READER'S GUIDE TO THE *PENNSYLVANIA BULLETIN* AND THE *PENNSYLVANIA CODE*

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published weekly. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. It is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations, Statewide court rules, and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, rescission, repeal or emergency action, must be published in the *Pennsylvania Bulletin*.

The following documents are published in the *Pennsylvania Bulletin*: Governor's Executive Orders; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or rescind regulations must first publish in the *Pennsylvania Bulletin* a Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. A Final Rulemaking must be published in the *Pennsylvania Bulletin* before the changes can take effect. If the agency wishes to adopt changes to the Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies, Statewide court rules and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes when they are adopted. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code* § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

A quarterly List of *Pennsylvania Code* Sections Affected lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires the Governor's Budget Office to prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions and authorities receiving money from the State Treasury. The fiscal note states whether the action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions. The fiscal note is required to be published in the *Pennsylvania Bulletin* at the same time as the change is advertised.

A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; and (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years. In item (8) the recommendation, if any, made by the Secretary of the Budget is published with the fiscal note. "No fiscal impact" means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended. See 4 Pa. Code Chapter 7, Subchapter R (relating to fiscal notes).

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish information except as provided by 1 Pa. Code § 3.44:

§ 3.44. General permission to reproduce content of Code and Bulletin.

The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

RULES AND REGULATIONS

Title 49—PROFESSIONAL AND VOCATIONAL STANDARDS

STATE BOARD OF PHARMACY

[49 PA. CODE CH. 27]

Compounding

The State Board of Pharmacy (Board) amends §§ 27.1 and 27.12 (relating to definitions; and practice of pharmacy and delegation of duties) and adds §§ 27.601—27.606 to read as set forth in Annex A.

Statutory Authority

This final-form rulemaking is authorized under sections 4(j) and 6(k)(1) and (9) of the Pharmacy Act (act) (63 P.S. §§ 390-4(j) and 390-6(k)(1) and (9)).

Background

Since at least 2010, the Board has been considering promulgating regulations setting standards for the compounding of drug products by pharmacists. Then, in October 2012, National headlines reported a meningitis outbreak of epidemic proportions. The cause was quickly identified as contaminated compounded injectable medications made by a commercial compounding pharmacy located in Massachusetts. Since that time, representatives of the Board have met with interested parties and stakeholders, including representatives from the United States Food and Drug Administration (FDA), with a goal of promulgating regulations incorporating developments and improvements in the profession's safe, sterile practices and procedures for the compounding of pharmaceutical products for patients.

To that end, the Board published a notice of proposed rulemaking at 47 Pa.B. 1509 (March 11, 2017). Publication of the proposal was followed by a 30-day public comment period. The Board received comments from the Pennsylvania Academy of Ophthalmology; the Pennsylvania Allergy and Asthma Association; the American Academy of Dermatology and Pennsylvania Academy of Dermatology and Dermatologic Surgery; Cardinal Health; the Pennsylvania Medical Society; Patricia Clancy Keinle, RPh; the Pennsylvania Academy of Otolaryngology—Head and Neck Surgery (PAO-HNS); Christine Roussel, PharmD, Assistant Director of Pharmacy at Doylestown Health; the Pennsylvania Society of Health System Pharmacists; and the Pennsylvania Society of Oncology and Hematology and the American Society of Clinical Oncology. The Board also received comments from the House Professional Licensure Committee (HPLC) by letter dated April 25, 2017. The Pennsylvania Senate Consumer Protection and Professional Licensure Committee (SCP/PLC) did not submit comments. On May 10, 2017, the Independent Regulatory Review Committee (IRRC) submitted their comments on the proposed rulemaking. IRRC's comments included fair summarizations of the comments received from the other commenters. The Board discussed the comments at several public meetings and voted to proceed with this final-form rulemaking at its meeting on January 7, 2019.

Summary of Comments, the Board's Response and Descriptions of Amendments

Generally

Initially, IRRC commented that the Preamble states that “all compounding shall be done in accordance with the current version of the *United States Pharmacopeia* (USP),” but pointed out that section 390-8(2) of the act (63 P.S. § 390-8(2)) provides that “nothing herein shall be construed to prevent a duly licensed medical practitioner from dispensing, compounding or otherwise giving any drug to his own patients after diagnosis or treatment of said patient, if such compounding, preparing and dispensing is done by said licensee himself. . . .” The comment included a request to clarify the effect, if any, of this regulation on licensed medical practitioners other than pharmacists. Commenters Pennsylvania Academy of Ophthalmology, Pennsylvania Allergy and Asthma Association, American Academy of Dermatology and Pennsylvania Academy of Dermatology and Dermatologic Surgery, Pennsylvania Medical Society and the PAO-HNS expressed similar concerns.

The Board considered this comment and notes that nothing in the proposed regulation indicates it applies to practitioners other than pharmacists. The act does not provide the Board the authority to regulate practitioners other than pharmacists, and the Board feels the focus of the proposed regulation makes clear the Board's intent to regulate compounding by pharmacists only.

In the same comment, IRRC noted the questions on the inspection form attached to the regulatory analysis form apply only to sterile compounding and questioned whether there will be any changes to the inspection forms related to nonsterile compounding. The Board has revised the inspection form to include questions related to nonsterile compounding.

IRRC also pointed out the Board's inconsistent application of, or reference to, the USP chapters on compounding. Commenters, including Patricia Clancy Keinle, RPh and the Pennsylvania Society of Health System Pharmacists, likewise, ask the Board to remove sections that paraphrase existing USP chapters and to remove sections which appear in USP chapters in greater detail. Instead, commenters ask the Board to directly reference relevant USP chapters to avoid conflicting requirements in the future.

The Board considered these comments and the confusion that has apparently resulted from the Board's inconsistent treatment of the USP throughout the proposed rulemaking and decided to simplify the final-form rulemaking. In response to these comments, the Board has removed the sections which reference, paraphrase or which contain language that is otherwise covered by relevant USP provisions (§§ 27.603—27.605, 27.608—27.615, 27.617—27.619 and 27.622—27.624), and has renumbered the remaining six sections. Instead, the Board will rely on § 27.601 (relating to compounding of preparations), as amended in this final-form rulemaking, to require compounding pharmacists to adhere to section 503a of the Federal Food, Drug, and Cosmetic Act (21 U.S.C.A. § 353a), the Federal regulations promulgated thereunder, and the current version of the USP chapters governing compounding. These amendments ensure the regulations do not conflict with FDA requirements going forward.

§ 27.1 (relating to definitions)

Cardinal Health suggested that the definition of compounding should be modified to clarify that compounding does not include reconstitution of a drug product under a manufacturer's direction. Similarly, the Pennsylvania Society of Hematology and Oncology and the American Society of Clinical Oncology requested clarification that the proposed compounding regulations do not apply to the routine dilution and reconstitution of drug products. Section 503a(e) of the Federal Food, Drug, and Cosmetic Act provides "the term 'compounding' does not include mixing, reconstituting, or other such acts that are performed in accordance with directions contained in approved labeling provided by the product's manufacturer and other manufacturer directions consistent with that labeling." The Board considered this suggestion and determined the Federal definition is an industry-wide standard and so well-known to the regulated community of pharmacists that it is unnecessary to duplicate it within this final-form rulemaking.

§ 27.12 (relating to practice of pharmacy and delegation of duties)

IRRC and the HPLC raised a concern related to § 27.12(d)(2)(vii) and requested additional information to clarify what pharmacy technicians may do and what they are prohibited from doing when assisting in the compounding of drug products. In response, the Board notes the delegation provisions already in place in § 27.12(b)(2), which require the pharmacist to provide direct, immediate and personal supervision of pharmacy technicians. Direct, immediate and personal supervision means the supervising pharmacist must review the prescription or drug order, verify the final product and be immediately available on the premises to direct the work of the pharmacy technicians and to respond to questions or problems. Further, § 27.12(d)(3) provides that pharmacy technicians may not enter or be in a pharmacy if a pharmacist is not on duty, perform any act within the practice of pharmacy that involves discretion or independent judgment, or perform a duty until the technician has been trained and the duty has been specified in a written protocol. Finally, § 27.12(d)(4) provides that the pharmacist manager shall create and maintain a written protocol for each pharmacy technician, specifying each duty the pharmacy technician may perform.

The proposed regulation sought to add a new subparagraph (vii) under § 27.12(d)(2) which states specifically that a pharmacy technician may assist in the compounding of drug products. To provide some clarity and direction, the Board has added to subparagraph (vii) in this final-form rulemaking "as permitted by the written protocol created and maintained in accordance with paragraph (4)."

§ 27.602 (relating to compounding commercially available product)

The American Academy of Dermatology and the Pennsylvania Academy of Dermatology and Dermatologic Surgery noted that this section incorporates the FDA's draft guidance on compounding drugs that are essentially copies of commercially available drug products, with the addition of proposed language permitting such compounding if it is "in the best interest of the patient." They ask if the FDA were to adopt its draft guidance, would the FDA's guidance supersede Commonwealth law? In addition, Cardinal Health commented that a pharmacist using a commercially manufactured, FDA approved drug product in the course of compounding will not have COAs

(certificates of analysis) for these FDA-approved drugs, and asked that the Board consider this scenario.

In response, and to eliminate any confusion regarding § 27.602 and FDA requirements and definitions, the Board has removed this section from this final-form rulemaking and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.603 (relating to bulk drug substances)

IRRC raised a concern that the Board proposes to adopt the FDA Pharmacy Compounding of Human Drug Products Under Section 503a of the Federal Food, Drug, and Cosmetic Act Guidance (FDA Guidance) concerning bulk drug substances, but the proposed regulation provides for an exception for bulk drug substances that are not subject to a monograph in paragraph 2(iii) to allow for bulk drug substances that "peer-reviewed literature supports and, in the professional judgment of the pharmacist and prescriber, demonstrates the safety and effectiveness of the bulk drug substances." IRRC notes a concern that this exception is not regulatory language, does not set a binding norm, and the FDA Guidance does not allow for it. The American Academy of Dermatology and Pennsylvania Academy of Dermatology and Dermatologic Surgery raise a similar concern.

To address these concerns, the Board has removed this section from this final-form rulemaking and will rely on the reference to the Federal requirements and the USP in § 27.601, which simply requires compounding pharmacists to adhere to section 503a of the Federal Food, Drug, and Cosmetic Act, the Federal regulations promulgated thereunder and the relevant USP chapters on compounding.

Commenters Patricia Clancy Keinle, RPh, and Christine Roussel, PharmD, indicated concerns with the use of the term "bulk drug substance," noting its possible confusion with the term "active pharmaceutical ingredients," which is the common term used in the USP. Although this section has been removed from this final-form rulemaking, the Board notes that "bulk drug substance" is the term used in section 503a of the Federal Food, Drug, and Cosmetic Act, and that regulations at 21 CFR 207.3 (relating to bulk drug substance) provide that "[b]ulk drug substance, as referenced in sections 503a(b)(1)(A) and 503b(a)(2) of the Federal Food, Drug, and Cosmetic Act, previously defined in § 207.3(a)(4), means the same as 'active pharmaceutical ingredient' as defined in § 207.1(b)." Thus, the terms are interchangeable.

§§ 27.604 and 27.605 (relating to dispensing compounded drugs; and resale of compounded drug products)

IRRC expressed a concern that § 27.604 identifies a "specific patient" while § 27.605 uses "individual patient," and asked the Board to ensure this final-form rulemaking is consistent and clear. The Pennsylvania Academy of Ophthalmology also asked if the use of different terms in these two sections means that specific patients do not need to be identified for each compounded drug that is delivered by means of wholesale distribution to a medical practitioner.

IRRC also asked whether the provisions in §§ 27.604 and 27.605 prohibit dispensing compounded drugs "for office use." Both IRRC and the Pennsylvania Medical Society asked whether these provisions (1) prohibit dispensing compounded drugs "for office use," (2) limit a physician's ability to order and purchase compounded drugs from the compounding pharmacy for the purposes of storing them in the office for future use, or (3) require a patient-specific prescription in order for a pharmacy to

be able to send a batch of a compounded drug directly to a physician for administration to a patient.

To eliminate this confusion, the Board has removed these sections from this final-form rulemaking. Instead, the Board will rely on the reference to the Federal requirements and the USP in § 27.601. However, the Board would point out that section 503a of the Federal Food, Drug, and Cosmetic Act uses the terms “identified individual patient” and “identified patient.”

Finally, Patricia Clancy Keinle, RPh, Christine Roussel, PharmD and the Pennsylvania Society of Health System Pharmacists suggested that the Board clarify that distribution of a compounded drug product within a health-system is not considered resale. Although the Board has now removed this section, the Board notes that neither the act nor the Board’s regulations, current or proposed, address distribution of a compounded drug product within a health-system.

§ 27.606 (relating to compounding prohibited)

IRRC mentioned the concern raised by Christine Roussel, PharmD and the Pennsylvania Society of Health System Pharmacists that subsection (1) may conflict with a clinical trial where a drug that has been removed from the market is now being used for investigational purposes after approval from an institution’s Institutional Review Board. Upon consideration of this concern, and after discussion with stakeholders, the Board decided to add to paragraph (1) the proviso “unless the drug is being used as part of a clinical trial and is approved by an institution’s Institutional Review Board.” Additionally, because the Board has now deleted proposed § 27.602, the Board replaced the reference to § 27.602 in paragraph (2) with a reference to the relevant provision in the Federal Food, Drug, and Cosmetic Act. Finally, this section has been renumbered as § 27.602 in this final-form rulemaking.

§ 27.607 (relating to pharmacist responsibilities)

Commenters Patricia Clancy Keinle, RPh and Christine Roussel, PharmD indicated concerns with the use of the term “bulk drug substance,” noting its possible confusion with the term “active pharmaceutical ingredient,” which is the common term used in the USP. As noted previously, “bulk drug substance” is the term used in section 503a of the Federal Food, Drug, and Cosmetic Act, and that regulations at 21 CFR 207.3 provide that “[b]ulk drug substance, as referenced in sections 503a(b)(1)(A) and 503b(a)(2) of the Federal Food, Drug, and Cosmetic Act, previously defined in § 207.3(a)(4), means the same as ‘active pharmaceutical ingredient’ as defined in § 207.1(b).” Thus, the terms are interchangeable.

To eliminate the noted confusion, and in light of the use of the term “active pharmaceutical ingredients” in the USP and as commonly used within the industry, the Board deemed it advisable to include a reference to active pharmaceutical ingredients in paragraph (a)(1). Finally, this section has been renumbered as § 27.603 in this final-form rulemaking.

§ 27.608 (relating to protective apparel)

IRRC noted that this section states that sterile gowning components are necessary “as required by the USP chapter on sterile compounding” and that a comment by Cardinal Health raised concerns that not all gowning components required by USP Chapter 797 are sterile. The Board notes that there are different protective apparel requirements under USP Chapter 795 (nonsterile), Chapter 797 (sterile) and Chapter 800 (hazardous drugs). In response, the Board has removed this section from this

final-form rulemaking and instead will rely on the general reference to the Federal requirements and the USP in § 27.601. The result is that pharmacists are required to follow the applicable protective apparel requirements of Chapters 795, 797 and 800 of the USP.

§ 27.609 (relating to drug compounding facility requirements)

Drug compounding facility requirements are adequately addressed in the current version of the USP chapters on compounding. Therefore, to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.610 (relating to equipment)

This section merely referred to compliance with USP chapters on equipment, and to remain consistent with other revisions, the Board removed this section and will rely on the general reference to the Federal requirements and the USP in § 27.601.

§ 27.611 (relating to equipment maintenance)

This section merely referred to compliance with USP chapters on equipment maintenance, and to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.612 (relating to specialized equipment)

Specialized equipment for compounding is adequately addressed in the current version of the USP chapters on compounding. Therefore, to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.613 (relating to use of automated equipment)

Use of automated equipment for compounding is adequately addressed in the current version of the USP chapters on compounding. Therefore, to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.614 (relating to control of containers and closures)

This section merely referred to compliance with USP chapters on control of containers and closures, and to remain consistent with other revisions, the Board removed this section from this final-form rulemaking and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.615 (relating to storage)

This section generally referred to compliance with USP chapters on storage but added specific requirements which are adequately addressed in USP storage requirements. To eliminate potential confusion between the addition of specific requirements and wording in the USP chapters, and to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.616 (relating to drug compounding controls)

This section has been renumbered as § 27.604 in this final-form rulemaking.

§ 27.617 (relating to standard operating procedures required)

Commenter Patricia Clancy Kienle, RPh recommended deleting the second and third sentence of subsection (a)

because this information is already detailed in the USP. Patricia Clancy Kienle, RPh and Christine Roussel, PharmD recommended deleting the phrase “including validation of any sterilization process” from subsection (b) because it is described in USP Chapter 797, and that USP Chapter 797 does not require every sterile preparation to be tested.

IRRC and Patricia Clancy Keinle, RPh highlighted the contradiction in subsection (c) where it states control procedures must include all of the following as appropriate. Further, IRRC also pointed out that “as appropriate” is vague and does not set a measurable standard. Patricia Clancy Keinle, RPh recommended removing the last sentence and the numbered bullets because “this is detailed in USP chapters.” Additionally, Cardinal Health commented that a pharmacist solely using a commercially manufactured, FDA approved drug product in the course of compounding should not need to perform pH testing of solutions. In response, the Board has decided to remove the entire section, and will rely on the reference to the Federal requirements and the USP in § 27.601, which as the commenters aptly point out are sufficiently detailed.

§ 27.618 (relating to accuracy)

Accuracy regarding weights and measurements, and container requirements are adequately addressed in the current version of the USP chapters on compounding. Therefore, to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.619 (relating to production record)

Production record requirements are adequately addressed in the USP chapters on compounding. Therefore, to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

§ 27.620 (relating to label information required)

The HPLC asked whether the label information required in this section would include all of the information currently found on the label of a noncompounded prescription medication. The Board believes the reference to § 27.18(d) (relating to standards of practice) clarifies, with certainty, that compounded medication containers must comply with the labeling requirements set forth in § 27.18(d), which apply to all prescription drug containers.

IRRC noted that this section requires compliance with § 27.18(d), which, among other things, requires the DEA number of the pharmacy to be included on the container. Noting the comment by Cardinal Health, that not all pharmacies possess a DEA registration and do not possess nor dispense controlled substances, IRRC asked the Board to consider this scenario and to ensure that this final-form rulemaking is reasonable and clear for the regulated community. The Board considered this comment and believes the reference to § 27.18(d) is appropriate, and the Board notes that the possibility that a pharmacy might not have a DEA registration number is being addressed by the Board in a separate upcoming “general revisions” rulemaking package.

Commenters Patricia Clancy Kienle, RPh and the Pennsylvania Society of Health System Pharmacists mention that the USP provides more detail regarding required label information. The Board decided to remove paragraphs (1) and (2) to avoid confusion and potential conflict if the USP changes its standards in the future. In

its place, the Board added the phrase “any additional information required by USP provisions related to label information requirements.”

In addition, this section has been renumbered as § 27.605 in this final-form rulemaking.

§ 27.621 (relating to compounding records)

Commenters Patricia Clancy Kienle, RPh and the Pennsylvania Society of Health System Pharmacists recommend removing this section, but moving the 2-year record retention requirement to another section. The Board considered this comment, but decided to make no changes, other than renumbering this section as § 27.606 in this final-form rulemaking. The Board believes this section provides context to the record retention requirement and is not inconsistent with the USP. Further, the Board believes that, because of its reference to § 27.18(b), it is consistent with other pharmacy recordkeeping requirements.

§§ 27.622 and 27.623 (relating to master formula record; and production record for drugs compounded in bulk quantities)

IRRC and commenters Patricia Clancy Kienle, RPh and Christine Roussel, PharmD note the Board’s use of “formula record” in § 27.622 and “production record” in § 27.623 is confusing and inconsistent with the USP. The commenters note that the USP defines two types of records: Master Formulation Record and Compounding Record. The Board agrees with these comments, and to remain consistent with other revisions, the Board removed this section and will rely on the general reference to the Federal requirements and the USP in § 27.601.

§ 27.624 (relating to label information)

This section applied to labels affixed to each container of batch drug products compounded, rather than labels for containers which are dispensed to the ultimate user as described in § 27.620. The USP chapters on compounding adequately address information requirements on labels for batch drug products. Therefore, to remain consistent with other revisions, the Board removed this section and will rely on the reference to the Federal requirements and the USP in § 27.601.

Miscellaneous

IRRC’s final comment addresses the use of the term “bulk” throughout the proposal and asked the Board to either define the term or clarify the applicability of the term within the section in which it is used. In response to this comment and similar concerns raised by Patricia Clancy Keinle, RPh, Christine Roussel, PharmD and the Pennsylvania Society of Health-System Pharmacists, the Board has eliminated potential inconsistencies by removing proposed §§ 27.603, 27.604, 27.619, 27.622 and 27.623 from this final-form rulemaking.

Fiscal Impact

This final-form rulemaking would have little fiscal impact on the Commonwealth, its political subdivisions or the public. Any pharmacy that elects to engage in compounding pharmaceuticals may incur a cost relating to compliance with the standards set forth in this final-form rulemaking. However, as the Board is unable to determine at this time how many pharmacies engage in compounding or may elect to do so at some future date, it is impossible to estimate the fiscal impact on the regulated community. As FDA and USP requirements are already in place, and the regulation provides no additional substantive requirements or prohibitions, it is

likely that there will be little, if any, costs to pharmacies for compliance with this final-form rulemaking.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a), on March 1, 2017, the Board submitted a copy of the notice of proposed rulemaking, published at 47 Pa.B. 1509, to IRRC and the chairpersons of the HPLC and the SCP/PLC for review and comment.

Under section 5(c) of the Regulatory Review Act, IRRC, the HPLC and the SCP/PLC were provided with copies of the comments received during the public comment period, as well as other documents when requested. In preparing this final-form rulemaking, the Board has considered all comments from IRRC, the HPLC and the public. The Board received no comments from the SCP/PLC.

On April 9, 2019, the Board delivered this final-form rulemaking to IRRC, the HPLC and the SCP/PLC. Under section 5.1(j.2) of the Regulatory Review Act (71 P.S. § 745.5a(j.2)), on May 15, 2019, this final-form rulemaking was deemed approved by the HPLC and the SCP/PLC. Under section 5.1(e) of the Regulatory Review Act, IRRC met on May 16, 2019, and approved this final-form rulemaking.

Title 58—RECREATION

FISH AND BOAT COMMISSION

[58 PA. CODE CH. 65]

Fishing; Special Fishing Regulations

The Fish and Boat Commission (Commission) amends Chapter 65 (relating to special fishing regulations). The Commission is publishing this final-form rulemaking under the authority of 30 Pa.C.S. (relating to Fish and Boat Code) (code). The amendments update the Commission's list of waters subject to special regulations.

A. Effective Date

This final-form rulemaking will go into effect upon publication in the *Pennsylvania Bulletin*.

B. Contact Person

For further information on this final-form rulemaking, contact Wayne Melnick, Esq., P.O. Box 67000, Harrisburg, PA 17106-7000, (717) 705-7810. This final-form rulemaking is available on the Commission's web site at www.fish.state.pa.us.

C. Statutory Authority

The amendments to § 65.24 (relating to miscellaneous special regulations) are published under the statutory authority of section 2307 of the code (relating to waters limited to specific purposes).

D. Purpose and Background

The specific purpose and background of the amendments is described in more detail under the summary of changes.

E. Summary of Changes

Chapman Dam Reservoir, a 67.95-acre impoundment owned by the Department of Conservation and Natural Resources, is located within Chapman State Park, Pleasant Township, Warren County, approximately 6 miles south of the City of Warren. This reservoir was completely dewatered during fall 2017 to remove sediment and to complete control tower, dam and spillway repairs and modifications per Department of Environmental Protection dam safety standards. The earth-fill dam, constructed in 1949, impounds the West Branch Tionesta Creek at river-mile 14.7 upstream from its confluence with Tionesta Creek at river-mile 40.3. Prior to the drawdown in 2017, the lake offered angling opportunities for multiple warm-water and cool-water fish species, as well as adult trout stocked by the Commission. Sediment removal and dam and spillway repairs are expected to be completed by early 2019 with refilling initiated soon after.

The Commission plans to initiate stocking the lake beginning in spring 2019 or as soon as refilling conditions allow with fingerling plants of select fish species to establish a high quality warm-water and cool-water fishery. Immediately upon refilling of the lake, staff propose to open the lake to fishing under a miscellaneous special regulation that will allow for the harvest of trout under Commonwealth Inland Waters angling regulations but allow only catch and release fishing for all other fish species. Staff believe that this approach will allow for the most rapid development of a balanced warm-water and cool-water fish community, while offering acceptable levels of recreational angling opportunities. Fisheries Management staff will monitor the fish populations as needed while they develop and make necessary modifications to the species stocked and recommend adjustments to the regulations governing fish harvest to the Board of Commissioners to continually provide high quality recreational angling opportunities at Chapman Dam Reservoir. Once the warm-water fishery has been reestablished, the lake will be recommended for removal from the miscellaneous special regulation and inclusion in one of the Commission's existing warm-water regulation programs.

The Commission therefore amends § 65.24 to read as set forth in the proposed rulemaking published at 48 Pa.B. 7643 (December 15, 2018).

F. Paperwork

This final-form rulemaking will not increase paperwork and will not create new paperwork requirements.

G. Fiscal Impact

This final-form rulemaking will have no adverse fiscal impact on the Commonwealth or its political subdivisions.

H. Public Involvement

A notice of proposed rulemaking was published at 48 Pa.B. 7643. The Commission received no public comment.

Findings

The Commission finds that:

(1) Public notice of intention to adopt the amendments adopted by this order has been given under sections 201 and 202 of the act of July 31, 1968 (P.L. 769, No. 240) (45 P.S. §§ 1201 and 1202) and the regulations promulgated thereunder, 1 Pa. Code §§ 7.1 and 7.2.

(2) A public comment period was provided, and no public comments were received.

(3) The adoption of the amendments of the Commission in the manner provided in this order is necessary and appropriate for administration and enforcement of the authorizing statutes.

Order

The Commission, acting under the authorizing statutes, orders that:

(A) The regulations of the Commission, 58 Pa. Code Chapter 65, are amended by amending § 65.24 to read as set forth at 48 Pa.B. 7643.

(B) The Executive Director will submit this order and 48 Pa.B. 7643 to the Office of Attorney General for approval as to legality and form as required by law.

(C) The Executive Director shall certify this order and 48 Pa.B. 7643 and deposit them with the Legislative Reference Bureau as required by law.

(D) This order shall take effect upon publication in the *Pennsylvania Bulletin*.

6. *Scoring of Applications.* The Board will evaluate each complete and timely-filed project proposal and grant application it receives, which shall include a 100-point scale assessing:

a. Up to 20 points for the project needs statement.

b. Up to 20 points for the expected impact of project outcomes.

c. Up to 20 points for the promotion, marketing or research methodology.

d. Up to 20 points for overall project evaluation.

e. Up to 20 points for support and participation from industry.

7. *Scores.* Upon completion of evaluations, the Board will prepare a record identifying each complete and timely-filed project proposal and grant application received and the numerical score assigned to each. In the event of an ACMA-funded grant, the Board will award grants based upon its evaluation and scoring. In the event of one or more recommendations to the Liquor Control Board to make and fund a grant, the Board will transmit to the Liquor Control Board the project proposal and grant application, along with the score assigned to it by the Board and any other information deemed relevant by the Board or requested by the Liquor Control Board. Request will be made by the Board that the Liquor Control Board respond to all recommendations for grant approval within 30 days.

8. *Term of Grants.* Applications should be submitted for projects to begin after July 1, 2019, on a date within Fiscal Year 2019-2020 (July 1, 2019—June 30, 2020). Anticipated completion dates will be dictated by the project scope and parameters and may exceed 12 months from commencement if the project so warrants. The Board may award, or recommend that the Liquor Control Board approve, grant funding for multiyear projects or extensions of an on-going project, if the Board identifies that a multiyear term or an extension advances the grant's objectives. Requests for extensions of ongoing projects shall be made, evaluated and processed in accordance with all the requirements of this notice. Progress reports are to be delivered by e-mail to chariley@pa.gov no later than October 1 and April 1 every year for the duration of the project, or as requested by the Board. Board will obtain the required signature on the grant agreements, including the Liquor Control Board, if necessary, and any other required Commonwealth entities, and return a copy to the applicant. No grant agreement is effective and work should not begin until all required signatures have been applied to the grant agreement. Among the terms of the grant agreement shall be a requirement that the grant recipient provide the Board full and complete access to all records relating to the performance of the project and submit information as the Board may require.

11. *Nonmatching Cost-Reimbursement Grant and Indirect Costs Cap.* Grants made hereunder do not require the applicant secure or devote a matching sum to the project. Payment of grant funds will occur on a reimbursement basis only. Grant awards will include an allowance for indirect costs of 10%. In the case of graduate student participation, reasonable stipends will be allowed, and tuition will not be allowed.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation

to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential

public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Actions on applications for the following activities filed under the Dam Safety and Encroachments Act (32 P.S. §§ 693.1—693.27), section 302 of the Flood Plain Management Act (32 P.S. § 679.302) and The Clean Streams Law and Notice of Final Action for Certification under section 401 of the FWPCA.

The rebate will be offered on a first-come, first-served basis in the order in which they are received. Rebate request forms and required documentation must be submitted to the Department no later than 6 months after the vehicle is purchased.

The program guidelines and application instructions, as well as an up-to-date listing of rebates, are available on the Department's web site at www.dep.pa.gov (select "Citizens," then "Grants, Loans and Rebates," then "Alternative Fuels Incentive Grant," then "Alternative Fuel Vehicles").

All AFV rebates must be submitted through the Department of Community and Economic Development's Electronic Single Application web site, eGrants. Visit the eGrants web site at <https://www.esa.dced.state.pa.us> to submit an application.

Request for Applications for Watershed Planning and Restoration Grants through the Section 319 Nonpoint Source Management Program

As part of the Department of Environmental Protection's (Department) Section 319 Nonpoint Source Management Grants Program, applications will be accepted for watershed planning and restoration grants. Funded in part by the United States Environmental Protection Agency under section 319(h) of the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1388), the Department administers a grant program to fund watershed projects that are part of approved watershed implementation plans (WIP). The grants are designed to improve and protect waters in this Commonwealth from nonpoint source pollution associated with agricultural activities, abandoned mine drainage (AMD), stormwater runoff, energy resource extraction, and streambank and shoreline degradation.

Eligible applicants include: incorporated watershed associations, counties or municipalities; county conservation districts; and council of governments or other authorized organizations including nonprofit organizations, educational institutions and municipal authorities.

The Department is focusing these grants on projects that reduce nonpoint source pollution in targeted watersheds with WIPs, especially projects that reduce nitrogen, phosphorous and sediment pollution from agricultural and stormwater runoff, along with AMD-related pollution from iron, aluminum and acidity. The Department is particularly interested in projects that implement effective best management practices (BMP) that reduce or

eliminate stream impairments within WIP areas, leading to local water quality improvements. The Department has identified other priorities, including: implementing BMPs within WIP areas to address priority nonpoint source pollution sources; developing new WIPs and revising existing WIPs; and integrating Chesapeake Bay Phase 3 WIP Countywide Action Plans into new and revised WIPs.

Examples of eligible projects include: design and construction of BMPs including riparian forest buffers, streambank fencing and erosion/sedimentation/nutrient control practices on cropland; animal waste storage systems; and design and construction of stormwater management BMPs and AMD treatment systems. Other examples of eligible projects include projects that will reduce nonpoint source pollution in watersheds where streams are impaired and integrating stormwater management BMPs into watershed management strategies.

Applications and all supporting documents must be submitted through the Department of Community and Economic Development's Electronic Single Application web site, eGrants at <https://www.esa.dced.state.pa.us>. Applications will be accepted beginning at 8 a.m. on Monday, June 24, 2019, through 5 p.m. on Friday, August 9, 2019. Late submissions will not be considered.

Interested applicants with questions may contact Roland Carney at rscarney@pa.gov or (717) 783-2944. To obtain more information on the Section 319 Nonpoint Source Management Grants Program, visit the Department's web site at www.dep.pa.gov (search "Nonpoint Source").

INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b).

The Commission has issued comments on the following proposed regulations. The agency must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

Environmental Quality Board Regulation # 7-548 (IRRC # 3226)

Water Quality Standards; Class A Stream Redesignations

June 6, 2019

We submit for your consideration the following comments on the proposed rulemaking published in the March 23, 2019 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Environmental Quality Board (EQB) to respond to all comments received from us or any other source.

Whether the regulation is supported by acceptable data; Economic or fiscal impact.

This proposed rulemaking will update designated uses for streams that qualify as High Quality (HQ)-Cold Water Fishes (CWF) waters, based on species-specific biomass for Class A Wild Trout set by the Pennsylvania Fish and Boat Commission (PFBC). EQB states that Department of Environmental Protection (DEP) staff conducted an independent review of the trout biomass data in PFBC fishery

management reports for relevant streams to ensure that the HQ conditions were met. The proposal affects 42 stream segments totaling 204 stream miles.

A document prepared by DEP's Division of Water Quality Standards that was submitted with this proposal states that while DEP generally followed PFBC requested stream reach delineations, "adjustments were made in some instances based on land use, confluence of tributaries or considerations based on electronic mapping limitations."

PFBC submitted comments suggesting that the zone for recommended designated use for seven streams be amended from Main Stem to Basin. They also suggest that the Basin designation be applied to entire reaches of two streams instead of just the streams themselves. It is our understanding that adopting the recommendations of the PFBC would increase the number of stream miles affected by the proposal.

We ask EQB to review the comments of the PFBC to determine if the suggestions are supported by acceptable data and to provide an explanation of why it will either adopt or not adopt the suggested amendments. If changes are made, we ask EQB to update the number of stream

miles that will be affected and also to quantify any potential economic or fiscal impact that may result.

**Pennsylvania Labor Relations Board
Regulation # 104-1 (IRRC # 3229)**

Board Rules and Regulations

June 6, 2019

We submit for your consideration the following comments on the proposed rulemaking published in the April 6, 2019 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Pennsylvania Labor Relations Board (Board) to respond to all comments received from us or any other source.

1. Section 91.2. Appearances.—Consistency with statutes.

Subsection (a) will allow an attorney or other representative, when filing an entry of appearance, to agree to service of letters and orders from the Board by e-mail. Section 10 of the Pennsylvania Labor Relations Act and section 1606 of the Public Employe Relations Act specify how the Board may serve documents:

Complaints, orders[,] and other process and papers of the board, its members or agent may be served, either personally or by registered mail or by telegraph or by leaving a copy thereof at the principal office or place of business of the person required to be served.

43 P.S. § 211.10 and 43 P.S. § 1101.1606.

The proposed regulation appears to conflict with the statutory requirements for the Board to serve documents in person, by registered mail, or by leaving a copy at an office or place of business. We ask the Board to explain in the preamble to the final-form regulation how service by e-mail is consistent with these statutes.

2. Section 93.12. Service and filing of papers.—Implementation procedures.

Subsection (b)(2) will allow parties to submit certain filings with the Board by e-mail. This paragraph requires the party to accept responsibility for attaching documents in the proper format, readability of files and disruptions in electronic transmissions. Further, the party must accept “the risk that the e-mailed document may not be properly received or timely filed.” We have two concerns. First, if an e-mailed document is not properly received, will the Board allow a party to resubmit the document? Will the Board allow a party to resubmit filings that are not properly received on the last day of a time limit for filing? Second, what does the Board consider “timely filed” when a party submits documents by e-mail? We ask the Board to clarify in the preamble to the final-form regulation how it intends to implement e-mail filings by parties.

This comment also applies to § 95.42(c)(2) (relating to filing of papers).

3. Miscellaneous clarity.

- The preamble states that §§ 93.12(b)(2) and 95.42(c)(2) “add the option of agreeing to e-mail service of letters and orders from the Board.” These paragraphs address methods of filing with the Board. These citations should be updated in the preamble to the final-form regulation.

- Section 95.98(a)(1) (relating to decisions of the Board) requires a party to file an original and four copies of a

statement of exceptions to a hearing examiner decision. Requirements for an original and copies throughout the regulations are proposed to be deleted. Why wasn’t the requirement in this paragraph deleted?
