§ 84.3. 1983 Table “a,” Annuity 2000 Mortality Table, 1983 GAM Table, 1994 GAR Table and 2012 IAR Mortality Table.

(a) The 1983 Table “a,” the Annuity 2000 Mortality Table excluding mortality rates independent of sex, the 1983 GAM Table, the 1994 GAR Table and the 2012 IAR Mortality Table are approved by the Commissioner as annuity mortality tables for valuation.

(b) At the option of the company, the 1983 Table “a” may be used in determining the minimum standard of valuation for an individual annuity or pure endowment contract issued prior to January 1, 1986, and for an annuity or pure endowment purchased prior to January 1, 1986, under a group annuity or pure endowment contract.

(c) The 1983 Table “a,” or the Annuity 2000 Mortality Table excluding mortality rates independent of sex shall be used in determining the minimum standard of valuation for an individual annuity or pure endowment contract issued on or after January 1, 1986, and prior to June 26, 1999.

(d) The Annuity 2000 Mortality Table excluding mortality rates independent of sex shall be used, except as provided by subsections (e) and (f), in determining the minimum standard of valuation for an individual annuity or pure endowment contract issued on or after June 26, 1999.

(e) Except as provided in subsection (f), the 2012 IAR Mortality Table shall be used for determining the minimum standard of valuation for any individual annuity or pure endowment contract issued on or after August 8, 2016.

(f) The 1983 Table “a” shall be used in determining the minimum standard of valuation for an individual annuity or pure endowment contract issued on or after June 26, 1999, when the contract is based on life contingencies and is issued to fund periodic benefits arising from:

- (1) Settlements of claims pertaining to court settlements or out of court settlements from tort actions.
- (2) Settlements of claims, such as worker’s compensation claims.
- (3) Settlements of long term disability claims when a temporary or life annuity has been used instead of continuing disability payments.

(g) At the option of the company, the 1983 GAM Table or the 1994 GAR Table may be used in determining the minimum standard of valuation for an annuity or pure endowment purchased prior to January 1, 1986, under a group annuity or pure endowment contract.

(h) The 1983 GAM Table or the 1994 GAR Table shall be used in determining the minimum standard of valuation for an annuity or pure endowment purchased on or after January 1, 1986, and prior to June 26, 1999, under a group annuity or pure endowment contract.

(i) 1994 GAR Table.

(1) The 1994 GAR Table shall be used in determining the minimum standard of valuation for an annuity or pure endowment purchased on or after June 26, 1999, under a group annuity or pure endowment contract.

(2) In using the 1994 GAR Table, the mortality rate for a person age x in year $(1994 + n)$ shall be calculated as follows:

$q_x^{1994+n} = q_x^{1994} (1-AA_x)^n$ where the values of q_x^{1994} and AA_x are as specified in the 1994 GAR Table.

§ 84.3a. Application of the 2012 IAR Mortality Table.

(a) In using the 2012 IAR Mortality Table, the mortality rate for a person age x in year $(2012 + n)$ is calculated as follows: $q_x^{2012+n} = q_x^{2012} (1-G2_x)^n$.

(b) The resulting q_x^{2012+n} shall be rounded to three decimal places per 1,000, for example, 0.741 deaths per 1,000. This rounding shall occur according to the formula in subsection (a), starting at the 2012 period table rate.

(1) For example, for a male age 30, $q_x^{2012} = 0.741$.

$q_x^{2013} = 0.741 * (1-0.010)^1 = 0.73359$, which is rounded to 0.734.

$q_x^{2014} = 0.741 * (1-0.010)^2 = 0.7262541$, which is rounded to 0.726.

(2) A method leading to incorrect rounding would be to calculate q_x^{2014} as $q_x^{2013} * (1-0.010)$, or $0.734 * 0.99 = 0.727$. It is incorrect to use the already rounded q_x^{2013} to calculate q_x^{2014} .

CET-NG were adopted as recognized mortality tables for life insurance in December 1986 by the NAIC.

(g) For a policy form with separate rates for smokers and nonsmokers, the tables mentioned in subsection (e), in addition to the tables mentioned in subsection (a), are approved by the Commissioner for use in determining the minimum nonforfeiture standard for policies of ordinary insurance issued on or after the operative date of section 410A(e) of the law. The tables mentioned in subsections (a) or (e) may, at the option of the company, be substituted for the Commissioner's 1980 Standard Ordinary Mortality Table, with or without Ten-Year Select Mortality Factors, under section 410A(e)(8)(F) of the law.
