### Maximum Lawful Rate of Interest for Residential Mortgages for the Month of July 2016

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P.L. 13, No. 6) (41 P.S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of July, 2016, is 4 3/4%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub.L. No. 96-221). Further preemption was instituted with the signing of Pub.L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which such individual owns and which such individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 2.22 to which was added 2.50 percentage points for a total of 4.72 that by law is rounded off to the nearest quarter at 4 3/4%.

The discharges associated with the pesticide applications are not expected to affect public water supplies.

PA DEP has made a tentative determination to issue the NPDES permit subject to the terms and conditions of the permit. An anti-degradation analysis has been completed to document that pesticide application activities in High Quality (HQ) or Exceptional Value (EV) waters will be conducted in a manner that minimizes adverse environmental effects. The proposed permit contains conditions that require implementation of Pest Management Measures, Recordkeeping and Annual Reporting Requirements, Corrective Action Documentation and Reporting, and a Pesticides Discharge Management Plan.

You may make an appointment to review the DEP files on this case by calling the File Review Coordinator at 570-826-5472. You may submit written comments on the application and draft permit within 30 days to the address above. After the 30-day comment period, PA DEP will make a final determination on the issuance of the permit.

The EPA waiver is not in effect.

## STATE CONSERVATION COMMISSION

### PROPOSED NUTRIENT MANAGEMENT PLANS RELATED TO APPLICATIONS FOR NPDES PERMITS FOR CAFOs

This notice provides information about agricultural operations that have submitted nutrient management plans (NMPs) for approval under 3 Pa.C.S. Chapter 5 and that have or anticipate submitting applications for new, amended or renewed NPDES permits, or Notices of Intent (NOIs) for coverage under a general permit, for CAFOs, under 25 Pa. Code Chapter 92a. This notice is provided in accordance with 25 Pa. Code Chapter 92a and 40 CFR Part 122, implementing The Clean Streams Law and the Federal Clean Water Act.

Based upon preliminary reviews, the State Conservation Commission (SCC) or County Conservation Districts (CCD) working under a delegation agreement with the SCC have completed an administrative review of NMPs described. These NMPs are published as proposed plans for comment prior to taking final actions. The NMPs are available for review at the CCD office for the county where the agricultural operation is located. A list of CCD office locations is available at <http://www.nacdnet.org/about/districts/directory/pa.phtml> or can be obtained from the SCC at the office address listed or by calling (717) 787-8821.

Persons wishing to comment on an NMP are invited to submit a statement outlining their comments on the plan to the CCD, with a copy to the SCC for each NMP, within 30 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the NMPs. Comments should include the name, address and telephone number of the writer and a concise statement to inform the SCC of the exact basis of the comments and the relevant facts upon which they are based. Comments should be sent to the SCC, Agriculture Building, Room 310, 2301 North Cameron Street, Harrisburg, PA 17110.

Persons with a disability who require an auxiliary aid, service, including TDD users or other accommodations to seek additional information should contact the SCC through the Pennsylvania AT&T Relay Service at (800) 654-5984.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 1

**Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)**

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area,

the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

## AIR QUALITY

### PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments,

protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

### Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

**09-0142D: ML 35, LLC** (35 Runway Road, Levittown, PA 19057) for modifying eleven (11) existing engines located at its data center in Bristol Township, **Bucks County**. This plan approval was submitted for the re-designation of the engines from “emergency engines” to “non-emergency engines” and to allow retrofitting five (5) of the engines at this location to meet the emission standards specified in 40 CFR 63 Subpart ZZZZ. The requirements of 40 CFR Part 60 Subpart IIII or Part 63 Subpart ZZZZ—Standards for compression ignition internal combustion engines were revised to that of “non-emergency” engines. This facility is a synthetic minor facility for nitrogen oxides (NO<sub>x</sub>) and carbon monoxide (CO) emissions. The facility wide NO<sub>x</sub> emissions are limited to below 25 tons per year. The Plan Approval and Operating Permit will contain all applicable requirements that apply to each engine including testing, recordkeep-

ing, reporting, and work practices designed to keep the facility operating within all applicable air quality requirements.

**67-03018B: Penn-Mar, Inc.** (500 Broadway, Hanover, PA 17331) for the modification of the ductwork for the fabric filter which controls emissions from the molding and coring operations at the foundry in Hanover Borough, **York County**. Upon completion of the proposed modifications, the fabric filter will vent directly to atmosphere. Potential atmospheric emissions of particulate matter (PM) from this action are estimated at 0.48 ton per year. The Plan Approval will include emission limits and work practice standards along with testing, monitoring, recordkeeping and reporting requirements to ensure the facility complies with the applicable air quality regulations. Based on these findings, the Department proposes to issue a plan approval for the proposed operation. If the Department determines that the sources are operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an operating permit pursuant to the provisions of 25 Pa. Code Chapter 127.

**36-03202A: RLB Ventures, Inc. DBA Bench Dogs** (10 Industrial Way, Denver, PA 17512) for the operation of three (3) spray booths & silk screening operations in East Cocalico Township, **Lancaster County**. Potential emissions from the facility are estimated to be 11.7 tpy VOC, 1.3 tpy of a single HAP (toluene) and 5.2 tpy of combined HAPs. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on these findings, the Department proposes to issue a plan approval for the proposed operation. If the Department determines that the sources are operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an operating permit pursuant to the provisions of 25 Pa. Code § 127.411.

**08-00009A: Tennessee Gas Pipeline Company, LLC** (PO Box 2511, Houston, TX 77252-2511) has submitted an application to the Pennsylvania Department of Environmental Protection (PA DEP) for plan approval to construct a natural gas-fired combustion turbine which will be coupled to a centrifugal compressor, as part of the Susquehanna West Project, at the Compressor Station 317 facility located in Troy Township, **Bradford County**. The proposed compression process includes a combustion turbine, centrifugal compressor as well as ancillary systems for a natural gas compression process such as valves, flanges, connectors, etc.

The proposed combustion turbine is a Solar® Mars 100-16000S equipped with SoLoNO<sub>x</sub><sup>TM</sup> technology, a lean

premix type of combustion technology, also known as Dry Low NO<sub>x</sub> Combustion technology. TGP proposes to equip the exhaust of the source with an add-on device that employs oxidation catalyst technology to control volatile organic compounds (VOCs), formaldehyde and carbon monoxide (CO) emissions in the turbine's exhaust. The source is subject to the Best Available Technology (BAT) requirements of 25 Pa. Code §§ 127.1 and 127.12. The proposed combustion turbine is also subject to the Standards of Performance for Stationary Combustion Turbines of 40 CFR Part 60 Subpart KKKK.

The potentials to emit of the proposed combustion turbine are: 30.4 tons per year (tpy) of NO<sub>x</sub> (expressed as NO<sub>2</sub>), 36.6 tpy of CO, 8.40 tpy of SO<sub>x</sub> (expressed as SO<sub>2</sub>), 3.52 tpy of PM<sub>10</sub> and PM<sub>2.5</sub>, 2.50 of VOCs, 1.02 of HAPs, and 0.91 of formaldehyde.

PA DEP's review of the information submitted by the facility indicates that the proposed construction will comply with all applicable air quality regulatory requirements, including the BAT requirements. The following is a summary of the conditions that the Department proposes to place in the plan approval to be issued to ensure compliance with all applicable air quality regulatory requirements. The plan approval includes emission restrictions for NO<sub>x</sub>, CO, VOCs, SO<sub>x</sub>, PM<sub>10</sub>, PM<sub>2.5</sub>, and formaldehyde. Stack testing of the proposed turbine for these pollutants is required no later than 180 days from the date of startup. The facility is required to continuously monitor certain turbine parameters that indicate whether or not the unit is operating continuously in low-NO<sub>x</sub> mode during all periods of operation except startup, shutdown, and those in which the ambient temperature is below 0 degrees Fahrenheit. Additionally, the inlet and outlet oxidation catalyst temperatures and differential pressure across the oxidation catalyst are required to be continuously monitored. The plan approval also includes all applicable recordkeeping and reporting conditions. The facility will be also required to monitor on-site equipment for leaks on a monthly basis and perform leak detection and repair program annually.

### MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

#### *Effluent Limits for Coal Mining Activities*

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

\* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

#### *Effluent Limits for Noncoal Mining Activities*

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania*

Bulletin and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

#### **EROSION AND SEDIMENT CONTROL PERMITS**

The following parties have applied for Erosion and Sediment Control Permits for earth disturbance activities associated with either road maintenance or timber harvesting operations.

Unless otherwise indicated, on the basis of preliminary review and application of lawful standards and regulations, the Department proposes to issue a permit to discharge, subject to certain limitations in the permit conditions. These proposed determinations are tentative.

Limitations are provided as erosion and sediment control best management practices which restrict the rate and quantity of sediment discharged.

A person wishing to comment on a proposed permit are invited to submit a statement to the appropriate Department regional office listed before the application within 30 days of this public notice. Comments reviewed within this 30-day period will be considered in the formulation of the final determinations regarding this application. Responses should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and relevant facts upon which it is based. A public hearing may be held after consideration of comments received by the appropriate Department regional office during the 30-day public comment period.

Following the 30-day comment period, the appropriate regional office water management program manager will make a final determination regarding the proposed permit. Notice of this determination will be published in the *Pennsylvania Bulletin* at which time this determination may be appealed to the Environmental Hearing Board (Board).

The application and related documents, including the erosion and sediment control plan for the earth disturbance activity, are on file and may be inspected at the appropriate regional office.

Persons with a disability that require an auxiliary aid, service or other accommodation to participate during the 30-day public comment period should contact the specified regional office. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

On June 1, 2016, the Southeast Regional office approved the Act 537 Official Plan revision for the Ellis Preserve Townhouses in Newtown Township, Delaware County (APS ID No. 912478, AUTH ID No. 1132542). The Official Plan revision consists of 76 townhouse units on 24 acres. The proposed development is located at the intersection of Newtown and Goshen Roads in Newtown Township, Delaware County.

This project will be connected to the Newtown Township Delaware County Municipal Authority (NTDCMA) conveyance system and will generate 17,100 gallons of sewage per day to be treated at the DELCORA Wastewater Treatment Facility or the City of Philadelphia Southwest Water Pollution Control Plant.

Planning approval is also granted through this revision for a sewage pumping station that will be dedicated to

NTDCMA, which will convey sewage flows from the Ellis Preserve property to the existing interceptor in Newtown Road. The pumping station will be located south of the Newtown Friends Meeting and School property, as depicted on the site plan entitled Offsite Sanitary Sewer to Townhouse Pump Station, prepared by ESE, dated August 21, 2015, and last revised on May 10, 2016. The pump station will have average design flows of 185,000 gallons per day. NTDCMA must secure a Department permit for the construction and operation of the proposed sewage pumping station.

The pumping station will serve the following uses on the Ellis Preserve property, as noted in the revised project narrative in the resubmission dated April 17, 2014, and last revised May 20, 2016, and as contemplated in Newtown Township’s approved 2013 Act 537 plan update:

1. Sector 1—Office space and the Ellis Preserve Town Center Multifamily development.
2. Sector 2—Office space.
3. Sector 3—The Ellis Preserve Townhouses A-O Zoning District Lot 1.
4. Sector 4—Existing Building Improvement and Main Line Health facility.

Currently only the Ellis Preserve Townhouses A-O Zoning District Lot 1 is approved to utilize the proposed pumping station. Sectors 1, 2 and 4 must complete sewage facilities planning modules or receive planning exemptions prior to connecting to the pumping station.

The pump station is proposed to be designed to ultimately accept flows from the Liseter Pump Station (FKA Ashford Pumping Station). However, additional sewage facilities planning must be completed by Newtown Township and approved by the Department before any diversion of flows from the Lister Pump Station’s force main to this pump station may occur.

*Plan Description:* The approved plan is a companion plan with Phase I of a 537 plan approved for the Clairton Municipal Authority (CMA). The plan provides for upgrade of the CMA pump station and improvements in the Peters Creek Interceptor. The plan also provides for the extension of sanitary sewers and construction of a pump station to serve the Coal Valley portion of the Borough. The Departments review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required WQM Permits must be obtained in the name of the municipality or authority as appropriate.

*Plan Description:* Approval of a revision to the official plan of West Hempfield Township, Lancaster County. The project is known as West Hempfield Township Act 537 Plan Amendment to the Lancaster Area Sewer Authority Regional Act 537 Plan. The plan provides for a low pressure sewage system with grinder pumps as the selected alternative to serve 52 edus or 18,200 gpd. The selected alternative results in the expansion of the service area to accommodate parcels that previously could not be served, due to cost or technical issues.

The proposed development is located in the Raintree Road area of West Hempfield Township, Lancaster County. The Department's review of the plan revision has not identified any significant impacts resulting from this proposal. The DEP Code Number for this planning module is B1-36960-ACT and the APS Id is 616919. Any permits must be obtained in the name of the Lancaster Area Sewer Authority.

Walker Township	816 Nittany Valley Drive Bellefonte, PA 16823	Centre

*Plan Description:* The approved plan calls for the Spring-Benner-Walker Joint Authority to permit, construct, own, and operate an upgraded Pump Station 7. The pump station upgrade consists of the installation of a larger wet well and new pumps operated via variable frequency drive controls. It is estimated that the proposed pump station upgrade will cost \$797,500.00, with the Spring-Benner-Walker Joint Authority utilizing capital reserve funds to cover the cost of the upgrade. The plan notes that no rate payers will incur increased fees as a result of the proposed project. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from the proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of the Spring-Benner-Walker Joint Authority.

The proposal may be resubmitted using the Component 3 module forms.

**NOTICE OF INTERIM RESPONSE UNDER THE HAZARDOUS SITES CLEANUP ACT**

**Former Torch Mill Lumber Site  
Carbondale City, Lackawanna County**

The Department of Environmental Protection (Department), under the authority of the Hazardous Sites Cleanup Act, 35 P.S. § 6020.101 et seq. (HSCA), has initiated a prompt interim response action at the Former Torch Lumber Mill Site (Site). This response will be undertaken pursuant to Sections 505(b) and (c) of HSCA, 35 P.S. § 6020.505(b) and (c). The Site is located at 45 Clarke Ave. in Carbondale City, Lackawanna County, PA.

The Site was owned and operated by Joseph Torch and his wife Rosella Torch and formerly used as a lumber mill and treatment facility, which included arsenic and creosote lumber production. Following Joseph Torch's death on or about January 9, 2003, the property was owned by his wife, Rosella Torch. The Department initially became involved in the site on February 25, 2003, when Storage Tank Section staff investigated a complaint of contamination at the Site. An inspection of the Site revealed at least 2 unregistered aboveground storage tanks. The tanks held hazardous substances (creosote and chromate copper arsenate or "CCA") that were used in wood preserving operations. A release of regulated substances (creosote/CCA) had been observed and a site characterization was requested to be conducted. Following Rosella Torch's death on July 26, 2003, the site was under the control of the Joseph/Rosella Torch Estate(s). On February 6, 2008, representatives from the Department met with attorneys and consultants for the Rosella Torch Estate, at the former Torch Lumber Mill Site. The Department described the work that needed to be completed with regard to the site characterization at the facility where contamination from petroleum, creosote, and possibly CCA existed. The need for groundwater characterization, the location of an alleged injection well, and possible funding sources for characterization and cleanup were discussed.

In February 2012, vandals removed large metal vats which formerly contained suspected creosote sludge. The suspected creosote sludge material was dumped on the ground. Additionally, several structures were known to contain asbestos materials.

In 2012, the Department learned that the Site was purchased at a Lackawanna County Judicial Tax Sale by Balaji Investments, LLC. The Department subsequently met with representatives of Balaji to discuss the environmental concerns associated with the Site. At that time, Balaji informed the Department that it was in the process of rescinding its purchase of the Site. The Department repeatedly requested that Balaji provide access to the Department to continue implementation of its site characterization activities. Balaji did not respond to the Department's requests for access. Therefore, on May 27, 2014, the Department issued an Administrative Order requiring Balaji to grant access.

Based upon the fact that a release of a hazardous substance as defined by HSCA has occurred and that the threat of a release of hazardous substances exists and that an ongoing release is likely if no actions are taken, the Department is authorized to undertake a response action at this Site under Section 501(a) of HSCA, 35 P.S. § 6020.501(a).

A Prompt Interim Response is justified at this Site for the following reasons: Characterization and removal of the hazardous substances and wastes is needed in a time frame that prohibits developing and closing an administrative record prior to response initiation given the condition of the building and the potential threats to public health and the environment. This prompt interim response action will cost less than \$1 million and take less than 1 year to implement.

The Department is undertaking a prompt interim response at the Site pursuant to its authority under Section 501(a) of HSCA, 35 P.S. § 6020.501(a). Prompt action is necessary to protect the public health, safety, and the environment from the release and threat of release of hazardous substances from the Site. The Department evaluated two alternatives for this proposed response which include: 1) no action; and 2) Waste Removal and Off-site Disposal.

The Department has chosen Waste Removal and Off-Site Disposal as the Prompt Interim Response action for the former Torch Lumber Mill Site. This alternative is protective of human health and the environment, is feasible, implementable, and cost effective.

This notice is being provided pursuant to Section 506(b) of HSCA. The Administrative Record, which contains the information that forms the basis and documents the selection of this response, is available for public review and comment at the Department's Northeast Regional Office, 2 Public Square, Wilkes-Barre, PA, and at the City of Carbondale Municipal Building, 1 North Main Street, Carbondale, PA. It is available for review at the Regional Office Monday through Friday from 8 a.m. to 4 p.m. and at the Municipal Building, Office of the City Clerk, Monday through Friday from 9 a.m. to 4 p.m.

The Administrative Record will be open for comment through September 16, 2016. Persons may submit written comments into the Record during this time only, by sending them to Jonathan Ulanoski, Project Officer, at the Department's Northeast Regional Office, 2 Public Square, Wilkes-Barre, PA 18701, or by delivering them to that office in person.

In addition, persons may present oral comments on the response action, for inclusion in the Administrative Record, at a public hearing scheduled for July 20, 2016, at 10:00 a.m. at the City of Carbondale Municipal Building, City Council Chambers, 2nd Floor. Persons wishing to present testimony at the hearing should register with

Jonathan Ulanoski before July 13, 2016, by telephone at (570) 826-5546, or in writing to Jonathan Ulanoski at the Department's Northeast Regional Office. The testimony at the public hearing will be limited to the prompt interim response. If no person registers to present oral comments by the date specified above, the hearing will not be held.

Persons with a disability who wish to attend the hearing and require auxiliary aid, service or other accommodations to participate in the proceedings, should contact Jonathan Ulanoski or the Pennsylvania AT&T Relay Service at 1-800-654-5984 (TDD) to discuss how the Department may accommodate their needs.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 2

---

**The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

---

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

## LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

### UNDER ACT 2, 1995 PREAMBLE 3

**The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).**

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to

be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

*Order Issued June 2, 2016*

*Pennsylvania Public Utility Commission—  
Implementation of the Alternative Energy Portfolio  
Standards Act of 2004  
Regulation No. 57-304 (# 3061)*

On June 23, 2014, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Pennsylvania Public Utility Commission (PUC). This rulemaking amends 52 Pa. Code Chapter 75. The proposed regulation was published in the July 5, 2014 *Pennsylvania Bulletin* with a 60-day public comment period. The final-form regulation was submitted to the Commission on March 22, 2016.

This final-form rulemaking revises the PUC's regulations pertaining to net metering, interconnection, and portfolio standard compliance provisions of the Alternative Energy Portfolio Standards Act (AEPS Act) to comply with Act 35 of 2007 and Act 129 of 2008 amendments to the AEPS Act and to clarify certain issues of law, administrative procedure and policy.

As described by the PUC in response to Question # 10 of the Regulatory Analysis Form submitted with this final-form regulation, the amendments are needed to:

... reasonably limit the amount of energy default service providers purchase at above market retail rates, ensuring that default service is provided at the least cost to customers over time, as required by the Act of 129 of 2008 amendments to the Public Utility Code. 66 Pa.C.S. § 2807(e). The purpose of this limitation is to avoid having default service customers pay substantial net metering subsidies to merchant scale alternative systems.

After a review of the final regulatory package and hearing statements from the PUC, the public and the regulated community at our public meeting of May 19, 2016, we find that the rulemaking is not in the public interest for the following reasons.

First, we find that the PUC does not have the statutory authority to promulgate the rulemaking. This violates Section 5.2(a) of the Regulatory Review Act (RRA). 71 P.S. § 745b(a). Section 75.13(a)(3) of the PUC's proposed rulemaking would have required alternative energy systems to be "sized to generate no more than 110% of the customer-generator's annual electric consumption." The PUC increased the percentage from 110% to 200% in the final-form rulemaking. This Commission's comments of October 3, 2014, questioned the PUC's statutory authority for this provision. In response to comments on the issue of statutory authority, the PUC cited its legislative rulemaking authority in Section 501 of the Public Utility Code (Code) (Pa.C.S. § 501(b)) and its broad rulemaking authority to implement the AEPS Act (73 P.S. § 1648.7(a)). The PUC contends that the rules of statutory construction require the Code and the AEPS Act to be construed together. Therefore, the PUC avers that it "has broad and explicit legislative rulemaking authority... to promulgate these regulations." The PUC also cites 66 Pa.C.S. § 2807(e)(3.4) as a basis for imposing the limit included in § 75.13(a)(3) of the final-form regula-

tion. This statutory provision requires electric distribution companies to procure energy for default service customers to ensure “. . . the least cost over time.” The PUC believes that the proposed 200% limit being proposed allows them to meet this statutory mandate.

At this Commission’s public meeting of May 19, 2016, the PUC was asked to identify a specific provision of law that would allow for the imposition of the limit included in § 75.13(a)(3) of the final-form regulation. The PUC was not able to identify a specific provision, but reiterated its belief that its rulemaking authority under the Code and AEPS Act, along with the “least cost over time” provision cited above provide the authority and also represents the true intent of the General Assembly in the passage of both statutes. Based on our review of the PUC’s written response to our comments and the statements presented at the meeting of May 19, 2016, we find that the PUC does not have the statutory authority to impose the limit included in § 75.13(a)(3) of the final-form regulation. As noted by parties that commented on the final-form regulation, accepting the legal analysis put forth by the PUC would allow the PUC to justify any action it decided to take by concluding that the action was needed to ensure the “least cost over time” concept.

In addition, we agree with the statements included in the final regulation package from PUC Chairman Gladys Brown and Vice Chairman Andrew Place. Chairman Brown stated that “setting such limits ignores the very specific size limitations provided in the AEPS Act.” The limits referred to by Chairman Brown are found in the AEPS Act definition of “customer generator” which reads as follows:

A nonutility owner or operator of a net metered distributed generation system with a nameplate capacity of no greater than 50 kilowatts if installed at a residential service or no larger than 3,000 kilowatts at other customer service locations, except for customers whose systems are above three megawatts and up to five megawatts who make their systems available to operate in parallel with the electric utility during grid emergencies as defined the regional transmission organizations. . . . 73 P.S. § 1648.2.

Vice Chairman Place noted that “it is axiomatic that the Commission, as a creature of the legislature, has only those powers conferred upon it by statute. See *Feingold v. Bell*, 477 Pa. 1, 383 A.2d 791 (1977). Therefore I must oppose the Rulemaking because I believe that it goes beyond the Commission’s authority.”

If the PUC decides to proceed with this rulemaking by deleting the limit included in § 75.13(a)(3) of the final-form regulation, it should ensure that other provisions of the regulation do not limit a customer-generator’s ability to net-meter excess generation it produces.

The second reason we find the rulemaking is not in the public interest relates to the RRA criterion of need. 71 P.S. § 745b(b)(3)(iii). Our comments on the proposed rulemaking stated the PUC had not established the overall need for the changes being offered. In response to this comment, the PUC provided additional information in response to Question # 10 of the Regulatory Analysis Form submitted with the final-form regulation. As explained by the PUC, the purpose of the limit of § 75.13(a)(3) “is to avoid having default service customers pay *substantial* net metering subsidies to merchant scale alternative energy systems.” (Emphasis added.) After a review of the additional information provided, we find

that the PUC has not definitively quantified what the substantial net metering costs will be to customers. In addition, during the public meeting, the PUC stated that over-sized customer-generator systems are not currently a problem in the Commonwealth, but could be in the future. Based on these responses, we find that the PUC has not established the compelling need for this rule-making.

Our final reason for finding the rulemaking is not in the public interest relates to the RRA criterion of whether the regulation represents a policy decision of such a substantial nature that it requires legislative review. 71 P.S. § 745b(b)(4). Our comments noted that the implementation of the proposed rulemaking could potentially curtail the development of alternative energy in the Commonwealth in conflict with the AEPS Act. We commented that any deviation from the intent of the AEPS Act would represent a policy decision that requires legislative review. We encouraged the PUC to work closely with the members of the General Assembly and the designated standing committees to ensure the final-form regulation was within the scope of its granted regulatory authority. In addition, the PUC was asked at the public meeting of May 19, 2016, if it attempted to resolve the problem of merchant generators through a legislative remedy.

The PUC did not directly respond to our comment in the Order submitted with the final regulatory package. In response to the question asked at the public meeting, the PUC stated that the regulation was discussed at meetings held with committees of the legislature. Based on this response and our concerns related to statutory authority and need, we still question whether this rulemaking is a policy decision of such a substantial nature that it requires legislative review. The answers provided by the PUC have not alleviated our concern on this issue. If the PUC continues to believe that some customer-generators that produce excess energy are causing economic harm to default service customers, we again encourage the PUC to consult with the legislature to achieve a statutory remedy to this problem.

We have determined this regulation is not consistent with the statutory authority of the PUC and the intention of the General Assembly. As discussed above, we find promulgation of this regulation is not in the public interest.

*Pennsylvania Liquor Control Board—*  
*Limited Wineries*  
*Regulation No. 54-85 (# 3117)*

On September 2, 2015, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Pennsylvania Liquor Control Board

(Board). This rulemaking amends 40 Pa. Code Sections 3.62, 3.63, 3.64, 5.103, and 11.111. The proposed regulation was published in the September 26, 2015 *Pennsylvania Bulletin* with a 30-day public comment period. The final-form regulation was submitted to the Commission on April 8, 2016.

According to the Board, the purpose of the rulemaking is to make the Board's regulations consistent with the Pennsylvania Liquor Code (Code) as it is currently written and interpreted.

Section 505.2(a)(6.3) of the Code states that holders of a limited winery license may:

[s]ell alcoholic cider, wine and wine coolers *only between the hours of nine o'clock antemeridian and eleven o'clock postmeridian*. A limited winery also may request approval from the board to extend sales hours *in individual locations* at other times during the year or beyond the limits set forth in this clause. The request shall be made *in writing* . . . and shall detail the exact locations where sales hours are proposed to be extended, the proposed hours and dates of extended operations and the reason for the proposed extended hours.

47 P.S. § 5-505.2(a)(6.3). (Emphasis added.)

In § 11.111(a)(3) of the final-form regulation, the Board is proposing to expand the hours that a limited winery may sell wine, wine coolers and alcoholic ciders from 7 a.m. until 2 a.m. of the following morning, Mondays through Saturdays, and from 9 a.m. until 2 a.m. of the following morning on Sundays. The Board is also deleting existing § 11.111(a)(4) which identifies the days and times during which sales may be made and sets forth the process for a limited winery to request approval from the Board for an extension of sales hours in individual locations.

As the basis for the amendment, the Board explains that some previous requests for extensions could not be approved because licensees were not timely with their requests. The Board conferred with the trade organization that represents limited wineries and subsequently approved a blanket request from the organization's executive director to extend the sales hours for all limited wineries.

Since the Code explicitly provides that the sales hours may be extended only upon the Board's consideration and approval of a detailed request from a limited winery, we find that the Board's proposal to provide for the automatic expansion of the sales hours for all limited wineries by regulation is not authorized by the Code. Furthermore, we do not believe that it is the intent of the General Assembly to allow blanket requests to the Board, on behalf of all limited winery licensees, to extend hours of operation indefinitely.

We have determined that this regulation is not consistent with the intention of the General Assembly in the enactment of the statute upon which the regulation is based. Section 5.2(a) of the Regulatory Review Act (71 P.S. § 745.5b(a)). Therefore, we find promulgation of this regulation is not in the public interest.

**Notice of Comments Issued**

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b).

The Commission has issued comments on the following proposed regulations. The agencies must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

**State Board of Education Regulation # 6-336  
(IRRC # 3146)**

**Nonimmunized Children**

**June 8, 2016**

We submit for your consideration the following comments on the proposed rulemaking published in the April 9, 2016 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (RRA) (71 P.S. § 745.5b). Section 5.1(a) of the RRA (71

P.S. § 745.5a(a)) directs the State Board of Education (Board) to respond to all comments received from us or any other source.

**Temporary waiver.—Clarity; Implementation procedures.**

The Board is clarifying its existing provision that requires children to meet the immunization requirements established by the Department of Health (Department) in order to be admitted to a school, which is consistent with the Public School Code of 1949. 24 P.S. § 13-1303a(a).

This regulation was submitted and published simultaneously with the Department's proposed rulemaking that amends 28 Pa. Code Chapter 23, Subchapter C (relating to immunization) (regulation # 10-197/IRRC # 3147). We have a procedural concern relating to clarity and implementation of this regulation as a final-form regulation.

The Board's regulation proposes to add the phrase "temporary waiver" for consistency with the Department's proposed regulation, so that the Board's regulation will read "... temporary waiver ... admission requirements of the Department of Health, at 28 Pa. Code Chapter 23, Subchapter C..." Our concern is that temporary waivers are not part of the Board's regulation, but rather are part of the Department's proposed regulation at 28 Pa. Code § 23.85(h). In other words, temporary waivers do not yet exist in 28 Pa. Code Chapter 23, Subchapter C. While we recognize and appreciate the coordination that has occurred between the Board and the Department, it is possible that the Department could delete temporary waivers from its final-form regulation. For this reason, the Board's final-form regulation should not be submitted until after the Department's regulation is published in the *Pennsylvania Bulletin* as final and establishes temporary waivers in the Department's regulation. Until that time, we are unable to determine whether the regulation is in the public interest.

**Department of Health Regulation # 10-197  
(IRRC # 3147)**

**School Immunizations**

**June 8, 2016**

We submit for your consideration the following comments on the proposed rulemaking published in the April 9, 2016 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (RRA) (71 P.S. § 745.5b). Section 5.1(a) of the RRA (71 P.S. § 745.5a(a)) directs the Department of Health (Department) to respond to all comments received from us or any other source.

**1. Economic or fiscal impacts; Protection of the public health, safety and welfare; Clarity, feasibility and reasonableness of requirements; Need for the regulation; Reasonableness of requirements, implementation procedures and timetables for compliance; Compliance with the RRA; Acceptable data.**

Section 5.2 of the RRA (71 P.S. § 745.5b) directs this Commission to determine whether a regulation is in the public interest. When making this determination, the Commission considers criteria such as economic or fiscal impact and reasonableness. To make that determination, the Commission must analyze the text of the proposed rulemaking and the reasons for the new or amended language. The Commission also considers the information a promulgating agency is required to provide under Section 5(a) of the RRA (71 P.S. § 745.5(a)) in the Regulatory Analysis Form (RAF). Some of the information contained in the RAF submitted with this rulemaking is not sufficient to allow this Commission to determine if the regulation is in the public interest. Specifically, we ask the Department to provide the following information with the final-form regulation.

- In response to RAF # 10 regarding need for the regulation, the Department states that it reviewed vaccination rates in schools and school districts, and found those rates to be "lower than is optimal" for the health of the Commonwealth. Commentators ask that the Department provide specific data to address vaccination rates.

Further, the Department cites herd immunity claims, which many commentators argue are unsupported. In the Preamble and response to the RAF, the Department should provide specific data to support the need for the regulation related to vaccination rates and herd immunity.

- RAF # 17 asks the Department to identify the financial impact of the regulation; RAF # 19 asks for specific cost estimates for the regulated community; and RAF # 22 asks for a statement of additional reporting, recordkeeping or other paperwork required of the regulated community. Commentators disagree with the Department's responses to these questions, stating that costs will run in the millions of dollars. One specific concern cited by the regulated community includes getting proof of immunity, which commentators say would be a substantial cost to parents. Additionally, many commentators question the applicability of insurance to vaccinations and note their possible expense. Commentators also state that the Department significantly understates the increased administrative and paperwork burden the proposed regulation places on school districts. The Department should address these concerns and provide specific cost estimates related to the financial impact of the final-form regulation on the regulated community.

- In response to RAF # 29 regarding the expected effective date of the final-form regulation, the Department states, "Compliance would be required on the first day of the next school year following publication as final rulemaking in the *Pennsylvania Bulletin*." It's possible that the timing of final publication may make it difficult to be in compliance on the first day of the next school year. We ask the Department to consider this as it relates to the timing for full implementation of the regulations, and to ensure that the effective date provides sufficient time for school entities to plan, implement policies and communicate with parents/guardians about the new requirements.

**2. Section 23.82. Definitions.—Clarity.**

*Medical certificate*

This definition requires a form to be filled out and signed by a "health care provider." It is not clear who specifically qualifies as a health care provider. Elsewhere in the regulation, such as in Section 23.83(b)(5)(ii)(B), a list is provided of "a physician, nurse practitioner or physician's assistant." We also recognize that immunizations can be administered by registered nurses (49 Pa. Code § 21.16) and pharmacists (63 P.S. § 390-9.2). Can a registered nurse or pharmacist also fill out and sign a medical certificate? The regulation should be clear regarding what specific professions can fill out and sign a medical certificate.

**3. Section 23.83. Immunization requirements.—Economic or fiscal impacts; Protection of public health, safety and welfare; Need for the regulation; Reasonableness of requirements, implementation procedures and timetables for compliance.**

*Subsection (b) Required for attendance.*

This subsection specifies the immunizations that are required for admittance to a Pennsylvania school. The Department should ensure that implementation of the new requirements is clear for the regulated community. Commentators raise questions regarding whether the requirements apply only to students who are entering Kindergarten and 7th and 12th grades, whether the requirements apply retroactively to all current students, and how the requirements apply to a student who moves

into a new school district. Given that not meeting the immunization requirements can affect a child's education, we ask the Department to provide clear explanations of how the requirements in the regulation will be implemented in the final-form regulation's Preamble and in its responses to comments.

Also, commentators ask that the Department exempt homeschool and cyber students. Did the Department consider such exemptions? The Department should address its consideration of this concern in the final-form regulatory package.

*Paragraph (b)(1) Diphtheria, tetanus and pertussis.*

The Department explains in the Preamble that it is combining existing requirements into proposed Paragraph (b)(1) and adding pertussis because the incidence of pertussis has been increasing since the 1980s. The Department explains that some vaccines are being removed from the regulation because these forms of vaccines are no longer available in the United States. Some commentators are opposed to the doses being administered in a combined form. If vaccines are no longer available, the Department should state this clearly in the Preamble and final-form RAF to more clearly explain the need for this change.

*Subparagraph (b)(4)(ii) Evidence of immunity.*

The Department is proposing in Subparagraph (b)(4)(ii) to no longer allow a parent or guardian to provide a written statement as proof of chicken pox. The Department explains in the Preamble, in part:

Currently, evidence of varicella immunity may be shown either by laboratory confirmation, or a statement of history from a physician, parent or guardian. This is in keeping with the Centers for Disease Control and Prevention (CDC), United States Department of Health and Human Services, Advisory Council on Immunization Practices (ACIP) recommendations, and is intended to ensure that the child has actually had chickenpox. . . . Many types of viruses can cause rashes; the Department wishes to make certain that the persons providing evidence that the child has actually had the disease are those able to diagnose chickenpox disease, and familiar with the chickenpox rash.

Commentators argue that parents should be permitted to provide evidence since they assert chicken pox is a mild illness that does not require medical intervention and that contagious children should not be taken into medical facilities where other children are present. Commentators state that this change will impose a financial burden on families.

Do the CDC and ACIP guidelines allow parents or guardians to diagnose varicella? If so, the Department should provide further support for changing this practice. Also, if so, the Department should explain the reasonableness of imposing new financial burdens when the existing practice is acceptable to the CDC.

*Subparagraph (c)(1)(i) Tetanus and diphtheria toxoid and acellular pertussis vaccine (Tdap).*

Paragraph (b)(1) includes an exemption if a child has a contraindication to pertussis. The Department should consider adding a similar exemption to Subparagraph (c)(1)(i).

Additionally, commentators note that some doctors will not give this vaccine to children at the 6th grade physical if the children are not 12 years old at the time. The

Department should ensure that implementation of this requirement is clear for the regulated community to comply.

*Paragraph (c)(2) Required for entry into 12th grade.*

The Department proposes to require an additional dose of Meningococcal Conjugate Vaccine (MCV) for entry into 12th grade. Commentators state that an additional dose of MCV is unnecessary and significantly raises costs. We ask the Department to further explain the need for the additional dose and how the benefits outweigh the costs.

Further, commentators raise questions about situations such as whether a third dose would be required for students who get a dose of MCV after 7th grade but before the 16th birthday or what happens when students come in from out of state without the first dose. The Department should ensure that the final-form regulation makes clear how the requirement is to be implemented.

**4. Section 23.85. Responsibilities of schools and school administrators.—Economic or fiscal impacts; Protection of public health, safety and welfare; Reasonableness of requirements, implementation procedures and timetables for compliance.**

*Subsection (e) Provisional admittance to school.*

The Preamble explains that under existing Subsection (e), a child could be provisionally admitted to school for up to an eight-month period. The Department is proposing to eliminate the eight-month period and set up requirements that allow for exclusion of students under certain circumstances. The requirements would differ for single dose and multiple dose vaccines. In certain circumstances a child could be provisionally admitted for a period of five school days.

Commentators generally support this proposal, but state that the length of time is not feasible for school nurses or parents, and it may put a child who needs multiple vaccines at risk. Other commentators oppose any provisional admittance. The Department should explain the reasonableness of the timeframe in the Preamble to the final-form regulation and how the timeframe adequately protects public health.

*Paragraph (e)(1) Multiple dose vaccine series.*

Clauses (e)(1)(ii) and (iii) both end with similar language which states that a child's parent or guardian will provide a medical certificate scheduling the additional required dose(s) on or before the fifth school day. It is unclear as to whether the additional dose(s) must be scheduled on or before the fifth school day, or whether the parent or guardian is to provide the medical certificate on or before the fifth school day. We ask the Department to clarify what is required by these provisions.

*Paragraph (e)(3) Completion of required immunizations.*

We have two concerns.

First, Paragraph (e)(3) shortens from 60 days to 30 days the timeframe for review of the medical certificate of provisionally admitted students. Commentators state that this change creates an administrative burden and request a middle-ground timeframe. The Department should explain the reasonableness of the timeframe in the final-form regulation and how the timeframe adequately protects public health.

Second, Paragraph (e)(3) also allows a school administrator to choose whether to exclude a child if the requirements of the medical certificate are not met upon review. Commentators ask that "may" be changed to "shall" in the

final-form regulation. If the Department requires immunizations for attendance, why should a school administrator have this discretion? The Department should explain the reasonableness of providing flexibility in the final-form regulation and how allowing non-immunized children to attend school adequately protects public health.

*Paragraph (g)(2) Applicability.*

Paragraph (g)(2) allows 30 days for a parent or guardian of a child who moves or transfers into a Commonwealth school to provide immunization records. Commentators request additional time. The Department should explain the reasonableness of the timeframe in the Preamble to the final-form regulation and how the timeframe adequately protects public health.

*Paragraph (h)(1) Temporary waiver.*

Paragraph (h)(1) allows for a temporary waiver in the case of a nationwide shortage of supply for a particular vaccine. Is it possible that there could be a regional shortage and, if so, should that also trigger a temporary waiver?

**5. Section 23.86. School reporting.—Reasonableness of requirements, implementation procedures and timetables for compliance.**

Paragraph (f)(7) requires schools to report the number of students in kindergarten, 7th grade or in an ungraded

school, age 12 only, who were denied admission because of the student's inability to provide documentation of the required vaccine doses. Since Section 23.83(c)(2) adds a new requirement for one dose of MCV for entry into 12th grade, should schools also report the number of students in 12th grade who were denied admission because they could not provide documentation of the required vaccine dose?

**6. Clarity of terms.**

The terms "nurse practitioner" and "physician's assistant" are used in Sections 23.83(b)(3)(iii) and (b)(5)(ii)(B). We have two concerns. First, in 49 Pa. Code Chapter 21, the State Board of Nursing regulates registered nurses, practical nurses and certified registered nurse practitioners. The Department's regulation is not clear regarding which of the three categories of the nursing profession qualify as a "nurse practitioner." Second, at 49 Pa. Code Chapter 18, Subchapter D, the State Board of Medicine regulates "physician assistants." For clarity and consistency, we recommend using the specific terms used by other agencies with regulatory authority over these professions to describe these medical professionals.
