READER'S GUIDE TO THE *PENNSYLVANIA BULLETIN* AND THE *PENNSYLVANIA CODE*

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published weekly. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. It is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations, Statewide court rules, and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, rescission, repeal or emergency action, must be published in the *Pennsylvania Bulletin*.

The following documents are published in the *Pennsylvania Bulletin*: Governor's Executive Orders; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or rescind regulations must first publish in the *Pennsylvania Bulletin* a Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. A Final Rulemaking must be published in the *Pennsylvania Bulletin* before the changes can take effect. If the agency wishes to adopt changes to the Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the Pennsylvania Bulletin

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies, Statewide court rules and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes when they are adopted. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code* § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government.

How to Find Rules and Regulations

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacodeandbulletin.gov.

Source Notes give the history of regulations. To see if there have been recent changes not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

A quarterly List of *Pennsylvania Code* Sections Affected lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

The *Pennsylvania Bulletin* is available at www.pacodeandbulletin.gov.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires the Governor's Budget Office to prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions and authorities receiving money from the State Treasury. The fiscal note states whether the action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions. The fiscal note is required to be published in the *Pennsylvania Bulletin* at the same time as the change is advertised.

A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; and (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years. In item (8) the recommendation, if any, made by the Secretary of the Budget is published with the fiscal note. "No fiscal impact" means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended. See 4 Pa. Code Chapter 7, Subchapter R (relating to fiscal notes).

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish information except as provided by 1 Pa. Code § 3.44:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the [Legislative Reference] Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

In addition, the permit contains the following revisions to major special conditions: The schedule of compliance for total annual load limits at Outfall 027 is revised from 36 months to 59 months with milestones that coincide with the previously drafted schedule of compliance for other new limits at that outfall. Cooling water intake structure requirements imposed pursuant to Section 316(b) of the Clean Water Act are updated to require daily monitoring and monthly reporting of actual intake flows, cooling water withdrawals, make-up water, and blowdown volume. The calculation procedures are clarified for total monthly and total annual loads at Outfalls 001, 018, and 027. The dates of interim milestones for the schedule of compliance for TMDL limits at Outfalls 006, 013, and 021 are modified.

The effluent limits and monitoring requirements for all other Internal Monitoring Points and Outfalls are unchanged.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted Under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (Act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of any Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent (NOI) to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the background standard, Statewide health standard, the site-specific standard, or who intend to remediate a site as a special industrial area, must file a (NOI) to Remediate with the Department. A NOI to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site, and a description of the intended future use of the site. A person who demonstrates attainment of one, or a combination of the cleanup standards, or who receives approval of a special industrial area remediation identified under the Act, will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under Sections 304(n)(1)(ii) and 305(c)(2) of the Act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the NOI to Remediate is published in a newspaper of general circulation in the area of the site. For the following identified site(s), proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30-days of the following specified date. During this comment period the municipality may request that the following identified person, as the remediator of the site, develop and implement a public involvement plan. Requests to be involved, and comments, should be directed to the remediator of the site.

For further information concerning the content of a NOI to Remediate, please contact the Environmental Cleanup Program Manager in the Department of Environmental Protection Regional Office under which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the Community Relations Coordinator at the appropriate Regional Office listed. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

The Department of Environmental Protection has received the following Notice(s) of Intent to Remediate:

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities. Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held,

if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the Regional Office listed before the application. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30-days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30-days of this public notice and contain the name, address, telephone number and the interest of the party filing the request and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a

hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

notice, as well as any questions to the office noted above the application. Comments should contain the name, address and telephone number of the person commenting, identification of the certification request to which the comments or objections are addressed, and a concise statement of comments, objections or suggestions including the relevant facts upon which they are based.

The Department may conduct a fact-finding hearing or an informal conference in response to comments if deemed necessary. Each individual will be notified, in writing, of the time and place of a scheduled hearing or conference concerning the certification request to which the comment, objection or suggestion relates. Maps, drawings and other data pertinent to the certification request are available for inspection between the hours of 8:00 AM and 4:00 PM on each working day at the office noted above the application.

If you are a person with a disability and wish to attend the hearing and you require an auxiliary aid, service or other accommodation to participate in the proceedings, please contact the specified program. TDD users may contact the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

**UNDER ACT 2, 1995
PREAMBLE 2**

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in

the Department Regional Office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

**UNDER ACT 2, 1995
PREAMBLE 3**

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department Regional Office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate Regional Office. TDD users may telephone the Department through the Pennsylvania Hamilton Relay Service at (800) 654-5984.

7-561	Environmental Quality Board Additional RACT Requirements for Major Sources of NO _x and VOCs for the 2015 Ozone NAAQS 51 Pa.B. 4333 (August 7, 2021)	10/12/21	11/12/21

**Environmental Quality Board Regulation # 7-561
(IRRC # 3310)**

**Additional RACT Requirements for Major Sources
of NO_x and VOCs for the 2015 Ozone NAAQS**

November 12, 2021

We submit for your consideration the following comments on the proposed rulemaking published in the August 7, 2021 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Environmental Quality Board (EQB) to respond to all comments received from us or any other source.

1. Reasonableness of requirements, implementation procedures and timetables for compliance by the public and private sectors; Possible conflict with or duplication of statutes or existing regulations.

Revision to the State Implementation Plan (SIP) and review and approval by the United States Environmental Protection Agency (EPA)

The Preamble to this proposed rulemaking states that it would amend Chapter 121 and Chapter 129 to adopt additional presumptive reasonably available control technology (RACT) requirements and RACT emission limitations for certain major stationary sources (sources) of oxides of nitrogen (NO_x) and volatile organic compound (VOC) emissions in existence on or before August 3, 2018, to address the 2015 8-hour National Ambient Air Quality Standards (NAAQS) established by the EPA under the authority of the Clean Air Act (CAA) (42 U.S.C.A. §§ 7401–7671q). This rulemaking is often referred to as RACT III. RACT I and RACT II rulemakings were previously promulgated by the EQB in 1994 and 2016, respectively.

Section 110(a) of the CAA gives states the primary responsibility for meeting NAAQS and requires each state to adopt and submit to the EPA a SIP needed to enforce NAAQS. According to the EQB, a SIP includes the regulatory programs, actions and commitments a state will carry out to implement its responsibilities under the CAA. Once approved by the EPA, a SIP is legally enforceable under federal and state law. This proposed rulemaking will be submitted to the EPA for approval as a revision to the Commonwealth's SIP after it is promulgated as a final regulation.

The EPA Region III has submitted comments on the proposed rulemaking. The comments:

- Stress that for RACT II case-by-case sources, additional analysis under RACT III is still required, even if no significant changes in control technologies have occurred and the additional analysis must be part of the regulatory record;
- State that any extension of the compliance date beyond January 2023 is contrary to EPA's implementing regulations and is not approvable for RACT purposes; and

- Pose questions related to implementation procedures for public participation and comment on case-by-case RACT determinations, the type of information that must be submitted by sources for review by the Department of Environmental Protection (DEP), compliance dates, determination of compliance related to averaging plans, data used to calculate costs associated with the rulemaking, and clarity issues.

In the Regulatory Analysis Form (RAF) submitted with the proposed rulemaking, the EQB states the following: "If the EPA finds that a state has failed to submit an acceptable SIP or failed to implement the requirements of an approved SIP, sanctions will be imposed." Since this rulemaking must ultimately be approved by the EPA before it can be incorporated as part of the Commonwealth's SIP, it is important the EQB work with EPA to ensure that the issues raised above are adequately addressed in the final-form rulemaking. We ask the EQB to review the concerns raised above and to amend the rulemaking or provide further explanation on implementation procedures to ensure compliance with EPA requirements.

Ability of the regulated community to comply with the rulemaking and the Commonwealth's obligation to implement its SIP in a timely fashion

A major concern raised by the regulated community relates to the timing of the finalization of the rulemaking, the effective date of the rulemaking and their ability to comply with the revisions that are being made. They contend that the current schedule associated with this rulemaking will not allow sources sufficient time to assess the impact of the regulation on their operations. In addition, some industries, whose operations make it difficult to shut down to install control technologies, will have difficulty meeting the stricter requirements. Some of the commentators have offered alternative schedules for compliance. As noted above in the summary of comments submitted by EPA, any compliance date beyond January 2023 would not be in compliance with EPA regulations.

We ask the EQB to review the concerns of the regulated community related to timely compliance and the unique nature of their operations, in conjunction with EPA requirements for the Commonwealth's SIP and, if possible, provide regulatory flexibility for these organizations. Regardless of any flexibility that may or may not be possible, we urge the EQB and DEP to continue to the work they have been doing to educate the affected industries on what will be expected of them once this rulemaking is finalized.

2. Direct and indirect costs to the Commonwealth, its political subdivisions and to the private sector; The nature and estimated costs of legal, consulting or accounting services which the public or private sector may incur.

We have four concerns regarding the RAF submitted with the proposed rulemaking. First, comments submitted by the regulated community suggest that fiscal analysis

in the RAF underestimates the cost of compliance with the rulemaking. For example, it is noted that the RAF does not include an estimate for sources that will need to spend time and resources on legal and technical advisory services to comply with presumptive limits or a case-by-case demonstration. Commentators also contend that the RAF and the Technical Supporting Document (TSD) submitted with the rulemaking underestimate the number of facilities that will have to install additional RACT and fail to account for the cost of new equipment that will be required to meet the new limits imposed by the rulemaking.

Second, commentators state that lower presumptive emissions required by the rulemaking will necessitate case-by-case alternative RACT limits and compliance schedules that DEP will have to review and approve. However, the cost to DEP associated with the additional petitions has not been quantified in the RAF.

Third, the RAF quantifies the expected reduction of NO_x emissions at approximately 9,000 tons per year (TPY) from engines, turbines and municipal waste combustors. A quantification of the expected reduction of Volatile Organic Compounds (VOCs) was not provided in the RAF.

Finally, Question # 23 of the RAF states that the total estimated cost to the regulated community will be \$38,500,000 for the last half of fiscal year 2022-2023 and then \$77,000,000 per year thereafter. It is our understanding that these estimated costs were based on an earlier draft of this proposed rulemaking and the actual cost estimates are lower and properly calculated under Question # 19 of the RAF.

We ask the EQB to review the contentions of the commentators regarding inaccurate fiscal impact data in the RAF and TSD, and if appropriate, provide updated information about the number of sources and facilities that will be affected by the rulemaking, the costs associated with compliance for the regulated community and also the costs associated with additional case-by-case reviews by DEP. We also ask the EQB to quantify the expected reduction of VOCs that could result from this rulemaking and to quantify the costs of meeting the lower VOCs standards. Finally, we ask the EQB to update Question # 23 of the RAF.

3. Glass melting furnaces.—Possible conflict with or duplication of statutes or existing regulations; Need; Reasonableness; Fiscal impact; Implementation procedures.

A commentator that operates a flat glass plant has submitted comments stating that this rulemaking should not impose presumptive RACT limits on their operation because their business is currently subject to comprehensive, industry-specific regulations for glass melting furnaces found at §§ 129.301—129.310. They contend that glass melting furnaces were not subject to RACT II and the Preamble to this rulemaking offers no explanation why limits are now being imposed. The commentator states that the regulatory requirements for their operation imposed under this rulemaking will conflict with the existing regulations. If their operation will be subject this rulemaking, they request that operational flexibility regarding start-up, shut-down and idling of their furnaces currently provided in existing regulations be added to this proposal. They also request additional time for compliance with the rulemaking. Finally, they disagree with the cost estimates provided for their operation in the TSD.

We ask the EQB to clarify in the Preamble to the final-form rulemaking whether RACT III requirements will apply to glass melting furnaces beyond what is already required under §§ 129.301—129.310. If additional compliance is required, the EQB should explain why it is needed and how this current rulemaking will be implemented with the existing regulatory requirements. Additionally, the EQB should ensure that there is no conflict between the regulations. We also ask the EQB and DEP to work with the commentator and provide assistance with compliance timeframes and cost estimates.

4. Protection of the public health, safety and welfare and the effect on this Commonwealth's natural resources.

Two comments were received from environmental advocacy organizations. The New Jersey Department of Environmental Protection also submitted comments. The comments state that this rulemaking is overdue and urge its final adoption as soon as possible. The comments also suggest stricter emissions limits for certain types of sources, such as steel producing facilities, coal-fired power plants and municipal waste combustors, and also call for greater protection for an environmental justice community in Chester County. We ask the EQB to review the recommendations of this group of commentators and provide responses in the Preamble to the final-form regulation. If any of the recommendations are adopted, the EQB should quantify the fiscal impact associated with the more stringent requirements and include that information in the RAF. Finally, if the recommendations are adopted, the EQB should educate affected sources about the changes as soon as possible to assist with compliance obligations.

5. Section 129.111. Applicability.—Clarity; Implementation procedures.

This section establishes applicability requirements for the owners and operators of major NO_x emitting and major VOC emitting facilities, or both, for which RACT requirements have otherwise been established in Chapter 129. We have two concerns.

First, under Subsection (a), several commentators believe the phrase, "that were in existence on or before August 3, 2018", as it relates to major emitting facilities is vague. Would this standard apply to a facility that was built, but not yet operating as of that date? We recommend this subsection be clarified in the final-form regulation.

Second, Subsection (c) provides exemptions for facilities that have the potential to emit less than a certain amount of NO_x or VOCs. A commentator states that an owner or operator that originally determined that a source is exempt may later determine that the source is not exempt. For this reason, the commentator suggests that the final rulemaking include provisions that provide compliance date obligations for these sources under this particular circumstance. In the Preamble to the final-form rulemaking, we ask the EQB to explain how this provision will be implemented under the scenario described above, and if appropriate, amend the final rulemaking accordingly.

6. Section 129.112. Presumptive RACT requirements, RACT emission limitations and petition for alternative compliance schedule.—Clarity; Reasonableness; Whether the regulation is supported by acceptable data.

This section establishes that the owners and operators of major NO_x emitting and major VOC emitting facilities,

or both, shall comply with the specified presumptive RACT requirements and RACT emission limitations, and provides a mechanism for requesting an alternative compliance schedule. We have five concerns.

First, under Subsection (c)(8), a commentator has suggested that a “flare” be added to the list of equipment that must be installed, operated and maintained in accordance with the manufacturer’s specifications and with good operating practices. The commentator asserts that this piece of equipment is subject to presumptive RACT. If the addition of “flare” to this subsection improves the clarity of this provision, we suggest that it be added to the final-form rulemaking.

Second, the standard of 85 ppmvd NO_x as a presumptive RACT emission limitation referenced in Subsection (g)(2)(iii)(A) has been questioned by a commentator that believes that existing technology does not allow for this level of compliance. They believe the standard will result in numerous alternative RACT submittals. We ask the EQB to explain the rationale for this standard in the Preamble to the final-form rulemaking.

Third, under Subsection (g)(1)(vi)(A) and (B), commentators have stated that the standards established for bituminous waste, such as gob, and anthracite waste, such as culm, are appropriate when measured as a 30-day rolling average. However, measuring those standards against an operating day compared to a 30-day rolling average is inappropriate because of the way in which combustion units using gob and culm as a fuel source operate. In the Preamble to the final-form regulation, we ask the EQB to explain the rationale for measuring emission limits for an operating day as required under Subsection (g)(1)(viii), instead of a 30-day rolling average.

Fourth, a commentator has questioned how the owner or operator of a unit firing multiple fuels can comply with the requirements of Subsection (g)(4) if beneficially-used process gases are used as fuels. In the Preamble to the final-form regulation, we ask the EQB to explain how this provision will be implemented under this scenario.

Finally, under Subsection (k), a commentator states that the rulemaking applies the same NO_x limit for a direct-fired heater, furnace, or oven as the limit for indirect-fired furnaces established under RACT II. They ask for clarification on the basis for this decision. We ask EQB to include the rationale for this standard in the supporting documents and Preamble submitted with the final-form rulemaking.

7. Section 129.113. Facility-wide or system-wide NO_x emissions averaging plan general requirements.—Reasonableness; Need; Protection of the public health, safety and welfare and the effects on this Commonwealth’s natural resources.

This section establishes an alternative mechanism for demonstrating compliance when a major NO_x emitting facility is unable to meet the applicable RACT emission limitation. We have two comments.

A commentator has raised two issues with this section. First, the commentator believes the ability of an owner or operator to file for an averaging plan should not be contingent on one unit not being able to meet the NO_x

RACT limit. Facility-wide and system-wide averaging plans should be able to be submitted at the discretion of the owner or operator as part of an overall strategy to achieve and maintain the emissions specified in the regulation. The commentator also states that limiting the system-wide averaging to the same ozone attainment area imposes a restriction that is unnecessary and could force the early retirement of an affected unit. If the suggestions of the commentator provide greater regulatory flexibility and still satisfy EPA and SIP requirements, and are still protective of the health, safety and welfare and natural resources of the Commonwealth, we suggest that the final-form rulemaking be amended accordingly. If the suggestions of the commentator are not feasible, we ask the EQB to explain why that is so in the Preamble to the final-form regulation.

Another commentator has asked for clarification on how DEP will administer the aggregation for a facility, subject to a concentration-based NO_x limit under Subsection (d), if that facility has two sources that are subject to the rulemaking. We ask the EQB to provide clarification on how this subsection will be administered in the Preamble to the final-form regulation.

8. Section 129.115. Written notification, compliance demonstration and recordkeeping and reporting requirements.—Implementation procedures; Clarity.

This section establishes notification, compliance demonstration, recordkeeping and reporting requirements for the owner and operator of an air contamination source subject to the rulemaking. Subsection (b)(4) requires owners and operators of combustion units and process heaters to demonstrate compliance on a daily averaging period. Commentators state that existing requirements under RACT II allow owners and operators to demonstrate compliance using a 30-operating day averaging period. They believe that the requirement of Subsection (b)(4) is a significant tightening of the presumptive limits for combustion units and process heaters. They note presumptive limits cannot be met using a daily average under certain operating conditions, such as the startup of a unit. In addition, clarification was requested on the term “daily average.” Given the concerns of the commentators, we ask the EQB to explain why the new requirement is needed and how this provision will be implemented in the Preamble to the final-form regulation.

Miscellaneous clarity.

- A commentator has suggested that § 129.112(e)(1) and (2) be amended to reflect changes in applicable federal regulations published in the *Federal Register*. We ask the EQB to review this potential amendment for inclusion in the final-form regulation.

- A commentator states that the standard of 0.6 gram NO_x /bhp-hr in § 129.112(g)(3)(iv)(A) should be 2.0 gram NO_x /bhp-hr. We ask the EQB to review this provision to ensure the correct standard is included in the final-form regulation.

- Under § 129.112(k), commentators recommend the newly defined term “combustion unit” be included in this provision.
