(a) A slot machine licensee shall submit to the Board and the Department a written description of its initial system of administrative and accounting procedures, including its internal control systems and audit protocols (collectively referred to as its “internal controls”) at least 90 days before slot or table game operations are to commence. (9) Procedures to ensure that the slot machine licensee’s employees comply with Chapter 435a (relating to employees).

(10) Other items the Board may request in writing to be included in the internal controls.

(b) A submission must be accompanied by the following:

(1) An attestation by the chief executive officer or other delegated individual with a direct reporting relationship to the chief executive officer attesting that the officer believes, in good faith, that the submitted internal controls conform to the requirements of the act and this subpart.

(2) An attestation by the chief financial officer or other delegated individual with a direct reporting relationship to the chief financial officer attesting that the officer believes, in good faith, that the submitted internal controls are designed to provide reasonable assurance that the financial reporting conforms to generally accepted accounting principles in the United States and complies with applicable laws and regulations, including the act and this subpart.

(c) The initial submission must also be accompanied by a report from an independent registered public accounting firm licensed to practice in this Commonwealth. The report should express an opinion as to the effectiveness of the design of the submitted system of internal controls over financial reporting and should further express an opinion as to whether the submitted system of internal

controls materially deviates from the requirements of applicable laws and regulations, including the act and this subpart.

(d) A submission by a slot machine licensee must include, at a minimum, the following:

(1) Administrative controls which include the procedures and records that relate to the decision making processes leading to management's authorization of transactions.

(ii) Transactions or financial events which occur in the operation of a slot machine or table game are recorded as necessary to permit preparation of financial statements in conformity with generally accepted accounting principles in the United States, the act and this subpart.

(iv) Transactions or financial events which occur in the operation of a slot machine or table game are recorded to ensure accountability for assets and to permit the proper and timely reporting of gross terminal and gross table game revenue, fees and taxes.

(v) Access to assets is permitted only in accordance with management's general and specific authorization.

(vi) The recorded accountability for assets is compared with existing physical assets at reasonable intervals and that appropriate action is taken with respect to any discrepancies.

(3) Procedures and controls for ensuring, in accordance with section 1323 of the act (relating to central control computer system), that each slot machine, electronic wagering terminal and fully automated electronic gaming table directly provides and communicates all required activities and financial details to the central control computer system as set by the Board.

(e) The Board, in consultation with the Department, will review each initial submission made under subsection (a) and determine whether it conforms to the requirements of the act and this subpart and provides adequate and effective controls to insure the integrity of the operation of slot machines and table games at a licensed facility. If the Board determines that the submission is deficient in any area, the Board will provide written notice of the deficiency to the slot machine

licensee and allow the slot machine licensee to submit a revision to its submission. A slot machine licensee is prohibited from commencing slot or table game operations until its system of internal controls is approved by the Board.

(f) If a slot machine licensee intends to make a change or amendment to its system of internal controls, it shall submit the change or amendment electronically to the Bureau of Gaming Operations using the Internal Controls & Table Games Submission Form posted on the Board's web site. The slot machine licensee may implement the change or amendment on the 30th calendar day following the filing of a complete submission unless the slot machine licensee receives written notice tolling the change or amendment in accordance with subsection (g) or written notice from the Board's Executive Director rejecting the change or amendment.

(g) If during the 30-day review period in subsection (f), the Bureau of Gaming Operations preliminarily determines that a procedure in a submission contains an insufficiency likely to negatively affect the integrity of slot or table game operations or the control of gross terminal or gross table game revenue, the Bureau of Gaming Operations, by written notice to the slot machine licensee, will:

(1) Specify the nature of the insufficiency and, when possible, an acceptable alternative procedure.

(2) Direct that the 30 calendar day review period in subsection (f) be tolled and that any internal controls at issue not be implemented until approved under subsection (i).

(h) Examples of submissions that may contain an insufficiency likely to negatively affect the integrity of slot or table game operations or the control of gross terminal or gross table game revenue may include the following:

(1) Submissions that fail to provide an audit trail sufficient to permit the review of gaming operations or the reconstruction of gross terminal or gross table game revenue transactions.

(2) Submissions that fail to provide for the segregation of incompatible functions so that no employee is in a position to both commit an error or perpetrate a fraud and to conceal the error or fraud in the normal course of the employee's duties.

(3) Submissions that do not include forms or other materials referenced in the submission or required under the act or this part.

(4) Submissions that would implement operations or accounting procedures not authorized by the act or this part.

(5) Submissions that are dependent upon the use of equipment or related devices or software not approved by the Board or Board staff, unless the submissions are required as part of an authorized test of the equipment or related device or software.

(i) When a change or amendment has been tolled under subsection (g), the slot machine licensee may submit a revised change or amendment within 30 days of receipt of the written notice from the Bureau of Gaming Operations. The slot machine licensee may implement the revised change or amendment upon receipt of written notice of approval from the Board's Executive Director or on the 30th calendar day following the filing of the revision unless the slot machine licensee receives written notice tolling the change or amendment in accordance with subsection (g) or written notice from the Board's Executive Director rejecting the change or amendment.

(j) A current version of the internal controls of a slot machine licensee shall be maintained in or made available in electronic form through secure computer access to the accounting and surveillance departments of the slot machine licensee and the Board's onsite facilities required under § 465a.8 (relating to licensed facility). The slot machine licensee shall also maintain a copy, either in paper or electronic form, of any superseded internal control procedures for a minimum of 5 years. The original signed two attestations required under subsection (b)(1) and (2) shall also be maintained for a minimum of 5 years. Each page of the internal controls must indicate the date on which it was approved by the Board.

§ 465a.17. Bill validators, slot cash storage boxes and table game drop boxes.

(a) Slot machines, electronic wagering terminals and fully automated electronic gaming tables must be equipped with a bill validator configured to accept any combination of currency, gaming vouchers, coupons and other instruments authorized by the Board for incrementing credits on a slot machine, electronic wagering terminal or fully automated electronic gaming table.

(b) Access to the bill validator must be controlled by at least one lock, the key to which shall be controlled by the slot operations department.

(c) The bill validator in a slot machine, electronic wagering terminal or fully automated electronic gaming table must contain a secure tamper resistant container known as a slot cash storage box or table game drop box. Currency, gaming vouchers, coupons and Board-approved instruments inserted into the bill validator shall be deposited into the slot cash storage box or table game drop box.

(d) The slot cash storage box or table game drop box on a fully automated electronic gaming table or an electronic wagering terminal must be secured to the bill validator by two separate locks, the keys to which shall be different from each other, one of which may be the lock to the belly door or main door of the slot machine, electronic wagering terminal or fully automated electronic gaming table and a second of which is the lock on the release mechanism on the slot cash storage box or table game drop box. If there is not a full door on the bill validator, the lock on the release mechanism on the slot cash storage box or table game drop box must detect and display whether it is locked or unlocked and communicate whether it is locked or unlocked to a slot monitoring system. § 465a.25. Counting and recording of slot cash storage boxes and table game drop boxes.

(a) Prior to commencing gaming operations, a slot machine licensee shall establish a comprehensive system of internal controls addressing the opening, counting and recording of the contents of slot cash storage boxes and table game drop boxes. The internal controls shall be submitted to and approved by the Board under § 465a.2 (relating to internal control systems and audit protocols) and must include:

(1) A workflow diagram which indicates the location of all equipment used in the count, including tables, baskets and bins, and the flow of all currency and paperwork from the start of the count to the conclusion of the count. The approved workflow diagram shall also be filed with the surveillance department.

(2) A description of all computer equipment, software, files or reports used in the counting and recording process and all other systems, if any, that communicate with that computer equipment. The submission must include:

(i) The names of all revenue files, the names of the employees who have access and what type of access they have to those files.

(ii) Controls to prevent access to any count room information by anyone outside of the count room until the entire count process is concluded.

(3) The procedures for conducting each required count, which must include, at a minimum, the following:

(i) In full view of the surveillance cameras, the contents of each slot cash storage box or table game drop box shall be emptied on the count table and either manually counted separately on the count table or counted in a currency counting machine located in a conspicuous location on, near or adjacent to the count table.

(ii) After the contents of each slot cash storage box or table game drop box have been emptied on the count table, the inside of the slot cash storage box or table game drop box shall be held up to the full view of the surveillance cameras to assure that all contents of the slot cash storage box or table game drop box have been removed, after which the slot cash storage box or table game drop box shall be locked and placed in the storage area.

(iii) The contents of each slot cash storage box or table game drop box shall be segregated by a count team member into separate stacks on the count table by each denomination of currency and by the type of required forms or documents. A slot machine licensee may utilize a machine to automatically sort currency by denomination.

(iv) Mutilated or torn currency shall be separated by denomination and recorded as revenue if the bill includes one entire serial number and one letter and number of the serial number from the other half of the bill.

(v) Mutilated or torn currency that is not recorded as revenue shall be placed in a sealed transparent envelope or container and transferred to the main bank by the main bank cashier or cage supervisor at the end of the count.

(vi) Except as provided in subparagraph (vii), each denomination of currency shall be counted separately by one count team member who shall place individual bills of the same denomination on the count table in full view of the surveillance cameras. The currency shall then be counted by a second count team member who is unaware of the result of the original count and who, after completing this count, shall confirm the accuracy of the total, either verbally or in writing, with that reached by the first count team member.

(vii) A slot machine licensee may aggregate counts by denomination of all currency collected in substitution of the second count required under subparagraph (vi), if the original counts are being performed automatically by a machine that counts and automatically records the value of currency, and the accuracy of the machine has been suitably tested and proven in accordance with subparagraph (viii).

(viii) Currency counting machines utilized to count and strap currency, gaming vouchers and coupons may be used if:

(A) Prior to the start of each slot or table game count, the counting machine is tested in accordance with the procedures contained in the slot machine licensee's internal controls to verify the accuracy of the counting machine.

(B) The counting machine automatically provides two separate counts of the funds at different stages of the count process and, if the separate counts are not in agreement, document the discrepancy.

(C) The counting machine is capable of determining the value of a gaming voucher or coupon by independently examining information printed on the gaming voucher or coupon. The information is used by the counting equipment to either calculate the value internally or obtain the value directly from the gaming voucher system or coupon system in a secure manner. When the gaming voucher system is utilized to obtain the value of a gaming voucher or coupon, the gaming voucher system must perform a calculation or integrity check to ensure that the value has not been altered in the system in any manner since the time of issuance.

(ix) A gaming voucher or coupon deposited in a slot cash storage box or table game drop box from a fully automated electronic gaming table or an electronic wagering terminal shall be counted and included in the calculation of revenue without regard to the validity of the gaming voucher or coupon.

(4) Procedures for scheduled breaks to be taken by the count team members during the count. This submission must also address the use of restroom facilities that are located in the count room.

(5) Procedures governing the proper wearing and immediate inspection of jumpsuits worn by the count team members to ensure that items are not taken from the count room without proper authority and that the jumpsuits have not been altered in any way. The count team is prohibited from removing the jumpsuits from the licensed facility.

(b) A slot machine licensee shall file with the Bureau of Casino Compliance, in accordance with § 601a.10(g) (relating to approval of table game layouts, signage and equipment), a schedule setting forth the times during which the contents of slot cash storage boxes, table game drop boxes from table games that are not fully automated electronic gaming tables or electronic wagering terminals and table game drop boxes from table games that are fully automated electronic gaming tables or electronic wagering terminals are to be counted and recorded. The slot machine licensee shall file notice with the Bureau of Casino Compliance and obtain verbal approval from the casino compliance supervisor at the licensed facility prior to deviating from the count schedule.

(c) Immediately prior to the commencement of the count, a count room employee shall notify the surveillance department that the count is about to begin so that surveillance can record the entire count process as required under § 465a.9(e)(8) (relating to surveillance system; surveillance department control; surveillance department restrictions).

(d) Except as otherwise provided in this section, access to the count room during the counting process shall be limited to the count team and those individuals whose presence is necessary to complete the count. The count team shall consist of at least three employees. Employees in the count room who are conducting the count may not, during the counting process, enter a storage area for slot cash storage boxes, table game drop boxes or other items that are part of the count room to perform any function that is not directly related to the counting process.

(e) The opening, counting and recording of the contents of table game drop boxes from table games that are not fully automated electronic gaming tables or electronic wagering terminals may not commence until a casino compliance representative is present in the count room. If the casino compliance representative has to leave the count room during the table game count, the count shall be suspended and all personnel in the count room shall vacate the count room until a casino compliance representative is available to observe the resumption of the count.

(f) All count team members and the casino compliance representative observing a count shall sign a Count Room Attendance Sheet. Any individual who enters or leaves the count room due to an emergency shall sign and record the time of entry or exit on the Count Room Attendance Sheet. When the individual exiting the count room is unable to sign the document due to the emergency, the count room supervisor shall record the individual's name and time of exit and a notation describing the emergency on the Count Room Attendance Sheet. At the conclusion of the count, a copy of the Count Room Attendance Sheet shall be given to the casino compliance representative.

(2) Remove their hands from or return them to a position on or above the count table or counting equipment unless the backs and palms of the hands are first held straight out and exposed to the view of other members of the count team and a surveillance camera.

(i) Once the counting process has started, the doors to the count room shall only be opened for one of the following purposes:

(1) To allow the entire count team to take a scheduled work break.

(2) To allow for a change of casino compliance representatives.

(3) To allow a main bank cashier or cage supervisor to enter the count room to perform the responsibilities in subsection (n) or (o)(6).

(4) To allow the placement of a slot cash storage box or table game drop box or to remove a trolley, empty slot cash storage boxes or table game drop boxes from the count room.

(5) To allow the count team and the casino compliance representative to exit the room at the conclusion of the count.

(6) In the event of an emergency.

(j) If any individual enters or leaves the count room during the counting process, employees remaining in the count room shall display their hands and step away from the count table, banking table and counting equipment until the individual has entered or left the count room.

(k) The counting and recording process shall be discontinued when less than three count team members are present in the count room. When the entire count team takes a scheduled break, all cash that has been removed from the slot cash storage boxes or table game drop boxes shall be counted at least once and secured in a manner approved by the Bureau of Casino Compliance before any member of the count team may leave the count room.

(l) Once the counting process has been started, a member of the count team shall notify surveillance when the count room door will be opened.

(m) All table game drop boxes from table games that are not fully automated electronic gaming tables or electronic wagering terminals shall be counted and recorded at least once each gaming day. The slot machine licensee shall designate which slot cash storage boxes and table game drop boxes from fully automated electronic gaming tables and electronic wagering terminals will be counted and recorded each gaming day. The following shall be counted and recorded separately:

The count room supervisor shall verify that all of the table game drop boxes from table games that are not fully automated electronic gaming tables or electronic wagering terminals that were collected and opened by count team members have been recorded on the reports.

(5) Once all currency has been counted and the final count totals have been obtained, employees may not be permitted to leave the count room, except in an emergency, until the recount and presentation procedures in paragraph (6) have been completed.

(6) After the contents of all table game drop boxes from table games that are not fully automated electronic gaming tables or electronic wagering terminals have been removed and counted, all cash, value chips and Poker rake chips shall be presented in the count room by a count team member to a main bank cashier or cage supervisor who, prior to having access to the information recorded on the Daily Banking Table Game Count Report and the Daily Nonbanking Table Game Count Report or electronic equivalents and in the presence of the count team members and the casino compliance representative, shall recount, either manually or mechanically, the currency, value chips and Poker rake chips presented in accordance with the following requirements:
