APPLICATIONS

THE CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT APPLICATIONS FOR NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS

This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a general permit. The applications concern, but are not limited to, discharges related to industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFOs). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92 and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act.

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or amendment
Section III	WQM	Industrial, sewage or animal waste; discharge into groundwater
Section IV	NPDES	MS4 individual permit
Section V	NPDES	MS4 permit waiver
Section VI	NPDES	Individual permit stormwater construction
Section VII	NPDES	NOI for coverage under NPDES general permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years, subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 individual permits and individual stormwater construction permits in Sections IV and VI, the Department, based upon preliminary reviews, has made a tentative determination of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on an NPDES application are invited to submit a statement to the regional office noted before an application within 30 days from the date of this public notice. Persons wishing to comment on a WQM permit application are invited to submit a statement to the regional office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. Comments should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for a public hearing on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Brent Hershey has submitted an application to renew the existing Individual NPDES permit for an existing CAFO known as the Aspen Perry Farm, located in Oliver Township, **Perry County**.

The CAFO is situated near an Unnamed tributary to Buffalo Creek, which is classified as a high-quality, cold water fishery. The CAFO includes 4 animal housing units designed to maintain an animal population of approximately 1,725 animal equivalent units consisting of 4,800 sows and 6,000 piglets. Manure is stored in a high-density polyethylene-lined earthen impoundment with a total capacity of approximately 6.9 million gallons. Manure produced at the operation is applied on-site or exported to local farmers in accordance with an approved Nutrient Management Plan. A release or discharge to waters of the Commonwealth under normal operating conditions is not expected. Normal operating conditions are defined as conditions below a 25-year, 24-hour storm event.

The Department of Environmental Protection (Department) has conducted administrative and technical reviews of the application. Based on the preliminary review and application of lawful standards and regulations, the Department has made a tentative determination to reissue the NPDES permit for the operation subject to the terms and conditions and monitoring and reporting requirements specified in the permit. The permit application and draft permit are on file at the Southcentral Regional Office of the Department.

You may make an appointment to review the Department’s files by calling the File Review Coordinator at 717-705-4732.

Persons wishing to comment on the proposed permit are invited to submit written comments to the previously listed address within 30 days from the date of this public notice. Comments received within this 30-day period will be considered in formulating the Department’s final determination regarding the application. Following the 30-day comment period, the Watershed Management Program Manager will make a final determination regarding the proposed permit. Notice of this determination will be published in the *Pennsylvania Bulletin* at which time the determination may be appealed to the Environmental Hearing Board.

The Environmental Protection Agency permit waiver provision under 40 CFR 123.24(e) does not apply to this NPDES permit.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any

contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for

the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (act) and regulations adopted under the act.

The Department's review of the information submitted by CraftMaster Manufacturing, Inc. indicates that the proposed increase in NOx emissions will meet all applicable air quality regulatory requirements pertaining to air contamination sources and the emission of air contaminants, including the Best Available Technology requirements of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department intends to approve the application and issue plan approval for the NOx emissions increase for the die form tempering kiln and associated RTO. Additionally, if the Department determines that the sources are operating in compliance with all plan approval conditions, the conditions established in the plan approval will be incorporated into Title V operating permit 08-00003 by means of an administrative amendment under 25 Pa. Code § 127.450.

The following is a summary of the conditions that the Department proposes to place in the plan approval to be issued to ensure compliance with all applicable regulatory requirements:

The RTO is equipped with a Maxon Kinedizer high velocity type low-NOx natural gas/propane fired burner with a rated heat input of 2.5 mmBtu/hr. The RTO is also equipped with a natural gas injection system for NOx emissions reduction and lowered fuel consumption. The RTO is designed for a maximum inlet volume of 15,000 scfm.

2. This condition supersedes condition #001 of Section D Source ID 193P of plan approval 08-00003E. Under the best available technology provisions of 25 Pa. Code §§ 127.1 and 127.12, the NOx and CO emissions from the die form kiln of Source ID 193P and associated RTO (Control Device ID C193) shall not exceed the following:

- a) For NOx: 2.89 lbs/hr and 6.6 tons in any 12 consecutive month period.
- b) For CO: 3.17 lbs/hr and 9.7 tons in any 12 consecutive month period.

3. All conditions contained in Title V operating permit 08-00003 and plan approval 08-00003E remain in effect unless superseded or amended by conditions contained in this plan approval. If there is a conflict between a condition or requirement contained in this plan approval and a condition or requirement contained in Title V operating permit 08-00003 or plan approval 08-00003E, the permittee shall comply with the condition or requirement contained in this plan approval rather than the conflicting condition or requirement contained in Title V operating permit 08-00003 or plan approval 08-00003E.

The potential emissions for nitrogen oxides (NO_x), volatile organic compounds (VOCs), particulate matter (PM/PM₁₀), sulfur oxides (SO_x) and hazardous air pollutants are below their respective major emission thresholds. The five compressor engines and two emergency generators are subject to Subpart ZZZZ of the Federal National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines, 40 CFR 63.6580—63.6675. The proposed Title V operating permit renewal contains all applicable regulatory requirements including monitoring, recordkeeping and reporting conditions.

PA 40-399-66: Acton Technologies (100 Thompson Street, Pittston, PA 18640) for installation of a new Regenerative Thermal Oxidizer (RTO) to control malodorous emissions at their facility in Jenkins Township, **Luzerne County**.

In accordance with 25 Pa. Code §§ 127.44(a) and 127.45(a), the Department of Environmental Protection (Department) has received and intends to issue a Plan Approval to Acton Technologies (100 Thompson Street, Pittston, PA 18640) for their facility in Jenkins Township, Luzerne County. This Plan Approval No. 40-399-66 will be incorporated into a Natural Minor Permit through an administrative amendment at a later date.

Plan Approval No. 40-399-066 is for the installation of a new RTO to control malodorous emissions at their facility. VOC emissions from the plant will remain under their 50 tpy threshold limit, 12-month rolling sum. Malodorous emissions will be controlled by the use of a new RTO. The oxidizer will be required to have a destruction efficiency of at least 98%. These limits will meet BAT requirements for this source. A stack test will be required to verify these limits.

The Department will place a condition for the facility to continuously monitor the combustion temperature in the oxidizer. The Plan Approval and Operating permit will contain additional recordkeeping and operating restrictions designed to keep the facility operating within all applicable air quality requirements.

Copies of the application, Department's analysis and other documents used in the evaluation of the application are available for public review during normal business hours at Air Quality Program, 2 Public Square, Wilkes-Barre, PA 18711.

Any person(s) wishing to provide Department with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to the address shown in the preceding paragraph. Each written comment must contain the following:

Name, address and telephone number of the person submitting the comments.

Identification of the proposed permit No.: 40-399-066.

A concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the *Pennsylvania Bulletin* or by telephone, where the Department determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Ray Kempa, Chief, New Source Review Section, Air Quality Program, 2 Public Square, Wilkes-Barre, PA 18711, Phone No. 570-826-2511 within 30 days after publication date.

COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law (35 P. S. §§ 691.1—691.1001); the Coal Refuse Disposal Act (52 P. S. §§ 30.51—30.66); The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.21). Mining activity permits issued in response to such applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4015); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of the application is available for inspection at the District Mining Office indicated above each application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for the certification.

Written comments or objections, or requests for an informal conference, or a public hearing, as applicable, on a mining permit application may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the address of the district mining office indicated above each application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Written comments or objections related to a mining permit application should contain the name, address and telephone number of persons submitting comments or objections; application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code §§ 77.123 or 86.34, must contain the name, address and telephone number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

When a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. The Department has made a tentative determination to issue the NPDES permit in conjunction with the mining activity permit, but the issuance of the NPDES permit is contingent upon the approval of the associated mining activity permit.

For coal mining activities, NPDES permits, when issued, will contain effluent limits that do not exceed the technology-based effluent limitations. The proposed limits are listed in Table 1.

For noncoal mining activities, the proposed limits are found in Table 2. Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description below specifies the parameters. The limits will be in the ranges specified in Table 1.

More restrictive effluent limitations, restrictions on discharge volume, or restrictions on the extent of mining that may occur, will be incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding Concerning Water Quality Management, NPDES Program Implementation and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Loads (TMDLs).

Persons wishing to comment on an NPDES permit application should submit a statement to the Department at the address of the district mining office indicated previously each application within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92.61. The request or petition for a public hearing shall be filed within 30 days of this public notice and shall contain the name, address, telephone number and the interest of the party filing the request, and shall state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. In the case where a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION**UNDER ACT 2, 1995****PREAMBLE 2**

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a Site-Specific Standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION**UNDER ACT 2, 1995****PREAMBLE 3**

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of

concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a Site-Specific Standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the Environmental Cleanup Program manager in the Department regional office before which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. CONTROL ACT SECTION 401**

The Department of Environmental Protection (Department) has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with the applicable provisions of sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483.

TDD users should contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Actions on applications for the following activities filed under the Dam Safety and Encroachments Act (32 P.S. §§ 693.1—693.27), section 302 of the Floodplain Management Act (32 P.S. § 679.302) and The Clean Streams Law (35 P.S. §§ 691.1—691.702) and Notice of Final Action for Certification under section 401 of the FWPCA (33 U.S.C.A. § 1341).

This permit was issued under Section 105.13(e) "Small Projects." This permit also includes 401 Water Quality Certification.

E14-530. Department of Transportation, Engineering District 2-0, 1924 Daisy Street Extension, Clearfield, PA 16830. The applicant proposes to replace a single span, single lane I-beam bridge with a single span, two lane concrete box culvert over an Unnamed Tributary to Cedar Run (also known as Mackey Run). The proposed box culvert will be located approximately 150 feet north of the existing structure along the existing roadway alignment. Approximately 250 feet of stream will be relocated and will result in a loss of approximately 84 feet of stream. The stream relocation will eliminate two 90° curves as well as two culverts used to access the adjacent property. The stream relocation will utilize a natural stream design featuring a low flow channel and log structures to provide aquatic habitat and stream stability. The Unnamed Tributary to Cedar Run is classified as a Cold Water Fishery by 25 Pa. Code Chapter 93. This project does not propose to impact any jurisdictional wetlands. This permit also includes 401 Water Quality Certification.

This permit was issued under Section 105.13(e) "Small Projects."

Planning Grant Awards under Section 901 of the Municipal Waste Planning, Recycling and Waste Reduction Act of 1988, Act 101

The Department of Environmental Protection announces the following grants to counties under the Pennsylvania Municipal Waste Planning, Recycling and Waste Reduction Act of 1988 (P. L. 556, Act 101) Section 901 and Section 208 of the Waste Tire Recycling Act/Small Business and Household Pollution Prevention Act (Act 190 of 1996).

Planning grants are awarded to counties for 80% of approved costs for preparing municipal waste management plans as required by Act 101, for carrying out related studies, surveys, investigations, inquiries, research and analysis, including those related to siting, environmental mediation, education programs on pollution prevention and household hazardous waste and providing technical assistance to small businesses for pollution prevention. Grants may be awarded for feasibility studies and project development for municipal waste processing or disposal facilities, except for facilities for the combustion of municipal waste that are not proposed to be operated for the recovery of energy. Grant awards are predicated on the receipt of recycling fees required by sections 701 and 702 of Act 101 and the availability of moneys in the Recycling Fund.

Inquiries regarding the grant offerings should be directed to Mr. Mark Vottero, Department of Environmental Protection, Bureau of Waste Management, Division of Waste Minimization and Planning, P. O. Box 8472, Harrisburg, PA 17105-8472.

Application for National Pollutant Discharge Elimination System (NPDES) Permit to Discharge to State Waters

Application No. NPDES PA 0119172, Treated Mine Drainage; Shenango, Inc. (200 Neville Road, Pittsburgh, PA 15225). This facility is located in Luzerne Township, **Fayette County**.

Description of activity: The application is for an amendment of an NPDES permit for an existing discharge of treated mine water.

The receiving stream, Wallace Run, is in the Monongahela River Watershed and classified as WWF. The nearest downstream public water supply intake is for Southwestern PA Water Authority and is located on the Monongahela River, approximately 2.7 miles downstream. The discharge is not expected to affect the water supply.

The proposed effluent limits for Outfalls 13T and 10T for a design flow of 0.1 MGD are:

I. Effluent Limitations and Monitoring Requirements**A. Mine Drainage Treatment Facilities**

Draft Technical Guidance—New Guidance

DEP ID: 362-2100-001. Title: Policy for Coordinating National Pollutant Discharge Elimination System (NPDES) permitting in the Monongahela River watershed. Description: The policy has been developed to guide NPDES permitting in the Monongahela River Watershed in the wake of several water quality issues related to total dissolved solids (TDS) and sulfate, which emerged during 2008 and 2009. During seasonal low flow in the river in 2008, TDS and Sulfate concentrations exceeded the numeric water quality criteria at all of the 13 potable water supply intakes from the border of West Virginia to Pittsburgh. This guidance is designed to apply to new dischargers and new sources, any facility expansions, production increases, process modifications or changes in waste streams. This guidance applies only to the pollutants of concern that have been identified as exceeding water quality standards, that is TDS and sulfate. Comments: Interested persons may submit written comments on this draft policy document by May 17, 2010. The Department will accept comments submitted by e-mail, but comments submitted by facsimile will not be accepted. A return name and address must be included in each e-mail transmission. Written comments should be submitted to Ron Furlan, Department of Environmental Protection, Bureau of Water Standards and Facility Regulation, Division of Planning and Permits, P. O. Box 8774, Harrisburg, PA 17105-8774 or rfurlan@state.pa.us. Contact: Questions regarding the policy document should be directed to Ron Furlan at rfurlan@state.pa.us or (717) 787-8184.

Effective Date: Upon publication of notice as final in the *Pennsylvania Bulletin*.

DEP ID: 563-2111-115. Title: Borrow Pits for Oil and Gas Well Development Activities. Description: The Oil and Gas Act allows the removal of borrow material for use in well development activities, under certain circumstances, to proceed without a mining permit. Borrow activities that do not meet the requirements need a noncoal surface mining permit. The purpose of this guidance is to provide direction for determining if a borrow area requires a mining permit. Note that further guidance is under development to address the standards for those borrow pits that do not require a noncoal mining permit. Comments: Written and electronic comments should be submitted to: William S. Allen, Jr., Bureau of Mining and Reclamation, P. O. Box 8461, Harrisburg, PA 17105-8461, or wallen@state.pa.us. Comments submitted by facsimile will not be accepted. Comments must be received by the Department by May 31, 2010. Contact: Questions regarding the draft technical guidance document should be directed to William S. Allen, Jr., at wallen@state.pa.us or (717) 787-5015.

Clean Air Interstate Rule (CAIR); Final 2014 Annual and Ozone Season CAIR Nitrogen Oxides (NOx) Allowance Allocations

In accordance with 25 Pa. Code §§ 145.211(d) and 145.221(d) (relating to timing requirements for CAIR NOx allowance allocations; and timing requirements for CAIR NOx ozone season allowance allocations), the Department of Environmental Protection (Department) is providing notice of the finalization of the 2014 annual and ozone season CAIR NOx allowance allocations. A 15-day public comment period on the proposed allocations was published in the *Pennsylvania Bulletin* at 40 Pa.B. 1594 (March 20, 2010). No comments were received. No changes to the proposed allocations were made.

The Commonwealth's NOx budget for the annual CAIR program contains 99,049 NOx allowances; 97,761 NOx allowances are allocated. The remaining 1,288 NOx allowances (1.3% of the annual CAIR program budget) are set-aside for future allocation in accordance with 25 Pa. Code § 145.212(f)(2) (relating to allocations to qualifying resources and units exempted by section 405(g)(6)(a) of the Clean Air Act). The Commonwealth's NOx budget for the ozone season CAIR program contains 42,171 NOx allowances, all of which are allocated.

For each CAIR unit and qualifying resource receiving a NOx allocation, Tables 1 and 2 that follow, list the following: the facility name, ORIS code, unit ID for each CAIR unit, either the gross loading or steam loading depending on type of unit, county, converted heat input from the base year and control period allowance allocation. Copies of these tables can also be found on the Department's Air Quality web site at www.depweb.state.pa.us (DEP keyword "Air Quality").

Action at the Federal or State level could affect these allocations. Annual and ozone season CAIR NOx allowances do not constitute property rights.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P. S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O. Box 8457,

Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service at (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Questions concerning this notice should be directed to Randy Bordner, Chief, Stationary Source Section, Bureau of Air Quality at (717) 772-3921 or to ranbordner@state.pa.us. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how Department can best accommodate their needs.

Control Measures under Consideration by the Ozone Transport Commission; Public Comment Period

The Department of Environmental Protection (Department) is seeking comments on control measures under consideration by the Ozone Transport Commission (OTC) for the attainment and maintenance of the ozone national ambient air quality standards (NAAQS). This public comment period is consistent with the requirements of section 7.4 of the Pennsylvania Air Pollution Control Act (35 P. S. § 4007.4) (relating to interstate transport commission), which requires an opportunity for public review and comment on control strategies that will be recommended by the OTC for adoption.

The OTC, a multi-state organization created under sections 176A and 184 of the Federal Clean Air Act, is authorized to develop recommendations for additional control measures to mitigate the transport of ozone and its precursors in the Ozone Transport Region (OTR) established by operation of law. In addition to this Commonwealth, the OTR is comprised of the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, Vermont, northern Virginia and the District of Columbia.

In March 2008, the United States Environmental Protection Agency (EPA) established primary and secondary ozone national ambient air quality standards (NAAQS) of 0.075 parts per million (ppm) or 75 parts per billion (ppb). In response to litigation, EPA Administrator Lisa Jackson announced that the agency would reconsider the March 2008 ozone NAAQS and adopt a standard more protective of public health and the environment. Notice of the revised primary ozone standard ranging from 0.060 to 0.070 ppm (60 to 70 ppb) was published in the *Federal Register* on January 19, 2010. In addition, EPA also proposed a new cumulative, seasonal "secondary" standard ranging from 7–15 ppm-hours to protect sensitive vegetation and ecosystems. (75 FR 2938) The final ozone standards are expected in August 2010. When EPA establishes a NAAQS, states must submit State Implementation Plan revisions to demonstrate attainment and maintenance of the NAAQS in a timely fashion.

Based on current ozone data, most areas of this Commonwealth will be designated as nonattainment, if EPA adopts a primary ozone standard of 0.060 or 0.065 ppm. During the implementation of the 2010 ozone NAAQS,

this Commonwealth will work cooperatively with the member states of the OTC and other regional organizations to develop cost-effective strategies for attaining the NAAQS and to develop the necessary air quality attainment demonstrations.

The OTC has adopted resolutions setting forth the process and schedules for developing these strategies and attainment demonstrations, including work by mobile, stationary and area source, and modeling committees. The OTC and its member states have held public meetings for stakeholders, most recently on March 16, 2010, on potential control measures. The Department staff has reviewed stakeholder comments submitted to the OTC during the most recent comment period that closed April 6, 2010.

The OTC is planning to consider action in June 2010, by which member states would commit to pursue the following control strategies:

- NOx controls on new natural gas-fired industrial, commercial and institutional boilers, steam generators, process heaters and water heaters;
- NOx controls on oil and natural gas-fired boilers serving electric generating units;
- NOx controls on stationary generators;
- VOC controls on consumer products;
- VOC controls on architectural, industrial and maintenance coatings; and
- VOC controls on large above-ground storage tanks.

Materials describing the potential control measures can be found on the Department's web site at www.depweb.state.pa.us, choose "Air Quality." Additional materials can be found at the OTC web site, www.otcair.org, choose "Meetings."

Comments should be sent by May 28, 2010, to Arleen Shulman, Chief, Division of Air Resource Management, Bureau of Air Quality, P. O. Box 8468, Harrisburg, PA 17105-8468 or ashulman@state.pa.us. The Department will consider and retain all comments, but will not prepare a comment and response document.

Adoption by the OTC of any of these measures is considered a commitment by signatory states to pursue legislative or regulatory action to adopt and implement these measures. Any control measure proposed for promulgation in this Commonwealth would be subject to the Commonwealth's notice and comment rulemaking process

under the Commonwealth Documents Law, Regulatory Review Act and Commonwealth Attorneys Act.

Interstate Pollution Transport Reduction; Final 2010 Ozone Season NOx Emission Limits for Nonelectric Generating Units

The Department of Environmental Protection (Department) is providing notice of the final nonelectric generating unit (non-EGU) 2010 ozone season NOx emission limitations established in accordance with 25 Pa. Code § 145.8(d) (relating to transition to CAIR NOx trading programs).

Notice of a 15-day public comment period on the proposed limits was published at 40 Pa.B. 1594 (March 20, 2010). The public comment period offered the public an opportunity to review the information and data as a way to ensure that the information was correct. One comment was received. No changes to the emission limitations were made.

The commentator commented on its proposed 2010 limit of 0 tons for a particular unit as being a penalty for taking outages during the 2009 ozone season during the recession and believes the limit prevents the commentator from operating the unit in 2010. This is not the case. The Clean Air Interstate Rule (CAIR) transition rule will not prevent the unit's operation. For non-EGUs it sets a threshold at which the unit will need to surrender CAIR NOx Ozone Season allowances if the ozone season State-wide NOx emissions limitation for non-EGUs in 25 Pa. Code § 145.8(d) is exceeded.

If the Statewide emissions limitation is exceeded, the owner and operator of any unit that exceeds its individual allowable emissions established under 25 Pa. Code § 145.8(d) for that ozone season may also use any unused portion of an emission limitation allocated to the other units within the facility and from other facilities under common ownership throughout this Commonwealth to cover any excess NOx emissions.

Furthermore, the commentator suggested the Department allocate a limit for the unit similar to the 2009 limit from the surplus fund given the operator's unique circumstances. The rule does not allow this. As is explained, the 60 tons that will remain of the NOx emissions cap are to be used for accounting adjustments. If the unit did not operate in 2009, no portion of the cap is allocated to the unit for 2010.

Finally, the commentator reiterated its comment of last year suggesting that the Department reconsider the implementation of the non-EGU budget program by including non-EGUs in the CAIR trading program, and revisit the issue during development of EPA's CAIR replacement rule. This comment is beyond the scope of the non-EGU 2010 ozone season NOx emission limitations. The Department addressed the issue in the preamble of Pennsylvania's 2008 CAIR rulemaking.

In this notice, the NOx emissions cap provides 181 tons of NOx emissions for non-EGUs and the other units that need to address their emissions through accounting adjustments, including units that previously participated in the NOx Budget Trading Program; emissions from these units were below the 25-ton exemption threshold. Adjustments were also made for the permanent retirement of NOx allowances due to generation of emission reduction credits. The Department will also use a portion of the 181 tons of the budgeted NOx emissions, if necessary, to address mistakes or miscalculations. This year, the Department is using 121 tons of the 181 tons of NOx emissions for account adjustments, leaving 60 tons available for any additional adjustments at the end of the control period.

As proposed, the Department made accounting adjustments for the following facilities:

Retired Units: Naval Surface Warfare Division Unit 98; Shenango Unit Nos. 6 and 9 (the generation of emission offsets for small non-NOx Budget Trading Program units resulted in a permanent NOx accounting adjustment of 45 tons).

Exempt Units: Each of the following units has a 25-ton NOx permit limit: Armagh Compressor Station (Unit 31301); Entriiken Compressor Station (Unit 31601); and the Naval Surface Warfare Division (Unit 100). The Naval Surface Warfare Division (Unit 99) has a 1-ton NOx permit limit. All of these 25-ton exempt status units account for a total adjustment of 76 tons of NOx emissions.

Units subject to the requirements in 25 Pa. Code § 145.8 are required to meet the monitoring and reporting requirements of the EPA's CAIR, found in 40 CFR Part 96, Subpart HHHH (relating to monitoring and reporting) and maintain general accounts and account representatives under 40 CFR Part 96, Subparts BBBB and FFFF (relating to CAIR designated representative for CAIR NOx ozone season sources; and CAIR NOx ozone season allowance tracking system). The "Non-EGU 2010 Ozone Season NOx Limits" table following lists the following: facility name, ORIS code, unit ID for each non-EGU unit, operating year, heat input for 2008 ozone season, calculated 2010 rate and 2010 ozone season limit. A copy of this table can also be found at the Department's Air Quality web site at www.depweb.state.pa.us (DEP keyword "Air Quality").

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service at (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create

any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once.

Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Questions concerning this notice should be directed to Randy Bordner, Chief, Stationary Source Section, Bureau of Air Quality to ranbordner@state.pa.us or at (717) 772-3921. TDD users may contact the Pennsylvania AT&T Relay Service at (800) 654-5984 to discuss how the Department can best accommodate their needs.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Order

Public Meeting held
April 15, 2010

Commissioners Present: James H. Cawley, Chairperson;
Tyrone J. Christy, Vice Chairperson; Wayne E. Gardner;
Robert F. Powelson

*Extension of the Fuel Cost Recovery Surcharge Special
Permission 28207; R-2009-2094616*

Order

By the Commission:

Tristate Household Goods Conference, Inc. (Tristate), a tariff publishing agency, represents approximately 275 PUC household good carriers. Substantially large increases in the cost of diesel fuel, which were unanticipated, motivated Tristate to request the implementation of the Fuel Cost Recovery Surcharge. The Fuel Cost Recovery Surcharge Special Permission 28207 was approved in Public Meeting held April 17, 2003, and extended in the Public Meetings held April 15, 2004, April 7, 2005, March 16, 2006, April 13, 2007, April 9, 2008 and April 16, 2009. The extension was approved for duration of one year unless changed, cancelled or extended. The current surcharge grants approval to temporarily increase the Tristate tariff to recover temporarily increased fuel costs when transporting household goods for moves more than 40 miles (weight and distance) and moves that are 40 miles or less (hourly) by the use of a Fuel Cost Recovery Surcharge. Tristate filed a request on February 11, 2010, to permit members of its conference to continue assessing a fuel cost recovery surcharge to defray the continuing rise in costs of diesel fuel.

The surcharge is determined by a formula which attempts to approximate the amount of fuel used on a particular trip and multiplies that amount by the increased cost of fuel, allowing the carrier to recover only the additional fuel charges incurred. The formula includes the following constant factors: (1) base price per gallon of fuel¹; (2) average vehicle fuel consumption of 5 miles per gallon; and (3) a terminal factor which allows the carrier to recover the additional cost of fuel used in traveling to and from the carrier's terminal to the origin point of the move. The formula also includes one variable factor, the current month's diesel fuel price.²

Moves of **40 miles or less** will be divided into 4 categories according to *average mileage*: 5 mile average

¹ The proposed base price is \$1.267, which was the price of a gallon of diesel fuel according to the Department of Energy report of Retail On-Highway Diesel Prices for the Central Atlantic Region as of February 15, 2002. Tristate proposes this as a base price since fuel prices have steadily increased from that date.

² This figure is determined by the Department of Energy's report of Retail On-Highway Diesel Prices for the Central Atlantic Region. The current month's diesel fuel price will be effective beginning the 15th day of each month through the 14th day of the subsequent month.

for trips ranging from 1 to 10 miles, 15 mile average for trips ranging from 10 to 20 miles, 25 mile average for trips ranging from 20 to 30 miles, and 35 mile average for trips ranging from 30 to 40 miles. An example calculation for an 8 mile move is as follows³:

Origin of move to destination 8 miles	= 5 miles average
Terminal factor	= 40 miles
Total miles	= 45 miles
Average miles per gallon	= 5
Fuel used	= 9 gallons
DOE current Fuel Price as of 3/17/03	= \$1.949
Base fuel Price	= \$1.267
Fuel price difference	= \$.682
Gallons X Fuel price difference	= 9 × .682 = \$6.14

Moves of **more than 40 miles** will be calculated using *actual mileage* from the move's origin to destination and return. An example calculation for a 100 mile move is as follows:

Origin of move to destination	= 100 miles
Empty Return (dest. to origin)	= 100 miles
Terminal factor	= 40 miles
Total miles	= 240 miles
Average miles per gallon	= 5
Fuel used	= 48 gallons
DOE current Fuel Price as of 3/17/03	= \$1.949
Base fuel Price	= \$1.267
Fuel price difference	= \$.682
Gallons X Fuel price difference	= 48 × .682 = \$32.75

On February 11, 2010, Tristate filed a request to again extend the Fuel Cost Recovery Surcharge. The request was filed in response to the volatile nature of the petroleum market, which continues to produce unanticipated increases in diesel fuel prices.

In support of the request for extension, Tristate has submitted data from the Department of Energy for the Central Atlantic Region. The average price of diesel fuel for the period of January 2009 to December 2009 was \$2.60 per gallon.

Additional support for an extension can be found in the March 9, 2010, edition of *Short Term Energy Outlook*, in which the Department of Energy reported that several factors will result in continued price fluctuations in the market. Instability in the relations with OPEC nations has kept the prices of crude at a high level. Demand was also increased as a result of greater need for home heating oil.

The Federal Department of Transportation has responded to the escalating fuel costs for interstate transportation by approving a fuel surcharge on a similar sliding scale. The Federal Fuel Surcharge became effective May 15, 2000, and continues in effect.

Pursuant to 66 Pa.C.S. § 1301, the Commission is required to ensure that all rates charged by a public utility are just and reasonable. Additionally, the Commission is obligated to address industry-wide problems "without creating a chaotic rate structure impossible to manage or police." Emergency Fuel Surcharge, 47 Pa. P.U.C. 389, 391 (1974). The current surcharge addresses the problem of rising fuel costs, while being just and reasonable in that carriers are compensated only for the additional cost of the fuel used.

Based on our review, it appears that the extension of the Fuel Cost Recovery Surcharge for transportation of

³ All fuel surcharges shall be calculated and provided to the customer as part of the Estimate of Charges.

household goods is necessary, is an appropriate means to address this regulatory problem and will result in just and reasonable rates. In order to prevent financial hardship, it is imperative that Pennsylvania household goods carriers be afforded an opportunity to temporarily adjust rates to offset escalating fuel costs using the proposed extended Fuel Cost Recovery Surcharge and, accordingly, we shall allow the proposed extended surcharge to become effective for a period of one year unless changed, cancelled or further extended.

Therefore,

It Is Ordered That:

1. Tristate members rendering service under authority of this Commission shall charge a Fuel Cost Recovery Surcharge on transportation provided for over 40 mile charges and for 40 miles or less hourly charges in accordance with all other tariff rules of this Commission. The Fuel Cost Recovery Surcharge is to be extended effective April 18, 2010.

2. The Extended Fuel Cost Recovery Surcharge shall be in effect for 1 year to April 18, 2011, unless changed, cancelled or further extended by the Commission.

3. Copies of this order shall be served by the Secretary to the Office of Consumer Advocate and Office of Small Business Advocate. The Secretary shall forward this Order to the *Pennsylvania Bulletin* for publication.

4. Each carrier shall post a copy of this Extended Fuel Cost Recovery Surcharge along with the original Fuel Cost Recovery Surcharge dated April 17, 2003, in a conspicuous place in the office and vehicles. In addition, each carrier shall include the surcharge as a separate line item of the Estimate of Charges provided to prospective shippers and on the Bill of Lading.

5. The rates collected to the Extended Fuel Cost Recovery Surcharge are subject to refund in the event that any formal complaints are filed, within 30 days of the date of publication of this order, and are successful in challenging the surcharge.

Secretary
