READER'S GUIDE TO THE *PENNSYLVANIA BULLETIN* AND THE *PENNSYLVANIA CODE*

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published weekly. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. It is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations, Statewide court rules, and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, rescission, repeal or emergency action, must be published in the *Pennsylvania Bulletin*.

The following documents are published in the *Pennsylvania Bulletin*: Governor's Executive Orders; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or rescind regulations must first publish in the *Pennsylvania Bulletin* a Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. A Final Rulemaking must be published in the *Pennsylvania Bulletin* before the changes can take effect. If the agency wishes to adopt changes to the Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the Pennsylvania Bulletin

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies, Statewide court rules and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes when they are adopted. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code* § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

A quarterly List of *Pennsylvania Code* Sections Affected lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires the Governor's Budget Office to prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions and authorities receiving money from the State Treasury. The fiscal note states whether the action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions. The fiscal note is required to be published in the *Pennsylvania Bulletin* at the same time as the change is advertised.

A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; and (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years. In item (8) the recommendation, if any, made by the Secretary of the Budget is published with the fiscal note. "No fiscal impact" means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended. See 4 Pa. Code Chapter 7, Subchapter R (relating to fiscal notes).

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish information except as provided by 1 Pa. Code § 3.44:

§ 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the [Legislative Reference] Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

[204 PA. CODE CH. 83]

Proposed Amendments to the Comments to Pennsylvania Rules of Disciplinary Enforcement Relating to Annual Registration of Attorneys—Status Changes

Notice is hereby given that The Disciplinary Board of the Supreme Court of Pennsylvania is planning to recommend to the Supreme Court of Pennsylvania that it adopt amendments to the Pennsylvania Rules of Disciplinary Enforcement (“Pa.R.D.E.”) 219(k) relating to the administrative change in status from administrative suspension to inactive status, as set forth in Annex A.

Pa.R.D.E. 219 governs the annual registration of attorneys. Pursuant to this rule, an attorney who fails to timely register, or who fails to comply with Continuing Legal Education obligations, will be transferred to administrative suspension. Our rules provide that an attorney who is on administrative suspension for three years or more must petition for reinstatement to the Supreme Court of Pennsylvania in order to resume active status. Where an attorney is administratively suspended for less than three years, Pa.R.D.E. 219 permits the Attorney Registration Office to administratively change the attorney’s status. These status changes are contingent upon the attorney’s fulfillment of certain requirements set forth in the Rule.

Current paragraph (h) permits a clerical change in status for an attorney who has been administratively suspended for three years or less to active status as follows:

(h) An attorney who has been administratively suspended pursuant to subdivision (f) for three years or less is not eligible to file the annual fee form electronically. The procedure for reinstatement is as follows:

(1) The formerly admitted attorney shall submit to the Attorney Registration Office the form required by subdivision (d)(1) along with payment of:

- (i) the current annual fee;
- (ii) the annual fee that was due in the year in which the attorney was administratively suspended;
- (iii) the late payment penalties required by paragraph (3);
- (iv) any unpaid collection fee; and
- (v) a reinstatement fee of \$300.00.

Current paragraph (k) permits a clerical change in status from administrative suspension to inactive status as follows:

(k) An inactive attorney who has been administratively suspended for failure to file the annual form and pay the annual fee required by subdivision (j)(1) of this rule, may request an administrative change in status form from the Attorney Registration Office. The form must be filed by mail or delivered in person to the Attorney Registration Office and said Office

shall change the status of an attorney eligible for inactive status under this subdivision upon receipt of:

- (1) the annual form required by subdivision (d);
- (2) payment of the annual fee required by subdivision (j)(1);
- (3) payment of all collection fees and late payment penalties assessed under subdivisions (d)(2) and (f); and
- (4) payment of an administrative processing fee of \$100.00.

The requirements of paragraphs (h) and (k) are similar, except for the fee requirements. In addition to the current annual fee, late payment penalties, unpaid collection fees and a reinstatement fee, paragraph (h)(1)(ii) requires an attorney who is administratively suspended and seeks to resume active status to pay the annual fee that was due in the year in which the attorney was administratively suspended. Paragraph (k) requires an attorney to pay the annual fee, collection fees, late payment penalties and an administrative processing fee, but does not direct an administratively suspended attorney to pay the fee that was due in the year in which the attorney was administratively suspended.

The reason for requiring an attorney to pay the annual fee that was due in the year he or she was administratively suspended is to collect an unpaid fee owed to the Board. This reason should apply to both administratively suspended attorneys seeking to resume active status and administratively suspended attorneys seeking to resume inactive status. For this reason, and for administrative ease in processing status change requests in a uniform manner, the Board proposes an amendment to paragraph (k)(3) to require that an administratively suspended attorney must pay the annual fee that was due in the year that the attorney was placed on administrative suspension.

Interested persons are invited to submit written comments by mail or facsimile regarding the proposed amendments to the Office of the Secretary, The Disciplinary Board of the Supreme Court of Pennsylvania, 601 Commonwealth Avenue, Suite 5600, PO Box 62625, Harrisburg, PA 17106-2625, Facsimile number (717-231-3382), Email address Dboard.comments@pacourts.us on or before April 2, 2018.

Note: Rule 7.1 is **[identical to] derived from** former Rule 3.6.

PUBLICATION REPORT**Proposed Amendment of Pa. O.C. Rules 2.1,
4.6, and 7.1**

The Orphans' Court Procedural Rules Committee ("Committee") is planning to propose to the Supreme Court of Pennsylvania the amendment of Pa. O.C. Rules 2.1, 4.6, and 7.1. These amendments will provide minor refinements to the Orphans' Court Rules that were adopted by the Court on December 1, 2015 and took effect on September 1, 2016.

Rule 2.1 provides the requirements for the form of Accounts. Rule 2.1(b)(4)(iv) sets forth the requirements for signature and verification pages, and currently requires the "signature and verification pages signed by all the accountants stating the Account and verified by at least one of the accountants." The Committee proposes to delete "and verification" from that phrase so it is not inconsistent with the remainder of the sentence, which only requires verification "by at least one of the accountants."

With regard to Rule 4.6, the Committee received inquiries about the necessity of sending notices to beneficiaries not participating in the present proceeding or matter. The Committee deliberated about whether "party" in Rule 4.6 was sufficient in scope to include those having an interest in the subject of the proceeding. Ultimately, the Committee concluded that "person" should be modified to "interested party," as defined in Rule 1.3.

Rule 7.1 addresses discovery practices in the Orphans' Courts. The Committee discussed that the Orphans' Court Rules did not address the use of subpoenas to attend and testify. *Compare* Pa.R.C.P. No. 234.1. The Committee agreed to add subpoenas to attend and testify to the list of permitted discovery practices set forth in Rule 7.1.

The Committee invites all comments, concerns, and suggestions regarding this proposal.

In addition, the permit contains the following major special conditions:

- Part C. I. Stormwater outfalls and authorized non-stormwater discharges (standard)
- Part C. II. Best Management Practices (BMPs)
 - A. Pollution Prevention and Exposure Minimization (standard)
 - B. Good Housekeeping (standard)
 - C. Erosion and Sedimentation Controls (standard)
 - D. Spill Prevention and Responses (standard)
 - E. Sector—Specific BMPs (see PAG-03 NPDES General Permit Appendix K)
 - F. Site Specific BMPs
 - 1. Baseline BMPs
 - a. Good Housekeeping

Good housekeeping procedures are designed to maintain a clean and orderly environment. Often common sense housekeeping procedures are the most effective tool in preventing stormwater impacts. A clean and orderly work area will reduce the potential for impacts from the facility operations to stormwater.

The following is a list of ARSC practices:

- (1) All places of employment, passageways, storerooms, and service rooms are kept clean, orderly and in sanitary condition.
- (2) The site manager is responsible for proper house-keeping practices, and the site is subject to unannounced inspections from a member or ARSC management.
- (3) Means of egress are kept clear of tools, materials, and debris.
- (4) Equipment is visually checked and maintained on a daily basis.
- (5) Wherever possible, materials are stored inside to prevent exposure to weather conditions so as to avoid impacts to the extent possible.

(6) Trash and rubbish are removed to dumpster on an as-needed basis.

(7) Drip pans, absorbent pads, and/or other means are used under hose connections and in other situations where minor drips or spills are likely. This is done to maintain safe working conditions and to prevent the release of oil to the environment.

Incidental drips and spills of regulated substances will be cleaned up immediately using materials and supplies that are maintained on site.

b. Preventative Maintenance

The preventative maintenance program identifies areas and equipment that needs to be maintained to prevent as much as possible the possibility of stormwater impacts. Maintenance activities applicable to this facility include the following:

- (1) Routinely clean the drainage channel leading into the retention pond and other conveyances of stormwater to prevent debris and silt accumulation.
- (2) Replace or repair waste collection bins if damaged or leaking.
- (3) If indications of leaks, spills, or drips are evident anywhere in the facility, identify and correct the problem.

c. Visual Inspections

Routine facility inspections shall be conducted by facility personnel. If conditions are discovered which could impact stormwater quality, the Emergency Coordinator shall arrange for corrective action or designate an individual to make such arrangements. Records of corrective actions will be maintained by maintenance personnel.

d. Spill Prevention and Response

All employees should receive initial and refresher training in spill response and related environmental issues. All employees are responsible for the cleanup of any spill. Small, routine drips and spills may be cleaned by applying loose absorbent to the spill and then disposing of the absorbent properly.

If a discharge of a regulated substance occurs, the spill must be reported immediately to the Emergency Coordinator, who will implement appropriate measures to prevent adverse environmental impacts.

e. Runoff Management Practices

Runoff management practices prevent runoff from becoming impacted or treat stormwater runoff prior to off-site discharge. Runoff management practices in use at this facility include:

(1) Grading and paving in operating areas to divert stormwater away from areas that could potentially impact stormwater and prevent mixing with runoff.

(2) Parking areas are gravel, which allows stormwater to absorb into the ground and also minimizes erosion.

f. Employee Training

Environmental Awareness Training is provided to all ARSC employees on an annual basis. The training includes many environmental topics with focus on identification of the environmental impact that can be caused by improper management (i.e., storage, handling, and/or usage) of regulated substances. This training is intended to familiarize employees with requirements related to RCRA, DOT, SPCC, and PPC regulations.

g. Record Keeping and Reporting

Records of discharges of regulated substances, monitoring, inspection, and maintenance activities will be retained on site by the appropriate personnel. These records will be maintained for a minimum of six years. Under the individual NPDES Permit, inspections reports should be maintained on site.

h. Additional BMPs

The applicable BMPs and stormwater controls from the "Salt Institute Voluntary Salt Storage Guidelines for Distribution Stockpiles" have been incorporated into the facility's PPC Plan.

2. Stormwater Monitoring and Reporting

Stormwater monitoring and reporting will be conducted as required by Part A.I. and Part C.V. of NPDES Permit No. PA0266451.

3. Implementation

The site is expected to maintain compliance with the BMPs discussed earlier by conducting periodic inspections and implementing actions to improve BMPs and preventative maintenance practices. A summary of the schedule for BMPs, such as inspections and training, is provided in Summary of BMP Scheduled table below.

Summary of BMP Schedule

Modifications to the current BMPs will be evaluated on a quarterly basis. Based on the findings and recommendations identified from the quarterly inspections, a schedule will be developed to implement maintenance activities. BMPs and maintenance activities proposed based on quarterly inspections are anticipated to be scheduled for implementation during the next quarter, weather permitting.

4. Stormwater Management

The goal of the Stormwater Management Program is to minimize the contact between the salt and rainwater, and contain and control all water from the stockpile area with the confines of the pad.

To minimize contact with precipitation, the stockpile is covered in sections by a waterproof tarp as salt is added to the pile. The seams are watertight and resistant to high winds. The covering is properly maintained to prevent precipitation from contacting the salt.

At a minimum, the cover should be checked on a daily basis to ensure that it is in good condition, that there are no tears, that the seams are watertight, and that the pile is properly covered to prevent exposure of salt to precipitation.

The perimeter of the stockpile cover is sealed to the pad with ballast to prevent washout of salt from the toe of the stockpile. Ballast is placed high enough on the sides of the stockpile to minimize slackness in the cover as salt shifts and flows beneath the cover down to the perimeter of the stockpile. The perimeter cover ballast is maintained until the stockpile is exhausted. The perimeter of the stockpile pad is surrounded by an asphalt berm to contain the salt.

At a minimum, the perimeter of the stock pile should be checked on a daily basis to ensure the perimeter of the stockpile cover is sealed to the pad with ballast and that the perimeter is contained within the asphalt berm.

Dust emissions are curtailed at all point in the unloading system by controlling flow and drop and having the rock salt fall a minimum distance by adjusting the height of the radial stacker during unloading.

Trucks leaving the unloading area must be tarped by the drivers before departure.

5. Best Management Practices

a. Salt Handling

The facility was designed to minimize and control the generation of dust. The facility operates in a manner that is sensitive to other industrial, commercial, public, and government facilities and residential areas.

(1) The permittee will avoid handling salt during winds.

(2) The permittee will minimize the distance the salt must fall from stackers and front end loaders.

(3) Roadways will be kept clean.

(4) Salt will be contained with the confining berms of the site.

(5) The stockpile will be covered to prevent precipitation contact except when loading out to customers during winter storm events where salt is needed to maintain safe driving conditions.

(6) Salt spilled by trucks, railcars or other vehicles will be cleaned up promptly.

(7) Salt will be loaded into trucks within the pad area and loads will not exceed the legal or physical capacity of the truck.

(8) All trucks must be tarped before leaving the site.

(9) Salt deliveries to the site and shipments to customers will be scheduled when an employee is scheduled to be onsite to oversee the activities.

(10) During loadout, the permittee will remove the covering just high enough to load out the day's shipment. This will minimize the moisture absorption by the salt and provide security to the cover if the wind direction shifts toward the working face.

(11) The working face will be maintained perpendicular to the long axis of the pile by loading alternately left/right and right/left.

(12) The permittee will avoid creating a horseshoe shaped working face that results from removing the center of the pile and leaving extended edges or aprons.

(13) Chunks of salt that form as the crust of the pile breaks up will be crushed and blended into the pile and not allowed to accumulate.

b. General Maintenance.

General maintenance is very important to the environmental health of the facility.

(1) On site equipment, as well as trucks picking up salt loads, will be checked regularly for oil leaks. Oil spills will be cleaned up and reported to DEP per regulations.

(2) The asphalt pad will be inspected from settlement and cracks. Repairs will be made before stockpiling more salt on the area. We will reseal the pad periodically to ensure non-degradation of the low permeability of the pad and base. Expansion joints will be resealed when necessary.

(3) Visual inspections, at a minimum of after each storm event, will be made of the storm water holding pond and repaired promptly.

(4) Housekeeping is very important throughout the site.

- Part C III. Routine Inspections (standard)
- Part C IV. Preparedness, Prevention and Contingency (PPC) plan (standard)

- Part C V. Stormwater Monitoring Requirements (standard)

- Part C VI. Potential Pollution Reporting

In addition to the Potential Pollution Reporting required by Part A.III.C.3. of this permit, the permittee shall immediately notify the Department whenever a salt storage stockpile cover is not properly maintained to prevent precipitation from contacting the salt and the permittee observes that stormwater runoff from the pile is causing or threatening pollution to a waterway of the Commonwealth, the permittee shall immediately notify the Department.

Oral notification to the Department is required as soon as possible, but no later than 4 hours after the permittee becomes aware of the discharge causing or threatening pollution.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to

use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held,

if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

18-00011K: Croda, Inc. (8 Croda Way, Mill Hall, PA 17751) for the construction of a new Super Refined Oil plant and a Combined Heat and Power (CHP) Unit at the Mill Hall Facility located in Bald Eagle Township, **Clinnton County**.

The Department of Environmental Protection's (Department) review of the information submitted by Croda, Inc. indicates that the air contamination sources to be constructed will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including 40 CFR Part 60 Subpart KKKK and the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on this finding, the Department proposes to issue a plan approval for the proposed construction.

In addition to the emission limitations, the following is a brief description of the types of conditions the Department intends to place in the plan approval in order to ensure compliance with all applicable air quality regulatory requirements.

1. Pursuant to the Best Available Technology Requirements of 25 Pa. Code §§ 127.1 and 127.12:

(a) The permittee shall not emit volatile organic compounds (VOCs) from the SRO process in excess of 5.0 tons in any 12 consecutive month period.

(b) Under no circumstances shall the amount of volatile organic compounds contained in the spent resin generated from any single batch of the SRO process be in excess of 20 pounds.

(c) Under no circumstances shall the amount of volatile organic compounds contained in the wastewater discharge from the SRO operations from any single batch of the SRO process be in excess of 30 pounds.

(d) The permittee shall not emit particulate matter from the exhaust of the fabric collectors associated with the SRO process in excess of 0.02 grain per dry standard cubic foot.

(e) The vent condenser system shall provide at least 69% control of volatile organic compounds, on a batch basis.

2. The total time required for the operation of the Solvent Separations System (SSS) and nitrogen sparging of the column during the spent resin solvent removal process shall not exceed 22 hours per batch of product.

3. The total amount of solvent added to each batch of product produced in the SRO process shall not exceed 8,560 kgs.

4. Within 180 days of the commencement of operation of the SRO process, the permittee shall perform stack testing upon the vent condenser inlet and outlet while in use to determine the volatile organic compounds control efficiency of the condenser.

5. The pre-cooler condensers shall be equipped with instrumentation to accurately monitor and record the coolant inlet temperature on a continuous basis. The fabric collectors shall be equipped with instrumentation to accurately monitor the differential pressure across the collector on a continuous basis.

6. Pursuant to the Best Available Technology Requirements of 25 Pa. Code §§ 127.1 and 127.12, the total emissions from the Combined Heat and Power (CHP) Unit in any 12 consecutive month period shall not exceed:

(a) 15.2 tons of nitrogen oxides

(b) 0.7 ton of carbon monoxide

(c) 0.3 ton of sulfur dioxide

(d) 1.4 ton of particulate matter, including PM_{2.5}

(e) 1.2 ton of volatile organic compounds

(f) 0.3 ton of total hazardous air pollutants

7. Pursuant to best available technology requirements of 25 Pa. Code §§ 127.1 and 127.12, the permittee shall not permit the emission into the outdoor atmosphere from the exhaust of the CHP unit:

(a) Nitrogen oxides in excess of 30 ppm 15% oxygen

(b) Carbon monoxide in excess of 1.35 ppm 15% oxygen

8. Pursuant to best available technology requirements of 25 Pa. Code §§ 127.1 and 127.12, the Combined Heat and Power Unit shall only be fired on pipeline-quality natural gas.

9. Within 180 days of commencement of operation of the CHP unit the permittee shall perform stack testing on Source P121 to determine the nitrogen oxides and carbon monoxide emissions.

10. The CHP unit is subject to the New Source Performance Standards for Stationary Combustion Turbines. The CHP unit shall comply with the applicable requirements of 40 CFR Part 60 Subpart KKKK.

The facility is a major (Title V) facility. If the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for Plan Approval 18-00011K, the requirements established in the plan approval will be incorporated into Title V Operating Permit 18-00011 pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

All pertinent documents used in the evaluation of the application are available for public review during normal business hours at the Department's Northcentral Regional office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review must be made by calling 570-327-0550.

PA-11-00538A: Rosebud Mining Company (301 Market Street, Kittanning, PA 16201) pursuant to 25 Pa. Code §§ 127.44 and 127.45 for intent to issue Air Quality plan approval to authorize construction and temporary operation of sources and controls associated with a coal preparation plant at its Cresson Mine in Cresson Township, **Cambria County**. Sources at the facility will include a mine conveyor; overland conveyor with bypass gate; ROM bypass conveyor and stockpile; double-deck vibratory screen with screened product hopper; rock/oversize chute and stockpile; nut coal conveyor and stockpile; clean coal conveyor, radial stacker, and stockpile; front-end loader for stockpile manipulation and truck load out; haul roads; and an emergency diesel genset. A future fine coal screening building is also proposed which would receive coal from the clean coal radial stacker and include the following additional sources: fine coal transfer conveyor; enclosed Mogensen Sizer housed in a building; pea coal conveyor and stockpile; and fine thermal coal conveyor and stockpile. Process emissions will be controlled by the installation and as-needed use of water sprays at each transfer point; stockpile emissions will be controlled by natural topographic and vegetative wind breaks and as-needed use of a water truck; roadway emissions will be controlled by storage pile and haul road segregation, a truck tire wash, truck tarping, a 15-mph speed limit, paving of the first 500 feet of haul road, and as-needed use of a road sweeper and water truck.

Based on a maximum raw coal throughput limitation of 1,500,000 tons and a maximum of 500 hours of emergency generator operation per year, annual potential to emit from the facility will not exceed 39.8 tons of particulate matter (PM), 13.8 tons of particulate matter less than 10 microns (PM₁₀), 2.0 tons of nitrogen oxides (NO_x), 0.9 ton of carbon monoxide (CO), and 0.5 ton of volatile organic compounds (VOCs). Emissions of SO₂ and hazardous air pollutants (HAPs) will be negligible. The monitoring, testing, recordkeeping, reporting and work practice conditions of the Plan Approval have been derived from applicable portions of 25 Pa. MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated

with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a

tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in

Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

E25-791, RH Energytrans, LLC. (Applicant), 558 West Sixth Street, Suite 200, Erie, PA 16507. Risberg Line (Project), in Washington, Elk Creek, Conneaut, and Springfield Townships in **Erie County** and East Fairfield, East Mead, Woodcock, Cambridge, Venango, and Cussewago Townships in **Crawford County**, ACOE Pittsburgh District. The proposed Pennsylvania portion of the project starts at the interconnection/tie-in at the existing Tennessee Gas Pipeline 200 Line along Harvey Road, approximately 0.7 mile northeast of SR 322 (Cochranon, PA Quadrangle N: 41.544658°; W: 80.068591°) in East Fairfield Township, Crawford County, extending generally north and west crossing through portions of East Fairfield, East Mead, Woodcock, Cambridge, Venango, and Cussewago Townships in Crawford County and Washington, Elk Creek, Conneaut, and Springfield Townships in Erie County, to where it will cross the Ohio border approximately 0.6 mile south of where Interstate 90 crosses the state line (Conneaut, OH Quadrangle N: 41.928212°; W: 80.519379°) in Springfield Township, Erie County.

This issue of the *Pennsylvania Bulletin* includes notices for an Erosion and Sediment Control Permit (ESP062518001) and a request for State Water Quality Certification (WQ06-002) required by Section 401 of the Clean Water Act under review by the PADEP and Erie and Crawford County Conservation Districts for the Project. The tie-in location for this Project in East Fairfield Township, Crawford County will also require a General Permit 5 (GP052018601) for a pipeline crossing of a wetland and a General Permit 8 (GP082018601) for a temporary equipment crossing of a wetland which are being reviewed by the Crawford County Conservation District.

The Project, as proposed in Pennsylvania, includes the conversion of approximately 26.6 miles of existing 12-inch natural gas gathering pipeline to transmission pipeline [from N:41.544658°; W:80.068591° to N:41.855941°; W:80.187377°], the conversion of approximately 5 miles of existing 8-inch natural gas gathering pipeline to transmission pipeline [from N: 41.855941°; W: 80.187377° to N: 41.858780°; W: 80.282057°], and the construction of approximately 16.7 miles of new 12-inch transmission pipeline [from N: 41.858780°; W: 80.282057° to N: 41.928212°; W: 80.519379°] for the purpose of transporting natural gas from East Fairfield Township, Crawford County, PA to the Ohio border in Springfield Township, Erie County. The Project also includes the construction of an additional 11.8 miles of new 12-inch natural gas transmission pipeline from the PA-OH border west to North Kingsville,

OH [N: 41.907349°; W: 80.689399°], but this portion of the Project will not be authorized by PADEP. Pipeline work also includes modification of two existing compressor stations, cathodic protection, and numerous temporary access roads and staging areas to support construction and facility access. Numerous stream and wetland crossings will occur along the project route as described below. The new construction portion of the pipeline route has been co-located to parallel/overlap existing utility and road ROWs for a total of 10.78 miles in PA.

The Project, as proposed, will require approximately 146 acres of earth disturbance (143 acres in Erie County; 3 acres in Crawford County), the crossing of 58 streams (including floodways of streams not crossed by the pipeline) resulting in 1,159 linear feet of temporary impact (construction ROW) and 4,236 linear feet of permanent impacts (maintained ROW) to the following surface waters: Turkey Creek (CWF) and tributaries; Raccoon Creek (CWF) and tributaries; East Branch Conneaut Creek (CWF) and tributaries, tributaries to Crooked Creek (HQ-CWF), tributaries to Conneaut Creek (CWF), and tributaries to Temple Creek (CWF); 11.258 acres of temporary wetland impact (construction ROW); 10.078 acres of permanent wetland impacts (maintained ROW). All temporary impacts will be restored when construction is complete; permanent conversion impacts (7.15 acres of the 10.078 acres of permanent impact) will be mitigated along the ROW (2.24 acres of wetland enhancement) and at an alternate location within the Crooked Creek watershed (5.28 acres of wetland enhancement). All crossings will be installed by open trench, with the exception of East Branch Conneaut Creek, which will be installed by conventional bore.

On October 16, 2017, Applicant filed an application with the Federal Energy Regulatory Commission (FERC) under Section 7 of the Natural Gas Act (15 U.S.C.A. § 717f) seeking a certificate of public convenience and necessity to construct and operate its Project (FERC

Docket No. CP18-6). The FERC documents may be viewed on FERC's website at www.ferc.gov (search eLibrary; Docket Search; CP18-6).

On January 8, 2018, Applicant requested a State water quality certification from the Pennsylvania Department of Environmental Protection (PADEP), as required by Section 401 of the Clean Water Act (33 U.S.C.A. § 1341), to ensure that the construction, operation and maintenance of the Project will protect water quality in Pennsylvania through compliance with State water quality standards and associated State law requirements, which are consistent with the requirements of the Clean Water Act.

This issue of the *Pennsylvania Bulletin* includes notices for Erosion and Sediment Control Permit (ESP062518001) and Chapter 105 Joint Permit (E25-791) applications for the Project which are currently under review by the PADEP and Erie and Crawford County Conservation Districts. Notice to PADEP shall include a transfer agreement signed by the existing and new owner containing a specific date for transfer of certification responsibility, coverage, and liability between them.

11. *Correspondence*—All correspondence with and submittals to PADEP concerning this State Water Quality Certification shall be addressed to the Department of Environmental Protection, Northwest Regional Office, Lori Boughton, 230 Chestnut Street, Meadville, PA 16335.

12. *Reservation of Rights*—PADEP may suspend or revoke this State Water Quality Certification if it determines that Applicant has not complied with the terms and conditions of this certification. PADEP may require

additional measures to achieve compliance with applicable law, subject to Applicant's applicable procedural and substantive rights.

13. *Other Laws*—Nothing in this State Water Quality Certification shall be construed to preclude the institution of any legal action or relieve Applicant from any responsibilities, liabilities, or penalties established pursuant to any applicable Federal or State law or regulation.

14. *Severability*—The provisions of this State Water Quality Certification are severable and should any provision of this certification be declared invalid or unenforceable, the remainder of the certification shall not be affected thereby.

This notice of final action is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.101) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>

Sections I—VI contain actions regarding industrial, animal or sewage wastes discharges, discharges to groundwater, and discharges associated with MS4, stormwater associated with construction activities and CAFOs. Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2

Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of

practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

The project may be resubmitted using the full Component 3 module forms.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

RH Energytrans, LLC, Risberg Pipeline

*Northwest Region: Waterways & Wetlands Program

ESP062518001. RH Energytrans, LLC (Applicant), 558 West Sixth Street, Suite 200, Erie, PA 16507. Risberg Line (Project), in Washington, Elk Creek, Conneaut and Springfield Townships in **Erie County** and East Fairfield, East Mead, Woodcock, Cambridge, Venango and Cussewago Townships in **Crawford County**, ACOE Pittsburgh District. The proposed Pennsylvania portion of the project starts at the interconnection/tie-in at the existing Tennessee Gas Pipeline 200 Line along Harvey Road, approximately 0.7 mile northeast of SR 322 (Cochran, PA Quadrangle N: 41.544658°; W: 80.068591°) in East Fairfield Township, Crawford County, extending generally north and west crossing through portions of East Fairfield, East Mead, Woodcock, Cambridge, Venango and Cussewago Townships in Crawford County and Washington, Elk Creek, Conneaut and Springfield Townships in Erie County, to where it will cross the Ohio border approximately 0.6 mile south of where Interstate 90 crosses the State line (Conneaut, OH Quadrangle N: 41.928212°; W: 80.519379°) in Springfield Township, Erie County.

Today's *Pennsylvania Bulletin* includes notices for a request for State Water Quality Certification (WQ06-002) required by Section 401 of the Clean Water Act and a Chapter 105 Joint Permit (E25-791) application under Pennsylvania's Dam Safety and Encroachments Act which are under review by the Department of Environmental Protection (Department). The tie-in location for this Project in East Fairfield Township, Crawford County will also require a General Permit 5 (GP052018601) for a pipeline crossing of a wetland and a General Permit 8 (GP082018601) for a temporary equipment crossing of a wetland which are being reviewed by the Crawford County Conservation District.

The Project, as proposed in Pennsylvania, includes the conversion of approximately 26.6 miles of existing 12-inch natural gas gathering pipeline to transmission pipeline [from N:41.544658°; W:80.068591° to N:41.855941°; W:80.187377°], the conversion of approximately 5 miles of existing 8-inch natural gas gathering pipeline to transmission pipeline [from N:41.855941°; W:80.187377° to N:41.858780°; W:80.282057°], and the construction of approximately 16.7 miles of new 12-inch transmission pipeline [from N:41.858780°; W:80.282057° to N:41.928212°; W:80.519379°] for the purpose of transporting natural gas from East Fairfield Township, Crawford County, PA to the Ohio border in Springfield Township, Erie County. The Project also includes the construction of

an additional 11.8 miles of new 12-inch natural gas transmission pipeline from the PA-OH border west to North Kingsville, OH [N:41.907349°; W:80.689399°], but this portion of the Project will not be authorized by the Department. Pipeline work also includes modification of two existing compressor stations, cathodic protection, and numerous temporary access roads and staging areas to support construction and facility access. Numerous stream and wetland crossings will occur along the project route as described as follows. The new construction portion of the pipeline route has been co-located to parallel/overlap existing utility and road ROWs for a total of 10.78 miles in PA.

The Project, as proposed, will require approximately 146 acres of earth disturbance (143 acres in Erie County; 3 acres in Crawford County), the crossing of 58 streams (including floodways of streams not crossed by the pipeline) resulting in 1,159 linear feet of temporary impact and 4,236 linear feet of permanent impacts to the following surface waters: Turkey Creek (CWF) and tributaries; Raccoon Creek (CWF) and tributaries; East Branch Conneaut Creek (CWF) and tributaries, tributaries to Crooked Creek (HQ-CWF), tributaries to Conneaut Creek (CWF), and tributaries to Temple Creek (CWF); 11.258 acres of temporary wetland impact; 10.078 acres of permanent wetland impacts. All crossings will be installed by open trench, with the exception of East Branch Conneaut Creek, which will be installed by conventional bore.

For more detailed information regarding the Erosion and Sediment Control Permit related to this proposed project, which is available in the Department's regional office, contact Lori Boughton at (814) 332-6879 to request a file review.

90756	Influenza virus vaccine, quadrivalent (ccIV4), derived from cell cultures, subunit, antibiotic free, 0.5 mL dosage, for intramuscular use (Flucelvax Quadrivalent®)	\$10

Flucelvax Quadrivalent® is a suspension for injection that is now available either in a 0.5 mL, single-dose, pre-filled syringe or a 5 mL multidose vial containing ten doses. The United States Food and Drug Administration (FDA) first approved use of Flucelvax Quadrivalent®, a quadrivalent influenza virus vaccine derived from cell cultures, preservative and antibiotic free, in a single-dose, pre-filled syringe, on May 23, 2016. On July 7, 2017, the FDA approved the Flucelvax Quadrivalent® containing a preservative and supplied in a 5 mL multidose vial containing ten doses. The American Medical Association released Common Procedural Terminology (CPT) code 90756 on July 1, 2017, for administration of a quadrivalent influenza virus vaccine derived from cell cultures that contains a preservative, such as Flucelvax Quadrivalent® as supplied in a 5 mL multidose vial containing ten doses. The Centers for Medicare & Medicaid Services made CPT code 90756 available as of January 1, 2018, as part of the annual 2018 Healthcare Common Procedure Coding System update. The Department is adding CPT code 90756 to the MA Program Fee Schedule to identify when a practitioner administers preservative-containing Flucelvax Quadrivalent® from a 5 mL multidose vial containing ten doses.

The Department will issue an MA Bulletin to providers enrolled in the MA Program specifying the procedures for billing of the administration of the influenza virus vaccine.

Fiscal Impact

The Department anticipates no fiscal impact as a result of adding CPT code 90756 to the MA Fee Schedule, as there is an existing procedure code on the fee schedule that is being used for the administration of an unspecified vaccine and the addition of this procedure code will not increase utilization.

Public Comment

Interested persons are invited to submit written comments regarding this notice to the Department of Human Services, Office of Medical Assistance Programs, c/o Regulations Coordinator, Room 515, Health and Welfare Building, Harrisburg, PA 17120. Comments received within 30 days will be reviewed and considered for any subsequent revision to the MA Program Fee Schedule.

Persons with a disability who require an auxiliary aid or service may submit comments using the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users).

TERESA D. MILLER,
Acting Secretary

Fiscal Note: 14-NOT-1211. No fiscal impact; (8) recommends adoption.

8. *Ticket Responsibility:*

(a) A Fast Play lottery game ticket is a bearer document deemed to be owned by the person holding the game ticket, except that if a name is contained on the back of the game ticket, the person so named will, for all purposes, be considered the owner of the game ticket.

(b) The holder of a Fast Play lottery game ticket has the sole responsibility for checking the accuracy and condition of the data printed on the game ticket.

(c) The Commonwealth shall not be responsible for a lost or stolen Fast Play lottery game ticket, or a Fast Play ticket redeemed by a player in error.

9. *Ticket Validation and Requirements:*

(a) *Valid Fast Play lottery game tickets.* To be a valid Fast Play lottery game ticket, the presented game ticket must meet the following requirements:

(1) The game ticket's bar code shall be present in its entirety.

(2) The game ticket must be intact.

(3) The game ticket may not be mutilated, altered, reconstituted or tampered with.

(4) The game ticket may not be counterfeit or a duplicate of a winning ticket.

(5) The game ticket must have been validly issued.

(6) The game ticket data shall have been recorded on the Lottery Central Computer System and the game ticket data shall match the computer record in every respect.

(7) The game ticket must not be defectively printed or printed or produced in error such that it cannot be processed or validated by the Lottery.

(8) The game ticket must pass other confidential security checks of the Lottery.

(b) *Invalid or defective game tickets:* A game ticket not passing the validation requirements in subsection (a) will be considered invalid and no payment will be made on account of any play recorded thereon. The determination of the Secretary in this regard is final.

10. *Procedures for claiming and payment of prizes:*

(a) A prize may be claimed through an authorized retailer or the Lottery, as provided in this section. A prize must be claimed within 1 year of the sale date of the Fast Play lottery game ticket.

(b) An authorized retailer is authorized to pay prizes of \$2,500 or less. The holder of a game ticket evidencing a winning play representing a prize of \$2,500 or less may be paid by a participating authorized retailer if a proper validation pay ticket was issued by the retailer's Lottery Terminal.

(c) The holder of a game ticket evidencing a winning play representing a prize in excess of \$2,500 may present the game ticket to an authorized retailer, Lottery District Office, or Lottery Headquarters.

(d) Pursuant to the preceding subsections (a), (b) and (c), the retailer or the Lottery will issue payment if:

(1) The game ticket is scanned and the play is validated through the Lottery Terminal or the Lottery Central Computer System;

(2) A claim form is properly and fully completed;

(3) The identification of the claimant is confirmed; and

(4) The winning ticket has not expired, pursuant to this section or section 12 (relating to unclaimed prizes).

(e) The Commonwealth shall not be responsible for a winning play paid in error by an authorized retailer.

(f) In the event a prize described in these rules is not available, the Lottery may either provide a substitute prize, determined by the Secretary to have an equivalent value to the prize won, or make a cash payment to the winner, in an amount determined by the Secretary to have an equivalent value to the prize won.

11. *Funding for prizes:* Moneys will be drawn from the State Lottery Fund, to the extent necessary, to fund the payment of prizes under this section. If this lottery game is terminated for any cause, prize moneys remaining undistributed will remain in the State Lottery Fund and used for purposes otherwise provided for by law.

12. *Unclaimed prizes:* Unclaimed prize money on winning Fast Play lottery game tickets will be retained by the Secretary for payment to the persons entitled thereto for 1 year from the sale date of the Fast Play lottery game ticket. If no claim is made within 1 year from the sale date of the Fast Play lottery game ticket, the right of a ticket holder to claim the prize represented by that ticket, if any, shall expire.

13. *Purchase and prize restrictions:* A Fast Play lottery game ticket may not be purchased by, and a prize may not be paid, to an officer or employee of the Lottery, Lottery professional services contractors or subcontractors, or to a spouse, child, brother, sister or parent residing in the same household of an officer, employee, contractor or subcontractor who is involved in the production, distribution or operation of systems for the validation or accounting of Fast Play games.

14. *Progressive Top Prize Restrictions:*

(a) An amount of 30¢ from the sale of each \$5 Break the Bank ticket will be accumulated in the Progressive Top Prize pool.

(b) *Prize Amount:* The amount of the Progressive Top Prize at the time a ticket is purchased can only be verified through the Lottery's Central Computer System. Any advertisement or any materials describing the amount of the Progressive Top Prize are only valid as of the time they are posted. If any discrepancy exists between this notice and any material describing or advertising the \$5 Break the Bank game, this notice and the data contained in the Lottery's Central Computer System shall govern.

(c) The Progressive Top Prize and all other prizes are subject to availability at the time of purchase. The Lottery is not responsible for prizes that are not awarded due to technical issues. In the event of a Progressive Top Prize being reset without the actual sale of a Progressive Top Prize winning ticket, all prize money that had accumulated into the Progressive Top Prize pool (i.e. 30¢ from the sale of each ticket) shall be awarded as part of the next Progressive Top Prize won.

15. *Governing Law:*

(a) By purchasing a ticket, the purchaser agrees to comply with and abide by the State Lottery Law (72 P.S. §§ 3761-101—3761-314), this notice, instructions, conditions and final decisions of the Secretary, and procedures established by the Secretary for the conduct of the Fast Play \$5 Break the Bank lottery game.

(b) Decisions made by the Secretary, including the declaration of prizes and the payment thereof, in interpretation of this notice are final and binding on players and persons making a claim in respect thereof.

16. *Retailer Compensation:*

(a) Authorized retailers may be entitled to compensation as determined by the Lottery.

A Lottery retailer is entitled only to the largest bonus for which he qualifies on a winning ticket. A bonus will be initiated for payment after the Fast Play game ticket is claimed and validated. A bonus will not be awarded to a Lottery retailer that sells a non-winning Pennsylvania Lottery Fast Play game ticket used to enter a Pennsylvania Lottery second-chance drawing or promotion that is subsequently selected to win a prize.

19. *Termination of the Game:* The Secretary may announce a termination date, after which no further tickets from this game may be sold. The announcement will be disseminated through media used to advertise or promote \$5 Break the Bank or through normal communications methods.

GOVERNOR'S OFFICE

Regulatory Agenda

Executive Order 1996-1 requires all agencies under the jurisdiction of the Governor to submit for publication semi-annually an agenda of regulations under development or consideration.

The agendas are compiled to provide members of the regulated community advanced notice of regulatory activity. It is the intention of the Administration that these agendas will serve to increase public participation in the regulatory process.

Agency contacts should be contacted for more information regarding the regulation and the procedure for submitting comments.

This Agenda represents the Administration's present intentions regarding future regulations. The information provided is current as of January 12, 2018. The nature and complexity of an individual regulation obviously will determine whether and when any particular regulation listed (as well as any considered subsequent to publication of this Agenda) is published.

Older Adult Daily Living Centers 6 Pa. Code Chapter 11	Winter 2018, as Proposed	The purpose of 6 Pa. Code Chapter 11 is to protect the health, safety, and well-being of persons with functional impairments for the licensure and operation of Older Adult Daily Living Centers (OADLC). These regulations—the statutory authority for which is found in Act 118 of 1990 and in 62 P.S. Chapter 2 § 1511—were adopted on July 2, 1993 and effective Oct. 12, 1993. The Pennsylvania Department of Aging is responsible for the enforcement of these regulations. OADLC services provide a structured program of services to clients who require the service along with valuable respite to caregivers. The proposed rulemaking would update the existing regulatory language to address changes in other statutes, regulations, codes, ordinances, and other professional standards and practices, along with addressing the increasing frailty of clients served in OADLC. Water Quality Management Fee Amendments and NPDES Program Fee Amendments 25 Pa. Code Chapters 91 and 92a (# 7-533)	Quarter 1, 2018, EQB Consideration, as Proposed	This rulemaking proposes to amend fees related to water quality management permitting (Chapter 91) and proposes to amend the fee schedule for NPDES permit applications (Chapter 92a). Chapter 91 establishes, among other things, a water quality management (WQM) permitting program for the construction of sewage and industrial waste treatment facilities and for land application of sewage and industrial wastes. DEP began its Chapter 92a annual invoicing and fee collection program in December 2010. Chapter 92a updated the fee schedule for NPDES permit applications for persons to discharge pollutants from point sources into surface waters. In addition, Chapter 92a introduced an annual fee for certain facilities authorized to discharge pollutants by individual NPDES permits. A fee analysis that DEP presented to the EQB in 2014 highlighted that, despite the fee increase in 2010, revenue continues to fall short of expenses, impeding the work of Programs to carry out necessary tasks for protecting water resources in the Commonwealth. Administration of the Storage Tank and Spill Prevention Program 25 Pa. Code Chapter 245 (# 7-530)	Quarter 1, 2018, Publication, as Proposed	This rulemaking proposes to amend Chapter 245 to strengthen the underground storage tank (UST) requirements by increasing the emphasis on properly operating and maintaining equipment. Currently, UST owners and operators are required to have spill prevention, overfill prevention, and release detection equipment in place, but are not required to periodically verify the functionality of some of that equipment. The proposed changes are expected to result in improvements in the routine operation, maintenance and monitoring of underground storage tanks. This will help to further reduce the number of releases from underground storage tanks and, in turn, protect public health and the environment. <p>Gasoline Volatility Requirements 25 Pa. Code Chapters 121 and 126 (# 7-529)</p>	<p>Quarter 1, 2018, IRRC Consideration</p>	<p>This rulemaking is in response to Act 50 of 2014 (P.L. 674, May 14, 2014), which directs the EQB to promulgate regulations to repeal the requirements for low Reid Vapor Pressure gasoline upon approval by the EPA of the Commonwealth's State Implementation Plan (SIP) demonstration of continued compliance with the National Ambient Air Quality Standards (NAAQS) through the use of commensurate emission reductions from other air pollution control measures. The rulemaking adds § 126.301(d), which includes language to render §§ 126.301—126.303 no longer effective upon the approval by the EPA of the removal, suspension, or replacement of these requirements as part of the SIP. DEP is developing a Non-Interference Demonstration (NID) SIP Revision to submit to EPA to demonstrate continued compliance with the NAAQS. Water Quality Standards— Class A Stream Redesignations 25 Pa. Code Chapter 93	Quarter 2, 2018, EQB Consideration, as Proposed	The proposed regulatory changes included in this rulemaking are the result of stream evaluations conducted by DEP in response to a submittal of data from the Pennsylvania Fish and Boat Commission (PFBC). In this rulemaking, redesignations rely on § 93.4b(a)(2)(ii) to qualify streams for High Quality (HQ) designations based upon their classifications as Class A wild trout streams. DEP staff conducted an independent review of the trout biomass data in the PFBC's fisheries management reports for streams throughout the Commonwealth to ensure that the HQ criteria were met. Based on these data and appropriate regulatory criteria, DEP developed this package of stream redesignations including HQ stream redesignations in the Delaware, Susquehanna and Ohio River basins. MSCs are concentrations of contaminants in soil and groundwater that are protective of human health and the environment under various exposure scenarios. The regulations identify the formulas DEP must use to calculate MSCs and the sources of the toxicological information. Additional changes to the regulations may be needed to clarify regulatory language, update outdated information, and to make other corrections. DEP is required by § 250.11 to propose appropriate MSC changes based on current scientific information no more than 36 months after the effective date of the most recently promulgated MSCs. <p>Revision of Sulfur Limits in No. 2 and Lighter Commercial Fuel Oil 25 Pa. Code § 123.22</p>	<p>Quarter 3, 2018, EQB Consideration, as Proposed</p>	<p>This rulemaking proposes to amend 25 Pa. Code § 123.22 to reduce the maximum allowable sulfur content in No. 2 and lighter commercial fuel oil, sold for and used in combustion units, from the current limit of 500 parts per million (ppm) of sulfur to 15 ppm. The rulemaking would require No. 2 fuel oil offered for sale, delivered for use, exchanged in trade or used in Pennsylvania to meet the new sulfur limit. Surplus Lines Agents and Interested Parties; Export List of Insurance Coverages

In May 2017, the Insurance Commissioner determined that certain insurance coverages were generally unavailable in the authorized market and declared those coverages as exportable. A list of exportable coverages was published at 47 Pa.B. 2854 (May 13, 2017). Accordingly, for those insurance coverages that are included on the export list, a diligent search among insurers admitted to do business in this Commonwealth is not required before placement of the coverages in the surplus lines market.

The Insurance Commissioner declared that the export list would remain in effect until revised or superseded by a subsequent list.

At this time, the Acting Insurance Commissioner is soliciting comments regarding the current export list. Any person may request in writing that a coverage be added or removed from the list.

Persons wishing to comment on the Acting Insurance Commissioner’s current export list are invited to submit a written statement within 30 days from the date of publication of this notice in the *Pennsylvania Bulletin*.
