be packaged, sealed, and clearly labeled to show the statement "Proposal Disposal Capacity" and the name and address of the Proposer. Contract approval and execution are anticipated by October 2021.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Nutrient Credit Trading Program; Mass Certification

The Department of Environmental Protection (Department) provides notice of its intention under the Nutrient Credit Trading Program (Trading Program) to approve a mass certification of pollutant reduction activities to generate credits by significant sewage point source discharges located in the Commonwealth portion of the Chesapeake Bay watershed that have annual mass load effluent limitations (cap loads) in their National Pollutant Discharge Elimination System (NPDES) permits.

A list of these significant sewage point sources can be found in Table 5 of the Phase 3 Watershed Implementation Plan (WIP) Wastewater Supplement, available at www.dep.pa.gov/npdes-bay or www.dep.pa.gov/nutrient_trading (select "Delivery Ratio: Credits vs Pounds" then the table of significant sewage point sources is linked as the "Point Source Credit Generators Table"). See 25 Pa. Code § 96.8 (relating to use of offsets and tradable credits from pollution reduction activities in the Chesapeake Bay Watershed).

Credit Certification

Effective October 1, 2020, to be eligible to generate credits for sale, all significant sewage point source discharges with an assigned cap load (see Table 5 of the Phase 3 WIP Wastewater Supplement) must demonstrate treated yearly effluent concentrations (baseline concentra-

tions) below 6.0 mg/L total nitrogen (TN) and 0.8 mg/L total phosphorous (TP) in accordance with the procedures described in the Phase 2 WIP Nutrient Trading Supplement, which is available at www.dep.pa.gov/nutrient_trading (in the “Trading Program Overview” section). When stringent effluent limitations for TN or TP, or both, are established in Part A of a significant sewage point source dischargers NPDES permit for reasons other than the cap load assigned for protection of the Chesapeake Bay, the permittee is eligible to generate credits when the permittee demonstrates that these effluent limitations have been achieved in accord with the Phase 2 WIP Nutrient Trading Supplement. In addition:

- to generate credits, facilities must demonstrate they are in compliance with their NPDES permit;
- the total amount of credits the facility is certified to generate cannot exceed its permitted cap load;
- the calculation of credits will be made using formulas described in the Phase 2 WIP Nutrient Trading Supplement; and
- this point source certification will expire September 30, 2025.

To ensure that verification is complete in time for credit availability to be posted on the Department web site, facilities are encouraged to provide the Department with their verification requests by October 28th of each year. Verification requests must include a complete Annual Chesapeake Bay Spreadsheet for the compliance year in which the credits were generated (that is, October 1

through September 30). The Annual Chesapeake Bay Spreadsheet is available at www.dep.pa.gov/nutrient_trading (in the “Have credits to sell?” section). Verification forms and instructions are found on the “Credit Trading Process” page at www.dep.pa.gov/nutrient_trading.

Written Comments

The Department will accept written comments on this notice for credit certification through Monday, September 13, 2021. Comments, including comments submitted by e-mail must include the commentator’s name and address. Commentators are encouraged to submit comments using the Department’s online eComment tool at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. Written comments can be mailed to the Policy Office, Department of Environmental Protection, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Use “Mass Certification” as the subject line in written communication.

For further information about this action or the Department’s Trading Program, contact the Division of Data Management, Bureau of Clean Water, Department of Environmental Protection, P.O. Box 8774, Harrisburg, PA 17105-8774, RA-EPPANutrientTrad@pa.gov, (717) 787-6744, or visit the Department’s Trading Program web site at www.dep.pa.gov/nutrient_trading.

Decisions on Requests for Exceptions to Health Care Facility Regulations

Under 28 Pa. Code § 51.33 (relating to requests for exceptions), effective June 6, 1998, the Department of Health (Department) has published in the *Pennsylvania Bulletin* all requests by entities licensed under the Health Care Facilities Act (35 P.S. §§ 448.101—448.904b), for exceptions to regulations contained in 28 Pa. Code, Part IV Subparts B—G.

Section 51.33(d) of 28 Pa. Code provides that the Department will publish notice of all approved exceptions on a periodic basis. The Department has determined that it will publish notice of all exceptions, both approved and denied. The following list contains the decisions made on exception requests published in the *Pennsylvania Bulletin* from May 1, 2021, through June 30, 2021. Future publications of decisions on exception requests will appear on a quarterly basis.

Requests for additional information on the exception request and the Department's decision should be made to the relevant division of the Department. Inquiries regarding hospitals, abortion facilities and ambulatory surgical facilities shall be addressed to Garrison E. Gladfelter, Jr., Director, Division of Acute and Ambulatory Care, Room 532, Health and Welfare Building, Harrisburg, PA 17120, (717) 783-8980. Inquiries regarding long-term care facilities shall be addressed to Susan Williamson, Director, Division of Nursing Care Facilities, Room 528, Health and Welfare Building, Harrisburg, PA 17120, (717) 787-1816. Inquiries regarding Home Health agencies should be addressed to Linda Chamberlain, Director, Division of Home Health, Forum Place, Suite 701, 555 Walnut Street, Harrisburg, PA 17101, (717) 783-1379.

State Child Death Review Team Virtual Public Meeting

The State Child Death Review (CDR) Team established under the Public Health Child Death Review Act (11 P.S. §§ 2150.1—2150.20), will hold a virtual public meeting on Friday, August 20, 2021. The virtual public meeting will be held by means of Microsoft Teams from 9 a.m. to 12 p.m.

Meeting materials will be sent out before the virtual public meeting. Contact Christina Phillips at christiphi@pa.gov to register and with questions. To join the Microsoft Teams virtual public meeting, call (267) 332-8737. The conference ID is 396 613 376#.

The Department of Health's CDR Program provides training and technical assistance to local child death review teams. The State CDR Team is a multidisciplinary team comprised of local professionals and representatives of State agencies who review data submitted by local CDR teams, develop protocols for CDRs and develop child death prevention strategies. This virtual public meeting will provide an overview of data from a number of sources on motor vehicle deaths of children from birth to 21 years of age. In addition, meeting participants will discuss local team recommendations and current prevention efforts related to motor vehicle deaths.

For additional information or for persons with a disability who wish to attend the virtual public meeting and require an auxiliary aid, service or other accommodation to do so contact Christina Phillips, Division of Bureau Operations, at (717) 346-3000, or for speech and/or hearing-impaired persons, contact V/TT (717) 783-6514 or the Pennsylvania Hamilton Relay Service at (800) 654-5984.

This virtual public meeting is subject to cancellation without notice.

9. *Retailer incentive awards:* The Lottery may conduct a separate Retailer Incentive Program for retailers who sell \$1,000,000 Extreme Green instant lottery game tickets.

10. *Retailer bonus:* The Lottery may offer a retailer bonus in connection with the sale of Pennsylvania instant lottery game tickets. If a retailer bonus is offered, a Lottery retailer shall be eligible for a bonus as described in this section. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$100,000 and not exceeding \$500,000 shall be paid a bonus of \$500. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$500,001 and not exceeding \$1,000,000 shall be paid a bonus of \$5,000. Lottery retailers who sell a winning ticket that entitles

the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$1,000,001 and not exceeding \$10,000,000 shall be paid a bonus of \$10,000. A Lottery retailer is entitled only to the largest bonus for which they qualify on a winning ticket. A bonus will be initiated for payment after the instant ticket is claimed and validated. A bonus will not be awarded to a Lottery retailer that sells a non-winning Pennsylvania Lottery instant ticket used to enter a Pennsylvania Lottery second-chance drawing or promotion that is subsequently selected to win a prize.

11. *Unclaimed prize money:* For a period of 1 year from the announced close of \$1,000,000 Extreme Green, prize money from winning \$1,000,000 Extreme Green instant lottery game tickets will be retained by the Secretary for payment to the persons entitled thereto. If no claim is made within 1 year of the announced close of the \$1,000,000 Extreme Green instant lottery game, the right of a ticket holder to claim the prize represented by the ticket, if any, will expire and the prize money will be paid

into the State Lottery Fund and used for purposes provided for by statute.

12. *Governing law:* In purchasing a ticket, the customer agrees to comply with and abide by the State Lottery Law (72 P.S. §§ 3761-101—3761-314), 61 Pa. Code Part V (relating to State Lotteries) and the provisions contained in this notice.

13. *Termination of the game:* The Secretary may announce a termination date, after which no further tickets from this game may be sold. The announcement will be disseminated through media used to advertise or promote \$1,000,000 Extreme Green or through normal communications methods.

DEPARTMENT OF REVENUE

Pennsylvania High Voltage Bingo Instant Lottery Game 1538

Under the State Lottery Law (72 P.S. §§ 3761-101—3761-314) and 61 Pa. Code § 819.203 (relating to notice of instant game rules), the Secretary of Revenue hereby provides public notice of the rules for the following instant lottery game:

1. *Name:* The name of the game is Pennsylvania High Voltage Bingo (hereafter “High Voltage Bingo”). The game number is PA-1538.

2. *Price:* The price of a High Voltage Bingo instant lottery game ticket is \$3.

3. *Play symbols:*

(a) Each High Voltage Bingo instant lottery game ticket will contain five BINGO CARD play areas desig-

nated as “CARD 1,” “CARD 2,” “CARD 3,” “CARD 4” and “CARD 5.” A player may win more than one time on a ticket, however a player may only win one prize on each “CARD.” Each “CARD” will consist of 25 spaces on a 5 × 5 grid. The 76 play symbols that may be located in the five play areas, are: the numbers 1 through 75 and a “FREE” symbol. The “FREE” symbol is a free space.

(b) Each ticket will contain a “CALLER’S CARD” area. The “CALLER’S CARD” area will consist of 28 spaces on a 4 × 7 grid. The play symbols that may be located in each space on the grid, are: the letter B with a number 1 through 15; the letter I with a number 16 through 30; the letter N with a number 31 through 45; the letter G with a number 46 through 60 and the letter O with a number 61 through 75.

(c) Each High Voltage Bingo ticket will also contain a separate “BATTERY BONUS” area containing three play symbols. The play symbols and their captions, located in the “BATTERY BONUS” area, are: Fire (FIRE) symbol, Cloud (CLOUD) symbol, Tent (TENT) symbol, Bag (BAG) symbol, Bike (BIKE) symbol, Light (LIGHT) symbol, Shoe (SHOE) symbol and a Battery (WIN10) symbol. The “BATTERY BONUS” area is played separately.

4. *Prizes:* The prizes that can be won in this game, are: \$3, \$5, \$6, \$10, \$15, \$20, \$30, \$40, \$50, \$60, \$90, \$100, \$150, \$300, \$1,000, \$3,000 and \$50,000. A player can win up to four times on a ticket.

5. *Approximate number of tickets printed for the game:* Approximately 10,800,000 tickets will be printed for the High Voltage Bingo instant lottery game.

6. *Winning Patterns:* The patterns described below, when matched on any “CARD,” shall determine whether a player wins a prize as further detailed in section 7.

(i) *LINE:* Match the “CALLER’S CARD” numbers in a four-space diagonal line through the “FREE” space, or a five-space horizontal or vertical line. Diagonal LINE matches are exactly as follows:

and

Examples of horizontal and vertical LINE matches include, but are not limited to:

and

(ii) *4 CORNERS:* Match the “CALLER’S CARD” numbers in each of the four corners of any “CARD,” exactly as follows:

(iii) *DIAMOND:* Match four of the “CALLER’S CARD” numbers to form a diamond which includes the space appearing in the top horizontal row in the “N” column; the spaces appearing in the third horizontal row from the

top in the “B” and “O” columns; and the space appearing in the fifth horizontal row from the top in the “N” column on any “CARD,” exactly as follows:

(iv) X: Match eight of the “CALLER’S CARD” numbers to form an X pattern extending through the “FREE” space and through to each of the four corner spaces, on any “CARD,” exactly as follows:

7. Determination of prize winners:

- (a) Holders of tickets matching the “CALLER’S CARD” play symbols in an X pattern on “CARD 5,” on a single ticket, shall be entitled to a prize of \$50,000.

BATTERY BONUS: Reveal a "Battery" (WIN10) symbol in any BONUS spot, win \$10 instantly! BATTERY BONUS is played separately.

Prizes, including top prizes, are subject to availability at the time of purchase.

9. *Retailer incentive awards:* The Lottery may conduct a separate Retailer Incentive Program for retailers who sell High Voltage Bingo instant lottery game tickets.

10. *Retailer bonus:* The Lottery may offer a retailer bonus in connection with the sale of Pennsylvania instant lottery game tickets. If a retailer bonus is offered, a Lottery retailer shall be eligible for a bonus as described in this section. Lottery retailers who sell a winning ticket

that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$100,000 and not exceeding \$500,000 shall be paid a bonus of \$500. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$500,001 and not exceeding \$1,000,000 shall be paid a bonus of \$5,000. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$1,000,001 and not exceeding \$10,000,000 shall be paid a bonus of \$10,000. A Lottery retailer is entitled only to the largest bonus for which they qualify on a winning ticket. A bonus will be initiated for payment after the instant ticket is claimed and validated. A bonus will not be awarded to a Lottery retailer that sells a non-winning Pennsylvania Lottery instant ticket used to enter a Pennsylvania Lottery second-chance drawing or promotion that is subsequently selected to win a prize.

11. *Unclaimed prize money:* For a period of 1 year from the announced close of High Voltage Bingo, prize money from winning High Voltage Bingo instant lottery game tickets will be retained by the Secretary for payment to the persons entitled thereto. If no claim is made within 1 year of the announced close of the High Voltage Bingo instant lottery game, the right of a ticket holder to claim the prize represented by the ticket, if any, will expire and the prize money will be paid into the State Lottery Fund and used for purposes provided for by statute.

12. *Governing law:* In purchasing a ticket, the customer agrees to comply with and abide by the State Lottery Law (72 P.S. §§ 3761-101—3761-314), 61 of the Pa. Code Part V (relating to State Lotteries) and the provisions contained in this notice.

13. *Termination of the game:* The Secretary may announce a termination date, after which no further tickets from this game may be sold. The announcement will be disseminated through media used to advertise or promote High Voltage Bingo or through normal communications methods.

9. *Retailer incentive awards:* The Lottery may conduct a separate Retailer Incentive Program for retailers who sell Solid Gold instant lottery game tickets.

10. *Retailer bonus:* The Lottery may offer a retailer bonus in connection with the sale of Pennsylvania instant lottery game tickets. If a retailer bonus is offered, a Lottery retailer shall be eligible for a bonus as described in this section. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$100,000 and not exceeding \$500,000 shall be paid a bonus of \$500. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$500,001 and not exceeding \$1,000,000 shall be paid a bonus of \$5,000. Lottery retailers who sell a winning ticket that entitles the ticket holder to a prize, either payable in a single installment or having a guaranteed minimum payout, of at least \$1,000,001 and not exceeding \$10,000,000 shall be paid a bonus of \$10,000. A Lottery retailer is entitled only to the largest bonus for which they qualify on a winning ticket. A bonus will be initiated for payment after the instant ticket is claimed and validated. A bonus will not be awarded to a Lottery retailer that sells a non-winning Pennsylvania Lottery instant ticket used to enter a Pennsylvania Lottery second-chance drawing or promotion that is subsequently selected to win a prize.

11. *Unclaimed prize money:* For a period of 1 year from the announced close of Solid Gold, prize money from winning Solid Gold instant lottery game tickets will be retained by the Secretary for payment to the persons entitled thereto. If no claim is made within 1 year of the announced close of the Solid Gold instant lottery game, the right of a ticket holder to claim the prize represented by the ticket, if any, will expire and the prize money will be paid into the State Lottery Fund and used for purposes provided for by statute.

12. *Governing law:* In purchasing a ticket, the customer agrees to comply with and abide by the State Lottery Law (72 P.S. §§ 3761-101—3761-314), 61 Pa. Code Part V (relating to State Lotteries) and the provisions contained in this notice.

13. *Termination of the game:* The Secretary may announce a termination date, after which no further tickets from this game may be sold. The announcement will be disseminated through media used to advertise or promote Solid Gold or through normal communications methods.

C. DANIEL HASSELL,
Secretary

[Pa.B. Doc. No. 21-1290. Filed for public inspection August 13, 2021, 9:00 a.m.]

DEPARTMENT OF REVENUE

Powerball

In accordance with 61 Pa. Code § 871.21 (relating to future changes to Powerball), the Secretary of Revenue (Secretary) announces the following changes to the Powerball regulations. This amendment provides updates to the game description, draw frequency, available add-

ons and certain definitions. This amendment provides changes to funding of guaranteed Powerball prizes.

These changes will affect ticket sales beginning on Monday, August 23, 2021, for the Powerball drawing on Monday, August 23, 2021. The changes to the regulation will be codified as paragraph (10) in 61 Pa. Code § 871.22 (relating to changes to Powerball):

(10) *Changes effective for Powerball tickets sold on or after August 23, 2021:*

(i) *Section 871.2(a) (relating to game description and purpose).* Powerball is a five out of 69 plus one out of 26 on-line lottery game which pays the grand prize on an annuitized, parimutuel basis. Except as provided in this chapter, all other prizes are paid on a set cash, single payment basis.

(ii) *Section 871.2(b).* The purpose of the Powerball game is to determine winners from ticket holders matching five numbers from 1 through 69, and matching the separately drawn Powerball number, or a designated combination thereof, within a single play, with the five winning numbers and the Powerball number to be randomly drawn. Drawings will be conducted three times a week or as publicly announced by the Secretary.

(iii) *Section 871.3 (relating to definitions).*

Advertised Grand Prize—The estimated annuitized Grand Prize amount as determined by the MUSL Central Office by use of the MUSL Annuity Factor and communicated through the Selling Lotteries prior to the Powerball Grand Prize Drawing. The Advertised Grand Prize is not a guaranteed prize amount and the actual Powerball Grand Prize may vary from the advertised amount, except in circumstances where there is a guaranteed Powerball Grand Prize amount as described in § 871.10 (related to funding of guaranteed prizes).

Agent—A person or entity authorized by a Selling Lottery to sell lottery Plays.

Cash election—A method of payment that the player selects, within 60 days of the date the Lottery determines the player is entitled to the Powerball grand prize, to receive a parimutuel share of the prize money allocated to the grand prize category as a one-time, lump-sum cash payment rather than as an annuity.

Drawing—The formal draw event for randomly selecting the winning numbers that determine the number of winners for each prize level of the Powerball game or a Powerball promotion as described in these rules. A Powerball Drawing shall determine the winning numbers for the Powerball game, the Double Play Drawing, and the Power Play multiplier. Winning numbers for the Powerball game include the Winning numbers drawn for the Powerball game, and the number drawn to the determine the Power Play multiplier.

Grand prize winnings pool—An amount constituting 34.0066% of gross sales from all participating states for a particular Powerball game drawing for the purpose of paying winning grand prizes in that drawing. The grand prize winnings pool includes prize money allocated to the grand prize category from prior Powerball game drawings in which there were no winning grand prize tickets. A portion of this pool is used to fund prize reserve accounts until those accounts achieve maximum balances.

Parimutuel—Wagered funds that are pooled and then paid in equal shares to winners of a prize as described in these rules.

Quick pick—The random selection by the Lottery's computer system of five numbers from 1 through 69 and a Powerball number from 1 through 26 that appear on a ticket and are played by a player in the game.

Ticket—A Powerball ticket, produced by an on-line terminal from a licensed on-line retailer in an authorized manner, containing a letter prefix followed by five selected numbers from 1 through 69 and a single selected Powerball number from 1 through 26 for each basic play, ticket validation number data, drawing date, amount bet and any applicable promotion exercised by the player. Each set of five numbers and the Powerball number constitutes a basic play of which there may be one or more, up to ten on a ticket.

Winning numbers—Six numbers, the first five numbers from 1 through 69, and the Powerball number from 1 through 26, selected at a Powerball drawing and subsequently validated by the MUSL, which shall be used to determine the winning Powerball plays contained on a ticket or properly registered ticketless transaction. Double Play winning numbers shall not be used to determine Powerball prizes. Powerball winning numbers shall not be used to determine Double Play prizes.

(Editor's Note: This is a partial listing of the definitions applicable to Powerball. See § 871.3 (relating to definitions) for additional definitions.)

(iv) *Section 871.5 (relating to ticket price)*. A Powerball basic play shall cost \$2 per play. The power play option may be exercised, at the discretion of the player, for an additional \$1 per play. The double play option may be exercised, at the discretion of the player, for an additional \$1 per play. If both options are exercised, the total cost per play shall be \$4.

(v) *Section 871.6(a) (relating to Powerball bet slip and ticket characteristics and restrictions)*. For each basic play the player shall select, using a physical or electronic bet slip, or request quick pick selection by the computer, five numbers and a single Powerball number, in one or more of the game panels on a Powerball bet slip. Powerball bet slips shall be available at no cost to the player. The minimum entry is \$2. For \$2, play one game; for \$4, play two games; for \$6, play three games; for \$8, play four games; for \$10, play five games. Players are also given the option to select one or more promotions verbally or on the bet slip at the time of purchase for an additional \$1 per promotion selected for each play. Game panels shall be played in alphabetical order in accordance with the instructions printed on the Powerball bet slip. A

Powerball bet slip has no pecuniary or prize value and does not constitute evidence of the purchase of a ticket or the numbers selected.

(vi) *Section 871.6(b)*. To purchase a Powerball play, players shall, in addition to the purchase price, submit a completed Powerball bet slip, request number selections either by quick pick or manual terminal entry to an on-line retailer to have a ticket issued. To purchase a ticket at a Lottery self-service terminal that dispenses terminal-based Lottery tickets, the player shall designate the drawing date or dates for which the ticket is entered, number selections and may exercise the power play promotion for an additional \$1 per play. The player may use a bet slip or the Quick Pick option at a Lottery self-service terminal that dispenses terminal-based Lottery tickets. The ticket shall contain five selected numbers and a single selected Powerball number for each play, ticket validation number data, drawing date, amount bet and any applicable promotion exercised by the player. This ticket shall be the only valid receipt for claiming a prize. The ticket shall only be valid for the drawing date or dates printed on the ticket. Retailers are not permitted to allow the attachment of any remote devices to a lottery terminal to enter plays except as otherwise provided in the MUSL rules.

(vii) *Section 871.6(c)*. If Powerball bet slips are unavailable, number selections may be given to an on-line retailer in groups of five number selections and one Powerball number selection per game section for each \$2 wagered as a basic play. The player may exercise either the power play promotion or the double play promotion for an additional \$1 per play per promotion selected. The retailer shall manually enter the selections into the computer terminal.

(viii) *Section 871.6(e)*. It shall be the sole responsibility of the player to verify the accuracy of the game play or plays and other data printed on the ticket. The placing of plays, by the player or through the on-line retailer who is acting on behalf of the player in entering the play or plays, is done at the player's own risk.

(ix) *Section 871.6(f)*. A player may select numbers for up to 20 drawings, specifically the next drawing and the 19 subsequent drawings.

(x) *Section 871.7(a) (relating to time, place and manner of conducting drawing)*. Time of drawing. A Powerball drawing will be held three times a week or as publicly announced by the Secretary.

(xi) *Section 871.8(a) (relating to expected prize payout percentages)*. Determination of expected prize payout percentages for the Powerball drawing is as follows:

<i>Tickets Containing The Following, In One Single Lettered Game Section</i>	<i>Prize Category</i>	<i>Prize Payment</i>	<i>Approximate Percentage of Winnings Pool Allocated to Prize Category**</i>
All five (5) first set numbers and the Powerball number	Grand Prize	Grand Prize	68.0131%
Five (5) first set numbers	Second Prize*	\$1,000,000	8.5558%
Four (4) first set numbers and the Powerball number	Third Prize*	\$50,000	5.4757%
Four (4) first set numbers	Fourth Prize*	\$100	0.2738%
Three (3) first set numbers and the Powerball number	Fifth Prize*	\$100	0.6899%
Three (3) first set numbers	Sixth Prize*	\$7	1.2074%

<i>Tickets Containing The Following, In One Single Lettered Game Section</i>	<i>Prize Category</i>	<i>Prize Payment</i>	<i>Approximate Percentage of Winnings Pool Allocated to Prize Category**</i>
Two (2) first set numbers and the Powerball number	Seventh Prize*	\$7	0.9981%
One (1) first set number and the Powerball number	Eighth Prize*	\$4	4.3489%
None of the first set numbers and the Powerball number	Ninth Prize*	\$4	10.4373%

* Indicates a set prize.

** Fifty percent of Powerball gross sales are allocated to the winnings pool for the payment of prizes.

(xii) *Section 871.8(b)*. Prize money allocated to the grand prize category will be paid on a parimutuel basis, divided equally by the number of plays determined by the MUSL to be the winners of the grand prize.

(xiii) *Section 871.8(c)*. The number of plays determined by the MUSL to be winners of the second through ninth prize categories will be paid as set cash prizes, except as provided in paragraphs (1) through (4).

(1) Except as otherwise provided in section 871.8(c)(4), if the total of the set prizes (as multiplied by the respective Power Play multiplier if applicable) awarded in a Powerball drawing exceeds the percent of the prize pool allocated to set prizes, then the amount needed to fund the set prizes, including Power play prizes, shall be drawn from the following sources in the following order:

(i) The amount allocated to the set prize tiers and carried forward from previous draws, if any.

(ii) An amount from the MUSL set prize reserve account, if available, not to exceed \$40,000,000 per Powerball drawing.

(iii) Any other amounts as agreed to by the MUSL Powerball Product Group in their sole discretion.

(2) Except as otherwise provided in section 871.8(c)(4), if the sources set forth in paragraph (1) are depleted and there still are not sufficient funds to pay the set prizes, including Power play prizes, for a particular Powerball drawing, the highest set prize shall become a parimutuel prize. If the amount of the highest set prize, when paid as a parimutuel prize, is less than or equal to the next highest set prize and there are still not sufficient funds to pay the remaining set prizes, the next highest set prize shall become a parimutuel prize. If necessary, and under the same test conditions set forth in the preceding sentence, each succeeding set prize level shall be converted to a parimutuel prize, in order, until all set prizes become parimutuel. If all prizes are converted to parimutuel prizes, the money available from the funding sources listed in this rule shall be divided among the winning Powerball Plays in proportion to their respective prize percentages. Powerball Set Prizes and Power Play prizes will be reduced by the same percentage.

(3) Except for winning prizes sold by the California Lottery, if all, or any portion of the set prize pool is not awarded in the current Powerball drawing, that portion of the set prize pool shall be carried forward to subsequent Powerball drawings.

(4) By agreement between the Party Lotteries and the Licensee Lotteries, the Licensee Lotteries shall independently calculate their set parimutuel prize amounts. The Party Lotteries and the Licensee Lotteries shall then

agree to set the parimutuel prize amounts for all lotteries selling the game at the lesser of the independently calculated prize amounts.

(xiv) *Section 871.9(b)* (relating to Powerball prize payments). A grand prize shall be paid by an annuity except that a player may elect to receive the grand prize in a single cash payment provided the cash election is made by the player within 60 days of the date the Lottery determines that a grand prize-winning ticket has been sold and that a player is entitled to the prize.

(1) An election to receive the grand prize by annuity or cash made by the player after the player becomes entitled to the prize is final and cannot be revoked, withdrawn or otherwise changed.

(2) Shares of the grand prize shall be determined by dividing the cash available in the grand prize pool equally among all winners of the grand prize. A winner who elected cash payment shall be paid the share in a single cash payment.

(3) The annuitized prize shall be determined by multiplying a winner's share of the grand prize by the MUSL annuity factor.

(xv) *Section 871.9(c)*. The MUSL annuity factor is determined through a process as approved by the MUSL Finance and Audit Committee.

(xvi) *Section 871.9(g)*. If more than one winning ticket for the grand prize is determined, upon meeting the requirements of §§ 871.12 and 871.13 (relating to ticket validation requirements; procedures for claiming and payment of Powerball prizes), each is entitled to a parimutuel payment share of the total grand prize category.

(xvii) *Section 871.9(h)*. A winning Powerball play is entitled only to the highest prize won by those numbers in a Powerball drawing, and a winning Double Play, play is entitled only to the highest prize won by those numbers in a Double Play drawing. A player may win both a Powerball prize and a Double Play prize if the player purchased the Double Play promotion and if the Powerball Play and the Double Play, play match the winning numbers drawn for both the Powerball game and the Double Play game.

(xviii) *Section 871.9(m)*. Annuitized payment of the grand prize or a share of the grand prize may be rounded to facilitate the purchase of an appropriate funding mechanism. Breakage on an annuitized grand prize win shall be added to the first cash payment to the winner or winners. Prizes other than the grand prize, which under this chapter may become single payment, parimutuel

prizes, may be rounded down so that prizes can be paid in multiples of whole dollars. Breakage resulting from rounding these prizes shall be carried forward to the prize pool for the next drawing.

(xix) *Section 871.10(2) (relating to funding of guaranteed prizes)*. If there are multiple grand prize winners during a single drawing and at least one of the grand prize winners has elected the annuitized option prize, then the MUSL Annuity Factor shall be utilized to determine the cash pool. The cost of the annuitized prize or prizes will be determined at the time the annuity is purchased through a process as approved by the MUSL Board.

(xx) *Section 871.10(4)* is deleted in its entirety.

(xxi) *Section 871.10(5)*. Minimum guaranteed prizes or increases may be waived if the alternate funding mechanism as set forth in § 871.8 becomes necessary.

(xxii) *Section 871.10(6)*. Approval of the Group is required to change the guaranteed minimum Grand Prize amounts or minimum increases in the Grand Prize amount. The Group may increase, decrease or eliminate the guaranteed minimum Grand Prize amount or any announced minimum Grand Prize increases as effective at any time following the next drawing following the action taken by the Group.

(xxiii) *Section 871.13(a) (relating to procedures for claiming and payment of Powerball prizes)*. Pennsylvania Powerball and Double Play prizes shall be claimed only through a licensed on-line Pennsylvania Lottery retailer beginning on the day following the drawing. The Lottery is not authorized to accept claims or pay prizes for Powerball tickets purchased in other jurisdictions.

(xxiv) *Section 871.13(c)*. The holder of an apparent winning Powerball or Double Play ticket containing one or more winning lettered play selections representing combined prizes of \$2,500 or less will be paid by participating on-line retailers as provided in subsection (b), if the ticket validation requirements in § 871.12 (relating to ticket validation requirements) have been met, a proper validation pay ticket has been issued by the retailer's computer terminal and other retailer procedures have been met.

(xxv) *Section 871.13(d)*. The holder of an apparent winning Powerball or Double Play ticket containing one or more winning lettered play selections representing combined prizes in excess of \$2,500, with the exception of the grand prize category, shall first validate the apparent winning ticket at the participating Pennsylvania Lottery on-line retailer to receive a validation receipt, complete a claim form and display appropriate identification and then surrender the winning ticket and the original claim form to the retailer for transmittal to Lottery Headquarters for payment under Chapter 811 (relating to prizes).

(xxvi) *Section 871.13(e)*. The holder of an apparent winning Powerball or Double Play ticket containing one or more winning lettered play selections representing a grand prize category prize shall present, in person, the apparent winning ticket to the Pennsylvania Lottery Headquarters for validation under Chapter 811.

(xxvii) *Section 871.13(f)*. In the event of the death of a Powerball or Double Play grand prize winner and upon

petition of the estate of the prize winner, the MUSL Powerball Product Group may accelerate payment of all remaining proceeds from the winning ticket to the estate of the winner by transferring to the estate the securities or cash, or both, being held to satisfy the prize requirements, or paying the estate the present value of the remaining payments of the winner's prize. The valuation of the securities and determination of the present value of the accelerated lottery payments shall be at the sole discretion of the MUSL Powerball Group. The payment of a set prize to a person who dies before receiving any or all of a particular prize and to a person under 18 years of age will be paid under §§ 811.16 and 811.27 (relating to prizes payable after death of prize winner; payment of prizes to persons under 18 years of age).

(xxviii) *Section 871.14(b) (relating to parimutuel prize pool)*. An amount equal to up to 5% of a party lottery's sales shall be deducted from a party lottery's grand prize pool contribution and placed in trust in one or more prize pool accounts and prize reserve accounts at any time that the prize pool accounts and party lottery's share of the prize reserve accounts is below the amounts designated by the MUSL Powerball Product Group. An additional amount of up to 20% of a party lottery's sales shall be deducted from a party lottery's grand prize pool contribution and placed in trust to be held by the product group at such times as determined by the MUSL Powerball Product Group.

(xxix) *Section 871.14(c)*. The MUSL Powerball Product Group has established the following prize reserve accounts for the Powerball game:

(1) the Prize Reserve Account, which is used to guarantee the payment of valid, but unanticipated, Grand Prize claims that may result from a system error or other reason; and

(2) the Set Prize Reserve Account, which is used to fund deficiencies in low-tier prize payments, subject to the limitations of these rules.

(xxx) *Section 871.14(d)*. The MUSL Powerball Product Group has established the following prize pool accounts for the Powerball game:

(1) The Grand Prize pool, which is used to fund the current Grand Prize.

(2) The Powerball Set Prize Pool, which is used to fund the Powerball Set Prize payments.

(3) The Set Aside Pool, which is used to fund the payment of the awarded minimum starting annuity Grand Prizes and minimum annuity Grand Prize increase, if necessary, as subject to the limitations of these rules and any limitations as may be set by the Product Group, and

(4) the Grand Prize Carry Forward Pool, which is used to fund the starting minimum annuity Grand Prize, as may be set by the Product Group, if such funds are available and if sales do not fund the Grand Prize.

(xxxii) *Section 871.14(e)*. The Power Play Prize Pool and Power Play Pool Account are described in § 871.20 (relating to power play promotion) of these rules.

(xxxiii) *Section 871.14(f)*. The Double Play Prize Pool and Double Play Prize Pool Account are described in § 871.21 (relating to double play promotion) of these rules.

(xxxiiii) *Section 871.14(g)*. The Set Prize Pool Account holds the temporary balances that may result from having fewer than expected winners in the Powerball Set

Prize (also known as low-tier prize) categories. The source of the Set Prize Pool is the Party Lottery's weekly prize contributions less actual Powerball Set Prize liability.

(xxxiv) *Section 871.14(h)*. Once the prize pool accounts and the party lottery's share of the prize reserve accounts exceeds the designated amounts, the excess shall become part of the grand prize pool.

(xxxv) *Section 871.14(i)*. The MUSL Powerball Product Group, with the approval of the Finance and Audit Committee, may establish a maximum balance for the prize pool accounts and prize reserve accounts.

(xxxvi) *Section 871.14(j)*. The MUSL Powerball Product Group may determine to expend all or a portion of the funds in the prize pool accounts, except the Grand Prize pool account and the Grand Prize Carry Forward Pool account, and the prize reserve accounts for the following purposes:

(1) The Product Group may expend funds for the purpose of indemnifying the Party Lotteries and Licensee Lotteries in the payment of prizes to be made by the Selling Lotteries, subject to the approval of the MUSL Board and for the payment of prizes or special prizes in the game, subject to the approval of the MUSL Finance and Audit Committee; and

(2) The Product Group may expend funds for the payment of prizes or special prizes in the game, limited to prize pool and prize reserve contributions from lotteries participating in the special prize promotion, subject to the approval of the Board's Finance and Audit Committee or that Committee's failure to object after given two weeks' notice of the planned action, which actions may be appealed to the full Board by the Product Group.

(3) The Grand Prize Carry Forward Pool account may only be expended to fund the starting minimum annuity Grand Prize.

(xxxvii) *Section 871.14(k)*. The prize reserve shares of a party lottery may be adjusted with refunds to the party lottery from the prize reserve accounts as may be needed to maintain the approved maximum balance and shares of the party lotteries.

(xxxviii) *Section 871.14(l)*. A Party Lottery may contribute to its share of prize reserve accounts over time, but in the event of a draw down from the reserve account, a Party Lottery is responsible for its full percentage share of the account, whether or not it has been paid in full.

(xxxix) *Section 871.14(m)*. Any amount remaining in the prize pool accounts or prize reserve accounts at the

end of this game shall be carried forward to a replacement prize reserve account or expended in a manner as directed by the members of the MUSL Powerball Product Group in accordance with State law.

(xl) *Section 871.14(n)*. If the prize pool for a drawing is not sufficient to fund an announced minimum grand prize, the prize pool will be increased as necessary in accordance with MUSL rules.

(xli) *Section 871.18(c) (relating to governing law)*. A prize claimant agrees, as its sole and exclusive remedy that claims arising out of a Play can only be pursued against the Selling Lottery which issued the Play. Litigation, if any, shall only be maintained within the jurisdiction in which the Powerball Play was purchased and only against the Selling Lottery that issued the Play. A prize claimant waives any claim or defense that such forum is not convenient or proper. The Contractor agrees that any such court shall have in personam jurisdiction over it, and consents to service of process in any manner authorized by Pennsylvania law. No claim shall be made against any other Participating Lottery or against the MUSL.

(xlii) *Section 871.18(d)*. Nothing in these Rules shall be construed as a waiver of any defense or claim the Selling Lottery which issued the Play, any other Participating Lottery or MUSL may have in any litigation, including in the event a player or prize claimant pursues litigation against the Selling Lottery, any other Participating Lottery or MUSL, or their respective officers, directors or employees.

(xliii) *Section 871.18(e)*. All decisions made by a Selling Lottery, including the declaration of prizes and the payment thereof and the interpretation of Powerball Rules, shall be final and binding on all Play purchasers and on every person making a prize claim in respect thereof, but only in the jurisdiction where the Powerball Play was issued.

(xliv) *Section 871.18(f)*. Unless the laws, rules, regulations, procedures, and decisions of the Lottery which issued the Play provide otherwise, no prize shall be paid upon a Play purchased, claimed or sold in violation of these Rules or the laws, rules, regulations, procedures, and decisions of that Selling Lottery; any such prize claimed but unpaid shall constitute an unclaimed prize under these Rules and the laws, rules, regulations, procedures, and decisions of that Selling Lottery.

(xlv) *Section 871.19 (relating to probability of winning)*.

The probability of winning is as follows:

<i>Probability of Tickets Containing The Following, In One Single Lettered Game Section</i>	<i>Prize Category</i>	<i>Winning per Play</i>
Five first set numbers and the Powerball number	Grand Prize	1:292,201,338
Five first set numbers	Second Prize	1:11,688,053.52
Four first set numbers and the Powerball number	Third Prize	1:913,129.1813
Four first set numbers	Fourth Prize	1:36,525.1673
Three first set numbers and the Powerball number	Fifth Prize	1:14,494.1140
Three first set numbers	Sixth Prize	1:579.7646
Two first set numbers and the Powerball number	Seventh Prize	1:701.3281
One first set number and the Powerball number	Eighth Prize	1:91.9775
None of the first set and the Powerball number	Ninth Prize	1:38.3239

(xlvi) *Section 871.20(a) (relating to Power Play® promotion)*. The power play promotion shall be available in association with the Powerball game and will continue until the Secretary publicly announces a suspension or termination thereof. The power play promotion will be conducted in accordance with the Powerball rules except that players may purchase the power play option to increase set prizes won as a result of a Powerball drawing. The Powerball grand prize will not be eligible for an increase under the power play promotion. The Secretary will on occasion announce, as a special promotion, higher promotional prize amounts to be won with the power play promotion. Selling Lotteries may require purchase of the Power Play® promotion when a player purchases a Powerball Play. Power Play® is not applicable to the Powerball Double Play Promotion.

(xlvii) *Section 871.20(b)*. At the time of purchasing a Powerball ticket from an on-line Lottery retailer, a player may choose the power play option for one additional \$1 per play for each play on the Powerball ticket. If a player chooses the power play promotion feature for any play on a ticket, every play on that ticket must participate in the promotion.

(xlviii) *Section 871.20(c)*. The MUSL shall conduct a power play drawing and will announce results during each of the regular Powerball drawings held during the power play promotion. During each power play drawing a single number (2, 3, 4, 5, or 10) shall be randomly drawn. The 10X multiplier feature will be available for drawings in which the initially advertised annuitized Grand Prize amount is \$150,000,000 or less. The MUSL Powerball Product Group may elect to run limited promotions that modify the multiplier features.

(xlix) *Section 871.20(e)*. In drawings where the 10X multiplier is available, the expected power play prize pool for power play set prizes shall consist of up to 49.969% of each drawing period's sales. In drawings where the 10X multiplier is not available, the expected power play prize pool for power play set prizes shall consist of up to 45.934% of each drawing period's sales. The prize payout percentage per draw may vary. The power play prize pool shall be carried forward to subsequent power play drawings if all or a portion of the percentage is not required to pay the power play prizes for the current power play drawing and held in the Power Play Pool Account.

(1) *Section 871.20(f)*. In drawings where the 10X multiplier is available, an additional 0.31% of power play sales may be collected and placed in the Power Play Pool Account, for the purpose of paying power play prizes. In drawings where the 10X multiplier is not available, 4.066% of power play sales may be collected and played in the Power Play Pool Account, for the purposes of paying power play prizes. Any amount remaining in the power play pool account at the end of the power play promotion shall be returned to all lotteries participating in the account after the end of all claim periods of all selling

lotteries, carried forward to a replacement game, or expended in a manner as directed by the MUSL Powerball Product Group in accordance with State law.

(li) *Section 871.20(g)*. Except as otherwise provided in section 871.20(m), if, with respect to a single Powerball drawing, the total of the Powerball set prizes without the power play option and the Powerball set prizes increased by the power play option exceeds the percentage of the prize pools allocated to the set prizes, the amount needed to fund those combined set prizes shall be drawn from the following sources in the following order:

(1) The amount allocated to the set prizes and carried forward from previous Powerball drawings, if any.

(2) The amount allocated to the Powerball Set-Prize Reserve Account, if available in the account, not to exceed forty million dollars (\$40,000,000.00) per drawing.

(3) Other amounts as agreed to by the MUSL Powerball Product Group in their sole discretion.

(lii) *Section 871.20(h)*. Except as otherwise provided in section 871.20(m), if the sources set forth in subsection (g) are depleted and there still are not sufficient funds to pay the set prizes, including the power play prizes, for a particular Powerball drawing, the highest set prize, including the prize increased by the power play option, shall become a parimutuel prize. If the amount of the highest set prize, when paid as a parimutuel prize, is less than or equal to the next highest set prize and there are still not sufficient funds to pay the remaining prizes, the next highest set prize, including the prize increased by the power play option, shall become a parimutuel prize. If necessary, under the same test set forth in the preceding sentence, each succeeding set prize level shall be converted to a parimutuel prize, in order, until all set prizes become parimutuel. If all set prizes are converted to parimutuel prizes, the money available from the funding sources listed in subsection (g) shall be divided among the winning plays in proportion to their respective prize percentages.

(liii) *Section 871.20(i)*. Power play set prizes which become parimutuel may be rounded down so that they can be paid in multiples of whole dollars. Funds remaining after rounding shall be carried forward to the prize pool for the next power play drawing.

(liv) *Section 871.20(k)*. When the Powerball set prizes become parimutuel, the Powerball set prize amounts will be less than the amount shown and the power play prizes for the second through the ninth category prizes shall be reduced as announced by the MUSL Powerball Product Group.

(lv) *Section 871.20(l)*. The probability of the various power play numbers being selected in a power play drawing.

(1) The probability of the various power play numbers being selected in a power play drawing when the 10X multiplier is available, are:

<i>Power Play Multiplier</i>	<i>Odds</i>
2	24 in 43
3	13 in 43
4	3 in 43
5	2 in 43
10	1 in 43

(2) The probability of the various power play numbers being selected in a power play drawing when the 10X multiplier is not available, are:

<i>Power Play Multiplier</i>	<i>Odds</i>
2	24 in 42
3	13 in 42
4	3 in 42
5	2 in 42

(lvi) *Section 871.20(m)*. By agreement between the Party Lotteries and the Licensee Lotteries, the Licensee Lotteries shall independently calculate their set parimutuel prize amounts, including the power play prize amounts. The Party Lotteries and the Licensee Lotteries shall then agree to set the parimutuel prize amounts for all lotteries selling the game at the lesser of the independently calculated prize amounts.

(lvii) *Section 871.23(a) (relating to Double Play promotion)*. The Double Play promotion shall be available in association with the Powerball game and will continue until the Secretary publicly announces a suspension or termination thereof. The Double Play promotion will be conducted in accordance with the Powerball rules except that players may purchase the Double Play option to use the same set of numbers selected for a Powerball play in a second, Double Play Drawing immediately following the Powerball Drawing. Double Play does not replace or alter Power Play®. Double Play prizes will not be multiplied or increased by the Power Play® promotion. Powerball Prizes and Double Play prizes are determined separately; for example, a Powerball player who choose to participate in Double Play may win both a Double Play prize and a Powerball prize, if their Play numbers match the Powerball winning numbers and also match the Double Play winning numbers. Selling Lotteries may require purchase of the Power Play® promotion when a player purchases a Powerball Play.

(lviii) *Section 871.23(b)*. At the time of purchasing a Powerball ticket from an on-line Lottery retailer, a player may choose the Double Play option for one additional \$1 per play for each play on the Powerball ticket. If a player chooses the Double Play promotion feature for any play on a ticket, every play on that ticket must participate in the promotion.

(lix) *Section 871.23(c)*. The MUSL shall conduct a Double Play drawing and will announce results following each of the regular Powerball drawings held during the Double Play promotion. The purpose of the Double Play game is to determine winners from ticket holders matching five numbers from 1 through 69 and matching the separately drawn number from 1 through 26, or a designated combination thereof, within a single play, with the five winning first set numbers and the second set number to be randomly drawn. Drawings will be conducted three times a week or as publicly announced by the Secretary.

(lx) *Section 871.23(d)*. Powerball tickets that contain the Double Play option and one or more plays eligible for a Double Play first through ninth category prize shall be entitled to a total set prize identified in § 871.23(k), unless a higher limited promotional prize amount is announced by the Secretary.

(lxi) *Section 871.23(e)*. The expected Double Play prize pool for Double Play set prizes shall consist of 55% of each drawing period's sales. The prize payout percentage

per draw may vary. The Double Play prize pool shall be carried forward to subsequent Double Play drawings if all or a portion of the percentage is not required to pay the Double Play prizes for the current Double Play Drawing and held in the Double Play Prize Pool Account.

(lxii) *Section 871.23(f)*. The MUSL Powerball Product Group has established the following prize pool accounts for the Double Play game:

(1) The First Prize Pool, which is used to fund the First Prize by contributing 4.9889% of sales, fund deficiencies in the Double Play Set Prize Pool, and which shall contain all funds not used to pay a First Prize or fund deficiencies in the Double Play Set Prize Pool; and

(2) The Double Play Set Prize Pool, which is used to fund the Double Play second through ninth prizes, and which may hold temporary balances that result from having fewer expected winners in the Double Play Set Prize categories.

(lxiii) *Section 871.23(g)*. The Set Prize Pool Account holds the temporary balances that may result from having fewer than expected winners in the Powerball Set Prize (aka low-tier prize) categories. The source of the Set Prize Pool is the Party Lottery's weekly prize contributions less actual Powerball Set Prize liability.

(lxiv) *Section 871.23(h)*. The MUSL Powerball Product Group may determine to expend all or a portion of the funds in the prize pool accounts, except the Grand Prize pool account and the Grand Prize Carry Forward Pool account, and the prize reserve accounts for the following purposes:

(1) The Product Group may expend funds for the purpose of indemnifying the Selling Lotteries in the payment of prizes to be made by the Selling Lotteries; and

(2) The Product Group may expend funds for the payment of prizes or special prizes in the game, limited to prize pool and prize reserve contributions from lotteries participating in the special prize promotion.

(lxv) *Section 871.23(i)*. If, with respect to a single Double Play drawing, the total of the Double Play set prizes exceeds the percentage of the prize pools allocated to the set prizes, the amount needed to fund those combined set prizes shall be drawn from the following sources in the following order:

(1) The amount allocated to Double Play Set Prize Pool, if any.

(2) An amount from the First Prize Pool, if available; and

(3) Other amounts as agreed to by the MUSL Powerball Product Group in their sole discretion.

(lxvi) *Section 871.23(j)*. If the sources set forth in subsection (g) are depleted and there still are not sufficient funds to pay the set prizes for a particular Double Play drawing, the highest Double Play set prize shall become a parimutuel prize. If the amount of the highest Double Play set prize, when paid as a parimutuel prize, is less than or equal to the next highest set prize and there are still not sufficient funds to pay the remaining prizes, the next highest Double Play set prize shall become a parimutuel prize. If necessary, under the same test set

forth in the preceding sentence, each succeeding set prize level shall be converted to a parimutuel prize, in order, until all set prizes become parimutuel. If all set prizes are converted to parimutuel prizes, the money available from the funding sources listed in subsection (g) shall be divided among the winning plays in proportion to their respective prize percentages.

(lxvii) *Section 871.23(k)*. The probability of winning is as follows:

<i>Number of Matches Per PB Play</i>	<i>Prize Payment</i>	<i>Prize Category</i>	<i>Probability of Winning per Play</i>
Five first set numbers and the Powerball number	\$10,000,000	Grand Prize	1:292,201,338
Five first set numbers	\$500,000	Second Prize	1:11,688,053.52
Four first set numbers and the Powerball number	\$50,000	Third Prize	1:913,129.1813
Four first set numbers	\$500	Fourth Prize	1:36,525.1673
Three first set numbers and the Powerball number	\$500	Fifth Prize	1:14,494.1140
Three first set numbers	\$20	Sixth Prize	1:579.7646
Two first set numbers and the Powerball number	\$20	Seventh Prize	1:701.3281
One first set number and the Powerball number	\$10	Eighth Prize	1:91.9775
None of the first set and the Powerball number	\$7	Ninth Prize	1:38.3239

DEPARTMENT OF REVENUE

Retail Incentive Program and Related Retailer Incentive Programs for Fiscal Year 2021-2022; Amended Notice

Under the State Lottery Law (72 P.S. §§ 3761-101—3761-314) and 61 Pa. Code § 803.11 (relating to powers and duties of the Secretary of Revenue) and under Title 4, Amusements (4 Pa.C.S. §§ 501—505) the Secretary of Revenue hereby provides public notice of changes to the Retail Incentive Program and related Retailer Incentive Programs that were published at 51 Pa.B. 3573 (June 26, 2021).

The Pennsylvania Lottery intends to modify the sales growth percentage goals for the Sales Growth Incentive Program as set forth in subsections 8(d) and 8(e) (relating to the sales growth incentive program) of the notice. These changes are consistent with the Pennsylvania Lottery's record sales for Fiscal Year 2020-2021 and the updated goals for Fiscal Year 2021-2022. Finally, section 8 is also modified to add subsection (g), which clarifies that the changes to subsections 8(d) and 8(e) are retroactive to July 1, 2021. The correct version of this document is as follows, with ellipses referring to the existing text as it appeared at 51 Pa.B. 3573—3577 (June 26, 2021):

8. *Sales Growth Incentive Program*: Retailers may qualify for a Sales Growth Incentive, in addition to the Standard Retailer Commission, by meeting the requirements of this section.

* * * * *

(d) A Retailer who exceeds their prior year sales figure by at least 0.01%, but not more than 3.99%, for any

Quarter in the Fiscal Year to which this notice applies, shall be awarded an additional 0.75% incentive above the Standard Retailer Commission. For example, assuming that the Retailer has met all other requirements of this notice, a Retailer with a sales baseline of \$100,000 for a Quarter, who raises their sales by 0.01% to \$100,010, shall be entitled to the Sales Growth Incentive of 0.75% in addition to the Standard Retailer Commission and will be entitled to a Sales Growth Incentive payment of \$750.08. With the Standard Retailer Commission of \$5,000.50 on sales of \$100,010, the Retailer would receive a total payment of \$5,750.58 for that Quarter.

(e) A Retailer who exceeds their sales baseline figure for any Quarter by at least 4% shall be awarded an additional 1.50% incentive above the Standard Retailer Commission. For example, assuming that the Retailer has met all other requirements of this notice, a Retailer with a sales baseline of \$100,000 for a Quarter, who raises their sales by 4% to \$104,000, shall be entitled to a 1.50% incentive in addition to the Standard Retailer Commission and will be entitled to Sales Growth Incentive payment of \$1,560. With the Standard Retailer Commission of \$5,200 on sales of \$104,000, the Retailer would receive a total payment of \$6,760 for that Quarter.

* * * * *

(g) The sales growth percentage goals set forth in subsections 8(d) and 8(e) are retroactive to July 1, 2021.

GOVERNOR'S OFFICE

Regulatory Agenda

Executive Order 1996-1 requires all agencies under the jurisdiction of the Governor to submit for publication semi-annually an agenda of regulations under development or consideration.

The agendas are compiled to provide members of the regulated community advanced notice of regulatory activity. It is the intention of the Administration that these agendas will serve to increase public participation in the regulatory process.

Agency contacts should be contacted for more information regarding the regulation and the procedure for submitting comments.

This Agenda represents the Administration's present intentions regarding future regulations. The information provided is current as of August, 2021. The nature and complexity of an individual regulation obviously will determine whether and when any particular regulation listed (as well as any considered subsequent to publication of this Agenda) is published.

<i>Regulation Being Considered</i>	<i>Proposed Date of Promulgation</i>	<i>Need and Legal Basis for Action</i>	<i>Agency Contact</i>
<i>Department of Aging</i>			
Older Adult Daily Living Centers 6 Pa. Code Chapter 11	Summer 2021, as Proposed	The purpose of 6 Pa. Code Chapter 11 is to protect the health, safety and well-being of persons with functional impairments for the licensure and operation of Older Adult Daily Living Centers (OADLC). These regulations—the statutory authority for which is found in Act 118 of 1990 and in 62 P.S. Chapter 2 § 1511—were adopted on July 2, 1993 and effective October 12, 1993. The Pennsylvania Department of Aging is responsible for the enforcement of these regulations. OADLC services provide a structured program of services to clients who require the service along with valuable respite to caregivers. The proposed rulemaking would update the existing regulatory language to address changes in other statutes, regulations, codes, ordinances and other professional standards and practices, along with addressing the increasing frailty of clients served in OADLC.	Barb Valaw (717) 787-4522
Pennsylvania Community Adult Respite Services Program Act 166 of 2014	Summer 2021, as Proposed	Act 166 of 2014 (P.L. 2615, Oct. 22, 2014, No. 166) created a new program called the Pennsylvania Community Adult Respite Services Program (CARP), authorizing the Department of Aging to license and inspect community adult respite services programs that serve participants with minor functional impairments. The purpose of the proposed rulemaking is to provide guidance to persons wishing to provide community adult respite services to eligible persons for part of a 24-hour day, filling a niche between senior centers and older adult daily living centers, as required by Act 166 of 2014.	Barb Valaw (717) 787-4522
<i>Department of Agriculture</i>			
Agricultural Conservation Easement Purchase Program 7 Pa. Code Chapter 138e (# 2-192)	August 2021, as Proposed. The underlying statute has been amended, which will entail a delay and rewrite of the proposed regulation.	The regulation will revise the regulation to address the five amendments of the Agricultural Area Security Law that occurred since 2004, when the regulation was last revised. The revision will accomplish a “housekeeping” update to reflect the Department’s experience in administering the Agricultural Conservation Easement purchase program.	Doug Wolfgang (717) 783-3167

Milk Sanitation 7 Pa. Code Chapter 59a (# 2-194)	August 2021, as Proposed	The regulation will: 1) accomplish a "housekeeping" update to the technical Milk Sanitation regulations; 2) allow for the lawful production and sale of raw milk butter; and 3) lower the maximum permissible somatic cell count for milk.	Sheri Morris (717) 787-4315
State Food Purchase Program 7 Pa. Code Chapter 160 (# 2-195)	July 2021, as Proposed	This regulation will increase the income threshold cap for the Program from the current 150% of the poverty level established by the USDA to 185%.	Caryn Long Earl (717) 772-2688
<i>Department of Banking and Securities (DOBS)</i>			
Promulgation of agency rules of administrative practice and procedure, to be added to Title 10, Part I	Fall 2021, as Proposed	The Department currently uses the General Rules of Administrative Practice and Procedure ("GRAAP"), which contemplate that an agency may promulgate its own rules. 1 Pa. Code § 31.1(c). The agency desires to enact rules more suited to its statutory requirements.	Stefanie Hamilton (717) 787-1471
<i>Department of Community and Economic Development (DCED)</i>			
No regulations being developed or considered at this time.			
<i>Department of Conservation and Natural Resources (DCNR)</i>			
DCNR Plant Regulations Update 17 Pa. Code Chapter 45	Fall 2021/Winter 2022	This rulemaking proposes to amend 17 Pa. Code Chapter 45 by doing the following: 1) updating the classification lists of native wild plants; and 2) updating the scientific and common names of certain native wild plants. Regarding updates to the classification lists of native wild plants, this rulemaking proposes to amend the following classification lists: Pennsylvania Extirpated (§ 45.11); Pennsylvania Endangered (§ 45.12); Pennsylvania Threatened (§ 45.13); Pennsylvania Rare (§ 45.14); and Tentatively Undetermined (§ 45.21). This rulemaking proposes to amend the classification lists in the following ways: 1) adding plants that are currently unclassified, to a classification list; 2) reclassifying plants already on a classification list, to a new classification; and 3) removing plants from the classification lists altogether (declassifying them).	Rebecca Bowen (717) 772-0258 Lisa Maiorana, Esq. (717) 783-0139
<i>Department of Corrections (DOC)</i>			
Inmate Correspondence 37 Pa. Code § 93.2	Fall 2021, as Proposed	Inmate correspondence regulations are being revised to reflect new DOC procedures for processing mail. Preparation of proposed rulemaking package currently underway.	Tracey Tubbs (717) 728-7763
Inmate Visiting Privileges 37 Pa. Code § 93.3	Fall 2021, as Proposed	Inmate visiting privileges regulations are being revised to reflect DOC changes to its visiting policy. Preparation of proposed rulemaking package currently underway.	Tracey Tubbs (717) 728-7763
Purchase for Inmates by Family and Friends 37 Pa. Code § 93.4	Fall 2021, as Proposed	Purchase for inmates by family and friends regulations are being revised for clarification and to more accurately comport with current standards. Preparation of proposed rulemaking package currently underway.	Tracey Tubbs (717) 728-7763

<i>Department of Drug and Alcohol Programs (DDAP)</i>			
Recovery House Regulations 28 Pa. Code Chapter 717 (new)	Summer 2021, as Final-Omitted	Act 59 of 2017 directs DDAP to establish regulations for recovery houses that receive public funds or referrals. Recovery houses provide support to individuals receiving outpatient treatment for substance use disorder who may benefit from supportive housing, a substance-free environment and peer camaraderie. Preparation of the final-omitted regulatory package is completed; delivered to the Independent Regulatory Review Commission on June 14, 2021.	Jordan Lewis (717) 736-7466
<i>Department of Education (PDE)</i>			
Regulations of the State Board of Private Academic Schools 22 Pa. Code Chapters 51, 53, 55, 57, 59, 61 and 63	Winter 2021, as Proposed	These regulations define the requirements for obtaining licensure as a Private Academic School. The Board is in the process of updating the regulations, which were promulgated in 1988. The regulations are promulgated under the authority of the Private Academic Schools Act (24 P.S. § 6701 et. seq.).	Sherri Smith (717) 772-4557
Professional Standards and Practices Commission 22 Pa. Code Chapter 235	Spring 2021, as Final	This chapter sets forth the standards for professional practice and conduct applicable to educators. The regulation updates this chapter to conform to the 2014 amendments to the Educator Discipline Act (24 P.S. § 2070.1a et seq.) and to expound the obligations educators owe to students, colleagues and the profession, with an emphasis on appropriate student-teacher boundaries, electronic communications with students and role model responsibilities. The regulation is promulgated under the authority of sections 5(a)(10) and 5(a)(14) of the Educator Discipline Act (24 P.S. § 2070.5(a)(10) and § 2070.5(a)(14)). The Final Rulemaking was delivered to Independent Regulatory Review Commission and the standing committees on May 12, 2021.	Shane Crosby (717) 787-6576
Department of Education	Winter 2021, as Proposed	These regulations will address the possession and use of medical marijuana by students and employees on the grounds of a preschool, primary school and a secondary school. These regulations are promulgated under authority of the Medical Marijuana Act (2016 Pa. Laws 16).	Sherri Smith (717) 772-4557
Department of Education	Summer 2021, as Final	This regulation will establish the permanent fees for institutions of higher education to participate in the State authorization reciprocity agreement. These regulations are promulgated under authority granted by the Act 35 of 2016 (24 P.S. § 1-124(b)).	Lynette Kuhn (717) 783-8228
Regulations of the State Board of Private Licensed Schools 22 Pa. Code Chapter 73	Fall 2021, as Proposed	These regulations define the requirements for obtaining and maintaining licensure as a Private Licensed School and set outcomes benchmarks. The regulations are promulgated under the authority of the Private Licensed Schools Act (24 P.S. § 6501 et. seq.).	Lynette Kuhn (717) 783-8228

Environmental Protection Performance Standards for Conventional Oil and Gas Operators 25 Pa. Code Chapter 78 (# 7-539)	Quarter 4, 2021, EQB Consideration, as Proposed	This rulemaking proposes to amend the Oil and Gas regulations applicable to conventional operators (Chapter 78) to update the environmental protection performance standards related to oil and gas activities. (2012 Oil and Gas Act, Clean Streams Law, Solid Waste Management Act, Dam Safety Encroachment Act, Land Recycling and Environmental Remediation Standards Act, Radiation Protection Act, Unconventional Well Report Act, Act 126 of 2014)	Kurt Klapkowski (717) 772-2199 kklapkowski@pa.gov
Waste Management and Related Issues at Conventional Oil and Gas Well Sites 26 Pa. Code Chapter 78 (# 7-540)	Quarter 1, 2022, EQB Consideration, as Proposed	This proposed rulemaking relates primarily to the proper management of waste generated at conventional oil and gas well sites. The purpose of this regulation is to update the performance standards for surface activities at conventional well sites to ensure that these activities are conducted in a manner that protects the health, safety, and environment and property of Pennsylvania's residents.	Kurt Klapkowski (717) 772-2199 kklapkowski@pa.gov
Administration of the Land Recycling Program 25 Pa. Code Chapter 250 (# 7-552)	Quarter 3, 2021, IRRC Consideration, as Final	The rulemaking proposes to amend 25 Pa. Code Chapter 250 to update the medium specific concentrations (MSCs) established under the Statewide health standard based on the most recent published scientific information. MSCs are concentrations of contaminants in soil and groundwater that are protective of human health and the environment under various exposure scenarios. This rule also proposes to add MSCs for three new contaminants, including Perfluorooctanoic Acid (PFOA), Perfluorooctane Sulfonate (PFOS), and Perfluorobutane Sulfonate (PFBS). These contaminants are within the Per- and Poly-fluoroalkyl Acid (PFAS) family of compounds for which the U.S. Environmental Protection Agency (EPA) has published toxicological data. These regulations identify the formulas DEP must use to calculate MSCs and the sources of the toxicological information. This rulemaking also proposes to clarify administrative elements of Chapter 250. DEP is required by § 250.11 to propose appropriate MSC changes based on current scientific information no more than 36 months after the effective date of the most recently promulgated MSCs. Administration of the Land Recycling Program 25 Pa. Code Chapter 250 (# 7-572)	Quarter 1, 2022, EQB Consideration, as Proposed	The rulemaking proposes to amend 25 Pa. Code Chapter 250 to update the medium specific concentrations (MSCs) established under the Statewide health standard based on the most recent published scientific information. MSCs are concentrations of contaminants in soil and groundwater that are protective of human health and the environment under various exposure scenarios. This rule will focus on updates to the models used to calculate the MSCs for lead in soil and potential changes to how the MSCs for vanadium and PAH's are calculated. These regulations identify the formulas DEP must use to calculate MSCs and the sources of the toxicological information. This rulemaking also proposes to clarify administrative elements of Chapter 250. DEP is required by § 250.11 to propose appropriate MSC changes based on current scientific information no more than 36 months after the effective date of the most recently promulgated MSCs. Radiation Safety Requirements for Non-Healing Arts Radiation Generating Devices 25 Pa. Code Chapters 227 and 228 (# 7-555)	Quarter 3, 2021, Publication, as Proposed	This rulemaking proposes to update Chapter 227 to stay current with advances that have occurred in the uses of non-medical X-ray equipment. The revisions will ensure consistency with other government agencies that similarly regulate these devices. (Radiation Protection Act)	John Chippo (717) 787-2480 jchippo@pa.gov
Administration of Sewage Facilities Program 25 Pa. Code Chapters 71—73 (# 7-570)	Quarter 1, 2022, EQB Consideration, as Proposed	This rulemaking proposes to update 25 Pa. Code Chapters 71—73 to implement recent amendments to the Pennsylvania Sewage Facilities Act made by Act 26 of 2017 and Act 34 of 2020, and to address a number of other issues in these regulations, which were last revised significantly in 1997. The regulatory revisions in this proposed rulemaking will include site suitability criteria for sites with shallow soils, which will provide additional opportunities for new land development in a manner that provides safe, effective long-term sewage disposal. This proposed rulemaking will also include other regulatory revisions and updates to ensure that the planning, permitting, operation and maintenance of sewage facilities sufficiently protect public health and safety, the waters of the Commonwealth, and property values. Water Quality Standard for Manganese 25 Pa. Code Chapters 93 and 96 (# 7-553)	Quarter 1, 2022, EQB Consideration, as Final	This rulemaking proposes to address a provision regarding the water quality standards for manganese included in Act 40 of 2017. This rulemaking proposes to amend 25 Pa. Code Chapter 93 (relating to water quality standards) and 25 Pa. Code Chapter 96 (relating to water quality standards implementation). The amendments propose to delete manganese	Michael Lookenbill (717) 783-2959 mlookenbil@pa.gov

		from Table 3 at § 93.7 (relating to specific water quality criteria) and add manganese to Table 5 at § 93.8c (relating to human health and aquatic life criteria for toxic substances). Also, the amendments propose two alternatives for a point of compliance with the manganese water quality standard: the point of all existing or planned surface potable water supply withdrawals; or all surface waters (i.e., near the point of discharge). Water Quality Standards—Dunbar Creek et al. Stream Redesignations 25 Pa. Code Chapter 93 (# 7-557)	Quarter 3, 2021, Publication, as Proposed	The regulatory changes included in this rulemaking are the result of stream evaluations conducted by DEP in response to petitions submitted by citizens and data collected by the Department. In this rulemaking, redesignations rely on § 93.4b(a) and (b) to qualify one water for High Quality (HQ) and seven waters for Exceptional Value (EV) as well as correct the erroneous HQ designation of UNT Oley Creek to remove HQ. One water will be redesignated from Trout Stocking to Cold Water Fishes. Based on these data and appropriate regulatory criteria, DEP developed this package of stream redesignations including HQ stream redesignations in the Delaware, Susquehanna and Ohio River basins. Water Quality Standards for Site-Specific Criteria 25 Pa. Code Chapter 93 (# 7-571)	Quarter 1, 2022, EQB Consideration, as Proposed	This rulemaking proposes to update 25 Pa. Code Chapter 93 with site-specific water quality criteria for methylmercury for unnamed tributaries to Rambo Run and Ebaughs Creek located in York County. In addition, proposed updates will revise provisions to allow for a more efficient regulatory review process to incorporate site-specific criteria into the water quality standards in 25 Pa. Code Chapter 93, which would allow site-specific criteria to be incorporated into National Pollutant Discharge Elimination System (NPDES) permits more quickly. Water Quality Management and NPDES Permit Application Fees and Annual Fees 25 Pa. Code Chapters 91 and 92a (# 7-533)	Quarter 3, 2021, Publication, as Final	This rulemaking proposes to amend fees related to water quality management permitting (Chapter 91) and proposes to amend the fee schedule for NPDES permit applications (Chapter 92a). Chapter 91 establishes, among other things, a water quality management (WQM) permitting program for the construction of sewage and industrial waste treatment facilities and for land application of sewage and industrial wastes. DEP began its Chapter 92a annual invoicing and fee collection program in December 2010. Chapter 92a updated the fee schedule for NPDES permit applications for persons to discharge pollutants from point sources into surface waters. In addition, Chapter 92a introduced an annual	Sean Furjanic (717) 787-2137 sefurjanic@pa.gov

		fee for certain facilities authorized to discharge pollutants by individual NPDES permits. A fee analysis that DEP presented to the EQB in 2014 highlighted that, despite the fee increase in 2010, revenue continues to fall short of expenses, impeding the work of Programs to carry out necessary tasks for protecting water resources in the Commonwealth. National Pollutant Discharge Elimination System (NPDES) Program and Combined Sewer Overflows (CSO) 25 Pa. Code Chapter 92a (# 7-563)	Quarter 3, 2021, EQB Consideration, as Proposed	This rulemaking proposes to amend 25 Pa. Code § 92a.51(a) to provide an exception for combined sewer overflows (CSO) dischargers with approved long-term control plans (LTCPs) to comply with water quality standards in accordance with the schedule contained in the approved LTCPs allowing renewals of NPDES permits for CSOs to move forward. Control of VOC Emissions from Oil and Natural Gas Sources 25 Pa. Code Chapter 129 (# 7-544)	Quarter 4, 2021, EQB Consideration, as Final	This rulemaking proposes to establish emission limitations and other requirements codified in 25 Pa. Code Chapter 129 consistent with reasonably available control technology (RACT). The rulemaking establishes RACT requirements for volatile organic compounds and other pollutants from existing oil and natural gas production facilities, compressor stations, processing plants and transmission stations. Upon promulgation, the final-form regulation will be submitted to the EPA for approval as a SIP revision. (Air Pollution Control Act)	Viren Trivedi (717) 783-9476 vtrivedi@pa.gov
Control of VOCs from Gasoline Dispensing Facilities (Stage I and Stage II) 25 Pa. Code Chapters 121 and 129 (# 7-525)	Quarter 3, 2021, EQB Consideration, as Final	This rulemaking proposes to remove the requirement to install new Stage II vapor recovery systems and establish procedures for the decommissioning of existing Stage II vapor recovery systems. Stage II systems that are not decommissioned will be required to comply with existing Stage II regulatory maintenance requirements. Industry standards for Stage I and Stage II vapor leak monitoring and relating measures will be added for small gasoline storage tanks. Upon promulgation, the final-form regulation will be submitted to the EPA for approval as a SIP revision. (Air Pollution Control Act)	Chris Trostle (717) 772-3926 dtrostle@pa.gov

Additional RACT Requirements for Major Sources of NO _x and VOCs for the 2015 Ozone NAAQS 25 Pa. Code Chapters 121 and 129 (# 7-561)	Quarter 3, 2021, Publication, as Proposed	This proposed rulemaking would be part of the Commonwealth's demonstration to fulfill the RACT requirements for the 2015 8-hour ozone NAAQS. This proposed rulemaking would establish additional presumptive NO _x and VOC RACT requirements and RACT emission limitations for certain major stationary sources of NO _x and VOC emissions. Upon promulgation, the final-form regulation would be submitted to the EPA for approval as a SIP revision. (Air Pollution Control Act)	Viren Trivedi (717) 783-9476 vtrivedi@pa.gov
CO ₂ Budget Trading Program 25 Pa. Code Chapter 145 (# 7-559)	Quarter 3, 2021, EQB Consideration, as Final	This rulemaking proposes to amend 25 Pa. Code Chapter 145 (relating to interstate pollution transport reduction) by adding Subchapter E (relating to CO ₂ budget trading program). This rulemaking establishes a cap on carbon dioxide (CO ₂) emissions from fossil fuel-fired electric generating units in Pennsylvania, with a nameplate capacity equal to or greater than 25 megawatts (MWe). This rulemaking allows Pennsylvania to participate in the Regional Greenhouse Gas Initiative by establishing the Pennsylvania component of the CO ₂ Budget Trading Program which is designed to reduce anthropogenic emissions of CO ₂ , a greenhouse gas, in a manner that is protective of public health, welfare and the environment and is economically efficient. VOC RACT Requirements for Certain CTG Source Categories for the 2015 Ozone NAAQS 25 Pa. Code Chapters 121 and 129 (# 7-568)	Quarter 3, 2021, EQB Consideration, as Proposed	This proposed rulemaking would be part of the Commonwealth's demonstration to fulfill the RACT requirements for the 2015 8-hour ozone NAAQS. This proposed rulemaking would establish presumptive VOC RACT requirements and RACT emission limitations for these CTG source categories: shipbuilding and ship repair surface coating; synthetic organic chemical manufacturing industry air oxidation, distillation and reactor processes; and large petroleum dry cleaners. Upon promulgation, the final-form regulation would be submitted to the EPA for approval as a SIP revision. (Air Pollution Control Act)	Randy Bordner (717) 772-3921 ranbordner@pa.gov
Amendments to the Pennsylvania Clean Vehicles Program 25 Pa. Code Chapter 126, Subchapter D (# 7-567)	Quarter 4, 2021, EQB Consideration, as Proposed	This proposed rulemaking would establish a requirement for automakers to offer for sale a percentage of ZEV Program-eligible light duty vehicles as part of their model offerings. With the availability of more non-emitting vehicles available to Pennsylvania's residents for purchase and the opportunity for residents to replace existing gasoline-powered or diesel-powered light-duty vehicles with non-emitting vehicles, emissions of criteria and toxic air pollutants and GHGs would be reduced from Pennsylvania's air. Vehicles are a significant contributor to air pollution and this proposed rulemaking would improve ambient air quality and reduce the adverse effects of vehicle air pollution on public health and welfare, including the	Chris Trostle (717) 772-3926 dtrostle@pa.gov

Revisions under consideration include, inter alia: Amendments to 25 Pa. Code §§ 963.1—963.20 to be consistent with statutory revisions imposed by P.L. 51, No. 16, enacted June 19, 2013, the Federal Water Resources Reform and Development Act of 2014, and guidance revisions implemented by the Department of Environmental Protection, to reflect updates to business practices, and to incorporate any provisions necessary to accommodate for the deletion of 25 Pa. Code § 965 in its entirety, including, but not limited to the following: (1) Amend 25 Pa. Code § 963.12(a)(1) by revising the section to provide for the eligibility of certain interior plumbing costs. (2) Delete 25 Pa. Code § 963.12(a)(3) and § 963.12(c)(3) thereby allowing PENNVEST to provide financial assistance (loan and grant) for costs associated with the purchase of land that qualify as eligible costs under § 963.11(a)(4). (3) Delete 25 Pa. Code § 963.12(a)(7) thereby allowing PENNVEST to provide financial assistance (loan and grant) for costs associated with the extraction for profit of minerals or other resources from wastewater or sludge whether the project is sponsored by a public or private actor. (4) Amend 25 Pa. Code § 963.13(c) by revising the section to provide for an amortization of advance funding loans with a term of 59 months of interest only and repayment of principal and interest on the 60th month. (5) Delete 25 Pa. Code § 963.13(e) requiring PENNVEST to set aside 10% of the available finance assistance for advance funding assistance due to a lack of demand. (6) Amend 25 Pa. Code § 963.15(a) by revising the first sentence to provide for a change in the normal loan term to allow 3 years of interest only prior to principal amortization. (7) Amend 25 Pa. Code § 963.15(c)(5) to provide that maximum interest rates on loans shall be determined based upon the unemployment rate for the applicable county in the most recent calendar year for which data has been finalized as of the application cutoff date. INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b).

The Commission has issued comments on the following proposed regulation. The agency must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

57-330	Pennsylvania Public Utility Commission Rulemaking to Implement Act 120 of 2018 51 Pa.B. 1802 (April 3, 2021)	7/1/21	8/2/21

Pennsylvania Public Utility Commission Regulation # 57-330 (IRRC # 3298)

Rulemaking to Implement Act 120 of 2018

August 2, 2021

We submit for your consideration the following comments on the proposed rulemaking published in the April 3, 2021 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (RRA) (71 P.S. § 745.5b). Section 5.1(a) of the RRA (71 P.S. § 745.5a(a)) directs the Pennsylvania Public Utility Commission (PUC) to respond to all comments received from us or any other source.

1. Economic or fiscal impacts; Reasonableness; Implementation.

A commentator expresses concern that several of the PUC's proposed regulations will have the effect of creating confusing and conflicting requirements for entities seeking recovery under Act 120 of 2018 (Act 120) (66 Pa.C.S. § 1311(b)) because the PUC is being too prescriptive in its proposed regulations. This commentator notes that it is subject to the PUC's jurisdiction and is also subject to drinking water, environmental and operational standards established by the Pennsylvania Department of Environmental Protection (DEP) and the United States Environmental Protection Agency (EPA). Lead service lines (LSLs) are the subject of the EPA Lead and Copper Rule (LCR) which is enforced by DEP. The commentator explains,

Environmental regulations direct actions and requirements related to LSL remediation efforts and range from a health-based "action level" to inventory, sampling, LSL replacement and customer notification requirements. The EPA published National Primary Drinking Water Regulations: Lead and Copper Rule Revisions (LCRR) in the Federal Register on January 15, 2021. The LCRR are slated to become effective on June 17, 2021, and establish a compliance date of January 16, 2024. The LCRR will modify existing requirements related to LSL replacements and will impact how entities structure their LSL replacement programs.

The commentator's primary concern as it pertains to LSLs is that the PUC's proposed regulations would establish requirements that do not align with the LCRR. The commentator asserts that it is not appropriate for the PUC to claim jurisdiction over inventory, replacement and customer notification requirements, and other water qual-

ity issues that have been specifically addressed in environmental regulations. The commentator is concerned that entities that work to comply with the LCRR and elect to seek recovery under Act 120 will face unnecessary challenges in meeting different directives in overlapping regulations.

Acknowledging that, as of the date of the release of these comments, the effective date of the LCRR has been delayed until December 16, 2021, we ask the PUC to ensure that the final regulation aligns with the LCRR to the extent that the PUC deems appropriate. We ask the PUC to explain how implementation of the final regulation minimizes fiscal impacts for entities seeking recovery under Act 120.

2. Section 65.52. Definitions.—Protection of public health, safety and welfare; Clarity; Reasonableness.

"Customer-owned lead service line"

"Customer-owned lead service line" is defined as "the portion of the lead service line extending from the curb, property line or entity connection to an entity's water meter or, if the entity's meter is located outside of the structure or water is not metered by the entity, at the first shutoff valve located within the structure." Commentators' feedback illustrates that utilities define the customer-owned portion of the service line differently. We ask the PUC to amend the definition in the final regulation to ensure clarity for the regulated community.

"LSL—Lead service line"

The PUC defines "LSL" as "a service line made of lead that connects the water main to a building inlet and a lead pigtail, gooseneck or other fitting that is connected to the lead line." Commentators note that the definition of LSL does not include service lines made of galvanized iron or galvanized steel as defined by the LCRR. We ask the PUC to amend the definition and modify any other portions of the final regulation as necessary to support this definition.

"LSLR Project Area—Lead service line project area"

The proposed regulation includes a definition for "LSLR—Lead service line replacement." We ask the PUC

to revise the heading of the definition of “LSLR Project Area—Lead service line project area” to include the word “replacement.”

A “LSLR Project Area” is defined as “the area served by an entity located within a 1-mile radius of a lead service line replacement project.” Commentators assert that a one-mile radius may be too burdensome for entities and that the one-mile distance qualifier would create a patchwork of qualifying customers. We ask the PUC to explain how the definition in the final regulation reasonably protects the public health, safety and welfare.

“Service line”

The proposed regulation defines “service line” as “the pipe and appurtenances which connect any main to an entity’s water meter or, if the entity’s water meter is located outside of the structure or the connection is not metered by the entity, at the first shutoff valve located within the structure.” A commentator notes that the first shutoff valve may be located on the opposite side of where the service line is brought in to the structure. We ask the PUC to clarify the definition in the final regulation to ensure that LSLRs are conducted in an efficient and cost-effective manner.

3. Section 65.53. Time to replace LSLs.—Economic or fiscal impacts; Protection of public health, safety and welfare; Reasonableness; Implementation.

The language proposed under Subsections (a) and (b) imposes a maximum timeframe of 25 or 30 years (the timeframe being dependent upon the classification of an entity) for removal and replacement of all LSLs within or connected to its water distribution systems. A commentator asserts that due to the acute risk to consumer health and safety the PUC should reduce the lengthy timeline to ten years, and notes that the entire cost of LSLR programs does not need to be recovered within the same timeframe for replacement. We ask the PUC to explain the reasonableness of the implementation timeframe in the final regulation and how it protects the public health, safety and welfare while balancing the fiscal impacts.

4. Section 65.55. LSLR Program requirements.—Clarity; Reasonableness; Implementation.

Under Subsection (a), an entity must file a LSLR Program within one or two years (the timeframe depending upon the classification of the entity) of the effective date of this section. How does this requirement impact an entity that has an existing program? A commentator asserts that creation of a LSLR Program will be challenging and of limited value for entities that do not have an inventory in place. The commentator asks for a timeframe consistent with the requirements set forth in the LCRR. We ask the PUC to explain how the implementation requirements of this provision in the final regulation are reasonable and will impact existing programs.

Subsection (d) states, “After initial PUC approval of an entity’s LSLR Program, the LSLR Program must be subject to review in all future base rate cases. An entity shall submit any modification to the LSLR Program for review with its base rate case.” Commentators assert that a LSLR Program should not be required to be reviewed in each base rate case, and that an entity should be able to file a petition to modify its LSLR Plan or a proposed tariff revision pursuant to 66 Pa.C.S. § 1308(a). Commentators assert that changes by DEP or EPA could force an entity to violate the LCR or its approved LSLR Plan if a change cannot be made outside of the base rate case. Is it the PUC’s intent to limit opportunities for the submission of

modifications? We ask the PUC to clarify the final regulation or explain the reasonableness of requirements in the final regulation. This comment applies to similar language in Section 66.35(c) (relating to [damaged wastewater service lateral (DWSL)] Program requirements).

5. Section 65.56. LSLR Plan requirements.—Public health, safety and welfare; Clarity; Need; Reasonableness.

Subsection (a) Service Line Inventory.

Under Paragraphs (a)(1) and (2), the PUC provides entities with timelines for completing a Service Line Inventory. A commentator expresses concern regarding the definition of “complete,” asserting that the LSLR should only be deemed complete when full remediation and restoration efforts have occurred. We ask the PUC to clarify how completion of the LSLR will be determined.

Under Subparagraph (a)(4)(i), an entity’s Service Line Inventory must “[i]dentify the material type of all entity-owned and customer-owned service lines within and connected to the entity’s distribution system.” Under Subparagraph (a)(4)(ii), the inventory must “be grouped by material type and diameter.” A commentator asserts that the purpose of Act 120 is to find and replace lead service lines, and that the identification of “not lead” should suffice since that is consistent with the LCR. The commentator states that the service line material and diameter are not needed. What is the need for identifying and grouping by material types? If this language is retained in the final regulation, we ask the PUC to explain the reasonableness of and need for collecting this information, and to clarify what is meant by the term “grouped.”

Subsection (b) Planning and replacements.

Paragraph (b)(10) addresses how an entity will document the procedure regarding a customer’s refusal of, or failure to accept, the offer by the entity to replace a LSL.

Under Subparagraph (b)(10)(ii) an entity must “[i]nform the customer that refusal or failure to accept will require the customer to replace the customer-owned LSL, at the customer’s expense, *within 1 year of commencement of an entity’s LSLR Project* within a LSLR Project Area in order to be eligible for reimbursement.” (Emphasis added.) Is this one year prior to or after commencement? What marks a project’s commencement? We ask the PUC to clarify what is meant by “within one year” and the phrase “commencement of an entity’s LSLR Project.” This comment also applies to Section 65.58(d) (relating to pro forma tariff or tariff supplement requirements), as well as similar language in Sections 66.36(a)(9)(ii) (relating to DWSL Plan requirements) and 66.38(d) (relating to pro forma tariff or tariff supplement requirements).

In Subparagraph (b)(10)(iii), an entity must “[c]ommunicate to the customer that failure to allow the entity to complete the LSLR or to replace the customer-owned LSL concurrent with the entity replacing the entity-owned LSL will lead to termination of water service under the provisions of the entity’s tariff.” Commentators express concern regarding the scenario where a landlord’s failure to respond or refusal to accept a LSLR places tenants at an increased risk of lead exposure and/or the loss of critical water services to their homes. The commentator suggests step-in rights for entities to provide LSLRs in such circumstances. We ask the PUC to clarify this section and other relevant provisions in the final regulation to ensure protection of the public health, safety and welfare in scenarios where inaction or refusal by a landlord may harm others.

Subsection (c) Communications, outreach, and education.

Subparagraph (c)(1)(i) requires an entity's LSLR Plan to describe how the entity will "[p]rioritize LSLR efforts to target sensitive populations as defined by the [EPA] or [DEP]. . . ." A commentator states that it is not aware of any EPA or DEP regulation that defines "sensitive populations." We ask the PUC to include where the regulated community can locate a definition of "sensitive populations" or clarify how the term is to be defined in the final regulation.

Subparagraph (c)(1)(iv) requires an entity's LSLR Plan to describe how the entity will "[e]nsure that relevant information will be provided to *all bill-paying customers and persons that receive drinking water from the entity.* . . ." (Emphasis added.) A commentator expresses concern regarding notifying a bill-paying customer who is not the property owner and requests more specificity regarding what is required in a landlord/tenant situation. Another commentator asks that this provision be amended to be consistent with the LCRR, requiring notification only to those served by LSLs and service lines of unknown material. The commentator notes that including those who do not have LSLs could cause confusion and would incur unnecessary costs. We ask the PUC to clarify this provision in terms of what is required in situations where the bill-payer is not the owner to ensure protection of the public health, safety and welfare. Also, we ask the PUC to explain the need for and reasonableness of notifying all bill-paying customers and persons that receive drinking water rather than targeting those who would be impacted. This comment also applies to the similar provision in Section 66.36(b)(1)(iii) (relating to DWSL Plan requirements).

Subparagraph (c)(1)(v) requires an entity's LSLR Plan to describe how the entity will "[p]rovide customers with copies of as-built drawings or similar depictions that indicate the location of the LSLR on the property between the customer's structure and the curb stop. An entity shall make a good faith effort to provide customers with relevant documents associated with the LSLR." A commentator states that it is unlikely to have as-built drawings of each customer's service line, and further asserts that sharing such information could pose a security risk to utility infrastructure. What is the need for providing a drawing or depiction of service lines? What are the "relevant documents associated with the LSLR"? We ask the PUC to explain the need for these provisions or amend the final regulation.

6. Section 65.57. Periodic review of LSLR Plan.—Implementation.

A commentator states that there should come a point in time when an entity has completed its LSLR Plan and obligations in the Chapter 65 regulations dissipate. We ask the PUC to amend the final regulation to establish implementation procedures for completion of a LSLR Plan.

7. Section 65.58. Pro forma tariff or tariff supplement requirements.—Economic or fiscal impacts; Protection of public health, safety and welfare; Clarity; Reasonableness; Implementation.*Subsection (a) LSLR Program annual cap.*

An entity's pro forma tariff or tariff supplement containing proposed changes necessary to implement the entity's LSLR Program must address certain items. Paragraph (a)(1) states, "An entity's pro forma tariff or tariff supplement must include a cap on the *maximum number* of customer-owned LSLs that can be *replaced* annually."

(Emphasis added.) We note that this cap is described as a maximum number of replacements. However, Paragraph (d)(2) states, "If the *value of reimbursements* would cause the entity to exceed its annual budgeted cap on the number of LSLRs, the entity's annual budgeted cap for LSLRs for the following year must be reduced by this amount." (Emphasis added.) Is the annual cap based on the number of replacements or the value of reimbursements? If the annual cap is based on the number of replacements, how does the value of reimbursements impact the annual cap? We ask the PUC to explain these seemingly conflicting provisions of the LSLR Program annual cap in the Preamble to the final regulation. This comment also applies to similar provisions in Sections 66.38(a) and (d)(2) (relating to pro forma tariff or tariff supplement requirements).

Subsection (b) Service line demarcation.

Paragraph (b)(3) states, "An entity shall use the LSLR process to perfect the entity's ownership of the portion of the service line located within the then-existing right-of-way to ensure that the entity can obtain necessary permits." A commentator questions how an entity is to use the LSLR process to achieve the directed outcome. We ask the PUC to clarify this provision in the final regulation.

Subsection (c) Partial LSLRs.

Paragraph (c)(1) states, "Neither a property owner nor a bill paying customer may install a partial LSLR. A partial LSLR must result in termination of service until such time as the entity can replace the entity-owned LSL under [Section] 65.62 (relating to prohibition on partial LSLRs)." Several commentators express concern relating to termination of service. A commentator notes that terminating service for refusal to allow an entity to replace a customer-side LSL, or discovery of a partial replacement, will present difficulties for entities administering a LSLR. Another commentator asserts that the PUC should allow an entity to propose termination protocols based on the specific circumstances and service territory which will allow for different approaches where termination is not feasible or otherwise not appropriate. We ask the PUC to explain the reasonableness of requiring termination of service for a partial LSLR and how the final regulation protects the public health, safety and welfare.

Paragraph (c)(3) states, "Applicants for water service at a property where a customer previously refused or failed to accept an entity's offer of a LSLR may not be permitted to connect to the entity-owned service line until the applicant verifies the replacement of the customer-owned LSL by providing a paid invoice from a contractor *licensed to perform LSLR work in the Commonwealth* where applicable or a verified statement from the contractor attesting to completion of the LSLR." (Emphasis added.) A commentator questions the phrase "licensed to perform LSLR work in the Commonwealth" because the commentator is not aware of any such licensing requirements. We ask the PUC to clarify this provision in the final regulation. This comment also applies to Subsection (d)(1)(iii)(B) and Section 66.38(d)(1)(iii)(B) (relating to pro forma tariff or tariff supplement requirements).

Also related to Paragraph (c)(3), a commentator states that it seems that a utility is allowed to perform the partial LSLR provided that the customer's service has been terminated, which appears to contradict the requirements set forth in proposed Section 65.62 (relating to prohibition on partial LSLRs). We ask the PUC to explain how implementation of these two provisions is consistent.

Subsection (d) Reimbursements.

Clause (d)(1)(iii)(A) states, “Customers located within a LSLR Project Area are eligible for a reimbursement of LSLR expenses up to 125% of the average cost the entity would have incurred to perform the replacement of a similarly-sized service line, not to exceed the customer’s actual cost.” Some commentators assert that the provision should reflect that customers would be eligible for reimbursement at the lower of the customer’s actual cost or what the entity would have incurred to perform the replacement. However, another commentator states that the PUC’s proposed language appropriately recognizes that a customer’s costs to replace a LSL may exceed the entity’s cost to replace because the customer is unlikely to generate the same economies of scale as the entity. We ask the PUC to explain the reasonableness of the proposed language related to customer reimbursement in the final regulation. This comment applies similarly to Section 66.38(d)(1)(iii)(A) (relating to pro forma tariff or tariff supplement requirements).

Subsection (e) Warranty.

Subsection (e) states, “An entity’s pro forma tariff or tariff supplement must provide a warranty on LSLR work performed of a term of not less than 2 years.” Commentators request clarification that the warranty would not apply to a customer-side LSL replaced by someone other than the entity or the entity’s contractors. We ask the PUC to clarify this provision in the final regulation. This comment applies to Section 66.38(e) (relating to pro forma tariff or tariff supplement requirements), as well.

8. Section 65.59. LSLR Program Reports.—Need; Reasonableness.

Subsection (a) provides requirements for a LSLR Program Report to be filed by an entity with an approved LSLR Program. The PUC proposes to require an entity’s LSLR Program Report to identify thirteen items from the preceding year’s activities. Commentators assert that several of the proposed metrics are not necessary or useful information for an entity’s lead remediation efforts. For example, a commentator states that it is irrelevant to capture the length and pipe diameter of LSLs replaced. The commentator points out that certain data points, such as “actual cost of each LSLR by county” and “total annual LSLR expenditures for the calendar year by customer class” can be difficult to determine. We ask the PUC to explain the need for and reasonableness of the items required for the LSLR Program Reports in the final regulation.

9. Section 65.60. Accounting and financial.—Statutory authority; Economic or fiscal impacts; Reasonableness.

Subsection (b) states, “An entity may defer:

(1) Income taxes related to no cost and low-cost sources of funding for LSLRs, including applicable income taxes on contributions-in-aid-of-construction and/or below-market rate loans, for accounting purposes to the extent that such costs are not recovered through the entity’s existing base rates or [distribution system improvement charge]. Prudent and reasonable deferred income taxes must be amortized over a reasonable period of time with a return on the entity’s investment.

(2) Service line inventory, LSLR program development, LSLR Plan, LSLR Program Report, and reimbursement expenses for accounting purposes to the extent that such costs are not recovered through the entity’s existing base rates. Prudent and reasonable deferred expenses must be

amortized over a reasonable period of time without a return on the entity’s investment, unless the PUC, under 66 Pa.C.S. § 523 (relating to performance factor consideration), finds that providing a return on the entity’s investment is warranted based on sufficient supporting data submitted by the entity in its rate case filing.”

A commentator asserts that LSLRs should not be recorded as intangible assets. Another commentator asserts that this section goes beyond the requirements of Act 120, which does not authorize utilities to defer income taxes or expenses related to the implementation of these requirements. The commentator expresses further concerns related to the language in Paragraph (b)(1) that would permit a return on the entity’s investment. The commentator states that it is not appropriate for the utility to earn a return on operating expenses and is contrary to sound ratemaking principles. We ask the PUC to provide its statutory authority regarding tax deferment and explain the reasonableness of the fiscal impacts of these provisions in the final regulation. This comment applies to similar language in Section 66.40(b) (relating to accounting and financial).

10. Section 65.61. Preexisting LSLR activities.—Clarity.

This section addresses an entity that received prior PUC approval to perform LSLR activities. A commentator asks for clarification regarding an entity that has a pending rate case before the PUC at the time that these regulations go into effect. We ask the PUC to ensure that the final regulation clarifies these procedures.

11. Section 65.62. Prohibition on partial LSLRs.—Economic or fiscal impacts; Protection of public health, safety and welfare; Clarity; Reasonableness.

In part, this section states, “The following provisions must apply after the effective date of this section:

(a) Where a customer elects to replace a customer-owned LSL, an entity shall replace the connected entity-owned LSL concurrent with the customer’s replacement of the customer-owned LSL, subject to the following:

(1) A Class A public utility or authority shall replace the entity-owned LSL within 90 days of the date of the customer’s request or on the LSLR date specified by the customer, whichever is later.

(2) A Class B or Class C public utility or a municipal corporation shall replace the entity-owned LSL within 180 days of the date of the customer’s request or on the LSLR date specified by the customer, whichever is later.”

A commentator asserts that there is some confusion as to when a utility’s obligation is triggered to replace a LSL. The commentator states that under Subsection (a), it appears that a utility is required to replace its portion of the LSL within a certain time period if the customer provides notice to the utility that it will be replacing the customer-owned portion. This could be problematic if the utility has not yet developed economies of scale in a particular area, or if such requirements would unreasonably burden the utility’s prioritized replacements and schedule. We ask the PUC to clarify this provision in the final regulation or explain the reasonableness of the fiscal impacts if the language remains unchanged at final.

As noted previously, commentators express concerns over termination provisions such as in Subsection (c) which states, “If a customer refuses, or fails to accept, an entity’s offer to replace a customer-owned LSL, the entity shall replace the entity-owned portion of the LSL in

accordance with the entity's LSLR Plan and terminate service in accordance with the entity's tariff." Particular concerns exist related to landlord/tenant and tangled title scenarios. Commentators note the potential harm from terminating water service may also pose health and safety risks. We ask the PUC to ensure protection of the public health, safety and welfare in this provision of the final regulation, particularly in scenarios where inaction or refusal by a landlord or a tangled title may harm others.

Annex B

Chapter 66. Wastewater Service

Subchapter B. Damaged Wastewater Service Laterals

12. Section 66.32. Definitions.—Protection of public health, safety and welfare; Clarity; Reasonableness.

"Customer"

The PUC proposes to define "customer" as "a party contracting with a public utility for service." A commentator questions whether this definition adequately captures who has the responsibility or ownership over the DWSL in the case of a landlord/tenant or tangled title situation. We ask the PUC to clarify the term in the final regulation or explain how the definition in the final regulation protects the public health, safety and welfare.

"Company's service lateral" and *"Customer's service lateral"*

The proposed regulation defines "company's service lateral" as "the portion of a service lateral owned by the company, extending from a main to the inlet connection of a customer's service lateral at the curb or property line," and defines a "customer's service lateral" as "the portion of a service lateral owned by the customer, most often extending from the curb, property line or utility connection to a point 2 feet away from the face of the foundation of the structure." A commentator states that all laterals in its service territory are owned and are the responsibility of the customer or property owner. Another commentator submits that it may be more appropriate to allow each entity to define this term in a way that best suits the entity's circumstances and service territory. We ask the PUC to explain why the definition in the final regulation is reasonable and how it protects the public health, safety and welfare.

"DWSL—Damaged wastewater service lateral"

The PUC defines "DWSL" as "a customer's service lateral containing a single area or a combination of several areas, acting collectively, identified by visual or other means, along the length of the lateral which has or have been determined to significantly impair the intended function of the customer's service lateral to convey wastewater flow to the company's service lateral and keep inflow and infiltration flows, within reason, out of the customer's service lateral." A commentator asserts that replacement efforts should be focused on situations in which the portion of private laterals in the public right-of-way fail or are damaged because such failures can cause harm to the public in the form of sinkholes, contamination to surrounding areas and potential harm to private properties. The commentator notes, however, that these types of situations do not necessarily create inflow and infiltration issues. We ask the PUC to explain how the definition in the final regulation protects the public health, safety and welfare generally, as well as specifically in situations which may be unrelated to inflow and infiltration issues.

13. Section 66.33. DWSL Program parameters.—Protection of public health, safety and welfare.

Subsection (b) states that "[a]n entity's purpose for petitioning the [PUC] for approval of a DWSL Program shall be linked to" certain conditions related to excessive inflow and infiltration or wastewater overflows. A commentator suggests adding an option for a situation in which the damaged lateral is otherwise creating a public health and/or safety hazard, and permitting an entity to file an amendment to its approved long-term infrastructure improvement plan (LTIIP) after the PUC approves its plan. We ask the PUC to amend this provision or explain how retaining the proposed language at final protects the public health, safety and welfare.

14. Section 66.34. Petitioning the [PUC] for a DWSL Program.—Clarity; Reasonableness.

Subsection (b) states, "An entity that has a [PUC]-approved LTIIP shall include with its DWSL Program petition a modified LTIIP containing a DWSL Plan as a separate and distinct component of the entity's LTIIP." A commentator asks for the opportunity to file for an amendment to its LTIIP after its DWSL Program petition is approved by the PUC. Is it the PUC's intent to limit opportunities for modifications? We ask the PUC to clarify the final regulation or explain the reasonableness of this requirement.

15. Section 66.38. Pro forma tariff or tariff supplement requirements.—Protection of public health, safety and welfare.

Paragraph (d)(4) states, "A customer's refusal of a DWSL replacement offer by the entity does not negate the customer's ability to submit for reimbursement in accordance with the entity's reimbursement procedure once the customer has independently replaced a DWSL." A commentator raises the issue of whether a customer should be able to refuse to accept an offer to replace a private wastewater lateral where the reason for the replacement is to reduce or eliminate a public health or safety risk. The commentator suggests amending the final regulation similar to the termination language related to water service. However, we again note concerns related to the impacts of termination language and the potential for public harm. We ask the PUC to explain how this provision in the final regulation protects the public health, safety and welfare.

16. Section 66.39. DWSL Program Reports.—Need; Reasonableness.

Subsection (a) provides requirements for an entity with an approved DWSL Program to file with the PUC a DWSL Program Report by March 1 of each year. The proposed language states, "If an entity is implementing its DWSL Program as part of a LTIIP, the entity shall include a DWSL Program Report as part of the entity's [annual asset optimization (AAO)] plan under [Section] 121.6(b)(3) (relating to AAO plan filings)."

Under Subsection (b), an entity's DWSL Program Report must identify 16 items from the preceding year's activities. A commentator has objections to several of the metrics, especially in the timeframe for submission of an AAO plan. For instance, the commentator does not believe "length, pipe diameter and replacement method by county or the length, diameter, material type broken down by county, flow type, or system type is necessary in [AAO plan] reporting." Further, the commentator "does not have nor could it easily obtain a marginal cost of [inflow and infiltration] for each of the entity's wastewater systems, by individual sewershed broken down by

whether the entity provides treatment. [Inflow and infiltration] varies year to year depending on precipitation and antecedent soil moisture and groundwater level conditions.” Additionally, the commentator notes that one of the difficulties with fixing certain leaks within a system is that that specific fix may cause other issues within the system. We ask the PUC to explain the need for and reasonableness of the report requirements contained in this provision of the final regulation.

17. Compliance with the RRA; Economic or fiscal impacts.

Section 5.2 of the RRA (71 P.S. § 745.5b) directs this Commission to determine whether a regulation is in the public interest. When making this determination, the Commission considers criteria such as economic or fiscal impact and reasonableness. To make that determination, the Commission must analyze the text of the proposed regulation and the reasons for the new or amended language. The Commission also considers the information a promulgating agency is required to provide under Section 5 of the RRA in the Regulatory Analysis Form (RAF) (71 P.S. § 745.5(a)).

The information contained in the RAF submitted by the PUC at proposed is not sufficient to allow this Commission to determine if the regulation is in the public interest. RAF # 15 requires the promulgating agency to identify the types and number of persons, businesses, small businesses and organizations which will be affected by the regulation. The PUC’s response does not address whether any of the entities would be considered small businesses, and if so, how many. Likewise, the PUC does not address in RAF # 17 the economic impacts of the regulation on water and wastewater customers. Additionally, RAF # 20 addresses municipal corporations that provide water or wastewater service beyond their corporate limits. However, the PUC does not indicate how many such municipal corporations exist. We ask the PUC to amend the final RAF to address these and any related responses regarding economic or fiscal impacts and small businesses.

Application for Renewal of Designation as a Certified Reinsurer

Equator Reinsurances Limited has applied for renewal of its designation as a certified reinsurer in this Commonwealth. The application was received on June 30, 2021, and was made under section 319.1 of The Insurance Company Law of 1921 (40 P.S. § 442.1) and 31 Pa. Code § 161.3a (relating to requirements for certified reinsurers).

Persons who wish to comment on the application are invited to submit a written statement to the Insurance Department (Department) within 30 days from the date of this issue of the *Pennsylvania Bulletin*. Each written statement must include name, address and telephone number of the interested party; identification of the application to which the statement is addressed; and a concise statement with sufficient detail and relevant facts to inform the Department of the exact basis of the statement. Written statements must be e-mailed to Douglas Coleman, doucoleman@pa.gov, Kaushik K. Patel, kaupatel@pa.gov and Kimberly A. Rankin, krankin@pa.gov. Comments received will be forwarded to the applicant for appropriate response.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Service of Notice of Motor Carrier Formal Complaints

Formal complaints have been issued by the Pennsylvania Public Utility Commission. Answers must be filed in accordance with 52 Pa. Code (relating to public utilities). Answers are due August 30, 2021, and must be made with the Secretary, Pennsylvania Public Utility Commission, 400 North Street, Harrisburg, PA 17120, with a copy to the First Deputy Chief Prosecutor, Pennsylvania Public Utility Commission.

Pennsylvania Public Utility Commission; Bureau of Investigation and Enforcement v. A J Koller, LLC; Docket No. C-2021-3024884

COMPLAINT

The Pennsylvania Public Utility Commission (Commission) is a duly constituted agency of the Commonwealth of Pennsylvania empowered to regulate public utilities within the Commonwealth. The Commission has delegated its authority to initiate proceedings which are prosecutory in nature to the Bureau of Investigation and Enforcement and other bureaus with enforcement responsibilities. Pursuant to that delegated authority and Section 701 of the Public Utility Code, the Bureau of Investigation and Enforcement hereby represents as follows:

1. That all authority issued to A J Koller, LLC, (respondent) is under suspension effective March 09, 2021, for failure to maintain evidence of insurance on file with this Commission.

2. That respondent maintains a principal place of business at 415 Butter Road, York, PA 17404.

3. That respondent was issued a Certificate of Public Convenience by this Commission on December 21, 2017, at A-8920491.

4. That respondent has failed to maintain evidence of Liability and Cargo insurance on file with this Commission. The Bureau of Investigation and Enforcement's proposed civil penalty for this violation is \$500.00 and cancellation of the Certificate of Public Convenience.

5. That respondent, by failing to maintain evidence of insurance on file with this Commission, violated 66 Pa.C.S. § 512, 52 Pa. Code § 32.2(c), and 52 Pa. Code § 32.11(a), § 32.12(a) or § 32.13(a).

Wherefore, unless respondent pays the penalty of \$500.00 or files an answer in compliance with the attached notice and/or causes its insurer to file evidence of insurance with this Commission within twenty (20) days of the date of service of this Complaint, the Bureau of Investigation and Enforcement will request that the Commission issue an Order which (1) cancels the Certificate of Public Convenience held by respondent at A-8920491 for failure to maintain evidence of current insurance on file with the Commission, (2) fines Respondent the sum of five hundred dollars (\$500.00) for the illegal activity described in this Complaint, (3) orders such other remedy as the Commission may deem to be appropriate, which may include the suspension of a vehicle registration and (4) imposes an additional fine on the respondent should cancellation occur.

Respectfully submitted,
Andrew Turriziani
Chief of Motor Carrier Enforcement
Bureau of Investigation and Enforcement
400 North Street
Harrisburg, PA 17120

VERIFICATION

I, Andrew Turriziani, Chief of Motor Carrier Enforcement, Bureau of Investigation and Enforcement, hereby state that the facts above set forth are true and correct to the best of my knowledge, information and belief and that I expect that the Bureau will be able to prove same at any hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 relating to unsworn falsification to authorities.

Date: April 7, 2021

Andrew Turriziani
Chief of Motor Carrier Enforcement
Bureau of Investigation and Enforcement

NOTICE

A. You must file an Answer within 20 days of the date of service of this Complaint. The date of service is the mailing date as indicated at the top of the Secretarial Letter. See 52 Pa. Code § 1.56(a). The Answer must raise all factual and legal arguments that you wish to claim in your defense, include the docket number of this Complaint, and be verified. You may file your Answer by mailing an original to:

Rosemary Chiavetta, Secretary
Pennsylvania Public Utility Commission
400 North Street
Harrisburg, PA 17120

Or, you may eFile your Answer using the Commission's website at www.puc.pa.gov. The link to eFiling is located under the Filing & Resources tab on the homepage. If your Answer is 250 pages or less, you are not required to file a paper copy. If your Answer exceeds 250 pages, you must file a paper copy with the Secretary's Bureau.

Additionally, a copy should either be mailed to:

Michael L. Swindler, Deputy Chief Prosecutor
Pennsylvania Public Utility Commission
Bureau of Investigation and Enforcement
400 North Street
Harrisburg, PA 17120

Or, emailed to Mr. Swindler at: RA-PCCmplntResp@pa.gov

B. If you fail to answer this Complaint within 20 days, the Bureau of Investigation and Enforcement will request that the Commission issue an Order imposing the penalty.

C. You may elect not to contest this Complaint by causing your insurer to file proper evidence of current insurance in accordance with the Commission's regulations and by paying the fine proposed in this Complaint by certified check or money order within twenty (20) days of the date of service of this Complaint. Accord certificates of insurance and faxed form Es and Hs are unacceptable as evidence of insurance.

The proof of insurance must be filed with the:

Compliance Office, Bureau of Technical Utility Services
Pennsylvania Public Utility Commission
400 North Street
Harrisburg, PA 17120

Payment of the fine must be made to the Commonwealth of Pennsylvania and should be forwarded to:

Rosemary Chiavetta, Secretary
Pennsylvania Public Utility Commission
400 North Street
Harrisburg, PA 17120

Your payment is an admission that you committed the alleged violation and an agreement to cease and desist from further violations. Upon receipt of the evidence of insurance from your insurer, and upon receipt of your payment, the Complaint proceeding shall be closed.

D. If you file an Answer which either admits or fails to deny the allegations of the Complaint, the Bureau of Investigation and Enforcement will request the Commission to issue an Order imposing the penalty set forth in this Complaint.

E. If you file an Answer which contests the Complaint, the matter will be assigned to an Administrative Law Judge for hearing and decision. The Judge is not bound by the penalty set forth in the Complaint, and may impose additional and/or alternative penalties as appropriate.

F. If you are a corporation, you must be represented by legal counsel. 52 Pa. Code § 1.21.

Alternative formats of this material are available for persons with disabilities by contacting the Commission's ADA Coordinator at 717-787-8714. Do not call this number if you have questions as to why you received this complaint. For those questions you may call 717-783-3847.

Unclaimed Property Reported Without Name or Address

When holders of unclaimed property file reports with Treasury, some accounts are reported without the name or address of the owner. If you have done business with any of the companies or organizations listed below and believe you may be entitled to unclaimed property, contact the Bureau of Unclaimed Property at tupmail@treasury.gov. Please note that original documents will be required to file a claim that has no reported name or address.
