READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances where the agency may omit the proposal step; they still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania*

Bulletin before it can take effect. If the agency wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, they must re-propose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number and page number. Example: Volume 1, *Pennsylvania Bulletin*, page 801 (short form: 1 Pa.B. 801).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*.

The *Pennsylvania Code* contains, as Finding Aids, subject indexes for the complete *Code* and for each individual title, a list of Statutes Used As Authority for Adopting Rules and a list of annotated cases. Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where "no fiscal impact" is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

THE COURTS

Title 204—JUDICIAL SYSTEM GENERAL PROVISIONS

PART V. PROFESSIONAL ETHICS AND CONDUCT

[204 PA. CODE CHS. 85, 87, 89, 91 AND 93]

Amendments to Rules of Organization and Procedure of The Disciplinary Board of The Supreme Court of Pennsylvania; Order No. 61; Doc. Nos. R-142 and R-144

The Rules of Organization and Procedure of the Board have been drafted to restate in full the substance of the Pennsylvania Rules of Disciplinary Enforcement. By Orders dated September 9, 2004 and November 22, 2004, the Supreme Court of Pennsylvania amended Pa.R.D.E. 102, 205(c), 206, 213(d) and 218(c), and 213(d) and (g), respectively. By this Order, the Board is making conforming changes to its Rules to reflect the adoption of those amendments.

The Disciplinary Board of the Supreme Court of Pennsylvania finds that:

(1) To the extent that 42 Pa.C.S. § 1702 (relating to rule making procedures) and Article II of the act of July 31, 1968 (P. L. 769, No. 240), known as the Commonwealth Documents Law, would otherwise require notice of proposed rulemaking with respect to the amendments adopted hereby, those proposed rulemaking procedures are inapplicable because the amendments adopted hereby relate to agency procedure and are perfunctory in nature.

(2) The amendments to the Rules of Organization and Procedure of the Board adopted hereby are not inconsistent with the Pennsylvania Rules of Disciplinary Enforcement and are necessary and appropriate for the administration of the affairs of the Board.

The Board, acting pursuant to Pa.R.D.E. 205(c)(10), orders:

(1) Title 204 of the *Pennsylvania Code* is hereby amended as set forth in Annex A hereto.

(2) The Secretary of the Board shall duly certify this Order, and deposit the same with the Administrative Office of Pennsylvania Courts as required by Pa.R.J.A. 103(c).

(3) The amendments adopted hereby shall take effect upon publication in the *Pennsylvania Bulletin*.

(4) This Order shall take effect immediately.

By The Disciplinary Board of the Supreme Court of Pennsylvania

ELAINE M. BIXLER,
Secretary of the Board

ary Counsel to the [appropriate] assigned reviewing [member of a] hearing committee member for action.

§ 87.32. Action by reviewing [member of a] hearing committee member.

(a) *General rule.* Enforcement [Rules 206(b)(3) and] Rule 208(a)(3) [provide] provides that, except where the complaint is dismissed because the complaint is frivolous or falls outside the jurisdiction of the Board, the reviewing [member of a] hearing committee member may approve or modify the recommendation of the Office of Disciplinary Counsel concerning the disposition of a complaint.

CHAPTER 89. FORMAL PROCEEDINGS

**Subchapter A. PRELIMINARY PROVISIONS
GENERAL MATTERS**

§ 89.1. Construction of chapter.

(a) *General rule.* This chapter is promulgated for the purpose of assisting the Office of Disciplinary Counsel, the respondent-attorney and the Board to develop the facts relating to, and to reach a just and proper determination of, grievances brought to the attention of the

Board. The Board recognizes the temptation in disciplinary matters to raise procedural defenses where substantive defenses would be unavailing and, therefore, the Board will not hold action of a hearing committee, **hearing committee member** or special master invalid by reason of any nonprejudicial irregularity, or for any error not resulting in a miscarriage of justice.

* * * * *

§ 89.4. Representation of respondent-attorney.

* * * * *

(c) *Restrictions on representation.* Members of the Board, partners or employes of any firm in which a member of the Board practices, **[members of hearing committees] hearing committee members** and special masters shall not appear as counsel for a respondent-attorney.

§ 89.7. Continuances.

(a) *Avoidance of delay.* All formal proceedings under these rules shall be as expeditious as possible, but the failure of the Office of the Secretary or the Board to comply with any of the procedural time periods in these rules shall not result in the dismissal of a petition for discipline or a lessening of the charges set forth therein. Only the Board **[Chairman] Chair** may extend the time for hearing or grant any other extension of time in a formal proceeding.

* * * * *

(c) *Application for continuance.* An application for continuance of a hearing shall be made either in writing or on the record at the hearing and shall set forth the basis for the application and the facts supporting it. The application shall be addressed to the **[chairman] chair** of the hearing committee or the special master conducting the hearing, who may deny it or recommend its approval to the Board **[Chairman] Chair**. A denial by the **[chairman] chair** of a hearing committee or special master may be reviewed by the Board **[Chairman] Chair**. A continuance of a hearing other than adjournment to a day certain not more than 15 days hence shall not be granted by a hearing committee or special master without the concurrence of the Board **[Chairman] Chair**.

* * * * *

(e) *Definition.* As used in this section, the term "involved person" includes a member of the Board **[or the assigned]**, a hearing committee **member assigned to act on any aspect of the matter**, a special master **assigned to the matter** and counsel for the respondent-attorney, as well as the respondent-attorney.

Subchapter B. INSTITUTION OF PROCEEDINGS

§ 89.56. Assignment for hearing.

(a) *General rule.* Enforcement Rule 208(b)(4) provides that following service of the answer, if there are any issues raised by the pleadings or if the respondent-attorney requests the opportunity to be heard in mitigation, the matter shall be assigned to a hearing committee. The Office of the Secretary shall transmit copies of the file of the Board by means of Form DB-9 (Reference for Disciplinary Hearing) to the members of **[a] the hearing committee appointed to hear the matter** or a special master in the appropriate disciplinary district not later

than five days after the date on which the answer of the respondent-attorney is due under § 89.54(a) (relating to answer).

(b) *Composition of committee.* The Secretary of the Board shall **[designate] appoint** the **members of the hearing committee** to which the matter is assigned **as provided by § 93.81(c) (relating to hearing committees)**. As provided by § 93.86 (relating to disqualification of reviewing member to sit on hearing in same matter), the hearing committee shall not **[be one which includes the reviewing member] include the hearing committee member who passed upon Disciplinary Counsel's recommended disposition of the matter. The Secretary shall also designate which member of the hearing committee will conduct the prehearing conference.**

§ 89.57. Scheduling of hearing and prehearing conference.

The date, time and place of hearing on a petition for discipline shall be scheduled by the Office of the Secretary **[after consultation with and consideration of any recommendations by the members of the hearing committee or special master, the Office of Disciplinary Counsel, and, if available, the respondent-attorney] at the time the members of the hearing committee are appointed.** The date fixed for the hearing shall not be later than 90 days after the file is transmitted to a hearing committee under § 89.56 (relating to assignment for hearing), unless an extension has been granted by the Board **[Chairman] Chair** at the request of any party. At the time that the hearing is scheduled, the Office of the Secretary shall also schedule a prehearing conference for a date not less than 30 days before the scheduled date of the hearing.

**Subchapter C. HEARING PROCEDURES
PREHEARING CONFERENCES**

§ 89.73. Initiation of conferences.

(a) *General rule.* The hearing committee or special master, with or without motion, and after consideration of the probability of beneficial results to be derived therefrom, may direct that a conference be held, and direct the respondent-attorney and staff counsel to appear thereat to consider any or all of the matters enumerated in § 89.72 (relating to subjects which may be considered at conferences to expedite hearings). Due notice of the time and place of such conference shall be given to the respondent-attorney and staff counsel. Where a proceeding is in the hands of a hearing committee, the conference may be conducted by the **[chairman] chair** of the hearing committee or by **[any regular member of the committee] a single senior or experienced hearing committee member** designated in writing by the **[chairman] chair**.

* * * * *

§ 89.74. Authority of hearing committee member or special master at conferences.

(a) *General rule.* The **[member of a hearing committee] senior or experienced hearing committee member** presiding at any conference may dispose of by ruling, irrespective of the consent of the participants, any procedural matters which the **[chairman] chair** of the committee is authorized to rule upon during the course of the proceeding, and which it appears may appropriately

and usefully be disposed of at that stage. Where it appears that the proceeding would be substantially expedited by distribution of proposed exhibits and written prepared testimony reasonably in advance of the hearing session, such advance distribution by a prescribed date may be directed at the discretion of the presiding hearing committee member. The presiding hearing committee member may also order the exchange of the names and addresses of expert witnesses and copies of all expert reports. An order for the distribution of exhibits and written testimony or the identification of expert witnesses and exchange of expert reports shall be made with due regard for the convenience and necessity of the respondent-attorney and staff counsel, and may provide that failure to comply with it shall have the consequences described in § 89.93(c) (relating to exclusion of evidence). The rulings of the presiding hearing committee member made at a conference shall control the subsequent course of the hearing, unless modified for good cause shown.

ENVIRONMENTAL QUALITY BOARD

[25 PA. CODE CHAPTER 86]

Coal Mining

The Environmental Quality Board (Board) by this order amends Chapter 86 (relating to surface and underground mining; general) to read as set forth in Annex A. The amendment addresses the extraction of coal incidental to government-financed construction projects and government-financed reclamation projects.

This order was adopted by the Board at its meeting of June 15, 2004.

A. Effective Date

This amendment will go into effect upon publication in the *Pennsylvania Bulletin* as final-form rulemaking.

C. Statutory Authority

This final-form rulemaking is made under the authority of section 4.2 of the Surface Mining Conservation and Reclamation Act (SMCRA) (52 P. S. § 1396.4b(a)) and section 1920-A of The Administrative Code of 1929 (71 P. S. § 510—20).

D. Background of the Final-Form Rulemaking

The Department proposed this amendment following a request from the Department of Transportation (PENNDOT). PENNDOT asked the Department to amend Chapter 86 to exclude coal extraction on government-financed highway construction projects from regulation under the surface coal mining regulations. Prior to developing the proposed amendment, the Department reviewed the applicable provisions of the SMCRA and the Federal regulations on coal mining. The definition of "surface mining activities" in section 3 of the SMCRA (52 P. S. § 1396.3) states that "surface mining activities" do not include the "extraction of coal as an incidental part of Federal, State or local government-financed highway construction pursuant to regulations promulgated by the Environmental Quality Board." The Federal Office of Surface Mining, Reclamation and Enforcement (OSM) regulations in 30 CFR Part 707 (relating to exemption for coal extraction incidental to government-financed highway or other construction) exempt from regulation coal extraction incidental to government-financed highway or other construction. On the basis of these provisions, the Department agreed that coal extraction incidental to government-financed highway construction should not be regulated as surface coal mining and developed the proposed § 86.6 (relating to extraction of coal incidental to government-financed construction or government-financed reclamation projects) published at 32 Pa.B. 2217 (May 4, 2002). The proposed amendment to § 86.6 also restated the SMCRA exemption for coal extraction incidental to government-financed reclamation. The Department included government-financed reclamation in § 86.6 so that it more closely parallels the exemptions in section 3 of the SMCRA.

A 45-day public comment period was provided for the proposed rulemaking. Among the comments received was a suggestion to expand the exemption in § 86.6 to include coal extraction incidental to other types of government-financed construction, because 30 CFR Part 707 exempts those projects from regulation under the Federal act and regulations. The commentator noted that the statutory

basis for exempting other types of government-financed construction could be found in section 3 of the SMCRA, in the definition of "surface mining activities." The definition provides that surface mining activities do not include "Activities not considered to be surface mining as determined by the Office of Surface Mining, Reclamation and Enforcement and set forth in the Department regulations." See section 3 of SMCRA. The Department has revised the final-form rulemaking to exempt all coal extraction incidental to government-financed construction and reclamation projects from the requirements of the surface coal mining regulations.

While the extraction of coal as an incidental part of Federal, State or local government-financed construction and government-financed reclamation will no longer be subject to the requirements of Chapters 86—88 (relating to surface and underground coal mining; general; surface mining of coal; and anthracite coal), any potential environmental impacts from these activities are still regulated under State law and regulations. Federally funded highway construction, which includes virtually all PENNDOT highway construction projects, receives additional scrutiny under the National Environmental Policy Act of 1970 (NEPA) (42 U.S.C.A. § 4321—4370(e)), and the Commonwealth's Act 120.

The NEPA procedural requirements are very thorough and can take as long as 2 to 3 years to complete for a highway project. In general, this process requires notice to all potentially affected parties, a preliminary inter-agency "scoping" meeting to identify areas of concern, an environmental analysis, a determination of whether the project will have any significant environmental impacts, notice and opportunity to comment on that determination and consideration of the agency responses to those comments.

In addition, whether the project is partially funded by Federal tax dollars or is 100% State funded, PENNDOT must comply with Act 120. That act requires PENNDOT to "consult with appropriate officials as designated by the chief administrative officer of the... Department of Environmental [Protection] ... regarding the environmental hazards ... conservation ... recreation and social considerations that may arise by reason of the location, design, construction or reconstruction of any transportation or air facility" (71 P. S. § 512(a)(15)).

Act 120 also requires PENNDOT to follow the Federally mandated hearing procedures under Titles 23 and 49 of the *United States Code* (relating to highways; and transportation) in acquiring a new right-of-way even if no Federal funds are involved. At these hearings, PENNDOT must consider the impact of the proposed project on erosion, wildlife, the general ecology, noise, air and water pollution, and historic landmarks. PENNDOT may not proceed with the project unless it makes a written finding in the *Pennsylvania Bulletin* that there is no significant impact on the listed environmental elements or that there is no prudent alternative and steps have been taken to minimize any adverse impact.

Given the procedural requirements under the NEPA and Act 120, as well as new requirements in § 86.6(a)(4) and (5) and (c)(4) and (5) that are discussed in Section E of this order, the Department believes that it will receive adequate notice and opportunity to comment on any highway project that may impact the environmental resources of a particular area. In turn, the Department will recommend ways to protect those resources. Moreover, Federal, State and local government-financed construction projects are not exempt from the Department's

other permitting requirements and performance standards such as those in Chapters 91—96, 102 and 105. Specific provisions have been included in this final-form rulemaking to ensure that appropriate standards will be in place during the course of the project.

The proposed regulatory change was reviewed and discussed at the October 25 and November 19, 2001, Mining and Reclamation Advisory Board (MRAB) meetings. Several MRAB members noted that § 86.6 would allow coal extraction incidental to government-financed construction projects to take place in areas that have been designated unsuitable for coal mining. They expressed concern that the unique resources, particularly water resources, which led to areas being designated unsuitable for mining, will not be adequately protected. The Department agreed to establish internal notification procedures to protect the unique resources in areas designated unsuitable for mining. This was accomplished by creating a GIS layer in eFACTS Spatial, which is a mapping application that displays Department permitting information on an Internet map server. On January 3, 2002, the MRAB supported the proposed rule. This final-form rulemaking was reviewed by the MRAB on January 9 and October 23, 2003.

Section 86.6 will provide for the incidental extraction of coal on government-financed construction and reclamation projects and ensure that all environmental concerns are addressed.

E. Summary of Changes to the Proposed Rulemaking

The Board has revised proposed § 86.6, as published at 32 Pa.B. 2217, by including coal extraction incidental to other types of government-financed construction among the exemptions to the coal mining regulations provided by this section. The § 86.6 exemption for other types of government-financed construction is based on the definition of “surface mining activities” in section 3 of the SMCRA, which states that surface mining activities shall not include “Activities not considered to be surface mining as determined by the United States Office of Surface Mining, Reclamation and Enforcement and set forth in department regulations.” The Federal regulations in 30 CFR 707.1(b) (relating to scope) exempt the extraction of coal incidental to government-financed construction from the Federal act and regulations.

The Board has also inserted several new provisions. New paragraphs (1), (5) and (6) were added to subsection (a) to provide opportunity for Department comment on proposed projects and require that the construction or reclamation be performed under bond, contract and specifications consistent with the environmental statutes applicable to those projects and requires Department approval when potential adverse environmental impacts may occur. New paragraph (4) added to subsection (c) requires that a person whose project will affect an area designated unsuitable for mining must maintain on site a copy of the detailed report that was developed by the Department during the designation process. A new subsection (d) affirmatively states that activities exempted from regulation as coal mining by this section must nevertheless comply with other, applicable regulations of the Department.

F. Summary of Comments and Responses on the Proposed Rulemaking

The Board adopted the proposed amendment at its meeting of March 19, 2002. The proposed amendment was published at 32 Pa.B. 2217, with a 45-day public comment period. The Game Commission and Fish and

Boat Commission, the Pennsylvania Coal Association and the Independent Regulatory Review Commission (IRRC) submitted comments. Following is a discussion of their comments and any resulting changes in the final-form rulemaking.

Two of the commentators expressed concern that the proposed rulemaking would weaken environmental protections currently placed on highway projects in the coal mining areas. They noted that highway construction projects involving cut and fill are very similar to linear surface mining operations. Both operations involve clearing the land, removing and storing topsoil and excavating and storing rock material. However, one critical difference is that in mining the permit includes plans for handling toxic and acid-producing rock strata and the affected area is reclaimed to its approximate original contour. Conversely, in the majority of highway projects open cuts remain, exposing toxic strata to weathering, and fills are constructed with little regard to special handling of toxic spoils. The commentators recommended the Board oppose this regulation until these concerns are adequately addressed.

As explained in the preamble to the proposed rulemaking and in Section D of this order, the Board believes that the Department, natural resource agencies and other interested parties have adequate opportunity to provide PENNDOT with information on environmental concerns, including the handling of toxic and acid-producing overburden, on projects under the requirements of the NEPA and Act 120. To address any lingering concerns, the Board has amended § 86.6 by inserting several new provisions. The construction or reclamation must be performed under a bond, contract and specifications consistent with the acts and regulations and be approved by the Department. For any government-financed construction or reclamation project that will extract more than 250 tons of coal or affect more than 2 acres in an area designated unsuitable for mining, the person conducting the project shall maintain onsite a copy of the Department's detailed report on the area designated unsuitable for mining. Additionally, the Board has inserted a new subsection that requires government-financed construction and government-financed reclamation projects to comply with applicable Department water quality, erosion and sediment control and dam safety regulations.

One commentator suggested the proposed rulemaking include other types of government-financed construction beyond highway construction and reclamation. The commentator noted that exclusion (4) in the SMCRA definition of “surface mining activities” excludes activities not considered to be surface mining by the OSM provided those activities are set forth in Department regulations. The commentator argued that the SMCRA uses the words “considered to be” instead of “defined as” and defers to OSM's “determination” on these activities; therefore, the Legislature intended to provide flexibility and to allow the Board to adopt regulations consistent with the Federal regulatory scheme.

The Board, upon further consideration of the language in section 3 of the SMCRA, agrees that these projects are not properly regulated as traditional surface mining. The Board interprets exclusion (4) to cover those activities that the OSM has determined are not subject to regulation as surface mining. The Federal Surface Mining Control and Reclamation Act and regulations specifically exempt the incidental removal of coal in government-financed highway and other construction projects from the requirements of the Federal act and regulations.

Another commentator had two comments on the proposed rule. The first one questioned why the rule did not include the exemption for other types of government-financed construction if the Federal regulations exempt those activities.

The proposed rulemaking was developed in response to a specific request from PENNDOT. It was based on exclusion (2) in the SMCRA definition of "surface mining activities," which deals solely with coal extraction incidental to government-financed highway construction. The Department has revised the regulation to exempt coal extraction incidental to government-financed construction from its coal mining regulations based on exclusion (4) in the SMCRA definition of "surface mining activities."

Second, the commentator suggested that the proposed rulemaking include references to the water quality and environmental protection regulations that will still apply to government-financed projects. The Board agrees and has inserted a new subsection (d) requiring these projects to comply with the appropriate Department regulations. The new subsection also identifies specific water resources chapters that typically apply to earth disturbance activities.

G. *Benefits, Costs and Compliance*

Government entities located in this Commonwealth's coal fields that are proposing construction projects or reclamation projects will benefit from the addition of § 86.6. These entities will be able to avoid additional requirements associated with complying with the coal mining regulations for nonmining activities. Furthermore, in situations where a government-financed construction project or reclamation project involving coal removal will affect an area designated unsuitable for mining, the designation will not automatically prohibit excavation or removal of coal or coal refuse. The Department and Commonwealth may also benefit through additional reclamation of abandoned mine lands if government-financed reclamation contracts involving the necessary and incidental removal of coal and coal refuse can occur in areas designated unsuitable for mining.

Compliance Costs

The change will impose no additional compliance costs on the coal mining industry, government entities or the public.

Compliance Assistance Plan

The Department will provide written notification of this rulemaking to PENNDOT, the Turnpike Commission and local government associations such as the Pennsylvania State Association of Township Supervisors and the County Commissioners Association of Pennsylvania.

Paperwork Requirements

This final-form rulemaking will not result in the need for additional forms, reports or other paperwork.

H. *Sunset Review*

This final-form rulemaking will be reviewed in accordance with the sunset review schedule published by the Department to determine whether the regulations effectively fulfill the goals for which they were intended.

I. *Regulatory Review*

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)), on April 23, 2002, the Department submitted a copy of the proposed rulemaking, published at 32 Pa.B. 2217, to IRRC and the Chairpersons of the

Senate and House Environmental Resources and Energy Committees for review and comment.

Under section 5(c) of the Regulatory Review Act, IRRC and the Committees were provided with copies of the comments received during the public comment period, as well as other documents when requested. In preparing this final-form rulemaking, the Department has considered all comments from IRRC, the Committees and the public.

Under section 5.1(j.2) of the Regulatory Review Act (71 P.S. § 745.5a(j.2)), on July 28, 2004, this final-form rulemaking was deemed approved by the House and Senate Committees. Under section 5.1(e) of the Regulatory Review Act, IRRC met on July 29, 2004, and approved the final-form rulemaking.

J. *Findings of the Board*

The Board finds that:

(1) Public notice of proposed rulemaking was given under sections 201 and 202 of the act of July 31, 1968 (P.L. 769, No. 240) (45 P.S. §§ 1201 and 1202) and regulations promulgated thereunder at 1 Pa. Code §§ 7.1 and 7.2.

(2) A public comment period was provided as required by law and all comments were considered.

(3) This final-form rulemaking does not enlarge the purpose of the proposed amendment published at 32 Pa.B. 2217.

(4) This final-form rulemaking is necessary and appropriate for administration and enforcement of the authorizing acts identified in Section C of this order.

ARTICLE I. LAND RESOURCES

CHAPTER 86. SURFACE AND UNDERGROUND COAL

MINING: GENERAL

Subchapter A. GENERAL PROVISIONS

§ 86.6. Extraction of coal incidental to government-financed construction or government-financed reclamation projects.

(a) Extraction of coal incidental to government-financed construction or government-financed reclamation projects is exempt from the permitting requirements of the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a) and this chapter as it relates to surface mining activities and operations, and Chapters 87 and 88 (relating to surface mining of coal; and anthracite coal) if the following conditions are met:

(1) During the project site selection process and prior to development of final construction plans or reclamation plans for projects located within coal bearing regions, the government entity financing the construction or reclamation has provided the Department with an opportunity to provide comments on the potential environmental impacts of the project.

(2) The extraction of coal is necessary to enable the construction or reclamation to be accomplished. Only that coal extracted from within the right-of-way, in the case of a road, railroad, utility line or other similar construction, or within the boundaries of the area directly affected by other types of government-financed construction or government-financed reclamation, may be considered incidental to that construction or reclamation.

(3) The construction or reclamation is funded by a Federal, Commonwealth, county, municipal, or local unit of government, or a department, bureau, agency, or office of the unit which, directly or through another unit of government, finances the construction or reclamation.

(4) The construction or reclamation is funded 50% or more by funds appropriated from the government unit's budget or obtained from general revenue bonds. Funding at less than 50% may qualify if the construction is undertaken as a Department-approved reclamation contract or project.

(5) The construction or reclamation is performed under a bond, contract and specifications that substantially provide for and require protection of the environment, reclamation of the affected area, and handling of excavated materials in a manner consistent with the acts and regulations implementing the acts.

(6) The Department has approved the standards and specifications for protection of the environment that will apply to the project when potential adverse environmental impacts have been identified.

(b) Construction funded through government financing agency guarantees, insurance, loans, funds obtained

through industrial revenue bonds or their equivalent or in-kind payments do not qualify as government-financed construction.

(c) A person extracting coal incidental to government-financed construction or government-financed reclamation who extracts more than 250 tons of coal or affects more than 2 acres shall maintain on the site of the extraction operation and make available for inspection the following documents:

(1) A written description of the construction or reclamation project.

(2) A map showing the exact location of the construction or reclamation, right-of-way or the boundaries of the area which will be directly affected by the construction or reclamation.

(3) A statement identifying the government agency that is providing the financing and the kind and amount of public financing, including the percentage of the entire construction costs represented by the government financing.

(4) When the area delineated in paragraph (2) is wholly or partially within an area designated unsuitable for mining by the EQB under § 86.130 (relating to areas designated as unsuitable for mining), a copy of the detailed report required by § 86.124(e) (relating to procedures: initial processing, recordkeeping and notification requirements).

(d) Government-financed construction projects and government-financed reclamation must comply with Chapters 91—96, 102 and 105.

Title 49—PROFESSIONAL AND VOCATIONAL STANDARDS

STATE BOARD OF FUNERAL DIRECTORS

[49 PA. CODE CH. 13]

Limited License

The State Board of Funeral Directors (Board) amends §§ 13.1 and 13.12 (relating to definitions; and fees) and adds § 13.77 (relating to limited license).

Description and Need for the Amendment

The act of June 22, 2000 (P. L. 376, No. 48) authorized the Board to enter into an agreement with the appropriate licensing authority of any other state to issue limited licenses to funeral directors licensed in that state, so long as the other state would extend similar privileges to funeral directors licensed in this Commonwealth. Acting under a limited license, an out-of-State funeral director may enter this Commonwealth for the purpose of removing, transporting and burying dead human bodies and directing funerals. A limited license does not authorize the out-of-State funeral director to maintain an establishment or to hold himself out as a funeral director in this Commonwealth. This final-form rulemaking implements limited licensure in this Commonwealth for out-of-State funeral directors.

Summary of Comments and Responses to the Proposed Rulemaking

The Board published notice of proposed rulemaking at 34 Pa.B. 1961 (April 10, 2004) with a 30-day public comment period. The Board did not receive any comments from the public. The Board received a single comment from the House Professional Licensure Committee (HPLC) as part of its review of proposed rulemaking under the Regulatory Review Act (71 P.S. §§ 745.1—745.12). The Board did not receive comments from the Independent Regulatory Review Commission (IRRC) or the Senate Consumer Protection and Professional Licensure Committee (SCP/PLC) as part of their review of proposed rulemaking under the Regulatory Review Act.

Section 9(c) of the Funeral Director Law (act) (63 P.S. § 479.9(c)) requires that any limited license agreement entered into by the Board must include a provision that that “any disciplinary action [taken against the holder of a limited license] shall be reported to the corresponding licensing authority [of the limited license holder’s home state].” Section 13.77(d) reads that the Board “will” report to the reciprocal state any disciplinary action taken against the holder of a limited license. The HPLC commented that because this provision imposes a duty upon the Board, the term “shall” should be used instead of “will.” In drafting this proposed rulemaking, the Board looked to section 6.8(c) of the *Pennsylvania Code and Bulletin Style Manual* of the Legislative Reference Bureau that directs agencies to use “will” when the agency pledges to act and “shall” when anyone else has a duty to act. Through this rulemaking, the Board pledges to take action, in addition to having the existing statutory duty to do so. Therefore, the Board has retained the language as proposed.

Fiscal Impact and Paperwork Requirements

The final-form rulemaking will have no adverse fiscal impact on the Commonwealth or its political subdivisions and will impose no additional paperwork requirements upon the Commonwealth, political subdivisions or the private sector.

Effective date

The final-form rulemaking will become effective upon publication in the *Pennsylvania Bulletin*.

Statutory Authority

The final rulemaking is authorized under sections 9(c) and 16(a) of the Funeral Director Law (63 P.S. §§ 479.9(c) and 479.16(a)).

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)), on March 30, 2004, the Board submitted a copy of the notice of proposed rulemaking published at 34 Pa.B. 1961, to IRRC and the HPLC and the SCP/PLC for review and comment.

Under section 5(c) of the Regulatory Review Act, IRRC, the HPLC and the SCP/PLC were provided with copies of the comments received during the public comment period, as well as other documents when requested. In preparing

the final-form rulemaking, the Board has considered all comments from IRRC, the HPLC, the SCP/PLC and the public.

Under section 5.1(j.2) of the Regulatory Review Act (71 P.S. § 745.5a(j.2)), on November 17, 2004, the final-form rulemaking was approved by the HPLC. On February 9, 2005, the final-form rulemaking was deemed approved by the SCP/PLC. Under section 5(g) of the Regulatory Review Act, the final-form rulemaking was deemed approved by IRRC effective February 9, 2005.

Additional Information

Persons who require additional information about the final-form rulemaking should submit inquiries to Michelle T. Smey, Administrator, State Board of Funeral Directors, by mail to P. O. Box 2649, Harrisburg, PA 17105-2649, (717) 783-3397 or st-funeral@state.pa.us.

Findings

The Board finds that:

(1) Public notice of proposed rulemaking was given under sections 201 and 202 of the act of July 31, 1968 (P.L. 769, No. 240) (45 P.S. §§ 1201 and 1202) and regulations promulgated thereunder, 1 Pa. Code §§ 7.1 and 7.2.

(2) A public comment period was provided as required by law and all comments were considered.

(3) The final-form rulemaking adopted by this order is necessary and appropriate for the administration of the act.

(b) A volunteer fire company or a volunteer ambulance service seeking a grant under the Grant Program shall have submitted a completed online or paper form of the grant application to the OSFC on or before 4 p.m. on February 28, 2005.

(c) Applications received after 4 p.m. on February 28, 2005, will be rejected.

(d) The Agency will act to approve or disapprove the applications by May 1, 2005. Applications received by the

Agency on or before February 28, 2005, which have not been approved or disapproved by the Agency by May 1, 2005, will be deemed approved, subject to the act.

(e) Grant award determinations are as follows:

(1) *Volunteer Fire Company Grants.*

(i) A volunteer fire company as defined in § 114.2 (relating to definitions), that actively responded to one or more fire or rescue emergencies since July 1, 2003, and agrees to actively participate in the Pennsylvania Fire Information Reporting System will be eligible for a base award of the first \$7,000 of the applicants grant request.

(ii) Additional grant funds not exceeding \$8,000 will be awarded to eligible applicants by applying an award factor to that portion of the applicant's grant request which exceeds \$7,000.

(A) The award factor is determined by dividing the applicant's bonus points by 15, the highest possible number of points.

(B) Award factor points are as follows:

5 points will be awarded to an eligible fire or rescue service who uses the grant funding to perform a regional/joint project as found in the definitions.

1 point will be awarded for each person currently certified in accordance with the definitions in § 114.2, to a maximum of 10 points.

(iii) If necessary, the resultant additional award will be pro rated by a factor determined by dividing the total Grant Program funds remaining after the base awards have been determined by the total amount of funds requested in excess of the base awards so that all grant awards do not exceed the total grant funds available.

(iv) If funding is not fully distributed after this award factor calculation, the Agency reserves the right to adjust the award factor formula so that all grant funds available are distributed, subject to the act.

(v) Volunteer fire company grants to individual volunteer fire companies will not exceed \$15,000.

(2) *Volunteer Ambulance Service Grant.* A volunteer ambulance service as defined in § 114.2 will be eligible for a grant, not to exceed \$10,000, and pro rated by a factor determined by dividing the total funds available by the total amount of funds requested so that all grant awards do not exceed the total grant funds available.

§ 114.6. Grant award and reporting procedures.

(a) Grant award notifications will be made as follows:

(1) Applicants that apply for the grant using the online application process will be notified by e-mail.

(2) Applicants that apply for the grant using the paper form will be notified by letter.

(b) At the time grant recipients are notified of their award, and in the same manner, they will be presented with a grant agreement. This grant agreement will contain the details of the grant, including the name of recipient, amount of award, project description and terms of the agreement. In the case of volunteer fire company grant recipients, it will also include an agreement that they participate in PennFIRS. The grant agreement shall

be signed by an officer of the organization authorized to commit the recipient organization to the terms of the agreement and returned to the OSFC for execution by the Commonwealth before grant funds can be released.

(c) The applicant will maintain full and accurate records with respect to the project. The Agency will have free access to these records, including invoices of material and services, and other relative data and records, as well as the right to inspect all project work. The applicant shall furnish upon request of the Agency all data, reports, contracts, documents and other information relevant to the project.

(d) The applicant shall, upon completion of the project, but no later than December 1, 2005, file a final report

with the Agency, in a manner and form prescribed by the OSFC. Grant funds not expended by the applicant for the project shall be returned to the Agency prior to or with the filing of the final report. Failure to file a final report will be grounds for the Agency to seek the return of all grant funds awarded.

(e) Funds from this and successive grant programs, even though approved by the agency, will not be released to any recipient organization until that organization has fulfilled its obligation to submit a final report to the Agency documenting the expenditure of all grant funds previously received.

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 individual permits and individual stormwater construction permits in Sections IV and VI, the Department, based upon preliminary reviews, has made a tentative determination of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the EPA Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (act) and regulations adopted under the act.

PUBLIC WATER SUPPLY (PWS) PERMITS

The Department of Environmental Protection has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P. S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users should contact the Environmental Hearing Board (Board) through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

Action on First Application of Nonexceptional Value Sewage Sludge under General Permit PAG-8 or PAG-9

The Department of Environmental Protection (Department) has previously approved coverage under General Permit PAG-8 for the generators of nonexceptional quality sewage sludge. General Permit PAG-08-9901 authorizes the beneficial use of nonexceptional quality sewage sludge

by land application to a reclamation site. The purpose of this notice is to advise the public that the Department has reviewed the Notice for First Land Application of Sewage Sludge for Sky Haven Coal, Inc., 5510 State Park Road, Penfield, PA 15849, Munson No. 2 Site (Permit Number 17960101), located in Morris Township, Clearfield County, affecting approximately 149.8 acres, and has determined that the site is suitable for land application of nonexceptional quality sewage sludge effective February 7, 2005.

The actions of the Department may be appealed to the Environmental Hearing Board, 2nd Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457 by an aggrieved person under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law). Appeals must be filed within 30 days of the date of this issue of the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Environmental Hearing Board's (Board) rules of practices and procedure may be obtained from the Board.

Chesapeake Bay Tributary Strategy Public Meetings

The Department of Environmental Protection (Department) will host five public meetings on Pennsylvania's Chesapeake Bay Tributary Strategy (Strategy). The meetings will be held as follows:

- March 17, 2005, at 2 p.m. and 7 p.m. in the Northeast Regional Office, Susquehanna Room, 2 Public Square, Wilkes-Barre
- March 22, 2005, at 7 p.m. in the Lebanon County Conservation District, Penn State Extension Meeting Room, 2120 Cornwall Road, Lebanon
- March 23, 2005, at 7 p.m. in the Adams County Conservation District, Penn State Extension Meeting Room, 670 Old Harrisburg Road, Gettysburg
- March 30, 2005, at 7 p.m. in the Northcentral Regional Office, Goddard Conference Room, 208 West Third Street, Williamsport

At the meetings, Department staff will review the recently published Strategy, answer questions on the development of the Strategy and seek public input on Strategy implementation. The Strategy identifies a suite of nonpoint source Best Management Practices and point source management approaches that would be necessary to meet new Chesapeake Bay water quality goals adopted in 2004. The Strategy calls for reducing nutrient and sediment loads to streams in this Commonwealth and the Chesapeake Bay from a variety of sources such as agriculture, wastewater treatment plants, urban stormwater and septic systems. For the first time, the Strategy is built upon 13 individual strategies for watersheds in the Susquehanna and Potomac basins. The Strategy identifies the full range of activities needed, regardless of their cost, so planning can begin for the new initiatives that will be needed to support Strategy implementation.

With the signing of the Chesapeake 2000 Agreement, the Commonwealth made a commitment to help remove the Chesapeake Bay from the Federal Clean Water Act's list of impaired waters by 2010. This Commonwealth is critical to this effort as 50% of the fresh water to the Chesapeake Bay flows from the Susquehanna River. The formation of watershed restoration partnerships that

benefit local waters in this Commonwealth and the Chesapeake Bay is the foundation upon which the Commonwealth will build support for Strategy implementation. Key partners include conservation districts, agricultural organizations, watershed organizations, engineers, municipalities and industrial and municipal point source facilities.

Copies of Pennsylvania's Chesapeake Bay Nutrient Reduction Strategy may be obtained by contacting Denise Caudill, (717) 787-5267, dcaudill@state.pa.us. Copies may also be obtained by writing the Water Planning Office, Attention: Tributary Strategy, Department of Environmental Protection, 10th Floor, Rachel Carson State Office Building, P. O. Box 8555, Harrisburg, PA 17105-8555.

Copies are also available on the Department's website: www.dep.state.pa.us (DEP keyword: Chesapeake Bay).

Questions concerning these meetings should be directed to Patricia A. Buckley, Water Planning Office, P. O. Box 2063, Harrisburg, PA 17105-2063, (717) 772-1675, pbuckley@state.pa.us.

Persons with a disability who require accommodations to attend the meeting should contact the Department at (717) 705-2425 or through the Pennsylvania AT&T Relay Services at (800) 654-5984 (TDD) to discuss how the Department may accommodate their needs.

Northeast Regional Stormwater Management Manual Focus Group Meeting Change

The Northeast Regional Stormwater Management Manual Focus Group meeting originally scheduled for

February 28, 2005, at the Department of Environmental Protection, Northeast Regional Office, Wilkes-Barre, PA, was cancelled due to inclement weather. The meeting has been rescheduled and will take place as follows:

March 15, 2005 10 a.m.—4p.m.	Northeast Regional Office Susquehanna Rooms A and B 2 Public Square Wilkes-Barre, PA 18711
---------------------------------	---

The Department of Environmental Protection (Department) has convened regional focus groups across this Commonwealth to assist the Department and a Statewide oversight committee in reviewing and developing a Pennsylvania Stormwater Best Management Practices Manual (manual). The manual will support the implementation of Federal and State water quality programs, emphasizing innovative best management practices that encourage onsite stormwater management and increased groundwater infiltration as a means to minimize stormwater discharges and limit the amount of surface pollutants entering streams in this Commonwealth. Members of the regional focus groups were asked to review the manual for its applicability, develop comments and provide recommendations to the Department. The input provided by the regional focus groups will ensure that the contents of the manual, including recommended approaches, methodologies and best management practices are regionally sensitive and applicable.

The March 15, 2005, meeting, as well as other scheduled regional focus group meetings (see 35 Pa.B. 1392 (February 19, 2005)) are open to the public. Persons in need of accommodations as provided for in the Americans With Disabilities Act of 1990 should contact the Department at (717) 772-5963 or through the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD) to discuss how the Department may accommodate their needs.

Questions concerning the March 15, 2005, regional focus group meeting should be directed to Dennis Stum, Bureau of Watershed Management, (717) 772-5963, dstum@state.pa.us.

NOx Budget Trading Program; NOx Allowance Allocations for 2008—2012

In accordance with 25 Pa. Code § 145.41(b) (relating to timing requirements for NOx allowance allocations), the Department of Environmental Protection (Department) is publishing the NOx allowance allocations for the 2008 through 2012 control periods (May 1 through September 30). The NOx budget for electric generating units (EGUs) is 47,224 allowances, 95% of which are available for allocation to EGUs during each year from 2008 to 2012 for units subject to 25 Pa. Code § 145.4(a)(1) (relating to applicability). The NOx budget for nonelectric generating units (non-EGUs) is 3,619 allowances, 95% of which are available for allocation to non-EGUs during each year from 2008 to 2012 for units subject to 25 Pa. Code § 145.4(a)(2). This final allocation follows the notice published at 25 Pa.B. 599 (January 22, 2005) with a 15-day comment period. As a result of general comments,

discussed later in this document, most prorated NOx allocations for qualifying units were adjusted upward.

Action at the Federal or State level could affect these allocations. For example, the United States Environmental Protection Agency (EPA) could promulgate a new annual NOx Budget Program, leading to revisions of the Commonwealth's NOx Budget Program. Consequently, it is possible that NOx allowances allocated for 2008–2012 would be terminated, limited or otherwise affected. In 25 Pa. Code § 145.2 (relating to definitions), a "NOx allowance" is defined as: "An authorization by the Department under the NOx Budget Trading Program to emit up to one ton of NOx during the control period of the specified year or of any year thereafter, except as provided under § 145.54(f) (relating to compliance). No provision of the NOx Budget Trading Program, any permit, or an exemption under § 145.4(b) or § 145.5 and no provision of law will be construed to limit the authority of the Department or the Administrator to terminate or limit the authorization, which does not constitute a property right. For purposes of all sections of this subchapter except §§ 145.41–145.43 and 145.88, NOx allowance also includes an authorization to emit up to one ton of NOx during the control period of the specified year or of any year thereafter by the Department or the Administrator." For the purposes of the NOx Budget program, the "Administrator" is defined as the Administrator of the EPA or the Administrator's authorized representative.

In addition to the normal NOx allocations, one facility was allocated allowances in accordance with the provisions of 25 Pa. Code Chapter 145 (relating to interstate pollution transport reductions), regarding the retirement of budget units and the transfer of emission reduction credits (ERCs) to nonbudget units. Shenango (Oris Code 54532) has filed a request to transfer ERCs from its Boilers 9 and 10 to non-NOx budget units as of April 31, 2004. As per 25 Pa. Code § 145.90(c)(3) (relating to emission reduction credit provisions), allocations for NOx allowance control periods following 2002 to a NOx ERC source may not include allowances equivalent to that portion of the non-NOx budget units' NOx control period allowable emissions provided for by the NOx ERCs. In accordance with the requirements of 25 Pa. Code § 145.40(b) (relating to State Trading Program budget) and 25 Pa. Code 145.90(c), the ERC transfer will permanently retire 45 NOx allowances from the non-EGU budget. The difference between Shenango's 2008 to 2012 NOx adjusted allowance allocations and its ERC transfer is 13 allowances per year. Thus, Boiler 9 will be allocated 13 allowances during each of these control periods. Shenango will also be required to retire 45 allowances for each control period from 2004 to 2007.

One facility was allocated allowances in accordance with the provisions of 25 Pa. Code Chapter 145, in accordance with its Twenty-Five Ton Exemption Status. The Naval Surface Warfare Center's (Oris Code 880009) Unit 99, exempted under the provisions of 25 Pa. Code § 145.4(b), the 25-ton exemption rule, is allocated at a heat input of zero in accordance with 25 Pa. Code § 145.42(a)(2)(ii) (relating to NOx allowance allocations).

Table 1, pertaining to the 2008 through 2012 NOx Budget Allocations, lists the following: the units' average "Heat Input," the "Name" of each facility, the "Oris Code," "Unit Number," "Allocation" and the "Adjusted Allocation" prorated to fit within the Commonwealth's NOx Budget. Slight differences in the adjusted allocation for the same allocation total are a result of heat input differences and rounding errors.

Several comments were received indicating that the allocation of allowances to common stacks and multiple stacks should not occur. The Department agrees. Only "units" may get allocated NOx budget allowances under 25 Pa. Code Chapter 145. The Department made the required corrections for the final allowance allocations and adjusted all allowances for each unit accordingly.

A few comments were made with regard to units that were part of the original OTC Budget Program in 25 Pa. Code Chapter 123 (relating to standards for containment) but were not subject to the 25 Pa. Code Chapter 145 NOx Budget Trading Program. The commentators stated that even though those units had heat input for 2002, they should not get allocations under 25 Pa. Code Chapter 145 requirements. The Department agrees; the Chapter 123 units that were not subject to the 25 Pa. Code Chapter 145 NOx Budget Trading Program were identified and removed from the 2008 to 2012 allocation process.

Reliant Energy commented that three of its retired units had heat inputs for 2002 and 2003 and should be included in the allocation. The Department agrees and Units 12, 14 and 15 were added to the allocation. The units were allocated allowances based upon 2 years of heat input averaged over 3 years.

The remaining comments dealt with typographical errors and minor corrections to heat input data. The Department made corrections as appropriate.

Persons aggrieved by an action may appeal, under Section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501–508 and 701–704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania Relay Service at (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. The Secretary to the Board should be contacted at (717) 787-3483 for additional information.

Questions concerning this notice should be directed to Randy Bordner, Bureau of Air Quality, Division of Air Resource Management, 400 Market Street, P. O. Box 8468, Harrisburg, PA 17105-8468, (717) 772-3423, ranbordner@state.pa.us.

NOx Budget Trading Program; New Source Set-Aside 2005 Allocations

In accordance with 25 Pa. Code § 145.41(d) (relating to timing requirements for NOx allowance allocations), the Department of Environmental Protection (Department) is publishing the allowance allocations from the new source set-aside allowance allocations for the 2005 control period (May 1, 2005, through September 30, 2005). The new source set-aside contains 2,542 allowances, 1,945 of which are available for new sources after allocation corrections. For each NOx budget unit, the following table lists: 1) the allowances applied for under the "request" column; 2) the maximum potential number of allowances authorized by the regulation under the "maximum" column; and 3) the final, pro rata allocation under the "allocation" column.

New source operators are advised that this allocation is for one control period only. To receive allocations from the new source set-aside for future control periods, source operators must submit new requests to the Department by January 1 each year.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania Relay Service at (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. The Secretary to the Board should be contacted at (717) 787-3483 for additional information.

Questions concerning this notice should be directed to Randy Bordner, Bureau of Air Quality, Division of Air Resource Management, 400 Market Street, P. O. Box 8468, Harrisburg, PA 17105-8468, (717) 772-3423, ranbordner@state.pa.us.

*Department of Public Welfare—Personal Care Homes;
Regulation No. 14-475*

On September 23, 2002, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Department of Public Welfare (Department). This rulemaking amends 55 Pa. Code by replacing Chapter 2620 with Chapter 2600. The proposed regulation was published in the October 5, 2002, *Pennsylvania Bulletin* with a 30-day public comment period. The final-form regulation was submitted to the Commission on November 4, 2004. The Commission received a request from the Department on February 3, 2005, to toll consideration of this final-form regulation to make revisions based on requests from the House Health and Human Services and Senate Public Health and Welfare Committees, and this Commission. On February 11, 2005, the Department submitted its revisions to the final-form regulation to the Commission.

This regulation is a comprehensive revision and update of the requirements and standards governing the licensing and inspection of personal care homes in the Commonwealth. The regulation includes new provisions covering residents' rights, staff qualifications and training, fire safety, medication administration and resident evaluations. The Department indicates that there are approximately 1,700 personal care homes in the Commonwealth and these facilities serve approximately 54,000 people.

We have determined this regulation is consistent with the statutory authority of the Department (62 P. S. §§ 211, 901—922 and 1001—1087) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

By Order of the Commission:

This regulation is approved.

Jurisdictional Agreement Pursuant to Act 94 of 2004;
Doc. No. M-00051868

Order

By the Commission:

Pursuant to Act 94 of 2004, the Commission and the Philadelphia Parking Authority are empowered to resolve, by mutual agreement, any jurisdictional issues associated with the transfer of regulatory oversight of various types of passenger carriers operating in Philadelphia. In keeping with this charge, the Commission and the Philadelphia Parking Authority have identified various jurisdictional issues requiring resolution. The following Jurisdictional Agreement addresses and resolves these issues.

Upon review of the Jurisdictional Agreement, we hereby approve same and authorize the Commission's Secretary to execute the Agreement on behalf of the Commission. *Therefore,*

It Is Ordered That:

The following Jurisdictional Agreement that follows is hereby approved.

JAMES J. MCNULTY,
Secretary

JURISDICTIONAL AGREEMENT
Commonwealth of Pennsylvania
Pennsylvania Public Utility Commission
and
Philadelphia Parking Authority

This Agreement between the Pennsylvania Public Utility Commission ("Commission") and the Philadelphia Parking Authority ("PPA"), covers jurisdictional issues associated with the transfer of regulatory oversight of various types of passenger carriers, operating in Philadelphia, from the Commission to the PPA pursuant to Act 94 of 2004. Section 22 of Act 94 provides that the Commission and the PPA are empowered to resolve by mutual agreement any jurisdictional issues associated with the transfer. Following meeting and discussions by the Commission and the PPA, several jurisdictional issues have been identified. The Commission and the PPA have entered into this Agreement to resolve those issues.

1. Medallion Taxicabs

Various Medallion taxicabs currently hold authority from the Commission, in addition to their Medallion authority, to serve areas outside of Philadelphia. The Commission and the PPA agree that service provided to/from Philadelphia to/from all points outside Philadelphia, regardless of whether those points outside Philadelphia are within the carrier's extra-Philadelphia operating authority, will be regulated by the PPA.

2. Partial Authority Taxicabs

Currently, there are carriers authorized to provide taxicab service to designated areas within Philadelphia on a non-city wide basis. Section 11 of Act 94 provides that the PPA has jurisdiction over these carrier's operations within Philadelphia. These carriers also hold authority from the Commission to serve designated areas outside Philadelphia. The Commission and the PPA agree that service provided under dual authority to/from points within the PPA authorized area (in Philadelphia) to/from points within the Commission authorized area (outside Philadelphia), will be regulated by the PPA.

3. Limousines

Limousine carriers that will hold dual authority from the Commission and the PPA would fall under both entities' jurisdiction for trips to/from Philadelphia, with the exception of trips from an airport, railroad station, or hotel located, in whole or part, in Philadelphia.¹ The Commission and the PPA agree that this service will be regulated by the PPA.

4. Approval

Following execution, this Agreement shall be reported to the Appropriations Committees of the Senate and the House of Representatives. This Agreement will be effective unless either the Senate or House of Representatives rejects this Agreement, by resolution, within ten legislative days of submission.

5. Publication

Upon becoming effective, this Agreement shall be published in the *Pennsylvania Bulletin*.

IN WITNESS WHEREOF, the Commission and the PPA have duly executed this Agreement.

Ratification and Adoption of Amendment to Part 192 and Part 193 of Title 49 of the Code of Federal Regulations;
Docket No. M-00051867

Order

By the Commission:

At 52 Pa. Code § 59.33(b) the Commission has adopted, except as otherwise indicated, the federal safety stan-

dards for natural gas transmission and distribution facilities. The federal standards are established by the United States Department of Transportation (DOT) at 49 U.S.C. §§ 60101, et seq., and are set forth in Parts 191, 192, 193 and 199 of Title 49 of the *Code of Federal Regulations*. Section 59.33(b) provides, in pertinent part, that amendments to Title 49 will become effective in Pennsylvania upon the date of entry of a Commission ratification order where that order is served upon all jurisdictional natural gas companies or, alternatively, upon the date of such order's publication in the *Pennsylvania Bulletin*.

A. On April 23, 2004, at *Federal Register*, Vol. 69, No. 79, page 21975, Amendment 192-91 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. In this final rule, the Research and Special Programs Administration (RSPA) corrected the amendment number cited in the caption of the final rule published in the *Federal Register* on August 6, 2002 (67 FR 50824). The amendment number cited in the caption of this final rule was "Amendment 192-77." The correct amendment number is "Amendment 192-91." This correction does not affect the substance or content of the rule.

B. On June 14, 2004 at *Federal Register*, Vol. 69, No. 113, pages 32886—32898, Amendment 191-16, 192-94, and 199-20 were adopted and codified by the Federal Department of Transportation at 49 CFR §§ 191, 192, 199. The final rule is part of an effort by RSPA to periodically update the pipeline safety regulations. This rule incorporates the most recent editions of the voluntary consensus standards and specifications referenced in the Federal pipeline safety regulations to enable pipeline operators to utilize the most current technology, materials, and industry practices in the design, construction, and operation of their pipelines. This rule also increases the design pressure limitation for new thermoplastic pipe, allows the use of plastic pipe for certain bridge applications, increases the time period for revision location, clarifies welding requirements, and makes various other editorial clarifications and corrections. This final rule does not require pipeline operators to undertake any significant new pipeline safety initiatives.

C. On September 9, 2004, at *Federal Register*, Vol. 69, No. 174, pages 54591—54593, Amendment 192-94 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. RSPA is correcting a final rule published in the *Federal Register* on June 14, 2004 (69 FR 32886). That final rule amended and updated various sections of the pipeline safety regulations and incorporated the most recent editions of the voluntary consensus standards publications referenced in 49 CFR parts 192 and 195. That document made an inadvertent error in the definition of "Transmission line" in Section 192.3, failed to properly amend Appendix B to part 192, inadvertently reversed a recent amendment to a welder qualification requirement in Section 195.222, and contained several typographical errors. This document corrects the final rule by revising the relevant sections.

D. On April 6, 2004, at *Federal Register*, Vol. 69, No. 66, pages 18227—18242, Amendment 192-95 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. This document corrects a final rule published in the *Federal Register* on December 15, 2003 (68 FR 69778). That rule requires operators to develop integrity management programs for gas transmission pipelines located where a leak or rupture could do the most harm, i.e., could impact high consequence areas (HCAs). The rule requires gas transmission pipeline operators to perform ongoing assessments of pipeline

integrity, to improve data collection, integration, and analysis, to remediate the pipeline as necessary, and to implement additional preventive and mitigative actions. The document makes minor editorial corrections and clarifies the intent of several provisions in the rule. This document also addresses a petition for reconsiderations filed by the Interstate Natural Gas Association of America (INGAA).

E. On May 17, 2004, at *Federal Register*, Volume 69, No. 95, pages 27861—27863, Amendment 192-96 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. RSPA published in the *Federal Register* on September 15, 2003, a final rule concerning the operation and capacity of existing pressure limiting and regulating stations on gas pipelines. The rule inadvertently established a pressure limit that could require a reduction in the operating pressure of some pipelines and be impracticable for others to meet. The direct final rule establishes an appropriate pressure limit to avoid these unintended results.

F. On September 8, 2004, at *Federal Register*, Vol. 69, No. 173, pages 54248—54249, Amendment 192-96 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. The document confirms the effective date of the direct final rule adopted on May 17, 2004, at *Federal Register*, Volume 69, No. 95, pages 27861—27863. Amendment 192-96 will go into effect on October 8, 2004.

G. On June 28, 2004, at *Federal Register*, Vol. 69, No. 123, pages 36024—36029, Amendment 192-97 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. RSPA published a regulation requiring that new gas transmission lines and sections of existing transmission lines in which pipe or components are replaced be designed and constructed to accommodate the passage of instrumented internal inspection devices. Responding to petitions for reconsideration, RSPA stayed enforcement on some facilities and invited comments on proposed changes to the regulation. The present action concludes RSPA's consideration of the petitions and comments. For existing onshore transmission lines, this action restricts the regulation to replacements of pipe or components. For offshore transmission lines, the regulation is restricted to certain new lines that run between platforms or from platforms to shore. The action aligns the regulation with the supporting congressional directive and related Marine Board recommendation.

H. On August 10, 2004, at *Federal Register*, Vol. 69, No. 153, pages 48400—48407, Amendment 192-98 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192. The rule amends the pipeline safety regulations to require operators of gas and hazardous liquid pipelines to prepare and follow procedures for periodic inspections of pipeline facilities located in the Gulf of Mexico and its inlets in waters less than 15 feet deep. These inspections will inform the operator if the pipeline is exposed or a hazard to navigation.

I. On March 10, 2004, at *Federal Register*, Vol. 69, No. 47, pages 11330—11337, Amendment 193-18 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 193. This final rule clarifies that the operation, maintenance, and fire protection requirements of the RSPA's Office of Pipeline Safety's (OPS) regulations for liquefied natural gas (LNG) facilities apply to LNG facilities in existence or under construction as of March 31, 2000. An earlier final rule made the applicability of these requirements unclear. Additional changes to the

regulations remove incorrect cross-references, clarify fire drill requirements, and require reviews of plans and procedures. Lastly, the final rule changes the regulations so that cross-references to the National Fire Protection Association standard, NFPA 59A, refer to the 2001 edition of that standard rather than the 1996 edition. These clarifications and changes will improve the clarity and effectiveness of the regulations.

Copies of the aforementioned *Federal Register* publications are attached to this order.

Keeping in mind the safety of the public, we have reviewed the previously-referenced amendments in accordance with the provisions of 52 Pa. Code § 59.33. Based upon this review, we find that each Department of Transportation amendment to be in the public interest and adopt them as our own. The effective date of our adoption of the aforementioned amendments shall be the date upon which this order is entered. *Therefore,*

It Is Ordered That:

1. The following amendments adopted by the U.S. Department of Transportation are hereby ratified and adopted in accordance with the provisions of 52 Pa. Code § 59.33(b):

(a) *Federal Register*, Vol. 69, No. 79, page 21975, Amendment 192-91 was adopted and codified by the Federal Department of Transportation at 49 CFR §§ 192;
