(A) Hunt, take, kill or to attempt, aid, abet, assist or conspire to hunt, take or kill any game or wildlife through the use of a firearm that dis-

(2) [Reserved].

(3) *Restricted feeding.* It is unlawful to, except for normal or accepted farming, habitat management practices, oil and gas drilling, mining, forest management activities, or other legitimate commercial or industrial practices, intentionally lay or place food, fruit, hay, grain, chemical, salt or other minerals anywhere in the southeast special regulations area for the purpose of feeding white-tailed deer, or to intentionally lay or place food, fruit, hay, grain, chemical, salt or other minerals that may cause white-tailed deer to congregate or habituate an area. If otherwise lawful feeding is attracting white-tailed deer, the Commission may provide written notice prohibiting this activity.

(d) *Permitted acts.* It is lawful to:

(2) [Reserved].

(3) [Reserved].

(5) [Reserved].

(6) Hunt or take deer during any deer season through the use of or by taking advantage of bait on private property currently operating under a valid deer control permit where approval for limited baiting activities has previously been obtained under § 147.552 (relating to application). This limited authorization is valid only to the extent that persons comply with the standards and conditions in § 147.556 (relating to lawful devices and methods).

(7) Hunt or take deer in the southeast special regulations area during regular open hunting seasons for white-tailed deer through the use of or by taking advantage of bait on private, township or municipal property only as set forth in this paragraph.

(i) *Purpose.* The purpose of this paragraph is to authorize eligible persons to hunt through the use of or otherwise take advantage of approved bait to enhance the harvest rate of white-tailed deer on private, township or municipal property within the southeast special regulations area where landowners have suffered material damage to their real property and traditional hunting and deer control methods have proven ineffective in controlling local deer populations.

(ii) *Operation.* Landowners and persons they permit to hunt on their property may hunt through the use of or otherwise take advantage of approved bait for the purpose of enhancing the harvest rate of white-tailed deer. This authorization is subject to the following conditions:

(A) This authorization only applies during regular open hunting seasons for white-tailed deer in the affected portion of each wildlife management unit located on private, township or municipal property within the southeast special regulations area.

(B) A bait site may not be located less than 250 yards from any previously established bait site authorized under this paragraph.

(C) Approved bait may be distributed at each bait site by approved feeders from 2 weeks prior to the opening of the first white-tailed deer season through the close of the last white-tailed deer season within the applicable wildlife management unit.

(D) Approved feeders are limited to sealed, waterproof, automatic, mechanical feeders that are set to distribute bait up to a maximum of three times per day during legal hunting hours only. The feeder must be visibly tagged or labeled with the full name and address of the landowner or an individual authorized by the landowner to use or place the approved feeder.

(E) Bait accumulation at any one bait site may not exceed 5 gallons total volume at any given time.

(F) Approved bait is limited to shelled corn and protein pellet supplements.

(G) It is the sole responsibility of landowners and persons they permit to hunt on their property to ensure that the area bait site is in compliance with this paragraph prior to hunting in that area.

(H) The landowner and persons they permit to hunt on their property may not, under any circumstances, hunt, take, kill or harvest any game or wildlife other than white-tailed deer at the bait site or coming to and from the bait site.

(iii) *Suspension.* The Commission may suspend the operation of any bait site if one or more of the following conditions is determined to exist:

(A) The baiting activity is causing conflict with other lawful hunting.

(B) The baiting activity is causing public safety hazards.

(C) The operation of the baiting site is not in compliance with the requirements of this paragraph.

(D) The operation if the baiting site is detrimental to the health and welfare of any wildlife, including white-tailed deer.

(E) Chronic Wasting Disease has been detected within 10 air miles of the southeast special regulations area. This suspension may remain indefinitely until the Commission determines that resumption of baiting activities will not create an unreasonable future risk of spreading of the disease on the landscape.

(iv) *Violations.* Violations of this paragraph will be prosecuted under section 2308 of the act (relating to unlawful devices and methods).

Artificial cubby—A baited enclosure constructed of natural or artificial material that is designed to house and corral a furbearer into a body-gripping trap.

Body-gripping trap—A jawed trap device designed to capture and kill a furbearer by compression of the neck or body through the operation of one or two rotating, spring-loaded jaws activated by a trigger.

Cable restraint—A galvanized stranded steel cable with a minimum diameter of 3/32 inches. The cable must be constructed of either 7 bundles comprised of 7 wires per bundle, 7 bundles comprised of 19 wires per bundle or 1 bundle comprised of 19 wires. The cable may not exceed 7 feet in length from the anchor point to the lock contacting the fully closed loop stop, must be equipped with at least one swivel device (which allows for 360° rotation) between the loop and the anchor and must have stops affixed to the cable to ensure that the circumference of the cable which makes up the loop may not be greater than 38 inches when fully open, or less than 8 inches when fully closed. Cable restraints must be equipped with an approved lock. The lock may not be constructed with moving parts. A cable restraint must include a breakaway device affixed between the lock and cable or at the end of the cable that is rated at 375 pounds or less. The cable must be maintained in good condition so that all components operate properly.

Cage or box trap—An enclosure trap designed to capture and restrain a live furbearer by confinement in a cage or box through the operation and closure of a door or portal activated by a trigger.

Leg-hold trap—A jawed trap device designed to capture and restrain a live furbearer by the foot through operation of one or two rotating, spring-loaded jaws activated by a trigger.

Marsh, pond or dam—A standing body of water.

Snare—A looped galvanized or stainless stranded steel cable 3/32 inches in diameter equipped with an approved lock listed in § 141.66(g) (relating to cable restraints). A metal ferrule shall be crimped on the cable to prevent the snare loop from closing to a circumference less than 7 inches.
