### APPLICATIONS

#### THE CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT APPLICATIONS FOR NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS

This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a general permit. The applications concern, but are not limited to, discharges related to industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFOs). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92 and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act.

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or amendment
Section III	WQM	Industrial, sewage or animal waste; discharge into groundwater
Section IV	NPDES	MS4 individual permit
Section V	NPDES	MS4 permit waiver
Section VI	NPDES	Individual permit stormwater construction
Section VII	NPDES	NOI for coverage under NPDES general permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 individual permits and individual stormwater construction permits in Sections IV and VI, the Department, based upon preliminary reviews, has made a tentative determination of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the EPA Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on an NPDES application are invited to submit a statement to the regional office noted before an application within 30 days from the date of this public notice. Persons wishing to comment on a WQM permit application are invited to submit a statement to the regional office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. Comments should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for a public hearing on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

The Pequea Creek TMDL, originally approved by USEPA in April 2001, has been revised to reflect observed water quality data showing phosphorus as the limiting nutrient. Nitrogen was addressed in the original TMDL based on inconclusive limiting nutrient model results; however, measured water quality was deemed to be more reflective of actual conditions.

The data and all supporting documentation used to develop the revised TMDLs are available from the Department. To request a copy of the revised TMDL, contact Bill Brown, Chief, TMDL Development Section, Watershed Protection Division, Department of Environmental Protection, P. O. Box 8555, Harrisburg, PA 17105-8555, (717) 783-2951, Willbrown@state.pa.us

The TMDLs can be accessed through the Department of Environmental Protection's (Department) website [www.dep.state.pa.us](http://www.dep.state.pa.us) by clicking on the Water Topics Link, then the TMDL link. Please note that attachments and appendices must be requested through paper mail. Persons with a disability may use the AT&T Relay Service by calling (800) 654-5984 (TDD users) or (800) 654-5988 (voice users) and request that the call be relayed.

Written and e-mail comments will be accepted at the addresses and must be received within 30 days from the date of this public notice. Comments will not be accepted by facsimile or voice mail. The Department will consider all comments in developing the revised TMDL, which will be submitted to the Environmental Protection Agency (EPA) for approval.

Persons may make an appointment to review the Department files on this case by calling the file review coordinator at (717) 705-4732.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

### PREAMBLE 1

**Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).**

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person

proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

## **AIR QUALITY**

### **PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS**

#### **NEW SOURCES AND MODIFICATIONS**

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all

the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121–143, the Federal Clean Air Act (act) and regulations adopted under the act.

The Department of Environmental Protection (Department) intends to issue a plan approval to authorize the applicant to operate the sources under the modified VOC emission limits. VOC emissions are not expected to increase because of the proposed modification.

The Department's review of the information contained in the application indicates that the proposed modification will comply with all applicable requirements pertaining to air contamination sources and the emission of air contaminants including 40 CFR Part 63, Subpart GGG—National Emission Standards for Pharmaceuticals Production (Pharmaceutical MACT Rule) and the best available technology (BAT) requirements of 25 Pa. Code §§ 127.1 and 127.12. Based on this finding, the Department intends to issue a plan approval for the proposed modification. Additionally, if the Department determines that the sources are operating in compliance with the plan approval conditions, the conditions established in the plan approval will be incorporated into the operating permit by means of an administrative amendment under 25 Pa. Code § 127.450.

The Department proposes to place in the plan approval the following conditions to ensure compliance with all applicable regulatory requirements:

1. This condition supersedes conditions nos. 001—003 of Source ID 101 of Title V operating permit 49-00007.

Compliance with this permit condition assures compliance with the 146-ton VOC emission limitation in any 12-consecutive month period under Reasonably Available Control Technology derived from 25 Pa. Code §§ 129.91—129.95.

Under the BAT provisions in 25 Pa. Code §§ 127.1 and 127.12, the VOC emissions from the wastewater treatment plant (Source ID 101) shall not exceed 15 tons in any 12-consecutive month period.

2. This condition supersedes condition no. 002 of Source ID 102 of Title V operating permit 49-00007.

Under the BAT provisions in 25 Pa. Code §§ 127.1 and 127.12, the total combined VOC emissions from the following sources of Source ID 102 shall not exceed 0.5 ton in any 12-consecutive month period: Koline Sanderson #NPD-13W-1960 wastewater treatment sludge paddle dryer DR-530, sludge hopper TA-536B, solids transport vessel TA-536C and dried sludge receiver TA-532.

3. Conditions contained in Title V operating permit 49-00007 remain in effect unless superseded or amended by conditions contained in this plan approval. If there is a conflict between a condition or requirement contained in this plan approval and a condition or requirement contained in Title V operating permit 49-00007, the permittee shall comply with the condition or requirement contained in this plan approval rather than the conflicting condition or requirement contained in Title V operating permit 49-00007.

Written comments or requests for a public hearing should be directed to Muhammad Q. Zaman, Chief, Facilities Permitting Section, Department of Environmental Protection, Air Quality Program, Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701, (570) 327-0512.

Copies of the application and the Department's review of the application are available for public review between 8 a.m. and 4 p.m. at the Department's Northcentral Regional Office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review may be made by calling the Department at (570) 327-3693.

**41-00005E: Lycoming Engines** (652 Oliver Street, Williamsport, PA 17701) for construction and operation of a solvent-based perchloroethylene degreaser (Source ID P236) equipped with sub-zero and above-zero chillers (IDs C236A and C236B) to control the perchloroethylene emissions from the degreaser at their facility in Williamsport, **Lycoming County**. The respective facility is a major facility for which a Title V operating permit 41-00005 has been issued.

The Department's review of the information contained in the application indicates that the proposed degreaser with sub-zero and above-zero chillers will meet all applicable air quality regulatory requirements pertaining to air contamination sources and the emission of air contaminants, including the Best Available Technology (BAT) requirements of 25 Pa. Code §§ 127.1 and 127.12. The proposed degreaser will be subject to the Federal regulatory requirements, Subpart T of the National Emission Standards for Hazardous Air Pollutants for Source Categories, 40 CFR Part 63, 63.460—63.470 and will comply with all applicable regulatory requirements of this subpart. Based on these findings, the Department intends to issue a plan approval for the construction and operation of the degreaser with chillers. Additionally, if the Department determines that the degreaser with chillers is operating in compliance with all plan approval conditions, the conditions established in the plan approval will be incorporated into Title V operating permit No. 41-00005 by means of an administrative amendment under 25 Pa. Code § 127.450.

The following is a summary of the conditions that the Department proposes to place in the plan approval to ensure compliance with all applicable regulatory requirements:

## OPERATING PERMITS

### **Intent to Issue Title V Operating Permits under the Air Pollution Control Act (35 P. S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter G.**

*Northcentral Region: Air Quality Program, 208 West Third Street, Williamsport, PA 17701, Muhammad Zaman, Facilities Permitting Chief, (570) 327-0512.*

**19-00006: Del Monte Corp.** (6670 Low Street, Bloomsburg, PA 17815) for renewal of a Title V Operating Permit for their pet food manufacturing facility in South Centre Township, **Columbia County**.

The facility incorporates two 26.6 mmBtu per hour natural gas/No. 6 fuel oil-fired boilers, two 50.3 mmBtu per hour natural gas/No. 2 fuel oil-fired boilers, a meat scrap storage operation, a gravy mixing operation, two meat mixers, 20 small natural gas-fired combustion units (space heaters, water heaters, and the like) five solvent parts washers, a 75 horsepower propane-fired emergency generator, two propane-fired welders, a wastewater treatment plant and a 12,000 gallon aboveground fuel oil storage tank.

The PM emissions from the gravy mixing operation and the two meat mixers are controlled by two wet centrifugal collectors. The malodorous air contaminant emissions from the meat scrap storage operation and the wastewater treatment plant are controlled by three scrubbers.

The air contaminant emissions from the facility are not expected to exceed 254.95 tons of SO<sub>x</sub>, 90.78 tons of NO<sub>x</sub>, 37.05 tons of CO, 25.37 tons of PM including PM<sub>10</sub>, 3.23 tons of VOCs and 2.04 tons of HAPs per year.

The Department of Environmental Protection (Department) proposes to renew Title V Operating Permit 19-00006. The Department intends to incorporate into this renewal all conditions currently contained in Title V Operating Permit 19-00006 with these exceptions, changes and/or additions:

1. Conditions requiring weekly "walk around" inspections of the facility and the maintenance of records of these inspections have been removed as the respective conditions infer that facility personnel need monitor the facility's air contamination sources only once per week. The monitoring of sources should be an integral part of normal source operation and should therefore occur on a more-or-less continuous basis.

2. Ten small natural gas-fired combustion units (space heaters, and the like) previously included in the permit (as part of Source 039) have been removed as they no longer exist and 11 new small natural gas-fired combustion units have been added (as Source 040).

3. A condition requiring the maintenance of records of the amount of natural gas used per month in the small combustion units comprising Source 039 as well as records of the number of hours these units operate each month has been removed from the permit as the intent of these records had been to demonstrate compliance with VOC emission limitations which the combustion units, in aggregate, are incapable of exceeding even if fired at maximum capacity around the clock. As there is no question of compliance with the respective limitations, there is no need to maintain the previously-required records.

4. Five remote reservoir solvent parts washers previously included in the permit (as Source P205) have been removed as they no longer exist and five new remote reservoir solvent parts washers have been added (as Source P206). Additionally, the applicable regulatory requirements for the new parts washers, as specified in 25 Pa. Code § 129.63, have been added to the permit.

5. A number of propane-fired sources (forklifts, and the like) previously included in the permit (as part of Source

P209) have been removed as they are mobile air contamination sources, rather than stationary air contamination sources, and, as such, should not be included in the permit. Two propane-fired sources (two welders) have however been added to the permit (Source P209).

6. Conditions requiring the use of a specific reagent, "Redox 60," in the scrubbing solution used in the three odor scrubbers (C002—C004) associated with the meat scrap storage operation (Source P211) and wastewater treatment plant (Source P213) have been modified to allow the use of alternate reagents provided that the resultant scrubbing solution contains the same concentration of the same active ingredient, peroxyacetic acid.

7. A condition requiring the maintenance of records of the vapor pressure of the material stored in the 12,000 gallon No. 2 fuel oil storage tank (Source P215) has been replaced with a condition requiring the maintenance of records of the identity of the material stored in the respective tank. A condition has also been added restricting the respective tank to the storage of No. 2 fuel oil.

## PUBLIC WATER SUPPLY (PWS) PERMITS

The Department of Environmental Protection has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P. S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users should contact the Environmental Hearing Board (Board) through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995

#### PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property

and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

The Department has received the following plans and reports:

*Southcentral Region: Environmental Cleanup Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110.*

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995

#### PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the

act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the Environmental Cleanup Program manager in the Department regional office before which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

## FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department of Environmental Protection (Department) has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with the applicable provisions of sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users should contact the Environmental Hearing Board (Board) through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483.
